GO'EL (גאל): Next of kin, and, hence, redeemer. Owing to the solidarity of the family and the clan in ancient Israel, any duty which a man could not perform by himself had to be taken up by his next of kin. Any rights possessed by a man which lapsed through his inability to perform the duties attached to such rights, could be and should be resumed by the next of kin. This applied especially to parcels of land which any Israelite found it necessary to sell. This his go'el, or kinsman, had to redeem (Lev. xxv. 25). From the leading case of Jeremiah's purchase of his cousin Hananeel's property in Anathoth (Jer. xxxii. 8–12) it would appear that in later Israel at any rate this injunction was taken to mean that a kinsman had the right of preemption. Similarly, in the Book of Ruth the next of kin was called upon to purchase a parcel of land formerly belonging to Elimelech (Ruth iv. 3). It would appear from the same example that another duty of the go'el was to raise offspring for his kinsman if he happened to die without any (*ib.* 5). This would seem to be an extension of the principle of the Levirate Marriage; hence the procedure of "ḥaliẓah" was gone through in the case of Naomi's go'el, just as if he had been her brother-in-law. The relative nearness of kin is not very definitely determined in the Old Testament. The brother appears to be the nearest of all, after whom comes the uncle or uncle's son (Lev. xxv. 49).

Another duty of the go'el was to redeem his kinsman from slavery if sold to a stranger or sojourner (Lev. xxv. 47–55). In both cases much depended upon the nearness or remoteness of the year of jubilee, which would automatically release either the land or the person of the kinsman from subjection to another.

As the go'el had his duties, so he had his privileges and compensation. If an injured man had claim to damages and died before they were paid to him, his go'el would have the right to them (Lev. v. 21–26 [A. V. vi. 1–7]). The whole conception of the go'el was based on the solidarity of the interests of the tribe and the nation with those of the national God, and accordingly the notion of the go'el became spiritualized as applied to the relations between God and Israel. God was regarded as the go'el of Israel, and as having redeemed him from the bondage of Egypt (Ex. vi. 6, xv. 13). Especially in Deutero-Isaiah is this conception emphasized (Isa. xli. 14; xliii. 14; xliv. 6, 24, *et passim*).

Avenger of Blood.

However, the chief of the go'el's duties toward his kinsman was that of avenging him if he should happen to be slain by some one outside the clan or tribe. This custom is found in all early or primitive civilizations (comp. Post, "Studien zur Entwickelungsgesch. des Familienrechts," pp. 113–137). Indeed, it is the only expedient by which any check could be put upon the tendency to do injury to strangers. Here again the principle of solidarity was applied to the family of the murderer, and the death of one member of a family would generally result in a vendetta. It would appear that this custom was usual in early Israel, for the crimes of a man were visited upon his family (Josh. vii. 24; II Kings ix. 26); but at a very early stage the Jewish code made an advance upon most Semitic codes, including that of Hammurabi, by distinguishing between homicide and murder (Ex. xxi. 13, 14). It was in order to determine whether a case of manslaughter was accidental or deliberate that the Cities of Refuge were instituted (Deut. xix.; Num. xxxv.). In a case where the elders of the city of refuge were satisfied that the homicide was intentional, the murderer was handed over to the blood-avenger ("go'el ha-dam") to take vengeance on him. Even if it was decided that it was a case of unintentional homicide, the man who committed the deed had to keep within the bounds of the city of refuge till the death of the high priest, as the go'el could kill the homicide with impunity if he found him trespassing beyond the bounds (Num. xxxv. 26, 27).

In other legislations grew the principle of commuting the penalty by a money fine, known among the Anglo-Saxons as "wergild," which varied in amount according to the rank of the person; but such a method was distinctly prohibited in the Israelite code (Num. xxxv. 31).

It would appear that the custom of the blood-avenger still existed in the time of David, as the woman of Tekoah refers to it in her appeal to the king (II Sam. xiv. 11), but no further trace of it is found. Later the concentration of the population in cities gave fuller power to the courts of justice to punish cases of murder. The term "go'el" thus became entirely confined to the spiritual sense of "redeemer." It is probably used in that way in the celebrated passage in Job xix. 25: "I know that my redeemer [go'el] liveth." In the Talmud it is used exclusively in this manner.

GOG AND MAGOG.—Biblical Data: Magog is mentioned (Gen. x. 2; I Chron. i. 5) as the second son of Japheth, between Gomer and Madai. Gomer representing the Cimmerians and Madai the Medes, Magog must be a people located east of the Cimmerians and west of the Medes. But in the list of nations (Gen. x.) the term connotes rather the complex of barbarian peoples dwelling at the extreme north and northeast of the geographical survey covered by the chapter. Josephus ("Ant." ii. 6, § 1) identifies them with the "Scythians," a name which among classical writers stands for a number of unknown ferocious tribes. According to Jerome, Magog was situated beyond the Caucasus, near the Caspian Sea. It is very likely that the name is of Caucasian origin, but the etymologies adduced from the Persian and other Indo-European dialects are not convincing. In Ezek. xxxviii. 2 "Magog" occurs as the name of a country (with the definite article); in Ezek. xxxix. 6 as that of a northern people, the leader of whom is Gog. This "Gog" has been identified with "Gyges," but is evidently a free invention, from "Magog," of either popular tradition or the author of the chapter. The vivid description of the invasion indicates that the writer, either from personal knowledge or from hearsay, was acquainted with a disaster of the kind. Probably the ravages committed by the Scythians under Josiah (comp. Herodotus, i. 103, iv. 11) furnished him with his illustrative material. As contained in Ezekiel, the prophecy partakes altogether of the character of the apocalyptic prediction; *i.e.*, it is not descriptive of events but predictive in a mystic way of happenings yet to be, according to the speculative theology of the writer. Winkler's theory ("Alt-Oriental. Forschungen," ii. 137, iii. 36) is that Alexander the Great and his invasion are the background. But this anticipates the development of the Gog legend, which, indeed, saw in the Macedonian king the Gog of the Biblical prophecy (see Gog and Magog in Arabic Literature).

The Gog myth is probably part of a cycle which goes back to the Babylonian-Assyrian Creation accounts (the fight with and the defeat of the Dragon) and, on the other hand, enters largely into the eschatology of Judaism and Christianity (see Bousset, "The Anti-Christ Legend," London, 1896; Gunkel, "Schöpfung und Chaos," Göttingen, 1895).

For the rabbinical development of the legendary material in connection with the advent of the "end time" and the Messiah, see Eschatology.

E. G. H.

——In Arabic Literature: Gog and Magog, or Yajuj and Majuj among the Arabs, are mentioned in the Koran and by most Arabic geographers as more or less mythical peoples. The chief interest in them centers about two points: (1) the wall built by Dhu al-Ḳarnain (Alexander the Great) to shut them off from the rest of the world, and (2) their reappearance as a sign of the last day. Geographically they represent the extreme northeast, and are placed on the borders of the sea which encircles the earth. Descended from Japheth, son of Noah, they number twenty-four tribes. Six of these are known by name (one being that of the Turks); and the number of each tribe equals that of all the other people in the world. Some say that they belong to the Chazars, who are all Jews (Yaḳut, ii. 440).

They are of small stature, attaining to only one-half the size of a man (another report, in Yaḳut, i. 113, makes them larger). Very ferocious, they have claws instead of nails, teeth like a lion, jaws like a camel, and hair which completely hides the body. Their ears, hairy on one side, are so large that they use one for a bed and the other for a covering. They live principally on fish, which are miraculously provided for them. They resemble animals in their habits; and Mas'udi classes them among the beasts. They used to ravage the country, devouring every green thing; and it was to prevent this that the people living near them begged Alexander to build the wall shutting them in. It is even said that they were cannibals (Baiḍawi).

The wall is generally supposed to have been at Derbent, although in later times it seems to have become confused with the Great Wall of China (Abu al-Fida). The geographers frequently quote an account of it given by Sallam, the interpreter. The calif Wathiḳ Billah had seen the wall destroyed in a dream, and he sent Sallam to investigate. The latter recounts marvelous things of the countries through which he passed on his way thither, and gives a minute description of the wall itself. It was built in a gorge 150 cubits wide, and reached to the top of the mountains. Constructed of iron bricks embedded in molten brass, it had a peculiar red-and-black striped appearance. In it was an immense gate provided with a giant bolt, lock, and key, the last of which was suspended by a chain. Yaḳut remarks on this story that God, who knoweth all things, also knows whether it be true or not, but of the existence of the wall there can be no doubt, since it is mentioned in the sacred book.

As one of the signs of the approaching day of judgment this wall will be broken down and Yajuj and Majuj will appear at Lake Tiberias, the water of which the vanguard of their hosts will entirely consume, so that the rear will pass over on dry ground. They will then proceed, eating every one they meet, even corpses, and every green thing, until they come to Jerusalem. Here, until God shall destroy them, they will annoy Jesus and his faithful companions. It is said that Mohammed gave Yajuj and Majuj an opportunity to embrace Islam on the occasion of his night journey to Jerusalem; but they refused to do so, and consequently are doomed to destruction.

GOITEIN, BARUCH (BENEDIT): Hungarian rabbi; died at Högyész, Hungary, Nov. 16, 1842. He occupied the rabbinate of Högyész for many years, and wrote a work on Talmudic methodology under the title of "Kesef Nibḥar" (Prague, 1827–28, and republished several times). It contains 160 principles of rabbinical law, giving the sources as found in the Talmud and their application to practical cases. The work is of great value because of its lucid presentation of an intricate subject. Goitein retired in 1841, and was succeeded in the rabbinate of Högyész by his son **Hermann (Hirsch) Goitein** (b. 1805; d. 1860), who was himself succeeded by his son **Elijahu Menahem** (b. 1837 in Högyész; d. Sept. 25, 1902). Of the latter's sons one, **Hirsch** (b. 1863; d. Aug. 28, 1903), was rabbi at Copenhagen; another, **Eduard**, is rabbi at Burgkunstadt, Bavaria. Hirsch is the author of "Optimismus und Pessimismus in der Jüdischen Religionsphilosophie." Eduard wrote "Das Vergeltungsprincip im Biblischen und Talmudischen Strafrecht" (1893).

D. A. R.

GOLD: One of the precious metals. There are six Hebrew words which denote "gold," four of which occur in Job (xxviii. 15–17): (1) זהב, the most common term, used on account of the yellow color; it is generally accompanied by epithets, as "pure" (Ex. xxv. 11), "beaten," or "mixed" (I Kings x. 16), "refined" (I Chron. xxviii. 18), "fine" (II Chron. iii. 5). (2) סגור, "treasured," fine gold (Job xxviii. 15; used elsewhere as an adjective with זהב). (3) פז, pure or native gold (Job xxviii. 17 and elsewhere); the word מופז (I Kings x. 18) either is an adjective formed from פז or it stands for מאופז (comp. Jer. x. 9 and Dan. x. 5). (4) בצר, gold ore (Job xxii. 24). (5) כתם, a poetical term the meaning of which is "hidden" (Cant. v. 11 and elsewhere). (6) חרוץ, also a poetical term, the meaning of which is "yellow" (Prov. viii. 10 and elsewhere). Gold was known from the earliest times (Gen. ii. 11) and was chiefly used at first for the fabrication of ornaments (Gen. xxiv. 22). It is only later, in the time of the Judges, that gold is mentioned as money (Judges viii. 26). It was abundant in ancient times (I Chron. xxii. 16; II Chron. i. 15; and elsewhere), and a great quantity of it was used to ornament the houses of the rich and more especially the temples. Both sides of the walls of the Tabernacle were covered with gold, while the Ark of the Covenant and all the other utensils were made of pure gold (Ex. xxv.–xxvii. *passim*). In the Temple of Solomon even the floor and the ceiling were covered with gold (I Kings vi. 22, 30). Gold was used also in making the garments of the high priest (Ex. xxviii. *passim*). The crowns of kings were of gold (II Sam. xii. 30). Solomon and certain other kings had their shields and bucklers made of gold (I Kings x. 16, 17; I Chron. xviii. 7).

The countries particularly mentioned as producing gold are: Havilah (Gen. ii. 11, 12), Sheba (I Kings x. 2, 10), Ophir (*ib.* ix. 28; Job xxviii. 16), Uphaz (probably the same as Ophir, אופז being a corruption of אופר) (Jer. x. 9; Dan. x. 5), and Parvaim (II Chron. iii. 6). Gold in the Bible is the symbol of purity (Job xxiii. 10), of nobility (Lam. iv. 1), of great value (Isa. xiii. 12; Lam. iv. 2). Babylon was called by Isaiah (xiv. 4) the "golden city," and the entire empire figures in Daniel (ii. 38) as a head of gold. The human head is compared to a golden bowl (Eccl. xii. 6).

GOLDBAUM, WILHELM: German writer and journalist; born at Kempen, Posen, Jan. 6, 1843. After studying law for some time at the University of Breslau, he became editor of the "Posener Zeitung." He lives at present (1903) at Vienna, and since 1872 has been one of the editors of the "Neue Freie Presse." He is the author of "Entlegene Kulturen" (1877) and "Literarische Physiognomien" (1884), the first of which contains several sketches relating especially to Jewish history and literature.

S.

GOLDBERG, ALBERT: German opera-singer; born at Brunswick June 8, 1847. Educated at the Conservatorium of Leipsic (1865–69), he made his début at the court theater at Munich, and played, between 1869 and 1883, successively in Mayence, Bremen, Neu-Strelitz, Strasburg, Augsburg, and Königsberg, at the last-named place directing the city theater for three years. In 1883 he became manager of the opera at Leipsic, where he is at present (1903) engaged. The Duke of Saxe-Coburg-Gotha conferred upon him the title of "court singer." His repertoire includes: *Barbier*, *Don Juan*, *Hans Heiling*, *Telramund*, *Wotan*, *Papagino*, etc.

S. F. T. H.

GOLDBERG, BAER BEN ALEXANDER (known as **BAG** [ב"ג]): Russian scholar; born at Soludna near Warsaw in 1799; died at Paris May 4, 1884. When he was scarcely fifteen years of age his parents contracted a marriage for him, and at eighteen he had to provide for the wants of a family. Having toiled without success for more than twenty-three years, he left his native country for Berlin, where he hoped to earn a livelihood by his knowledge of Hebrew and the Talmud.

The passion for science which prevailed at that time among the German Jews laid hold of Goldberg, and at the age of forty he resumed his neglected education, taking up the study of Oriental languages. During his sojourn at Berlin he published two works: "Ḳontres mi-Sod Ḥakamim," a commentary on the Jewish calendar, with chronological tables, Berlin, 1845; and "Ḥofes Maṭmonim," a selection of essays contained in old and rare manuscripts, these essays including: (1) 28 decisions of Solomon ben Isaac (Rashi); (2) letter of Sherira Gaon on the methodology of the Talmud, and the succession of the Amoraim and Geonim; (3) "Hai ben Meḳiẓ," Abraham ibn Ezra's psychology and eschatology, according to Ptolemy; (4) "Milleta de-Sofos," fables of the Geonim; (5) "Piyyuṭ Asher Ishshesh," a liturgic poem of ten strophes on the "Baruk she-Amar" of Isaac ibn Ghayyat.

In 1847 Goldberg went to London, where he remained until 1852, there publishing, in collaboration with his brother, A. L. Rosenkranz, the astronomical work "Yesod 'Olam," by Isaac Israeli of Toledo, with a German summary and mathematical figures (Berlin, 1848). He finally settled at Paris (1852), and there published: (1) "Sefer ha-Riḳmah," Judah ibn Tibbon's Hebrew translation of the Hebrew grammar written in Arabic by Ibn Janaḥ (Frankfort-on-the-Main, 1857); (2) "Birkat Abraham," Abraham Maimonides' answers to the criticisms and questions of Daniel the Babylonian (Lyck, 1859); (3) "Sefer Taggin," treating of the crowned letters in the Scroll of the Law, after an old manuscript in the Bibliothèque Nationale of Paris, and containing extracts from "Badde Aharon" and "Migdol Ḥananel" on the same subject, together with "Midrash Ḳaṭon," attributed to the tanna R. Akiba, on the coronation and embellishments of the letters (published at the expense of the abbé J. J. L. Bargès, Paris, 1856); (4) "Risalat R. Judah ben Koreisch Tiharetensis Africani ad Synagogam Judæorum Civitatis Fez" (published in collaboration with the abbé J. J. L. Bargès, Paris, 1867); (5) "Ma'aseh Nissim," a translation from the Arabic into Hebrew of Daniel the Babylonian's critical work on Maimonides' "Sefer ha-Miẓwot" (Paris, 1866); (6) "Iggeret R. Sherira Gaon," a corrected edition of Sherira's letter, with glosses and notes (Mayence, 1873); (7) "Sefer ha-Zikronot," Elijah Levita's Biblical concordance, after a manuscript in the Bibliothèque Nationale of Paris (Frankfort-on-the-Main, 1873).

Goldberg contributed to the Hebrew periodicals many valuable articles on Jewish history and literature.

H. R. I. Br.

GOLDBERGER, SIGISMUND: Austrian jurist; born in Jägerndorf, Austrian Silesia, June 15, 1854. He was educated at the gymnasium of Troppau and at the University of Vienna. He began the practise of law in Vienna in 1887. He has written: "Oesterreichische Gewerbeordnung," 1883; "Das Neue Volksschulgesetz," 1883; "Die Directen Steuern," 1884; "Die Neuen Directen Steuern," 1898; "Das Neue Oesterreichische Patentrecht," 1899.

S.

GOLDBLATT, JACOB SEMENOVICH: Russian painter; born at Suwalki 1860; studied at the St. Petersburg Academy of Fine Arts from 1878 to 1888, gaining many prizes, among them the small gold medal for "Priam Imploring Achilles," and the large gold medal for "The Last Moments of Socrates." He graduated with the title of "class artist of the first degree in historical painting," and with a scholarship from the academy with which he completed his studies abroad. At present (1902) Goldblatt is at the head of a private school of painting and sculpture at St. Petersburg.

H. R. J. G. L.

GOLDEN CALF. See Calf, Golden.

GOLDEN RULE, THE: By this name is designated the saying of Jesus (Matt. vii. 12): "All things therefore whatsoever ye would that men should do unto you, even so do ye also unto them." In James ii. 8 it is called "the royal law." It has been held to be the fundamental canon of morality.

In making this announcement, Jesus is claimed to have transcended the limitations of Jewish law and life. The fact is, however, that this fundamental principle, like almost if not quite all the "logia" attributed to Jesus in the Sermon on the Mount, had been proclaimed authoritatively in Israel. In the instructions given by Tobit to his son Tobias (Book of Tobit, iv.), after admonishing him to love his brethren, the father proceeds to urge upon the son to have heed of all his doings and to show himself of good breeding ("derek ereẓ") in all his conduct. "And what is displeasing to thyself, that do not unto any other" (verse 15). Again, there is the well-known anecdote in which Hillel explains to a would-be proselyte that the maxim "not to do unto one's fellow what is hateful to oneself" is the foundation of Judaism, the rest being no more than commentary (Shab. 31a). See Brotherly Love and Didache.

Meaning of "Ḥaber."

It has been argued (by Hilgenfeld, Siegfried, and recently by Bousset) that the maxim of Hillel applied, like the Biblical command "Thou shalt love thy neighbor as thyself" (Lev. xix. 18), only to fellow Jews. In proof of the contention, the word "ḥaber" used by Hillel is noted. As in a technical sense Ḥaber designates a member of the Pharisaic fraternity of learned pious men, so here, according to the scholars referred to above, it has a restricted significance. The circumstances under which Hillel was speaking preclude the possibility of his having thought of the technical meaning of the word. He addresses himself to a non-Jew who at best could not for years hope to be a ḥaber. "Ḥaber" is the usual rendering for the Hebrew "rea'" (neighbor). Much philological hair-splitting has been used to restrict the meaning of this word to "compatriot," but the context of Lev. xix. 18 makes it plain that "rea'," as interpreted by these "holiness laws" themselves (see Ethics), embraces also the stranger. Tobit's admonition proves the same. After speaking of "brothers," *i.e.*, men of his race and people, the father proceeds to give his son advice regarding his conduct to others, "the hired man," for instance; and in connection with this, not in connection with the subject of his marriage, he enjoins the observance of the Golden Rule.

Love of one's friends and hatred of one's enemies are nowhere inculcated in Jewish literature, despite the fact that Bousset ("Religion des Judenthums," p. 113), referring to Matthew v. 43, calls this verse the comprehensive statement of Jewish ethical belief and doctrine. Either the second half of the sentence is an addition by a later hand, or, what is more likely, it resulted from a misapprehension of a rabbinical argumentative question. According to Schechter the statement should read as follows: "You have heard that ["ettemar" = ἐρρέθη] it has been said [in the Law] 'Thou shalt love thy neighbor.' Does this now mean ["shomea' ani"] love thy neighbor [friend] but hate thine enemy?" No. Nevertheless while Jewish ethics has never commanded and paraded love for an enemy, it has practised it (Chwolson, "Das Letzte Passahmahl Christi," p. 80). Hillel in another of his sayings speaks of love for all creatures ("ha-beriyyot"), which term certainly embraces all humanity. Nor is it true that the seeming universalism of this sentence (Abot i. 12) is restricted by the addition "bring them toward the Torah," as Bousset, following Hilgenfeld, would have it appear. "Torah" is the equivalent of the modern "religion," and if Jesus in the Golden Rule declares it to be "the law and the prophets," he puts down merely the more specific for the wider implications of the word "torah." R. Akiba ascribed the wider application to the command "Thou shalt love thy neighbor as thyself" (Lev. xix. 18; Sifra Ḳedoshim to the verse [ed. Weiss, p. 89b]; comp. Gal. v. 14; Rom. xiii. 8; Yer. Ned. 41c; Gen. R. xxiv.; and Kohler in Ethics, Rabbinical). The needy or the dead of non-Jews were never outside the range of Jewish brotherly love (Tosef., Giṭ. v. 4-5; Giṭ. 61a). The phrase "mi-pene darke shalom" (on account of the ways of peace), which motivates Akiba's injunction, does not inject a non-ethical, calculating element into the proposition, but introduces the principle of equity into it.

Negative Jewish Form.

The negative form of the Golden Rule marks if anything a higher outlook than the positive statement in which it is cast in Matthew. "What you would have others do unto you," makes self and possible advantages to self the central motive; "what is hateful to you do not unto another," makes the effect upon others the regulating principle. But be this as it may, the Golden Rule is only an assertion of the essentially Jewish and rabbinical view that "measure for measure" should be the rule regulating any one man's expectation from others (rights), while more than measure should be the rule indicating one's services to others (duties). The former is phrased "middah ke-neged middah" (Nedarim 32b), and "ba-middah she-adam moded modadin lo" (Soṭah 8b); the latter is "li-fenim mishshurat ha-din" (B. Ḳ. 99b), or to be "ma'abir 'al middotaw," that is, of a forgiving, yielding disposition (see Cruelty).

K. E. G. H.

GOLDENBERG, JOHN: Russian merchant; born on the confines of Russia and Rumania; died 1895. He followed the army in the Crimea (1856-57) as a sutler, and there acquired wealth, which he afterward greatly increased in Burma. He had settled in Turkey after the war, and reached Burma through Persia. In Burma he superintended for King Thebaw some of the large transactions in timber-cutting by which the king was enriched. Goldenberg afterward resided for a time in Vienna and Wiesbaden. By his will, made in England, he left the greater part of his fortune of £160,000 ($800,000) to six London charities and hospitals.

Bibliography: *Jew. Chron.* June 21, 1895.

J. G. L.

GOLDENBERG, SAMUEL LÖB: Austrian Hebraist; born at Bolechow, Galicia, 1807; died at Tarnopol Jan. 11, 1846. He was the founder and editor of the Hebrew periodical "Kerem Ḥemed" (vols. i. and ii., Vienna, 1833 and 1836; vols. iii.–vii., Prague, 1838–43), the appearance of which marked a new epoch in Hebrew literature, in that it supplied reading-matter of a thoroughly scientific character. Among its contributors were Rapoport, Krochmal, Zunz, Slonimsky, Pineles, S. D. Luzzatto, Reggio, Abraham Geiger, Isaac Erter, Samuel Byk, Tobias Feder, Joseph Perl, and Aaron Chorin. The pure, classic Hebrew employed by these scholars put an end to the conceits and circumlocutions of the older Hebraists; and the spirit of criticism and historical investigation manifested in all their articles dealt a blow in Galicia to Ḥasidism, which had formerly counted among its followers many of the contributors to the "Kerem Ḥemed."

S. A. R.

GOLDENTHAL, JACOB: Austrian Orientalist; born at Brody, Galicia, April 16, 1815; died at Vienna Dec. 28, 1868; educated at the University of Leipsic. In June, 1843, he became principal of the Jewish school at Kishinef, Bessarabia, and held the office for some years. He was appointed professor of rabbinica and Oriental languages at the University of Vienna in Sept., 1849, and held the chair until his death. Upon the nomination of Hammer-Purgstall he was elected corresponding member of the Vienna Academy of Sciences. His chief literary activity consisted in editing the following manuscripts: (1) "Mozene Ẓedeḳ," a treatise on philosophical ethics by Al-Ghazali, translated into Hebrew by Abraham ibn Ḥasdai, with an introduction on the lives and works of Al-Ghazali and Ibn Ḥasdai, 1838. (2) "Bi'ur ibn Roshd," Todrosi's Hebrew translation of Averroes' commentary on Aristotle's "Rhetorica," with a historical and philosophical introduction, 1842. (3) "Mesharet Mosheh," commentary by Kalonymus on Maimonides' system of Divine Providence, with his explanation of Ps. xix. and xxxvii., 1845. (4) "Mafteaḥ," methodology of the Talmud by Nissim ben Jacob of Kairwan, with introduction, notes, and references, 1847. (5) "Miḳdash Me'aṭ," Moses Rieti's didactic poem on ancient philosophy and the history of Jewish literature, with an Italian and Hebrew preface, 1851 (see "Allg. Zeit. des Jud." 1859, p. 124).

Goldenthal further published a catalogue of Hebrew manuscripts in the Imperial Library of Vienna, 1854, and an Arabic grammar in Hebrew for the use of the Oriental Jews, with a French preface, 1857. Volume i. of the "Denkschriften" of the Vienna Academy of Sciences contains his "Beiträge zu einem Sprachvergleichenden Rabbinisch-Philosophischen Wörterbuche." He issued "Das Neue Zion," a monthly periodical, Leipsic, Nisan, 1845, of which only one number appeared. Another periodical which he edited, "Das Morgenland," was also short-lived.

S. S. MAN.

GOLDFADEN, ABRAHAM B. ḤAYYIM LIPPE: Hebrew and Yiddish poet and founder of the Yiddish drama; born at Starokonstantinov, Russia, July 12, 1840. He graduated from the rabbinical school of Jitomir in 1866. For nine years he taught in government schools, first at Simferopol and afterward at Odessa, and in 1875 went to Lemberg, where he founded "Yisrolik," a humorous weekly in Yiddish which circulated mostly in Russia, but ceased to exist six months later, when its entrance to that country was prohibited. Goldfaden then went to Czernowitz, where he established the "Bukowiner Israelitisches Volksblatt," which also had only a brief existence.

Abraham Goldfaden.

While on a visit to Jassy, Rumania, in 1876, his initial dramatic creation, "The Recruits," was put upon the first regularly organized modern Yiddish stage. It was entirely his own creation, for he himself built the stage, painted the decorations, wrote the piece, composed the music, and instructed the actors. In 1878, when he already had a tolerably good troupe of actors, and a repertoire of fourteen pieces from his own pen, he carried his enterprise into Russia and at first established himself in the Maryinski Theater in Odessa. He conducted several very successful tours through Russia until it was forbidden by the government to continue Yiddish theaters (1883). After a few years in Rumania and Galicia he revived his theater in Warsaw for a short time, but in a German guise. In 1887 he went to New York, where he founded the "New Yorker Illustrirte Zeitung," the first Yiddish illustrated periodical, and was also for some time connected with the Rumanian Opera-House of that city. He returned to Europe in 1889, and lived mostly in Paris. Since 1903 he has resided in New York.

Goldfaden's Hebrew poetry, most of which is contained in his "Ẓiẓim u-Feraḥim" (Jitomir, 1865), possesses considerable merit, but it has been eclipsed by his Yiddish poetry, which, for strength of expression and for depth of true Jewish feeling, remains unrivaled. He is the most Jewish of all the Yiddish poets, and his songs, especially those contained in his popular plays, are sung by the Yiddish-speaking masses in all parts of the world. His earliest collection of Yiddish songs, "Das Yüdele," has been reprinted many times since its first appearance in 1866. But his fame rests on his dramatic productions, which number about twenty-five. The best of them, "Shulamit" and "Bar Kochba," are considered the most popular dramatic works in Yiddish. Of the others, "Shmendrik," "Die Kishufmacherin," "Die Zewei Kune Lemels," and "Dr. Almasada" deserve special mention. Most of them were reprinted many times, both in Russia and in the United States, and "Shulamit" was played with considerable success in Polish, German, and Hungarian translations.

Chron.* Oct. 13, 1899.

J. P. Wi.

GOLDFOGLE, HENRY MAYER: American lawyer and politician; born in New York city May 23, 1856; educated in the public schools and at Townsend College; admitted to the bar 1877. Goldfogle was elected judge of the municipal court, New York city, 1888, and reelected, unopposed, 1893. He resigned to resume the practise of law in 1900. He has taken part in every Democratic state convention, as delegate, during the past twenty-two years, and in 1896 was elected delegate to the Democratic national convention. He served several terms as grand president of District No. 1, Independent Order of B'nai B'rith, and also as governor of the Home for the Aged and Infirm, Yonkers. As representative of the ninth district, New York city, he was elected to the Fifty-seventh Congress (1901), and was reelected for the same district to the Fifty-eighth Congress (1903). During the year 1902 he took steps in Congress looking to the removal of the restrictions placed upon American Jews traveling in Russia.

A. F. H. V.

GOLDMAN, BERNARD: Austrian deputy; born at Warsaw Feb. 20, 1842; died at Lemberg March 23, 1901. His father, Isaac Goldman, was the owner of a Hebrew printing establishment. Bernard attended the rabbinical school in Warsaw under the direction of the censor Tugendhold. At the outbreak of the Polish revolution in 1863 he was arrested in a synagogue and sentenced to banishment in Siberia. He managed to escape, however, and, after a brief stay in Paris, settled in Lemberg (1870). In 1876 Goldman was elected to the Galician Landtag as deputy for Lemberg, and thereafter took an active interest in the welfare of the Galician Jews. In the council of the Jewish community, of which he was a member, he especially promoted the education of his coreligionists. In the year 1894 he was decorated by the emperor with the ribbon of the Order of Francis Joseph.

S. J. C.

GOLDMANN, EDWIN ELLEN: German physician; born at Burghersdorp, Cape Colony, Nov. 12, 1862; studied medicine at the universities of Breslau, Freiburg, and London, graduating (M.D.) in 1888. After having been for half a year assistant at Weigert's pathological-anatomical institute at Frankfort-on-the-Main, he became assistant at the university surgical hospital in Freiburg, which position he held until 1898. He was admitted to the medical faculty of the university as privat-docent in 1891, was appointed assistant professor in 1895, and became chief physician at the hospital of the evangelical sisters at Freiburg in 1898.

Goldmann has contributed several essays to professional journals: "Zeitschrift für Physiologische Chemie," "Centralblatt für Pathologie," "Beiträge zur Klinischen Chirurgie," etc. He published, with Middeldorp, "Croup und Diphterie."

S. F. T. H.

GOLDMARK, KARL: Hungarian violinist, pianist, and operatic composer; born at Keszthely, Hungary, May 18, 1830, where his father, Ruben Goldmark, was cantor in the synagogue. Karl received a rudimentary musical education from a schoolmaster in his native town, and at the age of twelve entered the school attached to the Oedenburger Musikverein. At a concert given by that society in 1843 Goldmark displayed such talent that his parents decided to send him to Vienna, where, after a preparatory course with Jansa (1843–44), he entered the Conservatorium, becoming a pupil of Böhm (violin) and Preyer (harmony). Here he continued his studies until the outbreak of the revolution in 1848, when he was compelled to enter the army.

Karl Goldmark.

Musical Studies.

Upon completing his term of service his eldest brother, Joseph Goldmark, enabled him to continue his musical studies. Shortly after Karl entered the Berlin Conservatorium, his brother, who had been an active participant in the insurrection and who was suspected of complicity in the assassination of Minister of War La Tour, was compelled to leave Hungary, and Karl was constrained to suspend his studies and to seek an engagement in a theater orchestra. In this he was successful; and after a brief career as an orchestral player in Raab, Hungary, he in 1850 secured a position as violinist in the Josefstädter Theater, Vienna.

It was not until 1852 that Goldmark began to compose, his first efforts showing clearly the influence of Felix Mendelssohn-Bartholdy. In 1857 he gave a concert of his own compositions, which proved a great success, and he determined, notwithstanding the offer of an engagement at the Vienna Carltheater, to discontinue his career as an orchestral player. In 1864 he wrote his overture to "Sakuntala," a composition which rapidly became popular and served to establish the fame of the composer.

His Compositions.

Goldmark's next composition, the "Queen of Sheba," was played on March 10, 1875, at the Vienna opera-house. Its reception was a most enthusiastic one, and the composer was compelled to appear forty times before the curtain. The "Queen of Sheba" has since been performed in nearly all the principal cities of Europe and America; in England, however, in consequence of the Biblical nature of the subject, its production was forbidden. The number of performances in Budapest alone amounted to over 175. It was produced at the Metropolitan Opera-House, New York, on Dec. 2, 1885, with Anton Seidl as conductor. On Nov. 19, 1886, Goldmark's second but somewhat less successful opera, "Merlin," was produced at the Vienna opera-house.

The influence of Oriental, or, more properly speaking, Hebraic melody is everywhere discernible in the best compositions of Goldmark. While he has undoubtedly accomplished his best work in the field of opera, several of his overtures are remarkable for their superb orchestration and power of graphic description. In addition to the foregoing compositions, Goldmark has written the operas: "Das Heimchen am Herd" (after Charles Dickens' "The Cricket on the Hearth"), which was performed at Vienna March 21, 1896, with great success; "Der Kriegsgefangene," in two acts (Vienna, Jan. 17, 1899); "Der Fremdling" (1899); and "Götz von Berlichingen," played in the principal theaters of Europe during the winter of 1902. Among the other works of Goldmark the following are the most noteworthy: the overtures "Penthesilea," "Im Frühling," "Der Gefesselte Prometheus," and "Sappho"; the "Symphony in E-flat," and that entitled "Ländliche Hochzeit"; two suites for violin and piano; the violin concerto, op. 28, and several songs and chamber-music compositions.

Bibliography: W. J. Henderson, *Famous Composers and Their Works*, pp. 515-518; Maitland, *Masters of German Music*, pp. 137-169; Riemann, *Musik-Lexikon*.

S. J. So.

GOLDSCHMIDT, ADOLPH: German art critic; born at Hamburg Jan. 15, 1863. After a short business career he devoted himself (1885) to the study of the history of art at the universities of Jena, Kiel, and Leipsic. He took his degree in 1889 with the dissertation "Lübecker Malerei und Plastik bis 1530," the first detailed analysis of the medieval art of northeast Germany. After traveling through Germany, Denmark, Sweden, the Netherlands, England, France, and Italy, on the presentation of his work "Der Albanipsalter in Hildesheim und Seine Beziehung zur Symbolischen Kirchenskulptur des 12. Jahrhunderts" (1893), he became privat-docent at the University of Berlin. His "Studien zur Geschichte der Sächsischen Skulptur in der Uebergangszeit vom Romanischen zum Gotischen Stil" (Berlin, 1902) traces the gradual development of German sculpture with reference to the period of its florescence in the thirteenth century. His "Die Kirchenthür des Heil. Ambrosius in Mailand" (1902) for the first time showed the door of the Church of St. Ambrogio in Milan to be a monument of early Christian art. He has also contributed a number of important articles on North-German painting, Saxon sculpture, and early medieval miniature manuscripts to the "Repertorium für Kunstwissenschaft," "Zeitschrift für Christliche Kunst," and "Jahrbuch der Kgl. Preussischen Kunstsammlungen."

S. D. J.

GOLDSCHMIDT, HENRIETTE (née Benas): Wife of Rabbi **A. M. Goldschmidt** (m. 1855); born at Krotoschin, Prussia, Nov. 23, 1825; and now (1903) resident at Leipsic. She was one of the pioneers of the movement for the emancipation of women in Germany. In 1866 she entered the Allgemeine Deutsche Frauenverein; in 1867 she was elected to the board of directors, becoming later its vice-president. She founded in Leipsic a Verein für Familien- und Volkserziehung, in connection with which were established two public kindergartens and an institution for the training of kindergarten teachers which has already rendered about 1,000 young women capable of earning their livelihood. As a result of one of her lectures the municipal industrial school for girls was founded at Leipsic. Besides numerous articles on the Fröbel system of education she wrote "Ideen über Weibliche Erziehung im Zusammenhange mit dem System Friedrich Fröbel's." Though in her seventy-eighth year, she still conducts the various institutions which she helped to found; and at the Leipsic Teachers' Association she was invited to speak on the fiftieth anniversary of the death of Fröbel. This is the only instance in which a German teachers' association has asked a woman not a teacher by profession to speak on a pedagogic subject.

Bibliography: Auguste Schmidt, in *Neue Bahnen*, Dec. 1, 1895.

S. R. P.

GOLDSCHMIDT, HERMANN: German painter and astronomer; born at Frankfort-on-the-Main June 17, 1802; died at Fontainebleau Sept. 10, 1866. Destined originally for a commercial career, he spent a dozen years in his father's warehouse, devoting, however, his leisure to painting. At length he repaired to Munich, where he studied under Cornelius and Schnorr. In 1836 he settled in Paris, and exhibited his first picture, "Woman in Algerian Costume." This was followed by many others until Goldschmidt became famous as a historical painter. One of his later works was the "Death of Romeo and Juliet" (1857).

In 1847 Goldschmidt became interested in astronomy. He procured a little two-inch telescope, and with this discovered (Nov. 15, 1852) a minor planet named "Lutetia" by Arago. With a two and two-third inch telescope he discovered four more planets, Pomona, Atalanta, Harmonia, and Daphne. Next Goldschmidt procured a four-inch telescope, with which he found nine more planets, Nysa, Eugenia, Doris, and Pales (discovered in the same night), Europa, Alexandra, Melete, Danæ, and Panopea. Thus within nine years Goldschmidt discovered fourteen minor planets with nothing larger than a small telescope, and from the windows of his garret, which necessarily afforded a very limited view of the heavens.

Goldschmidt's work was not confined to the discovery of planets. He was one of the observers who journeyed to Spain to watch the solar eclipse of 1860. The Lalande astronomical prize was awarded to him eight times by the Academy of Sciences; he received the cross of the Legion of Honor in 1857 and the gold medal of the Royal Astronomical Society of London in 1861. In 1862 the French government awarded him a pension of 1,500 francs.

Bibliography: *Monthly Notices of the Royal Astronomical Society*, xxvii. 115; *Meyers Konversations-Lexikon*.

S.

GOLDSCHMIDT, HERMANN (Herman Taber): German novelist and playwright; born at Frankfort-on-the-Main July 18, 1860. He attended the local gymnasium, and studied law at the universities of Heidelberg, Leipsic, and Marburg. He was first referendar and then (in 1888) became "Gerichtsassessor" in his native city. Soon thereafter he embraced a literary career. He published, among other works, a social novel, "Ein Weg zum Frieden" (1890), and in the following years he wrote the plays "Fortuna," "Der Freie Wille," "Goldene Lüge," "Hans der Träumer," "Ewige Liebe," "Ein Glückliches Paar," and "Frau Lili," all of which have been produced on German and foreign stages, including the court theaters of Berlin, Vienna, Munich, the Berliner Deutsches Theater, etc.

S.

GOLDSCHMIDT, JULIUS: German physician; born at Mayence Feb. 12, 1843. He studied at the universities of Würzburg and Giessen, receiving from the latter his degree as doctor of medicine in 1866. Accompanying in the same year a patient to Madeira, he established himself there as a physician, and soon became one of the leading practitioners. In Funchal, the capital of the island, he founded and endowed an international hospital for sailors. In 1896 he removed to Paris, where he is now (1903) practising.

Goldschmidt's special field is the treatment of pulmonary diseases and leprosy, on which latter disease he is a high authority. It was partly through his endeavors and influence that in 1897 a congress for the consideration of leprosy was convened at Berlin.

Among Goldschmidt's essays may be mentioned: "Sur la Curabilité de la Lèpre," in "Bulletin de Médecine," ix.; "Erste Behandlung der Lepra Durch Tuberculin," in "Deutsche Medizinische Wochenschrift," 1891; "Kochsche Reaction und Heilwirkung bei Lepra Tuberosa," *ib.* 1892, No. 4; "Wirkung der Tuberculosis auf Lepra," *ib.* No. 15; "Immunität Gegen Influenza Durch Vacciniruug mit Animaler Lymphe," *ib.* No. 45; "Behandlung und Heilung der Lepra Tuberosa mit Europhen," in "Therapeutische Monatsschrift," 1893; "Zur Aetiologie und Prophylaxis der Lepra," in "Berliner Klinische Wochenschrift," 1894.

He is also the author of the following works: "Madère, Etudiée Comme Station d'Hiver et d'Eté," 2d ed., Paris, 1884; "Madeira und Seine Bedeutung als Heilungsort" (with Mittermeyer), 2d ed., Leipsic, 1885; "Die Lepra auf Madeira," *ib.* 1891; "La Lèpre," Paris, 1894.

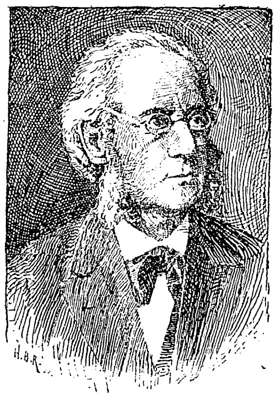
Bibliography: Pagel, *Biog. Lex.* s.v., Leipsic, 1901.

S. F. T. H.

GOLDSCHMIDT, LAZARUS: German writer; born at Plungiany, Lithuania, Russia, Dec. 17, 1871. He received his rabbinical education at the Talmudic school in Slobodki, near Kovno. In 1888 he went to Germany, and in 1890 entered the Berlin University, where, under the guidance of Professors Dillmann and Schrader, he devoted himself to the study of Oriental languages, especially Ethiopic. Goldschmidt, who at present (1903) lives at Berlin, has published the following works: "Das Buch Henoch," retranslated from the Ethiopic into Hebrew, and edited with introduction, notes, and explanations (Berlin, 1892); "Bibliotheca Aethiopica," a list and description of all the known Ethiopic prints (Leipsic, 1893); "Das Buch der Schöpfung (ספר יצירה)," critical text, translation notes, etc. (Frankfort-on-the-Main, 1894); "Baraita de-Ma'ase Bereshit," the story of the Creation, ascribed to Arzelai bar Bargelai (Strasburg, 1894; this supposed Midrash is an Aramaic translation of the Ethiopic "Hexaemeron" of Pseudo-Epiphanias, edited by Trumpp in Ethiopic with a German translation, Munich, 1882, and the name of the supposed author is an anagram of Goldschmidt's Hebrew name, Eliezer ben Gabriel); "Vita do Abba Daniel," Ethiopic text, published, translated, and annotated in collaboration with F. M. E. Pereira (Lisbon, 1897); "Die Aethiopischen Handschriften der Stadtbibliothek zu Frankfurt a. M." (Berlin, 1897). In the year 1896 Goldschmidt commenced the publication of the Babylonian Talmud (from the *editio princeps*), with German translation, variants, and explanations. Up to the present (1903) the sections Zera'im and Mo'ed have been published, together with a part of the section Neziḳin. Both the edition of the text and the translation have been severely criticized by David Hoffmann in Brody's "Zeitschrift für Hebräische Bibliographie," i. 67–71, 100–103, 152–155, 181–185. Goldschmidt replied in a pamphlet, "Die Recension des Herrn Dr. D. Hoffmann über Meine Talmudausgabe im Lichte der Wahrheit," Charlottenburg, 1896. See also "Theologische Literaturzeitung," 1896, pp. 477–479, and 1897, pp. 631–633.

D. L. Grü.

GOLDSCHMIDT, LEVIN: German jurist; born at Danzig May 30, 1829; died at Wilhelmshöhe July 16, 1897. From 1847 to 1851 he pursued his studies at the universities of Berlin, Bonn, and Heidelberg, receiving his doctor's degree in 1851 from the University of Halle. He practised for several years in the courts of Danzig, became privat-docent at the University of Heidelberg in 1855, and was appointed associate professor in 1860. In the years 1857–60 he published "Kritik des Entwurfs eines Handelsgesetzbuchs für die Preussischen Staaten" and "Gutachten über den Entwurf eines Deutschen Handelsgesetzbuchs nach den Beschlüssen Zweiter Lesung," which at once attracted attention to him as a critical jurist. During the same period he published "Der Lucca-Pistoja-Aktienstreit," Frankfort-on-the-Main, 1859 (Supplement, 1861). He is the founder (1858) of the "Zeitschrift für das Gesammte Handelsrecht."



Levin Goldschmidt.

Goldschmidt's scholarship was next displayed in his "Encyclopädie der Rechtswissenschaft im Grundriss," Heidelberg, 1862. He then began the great work which occupied him during the remainder of his lifetime, but which he did not live to complete, namely, "Das Handbuch des Handelsrechts," Erlangen, 1864–68. This is the work with which his fame as a historical jurist is identified, it being recognized as a masterly presentation of the general history of commercial law.

In 1866 Goldschmidt was promoted to a professorship in the juridical faculty at Heidelberg. He next received the appointment of "Justizrat" in the Bundesgericht at Leipsic, afterward occupying a judicial position at the Reichsoberhandelsgericht. In 1875 he became professor of commercial law in Berlin University, and received the title "Geheimer Justizrat." From 1875 to 1877 he was also a member of the German Reichstag, representing the city of Leipsic.

Of his further publications the following deserve special mention: "Das Dreijährige Studium der Rechts- und Staatswissenschaften," Berlin, 1878; "Erwerbs- und Wirtschaftsgenossenschaften, Studien und Vorschläge," Stuttgart, 1882; "Rechtsstudium und Prüfungsordnung," *ib.* 1887; "Die Haftpflicht der Genossen und das Umlageverfahren," Berlin, 1888; "System des Handelsrechts," Stuttgart, 1887, 4th ed., 1891.

Bibliography: Riesser, *Gedächtnissrede*, Berlin, 1897 (with portrait); Pappenheim, *Nachruf*, in *Zeitschrift für Handelsrecht*, xlvii.; *Deutsche Juristenzeitung*, ii., No. 15; Adler, *Levin Goldschmidt*, in Bettelheim, *Biographisches Jahrbuch*, ii. 119–122.

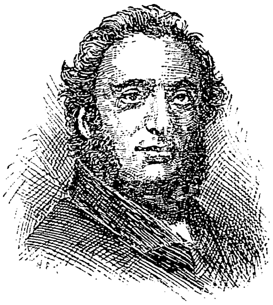
GOLDSCHMIDT, LOTHAR. See Schmidt, Lothar.

GOLDSCHMIDT, MEÏR AARON: Danish political writer; born Oct. 26, 1819, at Vordingborg, Denmark; died at Copenhagen Aug. 15, 1887. The dream of his youth was to become a famous physician, but as Danish church orthodoxy prevented him, because he was a Jew, from taking his B.A. degree (1836), Goldschmidt gave up the academic course, and in 1837 started the "Nästved Ugeblad" (later called "Själlandsposten"), a political weekly. He at once came into conflict with the authorities, and was fined heavily, and condemned to submit his publication to censorship for a year. Goldschmidt sold the paper, and as the Danish king (Frederick VI.) died at this time and a liberal government was expected under his successor (Christian VIII.), he moved to Copenhagen, and again entered into politics, with a new paper, the "Corsaren" (October, 1840). This journal was a brilliant but reckless paper, representing extreme republicanism or socialism, and taking a strong stand against the crown, which had failed to grant the expected liberties. For this the government promptly condemned Goldschmidt to imprisonment on bread and water for twenty-four days, and to the permanent censorship of his paper. But he was undaunted and continued the publication of the "Corsaren." It likewise brought him into conflict with individual public men, but it matured his mind, won him fame, and caused some novels of his to sell so well (1846) that he went abroad on the proceeds (1847). In Coppet he met the reformed priest Piguet and was much influenced by him. Goldschmidt himself admits that an unconscious Christian influence is perceptible in "Nord og Syd," which he edited 1847–59. This magazine was also political, but of a much more moderate tone. In 1861 Goldschmidt started another magazine, "Ude og Hjemme," but soon discontinued it, and, thoroughly disgusted with Danish affairs, he moved to England in 1861. He returned, however, in 1862, but from that time on remained outside of politics. His career is not unlike that of Georg Brandes, with this difference, that Goldschmidt used politics where Brandes used literature to rouse the Danish apathy, hoping to change its philistine attitude toward the problems of life. Goldschmidt's social-political influence was immense, though negative as far as visible and systematic results were concerned, because he stood alone and had to fight the crown as well as the forces of mediocrity.



Meïr Aaron Goldschmidt.

In Literature.

After his return in 1862 Goldschmidt devoted himself entirely to literature, in which he became especially remarkable as a master of style. As a man he was romantic-mystic as much as he was Jewish, but his mysticism was Oriental in cast; and his romanticism was original and neither ecclesiastical nor medieval. These traits are evident in "En Jöde" (1845), which has been translated into several European languages; "Ravnen" (1868–69); "Hjemlös" (1859); "I den anden Verden" (1869). He wrote also "Fortällinger og Skildringer" (1863–1865), "Arvingen" (1867), and several plays, among which "Rabbineren og Ridderen" (1869) and "Svedenborg's Ungdom" (1863) were staged at the Royal Theater.

Goldschmidt endeavored to construct a philosophical world-system on the basis of Nemesis, but his work on this subject has not yet been published. It is a noteworthy attempt to translate Hebrew theism into abstract thought and enliven that thought with moral sentiment. Goldschmidt called the last volume of his autobiography "Nemesis" (2 vols., 1877), and everywhere in it points to Nemesis as shaping his life. The same thought is found in "Ravnen" (1868–1869) and "En Skavank" (1867). In the latter novel he connects his doctrine with ancient Egyptian worship. Goldschmidt is remarkable for his psychological insight and his masterly delineation of Jewish character, especially in its profounder aspects. Typical in this respect are his "Maser" and "Avrohmda Nattergal."

GOLDSCHMIDT, OTTO: German pianist and composer; born at Hamburg Aug. 21, 1829. He studied under Jacob Schmidt and F. W. Grund; with Hans von Bülow under Mendelssohn at the Leipsic Conservatorium: and in 1848 under Chopin in Paris. In 1849 he played at a concert given in London by Jenny Lind; in 1851 he accompanied her on a tour through America; and on Feb. 5, 1852, was married to her at Boston. From 1852 to 1855 they lived in Dresden, and from the latter year until Madame Goldschmidt's death (1887), in London and at Malvern, Worcestershire.

In 1861 Goldschmidt was elected an honorary member of the London Philharmonic Society; in 1863 he was appointed vice-principal of the Royal Academy of Music (London); in 1863 and 1866 he conducted musical festivals at Düsseldorf and Hamburg respectively; and in 1875 he founded the Bach Choir in London.

His principal works are: "Ruth," an oratorio, performed at the Hereford musical festival of 1867; pianoforte concerto, op. 10; trio for pianoforte, op. 12; 12 studies for the same instrument, op. 13; 12 songs, op. 8, 9; and some part-songs. With Sir William Sterndale Bennett he edited "The Chorale Book for England."

s. A. P.

GOLDSCHMIDT, SIEGFRIED: German Orientalist; born at Cassel Oct. 29, 1844; died at Strasburg Jan. 31, 1884. He was educated at the universities of Leipsic, Berlin, and Tübingen, graduating (Ph.D.) in 1867. His doctor's dissertation, "Der VIIte Prapâṭhaka des Sâmaveda-Ârcika in der Naigeya-Çakhâ Nebst Andern Mitteilungen über Dieselbe," published in the "Monatsberichte der Königlichen Preussischen Akademie der Wissenschaften" (1868, pp. 228–248), was an edition of the single portion which has been preserved of the Kâuthuma recension of the Sama-Veda. Goldschmidt continued his studies, first at Göttingen and later in Paris, where he gained a thorough mastery of the French language. On the outbreak of the Franco-Prussian war he returned to Germany and enrolled as a volunteer. He took part in the siege of Paris. At the close of the war Goldschmidt was appointed assistant professor in the newly created University of Strasburg, with which he was connected during the remainder of his life. He became professor Sept. 12, 1881, but was fated never to sit in the faculty. Spinal consumption, the disease which ended his life, had already sapped his vitality, and after two and a half years of suffering death came as a welcome relief.

Siegfried Goldschmidt was not a prolific writer. He published but fourteen scientific studies, mostly short notes in Kuhn's "Zeitschrift für Vergleichende Sprachforschung" and the "Zeitschrift der Deutschen Morgenländischen Gesellschaft." His interest was centered upon Prakrit, and brief as his articles were they formed valuable contributions to the investigation of the medieval languages of India. His most important work was his edition of the great Prakrit poem ascribed to Kâlidâsa, the Râvaṇavaha or Sêtubandhu (Strasburg, 1880–84). This is in two volumes, the first of which comprises the text and an index of the Prakrit words, in preparing which Siegfried was assisted by his brother Paul, while the second part contains the German translation. The only other book published by this scholar was a volume of "Prâkṛtica" (*ib.* 1879), containing grammatical studies on Prakrit.

GOLDSCHMIEDT, GUIDO: Austrian chemist; born in Triest Oct. 5, 1850; studied at Vienna and Heidelberg. First as assistant, later as associate professor at the chemical laboratory of Vienna University, he published a number of important articles on organic chemistry, for which he received the Lieben prize of the Imperial Academy of Sciences on different occasions. After a short activity as professor at the High School for Agriculture in Vienna, he was called as professor to the university at Prague in 1892. He won distinction by his demonstration of the constitution of papaverin, of which he had made a thorough study. In conjunction with several of his pupils, as well as independently, he published a large number of treatises on substances of the pyridin and quinolin order, besides essays in other departments of organic chemistry. The University of Prague elected him dean of the philosophical faculty in 1900. He is also a member of the council of the university and of the Imperial Academy of Sciences.

s. A. Ki.

GOLDSMID: A family of English financiers, who trace descent from a certain Uri ha-Levi of Emden, as shown in the pedigree on opposite page.

The following were some of the prominent members of the family:

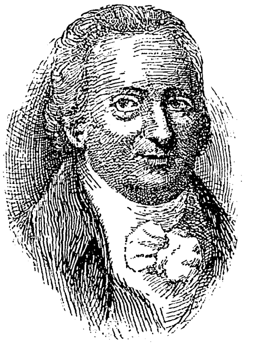
Aaron F. Goldsmid: London merchant and founder of the Goldsmid family of England; born at Amsterdam; died June 3, 1782. He was the son of Benedict Goldsmid, a Hamburg merchant. In 1765 he left Holland with his family to settle in London, where he founded the firm of Aaron Goldsmid & Son, subsequently Goldsmid & Eliason. The firm of Aaron Goldsmid & Son experienced serious reverses through the failure of Clifford & Sayer, one of the principal houses in Holland. Hence only George, the eldest son, entered into partnership with his father. The other sons founded new businesses for themselves in which they amassed large fortunes. Goldsmid left four sons and four daughters. The second son, Asher, was one of the founders of the firm Mocatta & Goldsmid, bullion-brokers to the Bank of England. Benjamin and Abraham were famous as financiers and philanthropists.

Bibliography: Levy Alexander, *Memoirs of Benjamin Goldsmid of Roehampton*, 1808; James Picciotto, *Sketches of Anglo-Jewish History*.

J. I. H.

Abraham Goldsmid: English financier and philanthropist; born in Holland in 1756 (?); died at Morden, near London, Sept. 28, 1810; third son of Aaron Goldsmid. About 1765 he went to England with his father, and soon entered into partnership with his brother, Benjamin Goldsmid, the two starting in business as bill-brokers about 1777. They afterward took a house in Capel street, and soon became successful bidders for the national loan. It was regarded on the Stock Exchange as an unprecedented event that men, till then scarcely known, should succeed in wresting the negotiation of government loans from the hands of the banking clique. This was the first step in their rise to eminence; and after having been very successful in negotiating several public loans, they acquired considerable wealth.

After the death of his brother Benjamin in 1808, Abraham continued the operations of the firm. In 1810 the house of Baring & Goldsmid contracted for the government loan of £14,000,000 ($70,000,000). Sir T. Baring, with whom the Goldsmids had been connected in business, died at this juncture: and his death added greatly to Goldsmid's many burdens, he having now to struggle alone. In addition, a powerful organization had been formed against the loan, and the resources of the two houses of Baring & Goldsmid combined were scarcely sufficient to combat it. The price of scrip fell daily, and the fortunes of Goldsmid fell with it. At the same time, the East India Company, which had placed in his hands for sale bills of exchange to the value of half a million, became alarmed, and claimed the price of its property. The payment was fixed for Sept. 28, 1810. Goldsmid was unprepared, and on the following morning he was found dead, with a pistol by his side.



Abraham Goldsmid.

The Goldsmid firm subsequently made great efforts to discharge their liabilities. By 1816 they had paid fully fifteen shillings on the pound; and in 1820 Parliament, on the petition of the creditors, annulled the remaining portion of the debts.

O. E. d'A. G.

Albert Goldsmid: Major-general in the British army; born in 1794; died Jan. 6, 1861; son of Benjamin Goldsmid. He entered the army in 1811 as cornet in the 12th Light Dragoons, and the following year went on active duty in Spain, where he continued to serve until the close of the war in 1814. He was present at the cavalry affairs of Castrajon, Quintare de Puerta, and Monasterio, and at the battles of Salamanca, Vittoria, Nivelle, and Nive, and was awarded the silver medal and four clasps. He served also during the campaign of 1815, and was present at Waterloo. In June, 1826, he retired on half-pay with the rank of major, but was gazetted lieutenant-colonel Nov. 23, 1841; colonel June 20, 1854; and major-general Oct. 26, 1858.

Bibliography: *The Times*, London, Jan. 9, 1861.

Albert Edward W. Goldsmid: Colonel in the British army; born at Puna, Bombay, Oct. 6, 1846; son of Henry Edward Goldsmid. In June, 1866, he was gazetted from Sandhurst, England, to his first commission in the 104th Foot of the Bengal Fusiliers. He became adjutant of battalion in 1871, captain in May, 1878, major in 1883, lieutenant-colonel in 1888, and colonel on April 21, 1894. In 1892 Colonel Goldsmid was selected by Baron de Hirsch to supervise the colonies in Argentina, but retired from the task to take up his appointment as colonel-in-command of the Welsh regimental district at Cardiff in 1894. In 1897 he was promoted chief of staff, with the grade of assistant adjutant-general in the Thames district. At the departure of the Aldershot staff with Sir Redvers Buller in the conflict with the Boers in 1899, he acted as chief staff-officer at the camp at Aldershot, and was entrusted with the duties of mobilization. In Dec., 1899, when the sixth division of the South-African field force was mobilized, Goldsmid was selected as chief staff-officer to General Kelly-Kenny with the grade of assistant adjutant-general, and in that capacity was present at the battle of Paardeberg. During the earlier stages of the war he was commandant of the Orange River, Herbert, and Hay districts, 1900.

Colonel Goldsmid is an ardent Zionist, and is chief of the Chovevei Zion of Great Britain and Ireland. The success of the Jewish Lads' Brigade in London and the provinces is mainly due to Goldsmid's initiative. In 1903 he became president of the Maccabeans, of which he had been one of the founders.

Anna Maria Goldsmid: Writer and communal worker; born in London Sept. 17, 1805; died there Feb. 8, 1889; daughter of Sir Isaac Lyon Goldsmid, Bart. She was a pupil of the poet Thomas Campbell, and translated (1839) into English twelve sermons delivered by Dr. Gotthold Salomon at Hamburg, Ludwig Phillipson's "Die Entwickelung der Religiösen Idee" (1853), and J. Cohen's "Les Déicides" (1872). Miss Goldsmid also published many original pamphlets on educational and other questions, and the formation of the Jews' Infant-Schools was largely due to her enthusiasm and support. She was also interested in University College School and Hospital and the Jews' Deaf and Dumb Home.

Benjamin Goldsmid: English financier and philanthropist; born in Holland 1755; committed suicide April 15, 1808; eldest son of Aaron Goldsmid, a London merchant. In 1777 Benjamin and his brother Abraham established themselves in business as bill-brokers. Their means increased on the death of an uncle in Holland who bequeathed to them £15,000. The marriage of Benjamin Goldsmid to Jessie, daughter of Israel Levin Salomons of Clapton, with a dowry of £100,000, placed the credit of the firm on a solid footing. Large sums passed through the hands of the Goldsmids in the purchase and sale of bullion, stocks, navy and exchequer bills, and in negotiating English and foreign bills of exchange. They became the largest loan-contractors of their day in England. Benjamin's great wealth brought him much social recognition, and he was intimately connected with Pitt, whose financial schemes were largely carried out through him, and with several members of the royal family, who visited him at Roehampton.

Goldsmid was the founder of the Naval Asylum, which for a time was under his management. The two brothers collected a fund for a Jewish hospital. This was never erected, but some of the money raised was used in building and endowing the Neweh Ẓedeḳ at Mile End.

BIBLIOGRAPHY: *Gentleman's Magazine*, lxxviii.; L. Alexander, *Memoirs*; *Young Israel*, i., No. 6; *Jew. World*, March, 1878; Picciotto, *Sketches of Anglo-Jewish History*, pp. 249-252, London, 1875.

Sir Francis Goldsmid: English philanthropist and politician; born in Spital square, London, May 1, 1808; died May 2, 1878. The eldest son of Sir Isaac Lyon Goldsmid, Bart., he was educated privately, and was called to the bar in 1833, becoming queen's counsel in 1858. In 1859 he succeeded to his father's honors, which included a barony of Portugal. He entered Parliament in 1860 as member for Reading, through a by-election, and represented that constituency in the Liberal interest until his death. While still a young man he actively cooperated with his father to secure to the Jews full emancipation from civil and political disabilities. In 1839 he wrote "Remarks on the Civil Disabilities of the Jews," and in 1848 "A Reply to the Arguments Against the Removal of the Remaining Disabilities of the Jews." He was one of the chief supporters of University College, and gave material aid to University College Hospital.

He was associated with various Jewish religious and charitable organizations. He was connected with the Reform movement from its commencement, and was elected president of the Council of Founders of the West London Synagogue. He was vice-president of the Anglo-Jewish Association from its establishment in 1871, and was president of the Rumanian Committee which originated in the association. His greatest services to his race were, however, in the direction of improving the social condition of the Jews in those countries in which they were oppressed. The condition of the Poles in 1863 moved him to organize meetings for the purpose of securing some alleviation of their sufferings, and he also forcibly protested on several occasions in Parliament against the oppression of the Jews, notably that in Servia and Rumania.

Goldsmid was deputy lieutenant for Berks and a justice of the peace for Berks and Gloucester. Having no children, the baronetcy devolved upon his nephew, Julian Goldsmid. His writings include, besides those already mentioned: "Two Letters in Answer to the Objections Urged Against Mr. Grant's Bill for the Relief of the Jews" (1830); "A Few Words Respecting the Enfranchisement of British Jews Addressed to the New Parliament" (1833); "A Scheme of Peerage Reform, with Reasons for the Scheme" (1835).

BIBLIOGRAPHY: Marks and Löwy, *Life of Sir Francis Goldsmid*, 1882; *Jew. Chron.* and *Jew. World*, May 10, 1878; *The Times* (London), May 4, 1878.

Frederick David Goldsmid: English member of Parliament; born in London 1812; died there March 18, 1866. He was the second son of Sir Isaac Lyon Goldsmid, and was educated at University College, London. After his marriage (1834) he spent a year in Italy, and on returning to England, became a member of the firm of Mocatta & Goldsmid. Goldsmid was an active member of the Metropolitan Association for Improving the Dwellings of the Laboring Classes, as well as of a large number of Jewish charities. He was also a member of the council of University College, London, and of the committee of the college hospital, as well as president of the Jews' Hospital and of the West Metropolitan Jewish School.

Goldsmid was member of Parliament for Honiton from July, 1865, until his death.

BIBLIOGRAPHY: *Jew. Chron.* March 23, 1866; Boase, *Modern English Biography*, Truro, 1898.

Henry Edward Goldsmid: Indian civil servant; born in London May 9, 1812; died at Cairo, Egypt, Jan. 3, 1855. He entered the service of the East India Company in 1832, and three years later became assistant revenue commissioner for Bombay. While occupying this post he devised the revenue survey and assessment system, Puna being included in its organization. "Goldsmid's Survey," as it was called, was a great boon to the poor agriculturists of the presidency; and it was permanently established by the Bombay legislature in 1865. It was incorporated in the Bombay revenue code of 1879, and was also adopted by the Berars and the native state of Mysore.

Goldsmid's health broke down owing to his incessant labors; and after holding the positions of private secretary and chief secretary to the governor of Bombay, he went to Cairo, where he died. Ten years later a memorial rest-house was erected by public subscription at Decksal, near the place where Goldsmid's survey had commenced.

BIBLIOGRAPHY: *Young Israel*, i., No. 10.

Sir Isaac Lyon Goldsmid: English financier and the first Jewish baronet; born in London Jan. 13, 1778; died there April 27, 1859. He was the son of Asher Goldsmid, and nephew of Benjamin and Abraham Goldsmid, the financiers. Educated at an English school in Finsbury square, he received a sound financial training in the technicalities of his father's business of bullion-broking. At a later period his association with Ricardo made him familiar with the leading questions of political science. He became in due course a partner in the firm of Mocatta & Goldsmid, bullion-brokers to the Bank of England and to the East India Company. His early ventures on the Stock Exchange were unfortunate, and, after losing on one occasion £16,000, he abandoned speculation and contented himself with steady business as a jobber. Goldsmid gradually rose to eminence as a financier, and ultimately amassed a large fortune. His most extensive financial operations were connected with Portugal, Brazil, and Turkey; and for his services in settling an intricate monetary dispute between Portugal and Brazil he was, in 1846, created Baron de Palmeira by the Portuguese government.

Goldsmid was one of the founders of the London Docks. The main effort of his life was made in the cause of Jewish emancipation. He was the first English Jew who took up the question, and he enlisted in its advocacy the leading Whig statesmen of the time. Soon after the passing of the Act of 1829, which removed the civil disabilities of the Roman Catholics, he secured the powerful aid of Lord Holland, the Marquis of Lansdowne, the Duke of Sussex, and other eminent members of the Liberal party, and then induced Robert Grant to introduce in the House of Commons a similar measure for the Jews. During more than two years from the time when Jewish emancipation was first debated in Parliament, Goldsmid gave little heed to his ordinary business, devoting himself almost exclusively to the advancement of the cause. He was one of the chief agents in the establishment of University College, London, purchasing at his own risk the site of the university.

Goldsmid was a liberal supporter of the Reform synagogue and of all Jewish institutions.

Sir Julian Goldsmid: English baronet, privy councilor, member of Parliament, and philanthropist; born Oct. 2, 1838; died at Brighton Jan. 7, 1896. He was the eldest son of Frederick D. Goldsmid, M.P. Educated privately up to the age of seventeen, he entered University College, of which he became a prizeman. He received his B.A. degree with honors at the University of London in 1859, and in 1861 obtained his M.A., with the first place in classics. In 1864 he was made a fellow of University College, and in the same year was called to the bar. For a short time he went on the Oxford circuit, but abandoned legal practise when elected M.P. for Honiton in March, 1866.

Julian Goldsmid.

When Honiton was disfranchised by the Reform Bill of 1867 Goldsmid stood unsuccessfully for Mid-Surrey, but was returned in 1870 for Rochester, and sat for that constituency till 1880. He was defeated at Sandwich, but in 1885 was returned for St. Pancras South. During 1894 Goldsmid, who belonged to the Liberal party, often had the honor of presiding over the deliberations of the House of Commons as deputy chairman of committees. In this capacity he showed great boldness and promptitude in the use of his extensive knowledge of the rules of Parliament, and acted with an authority born of his experience as the ruling spirit of important financial undertakings. As the Liberal Unionist candidate for St. Pancras South, Sir Julian Goldsmid was returned in 1895 by an overwhelming majority.

The Jewish communal institutions with which Goldsmid was most prominently identified were the Anglo-Jewish Association and the Russo-Jewish Committee. He was elected a vice-president of the former at its foundation in 1871, which office he held till 1886, when he was unanimously chosen to succeed Baron de Worms in the presidency. His thorough knowledge of foreign affairs enabled him to present in the clearest light the situation of the Jews in Eastern countries; and his intimacy with ministers was utilized by him to carry through many a difficult and delicate diplomatic negotiation. The period of his presidency was the most brilliant in the history of the Anglo-Jewish Association. In 1895 the state of Goldsmid's health obliged him to give up many of his responsible positions. He resigned his presidency in that year, and also relinquished many of his financial interests.

Goldsmid was chairman of the Russo-Jewish Committee from its foundation in 1882 until 1894; a member of the visitation committee of the Jewish board of guardians; president of the Jews' Infant-Schools from 1883; and a member of the committee of the Jews' Free School. He was warden, and occasional lay preacher, at the West London Synagogue of British Jews, and was subsequently elected chairman of the council.

In the general community the institutions in which he took most interest were: University College, of which he was treasurer in 1880–81; University College Hospital, of which he served as a member of council; and the University of London, of which he was vice-chancellor at the time of his death.

In 1878 Goldsmid succeeded his uncle, Sir Francis Goldsmid, Q.C., M.P., in the family honors and estates, in Sussex, Kent, Berks, and elsewhere. He filled many offices, among them that of deputy lieutenant for Kent, Sussex, and Berks; magistrate for Kent, Sussex, and London; colonel of the 1st Sussex Rifle Volunteers, and honorary colonel of the 1st Sussex Artillery Volunteers; chairman of the Submarine Telegraph Company, and of the Imperial and Continental Gas Association; and director of the London, Brighton, and South Coast Railway.

His chief country-seat was at Somerhill, near Tunbridge, once the home of Sir Philip Sidney. In 1868 he married Virginia, daughter of A. Philipson of Florence, by whom he had eight daughters. The entailed Goldsmid estates devolved upon Osmond Elim d'Avigdor.

Bibliography: *Jew. Chron.* Jan. 10, 1896; *Jew. World*, Jan. 10, 1896; *The Times*, London, Jan. 8, 1896.

J. G. L.

GOLDSMITH, LEWIS: English political writer and agitator; born 1763; died Jan. 6, 1846. Educated in London, he was trained for the legal profession, but soon abandoned this profession for the writing of political pamphlets and satires. He started his career as an enthusiastic defender of the French Revolution. His first literary venture was an edition of Barlow's "Advice to the Privileged Orders in the Several States of Europe" (1792). This was followed (1801) by "State of the French Republic at the End of the Year 1800," a translation from the French. In the same year he published "The Crimes of Cabinets, or a Review of the Plans and Aggressions for Annihilating the Liberties of France, and the Dismemberment of Her Territories." So unpopular in England were the views which he held that the London booksellers scarcely dared to offer his books for sale. Being threatened with prosecution for this last work, he sought safety in flight, and went to Paris (1803). There he offered the French government the help of his pen against England. The offer was accepted, and resulted in the publication of an English journal at Paris—"The Argus, or London Reviewed in Paris."

But there were limits to his denunciations, and because he refused to do as his employers wished they negotiated with the English government to surrender him in exchange for a French political prisoner in England named Peltier. He continued to reside in France, however, and was taken back into the confidence of Napoleon, who employed him upon various secret missions. In 1809 he was conveyed to England, formally tried for treason, and discharged. Embittered by the treacherous conduct of the French government, he started (1811) a Sunday newspaper called the "Anti-Gallican Monitor," in which he denounced the French Revolution as violently as he had formerly espoused it. He went so far as to propose the assassination of Napoleon. In his "Secret History of the Cabinet of Bonaparte" and his "Secret History of Bonaparte's Diplomacy," he brought the most serious charges against his former employer. In pursuance of his new policy he advocated the restoration of Louis XVIII., and when this event took place that monarch rewarded Goldsmith with a pension for life. The latter part of his life was spent principally in Paris. He had one daughter, Georgiana, who became the second Lady Lyndhurst.

J. I. H.

GOLDSMITH, MILTON: American merchant and author; born at Philadelphia May 22, 1861. In 1877 he went to Europe and studied three years at Zurich. Goldsmith has written two novels: "Rabbi and Priest," 1891; "A Victim of Conscience," 1903, and in addition several librettos for comic operas and several dramatic pieces. He has also contributed short stories to newspapers and poems to the magazines.

A.

GOLDSMITHS AND SILVERSMITHS: The earliest descriptions of productions of the goldsmith's art refer to the work of Jewish goldsmiths. The Bible, which contains these descriptions, gives also the names of the workers—Bezaleel b. Uri and Aholiab b. Ahisamach (Ex. xxxi., xxxvi.). Important as were their achievements, the Jewish goldsmith's art did not reach its height until the time of King Solomon. Although he used foreign skill to a certain extent in the making of the utensils for his house and for the Temple, yet Hiram, the overseer of the whole work, was of Jewish extraction, at least on his mother's side. Even after the downfall of the Jewish state Jewish goldsmiths were heard of everywhere. Thus the Talmud relates that the synagogue of Alexandria had a section reserved for gold- and silversmiths, just as for the other trades. It is also related of the Jewish tribe Ḳainuḳa' in northern Arabia in the sixth century, that it engaged in the goldsmith's trade and in money-changing (Grätz, "Geschichte," v. 84). In the eleventh century the Jewish goldsmiths in Languedoc bought the church treasure of Narbonne, and the tombstone of the goldsmith Joseph b. Joziz (1100) evidences the existence of Jewish goldsmiths in Spain ("C. I. H." No. 175). In the thirteenth century Jews carried on the goldsmith's craft in England (Jacobs, "Jews of Angevin England," p. 207; Levy, in "Jew. Chron." April 4, 1902), and toward the end of the fourteenth century there were Jewish goldsmiths in Avignon, in the county of Venaissin (Bardinet, in "Rev. Hist." 1880, Sept.-Oct.), in Navarre, where in the larger towns like Tudela and Pamplona they had their own shops (Kayserling, "Die Juden in Navarra," pp. 59, 73), and in Lyons, whence, however, they were expelled. The refugees from Lyons settled in Trevoux, whither they carried the art of

In the Middle Ages.

refining gold and making it into wire (Depping, "Die Juden im Mittelalter," pp. 250 *et seq.*).

That there were Jewish goldsmiths at this time in Castile may be seen from the decree of John II. in 1443 (Lindo, "Hist. of the Jews in Spain," pp. 221 *et seq.*). In Italy also, in the same century, there were Jewish goldsmiths, one of whom (Solomon) Ercole dei Fedeli of Sessa, after he had gone over to Christianity, made a name for himself by his rich ornamentation of weapons, one of which was the famous sword of Cæsar Borgia. In the sixteenth century there were skilful goldsmiths among the Jews who migrated from Rhodes to Constantinople and Salonica (Baudin, "Les Israélites de Constantinople"), as there were among the original inhabitants of Kremsir (Frankl-Grün, "Geschichte der Juden in Kremsier," i. 10); there were many also in Poland ("Debatten des Galizischen Landtags," 1868, p. 72). Pedro Teixeira (Kayserling, in Benjamin, "Acht Jahre in Asien und Afrika," p. 44) states they were also in Aleppo, and Leo Africanus ("Africæ Descriptio"), that they were in Morocco. There were goldsmiths also in Venice, and Lecky declares that many of those who cultivated the art of carving were Jews ("Rationalism in Europe," ii. 237, note). In Rome, however, Jewish goldsmiths are first mentioned in 1726 (Vogelstein and Rieger, "Geschichte der Juden in Rom," ii. 321).

In More Recent Times.

There were numerous Jewish goldsmiths in Prague, where they formed a separate gild until the middle of the nineteenth century, just as did the Jewish shoemakers, tailors, and butchers (Jost, "Neuere Geschichte der Israeliten," i. 341). According to the gravestones in the old cemetery of Prague, twenty-one goldsmiths were buried there in the years 1601–1700, and twenty-six in 1701–80 ("Zeitschrift für die Geschichte der Juden in Deutschland," v. 351). In 1847 the Prague directory gave the number of Jewish gold- and silversmiths as twenty-one. In the seventeenth century the French ambassador St. Olon found in Morocco "a comparatively large number of Jews, most of whom were goldsmiths" (Schudt, "Jüdische Merckwürdigkeiten," i. 90). In the same century (1664), Jewish goldsmiths are spoken of in Poland, six of whom—among them a woman, Jozefowa—met with a loss of more than 26,000 gulden by plunder at the time of the Jewish persecution in Lemberg (Caro, "Geschichte der Juden in Lemberg," pp. 74, 168 *et seq.*). In the eighteenth century the Jews of Bucharest seem to have included many skilful goldsmiths (see Jew. Encyc. iii. 411–412).

In Germany for a longer period than in any other country Jews were strictly forbidden to practise any trade, and Jewish goldsmiths are mentioned only as living in Berlin, at the beginning of the eighteenth century (Geiger, "Geschichte der Juden in Berlin," i. 26, 43); beyond Berlin they were found only in the former Polish provinces, in Posen as early as the seventeenth century; but they do not seem to have been very numerous, since they did not have a corporation as did the Jewish tailors, butchers, furriers, and haberdashers of that town (Perles, in "Monatsschrift," 1864, p. 420, and 1865, p. 84). Nevertheless, one Jewish goldsmith, Baruch, does appear in East Franconia, who, on being received in Schwarzach in 1537, promised to live only by his craft ("Monatsschrift," 1880, p. 463).

At present there are many Jewish goldsmiths in Russia, who, according to Rülf ("Drei Tage in Jüdisch-Russland," pp. 55 *et seq.*), are highly skilled workers. The number is still greater in Rumania, where in 1879, in Bucharest, out of a total of 212 goldsmiths, 164 were Jews (Jacobs, "Jewish Statistics," p. 26). In Jerusalem, where in 1865 L. A. Frankl found only five Jewish goldsmiths and silversmiths, the number has recently increased to twenty-seven (*ib.*). According to Andree ("Volkskunde der Juden," p. 191), Jewish goldsmiths and silversmiths are found in Benghazi (Barca), Jebel Ghurian, Bagdad, Arabia, and Persia. In 1898 eleven gold-workers belonged to the Jewish community in Berlin, forty-four to that in Vienna.

For illustrations of the goldsmith's and silversmith's art, relating to Jewish ceremonial, see the following articles: Amulet; Betrothal; Binding; Circumcision; Crown of the Law; Cup; Esther; Etrog; Habdalah; Ḥanukkah; Laver; 'Omer; Passover; Rings, Engagement and Wedding; Sabbath; Scrolls of Law (for breastplates, mantels, and pointers); Seder; Synagogue.

A. A. W.

GOLDSTEIN, EDUARD: Russian musician; born at Odessa 1851; died at Leipsic Aug. 8, 1887. He was an accomplished pianist at the age of thirteen, and obtained a position in the Italian opera-house of Kishinef. In 1868 he was sent to the Leipsic Conservatorium, where he studied under Moscheles and Reinecke. Goldstein graduated with honors in 1872, and soon afterward made a successful tour through Germany. In 1874 he returned to Odessa and became leader of the orchestra in the Berner Theater. Later he occupied for some time the position of director of the opera in Kharkof, and in 1876 went to St. Petersburg, where he soon attracted attention as a pianist. Goldstein struggled for official recognition for ten years, until Anton Rubinstein returned to the St. Petersburg Conservatory of Music as its director (1886) and appointed him professor of music and leader of the Philharmonic Society. Goldstein wrote various songs and melodies, and began the composition of "Count Essex," an opera, which he left unfinished. He was the musical critic of the "Golos" and the "Pravitelstvennyj Vyestnik."

Bibliography: *Ha-Asif*, iv. 66-67.

H. R. P. Wi.

GOLDSTEIN, JOSEPH: Austrian cantor and composer; born at Kecskemét, Hungary, March 27, 1836; died in Vienna June 17, 1899. He occupied the position of chief cantor at the Leopoldstädter Tempel, the largest synagogue in Vienna, for forty years. He was one of the ten children of Ḥazzan Goldstein of Neutra, Hungary, who died when Joseph was but eleven. At the age of twelve he was so well acquainted with the liturgy and possessed such a phenomenal tenor voice that the congregation of Neutra elected him as his father's successor.

He remained there for two years, and then made a four years' tour through Austria and Germany, officiating in some of the largest congregations. Upon his return an admirer of his voice sent him to Vienna to be educated for the stage. On the completion of his course, and when about to enter upon his first engagement in Florence, he decided to return to the position of cantor, and received an appointment at the Leopoldstädter Tempel in Vienna in 1857, retaining the position until his death. Among Goldstein's published works are: "Shire Yeshurun," a collection of songs for the Sabbath and festival service, 1865; a requiem, 1892; a collection of "Festgesänge."

Bibliography: *Die Neuzeit*; *Ungarische Cantorenzeitung*, June, 1899.
S. A. Kai.

GOLDSTEIN, JOSEPH: Political economist and statistician; born in Odessa, Russia, Jan. 9, 1869. After completing his studies at the gymnasium of his native town, he entered the technological institute in Carlsruhe, Baden, and took a diploma as chemist. He next studied political economy at the University of Munich, graduating (Ph.D.) in 1895. He continued his studies in England and France until 1898, when he was appointed privat-docent in political science at the University of Zurich. In 1899 and 1900 he revisited France and England, and went to Russia in the winter of 1901–1902, when he submitted to the Russian minister of commerce, W. Kowalewski, and to the minister of finance, at the request of the former, an expert opinion with reference to the renewal of the commercial treaty between Germany and Russia. Before returning he took the degree of A.M. at the University of Moscow, which practically conferred upon him the right to lecture in any university in Russia.

Goldstein's "Deutschlands Sodaindustrie in Vergangenheit und Gegenwart," Stuttgart, 1895, occasioned the introduction of a bill by the German government effecting a 50 per cent reduction in the duty on soda. Among his other works may be mentioned: "Berufsgliederung und Reichthum in England," inaugural dissertation, 1897; "Die Zukunft Deutschlands im Lichte der Agrarischen Beweisführung," 1898; "Die Vermeintlichen und die Wirklichen Ursachen des Bevölkerungsstillstandes in Frankreich," 1898; "Die Statistik und Ihre Bedeutung für das Moderne Gesellschaftsleben," 1899; "Bevölkerungsprobleme und Berufsgliederung in Frankreich," 1900; "Gewerbefreiheit und Ihre Licht- und Schattenseiten," 1901.

S.

GOLDSTEIN, MICHAEL YULYEVICH: Russian chemist; born at Odessa 1853; educated in the Richelieu Gymnasium of Odessa, and graduated from the Medico-Surgical Academy of St. Petersburg. In 1877 he went abroad and obtained the degree of doctor of philosophy. On his return he became assistant in chemistry in the St. Petersburg medical academy. In 1880 Goldstein passed the examination for master of chemistry, and in 1890 obtained his degree, his dissertation being on the rise of salt-solutions in capillary tubes, "Materialy K Voprosu o Vysotakh," etc. In 1891 he became privat-docent in theoretical and physical chemistry at the University of St. Petersburg, but in 1901 was compelled, by circumstances of a political nature, to discontinue his lectures. The researches of Goldstein, mostly in theoretical and physical chemistry, have been published in the following magazines: "Zhurnal-Russkavo Fisiko-Khimicheskavo Obshchestva"; "Berichte der Deutschen Chemischen Gesellschaft"; "Annales de Chimie et Physique"; and "Zeitschrift für Physikalische Chemie." Goldstein also published in the "Nauchnoe Obozryenie" for 1898–99 a portion of his work, "Elementy Filosofii Chimii," on the elements of chemical philosophy; and, between 1894 and 1900, under the pseudonym "Cardanus," several articles in the "Novosti." He has published in book form "Zhivoye i Mertvoe" (Living and Dead) and "O Fisicheskom Dukhovnom Vospitanii" (On Physical and Intellectual Education). He has translated into Russian Daneman's sketches of the history of natural science, published with supplementary notes in "Mir Bozhi," 1897. At present he is the editor of the department of physics, chemistry, and technology of the "Bolshaya Entziklopedia."

GOLDSTÜCKER, THEODOR: German Sanskritist; born at Königsberg, Prussia, Jan. 18, 1821; died in London March 6, 1872. In 1840 he gained his degree of Ph.D. at Königsberg University, where he first studied Sanskrit under Bohlen, continuing his studies in that language at Bonn and Paris. In 1842 he published a German translation of the Sanskrit drama "Prabodha-Chandrodaya" At Paris he collected materials for an extensive work on Indian philosophy and for a new edition of the great epic poem "Mahabharata." In 1850 he went to England, where he assisted Professor Wilson in preparing a new edition of his Sanskrit-English dictionary. This edition outgrew all practicable proportions, and, having reached page 480 without completing the first letter of the alphabet, it was abandoned.

Goldstücker was professor of Sanskrit at University College, London, from 1851 until his death, and was the chief founder of the Sanskrit Text Society, established in 1866. He was also president of the Philological Society, and was well known in many of the literary societies of London. He left an edition of the "Nyaya-mala-Vistara," an important work on mimansa philosophy, and an edition of the "Mahabhashya," the well-known commentary on Panini's grammar (London, 1874); he had previously written a monograph on Panini (1861). From 1862 to 1868 Goldstücker was a contributor to "Chambers' Encyclopædia" and the "Westminster Review." His essays were collected under the title "Literary Remains," 1879.

Bibliography: *Goldstücker's Literary Remains*, 1879; *The Times*, London, March 12 and 14, 1872; *Dict. Nat. Biog.*; *Meyers Konversations-Lexikon*.
J. G. L.

GOLDSZMIDT, JOSEPH: Polish lawyer; born at Hrubieszow, government of Lublin, 1846; died 1896; graduate of the University of Warsaw. He wrote: "Wizerunki Wslawionych Zydow

XIX Wieku," sketches of famous Jews of the nineteenth century (Warsaw, 1867-68); a biography of Lukasz Koncewicz, in "Tygodnik Illustrowany"; a commentary on Talmudic law, under the title "Wyklad Prawa Rozwodowego Podlug Ustaw Mojzeszowo-Talmudycznych" (*ib.* 1870); an essay on the last days of the Jews in Spain, under the title "Ostatnie dni Pobytu Zydow w Hiszpanji" (*ib.* 1869); an essay on marriage according to law and custom, under the title "O Malzenstwie pod Wzgledem Prawnym i Obyczajawym" (*ib.* 1874). He also contributed many Jewish articles to "Izraelita."

Bibliography: *Encyklopedya Powsiechna*, vi., Warsaw, 1900.

GOLDZIEHER, WILHELM: Hungarian oculist and ophthalmological writer, born at Köpcsény (= Kitsee), near Presburg, Jan. 1, 1849. He studied medicine at Vienna, Berlin, Prague, and Heidelberg, graduating (M.D.) at Vienna Dec. 25, 1871. In 1874 he settled in Budapest as an oculist; was appointed privat-docent at the University of Budapest in 1878; and became professor in 1895. While a student he published an essay written by him in Helmholtz's laboratory, "Zur Theorie des Elektrotonus," in "Archiv für Physiologie," 1870. He has since written many monographs and articles for medical periodicals. He is one of the chief contributors to Eulenburg's "Realencyclopädie der Medicinischen Wissenschaften," for which he prepares most of the material relating to practical ophthalmology. He also wrote "Die Therapie der Augenkrankheiten" (1881; 2d ed., 1900), and "Szemèszet Kèzikönyve" (1890), a manual of ophthalmology written in Hungarian, the first work of the kind in that language. In April, 1903, he was decorated by the Austrian emperor with the officer's cross of the Order of Franz Joseph.

S. W. B.

GOLDZIHER, IGNAZ: Hungarian Orientalist; born in Stuhlweissenburg, Hungary, June 22, 1850; attended the gymnasium in his native town, and continued his studies at the universities of Budapest, Berlin, Leipsic (Ph.D., 1870), and Leyden. In 1872 he became privat-docent at the University of Budapest. In 1873, commissioned by the Hungarian government, he undertook a scientific journey through Syria, Palestine, and Egypt, spending several months at the Azhar mosque in Cairo, where he attended the lectures of learned sheiks on Mohammedan theology and the science of law. In 1894 he was promoted to a professorship—the first instance in the history of the Budapest University of a Jew being admitted to the faculty. Goldziher is a member of the Hungarian Academy of Sciences, corresponding member of the Imperial Academy of St. Petersburg, honorary member of the Royal Asiatic Society of England, and corresponding member of the Jewish Historical Society of England and of other scientific societies. He was appointed to represent the Hungarian government and the Academy at many congresses, *e.g.*, at the first meeting of the Association des Académies, held in Paris (1901). At the Oriental Congress in Stockholm (1889) he received the large gold medal. He holds the office of secretary of the Jewish community at Budapest, and since 1900 has been lecturer on religious philosophy at the Budapest rabbinical seminary.

Goldziher's chief importance for Semitic history and philology rests on the fact that he was the first to give a critical history of Arabic traditions ("Muhammedanische Studien," ii.), and that his estimates of Arabic civil and religious law have withstood the test of criticism. He has likewise placed the various theological movements which have arisen within Islam in their true light, and his knowledge of ancient Arabic poetry has enabled him to make valuable contributions to the knowledge of pre-Mohammedan paganism. Jewish science is likewise indebted to him; he has pointed out the traces of Hebrew mythology in the Bible, and has presented comparative studies of Jewish and Arabic folk-lore and culture in the Middle Ages.

Ignaz Goldziher.

Goldziher's principal writings are the following: "Studien über Tanchum Jeruschalmi," Leipsic, 1870; a second edition of Ballagi's Hebrew grammar, Budapest, 1872; "Beiträge zur Geschichte der Sprachgelehrsamkeit bei den Arabern," in three parts, Vienna, 1871-73; "Beiträge zur Literaturgesch. der Schi'a," *ib.* 1874; "Der Mythos bei den Hebräern und Seine Geschichtliche Entwickelung," Leipsic, 1876: English transl. by R. Martineau, "Mythology Among the Hebrews and Its Historical Development," London, 1877; "Az Iszlám," Budapest, 1881; "Die Zâhiriten, Ihr Lehrsystem und Ihre Geschichte," Leipsic, 1884; "Muhammedanische Studien," two vols., Halle, 1889-90; "Der Dîwân des Hoteia," Leipsic, 1892; "Abhandlungen zur Arabischen Philologie," two vols., Leyden, 1896-1899; "Die Legende vom Mönch Barṣîṣâ," Kirchhain, 1896; and many treatises on Oriental history and the science of religion, published in the collections of the Hungarian Academy. He has contributed numerous articles and reviews to German, French, English, and Hungarian periodicals, among which may be mentioned the following: "Materialien zur Kenntnis der Almohadenbewegung in Nordafrika," in "Z. D. M. G." xli. 30-140; "Das Prinzip des Istiṣḥâb in der Muhammedanischen Gesetzeswissenschaft," in "W. Z. K. M." i. 228-236; "Arabische Beiträge zur Volksetymologie," in "Zeitschrift für Völkerpsychologie," xviii. 69-82; "Influences Chrétiennes dans la Littérature Religieuse de l'Islam," in "Rev. de l'Histoire des Religions," xviii. 180-199; "Das Arabische Original von Maimuni's Sêfer Hammiṣwot," in "W. Z. K. M." iii. 77-85; "Muhammedanisches Recht in Theorie und Wirklichkeit," in "Zeitschrift für Vergleichende Rechtswissenschaft," viii. 406–423; "Der Chaṭib bei den Alten Arabern," in "W. Z. K. M." vi. 97–102; "Der Divân des Garwal b. Aus Al-Huṭeja," in "Z. D. M. GOLEM (גלם): This word occurs only once in the Bible, in Ps. cxxxix. 16, where it means "embryo." In tradition everything that is in a state of incompletion, everything not fully formed, as a needle without the eye, is designated as "golem" ("Aruch Completum," ed. Kohut, ii. 297). A woman is golem so long as she has not conceived (Sanh. 22b; comp. Shab. 52b, 77b; Sanh. 95a; Ḥul. 25a; Abot v. 6; Sifre, Num. 158). God, father, and mother take part in the creation of the child: the skeleton and brain are derived from the father; the skin and muscles from the mother; the senses from God. God forms the child from the seed, putting the soul into it. If the male seed is emitted first, the child is of the male sex: otherwise it is of the female sex (Nid. 31a). Although God impresses all men with the seal of Adam, there is no resemblance between any two of them (Sanh. 37a).

Embryo.

In the womb the navel is first formed, and from this roots spread out, until the child is fully developed. According to another opinion the head is first developed. The two eyes and the two nostrils of the embryo resemble the eyes of a fly; the aperture of the mouth is like hair (or a barleycorn). R. Jonathan says: "The two arms are like two pieces of string; the other members are combined in a mass" (Yer. Nid. 50d; comp. Nid. 25a; Soṭah 45b). Women that eat much mustard give birth to gluttonous children; those that eat many dates, to bleareyed children; those that eat much small fish, children with unsteady eyes; those that eat clay, naughty children; those that drink beer, dark-skinned children; those that eat much meat and drink much wine, healthy children; those that eat many eggs, children with large eyes; those that eat much large fish, beautiful children; those that eat much celery or parsley, children with fine complexions; those that eat oleander, well-nourished children; those that eat paradise-apples, fragrant children (Ket. 61a). The same Babylonian amora, of the fourth century, also indicates why epileptic and otherwise defective children are born (Brecher, "Das Transcendentale, Magie und Magische Heilarten im Talmud," pp. 174 *et seq.*). Moral, not physical, reasons are given as the principal factors in the birth of healthy or sickly children. Decent behavior produces male children (Sheb. 18b; comp. Nid. 71a), who are also regularly produced under certain conditions ('Er. 100b; B. B. 10b; Nid. 31a, b). A dwarf should not marry a dwarf (Bek. 46a). Other references to the embryo are found in Nid. 15a, 17a, 31b, 37b, 38a, 45b, 66a; Beẓah 7a; Bek. 44b–45a; Ḥul. 127a; Ned. 20a; Pes. 112a, and *passim*. Unfounded hatred causes abortion and the death of the child (Shab. 32b).

Causes Influencing the Embryo.

Adam as Golem.

The imagination of the ancient Israelites frequently turned to the birth of the first man, who was formed of dust and not born of woman. A principal passage reads as follows: "How was Adam created? In the first hour his dust was collected; in the second his form was created; in the third he became a shapeless mass [golem]; in the fourth his members were joined; in the fifth his apertures opened; in the sixth he received his soul; in the seventh he stood up on his feet; in the eighth Eve was associated with him; in the ninth he was transferred to paradise; in the tenth he heard God's command; in the eleventh he sinned; in the twelfth he was driven from Eden, in order that Ps. xlix. 13 might be fulfilled" (Ab. R. N. ed. Schechter, Text A, i. 5; comp. Pesiḳ. R. ed. Friedmann, 187b, and note 7; Kohut, in "Z. D. M. G." xxv. 13). God created Adam as a golem; he lay supine, reaching from one end of the world to the other, from the earth to the firmament (Ḥag. 12a; comp. Gen. R. viii., xiv., and xxiv.; JEW. ENCYC. i. 175). The Gnostics, following Irenæus, also taught that Adam was immensely long and broad, and crawled over the earth (Hilgenfeld, "Die Jüdische Apokalyptik," p. 244; comp. Kohut, *l.c.* xxv. 87, note 1). All beings were created in their natural size and with their full measure of intelligence, as was Adam (R. H. 11a). According to another tradition Adam was only one hundred ells high (B. B. 75a); according to a Mohammedan legend, only sixty ells (Kohut, *l.c.* xxv. 75, note 5; the number "sixty" indicates Babylonian influence). When he hid from the face of God, six things were taken from him, one of these being his size, which, however, will be restored to him in the Messianic time (Gen. R. xii.; Num. R. xiii.; Kohut, *l.c.* xxv. 76, note 1; 91, note 3). Other conceptions, for instance, that Adam was created a hermaphrodite (see ANDROGYNOS), or with two faces (דיפרוסופום = *διπρόσωπος*; Gen. R. viii. 7), belong to the literature of GNOSTICISM. For similar views, after Plato and Philo, see Freudenthal, "Hellenistische Studien," p. 69 (see ADAM).

E. C. L. B.

——**In Medieval Times:** In the Middle Ages arose the belief in the possibility of infusing life into a clay or wooden figure of a human being, which figure was termed "golem" by writers of the eighteenth century. The golem grew in size, and could carry any message or obey mechanically any order of its master. It was supposed to be created by the aid of the "Sefer Yeẓirah," that is, by a combination of letters forming a "Shem" (any one of the names of God). The Shem was written on a piece of paper and inserted either in the mouth or in the forehead of the golem, thus bringing it into life and action. Solomon ibn Gabirol is said to have created a maid servant by this means. The king, informed of this, desired to punish him, but Ibn Gabirol showed that his creature was not a real being by restoring every one of its parts to its original form.

Golem of Hohe Rabbi Löw.

Elijah of Chelm, in the middle of the sixteenth century, was the first person credited with having made a golem with a Shem, for which reason he was known as a "Ba'al Shem." It is said to have grown to be a monster (resembling that of Frankenstein), which the rabbi feared might destroy the world. Finally he extracted the Shem from the forehead of his golem, which returned to dust (Azulai, "Shem ha-Gedolim," i., No. 163). Elijah's grandson, known as the "ḥakam Ẓebi," was so convinced of the truth of this that he raised the question as to whether a golem could be counted as one in a "minyan" (quorum; Responsa, No. 93, Amsterdam, 1712; Baer Heṭeb to Shulḥan 'Aruk, Oraḥ Ḥayyim, 55, 1). The best-known golem was that of Judah Löw b. Bezaleel, or the "hohe Rabbi Löw," of Prague (end of 16th cent.), who used his golem as a servant on week-days, and extracted the Shem from the golem's mouth every Friday afternoon, so as to let it rest on Sabbath. Once the rabbi forgot to extract the Shem, and feared that the golem would desecrate the Sabbath. He pursued the golem and caught it in front of the synagogue, just before Sabbath began, and hurriedly extracted the Shem, whereupon the golem fell in pieces; its remains are said to be still among the débris in the attic of the synagogue. Rabbi Löw is credited with having performed similar wonders before Rudolph II. ("Sippurim," p. 52; comp. Gans, "Ẓemaḥ Dawid," p. 46a, Frankfort-on-the-Main, 1692). A legend connected with his golem is given in German verse by Gustav Philippson in "Allg. Zeit. des Jud." 1841, No. 44 (abridged in "Sulamith," viii. 254; translated into Hebrew in "Kokebe Yiẓḥak," No. 28, p. 75, Vienna, 1862).

It is sometimes alleged that Elijah of Wilna also made a golem, and the Ḥasidim claim the same for Israel Ba'al Shem-Ṭob, but apparently the claims are based on the similarity in the one case of the name "Elijah" and in the other of the appellation "Ba'al Shem" to the name and appellation of the rabbi of Chelm. The last golem is attributed to R. Davidl Jaffe, rabbi in Dorhiczyn, in the government of Grodno, Russia (about 1800). This golem, unlike that of R. Löw, was not supposed to rest on Sabbath. Indeed, it appears that it was created only for the purpose of replacing the Sabbath goy in heating the ovens of Jews on winter Sabbaths. All orders to make fires were given to the golem on Friday, which he executed promptly but mechanically the next day. In one case a slight error in an order to the golem caused a conflagration that destroyed the whole town.

From this story it becomes probable that the whole of the golem legend is in some way a reflex of the medieval legends about Vergil, who was credited with the power of making a statue move and speak and do his will. His disciple once gave orders which, strictly carried out, resulted in his destruction. The statue of Vergil saved an adulteress, just as did the golem of R. Löw in Philippson's above-mentioned poem (J. A. Tunison, "Master Virgil," p. 145, Cincinnati, 1888).

GOLGOTHA (literally, "the skull"): Locality mentioned in the New Testament as the scene of Jesus' execution (Matt. xxvii. 33 and parallels). The name is an Aramaic emphatic state, and corresponds to the Hebrew גלגלת. In the Greek transliteration of the Gospels the "l" is elided except in one manuscript (Codex Bezæ); "Golgotha" is the proper form. It was outside the city wall (John xix. 20), near a tomb, a gate, and a road, and in a prominent position (Mark xv. 29, 40; John xix. 20, 41). Two places answer to this description: (1) The Church of the Holy Sepulcher, which is identified by tradition with Golgotha; it lay beyond the second wall and was near tombs and a road. A temple of Venus was erected on the site; and from the analogy of the temple of Zeus, which was built on the site of the Second Temple, this seems to imply that it was once a sacred spot. (2) A skull-shaped rock above the grotto of Jeremiah, about which there is a Jewish tradition that it was the place of stoning. The name does not occur in Talmudic literature. See also ADAM.

E. C. J.

GOLIATH: A Philistine giant of Gath (I Sam. xvii. 4). The name "Goliath" is probably connected with the Assyro-Babylonian "Guzali" = "running, ravaging spirits," "destroyers" (Jastrow, "Religion of Assyria and Babylon," p. 500; Muss-Arnolt, "Concise Dictionary," *s.v.* "The Throne-Carriers"; Delitzsch, "Assyrisches Handwörterb." *s.v.*).

——**Biblical Data:** Goliath was the champion of the Philistines, who had encamped between Shochoh and Azekah against Saul and the men of Israel arrayed for battle in the valley of Elah. He is described as being six cubits and a span in height, having upon his head a helmet of brass, and wearing a coat of mail weighing five thousand shekels of brass, with greaves of brass upon his legs and a target or gorget of brass between his shoulders. The staff of his spear is said to have been like a weaver's beam, the spear's head weighing six hundred shekels of iron.

Insolently challenging Israel to appoint one of their number to meet him in single combat, with the condition that the people whose champion should be killed should become the slaves of the other, Goliath strikes fear into the hearts of Saul and his men. David, sent by his father with some provisions to his brothers and to their captain in Israel's army, hears the giant's challenge, and inquires what reward there shall be for the man who dares meet the monster. Rebuked by his brother Eliah for his presumption in leaving the sheep, and taxed by him with idle curiosity, David persists in his inquiry. Saul hears of David, and sends for him. The latter relates his experiences with lions and bears, and declares that the uncircumcised Philistine shall at his hands meet a similar fate.

Is Slain by David.

On being armed with Saul's armor, David finds that it impedes his gait, whereupon he discards it, takes his staff, and chooses five smooth stones out of the brook for use in his sling. He meets the giant, who, upon catching sight of his diminutive adversary, resents his coming as an insult. David declares that he comes in the name of Yhwh of hosts, the God of Israel, and warns the monster of his imminent destruction. David, using great strategy in running forward and backward, watches until the giant exposes his face, when, rushing upon him, he slings one of the stones, which, well directed, strikes the giant between the eyes, and, sinking deep into his forehead, fells him to the ground. Drawing the giant's own sword, the shepherd boy severs the head from the trunk. The defeat and death of their champion are the signal for a hasty flight of the Philistines. In consequence of this feat, David is received into Saul's family, but Saul becomes jealous of the young conqueror's popularity (I Sam. xviii. 9). Goliath's sword is reported to have been kept, "wrapped in a cloth behind the ephod," in the sanctuary at Nob in which Ahimelek was priest. David, a fugitive from Saul, knowing its worth, takes it with him in his flight to the King of Gath (I Sam. xxi. 9 [A. V. 10]). According to another account (II Sam. xxi. 19), Goliath was killed by Elhanan from Bethlehem.

——**In Rabbinical Literature:** Goliath was of ignoble birth. His mother is said to have been Orpah (ערפה = הרפה: II Sam. xxi. 16; Yalḳ. ii. 125), who, after making a pretense of accompanying Ruth, her mother-in-law, and walking with her forty paces, had left her and had led a very profligate life, so that Goliath, her son, was of uncertain paternity (Midr. Ruth i. 14, where the ketib ממערות (I Sam. xvii. 23) is read ממאה ערות; comp. Yalḳ. ii. 126, 601). She bore besides Goliath three other giants (Tan., Wayiggash, 8).

In defying Israel Goliath boasted of having slain the two sons of Eli, captured the holy Ark, brought it to the house of Dagon, where it stayed seven months, and of having led the van of the Philistines in every war, scattering the enemy before him like dust. Notwithstanding all these valorous deeds, he had not been found worthy to be the captain over a thousand. But what had Saul done? Why had he been made king? If he was a man and warrior, he should now come forward and meet him; but if he was a weakling, let Israel choose another champion (Targum to I Sam. xvii. 8). The name the giant bore indicated his supernatural insolence, Goliath recalling that he עמד בגלוי פנים לפני הק"בה, stood with "uncovered [arrogant] countenance before even God" (Soṭah 42b). Goliath challenged the Israelites every morning and every evening, so as to disturb them at the hour set for reciting the Shema' (Yalḳ. ii. 126). He was permitted to repeat his defiances for forty days because of the forty paces which Orpah had accompanied Ruth (Tan., Wayiggash, 8). His accouterments weighed, according to R. Ḥanina, 60 tons; according to R. Abba bar Kahana, 120 tons (Soṭah 48b). The Biblical account is said to have described the immense proportions and strength of the giant only in order to convey the lesson that it is unlawful to sing the praises of an evil-doer (Yalḳ. *l.c.*).

The accouterments of Saul fitted David; but the latter, seeing Saul's displeasure, doffed them (Midrash Tan., Emor, ed. Buber, p. 43a; comp. a similar tradition among the Arabs in Ṭabari and Mas'udi). When David went forth to battle, however, God placed greaves upon his limbs (Yalḳ. *l.c.*). Why did Goliath fall on his face? In order that David should not be put to the trouble of going far when rushing upon him to behead him. According to R. Huna, Goliath had the picture of Dagon engraved upon his heart, which also came to shame through the giant's death (Cant. R. to iv. 4). Goliath is mentioned as the typical case where strength leads to downfall (Ex. R. xxxi.). He died like a dog (*ib.*). The sword of David (probably Goliath's) had miraculous powers (Midrash Golyat, Jellinek, "B. H." iv. 140–141). In order to guard the slayer of Goliath against becoming overbearing, God exposed him to the revenge of his slain adversary's brother and mother (see Giants; Sanh. 95a; Jellinek, "B. H." iv. 140 *et seq.*). The Targum to II Sam. xxi. 19 makes David, not Elhanan, the slayer of Goliath; Rashi identifies Elhanan with David.

——**Critical View:** The two accounts of Goliath's death prove that many old traditions concerning valorous deeds performed in the wars against the Philistines were current among the people, the names of the heroes being variously given. Popular imagination attributed gigantic stature to the champions of the enemy; speaking not of one giant only, but of four (II Sam. xxi. 15 *et seq.*), and associating with David other men, "his servants," who after one of these encounters (with Ishbibenob; see Giants), in which David had run great dangers, swear to prevent him from again taking part in such expeditions.

The endeavor to harmonize the variant accounts is apparent in the version of I Chron. xx. 5, where Elhanan is credited with the slaying of Lahmi, the brother of Goliath. This Lahmi clearly owes his existence to the epithet by which Elhanan is distinguished in II Sam. xxi. 19, namely, the "Beth-lehemite" (בית הלחמי). The confusion in the text is plain in the repetition of "oregim" after the name of Elhanan's father, Jaare (Jair), from the end of the verse "the staff of whose spear was like a weaver's beam."

Literary Treatment.

The brief sketch in II Sam. xxi. is the more trustworthy. The men of David—freebooters—manifest no fear in their movements against the enemies. The story of David's duel exhibits great literary skill, and the purpose is plainly to exalt David. The giant and the mere lad—the one in heavy, formidable equipment, the other with the simple outfit of a shepherd; the insolence of the Philistine; the faith and fortitude of David; the cowardice of Israel; the distrust of David's own brothers; the helplessness of Saul; the blind animal passion of the champion; the shrewd, calm strategy of the shepherd—all these are contrasted effects worked out with consummate art. But they point to the fact that in this version reflection and tendency had the dominating part. From the point of view of literary effectiveness, few portions of Old Testament literature equal this.

Underlying this tradition concerning Goliath and other giants is the undoubted fact that many huge weapons of bronze (brass) and iron were found by the invading shepherd tribes of Israel. Many of these were stored away at old shrines, perhaps because they were votive gifts of former generations (I Sam. xvii. 54). The sword incident in the version of I Sam. xvii. reflects, according to Cheyne, the religious temper of late Psalms (Ps. xx. 7 [A. V. 8], xliv. 5 [6]). The battle-cry in Gideon's army (Judges vii. 20) may be remembered as significant in this connection. The later religious construction of the David-Goliath incident (see Ecclus. [Sirach] xlvii. 2–11) is indeed woven into the account in I Sam. xvii., just as the valorous deed of David furnished the basis for the late superscriptions of psalms within and without the Hebrew canon (Ps. cxliv. [cxliii.]) and of one in the Greek psalter, *ἔξωθεν τοῦ ἀριθμοῦ*: "when David fought against *Γολιαδ*" (Goliad[th]).

The text of the Septuagint differs materially from the Hebrew: verses 12–31, 41, 48b, and 50 are missing. These omitted, a coherent and consistent narrative is presented, recounting how David, a mere recruit, becomes suddenly a renowned warrior. Some critics have assumed that these omissions were made intentionally (so Wellhausen, "Die Composition des Hexateuchs," etc., 3d ed., p. 249; Kuenen, "Historisch-Kritische Einleitung in die Bücher des Alten Testaments," i., part 2, p. 61; Budde, "Richter und Samuel," p. 210). Others (W. R. Smith and Cornill) believe that the Hebrew verses not found in the Septuagint represent a second David-Goliath tradition.

E. C. E. G. H.

GOLITZYN, COUNT NICHOLAS: Russian writer; born in the second half of the nineteenth century. He became notorious through his history of Russian legislation dealing with the Jews, entitled "Istoria Russkavo Zakonodatelstva O Yevreyakh," of which only the first volume, covering the period from Alexis Mikhailovich (1649) to 1825, has appeared. His work is anti-Semitic in tendency. Although Golitzyn assumes that his compilation will be of historical value to students of the Jewish question, he does not conceal his prejudice against the Jews, and he even admits in the preface that the question, because of its vitality and urgency, can hardly be studied in a cold, impartial spirit. In speaking of the attitude of the Russian Jews toward the invasion of Napoleon, he belittles their patriotism and, in spite of direct testimony to the contrary (see ALEXANDER I.; RUSSIA), even accuses them of selfish motives. Referring to the attempts of the Senate under Elizabeth and Catherine II. to revise the laws concerning the Jews, Golitzyn neglects the facts which made such attempts necessary, and ascribes the action of the Senate to the intrigues of the Jews. The work is a compilation from the writings of Orshanski, Leontovich, Dobrynin, Bershadski, Nikitin, Derzhavin, Levanda, and others, supplemented by speculations of the author utterly at variance with the facts. Count Golitzyn, however, styles his work original, and claims, for instance, that Bershadski's "Litovskiye Yevreii" is strongly in favor of the Jews. Using Nikitin's history of the Jewish agricultural colonies in 1804–25, he not only imposes a different and unwarranted meaning upon the facts brought out by that author, but accuses him of partiality and lack of thoroughness, though admitting at the same time that Nikitin's work possesses great value as an extensive collection of interesting facts.

GOLLANCZ, HERMANN: English rabbi; born at Bremen Nov. 30, 1852; educated at Jews' and University colleges, London. He officiated at several synagogues in England, and on the death of the late chief rabbi succeeded Dr. Hermann Adler as rabbi at Bayswater Synagogue, London. In Jan., 1900, he obtained the degree of Lit.D. from the University of London, being the first Jew to obtain that honor. Gollancz was secretary to the International Congress of Orientalists (Semitic Section) held in London in 1891, and was appointed to represent the University of London as delegate at the Oriental Congress held at Rome. He is professor of Hebrew at University College, London. He has published "Selections of Charms from Unedited Syriac MSS.," 1891; English translations of "The Syriac Version of Sindban," 1892; "The Ethical Treatises of Berachyah" (with Eng. transl.), London, 1902; and "Clavis Solomonis," 1903. In 1903 he edited an English version of the Bible for use in Jewish families.

J. G. L.

GOLLANCZ, ISRAEL: Secretary of the British Academy; born in London 1864. He was educated at the City of London School and Cambridge University (B.A., 1887). He was lecturer in English at University College 1892–95; lecturer at Cambridge under the Special Board 1888–96; and examiner for the medieval and modern tripos 1895–96. He was elected lecturer in English at the University of Cambridge in March, 1896. When, owing in large measure to Gollancz's initiative, the British Academy was founded in 1902, he was appointed secretary. In 1903 he became professor of English literature at King's College, London. Gollancz has always interested himself in communal affairs; he is connected with several of the chief institutions, has been for several years theological tutor to the Jewish students at Harrow School, and in 1903 was elected president of the Union of Jewish Literary Societies.

Gollancz has edited: "The Pearl," a Middle-English poem prefaced with a special verse by Tennyson, 1891; "Cynewulf's Christ," 1892; "Exeter Book of Anglo-Saxon Poetry" (Early English Text Society), 1895; "Temple Shakespeare," 1894–96, of which nearly three million copies have been sold, and which led to the publication of the "Temple Classics," a series of the best books; "The Parliament of the Three Ages" (Roxburgh Club), 1897; and "Hamlet in Iceland," 1898. Gollancz is now (1903) editing another series entitled "The King's Classics."

J. V. E.

GOLOMB, HIRSCH NISSAN: Russian Hebraist and writer on music; born at Podzelve, government of Wilna, Dec. 15, 1853. He studied in the yeshibah of Wilkomir, and received a good musical training at Wilna. At the beginning of his literary career he was a corrector in Romm's printing-house at Wilna, and while there he translated into Judæo-German the "Hilkot De'ot" of the Yad ha-Ḥazaḳah, Wilna, 1876. He also published several pamphlets in Judæo-German, among them "Mishle Ḥakamim." He then published a series of works on music: "Ḳol Yehudah," a musical chrestomathy, Wilna, 1877; "Menaẓẓeaḥ bi-Neginot," a manual of singing and the violin, partly in Hebrew and partly in Judæo-German, *ib.* 1884; "Zimrat Yah," a manual of harmony, in Hebrew and Judæo-German, followed by a musical glossary, *ib.* 1885. He has also written the following school-books: "Ḥeder la-Tinoḳot," a Hebrew reader, *ib.* 1883; "Lahaḳat Nebi'im," a graded Hebrew chrestomathy, *ib.* 1888; "Ḳiryat Sefer," a description of Wilna, Grodno, Byelostok, and Warsaw, and of their Jewish communities.

H. R. M. Sel.

GOLYATOVSKI or **GALIATOVSKI, JOANNIKI:** Little-Russian cleric and anti-Jewish writer; died 1688. After having studied in the Kiev-Mogilian College, Golyatovski took holy orders, and was later appointed rector of the Little-Russian schools. He declared himself the enemy of the Roman Catholics, Jews, and Moslems, but showed the greatest animosity toward the Jews, knowing that this would increase his popularity among the populace of Little Russia. Golyatovski soon found in the appearance of Shabbethai Ẓebi a good opportunity for venting his ill-will. Taking the latter's assumptions as a pretext, he wrote, in the form of a dialogue between a Jew and a Christian, a violent polemic against the Jews under the title "Messia Pravdivi." He says in the preface that the reason which induced him to write the work was that the dishonesty of the Jews in Little Russia, Lithuania, and Poland "raised its horns too high." He describes the Shabbethaian movement from a strongly anti-Jewish point of view. The work was written in Little-Russian, then translated into Latin, and afterward into Russian by I. Nitzkevich (Kiev, 1887).

GOMEL. See Homel.

GOMEL BENSHEN ("gomel" = Hebr., "who bestoweth"; "benshen" = Judæo-German, "to bless"): The pronouncing of the benediction for escape from danger after passing through the desert; after confinement in prison; after severe sickness; and after crossing the sea and arriving safely in port. From the verses "Men should praise the Lord for his goodness, and for his wonderful works to the children of men!" and "They should exalt him also in the assembly of the people, at the seat of the elders they should praise him" (Ps. cvii. 8, 15, 21, 32, Hebr.), the Talmud (Ber. 54b) derived the duty of giving thanks on the four occasions enumerated, and of doing this in public, that is, where ten or more men are gathered together for common worship. It is suggested that a literal compliance with the text ("at the seat of the elders") would require the presence of two rabbis, but this notion has been ignored. The words of the benediction suggested in the Talmud are: "Blessed be . . . who bestoweth ["gomel"] goodly mercies"; but in modern usage the one "bound to give thanks" is called to the desk to read a subsection from the Pentateuch, and, after the usual benediction at the close, he adds the following: "Blessed be Thou . . . who bestoweth favors on the guilty, and who hath bestowed on me all that is good"; whereupon all the bystanders answer: "He who has bestowed good on thee may further bestow good on thee: Selah."

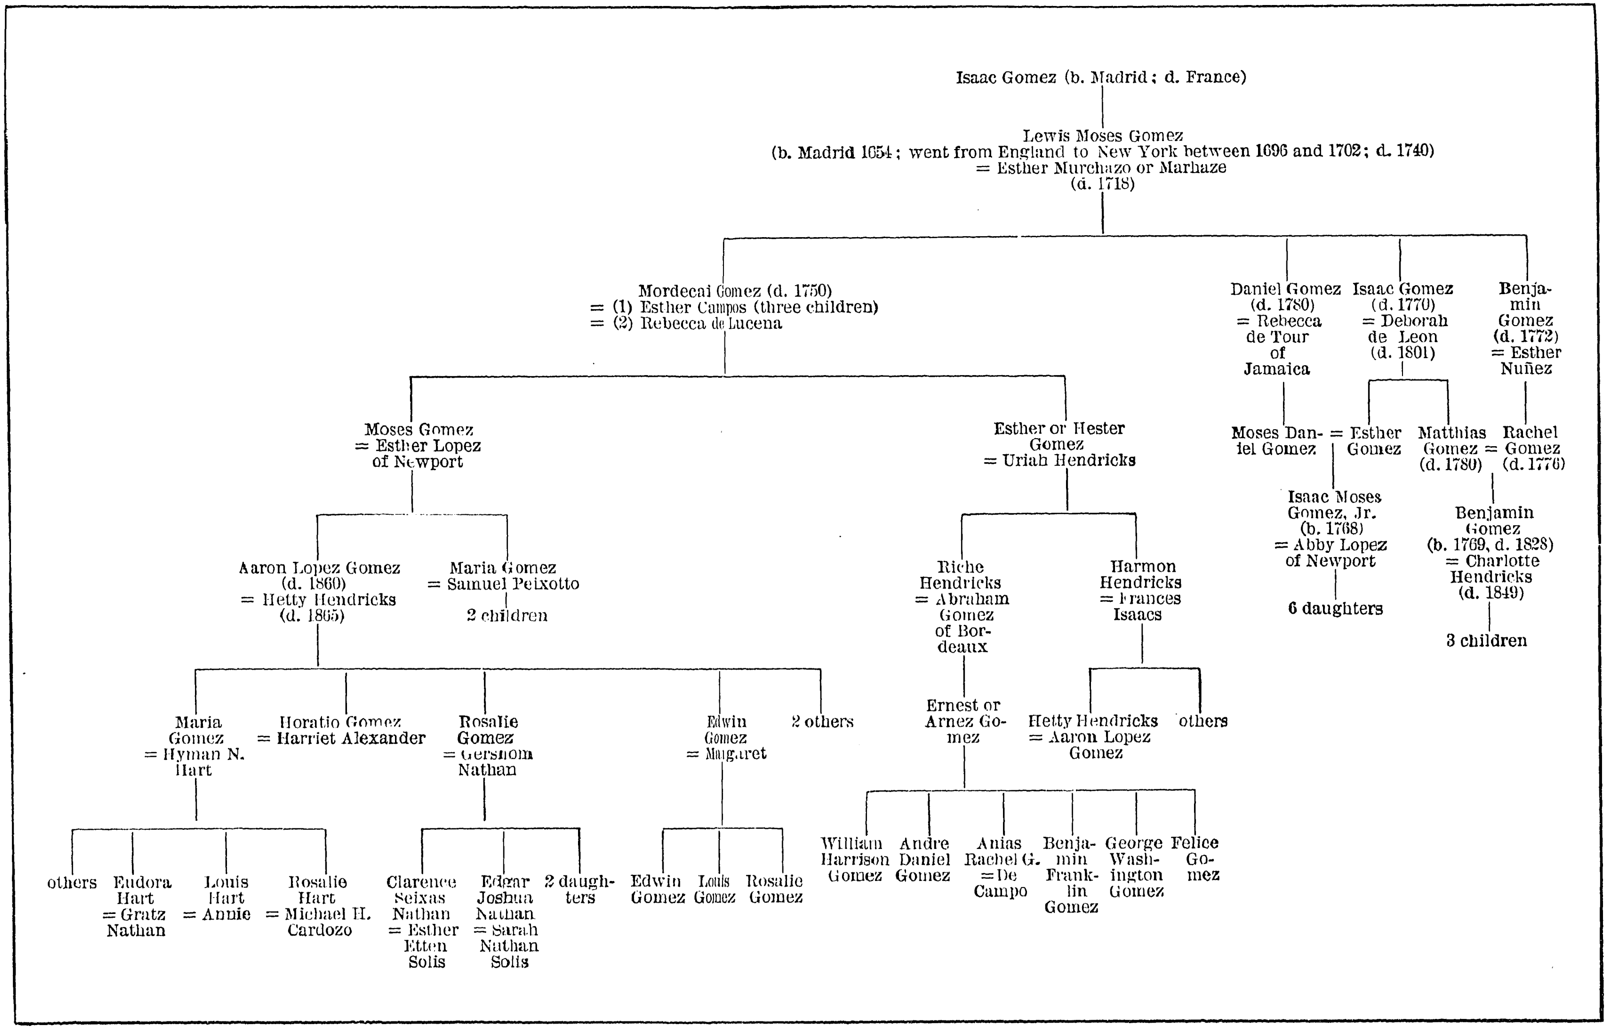
GOMER (גמר): 1. Eldest son of Japheth, and father of Ashkenaz, Riphath, and Togarmah (Gen. x. 2, 3; I Chron. i. 5, 6). In Yoma 10a and Yer. Meg. i. 9 "Gomer" is explained to be the same as גרממיא, which stands either for גממריא ("Cimmerii") or for גרמניא ("Germany"). In Gen. R. xxxvii. "Gomer" is Africa, and "Magog" is Germany (comp. Lenormant, "Origines," ii. 332). Gomer, standing for the whole family, is mentioned in Ezek. xxxviii. 6 as the ally of Gog, the chief of the land of Magog.

2. Daughter of Diblaim, and wife of the prophet Hosea (Hosea i. 3).

E. G. H. M. Sel.

GOMEZ: The Gomez family, or rather that branch of it which has established itself in America, traces its descent from Isaac Gomez, a Marano who



Isaac Gomez (b. Madrid; d. France)
Lewis Moses Gomez (b. Madrid 1654; went from England to New York between 1696 and 1702; d. 1740) = Esther Murchazo or Marhaze (d. 1718)

Genealogical Tree of the Gomez Family.

left Madrid early in the seventeenth century and went to Bordeaux, whence his son Lewis removed to London and, later, to New York. His descendants have intermarried with most of the old-time American Jewish families. For the genealogical tree of the Gomez family see page 41.

J. E. N. S.

GOMEZ, ANTONIO ENRIQUEZ (called at the Spanish court **Enrique Enriquez de Paz**): Spanish poet; born in Segovia toward the end of the sixteenth century; died in 1662. He was a son of the Marano Diego Enriquez de Villanueva. Of exceptional abilities, Antonio devoted himself to study while very young. At the age of twenty he entered upon a military career, in which he distinguished himself so greatly that he was soon advanced to the rank of captain, was decorated with the Order of St. Michael, and received the title of "Royal Counselor." Later, however, he was suspected by the Inquisition, and fled to France. For several years he remained in Bordeaux, Rouen, or Paris, and then settled in Amsterdam, where he openly professed Judaism. In April, 1660, he was publicly burned in effigy in Seville.

Gomez cultivated almost every branch of literature. He distinguished himself as philosopher, poet, theologian, statistician, and author. In the prologue to his heroic poem, "El Samson Nazareno," he gives a list of his works which had appeared up to that time, as follows:

Academias Morales de las Musas. Bordeaux, 1642; Madrid, 1660; Barcelona, 1704.
La Culpa del Primer Peregrino. Rouen, 1644; Madrid, 1735.
La Politica Angelica, divided into five dialogues. Rouen, 1647.
Luis Dado de Dios á Luis y Ana, Samuel Dado de Dios á Elcana y Ana, dedicated to Louis XIV. Paris, 1645.
El Siglo Pitàgorico y Vida de D. Gregorio Guadaña. Rouen, 1647; 2d ed., 1682.
La Torre de Babilonia. Part i., *ib.* 1649; Madrid, 1670; Amsterdam, 1726.
El Samson Nazareno: Poema Heroico. Rouen, 1656.
Romance al Divin Martyr Juda Creyente, Martirizado em Valladolid por la Inquisicion, an account of the martyrdom of Juda Creyente or D. Lope de Vera y Alarcon, who was burned to death at Valladolid July 25, 1644. See Daniel Levi de Barrios, "Relacion de los Poetas," p. 57; Neubauer, "Cat. Bodl. Hebr. MSS." No. 2481, 5.

Gomez was also a prolific dramatist, as he himself has stated in the prologue to his "Samson Nazareno"; up to the year 1642 he had written twenty-two dramas, some historical and some heroic. Many of them show a strong similarity to those of Calderon, who was twenty years his junior; indeed, his plays were often passed off as Calderon's productions.

Of his dramas there appeared: "A lo que Obliga el Honor," together with "Academias Morales," Bordeaux, 1642; Valladolid, n.d.; Barcelona, 1704; "La Prudente Abigaïl," Bordeaux, 1642; Barcelona, 1704; Valencia, 1762; Amsterdam, 1726. "A lo que Obligan los Celos" was falsely attributed to D. Fernando de Zarate. Gomez is also said to be the author of "Triunfo Lusitano, Acclamação do Sr. Rei D. João IV.," Paris, 1614, and of the "Lamentaciones de Jeremias" ("Revista de Gerona," xii. 76 *et seq.*).

Gomez's lyric poems are especially praiseworthy for their purity of form, beauty of expression, wealth of thought, and depth of feeling. He was less successful with his heroic poems, which, in the opinion of Ticknor, are full of Gongorisms.

GOMEZ, DUARTE. See USQUE, SOLOMON.

GOMEZ, MANUEL: Physician; born about 1580 of Portuguese parentage at Antwerp. After studying medicine at Evora he settled as a physician at Amsterdam. He wrote "De Pestilentiæ Curatione" (Antwerp, 1603; 3d ed., *ib.* 1643), and is said to have been one of the first to call attention to the uselessness of milk as a specific in the treatment of confirmed phthisis.

This "Doctor Antwerpiensis," who was highly esteemed by Amato Lusitano, was also a poet. Several of his poems—on the spider, the ant, and the bee—were added to his metrical commentary on the aphorism of Hippocrates, "Vita brevis, ars longa." The commentary, written in Spanish and published in 1643, was eulogized in a Latin ode by his countryman Manuel Rodriguez of Antwerp.

G. M. K.

GOMEZ DE SOSA (SOSSA), ABRAHAM: Spanish physician; died at an advanced age Elul 21 (= Sept. 10), 1667. He was physician in ordinary to the infante Ferdinand (son of Philip III. of Spain), governor of the Netherlands. His epitaph is recorded in D. H. de Castro's "Keur van Grafsteenen," p. 83.

G. M. K.

GOMEZ DE SOSA (SOSSA), ISAAC: Latin poet ("famoso poeta Latino," according to De Barrios); son of Abraham Gomez de Sosa. He was arbiter at the academy of poetry founded by Don Manuel de Belmonte in 1677. Gomez wrote the Latin epitaph on his father's tomb, a Latin poem in honor of Jacob Judah Leon's "Las Alabanças de Santitad," and two other poems in honor of a work by Joseph Penço de la Vega. He also caused a translation to be made of the work "Divinidad de la Ley."

BIBLIOGRAPHY: D. H. de Castro, *Keur van Grafsteenen*, p. 84; Kayserling, *Bibl. Esp.-Port.-Jud.* pp. 13, 22, 59, 74, 94, 104.

G. M. K.

GOMORRAH: One of the destroyed cities of the Pentapolis. Comp. SODOM and ZOAR.

GOMPERS, SAMUEL: American labor-leader; born in London Jan. 27, 1850. At ten years of age he became a wage-earner, working in a shoe-factory; later he was apprenticed to a cigar-maker. In 1863 he emigrated to America, where a year later he helped to organize the Cigar-Makers' International Union, becoming its first registered member. For a number of years Gompers was the secretary and president of this organization and helped to make it the most successful of American trade-unions.

In 1881 he became a delegate to the first convention of the American Federation of Labor. His natural abilities as a leader were soon recognized; in

1882 he was elected to the presidency of the Federation, the chief representative body of working men in the United States, possibly in the world, its membership being estimated at over 2,000,000. He has been continuously reelected president, except in 1894, when he was defeated by John McBride. The first six years of his presidency he served without remuneration, and he also paid his own expenses incidental to the agitations of 1886 in favor of the eight-hour law.

Samuel Gompers.

Gompers was instrumental in placing on the statute-books of the national government and of the various states laws for the benefit of the working classes. Among the numerous laws passed at his instance are those providing for an eight-hour workday for mechanics and laborers in government service, and a ten-hour limit for street-railway workers; for the regulation of child labor, and the control of sweat-shops; and also for making the first Monday in September a legal holiday, since known as "Labor Day."

In 1901 Gompers was appointed a member of the National Civic Federation as a representative of the interests of labor.

In addition to being the editor of the "American Federationist," the official organ of the American Federation of Labor, Gompers has written numerous articles on the labor question.

A. I. G. D.

GOMPERTZ, BENJAMIN: British actuary; born in London March 5, 1779; died there July 14, 1865. He was descended from the family of Gomperz of Emmerich. In 1798 he began to contribute to the "Gentleman's Mathematical Companion," for a long time carrying off the annual prizes of that magazine. Though he entered the Stock Exchange, he continued to study mathematics, became a member of the old Mathematical Society of Spitalfields, and acted as its president when it became later the Astronomical Society. He was a contributor to the "Transactions" of the Royal Society, and in 1817–18 published tracts on imaginary quantities and porisms which established his reputation as a mathematician. In 1819 he was elected a fellow of the Royal Society, and became a member of its council in 1832. In 1821 he was made a member of the council of the Astronomical Society, subsequently contributing many valuable papers to its proceedings.

Gompertz's reputation rests mainly on his work as actuary. On the establishment of the Guardian Insurance Office in 1821 he was a candidate for its actuaryship, but the directors objected to him on the ground of his religion. His brother-in-law, Sir Moses Montefiore, in conjunction with Nathan Rothschild, thereupon founded the Alliance Assurance Co. (1824), and Gompertz was appointed actuary under the deed of settlement. In this capacity he developed in 1825 a mathematical law of human mortality which remains the foundation of all actuarial calculations. In 1848 Gompertz, after twenty-four years' service, retired from the actuaryship and devoted himself to scientific labors. He had been frequently consulted by the government, and was a member of numerous learned societies as well as of the leading Jewish charities. He worked out a plan of poor-relief which was afterward adopted by the Jewish board of guardians.

GOMPERTZ, ISAAC: English poet; brother of Benjamin and Lewis Gompertz; born 1774; died 1856. He wrote: "June, or Light and Shade," a poem in six parts, London, 1815; "The Modern Antique, or the Muse in the Costume of Queen Anne," London, 1813; "Devon, a Poem," Teignmouth, 1825. Gompertz was much admired by his contemporaries; Dr. Jamieson, in his "Grammar of Rhetoric" (p. 357), classes Gompertz with Dryden, Pope, Addison, and Gray.

J. I. H.

GOMPERTZ, LEWIS: English inventor of London; died Dec. 2, 1861; brother of Benjamin Gompertz, the mathematician. He devoted his life to the cause of kindness to animals, and in 1824 set forth his views in a work entitled "Moral Enquiries on the Situation of Men and Brutes," which attracted considerable notice, resulting in the foundation of the Society for the Prevention of Cruelty to Animals. Gompertz became honorary secretary of the society and worked for it with much enthusiasm. In 1832 religious difficulties arose between Gompertz and the executive committee; his "Moral Enquiries" was denounced as hostile to Christianity, and he severed his connection with the society. He then proceeded to form "The Animals' Friend Society," which speedily outstripped the parent institution. In connection with the new society Gompertz edited "The Animals' Friend, or the Progress of Humanity"; but owing to ill health he was obliged to retire in 1846 from public work, and the society disbanded.

Gompertz was the inventor of shot-proof ships, with contrivances for reflecting the balls to the places from which they were fired; a mechanical cure for apoplexy; and the expanding chuck, which is now to be found in almost every workshop.

Besides a volume of articles from "The Animals' Friend," Gompertz was also the author of "Mechanical Inventions and Suggestions on Land and Water Locomotion," London, 1851.

J. G. L.

GOMPERZ, BENJAMIN: Austrian physician; born at Vienna Oct. 6, 1861. He was educated at the Leopoldstädter communal gymnasium and the University of Vienna, and received the degree of doctor of medicine in 1885. He was appointed assistant at the hospital of the university (1885–1900), and subsequently established himself in the Austrian capital as a physician and specialist in aural and nasal diseases. Since 1897 he has been curator of the Baronin Hirsch Kaiser-Jubiläums-Wohlthätigkeit-Stiftung.

Gomperz has written many essays for the medical journals; *e.g.*: "Das Weiche Papilläre Fibrom der Unteren Nasenmuschel," in "Monatsschrift für Ohrenheilkunde," 1889, No. 2; "Erfahrungen über die Verschliessbarkeit Alter Trommelfellücken," in the "Wiener Klinische Wochenschrift," 1896; and a number for the "Oesterreichisch-Ungarische Centralblatt für die Medizinischen Wissenschaften." His "Beiträge zur Pathologischen Anatomie des Ohres" was published in the "Archiv für Ohrenheilkunde." Other essays appeared in the "Centralblatt für die Gesammte Therapie," in the "Wiener Medizinische Wochenschrift," and in the "Deutsche Medizinische Wochenschrift."

GOMPERZ-BETTELHEIM. See BETTELHEIM.

GOMPERZ, JULIUS, RITTER VON: Austrian merchant and statesman; brother of Theodor Gomperz; born at Brünn 1824; studied at the gymnasium and Philosophische Lehranstalt there. In 1859 he became a member of the chamber of commerce (president in 1872). He took his seat in the Moravian diet in 1861; and in 1871 he was a member of the Lower House, entering the Upper House in the year following. In this year he was knighted and decorated with the Order of the Austrian Crown (3d class). He is also an officer of the French Legion of Honor. Gomperz is one of the owners of the cloth-factory of Auspitz Enkel at Brünn, and a member of the firm of Philipp Gomperz of Vienna. For many years he was president of the Jewish congregation of Brünn. S.

GOMPERZ, THEODOR: Austrian philologist; born at Brünn March 29, 1832. His great-grandfather, **Benedictus Levi Gomperz,** was the financial agent of the duchy of Cleve, whose influence with the Dutch government was exemplified by his successful intercession (1745) in behalf of the Jews of Bohemia and Moravia when they were to be expelled from these countries (see BOHEMIA; MARIA THERESA; comp. David Kaufmann, "Barthold Dowe Burmania und die Vertreibung der Juden aus Mähren," in "Grätz Jubelschrift," pp. 279–313).

Toward the close of the eighteenth century Benedictus' son, **Theodor Gomperz,** went to Brünn, Moravia, where he held a modest position in the internal revenue service of the Austrian government under Joseph II. Soon afterward, however, he retired from public life and devoted himself to business, in which he acquired a moderate fortune. The business was continued by his sons, the father and uncle of Theodor Gomperz, the subject of this biography, both of whom attained to positions of trust and respect in the community.

Gomperz entered the University of Vienna in 1849, and studied classical philology under Hermann Bonitz and philosophy under Robert Zimmermann. He especially applied himself to the study of the works of Spinoza and James and John Stuart Mill; the works of the last-named he subsequently translated into German (Leipsic, 1869–80).

Gomperz became privat-docent in 1867, assistant professor in 1869, and professor of classical philology in 1873. He is honorary Ph.D. of the University of Königsberg and "doctor litterarum" of the University of Dublin. He became corresponding member of the Vienna Academy of Sciences in 1868, and full member in 1882. He is also corresponding member of the St. Petersburg Academy of Sciences. In 1901 he was appointed by the emperor Francis Joseph member of the Austrian House of Lords.

Gomperz's principal writings are: "Philodemi de Ira Liber," 1864; "Demosthenes als Staatsmann," 1864; "Herculaneische Studien," 1865; "Beiträge zur Kritik und Erklärung Griechischer Schriftsteller," 1875–90; "Herodoteische Studien," 1883; "Ueber ein Bisher Unbekanntes Griechisches Schriftsystem aus der Mitte des 4. Vorchristlichen Jahrhunderts," 1884; "Platonische Aufsätze," 1887; "Ueber die Charaktere Theophrasts," 1888; "Die Schrift vom Staatswesen der Athener," 1891. He resigned his professorship a few years ago to devote his entire energy to his main work, "Griechische Denker," which began to appear in 1893 (3 vols.; vol. i. transl. into English by L. Magnus). Gomperz declares the object of his undertaking to be "to present a comprehensive picture of this department of knowledge" as a kind of prolegomena to an "exhaustive universal history of the mind of antiquity." Each volume is divided into three books.

S.

GONZALO GARCIA DE SANTA MARIA: Spanish bishop and enemy of the Jews; born at Burgos in 1379; baptized as a boy of eleven, together with his father, Paul de Burgos or de S. Maria. He was appointed Archdeacon of Briviesca in 1412, and then successively Bishop of Astorga, of Placentia, and of Siguenza. Besides his classical and historical studies, he made himself familiar with Jewish literature, and was one of the most learned men of his time in Spain. Gonzalo showed his hostility to the Jews at every opportunity. He was sent to the council at Basel as a delegate from Aragon, and was one of those who instigated the decisions hostile to the Jews which were formulated there. Gonzalo was entrusted with the oversight of the punctilious execution of the laws against the Jews which had been decreed by the anti-pope Benedict XIII., and, on the advice of Paul de S. Maria, by Juan I. and other Castilian kings.

GONZALO, MARTINEZ (also called **Martin de las Castillas**): A poor Spanish knight who was promoted to high offices through the instrumentality of Joseph de Ecija, in whose service he was. He brought charges against his master and against Samuel ibn Waḳar before King Alfonso XI. (1312–60), and both were ruined and soon afterward met their death. When he became minister and grandmaster of the Order of Alcantara, he conceived the idea of exterminating all the Jews of Castile, directing his attacks first against two prominent Jews, Moses Abudiel and Ibn Ya'ish, who, however, maintained themselves in the king's favor by means of large gifts of money. When in 1339 Abu al-Ḥasan of Morocco sent an army to conquer Castile, Gonzalo proposed that the Jews be expelled and their fortunes confiscated. On account of its inexpediency this plan was opposed, especially by D. Gil de Albornoz, Archbishop of Toledo. Gonzalo led the king's troops against the Moroccan commander 'Abd al-Malik, who was put to flight. But shortly after this Gonzalo was overthrown by the help of the king's mistress, Leonora de Guzman. He fled and entrenched himself in a tower, but was forced to surrender; in 1340 he was burned at the stake and his fortune was confiscated.

GOOD AND EVIL. See Ethics.

GOODMAN, TOBIAS: English preacher and author; died after 1824; one of the earliest preachers in English of the London Jewish community. Tobias Goodman was a reader and minister at the Denmark Court Synagogue, the first synagogue established in the West End of London. Here as early as 1817 he preached an English sermon on the death of Princess Charlotte of Wales, and if not the first sermon delivered in English in a London synagogue, it is the earliest sermon printed in English of which any record exists. Some time afterward he preached a sermon in the same synagogue on the death of King George III. (London, 1820). About 1824 he was preaching regularly on Sabbaths in English at the Rosemary Lane Synagogue. But Goodman's work as a preacher was not confined to London. On May 2, 1819, in the Seel Street Synagogue, Liverpool, he delivered a discourse on "The Faith of Israel," which was replied to by William Smith of Glasgow in a published letter dated Oct. 3, 1825.

Goodman, who described himself at times as a "public lecturer," and at other times as a "teacher of the Hebrew language," was the author, also, of various works. His sermon at Liverpool on "The Faith of Israel" was subsequently elaborated into a text-book, published in 1834.

As early as 1806 he had translated into English Jedaiah Bedersi's "Beḥinat ha-'Olam." In 1809 he published a pamphlet containing a protest against the London Society for Promoting Christianity among the Jews.

GOOSE (אווז, pl. אווזין; קוקא, pl. קאקי): According to the Talmudists the domestic and the wild goose are two different species which should not be crossed (B. Ḳ. 55a; Bek. 8a). They are distinguished by the following criteria: The domestic goose has a longer beak than the wild species; its genital organs are more retired under the skin, and it has several eggs in its ovary at the same time, while the wild goose has only one, another being formed after the first has been laid (*ib.*). In the Shulḥan 'Aruk, Yoreh De'ah, 297, 7, only the second criterion is mentioned. In Yer. B. Ḳ. v. 10 and Kil. viii. 6 a sea-goose is spoken of, which, because it belongs to a different species, ought not to be crossed with a domestic goose. The goose, being a water-fowl, has a very thin brain-membrane (Ḥul. 56b). It is permitted to hold a goose by its wings on the Sabbath while it is moving, but it is not permitted to do so with a hen; because the former when held by the wings moves of its own accord, while the latter has to be dragged; and on Sabbath the moving of things from one place to another in an open space is not allowed (Shab. 128b, Rashi). The foot of a goose is as wide as long (Bek. 45a). Generally a goose returns to its abiding-place at night (Beẓah 24a), but occasionally it settles in a garden (Ḥul. 38b). Geese were known for their honking; compare the saying "You gabble like geese" (Yer. B. B. viii. 7). The Talmudists, referring to Prov. i. 20, declared that one who sees a goose in his dream may hope for wisdom (Ber. 57a). R. Gidal called women "white geese" (Ber. 20a), a term applied by Raba to old and selfish judges (Giṭ. 13a).

Besides the flesh and feathers, which are widely used also in modern Jewish households, the fat and lungs of the goose were used, the latter two for medicinal purposes (Ḥul. 49a; Yoma 84a). Geese were also used in thrashing (Sanh. 29b). Rabba bar bar Ḥana in one of his stories similar to the "Lügenmärchen" of modern folk-lore says that he once saw in the desert geese whose feathers were falling out of their bodies on account of their fat, while rivers of oil issued from them. They will be preserved for the great meal to be given to the righteous in the Messianic times (B. B. 73b).

GOPHER-WOOD: The material of which the ark of Noah was made. The word "gofer" occurs but once in the Bible, viz., in the expression עצי גפר (Gen. vi. 14). A comparison of the ancient versions shows that the word was just as obscure when they were made as it is to-day.

The renderings proposed by modern interpreters are as a rule arbitrary and unsatisfactory. The identification of "gofer" with "cypress" (Celsius, "Hierobotanicon," i. 328; Bochart, "Geographia Sacra," ii. 4) rests on the mere assumption that the roots of these two words are akin. According to P. de Lagarde, "gofer" stands for "gofrit," meaning originally "pine," from old Bactrian "vohukereti," and later also "sulfur," on account of the likeness in appearance which sulfur bears to pine-resin ("Semitica," i. 64; comp. "Symmicta," ii. 93, and "Uebersicht über die im Aramäischen, Arabischen und Hebräischen Uebliche Bildung der Nomina," p. 218).

Others think that "gofer" can best be explained from the Assyro-Babylonian literature. Cheyne, starting from the assumption that the Hebrew narrative of the Deluge is a mere translation from some similar Babylonian document, supposes that the passage under discussion read in the original "gushure iṣ erini" (cedar-beams). He thinks that first the word "erini" was overlooked by the Hebrew translator, who afterward mistook "gushure" for a tree-name, and accordingly wrote עצי גשר; next a scribe, whose eye was caught by כפר at the end of the verse, miswrote גפר (Stade's "Zeitschrift," 1898, p. 163; comp. Cheyne and Black, "Encyc. Bibl." *s.v.*). F. Hommel holds the Hebrew גפר to be the Assyrian "giparu" (reed).

The "kufa" (Arabic, "kufr" = Hebr. "kofer" = "gofer") now in use on the rivers and canals of the land that gave birth to the Hebrew narrative of the Deluge are made of willow-branches, palm-leaves, etc., closely interwoven like basket-work, with a coat of bitumen on the inside. This is evidently a very old type of water-craft, suggested by the natural resources of a land devoid of large trees suitable for ship-building, but having an abundance of lighter material and bitumen. Such must have been the ark of Noah (Hastings, "Dict. Bible," *s.v.* "Babylonia"). J. Halévy implicitly adopts the same view ("Recherches Bibliques," i. 130).

The reading of the Masoretic text is correct, at least in the consonants. It is none the less certain that in course of time the Assyrian גפר (whether first Hebraized "gefer" or "gofer") became obscure to the Hebrews. This might have necessitated the addition of an explicative clause with a Hebrew word as a substitute for גפר, viz., קָנִים. This, when the Hebrews had become familiar with the Phenician methods of ship-building, came by degrees to be considered as an absurdity, and was altered into קִנִּים, much against the usage of the Hebrew language and in violation of the most elementary rules of composition, yet seemingly quite in agreement with the early Jewish methods of emendation.

For passages of the Bible supporting, though only indirectly, the identification of "gofer" with "reed," see the Bible commentaries to Ex. ii. 3, Isa. xviii. 2, and Job xi. 26, and the Hebrew lexicons *s.v.* גמא and אבה. See also Papyrus; Reed; Ship and Shipping.

E. G. H. H. H.

GORDIN, JACOB (JAKOV MIKHAILOVICH): Yiddish playwright and reformer; born May 1, 1853, in Mirgorod, government of Poltava. He received a good education and acquired a thorough knowledge of Hebrew. In 1870 he began to contribute articles to various Russian periodicals. His first sketches appeared in "Zarya," the organ of the Liberals of South Russia. In 1880 he wrote for "Nedyelya" a series of short stories of Jewish life, and also a novel entitled "Liberal-Narodnik." For a time Gordin was unofficially the editor of "Yelisavetgradski Vyestnik" and "Odesskiya Novosti," to which he contributed weeky feuilletons under the pseudonym "Ivan Koliuchy."

In 1879 Gordin founded in Yelisavetgrad the rational sect of the Bibleitzy ("Bible Brotherhood"), which broke away from dogmatic Judaism. He remained the moving spirit of the fraternity throughout its short career. In 1890 he emigrated to New York.

In America Gordin entered a new field of literature, becoming a Yiddish playwright. In this capacity he has done much to improve the Jewish stage, which, largely through his efforts, has attained a reputable position. Gordin is a prolific writer, and, since his first play, "Siberia," was produced in 1891, has composed about sixty Jewish dramas and vaudevilles. While some of these belong to the poorest kind of literature, others have scarcely their equal on the Jewish stage, and may justly be ranked among the higher productions of dramatic art. Gordin's best plays are: "The Yiddish King Lear," "Mirele Effros," "Shechite," "Sappho," "Gott, Mensch un Taiwel," "Kreutzer Sonata," "Yetomoh."

Gordin has also written in Yiddish a number of sketches, some of which are pathetic, and some grotesquely humorous.

Bibliography: H. Hapgood, *The Spirit of the Ghetto*, New York, 1902.

H. R. W. A. M.

GORDON, DAVID B. DOB BAER: Russian journalist; born in Podmerecz, near Wilna, in 1826; died in Lyck, Prussia, May 21, 1886. At the age of ten he went to Wilna, where he studied in the yeshibah. When eighteen he settled in Sergei (Serhei), government of Suvalki, where he married and continued his studies, becoming a teacher. About 1850 he left Russia for England. While passing through Lyck he made the acquaintance of Eliezer Lipman Silberman, who was then planning the foundation of a Hebrew periodical. After three years of hardship in Liverpool he became a schoolteacher, but was finally forced by ill health to relinquish that position. When in 1856 Silberman began to publish the first Hebrew weekly, "Ha-Maggid," he invited Gordon to act as his assistant editor. Gordon went to Lyck in 1858, and, in addition to his editorial duties, assisted Silberman in the formation and conduct of the society Meḳiẓe Nirdamim (1864), established for the purpose of publishing old and valuable Hebrew works. For a short time Gordon edited the "Maggid Mishneh," a literary supplement to the above periodical, and for many years he edited the German tri-weekly "Lycker Anzeiger." After Silberman's death in 1882 Gordon succeeded him as editor of "Ha-Maggid." Gordon was one of the pioneers in the Zionist movement, and one of the intellectual leaders of the Chovevei Zion. In 1884 he went to London as the representative of the Zionists to congratulate Sir Moses Montefiore on the hundredth anniversary of his birth.

Gordon translated the following: under the title "Masse'e Yisrael," Israel b. Joseph Benjamin's (Benjamin II.'s) account of his travels through Asia and Africa (Lyck, 1854); "Milḥemet ha-Or weha-Ḥoshek," describing the trial of S. Brunner and Ignaz Kuranda in Vienna (from the German; *ib.* 1860); and "Mosheh wi-Yerushalayim," on Sir Moses Montefiore's journey to Jerusalem (from the English; *ib.* 1867). He wrote "Darke ha-Refu'ah," on popular medicine and hygiene, part i. (*ib.* 1870); several biographies which appeared in "Ha-Maggid" and

"Maggid Mishneh"; and one of Leo Hebræus, as an introduction to "Wikkuaḥ 'al ha-Ahabah," the Hebrew edition of the "Dialoghi di Amore." His "Narrative from the Borders," which was published in the "Jewish Chronicle" in 1881–82, affords a trustworthy account of the Russian persecutions of 1881.

Bibliography: *The Times*, London, June 7, 1886; *Ha-Asif*, iii. 114–115; Fuenn, *Keneset Yisrael*, p. 228, Warsaw, 1886.

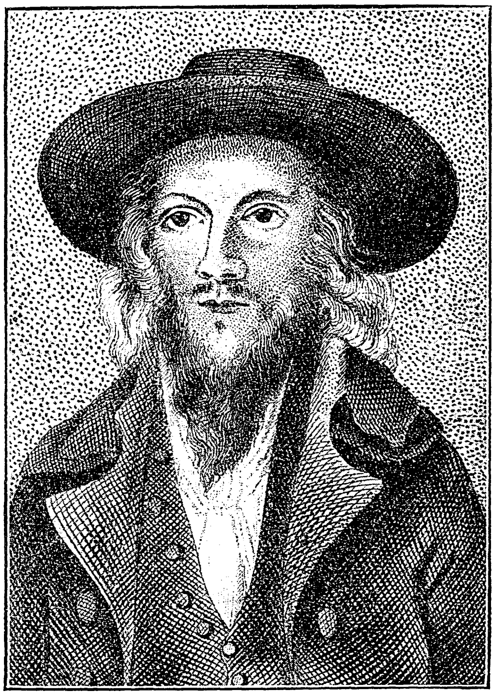
GORDON, LORD GEORGE: English agitator and convert to Judaism; born in London on Dec. 26, 1751; died in 1793; son of the third Duke of Gordon. After serving as midshipman and lieutenant in the navy, he entered Parliament for Inverness in 1774. In 1778 Gordon at the head of a disorderly mob presented a bill for the repeal of the act by which the Catholic disabilities had been removed, and, a riot ensuing, Gordon was sent to the Tower, but was acquitted. In 1784 he came forward as the Protestant champion in the quarrel between the Dutch and the emperor Joseph. Meanwhile he was in correspondence with the English Jews, and made an application to Chief Rabbi Tebele (David) Schiff to be converted to Judaism, which application was refused. He was, however, received into the covenant in Birmingham, through the agency of Rabbi Jacob of that city, but without the sanction of the ecclesiastical authorities. The object of his conversion, it was thought at the time, was partly to gain adherents among the Jews to his financial schemes; and he trusted that they would combine to withhold loans for carrying on war.



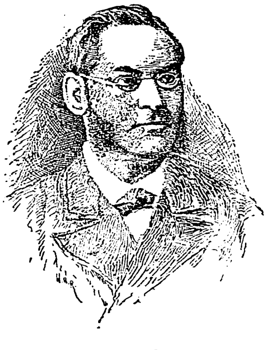
Lord George Gordon After Conversion to Judaism.
(From a drawing by Polack.)

In June, 1787, Gordon was convicted of a libel upon British justice; and, retiring to Birmingham, he lived quietly in the house of a Jew, wearing a long beard and adopting Jewish customs. In 1788 he was sentenced to five years' imprisonment and to pay a fine of £500 and furnish two securities in £2,500 apiece. During his stay in Newgate he conformed strictly in all respects to the Jewish religion, eating kasher meat and wearing phylacteries. On the expiration of the five years he was unable to obtain the necessary securities, and had to stay in Newgate, where he caught the fever that caused his death. Dickens describes Gordon and the "No Popery" riots in "Barnaby Rudge," introducing a reference to his change of religion.

Bibliography: *Trials of Lord G. Gordon*, London, 1787; *Jew. Chron.* March 10, 1899; Robert Watson, *Life of Lord George Gordon*, London, 1795; Picciotto, *Sketches of Anglo-Jewish History*; *Dict. National Biography*, s.v.

J. G. L.

GORDON, LEON (JUDAH LÖB BEN ASHER): Russian Hebrew writer and poet; born at Wilna Dec. 7, 1831; died at St. Petersburg Sept. 16, 1892. He graduated in 1853 from the rabbinical seminary of Wilna, becoming teacher of Hebrew in the governmental schools, and was engaged in that capacity about twenty years. His efforts were highly praised by the inspectors of the government schools. During the time of Gordon's activity the struggle between the younger generation, or the Maskilim, and the older, or the conservatives, took place. Gordon was accused of heresy by the latter, but was not alarmed, and satirized them in articles in different Hebrew and Russian periodicals. In 1872 he was invited to St. Petersburg as secretary of the Society for the Promotion of Culture among the Jews of Russia, and secretary of the Jewish community. There he had more scope for his literary activity, and he enriched Hebrew literature with his contributions. He was also active in communal work. During his secretaryship the Jews of St. Petersburg obtained permission to build a synagogue and to acquire a piece of ground for a new cemetery, the old one having become too small. He also improved the regulations of the community, especially those of the ḥebra ḳaddisha. But this communal work caused him great trouble owing to a quarrel between the Ḥasidim and Mitnaggedim about the nomination of a rabbi, the Ḥasidim accusing Gordon of being the cause of the discord. They denounced him as a political criminal, and in 1879, when an attempt was made against the life of Alexander II., Gordon was accused of having participated in the affair. He and his wife and children were therefore thrown into prison, April 4, 1879, where they remained forty days. Later they were exiled to a small town in the government of Olonetz. But the innocence of Gordon was quickly proved,



Leon Gordon.

Accused of Treason.

and he was permitted to return to St. Petersburg, though he lost his position. He then became co-editor with Zederbaum of "Ha-Meliẓ," and he occupied that post, with an interruption of two years, till 1888, when he resigned. The Russian government conferred on him the title of "Honorary Citizen" in return for the services he had rendered through his propagation of science among the Jews.

Gordon was the leading Hebrew poet of his time. His chief merit consisted in the fact that he turned his attention to Jewish history, presenting in his poems a complete account of the Jews from the Biblical epoch till his own day. He was also an unrivaled prose-writer; his language was fluent and his style very biting and satirical. Gordon employed his satirical talent not only in scourging Jewish fanatics, but also in defending the Jews against their enemies. His works are: "Ahabat Dawid u-Mikal," a Biblical epopee in twelve poems with an introduction (Wilna, 1856); "Mishle Yehudah," a collection of 100 fables in verse, many of which are adaptations from ancient fabulists (*ib.* 1860); "'Olam ke-Minhago," in two parts, the first being a description of Russian Jewish life (Odessa, 1870), and the second a satirical description of the Ḥasidim (Wilna, 1873); "Gam Eleh Mishle Yehudah," 21 fables in verse (Vienna, 1871); "Ḳoẓo shel Yud," a satire in verse on morals (*ib.* 1876); "'Ofel bat-Ẓiyyon," an elegy in four parts on the death of Michael Joseph Lebensohn (*ib.* 1877); "Kol Shire Yehudah," his collected poetical works in 4 vols. (St. Petersburg, 1883–84); "Kol Kitbe Yehudah," a collection of his novels (Odessa, 1889). He translated the Pentateuch into Russian in collaboration with J. Gerstein. Gordon contributed to almost all the Hebrew periodicals, to many Russian papers, to the "Allgemeine Zeitung des Judenthums" (1860–64), and to Brockhaus' "Konversations-Lexikon." His letters were published by J. Weissberg (Warsaw, 1894).

H. R. D. G.—M. SEL.

GORDON, MICHEL: Judæo-German poet and Hebrew writer; born at Wilna Nov. 4, 1823; died at Kiev Dec. 26, 1890. While at the bet ha-midrash he wrote his first poetry and prose. Gordon was a personal friend of Michael Lebensohn, Wolf Kaplan, and Hirsch Katzenellenbogen. He married a sister of the poet Leon Gordon, and exerted considerable influence upon the latter. In 1846 his first poem appeared in "Ḳol Bokim," a collection published by Kalman Schulmann upon the death of Mordecai Aaron Günzburg (Wilna, 1846). After the Crimean war Gordon removed to Poltava, and from there to Krementchug, where he found employment in the office of Joseph Günzburg. In 1868 he was engaged as teacher by Brodski at Shpola, and until 1881 he remained in the employment of the Brodski family at Smyela. In 1869 Gordon published a history of Russia in Yiddish. About that time an anonymous collection of his poems was issued. In 1881 he published at St. Petersburg, under the title of "Tif'eret Banim," a dissertation in Hebrew on the moral obligations and responsibilities of Jewish youth. In 1886 his "Sheber Ga'on" appeared. Gordon was a contributor to "Ha-Shaḥar," "Ha-Boḳer Or," and "Ha-Karmel."

His reputation, however, is based mainly upon his poetry, which appealed strongly to the popular imagination. Many of his songs, set to music, are known throughout Russia. To quote Leo Wiener, the author of "The History of Yiddish Literature": "Gordon's poems are of a militant order: he is not satisfied with indicating the right road to culture, he also sounds the battle-cry of advance. The key-note is struck in his famous 'Arise, My People!' . . . In this poem he preaches to his race that they should assimilate themselves in manners and culture to the ruling people; that they should abandon their old-fashioned garments and distinguishing characteristics of long beard and forelock" (pp. 83–84). In pursuance of his purpose of arousing his people to the necessity of adapting themselves to modern conditions, he assails the Ḥasidim, bewailing their fanaticism and ridiculing their Asiatic manners and customs, their ignorance and superstition. His ridicule is sharp and cutting.

For a time Gordon dared not disclose his identity, and published his songs anonymously. A collection of these with his name appended was first published at Warsaw in 1889 under the title of "Yiddishe Lieder," comprising "Die Bord," "Der Borsht," "Die Mashke," "Mein Vida," "Die Bildung," "Steh Oif, Mein Folk," and many others. Their language and style are plain, popular, and idiomatic, occasionally bordering on the profane, as in the concluding stanza of "Mein Vida," or in the ninth and twelfth stanzas of "Ikh Ken Nit Ferstein."

GORDON, SAMUEL: English novelist; born at Buk, Germany, Sept. 10, 1871. He went to England with his parents in 1883, and was educated at the City of London School and Cambridge University. He was appointed secretary of the Great Synagogue, London, in 1894. He has published several novels and volumes of short stories, almost all dealing with Jewish life and character, among them "A Handful of Exotics" (1897); "Daughters of Shem" (1898); "Lesser Destinies" (1899); "Sons of the Covenant" (1900); and "Strangers at the Gate" (Jewish Publication Society of America, 1902). "In Years of Tradition" (1897) and "The New Galatea" (1901) have been his chief attempts outside Jewish lines.

J.

GORGIAS: Syrian general of the second century B.C. After Judas Maccabeus had defeated the Syrians, they determined to send a stronger force against him. According to I Macc. iii. 38, which Josephus follows ("Ant." xii. 7, § 3), it was the governor Lysias who commissioned the generals Nicanor and Gorgias, sending them with a large army to Judea; but according to II Macc. viii. 8, it was Ptolemy, governor of Cœle-Syria and Phenicia, who sent them. Nicanor seems to have been the commander-in-chief, although II Maccabees praises Gorgias' military ability. The Syrians were so sure of victory that they took with them a number of merchants, to whom they intended to sell the Jewish prisoners as slaves. The Syrians camped at Emmaus; and Gorgias was sent thence with 5,000 infantry and 1,000 horse to attack Judas by night, his guides being treacherous Jews. Judas had been informed of the expedition, and attacked the main Syrian army at Emmaus, completely routing it. Gorgias, not finding the enemy in camp, concluded they had retired into the mountains, and went in pursuit of them. Judas sagaciously kept his men from touching the booty, preparing them for the impending battle with Gorgias. When the latter returned to the main camp, he found it in flames, and the Jews ready for battle. The Syrians, seized with panic, fled into the Philistine territory, and only then did the Jews seize the rich spoils (166 B.C.).

Gorgias did not again dare to enter Judea. Once when Judas and Simon Maccabeus were carrying the war outside of that country, two subordinate generals, Joseph and Azariah, in violation of orders undertook an expedition against Jamnia, but were severely beaten by Gorgias (I Macc. v. 18, 19, 55-62), who is designated in "Ant." xii. 8, § 6, "general of the forces of Jamnia." II Maccabees does not mention this expedition, but refers to another, and calls Gorgias "governor of Idumæa" (xii. 32), which seems to be more correct than "of Jamnia." He set out with 3,000 infantry and 400 horse, and killed a number of Jews; whereupon a certain Dositheus of Tobiene (so the correct reading of the Syrian translation), one of those whom Judas had protected against the pagans, threw himself upon Gorgias and seized his mantle, intending to take him prisoner; but a Thracian horseman cut off Dositheus' arm and so saved Gorgias. The last-named then retired to Marissa (*ib.* verse 35; comp. "Ant." xii. 8, § 6), after which he is lost to view. Willrich assumes ("Judaica," p. 33) from the description of the booty in I Macc. iv. 23 that "Holofernes" in the Book of Judith represents Gorgias.

GORIN, BERNARD (*nom de plume*, **Isaac Goido**): Yiddish journalist; born in Lida, government of Wilna, April, 1868. He is the author of two short stories in Hebrew, "Ha-Naggar ha-Na'or" and "Ha-'Agunah" (Warsaw, 1892). Gorin went to America about 1893, and has since been a regular contributor to the radical Yiddish press of New York. He has translated into Yiddish some of the works of Zola, Hawthorne, Maupassant, Prévost, and various Russian authors. He has also written two dramas in that tongue, "Der Wilner Balebesel" (in reference to a famous ḥazzan) and "Baruch Spinoza" (1901). He edited "Jüdisch-Amerikanische Volksbibliothek," "Neuer Geist" (1898), and "Theater Journal" (1901-1903), all now defunct.

H. R. P. Wi.

GORING OX: Two passages in Exodus treat of an ox doing harm: the first of harm to a person (xxi. 28-32); the second to the ox of another owner (*ib.* 35-36). The verb used in the first passage is "nagaḥ" (to gore); that in the second, "nagaf" (to strike or hurt). But, according to the tradition, the rules laid down in either passage apply to goring, striking with the body, biting, kicking, and lying on. These rules are also extended to animals other than oxen, either injuring or injured (B. Ḳ. i. 4); and, while the texts contemplate killing only, the rules apply to lesser injuries also.

"Tam" and "Mu'ad."

In each of these passages a distinction is made between the ox which has not given evidence of its vicious character and one whose master has been forewarned in this regard. The former is known in the Mishnah as "tam" (lit. "innocent," "harmless"); the latter is called "mu'ad" (lit. "testified"). An injury committed by an innocent ox is deemed a kind of accident; while the master who is forewarned, but does not watch his beast, is liable for full damage, and, in case of the death of a human being, to a mulct or forfeiture. To render an ox mu'ad, two witnesses must testify in court, in the presence of its owner, that the ox has on three separate days acted viciously. Acting thus to his kind or to other domestic animals does not render him mu'ad as to injury to persons; nor vice versa (*ib.* ii. 4).

Punishment.

An animal that kills a human being must be stoned to death: its flesh may not be eaten. But it should first be tried by a criminal court of twenty-three judges; for the owner, who is also morally guilty of homicide, can be tried only in such a court. Even a lion, bear, or wolf that kills a person must be so tried; only a serpent should be killed by the first comer (Sanh. i. 4). "The ox of the stadium [arena] is not stoned: it is not he that gores; he is made to gore" (B. Ḳ. 39a).

Concerning the owner of a mu'ad the text says: "and his owner, also, shall be put to death; if there be laid upon him a ransom, then he shall give for the redemption of his life," etc. According to the rabbinic interpretation, the judges have no discretion as to putting to death or placing a ransom: they always place the ransom, which goes to the heirs of the decedent. But whose life is to be estimated? R. Ishmael says, that of the person killed; R. Akiba more logically says, that of the guilty owner, who redeems himself from death (*ib.* 40a). Hence Maimonides draws the conclusion that where the ox belongs to two owners jointly, both of whom have been warned, each of them has to redeem himself in the full amount. This amount is fixed according to age and sex (Lev. xxvii.; see ESTIMATE).

When the person killed is a (Canaanite) bondman or bondwoman, the text fixes the mulct, payable to the owner, at thirty shekels, without regard to the value of the slave (Ex. xxi. 32; B. Ḳ. iv. 5).

While the text speaks only of the ox that kills either man or beast, the animal may strike and wound without killing its victim, and thus inflict a lesser injury. In such cases the owner of a mu'ad pays full damage; the owner of a tam half damage, as will be shown hereafter.

When a human being is hurt the owner of the ox pays only for damage proper, or diminution in value: he does not pay for pain, stoppage of work, cost of cure, or shame, as would one guilty of Assault and Battery. And the words of the text, "He shall surely pay ox for ox, and the dead shall be his own," are construed contrary to their apparent meaning; the owner of the killed ox keeps the carcass, and the owner of the goring ox pays in money the difference between the value of the live animal and of the carcass, just as he pays for a hurt not resulting in death. This rule naturally followed when restoration in kind fell into disuse and the courts gave judgments for money in all cases.

Half Compensation.

Where one man's tam kills the ox of another, the text says, "they shall sell the living ox and divide the price of it, and the dead also they shall divide." Should the goring and the gored ox be of equal value, this would amount to making good half the damage; and, in the words of the Mishnah, "this is the ox of the Torah." Nothing is said in the text about any responsibility of the owner beyond the value of the offending beast. Hence the sages drew the conclusion that the two purposes of the Torah were: (1) to fix the payment at half the damage done, and (2) to declare the lack of responsibility beyond the value of that beast, or, as they put it, beyond "half damage from its body," the latter element answering to the "pauperies" of the Roman law.

The penalty of "half the damage done from the body" must be paid whether the injury be done by an ox or any other animal; whether by goring or in any other way except by "foot or eating tooth"; whether to a man (short of death) or to a beast or other property; and whether the injured animal die or not; the owner of the offending animal, however, is then free from all further liability. And where the oxen of two men injure each other, the harm or diminution of value to each is appraised, and the owner whose ox did the greater harm pays half of the difference, to the extent of the living security (B. Ḳ. iii. 8). If the offending ox is in the keeping of a bailee, it may nevertheless be taken for the damage done, and the owner then has recourse to the bailee.

For the case of doubt as to which of several oxen has committed an injury, see Burden of Proof.

GORNI, ISAAC BEN ABRAHAM. See Isaac ben Abraham Gorni.

GOSHEN: Region of Egypt which the Israelites inhabited during their sojourn in that country. It is described as situated on the eastern frontier of Lower Egypt (Gen. xlvi. 28, 29; Ex. xiii. 17; I Chron. vii. 21), forming an outpost of it (Gen. xlvi. 34); apparently not at all (or scantily) inhabited by Egyptians (*ib.*), but, in the estimation of shepherds, evidently "the best of the land" (*ib.* xlvii. 6, 11), since Pharaoh's cattle grazed there (6). According to verse 11 "the land of Rameses" (P ?) is synonymous with "the land of Goshen." "Goshen" alone (without the addition "land of") is used only in xlvi. 28, 29. In these two verses it may designate a city, as the LXX. understands it, which here renders "Goshen" by "Heroonpolis," adding in verse 28 to "unto Goshen" the words "into the land of Ramesses"; in xlv. 10 the LXX. transliterates "Gesem of Arabia." This name "Arabia" means, in Egyptian usage, either, generally, all land east of the Nile or, as a special district, the "nome Arabia," the 20th of Lower Egypt. Heroonpolis or Heropolis (according to the excavations of Naville, modern Tell al-Maskhuṭa) was, however, the capital of the 8th or Heroopolitan nome, east of the Arabian. Nevertheless, the name "Arabia" seems to be used by the LXX. in the special sense, for in the reign of Ptolemy II. the Greek administration seems to have treated the neighboring 8th and 20th nomes as one district (comp. the "Revenue Laws of Ptolemy Philadelphus," ed. Grenfell, 1896, p. 1.). Later, the two districts seem to have been separated again (comp., *e.g.*, Ptolemy, "Geographia," iv. 5, 53).

The name "Goshen" (Egyptian, "Ḳsm," sometimes abbreviated into "Ḳs"), occurring first in a papyrus of dynasty 12 (Griffith, "Kahun Papyri," 2, 14), designated, however, the 8th or so-called "Arabian" nome, *i.e.*, the land west of the Bubastide nome, between the Pelusiac branch of the Nile and the canal now branching off at Belbeis. It touched the entrance to the desert valley, now called Wadi al-Ṭumilat, where a fortification, erected in dynasty 12, protected the easiest entrance to Egypt. It is likely that the capital P(er)-sopd(u) (Pisaptu of the Assyrians), situated near modern Saft al-Ḥannah, had as profane name the same name as the region, because the classical writers speak of a city Phacus(s)a on that spot (Ptolemy, *l.c.*; less distinct are Stephen of Byzantium, the "Tabula Peutingerina," Geographus Ravennatu, and Strabo, who may have confounded with Goshen a city with a similar name, modern Faḳus, northeast of Bubastus). If so, the Biblical pronunciation of the name is authenticated as against the "Ges(s)em" of the LXX. and the dependent versions.

"Land of Rameses."

The synonymous designation, "land of Rameses," has not yet been found on the monuments, but seems to refer to the region bordering eastward on the land of Goshen, the 8th or Hero(on)politan nome, which is known to have been colonized by the famous pharaoh Rameses II. The LXX. certainly errs in identifying Heroonpolis with Goshen, but is otherwise correct in seeking the Israelitish settlements in that region (which contained the towns of Pithom and Succoth, Ex. i. 11, xii. 37, etc.), the narrow valley Wadi al-Ṭumilat of modern time, between the Crocodile Lake and the old land of Goshen. This part of the country answers perfectly to the description of Goshen in the Bible. It was reached only irregularly by the yearly inundation of the Nile, and therefore was less suited for agriculture. It is necessary only to assume that with the Semites or in popular Egyptian usage the name of "Ḳosem" (Goshen) was extended beyond the limits of the old country and its frontier fortifications. Unfortunately, little is known of the whole region before Rameses II. It might also be assumed that the Israelites settled, in Joseph's time, in the old land of Goshen, and spread in the subsequent period over the newly colonized district; but this agrees less with the Biblical data. No Egyptian etymology for the name "Goshen" (Ḳosem) has been found, which seems to be of Semitic origin; this would indicate Semitic settlers already *c.* 2000 or earlier. In Judith i. 9 ("the land of Gesem [R. V. "Goshen"] until thou comest above Tanis and Memphis") the name seems to be used without precise knowledge as to the location of the place.

BIBLIOGRAPHY: The fullest discussion of the Egyptian data will be found in Naville, *The Shrine of Saft el-Henneh and the Land of Goshen*, in the *5th Memoir of the Egypt Explor. Fund*, 1885, p. 74; comp. also his *Pithom* (*1st Memoir*). Ebers, *Durch Gosen zum Sinai*, 1872, is antiquated, like the theories pronounced repeatedly by Brugsch (*L'Exode et les Monuments*, etc.).

E. G. H. W. M. M.

GOSLAR: Town in the province of Hanover, Germany; on an affluent of the Ocker at the northeast foot of the Harz. According to the chronicle of Erdwin von der Hardt, "Plebis Tribunus et Antiquitatum Goslariensium Mirator," Frederick I. in 1155 collected from the Jews of Goslar a third of their possessions as "allegiance money" ("Huldigungsabgabe"); such a tax, however, was unknown until the fifteenth century; and the original document which the chronicle cites as authority for its statement has not been found. On April 3, 1252, King William of Holland promised not to molest the Jews nor to imprison them unjustly, but to protect them as his "servi cameræ." Rudolph I., in confirming the privileges of the citizens of Goslar, expressly reserved his rights over the Jews of that town. In 1285 Emperor Rudolph directed the latter to pay more promptly the yearly tax of 6 marks for the maintenance of the royal palace at Goslar.

The Jews of Goslar escaped the massacres at the time of the Black Death, but suffered so much from the plague in 1350 that their cemetery, situated on Mount St. George, no longer sufficed, and another, near the forts, had to be acquired. Like all the other Jews of the province of Hanover, those of Goslar were expelled in 1591.

At present (1903) there exists in Goslar a small Jewish community numbering about 100 persons in a total population of 13,311.

GOSPELS, THE FOUR. See NEW TESTAMENT.

GOTENDORF, JAMES (JAMES NATHAN): German-American merchant and litterateur; born Feb. 9, 1811, at Eutin, Holstein, Germany; died at Hamburg Oct. 5, 1888. He went to the United States in 1830, and for the next twenty years was engaged in the commission business in New York. About 1843 he became friendly with Horace Greeley (upon whose advice he changed his name from "James Nathan" to "Gotendorf"), and through him with Margaret Fuller, afterward Countess Ossoli, in whom he aroused feelings of passionate friendship. In 1845 he left New York, but returned in 1850, and for two years engaged in a banking business in Wall street. He then retired to Hamburg, where he spent the remainder of his life. Fifty of Margaret Fuller's letters to him were published under the title "Love-Letters of Margaret Fuller" (New York, 1903).

BIBLIOGRAPHY: *Love-Letters of Margaret Fuller*, p. 190. Letters from Gotendorf appeared in the *Tribune* (New York), Sept. 10, 12, 16, 1845.

S. J.

GOTHA: Capital of the duchy of Saxe-Coburg-Gotha, Germany. A Jew named Jacob who lived at Cologne in the middle of the thirteenth century is designated as a native of Gotha (Höniger, "Das Judenschreinsbuch der Laurenzpfarre in Köln," p. 7, Nos. 39, 40). In 1303 the Jews of Gotha were persecuted in consequence of an accusation, which originated in the province, of having murdered the son of a miner for ritual purposes. The Nuremberg "Memorbuch" gives the names of the victims of this persecution. The community was annihilated at the time of the Black Death, and a new community must have sprung up, which appears to have disappeared again in 1459-60, a period of renewed persecution. The exegete Solomon is designated as a native of Gotha.

In the nineteenth century, prior to 1848, no Jews were permitted to live in the duchy of Gotha, although they could trade there under restrictions; after 1848 they were free to enter. They began to settle there in the sixth and seventh decades, and founded a community in the capital which at first numbered only from ten to twelve families. The first communal officials were appointed in the eighth decade. There is no rabbi, affairs being managed by three teachers. The community has a literary society and a B'nai B'rith lodge. The synagogue was built in 1903. The first cemetery was situated on the Erfurter Landstrasse; when this was closed by the local authorities, in the eighth decade, a new cemetery was acquired on the Eisenacher Landstrasse. In 1903 Gotha had a population of 29,134, of whom about 350 were Jews.

BIBLIOGRAPHY: Salfeld, *Martyrologium*, p. 217; Grätz, *Gesch.* vii. 343; Adolph Kohut, *Gesch. der Juden in Deutschland*, passim; Aronius, *Regesten*, No. 608; *Monatsschrift*, xliv. 347.

G. D. K.

GOTTHEIL, GUSTAV: American rabbi; born at Pinne in Prussian Posen May 28, 1827; died in New York city April 15, 1903. He was educated in Posen under Rabbi Solomon Plessner, and later continued his studies at the universities of Berlin and Halle (Ph.D.), receiving in the meanwhile his "hattarat hora'ah" in the former city from Samuel HOLDHEIM, whose assistant he became (1855). He also studied under Zunz and Steinschneider. In 1860 he set out from the Berliner Reform Gemeinde to labor for progressive Judaism in new fields.

In 1860 he received a call from the Reform Jews of Manchester, England, and he went thither as rabbi to the Manchester Congregation of British Jews, remaining as incumbent for thirteen years. During this time he was connected with the faculty of Owens College as teacher of German. Two of his most noteworthy sermons preached in Manchester were on the slavery question, attacking those who had declared the institution to be sanctioned by Mosaic law. Dr. Gottheil was a member of the Synod of Leipsic in 1871, which took a decided stand on the question of Reform. He left

Manchester in 1873, having been elected to succeed the Rev. J. K. Gutheim as assistant to Dr. Samuel Adler, the senior rabbi of Temple Emanu-El, New York. When Adler retired about eighteen months later, Gottheil succeeded him. On taking charge he reorganized the religious school, and assisted in founding a theological school where preliminary training might be imparted to future candidates for the rabbinate. He prepared in 1886 the first Jewish hymn-book printed in America (with music in a separate volume by A. Davis); it contains not only traditional Jewish hymns, but also others of Christian origin, and upon it was based the Union Hymnal, which has since been generally adopted by the Reform congregations in the United States. In 1889 he started the first Sisterhood of Personal Service, a philanthropic organization affiliated with Temple Emanu-El which has served as a model for similar institutions elsewhere. Dr. Gottheil was the founder of the Association of Eastern Rabbis, and when it was assimilated with the Central Conference of American Rabbis in 1890 he took an active part in the deliberations. He was one of the founders and the president of the (American) Jewish Publication Society, vice-president of the Federation of American Zionists, chairman of the Revision Committee for the Union Prayer-Book, and one of the governors of the Hebrew Union College, Cincinnati.

Gustav Gottheil.

The broad catholicity of Dr. Gottheil's sympathies and interests is evidenced by his connection with various non-Jewish institutions as well as by many of his sermons and writings. He was one of the founders of the New York State Conference of Religions, assisting in the editing of its "Book of Common Prayers"; and a founder and for many years vice-president of the Nineteenth Century Club. In 1892 Gottheil was one of the representatives of the Jews at the Parliament of Religions held in Chicago during the World's Fair. He published "Sarah"; and "Sun and Shield" (New York, 1896), a survey of Judaism as he saw it. Essays by Dr. Gottheil have appeared in various periodicals and collections. He was retired as rabbi emeritus of Temple Emanu-El in October, 1899. In honor of his seventy-fifth birthday a "Gustav Gottheil Lectureship in Semitic Languages" was founded at Columbia University.

A. F. H. V.

GOTTHEIL, PAUL EDUARD: German Protestant missionary; born at Fraustadt, April 5, 1818; died at Stuttgart in 1893. A convert to Christianity, in 1848 he entered the service of the British Society for the Propagation of the Gospel Among the Jews, with which he was connected until the end of his life. He was for many years minister of the English church at Cannstadt, near Stuttgart, and then minister of the Diakonissenhaus in Stuttgart. As a missionary he was very successful. Some of those whom he instructed and baptized at Nuremberg, Cannstadt, and Stuttgart have become ministers of the gospel or missionaries among the Jews. He published "Blätter für die Evangelische Mission Unter Israel," 1850-58; "Der Messias, Israels Hoffnung und Aller Völker Verlangen," 1863 (translated into English); "Mischan Lechem, Lebensbrot für Gottes Volk aus Gottes Wort" (Hebrew and German), 1871; (Yiddish and German), 1873; "Die Arbeit an den Einzelnen," in "Nathanael," 1891, No. 6. He was a brother of Rabbi Gustav Gottheil.

Bibliography: Zuchold, *Bibliotheca Theologica*, s.v.; De le Roi, *Geschichte der Evangelischen Juden-Mission*, ii. 266; article *Gottheil*, in *Der Freund Israels*, Basel, 1893; Dunlop, *Gospel Triumphs*.

S. B. P.

GOTTHEIL, RICHARD JAMES HORATIO: American Orientalist; professor of Semitic languages, Columbia University, New York; born in Manchester, England, Oct. 13, 1862; son of Gustav Gottheil; educated at Chorlton High School, England, and at Columbia College, New York. He was graduated from Columbia College in 1881, and continued his studies abroad at the universities of Berlin, Tübingen, and Leipsic (Ph.D. 1886). On his return to America he was appointed instructor in the Syriac language and literature at Columbia College (Nov. 1, 1886). When the chair of rabbinical literature at Columbia was endowed, Oct. 7, 1887, Gottheil was elected to it by the board of trustees. On the retirement of Professor Peck in 1889, the work of the section of Semitic languages was transferred to Gottheil (June 3), first as instructor and later (April 4, 1892) as professor, a position he still holds (1903). He has published: "The Syriac Grammar of Mar Elia of Zobha," Berlin, 1887; "Jewish History in the Nineteenth Century"; and numerous articles in educational works, including the "World's Best Literature," "Johnson's Encyclopedia," and the "International Encyclopedia." He has edited two volumes of "Persian Classics" in English for the Colonial Press; is permanent editor of the "Columbia University Oriental Series" and (with J. Jastrow, Jr.) of the "Semitic Study Series" (Leyden). In 1898 he was elected president of the American Federation of Zionists, and chief of the Oriental Department of the New York Public Library. Professor Gottheil is a member of the Central Committee of the Zionist organization, and in the capacity of delegate attended the Zionistic congresses held at Basel in 1898, 1899, and 1903 (see Basel Congress) and at London in 1900; he is also a member of various learned societies. He is a member of the council of the American Oriental Society, and president (1903) of the Society of Biblical Literature and Exegesis; he was one of the founders and the first vice-president of the "Judæans"; founder and president of the (Jewish) Religious School Union in New York; and is connected with the Jewish Chautauqua Society.

A. F. H. V.

GOTTHEIL, WILLIAM S.: American physician; born in Berlin Feb. 5, 1859; eldest son of Rabbi Gustav Gottheil. He was educated at Chorlton High School, Manchester, England; New York University, and Cornell University (A.B. 1879); and took his special training at the College of Physicians and Surgeons, New York (M.D. 1882). From 1882 to 1883 he held the post of house surgeon of the Charity Hospital, New York; and from 1885 to 1888 he lectured on dermatology at the New York Polyclinic. In 1890 Gottheil was appointed professor of pathology at the New York College of Veterinary Surgeons, and in 1893 professor of dermatology at the New York School of Clinical Medicine. In the following year he published a "Manual of General Histology," and in 1897 "Illustrated Skin Diseases." Gottheil was editor of "The Clinical Recorder" in 1898, and has conducted the department of dermatology in "Progressive Medicine." He is consulting dermatologist of Beth Israel Hospital, and visiting dermatologist at the Charity and Lebanon hospitals, New York. In 1896 he was elected president of the Eastern Medical Society, and in 1899 president of the Manhattan Dermatological Society.

A. F. H. V.

GÖTTINGEN: City in the province of Hanover, Germany; formerly capital of the principality of Grubenhagen under the dominion of the Guelfic dukes. Jews settled in Göttingen in the thirteenth century, as is shown by a document dated March 1, 1289, by which Dukes Albrecht and Wilhelm permitted the council of the city to receive the Jew Moses and his legal heirs and grant them the rights of citizenship. On March 10, 1348, at the time of the Black Death, Duke Ernest issued a patent of protection to the Jews of Göttingen; but they did not escape persecution. On Dec. 24, 1350, the house which had been the Jewish "Schule" was given to the city by the same duke. Jews settled once more in Göttingen, and the city council in 1370 announced its willingness to protect them, but demanded that the Jews on their part should perform their civic duties. A Jew named Meyer is mentioned as of Göttingen in a record dated Oct. 1, 1385; and in 1394 three Jews lived in the city, and, according to an entry in the registry of receipts, had to pay three marks annually as protection-money. The amount paid as protection-tax for the year 1399–1400 was 6 marks 14 pfennigs. When Duke William took over the government of the territory of Göttingen (April 18, 1437), and pledged himself to pay 10,000 florins for the debts and engagements of Duke Otto, leaving to the latter the Jewish protection-money, the city of Göttingen, as regards the Jewish tribute, was excluded from the agreement.

From the Thirteenth to the Fifteenth Century.

In records of the fourteenth and fifteenth centuries there is mention of a long and a short Jews' street ("de lange Joedenstrate," "de korte Joedenstrate"; the latter was also called "die Kipper"). The houses on these streets, among them the Jewish school, were often damaged, especially on New-Year's eve and Shrove Tuesday, when the young members of the Bourse Society, whose place of meeting was in the neighboring Barfüssenstrasse, went through the city committing all sorts of depredations, until the Jews appealed to the magistracy for aid. In 1447 they obtained a decree to the effect that the depredations against them should cease; and in return each Jewish house and the Jewish school paid a stoop and a half of wine to the members of the Bourse.

On July 11, 1457, the council of Göttingen applied to the council of Hildesheim in behalf of the Jew Naḥman Cynner for a safe-conduct for his mother, Gele Cynner, and his sister, who desired to sojourn for two months in Hildesheim. In the latter city, also, lived Meier (Meyer, Meyger, Meiger) of Göttingen (1423–47), and a woman from Göttingen called "Michelsche" (1429–34). When on June 28, 1591, Duke Heinrich Julius issued an edict revoking the protection and safe-conduct even of those Jews whose patents explicitly extended over a longer period, the council of Göttingen tried to defend its rights. On Aug. 13 of the same year it addressed to the governor, chancellor, and counselors at Wolfenbüttel a remonstrance concerning the proposed expulsion of the Jews, in which it pointed out that by the charter granted to the preceding council there were still some years of sojourn legally due to these Jews, and that, moreover, the proposed expulsion would be a hardship for the indigent citizens of Göttingen in that it would not allow them sufficient time to redeem their pledges from the Jews. The governor, Wolf Ernst, Count of Stolberg, sent a very ungracious answer (Aug. 18).

From the Fifteenth to the Eighteenth Century.

In the following century only a few Jews lived in Göttingen, among them Eliezer Liepmann Göttingen, father of Judah Berlin (Jost Liebmann) and of Rabbi Wolf, author of "Naḥalat Binyamin." One of his two sisters was Leah, mother of Liepmann Cohen (Leffmann Behrens) of Hanover. The seven Jews enumerated by Freudenthal in "Monatsschrift," 1901, p. 480, as having attended the Leipsic fairs between the years 1678 and 1699, probably lived in Göding, Moravia. The respected Gumprecht ha-Levi (*c.* 1720) and Elijah Magdeburg (*c.* 1737) lived in Göttingen. The latter is lauded as a benefactor by Wolf Ginzburg, who studied medicine in the same place.

Light is thrown on the social conditions existing at the beginning of the eighteenth century by an edict promulgated Jan. 5, 1718, which declared that no Jew could own a house in the duchies of Göttingen and Grubenhagen. During the first few years after the founding of Göttingen University (1737) there were only three Jewish families in the city; and the authority of the university was requisite for the issue of almost all patents of protection. Gradually the number of Hebrews increased to ten or eleven families. In 1786 the Göttingen Jews held a patriotic celebration at the "festival of thanksgiving for the deliverance of his Majesty . . . George III."

Most of the Jews of Göttingen attained a certain prosperity through their financial dealings with the students, to whom they gave credit and loaned money on pledges, although they were forbidden, under penalty of losing their right of protection, to go to the students' rooms, or to address them on the street or in public places in regard to money matters. As certain Jews were accused of having contributed to the ruin of students by advancing money for which the notes given by the latter exceeded the amount actually received, it was decreed in 1796 that only three Jewish families might live in the university city. The chancellor ("Grossvogt"), Von Beulwitz, energetically executed this decree, expelling even those against whom no complaint had ever been made.

In the Nineteenth Century.

At the time of the Franco-Westphalian dominion (1806-13) Reuben Meyer from Göttingen was one of the Jewish deputies presented to Minister Siméon by Jacobson at Cassel. In 1812 the district ("Syndikat") of Göttingen included about 160 families, of which only three were resident in the city itself. August Wilhelm Neander, ecclesiastic historian, formerly David Mendel, was born in Göttingen. Moritz Abraham Stern, appointed professor of mathematics at Göttingen University in 1859, was the first Jew to be appointed to a full professorship in a German university. In 1902 there were 600 Jews in the community of Göttingen, which now includes the towns of Gaismar and Rösdorf, and belongs itself to the district rabbinate of Hildesheim. The present rabbi is Dr. B. Jacob. He was preceded by Dr. Loevy. Persons bearing the name "Göttingen" have lived in various places, *e.g.*, in Frankfort-on-the-Main, Halberstadt, Hamburg, Altona, Hildesheim, and Hanover.

The community possesses a synagogue and the following institutions: Israelitischer Brüderschaftsverein, which cares for the sick and buries the dead; Israelitischer Frauenverein; and Benfey'sches Stipendium, for the support of the poor and of students.

GOTTLIEB, ABRAHAM: Civil engineer and contractor; born at Tauss, Bohemia, June 17, 1837; died in Chicago, Ill., Feb. 9, 1894. Gottlieb graduated from the University of Prague in 1861, and was at once employed on the Kaiser Francis-Joseph Railroad, then in process of construction. Though promoted to the position of principal assistant to the chief engineer of construction, he emigrated in 1866 to the United States and settled in Chicago, Ill., where, in 1868, he was appointed chief engineer of the American Bridge Works.

In 1873 Gottlieb became Western agent of the Keystone Bridge Company; in 1877 he was elected president of the company, removing to Pittsburg. During his presidency he constructed the Susquehanna River bridge at Havre de Grace for the Baltimore and Ohio Railroad; the Point Pleasant bridge over the Ohio River for the Ohio Central Railroad; the Plattsmouth bridge over the Missouri River for the Burlington and Missouri River Railroad (the first steel-truss bridge erected in America); the Missouri River bridge at Blair Crossing, Nebraska; the New River Viaduct for the Cincinnati Southern Railway; the Monongahela River bridge at Pittsburg for the Pittsburg, Cincinnati, Chicago and St. Louis Railroad; the Madison Avenue bridge, New York city; the train-shed at Broad Street Station, Philadelphia; the Mexican Government Exposition and Mining Building at the New Orleans Exposition; the Sixth Avenue Elevated Railroad, New York city; and the New York approach to the East River bridge.

In 1884 Gottlieb resigned the presidency and returned to Chicago to engage in civil engineering and contracting and to act as consulting engineer and Western agent of the Edgemoor Bridge Works. In Chicago he supplied the ironwork for the Masonic Temple, the Tattersall Horse Market, and the Administration and Fine Arts buildings of the Columbian Exposition. In 1890, when work on the World's Fair was begun, Gottlieb was appointed consulting engineer, and was afterward appointed chief engineer of the construction department, which position he resigned in September, 1891, when his plans had been largely carried out and the more important buildings eventually erected in Jackson Park were well under way.

Gottlieb became a member of the American Society of Civil Engineers in 1872, and at the time of his death was one of its directors; he was a charter member and twice president of the Engineers' Society of Western Pennsylvania; president of the Western Society of Engineers; president of Rodeph Shalom congregation of Pittsburg; and president of Zion congregation, Chicago.

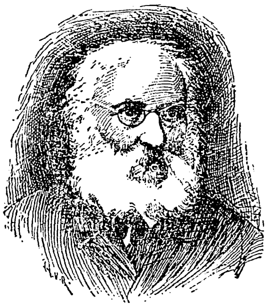
GOTTLOBER, ABRAHAM BAER (pseudonyms, **Abag** and **Mahalalel**): Russian-Hebrew poet and author; born at Starokonstantinov, Volhynia, Jan. 14, 1811; died at Byelostok April 12, 1899. His father was a cantor who sympathized with the progressive movement, and young Gottlober was educated in that spirit to the extent of receiving instruction in Biblical and modern Hebrew as an addition to the usual Talmudical studies. At the age of fourteen he married the daughter of a wealthy "Ḥasid" in Chernigov, and settled there. When his inclination for secular knowledge became known, his father-in-law, on the advice of a Hasidic rabbi, caused the young couple to be divorced, and Gottlober, who had joined the Ḥasidim after his marriage, now became their bitter enemy. He married again, but found his second wife unbearable and soon divorced her. In 1830 he married for the third time and settled in Kremenetz, where he formed a lasting acquaintance with Isaac Bär Lewinsohn.



Abraham Baer Gottlober.

Traveling and Teaching.

Gottlober traveled and taught from 1836 to 1851, when he went to Jitomir and passed the teachers' examinations at the rabbinical school. After teaching for three years at a government school for Jewish boys in Kamenetz-Podolsk, he was transferred to a similar position in his native city, where he remained for about eleven years. In 1865 he became a teacher in the rabbinical school in Jitomir, and remained there until it was closed by the government in 1873. He then settled in Dubno with his son-in-law, Bornstein, who was the official rabbi of that town. Thence he removed to Kovno, and subsequently to Byelostok, where the aged poet, who in later years had become blind, ended his days in poverty and neglect.

Gottlober was a prolific writer and one of the foremost of Neo-Hebrew poets. The first collection of his poems, which was entitled "Pirḥe ha-Abib," appeared in Yozefov in 1836. A second collection, entitled "Ha-Niẓanim" (Wilna, 1850), was followed by "'Anaf 'Eẓ Abot," three poems, on the death of Emperor Nicholas I., on the peace of 1856, and on the coronation of Alexander II., respectively (*ib.* 1858). Soon afterward he visited Austria, where he published "Shir ha-Shirim," a translation of a Passover sermon delivered by Adolph Jellinek (Lemberg, 1861), and "Mi-Miẓrayim," a translation of Ludwig August Frankl's account of his travels in the Orient, with an appendix by Max Letteris (Vienna, 1862). His next important work was the "Biḳḳoret le-Toledot ha-Ḳara'im," a critical investigation of the history of the Karaites, with notes by Abraham Firkovich (Wilna, 1865). In the same year were published his "Yerushalayim," a translation of Mendelssohn's "Jerusalem," with an introduction, and his allegorical drama "Tif'eret li-Bene Binah" (Jitomir, 1867), modeled after Moses Ḥayyim Luzzatto's "La-Yesharim Tehillah." His "Iggeret Ẓa'ar Ba'ale Ḥayyim" (*ib.* 1868) is a polemic against Kovner's critical work "Ḥeḳer Dabar." His "Toledot ha-Ḳabbalah weha-Ḥasidut" (*ib.* 1869), which purports to be a history of Cabala and of Ḥasidism, is only a diatribe against Cabala in which the history of Ḥasidism is scarcely mentioned. He also wrote several short Hebrew novels, and translated Lessing's "Nathan der Weise," to which he added a biography of the author (Vienna, 1874).

His Works.

Gottlober was the founder and editor of the Hebrew monthly "Ha-Boḳer Or," to which some of the best contemporary writers contributed poems, articles, and stories. It had an interrupted existence of about seven years, first appearing in Lemberg (1876–1879) and then in Warsaw (1880–81), in which place also the last five numbers were issued in 1885–86. His most important contribution to this magazine was undoubtedly his autobiography "Zikronot mi-Yeme Ne'urai," containing much material for the culture-history of the Jews of Russia, which was reprinted in book form at Warsaw, 1880–81. The last collection of his poems is entitled "Ḳol Shire Mahalalel," 3 vols., Warsaw, 1890.

Like Levinsohn, Gordon, and other leaders of the progressive movement, Gottlober wrote in Yiddish for the masses. Among his works in that dialect are: "Das Lied vun'm Kugel," Odessa, 1863; "Der Seim," Jitomir, 1869; "Der Decktuch," a comedy, Warsaw, 1876; and "Der Gilgul," Warsaw, 1896. Most of these works were written a long time before the dates of their publication.

Bibliography: *Ha-Asif*, iii. 430-439; *Sefer Zikkaron*, p. 14, Warsaw, 1890; *Aḥiasaf*, 5660 (= 1900), pp. 386-388; Sokolov, *Sefer ha-Shanah*, 5660, pp. 308-314; Wiener, *Yiddish Literature in the Nineteenth Century*, Index, New York, 1899.

GOTTSCHALK, LOUIS MOREAU: American pianist; born at New Orleans May 8, 1829; died at Rio de Janeiro Dec. 18, 1869. He completed his musical education at Paris (1841–46), and was but sixteen when he wrote his well-known compositions "Le Bananier," "La Savane," "La Bamboula," and "La Danse Ossianique." From 1845 to 1852 he made successful tours through France, Switzerland, and Spain. In 1853 he traveled through many parts of the United States, playing and conducting his own compositions; and such was the success of these concerts that Max Strakosch engaged him for a tour extending through the United States, the West Indies, and Spanish America. Among other decorations, Gottschalk was honored with the Order of Carlos III., presented to him by the Spanish minister at Washington at the request of Queen Isabella.

Gottschalk was the first American pianist to attain to cosmopolitan fame. The original element in his compositions was derived from the Spanish, Cuban, and negro folk-songs, and certain dances, which he had heard in his boyhood; and this material he skilfully developed into a distinctive genre. His principal orchestral works are: two operas, "Charles IX." and "Isaura de Salerno" (never performed); two symphonies, "La Nuit des Tropiques" and "Montevideo"; "Gran Marcha Solemne" (to the Emperor of Brazil); "Escenas Campestres Cubanas"; and "Gran Tarantella." His pianoforte works, about ninety in number, include: "Jota Aragonesa" (banjo), "Caprice Espagnol," "Caprice Americain," "Last Hope," "Marche de Nuit," "Marche Solennelle," "Berceuse," and "Pasquinade."

GOTTSTEIN, ADOLF: German physician; born at Breslau Nov. 2, 1857. He was educated at the gymnasium of his native town, and at the universities of Breslau, Strasburg, and Leipsic, obtaining from the last-named the degree of doctor of medicine in 1881. In the same year he became assistant at the hospital of the city of Breslau, which position he resigned in 1883. He then removed to Berlin, where he is still practising (1902).

He has written several essays in the medical journals, especially on bacteriology and epidemiology. Gottstein is also the author of "Epidemiologische Studien über Diphtherie und Scharlach," Berlin, 1895, and of "Allgemeine Epidemiologie," Leipsic, 1897.

S. F. T. H.

GOTTSTEIN, JACOB: German physician; born at Lissa, Austria, Nov. 7, 1832; died at Breslau, Prussian Silesia, Jan. 10, 1895; graduated (M. D.) from the University of Breslau in 1856. Gottstein devoted himself especially to diseases of the throat and ear, giving up his general practise in 1864. Admitted in 1872 to the medical faculty of his alma mater as privat-docent, he received the title of professor in 1890. He is the author of "Die Krankheiten des Kehlkopfes und der Luftröhre," Vienna and Leipsic, 1st ed. 1884, 4th ed. 1893.

Among his contributions as a specialist to the medical journals may be mentioned: "Ueber Ozaena und eine Einfache Behandlungsmethode Derselben," in "Berliner Klinische Wochenschrift," 1878; "Ueber die Abtragung der Adenoiden Vegetation," *ib.* 1886.

GÖTZ, JOSEPH ISSACHAR BAER BEN ELHANAN: German rabbi; born at Frankfort-on-the-Oder about 1640; died at Jerusalem after 1701. In 1675 he was rabbi of his native town, and in 1687 became rabbi of Kremsir, in Moravia, where in 1694, with David Oppenheim as associate rabbi, he organized the district rabbinate. In 1696 he resigned the rabbinate of Kremsir, and started toward Jerusalem by way of Nikolsburg and Vienna. At Vienna he spent a short time at the house of Samson Wertheimer. Leaving Vienna, he spent two years at Venice before reaching Jerusalem. He wrote: "Arba' Ḥarashim," cabalistic discourses and comments on the earlier Prophets, Frankfort-on-the-Oder, 1680; "Sheloshah Sarigim," comments on the Hafṭarot, Venice, 1701.

GOUDCHAUX, ABRAHAM. See Metz, Typography.

GOUDCHAUX, MICHEL: French statesman; born at Nancy March 18, 1797; died at Paris Dec. 27, 1862. After having been established for some time as banker in his native town, he settled in Paris in 1826. His reputation for probity and philanthropy won for him the confidence of his coreligionists in Paris, and he was soon elected vice-president of the Central Consistory of France. A democrat by nature and education, Goudchaux was soon involved in the political movements of his time, and became one of the founders of the "National," a paper established in the interests of the working classes. He took an active part in the Revolution of July (1830), and fought at the barricades. In 1831 the government of Louis Philippe appointed him paymaster-general at Strasburg, a position which he resigned in 1834, being dissatisfied with the policy of the government. In 1848, urged by Lamartine and Arago, Goudchaux accepted the portfolio of minister of finance in the provisional government, but resigned his office ten days later. Recalled by General Cavaignac, he remained in the ministry until Dec. 20 of the same year. As the representative of Paris in the Constituent Assembly, he opposed the politics of the Elysée. In 1857 he was elected deputy to the legislature, but did not take his seat because of his refusal to swear allegiance to Napoleon III.

BIBLIOGRAPHY: *La Grande Encyclopédie*; Carmoly, in *Arch. Isr.* 1863, p. 608, where the year of Goudchaux's birth is given as 1789; *Univ. Isr.* 1863, p. 200.

S. I. Br.

GOUDSMIT, JOEL EMANUEL: Dutch jurist; born in Leyden June 13, 1813; died there March 17, 1882. He graduated in law May 12, 1842. After practising law for some time he was, on the recommendation of his former teacher, Van Assen, appointed professor of Roman law at the University of Leyden (Dec. 31, 1858). As a writer Goudsmit is especially known through his "Pandect System," the first volume of which appeared in 1866, the second in 1880. This work was never completed; it was the first to treat the system in the Dutch language, and was translated into the French, English, and Russian languages. In 1873 Goudsmit made a tour of the United States, and described his impressions and experiences, especially those of New York, in "De Gids," 1874, ii. 79. He was made a member of the Dutch Royal Academy of Sciences, the Utrecht Society, the Society of Literature (Leyden), and the Academy of Jurisprudence (Madrid), and a knight of the Order of the Netherlands Lion. Goudsmit was also active in all Jewish matters; in 1863 he addressed an open letter on the Jewish question to J. J. L. van d. Brugghen, and he also exerted his efforts in behalf of the Jews of Rumania. He was president of the board of examiners of rabbis and Hebrew teachers in Leyden, and chairman of the Society for the Promotion of the Interests of the Jews of Holland.

GOURD. See Botany.

GOVERNMENT.—Biblical Data: The only kind of political institution extant among the Israelites before the time of the Kings was the division into tribes, according to tradition twelve in number corresponding to the sons of Jacob, who were regarded as the respective progenitors of the tribes. Organized, therefore, like the modern Bedouins, the pastoral Hebrews held the theory, also found in the genealogies of the ancient Arabs, that the family grows into the clan by natural accessions; the clan develops into the tribe; and the tribe becomes a people and splits up into several constituent tribes. This theory is based among the Hebrews and Arabians on the correct assumption that the tribe is not held together by some external bond of union, but primarily by the sense of blood relationship. "Our blood has been spilled," they say when one of them has been slain; and the duty of avenging the blood was originally not confined to the next of kin, in the true sense of the word, but was incumbent upon all the members of the tribe. Blood relationship, however, was not necessarily natural; it was regarded as existing also among persons that had entered into the "blood covenant."

The family also enlarges through the acquisition of slaves, the accession of freedmen, and the absorption of isolated families; all these "artificial" adoptions, taking the tribal name, regard and revere the father of the tribe as their progenitor. Tribes having their fixed pasture districts entertain close relations with neighboring clans and families that share with them the privileges of watering their flocks at certain wells. Moreover, a permanent or accidental community of other interests occasionally unites entire tribes into one body, called "ḥilf," existing for a longer or shorter period. A tribe of this kind has no actual organized government; its head is a sheik, whose authority, however, is largely moral. In case of war only, the sheik assumes command, and determines, together with the divan of the heads of families, when and where the tents shall be pitched or camp broken. But the sheik is without authority in time of peace. The members of the tribe listen to his counsel because he is respected, and he is called upon to decide disputes because his wisdom is recognized; but his decision is final only if both parties are willing to submit to it; he can not enforce it against the will of either, since there is no executive body to carry out his commands. The family one of whose members commits any offense must judge in the matter. Furthermore, each family is perfectly free and independent, as regards the tribe, in time of peace, and may at any time secede from it. But in time of war it is a measure of security to remain within the tribe.

The tribes of Israel were probably organized along these lines at the time of their entry into Canaan. The bond that united them more strongly than any sense of a common origin could was the worship of Yhwh and his cult (see Theocracy), which endured notwithstanding all differences of secular interests. The sense of unity among all the worshipers of Yhwh was more or less strong; the wars that Israel waged were Yhwh's wars, and hence a matter of common concern (Judges v. 23). This common religion held the tribes together, even after the period of settlement and the resultant wars.

Settlement in Canaan.

Many things connected with the settlement in Canaan tended to increase the difficulties of this tribal union, and to favor its final dissolution. The idea of blood relationship became more and more secondary. As the Canaanites continued to live among the new settlers (Judges ii. 3 *et seq.*), many mixed marriages occurred, and the two peoples were at last peaceably fused into one. Naturally the sense of community of interest among the inhabitants of a given locality asserted itself and led to the instituting of local governments; in fact, the Canaanites had developed such before the Israelitish invasion. The heads of the most prominent families of a city constituted its administration as elders of the city ("ziḳne ha-'ir"; Judges viii. 14). The fact that cities and villages are frequently designated in their interrelations as "mother" and "daughter," and that cities and "their" villages are mentioned (Num. xxi. 25, 32; Josh. xvii. 11; II Sam. xx. 19), indicates that the beginnings of the territorial organization of Israel go back to the earliest time, and were adopted from the Canaanites. The surrounding smaller villages were in some way dependent on the cities that in time of need offered protection behind their walls to those who dwelt in the open country. This, in time, resulted in a closer political organization, but tended to weaken the national consciousness, since local interests divided the country into separate communities. The physical features of the country were more favorable to segregation, as, for instance, in the case of the tribes in the east-Jordanic districts, where, owing to the character of the land, the dwellers remained nomadic herdsmen to a greater extent and for a longer period of time than their neighbors across the stream, which was difficult to cross. These circumstances contrived to loosen the bond of union between the tribes on each side of the river (comp. Judges v. 16 *et seq.*, viii. 4 *et seq.*, xii. 1 *et seq.*). But among the tribes in the country west of the Jordan the feeling of union also weakened greatly after their settlement, and even a war of Yhwh like that to which Deborah summoned the people did not unite them all (Judges v. 16 *et seq.*).

Notwithstanding the fact that the bond that united the several tribes was the common worship of Yhwh, there was great danger that Israel might split up into a number of small "kingdoms," such as existed among the Canaanites. The El-Amarna tablets show that before the advent of the Israelites a number of these petty princes recognized the King of Egypt as their common overlord, though they waged wars among themselves frequently. The story of Gideon illustrates the prevalence of similar disintegrating tendencies in Israel. For the fact is emphasized that he succeeded in retaining rulership over his tribe even in time of peace, while other so-called "judges" were leaders only in time of war.

The check to this disintegrating tendency was due mainly to external influences. So long as the Israelites had to contend only with the nomadic hordes on the east and south, the Midianites, Amalekites, etc., as in the wars in the time of

Origin of the Kingdom.

the Judges, the strength of a single tribe or of several united tribes sufficed for repulsing the enemy. But the scattered forces of the Israelites were not a match for the organized armies of the Philistines advancing upon them from the west. After the battle of Aphek, many of their districts fell under Philistine control (I Sam. *passim*). These reverses evoked a decided feeling in favor of a stronger national union, and when Saul, a nobleman from the tribe of Benjamin, had been presented by Samuel to the people as a suitable chief of the state, and had proved his fitness in the war with the Ammonites, the people unanimously elected him king. In its origin, therefore, the Israelitish national kingdom does not differ essentially from the tribal kingdom established by Gideon, for the people primarily demanded from the king aid against a foreign enemy (see King). But Saul in time of peace acted also as judge for his subjects. Under the oak at Gibeah he judged the controversies that they brought before him. In order to assure the security of the throne it became necessary that the power of the old family and tribal chiefs, and hence that of the tribes themselves, should be broken; for the rivalry among the tribes did not die out, even when the idea of nationality became dominant for the nonce and resulted in the establishment of the kingdom. This rivalry flashed up in the refusal of the Judahites to recognize the Benjamite house of Saul, and the uprising of Ephraim together with the other tribes against the Judean family of David.

Under David and Solomon the government was put on a firmer basis, for now there were a small standing army, officials, taxes, etc. (see Army).

Officials.

There is little information regarding the king's officials ("sarim"). A list of them, preserved in II Sam. xx. 23 *et seq.*, is headed by the general of the army ("sar 'al ha-ẓaba") or the commander of the royal bodyguard. Among the administrative officials the "mazkir" occupies the first position; as the title implies ("who brings into remembrance"), he was a kind of chief councilor, corresponding to the modern grand vizier in the Oriental states (II Kings xviii. 18, 37; Isa. xxxi. 3, 22; II Chron. xxxiv. 8). His assistant was the secretary of state ("sofer"), who had to attend to the king's correspondence. The overseer of labor is also mentioned in the list of David's officials (II Sam. viii. 15 *et seq.*, xx. 23 *et seq.*). The high priest likewise belonged to the royal officials. It appears from other allusions that there was also a minister of the palace (I Kings iv. 6; II Kings xviii. 18; Isa. xxii. 15), who is perhaps identical with the "soken" (Isa. xxii. 15). "'Ebed ha-melek" (servant of the king) also seems, according to II Kings xxii. 12, to have been the title of a high dignitary, perhaps the chief eunuch. Among the inferior officials were the prefects ("neẓibim") of the 12 provinces (I Kings iv. 7); and at the court itself, the cupbearer ("mashḳeh"; I Kings x. 5), the keeper of the robes (II Kings x. 22), the treasurer ("sar ha-rekush"; I Chron. xxvii. 25 *et seq.*), and the chamberlain ("saris"; I Kings xxii. 9; II Kings vii. 6, ix. 32 *et seq.*).

With the exception of the first ministers of the king, no such difference was made in assigning work to the officials as obtains in modern times. The government was not divided into different departments. Every official was in his district a sort of representative of the king, exercising the latter's prerogatives as military commander, governor, tax-collector, and judge. According to the Prophets, it appears that these officials often abused the power placed in their hands; they combined bribery, oppression, and cruelty toward their subordinates with servility toward their superiors (II Sam. xi. 14 *et seq.*; I Kings xii. 10 *et seq.*).

The details that are known regarding the administration of internal affairs relate almost entirely to the collection of taxes. David made a census of the people evidently for the purpose of having a basis for apportioning the taxes and for recruiting (II Sam. xxiv. 1 *et seq.*). Solomon divided the country into districts; in the passage referring to this measure (I Kings iv. 7), it is expressly connected with the imposts for the court. In the list of the twelve districts Judah is omitted; it is uncertain whether because Judah was exempt, as the tribe to which the royal house belonged, or because the narrator made a mistake. It is in any case noteworthy that the ancient division into tribes was ignored in this new division. The amount of these taxes is unknown; under Solomon the people regarded them as an oppressive burden. The tithe is apportioned to the king in the so-called "King's Law" (I Sam. viii. 17); this "King's Law," however, may be of later origin. Crown lands, which the king eventually gave to his servants as fiefs, are mentioned at an early date (I Sam. viii. 13). Traders' caravans had to pay toll (I Kings x. 15); lands of the condemned were seized in some cases by the king (I Kings xxi. 1 *et seq.*). The first cut of fodder went to the support of his chariot-horses (Amos vii. 1). Poll and income taxes seem to have been levied only in times of special need (II Kings xxiii. 35).

Constitution.

There was no regular constitution determining the rights of the king and his subjects. The so-called "King's Rights" which Samuel laid before the people (I Sam. viii. 10 *et seq.*) is not a legal document determining the rights and prerogatives of the king, but a somewhat prejudiced account of what the kings actually did. The "King's Law" (Deut. xvii. 14-20), on the other hand, contains moral and religious precepts rather than legal enactments: the king shall diligently study the Law, and shall not possess much silver or gold, many wives, or many horses. The principle of heredity, also, was not legally established, although from the beginning it was accepted as a matter of course. When the Judeans raised David upon the shield, in opposition to Esh-baal, and when the northern tribes chose Jeroboam, these acts were considered as rebellions against the legitimate royal house. On the other hand, it is evident that for a long time the people retained the idea that the king existed for the sake of the people, and not vice versa.

The communal government was at all times nearly unrestricted. The royal government had a greater sway only at Jerusalem, the capital, where of necessity it coincided with the city government, and where a royal officer was appointed as governor of the city (I Kings xxii. 26). Otherwise the royal officers do not seem to have interfered much officially in the affairs of the communities so long as the taxes were promptly paid. The ziḳne ha-'ir (see above), the elders of the community, constituted the local government, and still retained their judicial functions (Deut. xix. 12, xxi. 2 *et seq.*, xxii. 15 *et seq.*); no details, however, are known regarding this local council. The number of its members corresponded to that of the prominent families of the place; *e.g.*, the 77 elders of the small city of Succoth are mentioned (Judges viii. 14).

Constitution Under Persian Rule.

The ancient tribal constitution was revived during the Exile, after the national kingdom had perished; and the heads of the families appear again as the representatives of the community (Ezra viii. 1, x. 1). The return to Palestine was also a matter of the various families or communities (comp. Ezra i. 5); and after the Exile this democratic family organization naturally was revived among the Jews. The Persian king did not intend to restore national autonomy; the country remained with the Persian empire as a part ("medinah"; Neh. vii. 6; Ezra ii. 1) of the west-Euphratic province (Ezra v. 3). There was, at least part of the time, a special Persian governor ("peḥah," "tirshata") for Judea, under the satrap of the province. Nehemiah speaks of himself as being such a governor (Neh. v. 15 *et seq.*), but no mention is made of any of his successors. The Persian officer, who resided at Samaria, seems to have had a representative at Jerusalem (Neh. xi. 24).

These Persian satraps in any case did not interfere greatly in the internal affairs of the people, having no reason for doing so as long as the tribute-money and their salaries were paid regularly. They gave attention only to the building of temples and walls. The freedom of worship granted to the Jews entailed necessarily great freedom in the government, and especially in the administration of justice. The courts and the police were in the hands of the Jewish provincial authorities, designated as "sabe Yehudaye" (elders of the Jews), who represented the people before the Persian governor (Ezra v. 9 *et seq.*, vi. 7 *et seq.*); it is not known whether this body is identical with the frequently mentioned "seganim" (prefects). In addition to them, the ancient local form of government was revived under the elders of the towns, who administered justice as in olden times. In relation to them the so-called college of the "elders of Judah" at Jerusalem may have constituted a certain supreme authority. It is noteworthy that the priests and the Levites did not belong to this body (comp., *e.g.*, Neh. viii. 9, 38; x. 37).

Hellenic Time.

The development of the government from Ezra to the Greek period is shrouded in darkness. But the basis on which it rested was the law that came into force in 444 B.C. through Ezra-Nehemiah. It is not known how much time elapsed before this constitution was completely enforced; in the Hellenic period affairs were arranged as prescribed by that law. The high priest was the head of the entire community; he was the president of the gerusia, the ancient aristocratic senate, the assembly of the elders. The Ptolemies and Seleucids recognized him as ethnarch. He was empowered to levy taxes, and was responsible for the tribute of the people (Josephus, "Ant." xii. 4, §§ 1 *et seq.*). In view of this importance the Ptolemies and Seleucids claimed the right of appointing and dismissing the high priest. But otherwise these overlords, like the Persians, so long as their supremacy was recognized, interfered little in the inner affairs of the people.

The rise of the Hasmonean house marked no change in government. From the time of Jonathan, except during war, when the Maccabees exercised a sort of dictatorship, its members took their places at the head of the people as high priests (I Macc. xi. 27), for which, however, they did not have the legal qualifications. The gerusia continued to exist in the meanwhile (I Macc. xi. 23; xii. 6, 35; xiii. 36, etc.), although its influence was greatly diminished. Nor was the constitution actually changed when Aristobulus (105–104 B.C.) took the title of king; the fact that the Hasmoneans called themselves kings was merely an external indication that the spiritual implications of their office had long since become for them a minor matter. The gerusia had little power under rulers like Hyrcanus and Jannæus, but its authority under Alexander was very great. It is not known when the term "Sanhedrin" first came into use.

Roman Period.

Under the Romans the high priest, excepting for a short time, was also ethnarch, and again shared his functions with the gerusia. But it soon became apparent that strong rulers like Antipater and Herod had complete control of this body; Herod simplified matters for himself by removing his opponents in council (Josephus, "Ant." xiv. 9, § 4; comp. xv. 1, § 2).

Soon after Herod's death Archelaus was deposed as King of Judea and the country changed into a Roman province under a procurator, who in some instances was under the governor of the province of Syria, but had entire control of military and civil affairs. The Romans left the Jews full freedom in their internal affairs. The Sanhedrin then had more power than it had formerly possessed under the native princes. The office of high priest was no longer hereditary after the time of Herod. He as well as the Romans appointed and deposed high priests in quick succession, and thus this office lost more and more its political importance, as did the gerusia (the Sanhedrin), over which the high priest continued to preside. See SANHEDRIN.

E. G. H. I. BE.

——**In Rabbinical Literature:** The Mishnah (B. B. i. 5) says: "They force him [any citizen] to build for the town walls, gate, doors, and bolts. How long must one have been there to become liable as a citizen? Twelve months; but one who buys a dwelling-house in the town becomes a citizen at once." Thus there is a local authority which can and should levy taxes in money or work for the common defense. The Talmud (*ib.* 7b–11a) throws no light on the question whence the judicial body which enforces the tax derives its appointment or upon whose initiative it acts. It says that the "disciples of the wise" should be free from all taxes for the security of the place; but that all are bound for the cost of wells or aqueducts, and of paving the streets and squares. It also speaks of a tax for poor-relief; but this must not be imposed on the estate of fatherless minors. It shows that some at least of the burdens of the citizen must be borne by all who have dwelt within the town for thirty days.

There is no trace in the Mishnah or Talmud of any popular elections for local purposes, nor is there any of elections of kings or high priests by the body of the people. It is probable that the administrative offices, corresponding to those of the mayor and council and taxing officers of modern towns, the non-judicial elders, as distinguished from "the elders of the court" (Soṭah ix. 6), were handed down in certain families from father to son (Keritot 5b). Upon the measure or method of taxation which the king might employ for the purposes of the state the Mishnah is silent; the Talmud intimates that it might be in the nature of a tithe on the products of the soil (Sanh. 20b). In connection with the exemption from taxes claimed by the learned class (B. B. 8a) these imposts are cited as the supposed equivalents of those mentioned in Ezra vii. 24; namely, gifts to the king, which were of Persian institution; a capitation tax; and the "arnona" (Latin "annona"), a contribution in grain, fruits, etc., in the nature of a tithe.

GRACE, DIVINE: One of the attributes of God, signifying His loving-kindness and mercy, and particularly His compassion for the weak, the unfortunate, and the sinful. It is in contrast with the attribute of justice, inasmuch as grace is granted even to the undeserving. The most significant Scriptural passage is in Exodus (xxxiv. 6): "The Lord, The Lord God, merciful and gracious, long-suffering, and abundant in goodness and truth." The relation of this attribute of grace to God's justice is not always clearly defined in the Old Testament. Righteousness, however, is taken to be so comprehensive that it includes all moral perfection, of which all virtues are a necessary corollary. Often grace and justice are used in parallel construction (Ps. lxxxix. 15; ci. 1; ciii. 6, 8). Jonah found it difficult to reconcile grace and righteousness (see Hamburger, "R. B. T." i., *s.v.* "Gnade und Barmherzigkeit"; Jonah iii. 8–9; iv. 2, 11), and the divine answer states that grace divine is extended not only to the chosen people, but also to the heathen; it is conditioned, however, on sincere repentance. The Book of Jonah is particularly intended to teach divine grace in its universal aspect (see Driver, "Introduction to the Literature of the Old Testament," p. 303). However, the other books of the Bible are also replete with this idea, as Deuteronomy, where the existence of divine grace is cited as a guaranty that God will keep His covenant with Israel (iv. 31), and grace is promised as a result of obedience (xiii. 18–19).

The Prophets, while emphasizing God's judgment and righteousness, also proclaim His mercy. Isaiah repeatedly teaches that divine grace will be granted to the repentant (lx. 7), God's loving-kindness to Israel (lxiii. 7–9). Jeremiah and Ezekiel, while denouncing Judah for its sins, hold before it the same picture of divine forgiveness (Jer. xviii. 8; Lam. iii. 32; Ezek. xxxiii. 11). Joel expressly states that sincere repentance is the price of divine grace and mercy (ii. 13; comp. Hosea xiv. 2–9). Amos, while speaking burning words to sinful Israel, still promises divine grace to the saving remnant of Joseph (v. 15; comp. Micah vii. 18–20).

The Psalms abound in expressions of hope for and confidence in divine grace. It is found in conjunction with righteousness (cxvi. 5) and mercy (ciii. 8) and compassion (cxi. 4; comp. lxxxv. 10, where there may be an effort toward harmonizing the two attributes of God, grace and righteousness). In the Psalms there can be traced a gradual extension of the bestowal of divine grace from the anointed king and his seed (xviii. 50) to the poor and the needy (cxiii. 7), then to all Israel (cxxx. 7), to all the nations (cxvii.), and finally to all creatures (cxlv. 9). Divine grace is accorded because God desires to keep His covenant (cvi. 45), and also out of consideration for human weakness (lxxviii. 39). It is vouchsafed to the persecuted (ix. 13), to the fatherless, the widow, and the stranger (cxlvi. 9).

The apocryphal writings, too, commemorate and appeal to this divine attribute. Divine grace is extended over all; "the mercy of the Lord is upon all flesh" (Ecclus. [Sirach] xviii. 13) out of compassion to weak, sinful, and short-lived man. Grace is given to those who forgive the wrongs done to them by their fellow men (*ib.* xxviii. 2, 5).

In the Talmud.

In the Talmud divine grace is designated by the term מדת הרחמים, the attribute of mercy, in contradistinction to מדת הדין, the attribute of justice. In creating the world God combined the two attributes: "Thus said the Holy One, blessed be His name! 'If I create the world with the attribute of mercy, sin will abound; and if I create it with the attribute of justice, how can the world exist? Therefore I create it with both attributes, mercy and justice, and may it thus endure'" (Gen. R. xii. 15). The same is asserted about the creation of man (Gen. R. xxi. 8). This interpretation is based on the supposition, often expressed by the sages, that "Elohim" implies the quality of justice, and the Tetragrammaton the attribute of mercy (see Ex. R. vi. 2; Ber. 60b). God is sometimes called בעל הרחמים ("the Merciful One": Lev. R. xvii. 4).

According to the sages, divine grace is given to those who are merciful to their fellow men (Gen. R. xxx. 3; Shab. 151b); about those who study the Law God draws a cord of grace (חוט של חסד) in the future world (Ḥag. 12b). Grace is given to some because of the merit of their ancestors, to others because of the merit of their descendants (Gen. R. xxix. 5). The righteous have the power to change the attribute of justice to the attribute of mercy (*ib.* xxxiii. 4). The contrast between man's cruelty and God's grace is shown in Men. 99b; 'Er. 19a. As laws of grace and mercy are interpreted Lev. xxii. 27, 28; xxv. 6; Deut. xxii. 7 (see Deut. R. vi. 1). Rabbi Jose, however, declares that these commandments are not founded on grace, but are divine decrees for which no reason may be given (Ber. 33b; Meg. 25a).

From the above it is clear that the frequent assertion that the idea of divine grace is not fully expressed in the Old Testament and in the Talmud has no foundation. As to the Paulinian idea of grace see CHRISTIANITY and SAUL OF TARSUS. The medieval Jewish philosophers treating of the attributes of God did not mention grace. Saadia, the first to treat of attributes, enumerates only those which express the very essence of God without infringing upon the idea of His unity. The other philosophers followed Saadia's example. Judah ha-Levi, however, mentions the attributes חנון ורחום ("merciful and gracious") among the so-called "active attributes" ("Cuzari," ed. Cassel, pp. 87 *et seq.*).

The Jewish liturgy is full of the idea of divine grace. It is expressed in praise and adoration, in supplication ("Ahabah Rabbah"), and in thanksgiving ("Shemoneh 'Esreh"). God is addressed as "merciful God," "merciful Father," and "merciful King." The long prayer recited on Mondays and Thursdays, beginning "Wehu Raḥum," is particularly a prayer for grace in times of persecution. The liturgy for the New-Year and the Day of Atonement is permeated with this idea.

K. M. M. E.

GRACE AT MEALS: Benedictions before and after meals. In the prayer-book of the Spanish Jews grace after meals is called "*bendicion de la mesa*" (benediction of the table); the German Jews speak of "benschen," a corruption of the Latin "benedictio."

The duty of saying grace after the meal is derived from Deut. viii. 10: "And thou shalt eat and be sated and shalt bless the Lord thy God for the goodly land which he has given thee." Verse 8 of the same chapter says: "The land of wheat and barley, of the vine, the fig and the pomegranate, the land of the oil olive and of [date] syrup." Hence only bread made of wheat (which embraces spelt) or of barley (which for this purpose includes rye and oats) is deemed worthy of the blessing commanded in verse 10; bread made of rice, millet, or Indian corn is not included. Preparations of wheat or barley other than bread, and grapes, figs, pomegranates, olives, dates, wine, and oil do indeed come within the Scriptural command; but the grace after eating or drinking such articles is condensed into one benediction out of the three (or four) that are spoken after a meal which includes bread proper.

When three or more men (a boy over thirteen is reckoned as a man) eat together, one of them, according to the Mishnah, says grace for all; in modern practise he only leads, the others joining. Two men of proper age and a boy old enough to have ideas about God are deemed by others sufficient; also two men who have had their meal and a third man who has eaten with them any food the size of an olive.

The leader, after asking permission in the words "by permission [bi-reshut] of my masters" or "of my father and my masters" or "of the master of the house and my masters," opens thus: "Let us bless Him of whose bounty we have eaten." The others answer: "Blessed be He of whose bounty we have eaten and through whose goodness we live." The leader repeats this, and then proceeds with the benedictions. When ten are at the table the formula contains also the name of God, running thus: "Let us bless our God of," etc., and "Blessed be our God of," etc.

A baraita (Ber. 45b; 'Ar. 3a) teaches that three women may in like manner choose a leader and have the like address and response among themselves; but this custom has fallen into disuse in modern times. When ten men meet at a wedding-meal they add after "our God" the words "in whose dwelling there is joy" (see Ber. vii. 1, 2, 3, and Gemara on same).

The Benedictions.

The grace probably consisted originally of three benedictions: (1) The benediction closing "blessed," etc., "who feedest all," an acknowledgment of God as provider and sustainer of the world. It has no reference to Israel, to its history or Law, and it may be recited by men of any race or creed who believe in God. (2) The benediction closing "blessed be Thou, O Lord, for the land and for the food," and containing Deut. viii. 10. It opens with words of thanks for the heritage of the Holy Land, for the deliverance from Egypt, for the Covenant and the Law; lastly, for the food. Special thanks for the "miracles and salvation" that are remembered on Purim and Ḥanukkah are introduced here. (3) The benediction calling for God's mercy on Israel, on Jerusalem, on the kingdom of the house of David, and on the Temple; it proceeds with a request for plentiful and honorable maintenance, and lastly with one for the building of the Holy City, and closes: "Blessed be thou, O Lord, who in Thy mercy buildest Jerusalem. Amen." On the Sabbath a petition for rest undisturbed by sadness or sorrow is inserted; on festivals and new moons the same formula ("ya'aleh we-yabo"), which on these days forms a part of the "'amidah" or prayer proper (see SHEMONEH 'ESREH).

These three benedictions are spoken of in the Talmud as of high antiquity. The words "who buildest Jerusalem" do not militate against this; they occur in the 147th Psalm. There is a fourth benediction of later origin and growth. According to a tradition, it was instituted after the massacre of the brave defenders of Bethar; when the Jews received permission to bury their bleaching bones, the fourth benediction, "who is good and doeth good," already in use upon the receipt of good news, was added to the grace, and was soon enlarged to a length equaling that of the three others, especially by a number of petitions beginning: "The Merciful" (הרחמן).

Grace as printed in prayer-books of either the German or Sephardic ritual runs up to over 350 Hebrew words, aside from the insertions for Sabbath, new moons, etc. Maimonides gives in his "Order of Prayer" (part of his code) a much shorter form, each benediction being abridged, and the petitions commencing "The Merciful" being cut down to three. Baer in his prayer-book "'Abodat Yisrael" (p. 562, Rödelheim, 1888) also gives another short form of grace, especially composed for the benefit of "male and female servants and other people who have not sufficient time to read the long grace with proper devotion"; while the Kol Bo has a form of grace still shorter. But one of the Babylonian worthies, Benjamin the Shepherd, contracted the whole of grace into five Aramaic words: "Berik raḥamana, mara dehai pitta"—Blessed be the Merciful, the master of this bread (Ber. 40b)—and it was thought that in doing so he complied with his Scriptural duty. This formula is used by children.

In the house of mourning a modified grace, as given in the "Siddur Rab Amram," is recited. The address runs: "Let us bless the Comforter of mourners," etc.; the first and second benedictions are greatly shortened; the third reads thus: "Comfort, O Lord our God, those that mourn, the mourners for Zion and the mourners in this sad infliction; comfort them after their grief, gladden them after their sorrow, as it is said: 'Like a man whom his mother comforteth, so I will comfort you, and in Zion you shall be comforted.' Blessed," etc., "the comforter of mourners and builder of Jerusalem. Amen." In the fourth benediction the words "the truthful judge," used upon the receipt of sad news, are inserted; otherwise it is much shortened.

At the festive breakfast following a circumcision grace is usually chanted with many poetical additions; these are of no great antiquity.

Grace may be spoken in any language (Soṭah vii. 1). It should always be recited at the table at which the meal was taken.

Grace before meals is spoken on eating the first morsel of bread and runs thus: "Blessed be Thou, O Lord our God, King of the world, who bringest bread forth from the earth."

For the wine after the meal see CUP OF BENEDICTION; for the "seven benedictions" at a wedding-meal see MARRIAGE CEREMONIES; for melodies used in reciting grace see ZEMIROT.

GRACIA MENDESIA NASI. See NASI, GRACIA MENDESIA.

GRACIAN (Hebr. "**Ḥen**"): A prominent Spanish Jewish family descended from Judah ben Barzilai, the members of which are known to have lived chiefly at Barcelona from the thirteenth to the sixteenth century. Most of the members used the name "Ḥen"; one of them, Solomon ben Moses, signed himself twice "Solomon b. Moses Ḥen" ("Minḥat Ḳena'ot," pp. 154, 157) and once "Solomon Gracian" (*ib.* p. 163). Several members of this family signed in 1305, together with Solomon Adret, the protestation against the teaching of philosophy (*ib.* pp. 61, 74, 154, 157, 162, 163). The following are the principal members of the family:

Astruc Vidal Gracian: Flourished at the end of the fourteenth century. There is a responsum of his on the subject of taxes to be paid by persons who left Gerona and settled at Perpignan (Neubauer, "Cat. Bodl. Hebr. MSS." No. 2218^{4e}).

Bonseñor Gracian: Contemporary of Astruc Vidal Gracian; wrote a responsum on the same subject (*ib.*).

Elijah Ḥen: Flourished at Candia in the sixteenth century; mentioned by Jacob ha-Levi in his Responsa, No. 38, and by Joseph di Trani in his Responsa, ii., No. 15 (Conforte, "Ḳore ha-Dorot," pp. 47a, 48b).

Isaac Ḥen: Lived at Candia in the sixteenth century; mentioned in the Responsa of Joseph b. Loeb, iii., Nos. 2, 102 (*ib.* p. 38a).

Isaac b. Moses ben Shealtiel Ḥen: Signer of the protestation of 1305 ("Minḥat Ḳena'ot," p. 61).

Jacob en Shealtiel Ḥen: Signer of the protestation of 1305 (*ib.* pp. 61, 162).

Judah b. Immanuel Ḥen: Flourished at Candia in the sixteenth century, frequently mentioned in the Responsa of Joseph Caro (Conforte, *l.c.* 36b).

Makir ben Sheshet Ḥen: Signer of the protestation of 1305 ("Minḥat Ḳena'ot," pp. 61, 157).

Shealtiel Ḥen. See GRACIAN, SHEALTIEL.

Shealtiel ben Samuel: Probably a grandson of the preceding.

Sheshet b. Shealtiel Ḥen: Signer of the protestation of 1305.

Solomon ben Moses Ḥen. See GRACIAN, SOLOMON BEN MOSES.

Zerahiah ben Isaac b. Shealtiel Ḥen. See GRACIAN, ZERAHIAH BEN ISAAC BEN SHEALTIEL.

Zerahiah ben Sheshet Ḥen: Signer of the protestation of 1305 ("Minḥat Ḳena'ot," p. 157).

BIBLIOGRAPHY: Zunz, *Notes on Benjamin of Tudela*, ed. Asher, ii. 5.

G. M. SEL.

GRACIAN, SHEALTIEL (ḤEN): Rabbi of Barcelona; flourished in the beginning of the thirteenth century. During the lifetime of R. Nissim Gerondi, Shealtiel Gracian was rabbi of Fraga, Spain. Owing to his great learning, he was nominated rabbi at Alcala, and the Jews of that town made him swear that he would never leave them. Shealtiel afterward regretted his oath, and applied to R. Nissim and his pupil, Isaac ben Sheshet, to absolve him from it. Both refused; yet afterward, probably after R. Nissim's death, Shealtiel is found at Barcelona. Isaac b. Sheshet applied to him to be the mediator between his daughter and her father-in-law. MS. No. 2218 of the Bodleian Library (p. 156b) contains a responsum signed by Shealtiel Ḥen, together with seven other rabbis. He is besides frequently mentioned by Isaac b. Sheshet in his responsa.

G. M. SEL.

GRACIAN, SOLOMON BEN MOSES (ḤEN): Talmudist of Barcelona; lived at the end of the thirteenth and beginning of the fourteenth centuries; died in 1307. He was one of the synod that signed with R. Solomon b. Adret the decree of excommunication against Maimonides' partizans.

He was also one of those who, after Bedersi's letter to Adret, tried to reconcile the two parties (see Jew. Enc. ii. 626). His name occurs three times in the "Minḥat Ḳena'ot," under letters 81, 83, and 87.

Bibliography: *Minḥat Ḳena'ot*, letters 81, 83, 87; Grätz, *Gesch. d. Juden*, 3d ed., vii. 241.

G. M. Sel.

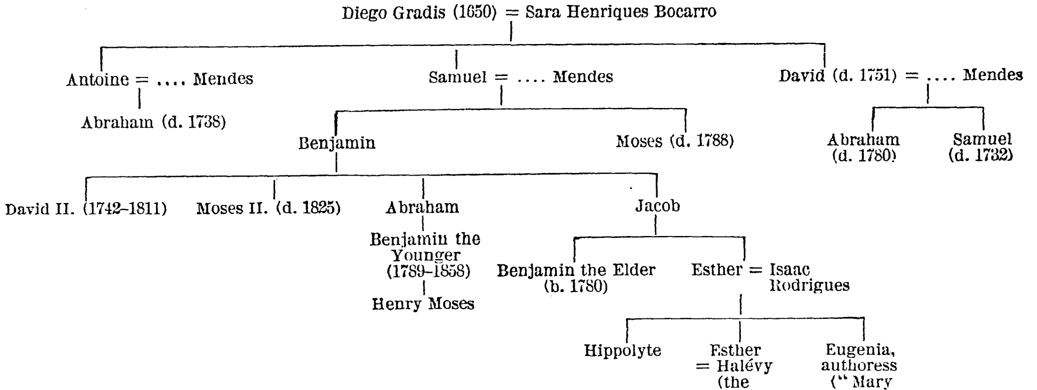
GRACIAN, ZERAHIAH BEN ISAAC BEN SHEALTIEL (ḤEN): Physician, philosopher, translator, Hebraist; flourished about the end of the thirteenth century; born either at Barcelona or at Toledo. Confounded with Zerahiah b. Isaac ha-Levi Saladin, a translator. Zerahiah went to Rome about 1277, and wrote all his works there before 1290. In writing to the physician Hillel of Verona he makes the point that while commenting upon the difficult passages of the "Moreh" he followed the criticisms of Naḥmanides. It may be inferred from his commentary to Job that Arabic was his native language. He wrote a philosophical commentary to Proverbs, finished Nov. 28, 1288; another to Job, in which he derives many words from the Arabic. Both commentaries were published by Schwarz: the former in "Ha-Shaḥar" (ii. 65-80, 105-112, 169-176, 209-240, 281-288, 300-314) under the title of "Imre Da'at"; the latter in his "Tiḳwat Enosh" (Berlin, 1868). He wrote also a commentary on difficult passages of the "Moreh" of Maimonides, comparing the work with that of Aristotle. Zerahiah was a prolific translator from Arabic into Hebrew of philosophical and medical works. Among his translations are the following:

(1) Aristotle's "Physics" under the Hebrew title "Sefer ha-Ṭeba'"; (2) "Metaphysics" under the title of "Mah she-Aḥar ha-Teba'"; (3) "De Cœlo et Mundo" under the title of "Ha-Shamayim weha-'Olam"; (4) "De Anima" under the title of "Sefer ha-Nefesh"; (5) "De Causis" under the title of "Ha-Bi'ur ha-Ṭob ha-Gamur"; (6) Averroes' Middle Commentaries to Aristotle's "Physics," "Metaphysics," and "De Cœlo et Mundo," and the commentary of Themistius to the last-named work; (7) the first two books of Avicenna's "Canon"; (8) Al-Farabi's "Risalah fi Mahiyyat al-Nafs" (Treatise on the Substance of the Soul), the Hebrew title of which is "Ma'mar be-Mahut ha-Nefesh" (published by Edelmann in his "Ḥemdah Genuzah," Königsberg, 1856); (9) a medical work of Galen under the title of "Sefer he-Ḥola'im weha-Miḳrim" (The Book of Diseases and Accidents), from the Arabic of Ḥunain ibn Isḥaḳ; (10) three chapters of Galen's Καταγενή, with the same title in Hebrew characters; (11) Maimonides' treatise on sexual intercourse ("Fi al-Jima'"); (12) the "Aphorisms" of Maimonides ("Fuṣul Musa"), terminated at Rome in 1277. Zerahiah's translations were mostly made for Shabbethai b. Solomon in 1284.

Bibliography: Steinschneider, *Hebr. Uebers.* pp. 111-114, 125, 146, 160, 262, 295, 652, 764, 765; idem, *Hebr. Bibl.* iv. 125, viii. 89, x. 50, xi. 42, 91, 136, xii. 43, 47, xvi. 86; Zunz, *G. Zeit.* vii. 149; Carmoly, *Revue Orientale*, i. 443-445; Michael, *Or ha-Ḥayyim*, p. 370; Fuenn, *Keneset Yisrael*, pp. 337, 338.

G. M. Sel.

GRADIS: Name of a family of prominent merchants in southern France, originally from Spain; flourished in Bordeaux in the eighteenth century. The following family tree indicates the relationship of the members of the great Bordeaux firm:



H. Gut.

David Gradis: Naturalized in Bordeaux in 1731; died in 1751. In 1696 he had established the great mercantile house whose trade relations extended to England, Holland, southern France, Canada, and the French West Indies, nearly all the transoceanic trade being in its hands. In return for sugar and indigo, the firm exported to Cayenne, Martinique, and Santo Domingo cargoes of alcohol, linen, meal, pickled meat, and wine. The serious financial crises of the years 1715 and 1719 did not materially injure any of the firm's commercial interests. In 1724 David Gradis, known as "the Portuguese merchant," opened a branch in Santo Domingo, despite the antagonism toward Jews on the island, where the Jesuits held sway. The influence of the firm of Gradis soon stifled all race feeling, and when **Samuel Gradis,** son of David and the representative of the family at St. Pierre, Martinique, died there, in 1732, he was buried in the garden of the Brothers of Mercy.

Abraham Gradis: Eldest son of David, who on his father's death became the senior member of the firm. He is described as a man of great genius, who not only maintained but vastly increased the prestige of the firm of Gradis in the commercial world. He became intimate with personages of the highest official rank, M. Maurepas, confidant of Louis XVI., among them. In the wars between England and France he despatched vessels carrying valuable cargoes of war supplies to Canada at the expense of the firm, being reimbursed only in part after hostilities had ceased. In 1748 he founded the Society of Canada, a commercial organization under the auspices of the French government, and erected magazines in Quebec. In 1758 the trade of the firm with the French colonies alone aggregated 2,369,326

Later Jewish Works.

A period of neglect of letters among the Jews of Europe followed the death of Levita. It lasted for two centuries, and manifested itself in the exclusive study of the Talmud and the Cabala, and in the neglect of the rational study of the Bible and consequently of the cognate grammatical studies. No attention was paid to the ancient classics of Hebrew philology; and the very scant output along philological lines contained not a single prominent work. Among the thirty-six works which were produced from the middle of the sixteenth century to the middle of the eighteenth century those of Solomon Hanau are probably the most important.

Mendelssohn's exposition of the Bible gave a new impulse to the study of Hebrew grammar. The most prominent in that department was Ben-Ze'eb, whose grammatical works rendered valuable services to the East-European Jews during the first half of the nineteenth century. Besides Ben-Ze'eb, Shalom Kohn advanced the study of Hebrew grammar by his grammatical work, written in German, but printed with Hebrew letters. The new science of Judaism inaugurated by the labors of Zunz and Rapoport included a thorough study of the older grammarians, but it has produced no independent work that could be placed favorably by the side of the presentations of Hebrew grammar by Christian scholars. Nevertheless Samuel David Luzzatto's works deserve especial mention; and of more recent writers Jacob Barth has published the most important contributions to this science.

Up to the middle of the eighteenth century the language of the text-books was chiefly Hebrew; but as early as 1633—manifestly out of regard to the Portuguese Maranos, who had returned to their old faith—the Portuguese language came into use and was followed by the Spanish. The first German grammar with Hebrew characters appeared in 1710, and was soon succeeded by others. In 1735 the first text-book in English appeared; in 1741 the first in Dutch; and in 1751 that in Italian. Beginning with the Mendelssohnian period, text-books written in languages other than Hebrew began to predominate.

The following is a chronological list of Hebrew text-books on Hebrew grammar written by Jews from the middle of the sixteenth to the beginning of the twentieth century:

1554. Meïr ibn Jair.—סימני כל השמונה בנינים. Sabbionetta. (1597: דקדוק.)
1557. Immanuel Benevento.—לוית חן. Mantua.
1597. Heilprin, Joseph b. Elhanan.—אם הילד. Prague. (1702; Cracow, 1598: לוח הדקדוק.)
1602. Archevolti, Samuel.—ערוגת הבושם. Venice. (Amsterdam, 1730.)
1605. Finzi, Jacob.—דברי אגור. Venice.
1627. Isaac b. Samuel ha-Levi.—שיח יצחק. Prague.
1627. Uzziel, Isaac.—מענה לשון. Amsterdam. (1710; Groningen, c. 1720.)
1633. Abudiente, Moses ben Gideon.—Gramm. Hebr. Part i., Onde se Mastrão Todas as Regras. . . . Hamburg.
1655. Anonymous.—שפת אמת. Amsterdam.
1660. Aguilar, Moses Raphael.—Epitome da Gr. Hebr. par Breve Methodo. Leyden. (1661.)
1675. 1678. Altaras, David b. Solomon.—Gramm. Compendium (Hebrew; in the quarto Bible). Venice.
1676. Castillo, Martyr.—Gramm. Hebr. y Españ. Leon de Francia.
1677. Spinoza, Benedict.—Compendium Gramm. Ebr. (opera posthuma). Amsterdam.
1683. Helman, Tobiah (Gutmann) b. Samuel.—לוח הדקדוק. Amsterdam. (A supplement to זבחי טוביה.)
1688. Oliveyra, Solomon b. David.—יד לשון. Libro de Gramm. Hebr. (Portuguese). Amsterdam.
c. 1688. Anonymous.—קצור דקדוק (at the end of התרת נדרים, ed. Mordecai b. Israel). Prague.
1692. Neumark, Judah b. David (Löb Hanau).—שורש יהודה. Frankfort-on-the-Main.
1692. Oppenheim, Judah b. Samuel.—דרך שיח. (Compendium of Isaac ben Samuel ha-Levi's work.)
1704. Duschenes, Gedaliah b. Jacob.—שפה ברורה. Prague. (1717.)

Neo-Hebraic and Aramaic Grammars.

The grammar of Neo-Hebrew, as found in the Mishnah and cognate works, has been treated by the Jewish scholars Dukes, Geiger, and J. H. Weiss. The text-book of Siegfried has been mentioned above in the first list.

The Aramaic of the books of Daniel and Ezra was not grammatically treated during the exclusively Jewish period of Hebrew philology. Some Christian grammarians at an early period treated this so-called Chaldee in connection with the Hebrew. Among the Aramaic works of more recent times are the following:

Wiener, G. B.—Grammatik des Biblischen und Targumischen Chaldaismus. (2d ed., Leipsic, 1842; 3d ed., 1882.)

Petermann.—Porta Chaldaica. (2d ed., 1872.)

Kautzsch, E.—Grammatik des Biblisch-Aramäischen. Leipsic, 1884.

Strack, H. L.—Grammatik des Biblisch-Aramäischen. (3d ed.; Leipsic, 1901.)

Turpie, David McCalman.—A Manual of the Chaldee Language. London, 1879.

Brown, C. R.—An Aramaic Method. Morgan Park, Ill., 1884, 1886.

Marti, K.—Kurzgefasste Grammatik der Bibl.-Aram. Sprache. Berlin, 1896.

By Jewish authors:

Fürst, Julius.—Lehrgebäude der Aramäischen Idiome. Leipsic, 1835.

Blücher, E. I.—מרפא לשון ארמי. Vienna, 1838.

Luzzatto, S. D.—Elementi Grammaticali del Caldeo Biblico e del Dialetto Talmudico Babilonese. Padua, 1865 (German by Krüger, Breslau, 1873; English by Goldammer, New York, 1877).

Lerner, Ḥ. Ẓebi.—ספר דקדוק לשון ארמית. Warsaw, 1875.

The above-named Aramaic grammars partly include also the Targumic dialect. A larger field of Jewish-Aramaic literature is comprised in the work by G. Dalman, "Grammatik des Jüdisch-Palästinensischen Aramäisch" (Leipsic, 1894). After the compendium of Luzzatto, the Aramaic dialect of the Babylonian Talmud was first treated systematically from the point of view of grammar in C. Levias' "A Grammar of the Aramaic Idiom Contained in the Babylonian Talmud" (in "Am. Jour. Semit. Lang." xiii., xiv.; reprinted separately, Chicago, 1899). See ARAMAIC LANGUAGE AMONG THE JEWS.

G. W. B.

GRANADA (גראנטה, גרנדה; also רמון or רמון ספרד): Capital of the Spanish province of the same name. It is said to have been inhabited by Jews from the earliest times; hence it was also called "Villa de Judios" (City of Jews), and, like Cordova, it was entrusted by the Arabian conquerors to the Jews for guardianship. Granada, which was chosen for the capital of the ancient kingdom of the same name (1013), instead of the neighboring ELVIRA, reached the height of its glory under the calif Ḥabus, who raised Samuel ibn Nagdela to the position of vizier or minister of state. As in all Mohammedan countries, the Jews lived in Granada in perfect freedom; and several of them—Joseph ibn Migash (who was sent on diplomatic missions), Isaac ben Leon, and Nehemiah Ashcafa, for example—occupied influential positions. Since the Jews of Granada were rich and powerful, they interfered at times in the dynastic quarrels. "Who did not see the splendor of the Jews in Granada, their good fortune, and their glory," says a Jewish chronicler, "never saw true glory; for they were great through wisdom and piety" ("Shebeṭ Yehudah," p. 3).

With the downfall and murder of Joseph ibn Nagdela, who had succeeded his father as vizier, an outbreak against the Jews occurred: their houses were plundered; and all of the Jews, except a few who escaped by flight, were killed. More than 1,500 Jewish families, numbering 4,000 persons, fell in one day, Ṭebet 9 (= Dec. 30), 1066. This was the first persecution of the Jews since the dominion of Islam in the Pyrenean peninsula. The Jews throughout the kingdom were forced to sell their houses and lands and to leave the country; but they soon returned.

Under the Almohades.

The Jews in Granada suffered severely, also, from the persecutions of the Almohades; and only on pretending to accept Islam were they allowed to remain in the city. In order to shake off the hard yoke and to overthrow the dominion of the fanatical Almohades the Jews formed a conspiracy with the Christians, who were likewise persecuted. On a certain day the revolutionists advanced with a considerable following before Granada, and the Jews of that place, under the leadership of a champion of freedom named Aben Ruiz aben Dahri, helped them to capture this important stronghold. Their joy was, however, of short duration: the Almohades reentered the city, and the Jews were severely punished. They were more successful a few years later. The brother of the emir Al-Ma'mun, Ya'ḳub al-Manṣur, advanced with an armed force, and, with the aid of the Jews, drove the Almohades out of Granada and back to Africa (1232).

The situation of the Jews in Granada, the only Spanish kingdom that remained independent under the califs for some centuries longer, took on its former aspect. Of their political status very little is known. In 1306 the calif Mohammed built his bath out of the income from Jews and Christians in Granada; and in 1312 his successor levied a new tax on their houses and baths. It is difficult to believe what the Arabian chroniclers state, that Isma'il Abu al-Walid ibn Abu-Zaid Faraj (1315-26) commanded the Jews to wear a badge distinguishing them from Mohammedans. In the great persecution of the Jews in 1391 many refugees found shelter and protection in Granada.

After a long struggle Granada was forced to succumb to Castilian power (Jan. 2, 1492). The Jews also had a part in the victory. According to a compact entered into Nov. 25, 1491, by the contending rulers, all Jews in the city and suburbs of Granada, as well as all living in other cities and towns in the kingdom, were allowed to depart like the Moors. Those Jews who had accepted Christianity were granted a month for withdrawal. It was in Granada, at the Alhambra, that Ferdinand and Isabella signed the edict (March 31, 1492) expelling the Jews from Spain.

Jewish Scholars of Granada.

Granada was for some time a seat of Jewish learning. Samuel ibn Nagdela, who himself had written grammatical, exegetical, and poetical works, and who, like his son, supported Jewish scholars, gathered about him a large circle of Jewish grammarians and poets. Granada was the birthplace of the synagogal poet Moses ben Ezra, of Judah ibn Tibbon, of Saadia ben Maimon ibn Danan, of Solomon ben Joseph ibn Ayyub, and of other famous authors. It was the home, too, of Isaac Hamon, of Abraham ben Isaac, author of a cabalistic work, and of the Gavison family.

GRANTOR AND GRANTEE. See Gifts.

GRAPE: The fruit of the grape-vine. The general Hebrew term for ripe grapes when not in clusters is ענב (Gen. xl. 10–11), and of grapes in clusters, אשכול (Num. xiii. 23). There are other terms for different kinds of grapes and for grapes in different stages of development; as בסר for unripe or sour grapes (Isa. xviii. 5); באושים for wild grapes (Isa. v. 2, 4); פרט for grapes that fall off when ripe (Lev xix. 10); עללות for gleaned grapes (Judges viii. 2); צמוקים for dried grapes or raisins (I Sam. xxv. 18; II Sam. xvi. 1). According to R. Judah, חרצנים and זג (Num. vi. 4) respectively represent the skin and the seed of the grape; but according to R. Jose, whose interpretation has been accepted by later commentators, זג is the skin, חרצנים the seed (Naz. 34b). A word which has given rise to discussion is סמדר (Cant. ii. 13, 15; vii. 12). According to Gesenius ("Th."), who is followed by other commentators, it means "grape-blossom," while Ibn Janaḥ and David Ḳimḥi thought it meant the young grape which appears immediately after the opening of the blossom (see Rubens Duval in "R. E. J." xiv. 277 *et seq.*). R. Jose, prohibiting the "semadar" in the first three years, likewise considered it as a fruit ('Orlah i. 7).

Grapes are referred to in the Bible and Talmud in symbolical senses. As grapes can not be found after vintage, neither can the good and upright man be discovered by diligent searching in Israel (Micah vii. 1, 2). "The fathers have eaten sour grapes and the children's teeth are set on edge" (Ezek. xviii. 2); "When the vintagers come to thee they will not leave even the grape-gleanings" (Jer. xlix. 9, Hebr.); that is, when the enemy comes he will carry off everything. A man who marries his daughter to a scholar ("talmid ḥakam") is like one who mingles vine grapes with vine grapes, but he who marries his daughter to an ignorant man ("'am ha-areẓ") is like one who mingles vine grapes with the berries of the thorn-bush (Pes. 49a). According to R. Aibu, the forbidden fruit which Eve ate was that of the vine (Gen. R. xix. 8).

GRASSHOPPER. See Locust.

GRÄTZ: Town in the province of Posen, Prussia, with a population of 3,784, of whom 319 are Jews (1903). The Jewish community there is one of the oldest in the province. Jews are mentioned in the city charter of April 9, 1594. In 1634 the tailors' gild of Grätz permitted two Jews of Posen to settle in the city and to open a tailor-shop. The Chmielnicki rebellion brought disaster upon the Jews of Grätz. On May 14, 1663, the overlord of the city issued a "Jews' privilege," regulating the affairs of the Jews. During the "northern war" (1700–21) the community was almost entirely destroyed, and its rabbi, Judah Löb, who had been called in 1701, was obliged to flee to Frankfort-on-the-Oder. The great conflagration of 1711 was also a heavy affliction to the community, which had to apply for aid to coreligionists at Posen, who afforded relief to the best of their ability, although themselves impoverished and in debt through a succession of misfortunes.

In 1797 it was decided that the officials of the community should consist of the following: one chief rabbi, one assistant rabbi (dayyan), three elders, one "schulklopfer," one synagogue attendant, two undertakers, three hospital nurses, two cantors, three school-teachers, and one bathhouse superintendent. The debts of the community in that year amounted to 10,151 thalers, repayable in yearly sums of 441 thalers. For that year, also, the rabbi received a salary of 88 thalers, while 666 thalers were paid to the overlord. In 1798 a Jew was permitted to live in the house of a Christian. At the end of the eighteenth century there were 1,135 Jews, nearly half of the whole number of inhabitants; the number had risen from 1,499 in 1816 to 1,634 in 1820, the largest in the history of the city; by 1840 and 1850 the number had decreased to 1,548 and 1,532 respectively. The Polish uprising of 1848, during which the Jews on the whole remained neutral or sided with the Germans, destroyed much property in the city.

The following were rabbis in the seventeenth and eighteenth centuries: **Simon b. Israel Ashkenazi** (*c.* 1677); **Benjamin Wolf b. Joseph Joske** (*c.* 1689); **Judah Löb b. Solomon,** previously darshan at Prague, and subsequently rabbi at Schneidemühl (*c.* 1699); **Phinehas Selig b. Moses** (dayyan of the German community at Amsterdam in 1708); **Sanvel Spira of Lemberg; Gershon b. Jehiel of Landsberg,** who at Friedberg in 1742 called himself ex-rabbi of Grätz: **Jacob b. Ẓebi Hirsch** (1743); **Marcus Baruch Auerbach.** Among those of the nineteenth century were: **Benjamin Schreiber** (d. 1839); **Elijah Guttmacher** of Borek, formerly at Pleschen, the "Grätzer Rav," whose counsel and aid were sought by thousands from far and near (d. 1874); **Dr. B. Friedmann,** subsequently at Berlin (d. 1902); **Dr. Silberberg,** subsequently at Königsberg; and the present (1903) incumbent, **Dr. J. Friedmann.**

In the first half of the nineteenth century there was a famous Talmudic school at Grätz. The literary and philanthropic societies include: sukkat shalom, ḥebra ḳaddisha, and biḳḳur ḥolim—united in 1901; in 1898 a society for the study of Jewish history and literature was founded; and there are also a women's society, and funds for the poor, including one especially for poor travelers. The large city hospital, built by the heirs of Dr. M. Mosse, receives patients regardless of creed.

D. J. Fri.

GRATZ: American family prominent in the affairs of the city of Philadelphia and of the state of Pennsylvania. According to some authorities, the name "Gratz" is derived from a town in Styria, Austria; according to others, from a city in Posen, Prussian Poland. Both suppositions, however, are probably wrong. The true place of origin is most likely the town of Gratz in Austrian Silesia, whence the family or some of its members removed to Langendorf (since 1745 in Prussian Silesia), which town was known then and later by its old Slavonic name. The name of the family was then "Grätza," that is, "of Gratz." The original members of this family in the United States were **Barnard Gratz** and his brother **Michael Gratz**; the former had two children: **Rachel Gratz**, who married Solomon Etting of Baltimore; and **Fanny Gratz**, who died at an early age. Michael Gratz, who married Miriam Simon, daughter of Joseph Simon of Lancaster, had twelve children, of whom the following may be mentioned: **Frances** ("Fanny"), wife of Reuben Etting; **Simon**; **Richea**, wife of Samuel Hays; **Hyman**, **Sarah**, and **Rebecca**, all unmarried; **Rachel**, the wife of Solomon Moses; **Benjamin**, who removed to Lexington, Ky.

J. E. N. S.

Barnard Gratz: American merchant; born at Langendorf, Upper Silesia, Germany, 1738; died at Baltimore, Md., April 20, 1801. When about seventeen years of age he emigrated to the United States, arriving in Philadelphia in 1754. For a time he was engaged in the counting-house of David Franks, but subsequently he entered into partnership with his brother Michael, trading with the Indians and supplying the government with Indian goods. On Oct. 11, 1763, he became a naturalized British subject. He was one of the merchants who signed the Non-Importation Resolutions adopted Oct. 25, 1765. After the outbreak of the Revolutionary war he took the oath of allegiance to the commonwealth of Pennsylvania (Nov. 6, 1777). Gratz was also one of the signers of a petition presented to the government in 1783 for the abolition of an objectionable oath of office. About the time of the outbreak of the American Revolution he was appointed parnas of an unorganized congregation of Philadelphia Jews, which was ultimately known as the Congregation Mickveh Israel, on whose board of trustees he later served.

Benjamin Gratz: American soldier and lawyer; born in Philadelphia, Pa., Sept. 4, 1792; died at Lexington, Ky., March 17, 1884; educated at the University of Pennsylvania, graduating (M.A.) in 1815. At the outbreak of the War of 1812 Gratz enlisted under Gen. Thomas Cadwalader, and in 1813 joined Capt. John Smith's company of Pennsylvania Volunteers as second lieutenant. Soon after the close of the war he was admitted to the bar of Pennsylvania (1817). He subsequently removed to Kentucky, and was elected trustee of the Transylvania University, Ky.

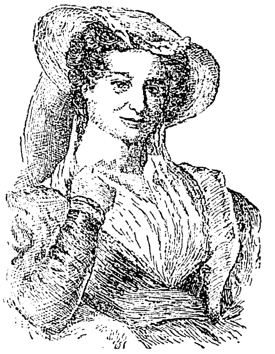
Hyman Gratz: American merchant and philanthropist; born in Philadelphia Sept. 23, 1776; died Jan. 27, 1857; educated in the public schools of his native city. In 1798 he joined his brother Simon in partnership as wholesale grocer, and later turned his attention to life-insurance. In 1818 he was elected director of the Pennsylvania Company for Insurance on Lives and Granting Annuities, and twenty years later was elected president of the company. On the founding of the Pennsylvania Academy for Fine Arts, in which his brother Simon Gratz took some part, he served on the directorate of the institution (1836 to 1837), and held the office of treasurer from 1841 to 1857. On the retirement of Hyman Marks as treasurer of the Congregation Mickveh Israel of Philadelphia Sept. 19, 1824, Gratz succeeded him, and was reelected annually until 1856. When the first Jewish Publication Society of America was projected in Philadelphia (1845) he was one of its managers. On the receipt in the United States of the news of the persecution of Jews in Damascus, Gratz was elected chairman of the meeting of the Congregation Mickveh Israel, called Aug. 27, 1840, to protest against that persecution.

By a deed dated Dec. 18, 1856, Gratz set aside stocks, bonds, and other property for the purpose of establishing "a college for the education of Jews residing in the city and county of Philadelphia" (see GRATZ COLLEGE).

Jacob Gratz: American merchant; born in Philadelphia Dec. 20, 1788; died there Feb. 3, 1856; educated in the University of Pennsylvania (M.A. 1811). He was president of the Union Canal Company, and a director of the Institution for the Instruction of the Deaf and Dumb (1820). He became a member of the Pennsylvania legislature and entered the state senate in 1839. Jacob was also one of the officers of the Congregation Mickveh Israel.

Of **Joseph Gratz** little is known except that he was secretary of the Congregation Mickveh Israel for a long period and a director of the Institution for the Instruction of the Deaf and Dumb.

Michael Gratz: American trader and merchant; born in Langendorf, Upper Silesia, Germany, 1740; emigrated to London, England, and thence to the United States (1759), where he resided in Philadelphia and in Lancaster, Pa. With his brother Barnard he engaged in trade with the Indians, supplying the United States government with Indian goods. Gratz was a signer of the Non-Importation Resolutions adopted Oct. 25, 1765. He was also one of the signers of the memorial of the Jewish Congregation of Philadelphia to the President of the United States, dated Sept. 12, 1782, announcing that the Congregation Mickveh Israel had erected "a place of public worship which they intend to consecrate," asking "the Protection and Countenance of the Chief Magistrates in this State to give sanction to their design," and stating that the petitioners "will deem themselves highly Honoured by their Presence in the Synagogue whenever they judge proper to favour them." He succeeded his brother Barnard in the counting-house of David Franks.



Rebecca Gratz.
(By permission of D. Appleton & Co.)

Rebecca Gratz: American educator and philanthropist; born in Philadelphia March 4, 1781; died Aug. 27, 1869. She consecrated her life and labors to the well-being of her kind, and was the promoter of religious, educational, and charitable institutions for their benefit. Elected (1801) secretary of the Female Association for the Relief of Women and Children in Reduced Circumstances, Rebecca Gratz soon saw the need of an institution for orphans in Philadelphia, and she was among those instrumental in founding the Philadelphia Orphan Asylum in 1815. Four years later she was elected secretary of its board of managers, which office she continued to hold for forty years. Under her auspices were started a Hebrew Sunday-school (of which she subsequently became superintendent and president, resigning in 1864) and a Female Hebrew Benevolent Society (about Nov., 1819). In 1850 she advocated in "The Occident," over the signature "A Daughter of Israel," the foundation of a Jewish Foster Home; and her advocacy was largely instrumental in the establishment of such a home in 1855. Other organizations due to her efforts were the Fuel Society and the Sewing Society.

Rebecca Gratz is said to have been the model of *Rebecca*, the heroine of the novel "Ivanhoe" by Sir Walter Scott, whose attention had been drawn to her character by Washington Irving, with whom she was acquainted. The claim has been disputed, but it has also been well sustained in an article entitled "The Original of Rebecca in Ivanhoe," which appeared in "The Century Magazine," 1882, pp. 679-682.

Of **Simon Gratz** little is known beyond the fact that he was one of the founders of the Pennsylvania Academy of Fine Arts, and acted as treasurer of the Congregation Mickveh Israel about 1820 and trustee of the same congregation in 1828.

GRATZ COLLEGE (Philadelphia): Jewish institution of higher learning, founded under a deed of trust executed by Hyman Gratz, dated December, 1856, which, under certain contingencies that afterward arose, became vested in the Congregation Mickveh Israel of Philadelphia. This trust became operative in 1893, and the congregation appointed a board of trustees for its management. In accordance with the terms of the deed requiring the establishment of a "college for the education of Jews residing in the city and county of Philadelphia," it was decided that the college should be devoted to the dissemination of the knowledge of Jewish history, the Hebrew language, Jewish literature, and the Jewish religion, with the understanding that the curriculum should be especially designed for teachers, thus creating it a Jewish teachers' college. Pending the beginning of actual instruction, three courses of lectures were given: the first in 1895 by Prof. S. Schechter, then of Cambridge, England, on "Rabbinic Theology"; the second, a general course of lectures by American scholars; and the third, a course on the "Philosophy of Jewish History," by Joseph Jacobs, then of London, England. Regular instruction began in 1898, the teaching staff consisting of Rabbi Henry M. Speaker, Arthur A. Dembitz, A.B., and Isaac Husik, Ph.D. There have been in attendance 27 pupils, and nine graduates have received teachers' certificates. Gratz College also has a course preparatory to the Jewish Theological Seminary of America. Moses A. Dropsie has been the president of the board of trustees since the foundation of the trust.

GRAVESTONES. See Tombstones.

GRAZIANI, AUGUSTO: Italian economist; born at Modena Jan. 6, 1865. He obtained his education at the university of his native town, devoting himself especially to economic studies, and graduating as doctor of laws in 1886. He became successively privat-docent (1887), docent (1888), and assistant professor of political economy (1890), in his home university; professor of financial science at the University of Sienna (1894); professor of political economy at the University of Naples (1899), which position he still occupies. He is corresponding member of the Accademia dei Lincei.

In addition to numerous essays in Italian and American journals, Graziani wrote: "Di Alcune Questioni Intorno alle Imposte ed Egli Effetti Economici" (1889); "Sulla Teoria Generale del Profitto" (1887); "Storia Critica della Teoria del Valore in Italia" (1890); "Sulle Operationi di Borsa" (1890); "Istituoni di Scienza della Finanze" (1897); "Studi sull Teoria dell' Interese" (1898); "Tratto di Economica Politica" (1904). S.

GRAZIANO, ABRAHAM JOSEPH SOLOMON BEN MORDECAI: Italian rabbi; died at Modena in 1685; cousin of Nathanael b. Benjamin Trabot. He probably belonged to the Gallico family, the name "Graziano" being the Italian equivalent of "Johanan." Graziano, who was rabbi of Modena, was the author of the following works: "Sha'are Efrayim," explaining all the passages in which the particles את and גם are found in the Pentateuch; "Haggahot we-Ḥiddushim," annotations and novellæ on the Shulḥan 'Aruk, cited by Ishmael Coen in "Zera' Emet"; "Liḳḳuṭe Dinim," various halakic decisions; and a collection of poems. Of these works there have been published only two elegies on the death of Rabbi Aaron Benoit Modena, inserted in the "Ma'abar Yabboḳ," and some responsa included in the "'Afar Ya'aḳob" of Nathanael ben Aaron Jacob Segre.

Graziano was very broad-minded, and the ultra-orthodox rabbis disapproved of some of his halakic decisions. He permitted the use of an organ in the synagogue ("Haggahot we-Ḥiddushim" on Shulḥan 'Aruk, Oraḥ Ḥayyim, 560, § 3). As a poet he was highly appreciated, his style being both easy and elegant. Graziano signed his works איש ג׳ר, the initials of his name and that of his father.

GREAT SYNAGOGUE. See Synagogue, Great.

GREECE: Country of southeastern Europe. The number of its Jews is not more than 9,000, distributed as follows: Corfu, 3,500; Zante, 175; Chalcis, on the island of Eubœa or Negropont, 200; Volo, 1,100; Larissa, 2,500; Trikala, 1,000; Arta, 300; Athens, 300. Besides these Jews of Greece proper—who form the subject of this article—there is also a Jewish population of about 4,000 in Janina and Prevesa in Epirus; these people are really Greeks, for they have lived in the country since a very remote period, and speak only the Greek language. The term "Greek Jews" might also be made to include the Jews of the island of Crete and those of Chios, off Smyrna.

Jews settled in Greek territories in early days, as is proved by numerous anecdotes in the rabbinical literature (see Levy, "Neuhebr. Wörterb." *s.v.* אתינא). In the Acts of the Apostles it is said that Jews had synagogues at Corinth and Athens, where they lived peaceably and enjoyed social influence. The Greeks seem to have taken great interest in the new religion, brought from Judea, that had made proselytes even on the ancient Areopagus.

The Jews, on their side, held Greek culture in high esteem, and during the pre-Christian time many of their number, including Josephus, Philo, Aristobulus, and Ezekiel the tragedian, enriched classical literature with their works. But there was more than mere social and intellectual intercourse between the two peoples; for, according to Josephus, King Arius of Sparta made an alliance with the high priest Jonathan ("Ant." xiii. 5, § 8; comp. Schürer, "Gesch." 3d ed., i. 236). Alexander the Great, who through his education had thoroughly imbibed the Greek spirit, treated the Jews with great kindness. Under the Roman emperors, too, the Greek Jews enjoyed the same privileges as the other citizens. But their position was not so pleasant under the Byzantine emperors: at first they were even forbidden the free exercise of their religion (723). Many were converted to Christianity, while others left the country. Grätz ("Gesch." v. 228) thinks that the permission for the free exercise of their religion was probably granted to them by the empress Irene (780–797). In 840 the Jews of Greece were very prosperous, and were engaged in rearing silkworms, planting mulberry-trees, and in silk-weaving.

With the exception of their enjoyment of religious liberty, the Greek Jews were always subjected to the same political restrictions as under the first emperors, and were not allowed to hold any positions under the state. Pethahiah of Regensburg, who visited Greece in the twelfth century, relates that there were almost as many Jews there as Palestine could have held. Benjamin of Tudela, on visiting Greece about the same time, also found many Jews there, especially in Arta, Patras, Corinth, Crissa (where they were engaged in farming), and Thebes, whose 2,000 Jews included the best dyers and silk-manufacturers of Greece. The silk industry must have been of great importance, and the Jews engaged in it were very rich; for, according to the Greek historian Nicetas, even the Byzantine emperors had to buy their costly goods in Athens, Thebes, and Corinth. The downfall of the community at Thebes was due chiefly to King Roger of Sicily, who, after capturing the city (1147), led the best silk-weavers as prisoners to Palermo and probably to the island of Corfu (which he had also conquered), where they taught their art to the Normans.

The Jews of Greece proper, who seem to have enjoyed great tranquillity at all times, cultivated Hebrew study so thoroughly that even before the Spanish emigration several renowned rabbis were designated as Greeks. Among these were: Baruch ha-Yewani ("the Greek"), in the fourteenth century; Zechariah ha-Yewani, author of the "Sefer ha-Yashar" (1340); Dossa ben Rabbi Moses ha-Yewani, in the fifteenth century, author of "Perushe we-Tosafot." Franco, in his "Essai sur l'Histoire des Israélites de l'Empire Ottoman," p. 41, Paris, 1897, says that during the same period the Jews of Thebes were renowned for their Talmudical learning; and he mentions David ben Ḥayyim ha-Kohen, grand rabbi of Patras—originally from Corfu—whose influence extended to Italy and throughout the Orient. Moses Capsali was grand rabbi of Constantinople at the time of the Ottoman conquest (1453); another rabbi of the same period was Eliezer Capsali.

Theodore Reinach, in his "Histoire des Israélites," pp. 225, 226, relates that, beginning with the fifteenth century, there was a revival of Talmudical studies in Turkey, caused by a twofold current coming from Spain and Greece, the communities of which —especially those of the Morea—took on a sudden growth after the conquest of the Morea by the Venetians in 1516. Isaac Abravanel, who visited Corfu toward the end of the fifteenth century, remained there some time in order to complete his commentary on Deuteronomy (see his preface thereto), which proves that he must have found a library and learned men there. Considering, however, that there are now only 5,000 Greek Jews who speak Greek—*i.e.*, those of Janina, Prevesa, Zante, Arta and Chalcis—the question arises what has become of the pre-Spanish Greco-Jewish population. It has evidently been absorbed by the Spanish, which was far more numerous in Thessaly and the Turkish territories, while the Judæo-Greek population of Corfu has been absorbed by the Apulians. Traces of the ancient Greek origin of the Judæo-Greek population still exist. Thus there are Greek synagogues ("ḳehal Gregos" or "de los Javanim") in Corfu, Constantinople, Salonica, and Adrianople; and many Greek words are found in the Spanish language of the Oriental Jews and in the Apulian of the Corfiotes. Many Greek feminine proper names are also used, such as *Καλομοῖρα* ("Calomira" = "good luck") and *Κυρὰ* ("Kyra" = "princess"); and there are family names of similar origin, as Politi, Roditi, Mustachi, and Maurogonato. Further, there are still to be found in Corfu songs and elegies in the Greek language which were recited in the synagogue until about thirty years ago.

Up to the time of the Greek insurrection (1821) there were several Jewish congregations in Greece proper, namely, in Vrachori (Agrinion), Patras, Tripolitza, Mistra, Thebes, and Livadia; but most of their members were killed by the insurgents, who thus vented upon these peaceful citizens their inveterate hatred of the tyrant of their fatherland. A few of those who escaped went to Corfu; others to Chalcis, which remained under Turkish dominion until 1832.

Very little is known to-day of these congregations that have disappeared, but there are still some Hebrew epitaphs, which have not yet been collected. Of all these communities Thebes was undoubtedly the most celebrated, owing to its distinguished Talmudic scholars and its extensive silk-manufactories. Dubois, a Frenchman who visited the city in the seventeenth century, praises in a letter to the famous Ménage the beauty of the Jewish women of Thebes (Pouguericlie, "Voyage en Grèce," vol. iv., book xi., ch. iii.).

To the history of the Jews of Greece belongs also Don Joseph Nasi (Juan Miques), who was created Duke of Naxos and of the twelve most important Cyclades by Selim II. (1574). It was probably due to his having noted the great success attending the manufacture of silk in Greece, that Nasi, who always had the welfare of his coreligionists at heart, introduced the trade into the city of Tiberias, which had been granted to him and which he raised from its ruins.

The existing Jewish communities of Greece may be divided into five groups: (1) Arta (Epirus); (2) Chalcis (Eubœa); (3) Athens (Attica); (4) Volo, Larissa, and Trikala (Thessaly); (5) Corfu and Zante (Ionian Islands).

The community of Arta is the oldest in Greece. It has a small elementary school and a benevolent society. Children desiring an education attend the Greek higher schools. There are also two synagogues, the older of which is called the Grecian; and a very ancient cemetery, no longer used, called the cemetery of "Rabbanè Arta." See ARTA; ATHENS; CHALCIS; CORFU.

D. M. C.

GREEK LANGUAGE AND THE JEWS: This article will be confined to the Greek material found in rabbinical works, since the language of the Septuagint and the New Testament requires separate discussion, and does not belong here. Latin was made accessible to the Jews in Talmudic times by means of Greek, and will be treated here in this relation. For general cultural conditions see ALEXANDRIAN PHILOSOPHY; BYZANTINE EMPIRE; HELLENISM.

In the Talmud, Midrash, and Targum the Greek and Latin letters are transcribed according to purely phonetic principles; this transcription may therefore assist in some measure the work of solving the probable original pronunciation of Greek, still a matter of dispute. While the Greek elements found in rabbinical works must be classed for the greater part with the vernacular, they are for that reason most instructive from a phonetic point of view.

Surds and Sonants.

The pronunciation of the Greek sounds has in general been faithfully preserved; and only in a few points—including, however, the important one of iotacism—does the pronunciation represent that stage which is generally designated as modern Greek, but which, nevertheless, may have been the original one. Surds and sonants are always distinguished; *e.g.*, τ was written and pronounced ט, and δ, ד, not vice versa, a practise that must be especially noted in view of the fact that sonants and surds are confounded in Egyptian Greek (Blass, "Aussprache des Griechischen," 3d ed., 1895), in demotic papyri, and in Gnostic manuscripts (Thumb, in "Indogerm. Forschungen," viii. 189), as well as in the Coptic; in Syriac the same accuracy has been observed. On the other hand, as in the Egyptian κοινή (*e.g.*, καλκοῦ = χαλκοῦ), surds and aspirates are frequently confounded; thus χάλκανθος always appears as קלקנתום; θέατρον is represented by טיאטרון, though the form with ת also occurs. This is all the more striking as surds and aspirates represent the same sounds in both languages, and this leads to the important conclusion that in Hebrew כ and ק, ט and ת, were similar in sound. The aspirate φ, which occurs not only as פ but also as ב and even וו, had already become a fricative sound, and hence had reached in Hebrew mouths the modern Greek stage. The same is not true in the case of θ, however, but fricative pronunciation appears in the sonants β, γ, δ; since, for example, זמרגד occurs for σμάραγδος side by side with זמרגן, the modern Greek pronunciation of δ as a voiced spirant, corresponding to the English "th" in "these," "bathe," must be assumed.

Nasals and Sibilants.

As regards the nasals, the exact pronunciation of the sounds γγ, γκ, γχ is reproduced in a manner entirely analogous to the Latin, Syriac, Arabic, Romanic, etc., as can be seen in * אנגלא (ἄγγελος), אנקי (ἀνάγκη), קונכי (κόγχη), etc. Otherwise, the nasals were treated with considerable license, and were frequently suppressed by assimilation and reduction, as in modern Greek. For example, just as πέπτος is used for πέμπτος, so the Jews said מפים instead of Μέμφις, קפנדריא for *compendiaria*, etc.

From transcriptions such as * שלמין for * σταλάγμιον and שרדנגין for * σαρδονύχιον there must be assumed for the letter σ (which is in other cases transcribed by ס, ז, and צ) the pronunciation "sh," a sound the existence of which in Greek philologists have denied. Further proof in this regard is furnished by the transcription of משיחא as Μεσσίας (comp. Schürer, "Gesch." 3d ed., ii. 526, note).

Iotacism and Aspiration.

Iotacism of the vowels ε, ι, η, and the diphthongs ει, οι is found in almost all cases, except before r; hence, נירון, Νέρων, must be pronounced "Neron," and not "Niron." But αι, αυ, ευ had very nearly reached the modern Greek stage. In contrast with this is the scrupulous retention of both the spiritus lenis and the spiritus asper; and the aspirated ῥ is also clearly indicated by means of preaspiration; while even internal aspiration occurs, as, for example, in the frequently repeated word סנהדרין, συνέδριον. There are even some almost certain examples of the digamma, a sound peculiar to archaic Greek and to some dialects.

The vowels are not always kept intact, but are often interchanged without regard to rule. The Jewish idiom shares vowel-resolution (*e.g.*, דיומסית instead of δημόσια, where η has been resolved into ἰυ) with Syriac (*e.g.*, סטיולום, στύλος, in Bar-Bahlul) and Armenian ("Tiuros" = Τύρος). As generally in vernacular idioms, hiatus does not occur.

Semitization of Greek Words.

The omission of the hiatus, together with the frequently occurring elision of syllables by apocope, apheresis, and especially syncope, gives to the foreign word-forms a certain Semitic coloring; בולמוס for βούλιμος is more in agreement with Semitic phonetics than is the Syriac בולומוס; בורלא for βήρυλλος is more acceptable than, for instance, * בירולום would be. The other consonantal changes to which the Greek words have been subjected are such as may occur also in Greek, as, for instance, adequation, assimilation, dissimilation, metathesis, elision, prothesis, etc. In order to Semitize Greek words, new forms, analogous forms, and popular etymologies were resorted to. Especially frequent is the Hebrew ending ון; *e.g.*, נקדימון, Νικόδημος; קמפון, *campus*; but compare the Greek κάστρον for κάστρα; and in Egypt ἥμισον is found for ἥμισυ, as well as אלון (*i.e.*, ἄλλον) for ἄλλο. Compare with this, furthermore, the frequent occurrence of diminutives in -ιον, examples of which are found in the Jewish idiom that have not been preserved elsewhere.

Next in popularity among new formations was ית; hence מטרונית, מטרוניתא, occurs side by side with מטרונה, *matrona*; לונטית was used for λέντιον = *linteum*, etc. By the employment of such forms a certain Semitic coloring was given to the words. Other peculiarities of Semitic speech—*e.g.*, the Hebrew and Aramaic conjugation of verbs formed from Greek noun-stems, the employment of status emphaticus and status constructus, the addition of Hebrew and Aramaic affixes and suffixes, the plural formations, the determination of grammatical gender (though seldom according to the regular laws of the language)—all these the borrowing language had to employ in so far as it had in view the needs of actual intercourse and not academic usage. As the Jewish idiom of the Talmudic period made use of Greek words only in case of need, its laws held good for the borrowed forms, at least as far as the construction of sentences was concerned.

In addition to the forms of the words borrowed from the Greek, it is also important to determine their meanings; for some of these borrowed terms acquired in the mouth of the Jews a deeper religious and moral sense; *e.g.*, γεωμετρία, a certain norm for the interpretation of Scripture (but compare GEMAṬRIA); βῆλον, Latin *velum*, "heaven"; σχολαστικός, "teacher of the Law"; στρατηγός, "soldier" in general; σύμβολον, "covenant" and "wedding present"; τόμος, "book of the Law." The Jewish usage is sometimes supported by the Septuagint and by the New Testament; *e.g.*, κατήγωρ, "Satan"; πάνδοκος, "whore"; βλασφημία, "blasphemy." These semasiological differences justify one in speaking of a rabbinic Greek.

The Vocabulary.

Other prominent characteristics that are also found in all the popular Greek dialects are: the frequent occurrence of diminutives of material nouns in -ινός; the ending in -ικόν; combinations with ὁλο- (ὁλόχρυσος, ὁλοσηρικός, etc.); and the ending -ος instead of -ον. The Greek spoken by the Jews of Palestine was the Hellenic κοινή; although it contains also elements that are not Attic, these had become Hellenized at the time of their adoption. Some words found in rabbinical works occur elsewhere only in modern Greek.

The Greek words found in the idiom of the Talmud and the Midrash refer to all conditions of life, although, of course, there is a preponderance of political concepts that came into Palestine only with the advent of the Greeks and the Romans, and of names of foreign products introduced into the country through commerce. Some of the borrowed words refer to cosmography and geography; *e.g.*, *ἀηρ* = "air," introduced at an early date; others refer to minerals, plants, and animals; *e.g.*, *γύψος* = "gypsum"; *ἰσάτις* = a plant used for dyeing; *πάρδαλις* = "panther." Many refer to public life; *e.g.*, *ὄχλος* = "mob"; *κολωνία* = *colonia*, "colony"; *παλάτιον* = *palatium*, "palace"; *ληγᾶτον* = *legatum*, "legate"; *κῆνσος* = *census*, "census"; *σημεῖον* = "sign" or "standard." Others again refer to the house and the court; *e.g.*, *βασιλική* = "basilica"; *στόα* = "stoa," "colonnade"; others to commerce and intercourse, coins and weights; *e.g.*, *πραγματεία* = "commerce"; *carrum*, "wagon"; *δηνάριον* = "denarius"; *μόνητα* = *moneta*, "coin." There are also names of weapons, tools, vessels, raw material, furniture, food, ornaments, and jewelry. A large contingent of words refers to general culture, including literature and writing, physicians and medicines, religion and folk-lore, calendars and texts, music and the plastic arts; and, finally, there is a mass of proper names. It is estimated that more than 3,000 words borrowed from the Greek and Latin are found in the rabbinical works.

In Later Times.

After the completion of the chief works of the Midrashic and Targumic literature no new Greek words were adopted; but the words already assimilated continued to be used—of course less intelligently than formerly, thus giving rise to frequent incorrect copyings and false etymologies. The Jews preserved the knowledge of the Greek language only in those countries where Greek was spoken. Justinian's law of the year 553 ("Novellæ," No. 146, *Περὶ Ἑβραίων*) refers to the use of Greek in the liturgy. As late as the end of the Byzantine period the Book of Jonah was read in Greek at the afternoon hafṭarah of the Day of Atonement in Candia (Elijah Capsali, ed. Lattes, p. 22); the Bologna and Oxford libraries have copies of this translation, which, according to Neubauer, was made in the twelfth century for the Jews of Corfu; so far as is known, it is the oldest complete text in modern Greek. There is also a Greek translation of the Pentateuch, of which there still exist copies of the edition made by Eliezer Soncino of Constantinople in 1547, and republished by D. C. Hesseling, Leyden, 1897. This translation, in Hebrew characters, forms part of a polyglot Pentateuch, which contains a Hebrew text with a Spanish translation.

The only important Midrash or commentary to the Pentateuch that is extant from the Byzantine countries, the "Lekaḥ Ṭob" by R. Tobias b. Eliezer of Castoria (ed. S. Buber), contains many Greek words (see J. Perles in "Byzantinische Zeitschrift," ii. 570–584). The Jews of southern Italy are known to have been familiar with Greek (Grätz, "Gesch." 3d ed., vi. 238); the Sylvester disputation presupposes a knowledge of Greek as well as of Latin among the Roman Jews (Vogelstein and Rieger, "Gesch. der Juden in Rom," i. 150, note 3).

In Sicily the Jews curiously changed the meaning of *ἑτοιμασία* ("timisia") to designate a chest for the Torah (Zunz, "G. V." 2d ed., p. 247; *idem*, "Z. G." p. 522); they had officials called "sufi" (*σοφοί*) and "proti" (Güdemann, "Erziehungswesen . . . der Juden in Italien," p. 281). Liturgical poems were generally designated by the Byzantine terms "pizmon" and "darmosh" (Zunz, "S. P." pp. 5, 69b). Other Greek words used were "latreg," "alphabetarion" ("Byz. Zeit." *l.c.*), "sandek," etc. Similarly, there were Christian designations, such as "apiphyor" for "pope," and "hegmon" for "bishop" ("R. E. J." xxxiv. 218–238; compare "patriarch" in Benjamin of Tudela and in "Milḥemet Ḥobah," p. 4, Constantinople, 1710).

Shabbethai Donnolo had a Greek education, and so to a certain extent had Nathan of Rome; the author of the Ahimaaz Chronicle often refers to the Greek-speaking Jews of southern Italy. Joseph, "the Greek," translated Greek works into Arabic (Steinschneider, "Polemische und Apologetische Lit." pp. 39, 314), as did also Kilti, or Kelti (*idem*, "Hebr. Uebers." p. 499; "J. Q. R." xi. 605). It is expressly said of Jacob ha-Levi that he was conversant with the Greek language (Neubauer, "The Fifty-third Chapter of Isaiah," p. xii., note 5). Greek words are found in the works of Jacob b. Reuben (*ib.* pp. 59, 60), Judah Mosconi, and Meyuḥas b. Elijah ("Orientalistische Literaturzeitung," 1900, p. 429; "R. E. J." xli. 303); and a knowledge of Greek in general must be assumed in the case of the Jewish authors living in Greece. The Karaites also knew classical Greek—*e.g.*, Judah Hadassi (Fürst, "Gesch. des Karäerthums," i. 212)—and modern Greek, as, for example, Caleb Afendopolo in the fifteenth century. "Wise men from Greece" and single scholars with the surname "Greek" are not unfrequently mentioned by Western Jewish authors.

The Oriental and the Western Jews, on the other hand, were mostly ignorant of Greek. A gaon admitted, in regard to a Greek expression in the Talmud, that he did not know Greek (Harkavy, "Teshubot ha-Geonim," No. 47, p. 23); and "aspargon" was explained as a Persian word (*ib.* p. 374). Scholars from Greece could, however, be consulted (*ib.* No. 225, p. 105), as was done by Moses Naḥmani (B. B. 8a). Eliezer b. Elijah, who knew twelve languages, had only a smattering of Greek (Jost, "Jahrb." ii. 30). The Samaritan Abu al-Fatḥ, in the fourteenth century, also admitted that he did not know Greek ("Annales," ed. E. Vilmar, p. xc., Gotha, 1865). The statement in the Chronicle of Jerahmeel (ed. Gaster, p. 200) that Judah and half of Simeon spoke Hebrew and Greek among themselves, must either be a fable or be based on a misunderstanding.

Greek etymologies, generally false ones, are noted by Rashi, Abraham ibn Ezra, Simeon b. Ẓemaḥ Duran, Elijah Levita (in "Tishbi," *s.v.* משקיט; comp. Grünbaum, "Jüd.-Deut. Chrestomathie," p. 494), and Abraham Zacuto, as well as by other medieval authors. R. Isaac of Siponte was more successful in explaining several expressions in the Mishnah

Greek Etymologies.

in Greek; *e.g.*, Ma'as. v. 8. There were no Greek works by Jews in the Middle Ages, aside from the new translations of the Bible. But Jews read Greek authors in the original at Byzantium; *e.g.*, Asaph, who renders botanical names in Greek, and Judah Hadassi the Karaite, who quotes entire sentences from the philosophical works of the Greeks (P. Frankl, in "Monatsschrift," 1884, xxxiii. 449, 513 *et seq.*). In regard to some translations from the Middle Ages it is still doubtful whether they were made directly from the Greek text. It has by no means been proved that terms occurring in Jewish philosophical works have been borrowed from the Greek, as Steinschneider asserts ("Hebr. Uebers." p. 420, Berlin, 1893); *e.g.*, שלילה for *στέρησις*, found in Samuel ibn Tibbon, is merely a translation of the corresponding Latin or Arabic word. Although Joseph b. Abraham (Steinschneider, *l.c.* p. 453, § 267) uses Greek words, it must be assumed that he lived in the vicinity of Greece; for only Jews so situated could have been familiar with that language.

GREEK LAW, INFLUENCE OF THE. See Roman and Greek Law, Influence of the.

GREEN, AARON LEVY: English rabbi; born in London Aug., 1821; died March 11, 1883. A precocious student, at the age of fourteen he was successful as candidate for the post of reader in the Great Synagogue, and at seventeen was appointed minister of the Bristol congregation. One of his first compositions, entitled "Dr. Croly, LL.D., versus Civil and Religious Liberty," 1850, was an attack on Dr. Croly, who had opposed the admission of Jews to Parliament. In March, 1851, Green was elected second reader of the Great Synagogue, London; and when in 1855 the Old Portland Street branch synagogue was opened, Green was elected its first reader and preacher. In that capacity he made many improvements in the service of the synagogue, and for nearly thirty years cooperated in all the new movements that helped to organize the London Jewish community.

Green was a member of the council and of the education committee of the Anglo-Jewish Association, and assumed a leading part in the foundation of Jews' College, acting as honorary secretary from 1852, and for some years as chairman of the education committee. He was one of the first to arouse public interest in the Russian atrocities of 1881, and was a member of the Rumanian Mansion House and Russo-Turkish relief committees.

In religion Green was extremely liberal-minded. In 1868 he delivered a series of sermons which evoked many remonstrances; and ten years later another series by him, on "Miracles," so agitated certain circles that a movement was set on foot to denounce the preacher at public indignation meetings. He was a regular correspondent of the Jewish newspapers, and, under the pseudonym "Nemo," wrote for the "Jewish Chronicle" many severe criticisms of contemporary movements which attracted considerable attention. He collected a large and valuable library of Judaica and Hebraica, which is now in Jews' College, London.

Bibliography: *Jew. Chron.* and *Jew. World*, March 16, 1883.

J. G. L.

GREENBAUM, SAMUEL: American lawyer and jurist; born Jan. 23, 1854, in London; went to the United States with his parents in his infancy; educated at the New York public schools and the College of the City of New York, graduating in 1872. Thereafter he studied law at the Columbia College Law School until 1875, and from 1872 to 1877 was a teacher in Grammar School No. 59, New York. Then he commenced to practise law, which he did alone until 1894, when he entered into partnership with Daniel P. Hays. In May, 1901, he resumed separate practise, which he continued until he was elected judge of the Supreme Court of the State of New York Jan. 1, 1902.

Greenbaum is a member of the New York State Bar Association; the Society of Medical Jurisprudence; the Jewish Historical Society, etc. He was president of the Aguilar Free Library Association, and is first vice-president of the Educational Alliance, and trustee of the New York Public Library and of the Jewish Theological Seminary of America.

J. F. H. V.

GREENHUT, JOSEPH B.: American soldier; born in Germany. He enlisted as a private in the 12th Illinois Infantry at Chicago April, 1861. He served with this regiment throughout Grant's campaigns in Kentucky and Tennessee. At Fort Donelson, Greenhut was badly wounded in the right arm and had to retire. In Aug., 1862, he was appointed captain of Company K, 82d Illinois Infantry. He then fought in the Virginia campaigns under Burnside, Hooker, and Meade, and was at Gettysburg. He was transferred to Hecker's staff as adjutant-general, and with this command he took part in some very severe battles, notably that of Lookout Mountain. Greenhut resigned his commission on Feb. 24, 1864, and entered mercantile life. He was one of the three Illinois commissioners for monuments on the battle-field of Gettysburg.

A. A. M. F.

GREETING, FORMS OF: Fixed modes of address on meeting acquaintances. With the ancient Hebrews the form of greeting depended upon the relationship of the persons. It expressed interest and sympathy, love and affection, or reverence and honor. It included any or all of the following: inquiry regarding health; embracing and kissing; blessing; bowing; kneeling; prostration.

——**Biblical Data:** Joseph asked his brothers about their welfare (Gen. xliii. 27) when they supposed him to be a stranger. David sent a message of greeting to Nabal: "Peace be both to thee, and peace be to thine house, and peace be unto all that thou hast" (I Sam. xxv. 6). Elisha sent Gehazi when meeting the Shunammite to inquire: "Is it well with thee? is it well with thy husband? is it well with the child?" When hastening Gehazi to revive the child, Elisha told him: "Go thy way: if thou meet any man, salute him not; and if any salute thee, answer him not" (II Kings iv. 26, 29). No time could be lost in so urgent a matter.

A more intimate form of welcome was to embrace and kiss, as Laban did Jacob (Gen. xxix. 13). David and Jonathan exchanged kisses (I Sam. xx. 41). A more passionate form was to fall on the neck and cry for joy (Gen. xxxiii. 4). Kissing a female in public was apparently against the prevailing custom (Cant. viii. 1; but comp. Gen. xxix. 11). The kissing of the hand is mentioned in Job xxxi. 27 (see Kissing).

A specially reverential form of greeting was to bow toward the ground (Gen. xviii. 2). Jacob rendered homage to his brother by bowing seven times as he approached (Gen. xxxiii. 3). On meeting a prince or a king the custom was to bless him, as Melchizedek blessed Abraham, and Jacob blessed Pharaoh (Gen. xiv. 19, xlvii. 7). The angel greeted Gideon with the words: "The Lord is with thee, thou mighty man of valor" (Judges vi. 12). Boaz greeted his field-workers with: "The Lord be with you," and they answered him, "The Lord bless thee" (Ruth ii. 4; see Ber. ix. 1).

——**In Rabbinical Literature:** In the ethics of the Fathers it is said: "Be beforehand in the salutation of peace to all men" (Abot iv. 20). Greeting to Gentiles is the road leading to peace (Giṭ. v. 9). Johanan b. Zakkai anticipated in salutation those whom he met, even Gentiles on the street (Ber. 17a). R. Judah greeted the Gentiles at work by saying "Aḥaziḳu" (strength to you). R. Sheshet greeted them with "Asharta" (success). R. Kahanah said "Peace, sir" (Giṭ. 62a). The dignity of a teacher must not be lowered by greeting him or by answering his greeting in the ordinary manner. A teacher should be greeted with, "Peace to thee, my master!" His greeting should be answered by, "Peace be with thee, my master and teacher" (Ber. 27b and Rashi *ad loc.*; *ib.* 3a; comp. Shulḥan 'Aruk, Yoreh De'ah, 242, 16). R. Joshua b. Levi gives an object-lesson by relating this legend: "When Moses ascended to heaven he found the Almighty engaged in crowning the letters of the Law. Moses was silent, and God said to him: 'Bringest thou no peace from thy town?' Moses replied, 'May a servant greet his lord?' to which God rejoined, 'Even so, it was proper to wish Me success.' Then Moses said: 'And now, I beseech Thee, let the power of my Lord be great, according as Thou hast spoken'" (Shab. 89a; see Num. xiv. 17).

Moses' Greeting.

The Babylonian rabbis held, contrary to the opinion of the Palestinians, that it is improper for one person to greet another more prominent than himself before being recognized by him (Yer. Sheḳ. ii. 7).

Other rules are: "One must not send a message of greeting to a woman, unless through her husband" (B. M. 87a). One must not greet a person at night if the speaker can not be recognized (Meg. 3a). One must not greet a person in a bath-house or in a lavatory (Shab. 10b). One engaged in his work need not greet nor answer greetings. Abba Hilkiah, the grandson of Ḥoni ha-Me'aggel, being a very pious man, the rabbis sent two of their representatives to request him to pray for rain. They found him plowing in the field and greeted him, but he did not turn his face toward them. Afterward he apologized by explaining that being a laborer for hire he did not wish to waste his master's time (Ta'an. 23a, b).

Methods.

Greeting by kissing on the mouth or cheek was not approved by the rabbis. They usually kissed on the forehead. R. Akiba said he favored the custom of the Medians, who kissed only the back of the hand (Ber. 8b). 'Ula, on his return home from the rabbinical academy, kissed his sisters on the chest or bosom; according to another statement, on the hand (Shab. 13a). The wife of R. Akiba, meeting him after a prolonged absence, kissed him on the knee, as did his father-in-law Kalba Shabua' (Ket. 63a).

Prostration was deemed the most reverential form of greeting. It is related of R. Simeon b. Gamaliel that he prostrated himself in the following manner: He stuck his big toes in the ground and, bowing straight downward, kissed the earth. There was no one who could imitate this "ḳidah"; R. Levi, an athlete, who attempted to do so before Rabbi ha-Nasi, became a cripple (Suk. 53a). On taking leave of a dignitary it was the custom to take three steps backward, and to bow with each step, to right, left, and center respectively. This form is observed at the end of the "Shemoneh 'Esreh" prayer, as though the worshiper were taking leave of the Almighty King (Yoma 53b).

Formulas.

At the consecration of the New Moon, after reciting the outdoor benediction, the members of the congregation greet each other with "Shalom 'alekem," and answer "'Alekem shalom," which is the form of greeting used on returning from a journey, or when meeting a stranger. When meeting on New-Year's eve the usual greeting is: "A good year," or, "May thou be inscribed [in the Book of Life] for a good year." Late in the nineteenth century it became the custom to send to acquaintances New-Year's greeting-cards of various designs, colors, and inscriptions.

The ordinary daily greetings are: "Good morning"; "Good day" (not "Good evening," as night is ominous); "Good Shabbat"; on the eve following Sabbath, "Good week"; "Good ḥodesh" (new moon); "Good yom-ṭob" (holiday). In Jerusalem and the Orient the Sephardic custom is for men to greet each other before prayers with, "Good morning, sir," and, after prayers, with "Peace" ("Shalom"), answered by "Peace, blessing, and good" ("Shalom berakah we-ṭobah"). At night the form at parting is, "Sleep well, sir"; it is answered by, "Awake, sir, with His help and grace"; on Sabbath, "A peaceful and blessed Shabbat"; on Sabbath night, "A good and blessed week," answered by, "On you and ourselves"; on holidays, "Time of gladness," answered by, "Festivals and seasons of joy"; on intermediate holidays ("ḥol ha-mo'ed"), "Many good and sweet years," answered by, "Long life and happiness." The greetings to bride and groom and at births and on other joyful occasions is, "Mazzal ṭob" (good star, or luck), answered by, "May God let thee live to enjoy the same at thy offspring's wedding." One who has finished reading the portion of the Torah assigned to him in the synagogue, or who has delivered a lecture, is greeted with, "Strength and blessings," answered by, "Be strong and mighty" (Luncz, "Jerusalem," i. 10).

On entering a house one is greeted with, "Blessed be he that cometh." If he find the host at table he says: "Blessed be he who sits [at the table]." It will be noticed that the answer invariably differs from the greeting. This is to distinguish the saluter from the one saluted, so that one may run no risk of being considered ill-bred through leaving a greeting unanswered. See Etiquette; Precedence.

GRÉGOIRE, HENRI: Jesuit priest, politician, and advocate of the Jews; born at Vého, near Lunéville, Dec. 4, 1750; died at Paris May 28, 1831. Grégoire was a typical representative of the humanitarian ideas of the eighteenth century. Notwithstanding his Jesuit training and associations he stood consistently throughout his life for the independence of the Gallican Church, and for equal rights for all men regardless of creed and nationality. When in 1788 the Royal Society for Arts and Sciences in Metz offered a prize for the best essay on the improvement of the condition of the Jews, Grégoire wrote his famous "Sur la Régeneration Physique, Morale, et Politique des Juifs" (Metz, 1789). A year later he was elected a member of the States General, and was among those who agitated for the formation of the National Assembly, although he had been one of the clerical delegates. In the assembly he put the motion for the emancipation of the Jews ("Motion en Faveur des Juifs, par M. Grégoire, curé d'Emberménil, deputé de Nancy, precédée d'une notice historique sur les persécutions qu'ils viennent d'essuyer en divers lieux," etc.; Paris, 1789). In his somewhat theatrical style he exclaimed (Oct. 1, 1789), when a special day was given to the deliberation of the bill concerning the Jews: "Fifty thousand Frenchmen arose this morning as slaves; it depends on you whether they shall go to bed as free people."

The arguments advanced in his book in favor of the Jews are in no way original; they repeat the often-advanced statements that the Jews are not worse than the average, and that the injustice of medieval legislation was largely responsible for whatever faults are peculiar to the Jews. He therefore demanded for them full enfranchisement, including political rights. What gave special weight to Grégoire's pamphlets was the fact that he spoke as a professing Catholic and as a Catholic priest who advocated the enfranchisement of the Jews from the point of view of canonical law, and desired to prove that the Church had always been favorable to the Jews.

GREGORY I., THE GREAT: Pope from 590 to 604; born about 540; died 604. Descended from an old Roman senatorial family, he had held various high official positions when he suddenly retired to one of the cloisters which he had founded. Sent as ambassador to Constantinople by Pelagius II., on his return became an abbot, and soon afterward, when Pelagius died from the plague, he was elected pope. He materially strengthened the authority of the papal see both by his personal influence and by his adroit policy; and in many respects he determined the standards of the Catholic Church for the following centuries.

Gregory had a deep-seated aversion to Judaism, which to him was Jewish superstition ("superstitio"), depravity ("perditio"), and faithlessness ("perfidia"). He discarded the literal interpretation of the Bible which prevailed among the Jews, and designated their attacks upon Christianity as idle prattle. He forbade the literal observance of the Sabbath law, wide-spread among the Christians, on the ground that it was Jewish; and his deepest grievance against the Nestorians was that they were like the Jews. He extolled the Visigothic king Reccared for his severe measures against the Jews and for his firmness against their attempts at bribery.

Gregory was very zealous in his efforts to convert the Jews, and tried to influence them by promising a partial repeal of taxes and by offering other material support to converts. He was very emphatic against enforced baptism, however, preferring conversions brought about by gentleness and kindness. He protected the rights of the Jews, and assured to them the unhindered celebration of their feasts and the undisturbed possession of their synagogues. On the other hand, he repeatedly opposed the possession by Jews of Christian slaves. Christian slaves and those who wished to accept Christianity were to be taken away from their Jewish masters. Indeed, he earnestly begged the Frankish kings to issue a decree forbidding Jews to hold Christian slaves. He was obliged, however, to mitigate the strictness of some of his measures.

The principle of Gregory's policy in regard to the Jews is expressed in the following sentence, which was adopted by later popes as a fixed introductory formula to bulls in favor of the Jews: "Just as no freedom may be granted to the Jews in their communities to exceed the limits legally set for them, so they should in no way suffer through a violation of their rights" ("Epistolæ," vii. 25, "Sicut Judæis," etc.). Centuries later his policy toward the Jews was still designated as the standard (Jaffé, "Bibliotheca Rerum Germanarum," p. 338).

G. H. V.

GREGORY XIII. (UGO BUONCOMPAGNI): Pope from 1572 to 1585; born at Bologna Feb. 7, 1502; died at Rome April 10, 1585. His attitude toward the Jews was that of a man possessed of natural goodness warped by strong feelings of intolerance and fanaticism. Soon after his election Gregory, in spite of ecclesiastical opposition, allowed the Jews to return to Venaissin, from which they had been banished by a decree issued

Feb. 26, 1569. Like Paul III., Gregory granted (1581) safe-conduct to Jews traveling through Italy; he also repealed the prohibition against interest. By a writ issued Jan. 10, 1577, he confirmed the regulations of Clement VII. which organized the community under a council of sixty, and he sanctioned a system of communal taxation by which each member was assessed according to the degree of his prosperity.

Gregory, however, was the author of a series of bulls and ordinances of the most hostile character. He compelled (Sept. 4, 1578) the Jews of Rome to contribute 1,100 scudi toward the maintenance of the Casa dei Catecumeni (Home for Converts to Christianity); renewed (1581) the prohibition against the attendance of Jewish physicians upon Christian patients; ordered (1581) the surrender to the inquisitors of all copies of the Talmud; and commanded (1584) all Jews to listen every Saturday in their synagogues to the sermons of missionaries.

D. I. BR.

GREGORY BAR HEBRÆUS ("son of a Hebrew"), **ABU AL-FARAJ IBN HARUN:** Jacobite Syrian historian, physician, philosopher, and theologian; born at Malatia, Asiatic Turkey, 1226; died at Maragha, Persia, 1286. Gregory first studied medicine under his father, Aaron, a Jewish physician who embraced Christianity; he then devoted himself to theology and philosophy, at the same time studying other sciences. He was successively Bishop of Guba (1246), of Laḳaba (1247), and of Aleppo (1253). In 1264 he was named "mafriana," or "primate," of the eastern Jacobites, with his seat at Tekrit on the Tigris. It does not appear that, beyond his surname, Gregory showed any traces of his Jewish origin; even his works (thirty-one) give no proof that, though master of Syriac, Arabic, and perhaps of Greek, he had ever studied Hebrew. On the contrary, in the beginning of his chronicle he ascribes to such Biblical names as Noah, Jacob, etc., a Syriac origin. Nor is there anything to show that his studies were pursued under Jewish influence, though he did not entirely ignore Jewish doctrines.

Gregory was a prolific writer on theology, philosophy, ethics, history, grammar, medicine, mathematics, and astronomy. He was also a poet. Some of his works were written in Arabic, but most of them in Syriac. He was the last great Syriac writer, though he is important rather as a collector than as an independent writer. He is best known for his Syriac grammar ("Ketaba de Ṣemḥe"); his "Chronicle," in two parts, ecclesiastical and political; his "Menarat Ḳudshe," a compendium of theology, philosophy, medicine, physics, and metaphysics; and his scholia on the Old and the New Testament ("Auẓar Raze"). In the last-named he occasionally cites readings from the Samaritan text; it is interesting to note that in a scholium to II Kings xvii. 28 he says: "The law [*i.e.*, text of the Pentateuch] of the Samaritans does not agree with that of the Jews, but with the Septuagint." He occasionally cites opinions of Jews, but probably only at second hand (*e.g.*, to Ps. viii. 2, on the "Shem ha-Meforash"; comp. "Z. D. M. G." xxxii. 465). In the introduction to his commentary on Job he mentions as a writer the priest Asaph (brother of Ezra the Scribe), who identifies Job with Jobab. In speaking of the apocryphal account of the death of Isaiah, he cites "one of the Hebrew books" as authority (Nestle, "Marginalien," ii. 48).

M. SEL.—G.

GRENOBLE (גרנובלא): Capital of the department of Isère, France. It possessed a Jewish community from the end of the thirteenth century. Jacob ben Solomon, a Grenoble Jew (Zunz, "Z. G." p. 208, erroneously calls him "Isaac"), died a martyr to his faith in 1296.

When the Jews were driven out of France (1306) by Philippe le Bel, a certain number of them fled to Grenoble, where they were hospitably received by the dauphin Humbert I., who allowed them to establish banking-houses there. Two of them especially, Amyal of Tours and Morel of Amboise, obtained important privileges on paying an annual tax of 10 livres. In 1388, in consequence of numerous accusations against the Jewish bankers of the region addressed to the governor of the Dauphiné, all the Jews of the province were called together at Grenoble, and on their refusal to comply with this summons the dauphin condemned each of them to pay a silver mark annually. Further, he imposed a fine of 10,000 francs on all the Jews, for the payment of which the "maistre de la loy," Rabbi Samuel, addressed an urgent appeal to all the Jewish bankers of the Dauphiné. Among the most important of these were Moses Aaron and Samson of Yenne, residents of Grenoble. In 1396, during the dauphinal council at Grenoble, a criminal suit was instituted against three youths, Samson of Jerusalem, Crescent of Voiron, and Perret Levi, who were accused of having committed a crime against a Christian and of having blasphemed Jesus. They were condemned to pay a fine of 200 francs in gold.

On March 4, 1413, at the request of the states general of the province, the council decided that Jews should be obliged to keep their places of worship, their ovens, their wells, and their markets separate from those of the Christians. In addition, the men were required to wear as a badge a round piece of variegated cloth, placed upon the outer garment at the chest, and the women to put a distinctive token in their head-dress. It was forbidden for either men or women to appear in public or to keep their doors and windows open on Passion Sunday or during Holy Week; and they were not allowed to employ Christian servants.

During the reign of Charles VII. the Jews of Grenoble and its environs were accused of having associated with the enemies of the dauphin during his exile and of having used disrespectful language concerning him. They were therefore condemned by him to pay a fine of 1,500 crowns in gold. It was at this period that the Jews left Grenoble definitively. Only a few Israelite families now reside there (1903).

D. S. MAN.

GRILICHES, ABRAHAM AVENIROVICH: Russian engraver; born at Wilna 1852; educated at the Wilna rabbinical school; graduated from the Wilna School of Designs in 1869, and from the St. Petersburg Academy of Fine Arts in 1876, when he was appointed engraver to the Imperial Mint. He became a noted medalist. Among the medals he engraved may be mentioned those in commemoration of the deaths of Alexandra Feodorovna and Emperor Alexander II., the jubilee of Duke Nicholas Leuchtenberg, the catastrophe at the railroad station of Borki, Oct. 17, 1888, and the 200th anniversary of the 65th Infantry Regiment of Moscow.

Griliches produced on onyx portraits of Baron Horace Günzburg, the Grand Duke Vladimir, the Grand Duchess Alexandra Georgievna, the Emperor Nicholas II., Queen Louise of Denmark, Empress Alexandra Feodorovna, and Emperor Alexander II. His exhibits were awarded a gold medal at the Paris Exposition of 1900. He now (1903) holds the position of senior engraver to the Imperial Mint with the rank of aulic councilor. H. R.

GRILICHES, AVENIR GIRSCHEVICH: Russian engraver; father of Abraham Avenirovich Griliches; born at Wilna April, 1822. Until the age of sixteen he studied the Talmud, and later, without the aid of a teacher, became an engraver. In 1871 he was employed as an engraver by the Imperial Mint of St. Petersburg; three years later his portrait of Levensohn, engraved on rock-crystal, won him a nomination to the St. Petersburg Academy of Fine Arts; in the same year he was appointed engraver to the Imperial Mint. He soon gained a wide reputation, and is now considered one of the best engravers in Russia. Among his engravings may be mentioned the state seals of the emperors Alexander III. and Nicholas II.

Avenir holds the rank of court councilor, and was decorated with the Order of St. Stanislas, second class. H. R.

GRODNO: Russian city; capital of the government of the same name; formerly one of the chief cities of Lithuania and, later, of Poland. It had a Jewish community about the middle of the fourteenth century, for in the "Privilege" granted to the Jews of Grodno by Grand Duke Vitold of Lithuania, dated Lutsk, June 18, 1389 (document No. 2 in Bershadski's "Russko-Yevreiski Arkhiv"), it is seen that the Jews occupied at that time a considerable area in the city, that they owned land and houses, and had a synagogue and a cemetery. This important document, which was later confirmed by Sigismund August (1547), by John Casimir (1655), and by Stanislas August Poniatowski (1785), is, with one exception, the oldest one extant relating to the history of the Jews in Lithuania. It confirms the Jews in all their possessions and rights; permits them to engage in all business pursuits and occupations; exempts the synagogue and the cemetery from taxation; and ends by conferring on the Jews "all rights, liberties, and privileges given to our Jews of Brest" in the preceding year. The Jews, who were thus practically enjoying equal rights with the other inhabitants, apparently lived undisturbed, even after Casimir Jagellon in 1444 granted the city its independence in the form of the "Magdeburg Law." Jews continued to farm the taxes and to own real estate until their unexpected expulsion by Alexander Jagellon in 1495.

Expulsion and Return.

The estates and houses owned by Jews were then given by the grand duke to his favorites, but they were soon reclaimed. The decree issued by Alexander Jagellon when he became King of Poland, permitting the Jews to return to Lithuania, is dated March 22, 1503. It is issued to two Jews from Grodno, Lazar Moisheyevich (styled "our factor") and Isaac Faishevich, and permits all Jews who had been expelled to return to Grodno and once again enter into possession of their estates (*ib.* No. 39). A decree by Alexander, dated April, 1503, in which the Jews of Grodno are especially mentioned, again orders that everything formerly belonging to Jews which had been sequestrated for gifts must be returned to them, and that all the debts owing to them must be paid; and four years later (Nov. 3, 1507; *ib.* No. 50) an edict again decrees that whatever belonged to the Jews of Grodno before their expulsion must be returned to them. In 1525 the king confirmed the right of Judah Bogdanovich to land in the district of Grodno which his father Bogdan had acquired before the expulsion. The same subject is referred to in another document (*ib.* Nos. 94, 100).

In a decision rendered by Queen Bona (Sforza), dated May 22, 1549, the following regulations, modifying and defining the rights of the Jewish community of Grodno, are introduced: (1) Jews are to pay 17 per cent of the taxes the government assessed against the city; (2) they are freed from some special taxes paid in kind; (3) houses and lands formerly bought by Jews from citizens are freed from citizens' taxes; those bought by citizens from Jews are freed from Jewish taxes. But thenceforth no Jew may buy a house from a citizen without special royal permission (*ib.* No. 352).

The first rabbi and the first quarrel in the community of Grodno date from the year 1549. It seems that the influential Judich family had forced on the community as rabbi a relative of the name of Mordecai. Queen Bona, on Oct. 28 of that year, ordered her governor Kimbar to assemble the Jews

The First Rabbi.

of Grodno to elect a rabbi who was no relative to the Judichs, and decreed that in case this could not be done without opposition, the opponents of the Judichs were to elect a separate rabbi with the same rights and privileges as enjoyed by the one chosen by that family. Another decree, dated Nov. 8 of that year, deals with the trouble caused because the Jews would not permit Rabbi Mordecai to officiate in the synagogue (*ib.* Nos. 353–354). The name of Rabbi Moses b. Aaron, Mordecai's rival, has also been preserved.

After the Union of Lublin (1569), when Lithuania became part of Poland, Grodno shared the general decline of that unhappy kingdom. It flourished again under King Stephen Bathori (1576–86), who was the friend of the Jews who resided there; and the great synagogue, which was destroyed by fire Aug. 3, 1599, was erected at that period. The arrival of the Jesuits in 1616 marks the beginning of oppressive measures and exactions, and frequent recurrences of blood accusations. Grodno was saved from the devastation and massacres of the first Cossack war in 1648–49, but suffered terribly in 1655, when it was taken by the Russians and held two years; and its lot was not improved during the four years following, when it was held by the Swedes. The community was impoverished and sunk heavily in debt, from which it has not been freed even to this day. From 1703 to 1708 Grodno was held by Charles XII. of Sweden, and the Jews suffered as they always suffered in times of war and disorder. Jews did not share in the benefit Grodno derived from the administration of the starost Anton Tiesenhaus (1762–85), who made an effort to revive the commerce and industry of the decaying city. He was hostile to the Jews, and when he became bankrupt his indebtedness to the Jewish community, representing only a part of the money which he had extorted from it, was declared by a court to be over 34,000 rubles. Two of his estates in the district of Pinsk were given to the "kahal" of Grodno in lieu of the debt, but they were confiscated on a technicality by the Russian government in 1795.

Murder Accusations.

The last tragedy in Grodno of which there is record occurred on the second day of Pentecost, May 20, 1790, when Eleazar b. Solomon of Wirballen was quartered for the alleged murder of a Christian girl. The king refused to sign the death-warrant, being convinced of the man's innocence, but could not prevent the execution. A ritual murder trial is also known to have occurred there in 1820, but the details have not been preserved. Grodno came under the dominion of Russia in 1795. The most important event in its recent history is the disastrous conflagration of 1885, when about half of the city was destroyed.

A complete list of the Jewish inhabitants of Grodno in 1560 is reproduced in the above-mentioned "Arkhiv" (ii.). It includes the names of about sixty Jews, who lived mostly in the "Jewish street" and in the "Jewish School street." It also gives the location of the Jewish hospital, which was then on "Plebanski street." The total number of houses in Grodno at that time was 543; if figured at one family for each house, this would make the Jewish population about 10 per cent of the inhabitants. The "Russian Encyclopedia" (*s.v.*), which gives for the second half of the sixteenth century 56 Jewish houses out of a total of 712, makes the proportion still smaller. But the Jewish population increased in the following two centuries much faster than the Christian, and of the 4,000 inhabitants in 1793 a majority were Jews. The increase went on under Russian rule, and in 1816 the city had 8,422 Jewish, and only 1,451 non-Jewish, inhabitants. In 1890 there were 29,779 Jews in a total population of 49,952, and in 1897 about 25,000 Jews in a total population of 46,871.

Rabbis.

The rabbinate of Grodno was next in importance to that of Brest-Litovsk, and in the records of the council of Lithuania the rabbi of Brest-Litovsk always signed first and the rabbi of Grodno second. Rabbis **Mordecai** and **Moses ben Aaron,** who are known only through records of litigation, were followed by an eminent rabbinical authority, **Nathan Spira Ashkenazi** (d. 1577), author of "Mebo She'arim." He was succeeded by **Mordecai Jaffe,** author of the "Lebushim," who is known to have been in Grodno during the reign of Stephen Bathori. When he left Grodno is not known, and the date of the rabbinate of his successor, **Judah,** who is known only from the mention made of him in contemporary responsa, is also somewhat uncertain. The next rabbi was **Ephraim Solomon Shor,** author of "Tebu'ot Shor" (d. 1614). He was succeeded by **Abraham b. Meïr ha-Levi Epstein,** who left Grodno in 1634 to become rabbi of Brest-Litovsk. **Isaac b. Abraham** is known to have been rabbi of Grodno in 1634–44, but part of that time **Joshua b. Joseph,** author of "Maginne Shelomoh," later of Lemberg and Cracow, was also in Grodno, before he went to Tikotzyn. **Jonah b. Isaiah Teomim,** author of "Ḳiḳayon de-Yonah," was rabbi in 1644–55, when he left Poland, dying in Metz in 1669, aged 73. **Moses Spira,** son of R. Nathan, author of "Megalleh 'Amuḳot," and great-grandson of the above-named Nathan Spira, was rabbi after 1655, and **Judah b. Benjamin Wolf of Troppau** held that position about 1664. **Ḥaika b. Samuel Hurwitz** was rabbi from 1667 to 1673, and was followed by **Moses Ẓebi,** author of "Tif'eret le-Mosheh," who died in 1681. His successor, **Mordecai Süsskind Rothenberg,** remained in Grodno until 1691, when he went to Lublin. **Simḥah b. Naḥman Rapoport,** formerly of Dubno, who succeeded Mordecai, held the position for nearly a quarter of a century until he too became rabbi of Lublin (about 1714). **Baruch Kahana Rapoport** was called from Fürth to assume the rabbinate of Grodno, but he preferred the "small rabbinate" of the German town and soon returned there. **Aryeh Löb b. Nathan Nata of Slutsk** (d. 1729) became rabbi of Grodno in 1720, and was succeeded by his son **Zechariah Mendel** (d. 1746, aged 39). **Jehiel Margaliot** (d. 1751), a disciple of Israel Ba'al Shem, became rabbi. He was followed by **Moses Joshua Hurwitz.** The latter's successor, **Benjamin Braudo (Broda)** (d. 1818, aged 73), was the last rabbi of Grodno, the office being then abolished, as was the case in Wilna, as the result of quarrels between two factions of the community.

Scholars, etc.

Among the rabbinical scholars and other eminent Jews of Grodno were: Elhanan Berliner, who corresponded with Ẓebi Ashkenazi early in the eighteenth century; Elisha b. Abraham, author of "Ḳab we-Naḳi," on the Mishnah, and of "Pi Shenayim," on Zera'im, who died at an advanced age in 1749; Alexander Süsskind, the author of "Yesod we-Shoresh ha-'Abodah"; Daniel b. Jacob, who was a dayyan or "moreh ẓedeḳ" for forty years, and died in 1807; Joseph Jozel Rubinovich, physician and favorite of King Poniatowski, died 1810; Simḥah b. Mordecai, who was head of a yeshibah and died in 1813; his son Hillel, who was a son-in-law of R. Ḥayyim of Volozhin and died in 1833; Tanḥum, the son of Rabbi Eliezer of Urle, who was a candidate for the rabbinate, was "rosh bet-din," and became the rival to some extent of R. Benjamin Braudo, mentioned above; his name is signed first on the record of the convention held in Wilna in 1818 for the purpose of selecting delegates to St. Petersburg; Sundel Sonenberg, head of the delegation referred to above, died 1853; Jacob b. Moses Frumkin, died in Grodno 1872. Eliezer Bregman and his son Shabbethai are among the prominent citizens of Grodno, as are the Epsteins, the Neches, and the Ratners.

The best-known Hebrew writers in the city of Grodno were: Meïr Ostrinski, Menahem Bendetson, Israel David Miller, Abraham Shalom Friedberg, the poet Issachar Baer Hurwitz, Samuel Yevnin, Isaac Andres, Simon Friedenstein (the historian of the Grodno community), and Hirsch Ratner. Hurwitz, the translator of the Siddur into Russian, was the city's "government rabbi" in the seventies. He was succeeded by Moses Kotkind, who in his turn was followed by Shemariah Lewin. Among the five "more hora'ah," R. Eliakim Shapira, and R. Wolf, a son-in-law of R. Naḥum, are the best known.

The Jewish community of Grodno is one of the poorest in Russia. There is little industry, and a large percentage of the business establishments is conducted by women. It has the usual number of educational and charitable institutions, two Talmud Torahs (the older one having a trade-school as an adjunct), a gemilut ḥasadim, a "Volksküche" for the poor, and a similar institution to provide kasher food for Jewish soldiers. There is also an older trade-school founded by Samuel Lapin. In addition to the government school there are (1903) an excellent private school conducted by B. Shapira, and a modern ḥeder founded by the Zionists, who have recently developed great activity in communal work.

——**Typography:** Baruch b. Menahem, a bookdealer, established a Hebrew printing-press in Grodno, the first in Lithuania, in 1789. Ten years later he removed to Wilna, where he died in 1803. The establishment was inherited by his son Menahem Man Romm, who in 1835 commenced, in partnership with Simḥah Zimmel of Grodno, to publish a new edition of the Talmud. The first few volumes bear the imprint of Wilna-Grodno, but in 1837 the business was removed to Wilna, and, under the management of the Romm family, became one of the largest of its kind in the world. P. Wi.

The following is a list of the Jewish agricultural colonies in the government of Grodno, from "Selsko-Khazaistvenny Kalendar Dlya Yevreyev Kolonistov" (ii. 231, Wilna, 1902):

District.	Name of Settlement.	Tenure.	No. of Families.	No. of Persons.	Land in Deciatines.

GRONEMANN, SELIG: German rabbi; born at Flötenstein, West Prussia, Dec. 7, 1843; attended the gymnasium at Konitz and the seminary and university at Breslau; became rabbi at Strasburg (1872) and at Danzig (1878), and district rabbi of Hanover (1884). His works include: "De Profiatii Durani (Ephodæi) Vita et Studiis," inaugural dissertation (Breslau, 1869); "Die Jonathan'sche Pentateuchübersetzung in Ihrem Verhältnisse zur Halacha" (Leipsic, 1879); "Zibḥe Shelamin: Die Vorschriften über das Schächten und die Untersuchung der Lunge von R. Jakob Beck, Neu Herausgegeben, Durch Zusätze Ergänzt und mit einer Deutschen Bearbeitung Versehen" (Frankfort-on-the-Main, 1899). He also contributed to Frankel's "Monatsschrift" and Rahmer's "Familienblatt," and published some sermons in the latter's "Predigt-Magazin." Gronemann is (1903) a member of the Central Committee of the German Zionist organization.

G. M. K.

GROSS, CHARLES: American author; born at Troy, N. Y., Feb. 10, 1857; educated at the Troy High School; at Williams College, from which he received the degree of M.A.; and at the universities of Paris, Berlin, and Göttingen, receiving from the last-named the Ph.D. degree for his study on the "Gilda Mercatoria." He is also an honorary M.A. of Harvard, in which university he has held a professorship of history since 1888. Gross has shown great originality and industry as an investigator in medieval and English history, in which field he has written the following: "Gild Merchant," 2 vols., 1890; "Select Cases from the Coroners' Rolls," 1896 (for the Selden Society); "Bibliography of British Municipal History," 1897; "Sources and Literature of English History," 1900; "The Early History of the Ballot in England," in "Political Science Quarterly," 1898; "Modes of Trial in the Medieval Boroughs of England" (Harvard Law Series, May, 1902). Gross lectured at the Anglo-Jewish Exhibition of 1887 on "Exchequer of the Jews in England in the Middle Ages," this lecture being a valuable contribution both to English and to Jewish history. He translated into English Kayserling's "Christopher

Columbus," New York, 1893. He is a vice-president of the American Jewish Historical Society, and a member of the publication committee of the Jewish Publication Society of America.

A.

GROSS, FERDINAND: Austrian writer; born in Vienna April 8, 1849; died at Kaltenleutgeben, near Vienna, Dec. 21, 1900. His ancestors lived in Italy; his father emigrated from Padua to Hungary, and went from there to Vienna. Ferdinand began his literary activity when a boy of fifteen. He joined the editorial staff of the "Extrablatt" in 1872, and in 1877 won the first prize of the Berliner Literarisches Centralbureau for his feuilleton "Litterarische Zukunftsmusik." In 1879 he went to Frankfort-on-the-Main to become feuilleton editor of the "Frankfurter Zeitung." In 1881 Gross returned to Vienna and joined the editorial staff of the "Wiener Allgemeine Zeitung." For a time he was the feuilletonist of the "Neue Wiener Tageblatt," and editor of the "Extra-Post." He was president of the Concordia, an association of Vienna journalists, from 1898 until 1900. Among his works are the following: "Geheimnisse," one-act comedietta, Vienna, 1877; "Kleine Münze," sketches, Breslau, 1878; "Oberammergauer Passionsbriefe," *ib.* 1880, new ed. 1900; "Nichtig und Flüchtig," sketches, Leipsic, 1880; "Die Neuen Journalisten," comedy, with Max Nordau, Leipsic, 1880; "Mit dem Bleistift," sketches, Breslau, 1881; "Der Erste Brief," comedy, Vienna, 1883; "Heut und Gestern" and "Aus der Bücherei," Vienna, 1883; "Blätter im Winde," Vienna, 1884 (2d ed., 1888); "Aus Meinem Wiener Winkel," Leipsic, 1885; "Lieder aus dem Gebirge," Vienna, 1885; "Litterarische Modelle," Berlin, 1887; "Gedichte," 1887; "Goethe's Werther in Frankreich"; "Was die Bücherei Erzählt," Leipsic, 1889; "Zum Nachtisch," Leipsic, 1889. In 1891 Gross began his editorial connection with the "Wiener Fremdenblatt," and on Dec. 21 of the same year his adaptation of Daudet's "L'Obstacle" was produced at the Hofburg Theater. In 1892 another collection of stories and sketches, "Im Vorbeigehen," was published at Leipsic, and his drama, "Um Drei Uhr," was produced. His later works are: "Augenblicksbilder" and "Ungebunden," Vienna, 1895; "Blätter im Walde," Leipsic, 1896; "Wer Ist Frei von Schuld?" (one-act sketch), 1896; "In Lachen und Lächeln," Stuttgart, 1898; "Von den Leichten Seiten," Leipsic, 1900.

GROSS, HEINRICH: German rabbi; born at Szenicz, Hungary, Nov. 6, 1835; pupil in rabbinical literature of Judah Aszod. After graduating from the Breslau seminary and from the University of Halle (Ph.D. 1866; his thesis on Leibnitz obtaining the university prize), he was engaged as private teacher by Baron Horace Günzburg at Paris. During a residence of two years in that city Gross collected in the Bibliothèque Nationale the material for his great work "Gallia Judaica." In 1869 he went to Berlin, where he associated much with Zunz, whose methods of research he admired and adopted. In 1870 he was called to the rabbinate of Gross-Strelitz, Silesia; and since 1875 he has occupied the rabbinate of Augsburg.

Gross's activity in the domain of literary history, especially of that of the French Jews of the Middle Ages, has been very extensive. His "Gallia Judaica" (Paris, 1897), which deals with the medieval geography and literary history of the Jews of France, has become a standard work. Gross has also enriched the Jewish scientific periodicals with many valuable contributions, which of themselves constitute important works. Of these the most noteworthy are: "Abraham ben David aus Posquières, ein Literarhistorischer Versuch," in "Monatsschrift," 1873–74; "Zur Gesch. der Juden in Arles," *ib.* 1878, 1879, 1880; "Eliezer ben Joel ha-Levi, ein Literarhistorischer Versuch," *ib.* 1885, 1886; "Jehudah Sir Leon aus Paris: Analekten," in "Magazin," 1877, 1878, iv. 174, v. 179; "Etude sur Simson ben Abraham de Sens," in "R. E. J." 1883.

Gross is also the author of "Lehrbuch der Israelitischen Religion für die Oberen Klassen der Mittelschulen."

s. I. Br.

GROSS, JENNY: Austrian actress; born at Szanto, Hungary. Educated for the stage by Cesarina Kupfer, she made her début in 1878 at the Carltheater at Vienna; in 1880 she appeared at the Stadttheater, and in 1885 at the Berlin court theater, from which she went in 1889 to the Lessings Theater, where she is at present (1903) engaged. Her rôles include: *Madame Sans Gêne*, *Komtesse Guckerl*, *Niobe*, *Josephine*, *Sonja* in "Raskolnikow," *Wolfgang* in "Königsleutnant," *Jeanne* in "Die Welt in der Man sich Langweilt," *Marianne* in "Die Geschwister," *Emire* in "Tartüffe," and the well-known women in Shakespeare.

GROSS-KANIZSA. See Nagy-Kanizsa.

GROSSER, JULIUS: German physician; born at Freistadt, Prussian Silesia, Oct. 25, 1835; died at Prenzlau, Prussia, Oct. 25, 1901. He studied at the University of Berlin, where he graduated in 1859 as doctor of medicine. In 1861 he established a practise in Prenzlau. He served through the Franco-Prussian war in the capacity of surgeon, and was decorated with the Iron Cross. In 1880 he founded the "Deutsche Medizinal-Zeitung," which he edited until his death, contributing many articles to this and other medical journals.

GROSSMAN, RUDOLPH: American rabbi; born at Vienna, Austria, July 24, 1867; B.L., University of Cincinnati, Ohio, and Rabbi and D.D., Hebrew Union College, Cincinnati. Grossman was associate rabbi of Temple Beth-El, New York, from 1889 to 1896, and since the latter year he has been rabbi of Temple Rodef Sholom, in the same city. He was corresponding secretary of the Central Conference of American Rabbis (1902), and has written a number of essays for Jewish and other magazines. He was grand chaplain of the grand lodge of the Masonic Order, New York (1898–1900). A.

GROSSMANN, IGNACZ: Hungarian physicist; born in Göncz-Ruszka, Abauj county, Feb. 16, 1823; died in Budapest May 21, 1866. He attended the University of Prague, devoting himself especially to mathematics and pedagogics. From 1847 to 1851 he was a teacher in Györ-Sziget; for the two following years he attended the Josef technical school in Budapest, and in 1854 he was appointed principal of the girls' school of the Pester Israelitische Religionsgemeinde.

In 1857 Grossmann was called to a professorship in the commercial school, where he remained until 1862, when he was made engineer of the Pest-Losoncz-Zólyom Railroad Company. Grossmann was the actual inventor of the mercurial pneumatic pump. In 1854 he discovered a new method of gasometer construction. He wrote "Führer in der Geometrischen Analyse der Krystallographie," Leipsic, 1857.

s. M. W.

GROSSMANN, IGNAZ: American rabbi; born at Trencsen, Hungary, July 30, 1825; died March 18, 1897, in New York city. He received his education at the yeshibah of Presburg, and in 1863 was called as rabbi to Koritschan, Moravia, which position he in 1866 changed for that at Warasdin, Croatia. In 1873 he was called to Brooklyn, N. Y., where he officiated in the Congregation Beth Elohim, and later in the Congregation B'nai Abraham. He wrote: "Drei Predigten," Warasdin, 1868; "Die Sprache der Wahrheit," *ib.* 1870; "Mikraot Ḳetannot," Cincinnati, 1892. The last work is a presentation of the 613 commandments with their Biblical bases, their rabbinical definitions, and their moral lessons. He also contributed very frequently to "Deborah." Of his sons, Louis Grossmann, in Cincinnati, Ohio; Rudolph Grossman, in New York city; and Julius Grossmann, in Ipolysagh, Hungary, are rabbis.

Bibliography: *Deborah*, April 1, 1897.

s. D.

GROSSMANN, LOUIS: American rabbi and author; born at Vienna, Austria, Feb. 24, 1863; educated at the University of Cincinnati (B.A.) and at the Hebrew Union College (D.D.). Grossmann is descended from a family of rabbis. In 1884 he became rabbi of the Temple Beth El at Detroit, Michigan, retaining this office until 1898. He then succeeded Isaac M. Wise as rabbi of the Congregation B'nai Yeshurun at Cincinnati, and also as professor of theology at the Hebrew Union College. Grossmann is the author of the following: "Judaism and the Science of Religion," New York and London, 1889; "Maimonides," New York and London, 1890; "Hymns, Prayers, and Responses," Detroit, 1892; "The Jewish Pulpit," Detroit, 1894; "Isaac M. Wise, His Life and Writings," Cincinnati, 1900. He has also contributed to Jewish periodicals. A.

GROSSMANN, LUDWIG: Austrian mathematician and political economist; born at Leitomischl, Bohemia, March 14, 1854. As a boy he showed unusual aptitude for physics and mathematics; and he continued his studies in these branches at the University of Vienna, graduating as doctor of philosophy in 1878. In the same year he founded and edited the "Mathematisch-Physikalische Zeitschrift" at Vienna. He is the discoverer of the mathematical analytical curve of the probable length of the age of man. Grossmann has devoted himself largely to literary work, and is an active opponent of anti-Semitism. He is now (1903) a resident of Vienna, and editor of the "Controlle," a journal devoted to political economy.

Of Grossmann's works may be mentioned: "Die Mathematik im Dienste der Nationalökonomie," Vienna, 1886–1900; "Allgemeine Integration der Linearen Differentialgleichungen Höherer Ordnung," Leipsic, 1889–91; "Compendium der Praktischen Volkswirthschaft und Ihrer Mathematischen Disciplinen," Vienna, 1892–1903.

s. F. T. H.

GROSSWARDEIN (NAGY-VARAD): Hungarian city, with a population of 51,000, about one-fourth of whom are Jews. The ḥebra ḳaddisha was founded in 1735, the first synagogue in 1803, and the first communal school in 1839. The old Jewish quarter, known as the "Katona Város," is in the neighborhood of the fort. It still bears its ancient aspect and is still occupied mainly by Jews. The old synagogue remains, though no longer used for worship. The Jewish hospital also stands there. Not until the beginning of the nineteenth century were Jews permitted to do business in any other part of the city, and even then they were required to withdraw at nightfall to their own quarter. In 1835 permission to live at will in any part of the city was granted them.

The Jewish community of Grosswardein is divided into an Orthodox and a Reform congregation. While the members of the Reform congregation still retain their membership in the ḥebra ḳaddisha, they have used a cemetery of their own since 1899. The Jews of Grosswardein have won prominence in the public life of the city; there are Jewish manufacturers, merchants, lawyers, physicians, and farmers; the present chief of police (1902) is a Jew; and in the municipal council the Jewish element is proportionately represented. The community possesses, in addition to the hospital and ḥebra ḳaddisha already mentioned, a Jewish women's association, a grammar-school, an industrial school for boys and girls, a yeshibah, a soup-kitchen, etc.

The following are among those who have held the rabbinate of Grosswardein: **Joseph Rosenfeld** (Orthodox); **David Joseph Wahrmann** (Orthodox); **Aaron Landesberg** (Orthodox); **Moricz Fuchs** (Orthodox: still officiating, 1903); **Alexander Rosenberg** (Reform: removed to Arad); **Alexander Kohut** (Reform: removed to New York, 1885; died, 1894); **Leopold Kecskeméty** (Reform: still officiating, 1903).

D. G. Ke.

GROTIUS, HUGO (HUIG VAN GROOT): Dutch Christian diplomat, theologian, and scholar; born at Delft, Holland, April 10, 1583; died at Rostock, Germany, Aug. 28, 1645. In the religious combat between the Gomarists and Arminians Grotius was a follower of Arminius. When in 1619 the Arminians were thrown into prison, he was sentenced to imprisonment for life, and escaped in 1621 only through a stratagem of his wife. He believed all his life in the doctrines of Arminius, and expounded his master's views in his religious writings, which were collected after his death in his "Opera Omnia Theologica," Amsterdam, 1679.

In 1644 appeared in Paris in three volumes his "Annotationes in Vetus Testamentum," including the Apocrypha (ed. Döderlein, Halle, 1775-76). This great work was at first read by the Arminians only; but it soon became well known through its philological-historical character.

In the course of his religious researches Grotius, through Isaac Vossius, became acquainted with Manasseh ben Israel. He corresponded with Manasseh, asking many questions concerning the Hebrew language, literature, and interpretation of the Old Testament. Manasseh answered his inquiries, and the two exchanged many letters.

Not being a theologian proper, Grotius was not bound by any dogmatic views; and his explanations of sentences and phrases are consequently based entirely upon the original text itself. The Jewish exegetes became known to Grotius through Manasseh ben Israel; and he frequently cites and follows them in his annotations. He often mentions that the Hebrew scholars explain a sentence as he does; and even where he differs from them he gives their views. It was a favorite accusation against Grotius' commentary that he Judaized, or followed Jewish rather than Christian methods of exegesis. It is possible that Grotius knew of Manasseh's plan to induce Queen Christina of Sweden to open north Scandinavia to the Jews, as he was Swedish ambassador at Paris from 1635 to 1645.

Grotius highly esteemed Manasseh, whom he compares with Ibn Ezra, Maimonides, and Abravanel. He studied his works, and was much impressed by them. Especially was Manasseh's "Conciliador" (Amsterdam, 1641) admired by Grotius. In a letter to Manasseh he says: "I implore you to spend all your spare time in explaining the Law. You will do a great favor to all scholars" ("Grotii Epistolæ," No. 564, Amsterdam, 1687). Again, in a letter to Vossius under date of Oct. 30, 1638: "Manasseh, whom I wish well, is a man of great usefulness to the state and to science" (*ib.* No. 476). Writing from Paris, he says: "His books, which I know, are much read and highly thought of here."

E. C. F. T. H.

GROVES AND SACRED TREES: By many Oriental as well as Occidental peoples, whether of Semitic or non-Semitic stock, groves and single trees (oaks, terebinths, tamarisks, palms, etc.) were regarded and revered as favorite abodes of the gods, and were therefore set aside for worship and marked by the erection of altars in, under, or near them. Behind this conception was the belief, wide-spread among primitive races, that trees were animated (see Mannhardt, "Die Wald- und Feldkulte"). Modified, this idea reappears in the form in which the trees are held to be the dwellings, and groves the haunts, of benevolent or malevolent spirits and deities. Moreover, trees were suggestive of fertility, of life, and (in winter) of death. This induced their worship as visible manifestations of the secret powers of nature controlling generation and decay.

Among the Hebrews, also, this notion seems to have prevailed in remote times. At all events, groves and trees are found connected with theophanies (Gen. xii. 6 [A. V. 7]), and with the giving of judgment—that is, the oracular consultation of the deity (Judges iv. 5; I Sam. xxii. 6).

Trysting-Trees.

The Hebrew "elon" and "eshel," denoting the oak and tamarisk respectively, are mentioned as groves, or perhaps in stricter accuracy as single trees, where Yhwh revealed Himself (Gen. xii. 6 [A. V. 7], xxi. 33); more definitely described as "elon moreh" (= "oak of the revealing oracle"; "moreh" from the root ירה, whence also "Torah"; but see Barth, "Etymologische Studien," pp. 13-14); sometimes in the plural "elone moreh" (Deut. xi. 30); also "elone mamre" (Gen. xiii. 18, xiv. 13, xviii. 1). "Elah" (Isa. i. 30), "allah" (Josh. xxiv. 26), "allon" (Gen. xxxv. 8), "tomer" (Judges iv. 5), and "rimmon" (I Sam. xiv. 2) occur in connections indicating that trees which were regarded as sacred, either in groves or singly, are meant. Under such sacred trees treaties were solemnly confirmed (Judges ix. 6), sacrifices were offered (*ib.* vi. 11), and, as stated above, judgments were rendered (*ib.* iv. 5). The sound made by the trees is mentioned as an auspicious omen (II Sam. v. 24; comp. Gen. xii. 6; Judges ix. 37). Yhwh is described as dwelling in the (burning) bush (Deut. xxxiii. 16; comp. Ex. iii. 1-6). Joshua erects a memorial stone underneath an oak "that was by the sanctuary of Yhwh" (Josh. xxiv. 26). Among the Patriarchs, Abraham is more especially brought into relations with such groves or sacred trees (Gen. xiii. 18, xviii. 1, xxi. 33).

The opposition evinced by the Later Prophets to such groves and trees confirms the theory that originally they were connected with the cult of the deities presiding over the generative processes of nature. These deities and their worship (see Baalim and comp. Deut. xii. 2) were dominant factors in the Canaanitish religion, the "high hills" and "green trees" being characteristically identified with the corrupt practises of the Israelites' neighbors and symbolic of their pernicious influence upon the people of Yhwh (I Kings xiv. 23; II Kings xvi. 4, xvii. 10; II Chron. xxviii. 4; Isa. lvii. 5; Jer. ii. 20; iii. 6, 13; xvii. 2; Ezek. vi. 13, xx. 28; Hosea iv. 13). The "gardens," which are also mentioned with disapproval, served similar purposes and for the same reasons (Isa. i. 29, lxv. 3, lxvi. 17).

The Asherah—usually (following LXX. and the Vulgate) rendered "grove" or, when in the plural, "groves" ("asherim"; I Kings xiv. 23; II Kings xvii. 10; Jer. xvii. 2), as even the context might have suggested, it not being likely that a "grove" would be "under every green tree"—modern scholars acknowledge to have been pillars or stakes, imitations of trees, probably trunks of trees "planted," *i.e.*, fixed into the ground, near the altars, and thus symbols of the deity, Baal or Asherah; perhaps even in their form suggestive of the obscene lasciviousness of the Canaanitish cult (Deut. vii. 5, xvi. 21; Judges vi. 28, 30; I Kings xv. 13; II Kings xvii. 10, xxiii. 14; Micah v. 12; Hosea iii. 4). The goddess Asherah was not identical with

Astarte, as Stade ("Gesch. des Volkes Israel," i. 460) contends, but was originally a tree-goddess, while Astarte was a sidereal deity. They had many traits in common, however.

The Asherah tree or pillar had many forms, ranging from a real tree through various imitations of parts of the tree to anthropomorphic suggestions (see Max Ohnefalsch-Richter, "Kypros, die Bibel und Homer," 1893, plates lxix.; lxxv., Nos. 1, 3, 5, lxxxiii., No. 20a, b). Compare ASHERAH.

Robertson Smith, *Rel. of Sem.* 2d ed., 1894, s.v. *Trees*.

E. G. H.

GROWTH OF THE BODY: From the studies of Majer for Galicia, Weissenberg for South Russia, Sack for Moscow, and Yashchinsky for Poland, which give uniform results, it is found that Jewish children grow very rapidly up to the age of six, whereas usually development slackens at four; from six to eleven growth is slower; from eleven to sixteen the body again increases rapidly, when growth again becomes slower, but still continues up to the age of thirty. At this age the maximum height is attained, whereas with Germans this height is reached at the age of twenty-three (Gould). At forty the body begins to decline and grow shorter. This is seen from the figures in the table, and in the diagram representing graphically the process of growth of Jewish children in South Russia and in Moscow, given by Weissenberg ("Die Südrussischen Juden," p. 17).

GROWTH OF THE BODY.

Age.	Jews of South Russia (Weissenberg).		Jews of Central Russia (Sack).		Jews of Poland (Elkind).

51 and over	1,636	−6			1,606	−11

Sack compared the stature of Jewish school-children in Moscow with that of non-Jewish children attending the same schools. He found that the Jewish children were shorter. But Yashchinsky, who took measurements of Jewish and non-Jewish school-children in Warsaw, Poland, found the contrary. According to his investigations the Jews are taller than the Poles between the ages of twelve and seventeen notwithstanding the known fact that adult Poles are taller than adult Jews.

In so far as Bavaria is concerned Ranke ("Körpergrösse in Bayern: Beiträge zur Anthropologie Bayerns," iv.) has shown that the stature is lowest in those parts of the kingdom in which the infantile mortality is highest.

From measurements taken by Fishberg from Jewish school-children in New York city, it appears that those born in the United States grow faster, and at maturity attain a greater stature, than those born in Europe. There are two reasons for this phenomenon. First, the Jewish child in America is brought up amid better sanitary and hygienic surroundings; it is better nurtured, and the unhealthy ḥeder is replaced by modern hygienic public schools. The second and more important reason is that there is a process of selection at work. The stature of the Jewish immigrant to America is greater than the average of those left at home. This is a fact observed also among the immigrants of other races. It is the strongest physically who venture to change their place of abode. These taller Jews transmit their superior stature to their descendants.

The body grows not only in height but also in GIRTH, which is best measured by the chest. From the investigations of Sack and Weissenberg it has been found that the growth of the body in stature does not go hand in hand among Jews with its increase in breadth, but that they progress alternately. Up to maturity the height increases at the expense of the girth of the chest. After this period the body begins to broaden. The maximum girth of the chest is attained only between forty and fifty years of age. After this there is a recession.

The growth of the limbs has been shown to progress rapidly up to sixteen years of age. It then proceeds slowly up to the age of thirty, when the maximum is attained. After this time there is a recession.

J. M. Fi.

GROZOVSKI, JUDAH LÖB BEN ISAIAH REUBEN: Russian Hebraist; born at Pogosti, government of Minsk, in 1861. After having attended the yeshibah of Volozhin, Grozovski studied pedagogics in the Institute for Hebrew Teachers at Wilna. When twenty-seven years of age, he went to Palestine, teaching Hebrew in various places; in 1896 he received an appointment as teacher of Hebrew in the agricultural school of Jaffa. Three years later he removed to the Mikweh Yisrael colony, and filled the same office there. Grozovski published a series of text-books, among which are: "Bet ha-Sefer li-Bene Yisrael," Jerusalem, 1891;

"Sha'ashu'im," *ib.* 1891; "Bet Sefer 'Ibri," three graded courses in Hebrew, 1895–97; and "Millon," Hebrew-Russian-German dictionary, Warsaw, 1900.
s. M. Fr.

GRUBER, JOSEPH: Austrian physician; born at Kosolup, Bohemia, Aug. 4, 1827; died at Vienna March 31, 1900. He graduated (M.D.) from the University of Vienna in 1855. In 1860 he settled in Vienna as a specialist in aural diseases, and became privat-docent in 1863. In the succeeding year he became chief surgeon of the aural department at the Allgemeines Krankenhaus. In 1870 he was appointed assistant professor, and in 1873 became chief surgeon of the newly founded aural clinic of the university. In 1893 he was elected professor, which position he resigned in 1898.

Gruber was the author of many essays and works (numbering in all nearly 200), and was for many years one of the editors of the "Monatsschrift für Ohrenheilkunde Sowie für Kehlkopf-, Nasen- und Rachenkrankheiten." Among his writings may be mentioned: "Zur Pathologie der Hämatocele," Vienna, 1859; "Zur Pathologie und Therapie der Otitis Interna," *ib.* 1860; "Anatomisch-Physiologische Studien über das Trommelfell und die Gehörknöchelchen," *ib.* 1867; "Lehrbuch der Ohrenheilkunde," *ib.* 1870, 2d ed. 1888.

Bibliography: Pagel, *Biog. Lexikon*, Vienna, 1901, s.v.
s. F. T. H.

GRUBY, DAVID: French physician; born at Neusatz (Ujvidék), Hungary, Oct. 10, 1810; died in Paris Nov. 16, 1898. He studied medicine at the University of Vienna, and graduated in 1834. Although at that time a Jew was rarely permitted to hold a position in the university hospital, Gruby was appointed assistant surgeon upon the recommendation of the well-known physician Wattmann. Soon after, he went to London, and in 1839 to Paris, where he engaged in private practise.

Gruby was one of the leaders in microscopical research, and gave free public lectures, which were largely attended, on microscopy, experimental physiology, and pathology. The results of his experiments are embodied in: "Observationes Microscopicæ ad Morphologiam Pathologicam Spectantes," Vienna, 1839; and "Morphologia Fluidorum Pathologicorum," *ib.* 1840.

As a practitioner Gruby was very successful. He was physician to the younger Dumas and to Heinrich Heine.

GRÜN, MAURICE: Russian painter; born at Reval, Russia, in 1870. He studied art at Munich and Geneva, and in 1890 went to Paris. There he became a pupil of Jules Lefèbre and Benjamin Constant, receiving the Academy medal and several honorable mentions. When but twenty-four years of age Grün was appointed principal of the School of Arts at Bahia, Brazil. In 1896 he returned to Europe and again settled in Paris, but removed in 1898 to London, where he has since resided. Among his many paintings may be mentioned: "Brittany Interior," "Peaceful Moments," "For Queen and Empire," "Overhauling the Nets," "Oh, Bother!" "Idle Moments," "The Unexpected Return," "First Start in Life." He is also well known as a portrait-painter.
H. R. F. T. H.

GRÜNBAUM, MAX (MAIER): German Orientalist; born in Seligenstadt, Hesse, July 15, 1817; died in Munich Dec. 11, 1898. Grünbaum studied philology and philosophy at Giessen and Bonn. In 1858 he became superintendent of the Hebrew Orphan Asylum in New York city. He returned to Europe in 1870, and spent the remainder of his days in Munich. After 1862 nearly all his papers on Oriental philology and folk-lore appeared in the "Zeitschrift der Deutschen Morgenländischen Gesellschaft"; and after his death they were reedited by Felix Perles under the title "Gesammelte Aufsätze zur Sprach- und Sagenkunde," Berlin, 1901. The following are among his larger works: "Jüdisch-Deutsche Chrestomathie," 1882; "Mischsprachen und Sprachmischungen," 1885; "Neue Beiträge zur Semitischen Sagenkunde," 1893; "Die Jüdisch-Deutsche Litteratur in Deutschland, Polen, und Amerika," 1894; "Jüdisch-Spanische Chrestomathie," Frankfort, 1896. He had nearly completed the recataloguing of the works in the Hebrew department of the Munich State Library when he died.

GRÜNEBAUM, ELIAS: German rabbi; born in the Palatinate Sept. 10, 1807; died in Landau Sept. 25, 1893. In 1823 he went to Mayence, where he became a pupil of the Talmudist Löb Ellinger, and in 1826 continued his Talmudic studies at Mannheim; in 1827 he went to Frankfort-on-the-Main, where he attended the rabbinical lectures of Solomon Trier, Aaron Fuld, and Bär Adler, and prepared himself for the university. In 1831 he entered the University of Bonn, where he became intimately acquainted with Abraham Geiger. In 1832 he went to Munich to continue his studies. In 1835 he was appointed to the rabbinate of Birkenfeld, and the next year became rabbi of the Landau district, a position which he held till his death. Grünebaum was one of the most zealous and determined representatives of Reform Judaism. It is due to his efforts that the so-called "Jews' oath" was abolished in Bavaria (1862). In appreciation of his work for the improvement of the Jewish school-system, Ludwig II. of Bavaria bestowed upon him the Order of St. Michael. Besides contributing to Geiger's various magazines and to the "Allgemeine Zeitung des Judentums," Jost's "Annalen," and Stein's "Volkslehrer," Grünebaum published: "Die Sittenlehre des Judenthums Anderen Bekenntnissen Gegenüber Nebst dem Geschichtlichen Nachweise über Entstehung des Pharisäismus und Dessen Verhältnis zum Stifter der Christlichen Religion," Mannheim, 1867; "Zustände und Kämpfe der Juden, mit Besonderer Beziehung auf die Rheinpfalz," *ib.* 1843; "Gottesdienstliche Vorträge," Carlsruhe, 1844; "Israelitische Gemeinde, Synagoge und Schule," Landau, 1861;

"Reden" (delivered on various occasions). Many of his sermons were published in Kayserling's "Bibliothek Jüd. Kanzelredner."

S. M. K.

GRÜNFELD, ALFRED: Austrian pianist; born at Prague July 4, 1852; studied under Höger, under Krejci at the Prague Conservatorium, and under Kullak at the Neue Akademie der Tonkunst, Berlin. In 1873 he settled at Vienna, where he received the title of "Kammervirtuos." He has made tours through Europe and the United States.

During a visit to Germany Grünfeld was appointed court pianist to Emperor William I. Since 1897 he has been professor at the Vienna Conservatorium. Of his compositions may be mentioned the following works for the pianoforte: Octave-study, op. 15; Minuet, op. 31; and Spanish Serenade, op. 37.

BIBLIOGRAPHY: *Musikalisches Wochenblatt*, xiv. 343; Ehrlich, *Celebrated Pianists of the Past and Present*, pp. 115, 116.

S. J. So.

GRÜNFELD, HEINRICH: Austrian violoncellist; born at Prague April 21, 1855; a brother of Alfred Grünfeld. Educated at the Prague Conservatorium, he went to Berlin in 1876, and for eight years taught at the Neue Akademie der Tonkunst in that city. In conjunction with Xaver Scharwenka and Gustav Holländer (later with Sauret, M. Pauer, and F. Zajic), he arranged trio soirées which became very popular. In 1866 Grünfeld was appointed court violoncellist to King William of Prussia.

GRÜNFELD, JOSEF: Austrian physician and writer; born at Gyönk, Hungary, Nov. 19, 1840. After graduating from the gymnasium at Kaschau, he went successively to the universities of Budapest (1861) and Vienna (1863), graduating (M.D.) from the latter in 1867. He became privat-docent at Vienna in 1881, and chief of division at the Poliklinik of Vienna in 1885. He has published a "Compendium der Augenheilkunde" that has gone through four editions, and (in "Deutsche Chirurgie") "Die Endoskopie der Harnröhre und Blase." He was the first to use the endoscope. He is known for his many surgical innovations as well as through numerous monographs in his special department. Professional activities did not hinder Grünfeld from interesting himself in the affairs of the Jewish community. He was one of the founders, and for more than eight years president, of the Oesterreichisch-Israelitische Union. S.

GRÜNHUT, DAVID: German rabbi of the seventeenth and eighteenth centuries; born at Frankfort-on-the-Main, where his father was secretary of the congregation, and his maternal grandfather, Simon Günzburg, was a member of the rabbinate. In 1682 he edited Ḥayyim Vital's book on transmigration, "Gilgulim." This brought upon him the censure of the rabbinate, which was opposed to Shabbethai Ẓebi and, therefore, to the Cabala. He nevertheless reprinted this work in 1684. He also published "Ṭob Ro'i," rules on sheḥiṭah in the form of a catechism, together with "Migdal Dawid," homilies on the Pentateuch, and notes on some Talmudic treatises (Frankfort-on-the-Main, 1712), and a commentary on Abraham ibn Ezra's grammatical puzzle in the 1712 (Frankfort) edition of the "Sefer Ḥasidim," which commentary was reprinted in the 1713 (*ib.*) edition of Samuel Uceda's commentary on Abot entitled "Midrash Shemuel." He was rabbi in Aue, Hesse-Nassau, and perhaps also in Heimerdingen. He was on good terms with the anti-Jewish writers J. J. Schudt and Johann A. Eisenmenger, and wrote a preface to the latter's edition of the Bible.

D.

GRÜNHUT, KARL SAMUEL: Austrian jurist; born at Bur-St. Georgen, Hungary, Aug. 3, 1844. He became associate professor in the juridical faculty of the University of Vienna in 1872, after having published "Die Lehre von der Wechselbegebung nach Verfall," Vienna, 1871. In 1873 "Das Enteignungsrecht" appeared, and he founded the "Zeitschrift für das Privat- und Oeffentliche Recht der Gegenwart," a quarterly. In 1874 he was promoted to the professorship of commercial law. "Das Recht des Kommissionshandels" was published at Vienna in 1879, since which date his literary activity has been devoted chiefly to the subjects of notes and bills, to the literature of which he has contributed "Wechselrecht," 2 vols., Leipsic, 1897, constituting part of the "Systematisches Handbuch der Deutschen Rechtswissenschaft," edited by Karl Binding; in addition, he has published a short "Grundriss des Wechselrechts," *ib.* 1899, which similarly forms part of the "Grundriss des Oesterreichischen Rechts in Systematischer Bearbeitung," edited by Finger, Frankl, and Ullman; and, for practical purposes, "Lehrbuch des Wechselrechts," *ib.* 1900. Grünhut has the title of "Kaiserlicher Hofrath," and has been since 1897 a life-member of the Austrian House of Lords (Herrenhaus). He has been decorated with the star of the Order of Francis Joseph (1902).

GRÜNHUT, LAZAR: Hungarian rabbi and writer; born at Gerenda, Hungary, in 1850. Receiving his diploma as rabbi while a mere youth, he went to Berlin, where he attended the lectures of Dr. Israel Hildesheimer at the rabbinical seminary, as well as those at the university. He graduated (Ph.D.) from the University of Bern. For eleven years he officiated as rabbi at Temesvár, Hungary. In 1892 he was appointed director of the Jewish orphan asylum at Jerusalem. Grünhut's works include: "Kritische Untersuchung des Midrasch Kohelet Rabbah" (Berlin, 1892); "Das Verbot des Genusses von Gesäuertem am Rüsttage des Pessachfestes," in "Zeit. für Evangelische Theologie," 1894–98; "Midrash Shir ha-Shirim" (Jerusalem, 1897); "Sefer ha-Likkuṭim," i.–vi. (Jerusalem, 1898–1903); "Ezra und Nehemia, Kritisch Erläutert," part 1 (*ib.* 1899); "Saadia Gaon und Sein Commentar zum Buche Daniel" (St. Petersburg, 1899); "Saadia Gaon und Sein Commentar zu (Daniel,) Ezra und Nehemia" (*ib.* 1902); "Yalkut ha-Machiri zu den Sprüchen

Salomos" (Jerusalem, 1902); "Die Reisebeschreibungen des R. Benjamin von Tudela," published from manuscripts, with translations and introduction (*ib.* 1903).

S.

GRUNWALD, MAX: German rabbi and folklorist; born at Zabrze, Prussian Silesia, Oct. 10, 1871; educated at the gymnasium of Gleiwitz and (1889) at the university in Breslau, where he also attended the lectures of the Jewish theological seminary. In 1895 he accepted the rabbinate of the Hamburg Neue Dammthor Synagogue, where he remained until 1903, when he became rabbi of the Fifteenth District of Vienna. Since Jan., 1898, he has been editor of the "Mittheilungen der Gesellschaft für Jüdische Volkskunde," which society was founded by him in 1897 and of which he is president (1903). He was also one of the principal founders of the Hamburg Jewish Museum.

In addition to a large number of essays on general literature, folk-lore, and Jewish history, which appeared chiefly in the "Mittheilungen," Grunwald wrote the following: "Das Verhältnis Malebranche's zu Spinoza," Breslau, 1892; "Die Eigennamen des Alten Testamentes in Ihrer Bedeutung für die Kenntnis des Hebräischen Volksglaubens," *ib.* 1895; "Spinoza in Deutschland," Berlin, 1897; "Portugiesengräber auf Deutscher Erde," Hamburg, 1902; "Juden als Rheder und Seefahrer," Berlin, 1902; "Hamburger Deutsche Juden bis zur Auflösung der Dreigemeinden in 1811," Hamburg, 1903; "Die Moderne Frauenbewegung und das Judenthum," Vienna, 1903.

S.

GRÜNWALD, MORITZ: Austrian rabbi; born March 29, 1853, at Ungarisch Hradisch, Moravia; died in London June 10, 1895. After a short stay in Prague he entered (1878) the Breslau Jewish theological seminary. In 1881 he was called to the rabbinate of Belovár, Croatia; in 1884–87 he was rabbi of Pisek, Bohemia, in 1887–93 of Jung-Bunzlau, Bohemia. In the latter year he became chief rabbi of Bulgaria, with his seat at Sofia. He was at the same time director of the national rabbinical seminary, teaching Talmud and Midrash. Grünwald was an able linguist, and a member of several scientific societies, including the Société de Numismatique et d'Archéologie, and was highly esteemed by Prince Ferdinand and the Bulgarian government.

Of his numerous writings the following may be mentioned: "Die Bibel, der Talmud und die Evangelien" (1877); "Zur Gesch. der Gemeinde Dyhernfurth" (1882); "Zur Gesch. der Jüdischen Gemeinde in Ragusa" (1883); "Gesch. der Juden in Böhmen" (1st part, 1886); "Ueber das Verhältniss der Kirchenväter zur Talmudischen und Midraschischen Literatur" (1891); "Ueber den Einfluss der Psalmen auf die Entwicklung der Christlichen Liturgie und Hymnologie" (1892); "Rabbi Salomo Efraim Luntschitz" (1892); "Sitten und Bräuche der Juden im Orient" (1894).

Grünwald was the founder and editor of the "Jüdisches Centralblatt" (1882–85).

GRÜNWALD-ZERKOWITZ (*née* **Zerkowitz**), **SIDONIE:** Austrian authoress; born in Tobitschau, Moravia, Feb. 17, 1852. Her early education she received from her father, a physician. With her parents she removed successively to Holleschau, Vienna, and Budapest. She is well versed in French, Italian, Hungarian, Czech, and English, and obtained a diploma as teacher of languages. After teaching for a few years, she received (1874) from Ludwig II. of Bavaria a free scholarship at his theatrical school in Munich. Her studies were interrupted by her marriage to Prince Theodore Kolokotronis of Greece. Joining the Greek Catholic Church, she accompanied her husband to Athens, where both she and her husband were disowned by the latter's family. Disappointed, she returned to Moravia, became a teacher, and, after securing a divorce, married (1877) a wealthy Vienna merchant by the name of Grünwald. Since then she has lived in Vienna, where for some time she edited "La Mode."

When only thirteen years of age she published her first essays on literature, in German and Hungarian, in the newspapers of Budapest. In 1874 appeared, in Vienna, "Zwanzig Gedichte von Kálmán Tóth," translated from the Hungarian. These were followed by "Die Lieder der Mormonin," Dresden and Utah, 1886, 7th ed. 1900; "Die Mode in der Frauenkleidung," Vienna, 1889; "Das Gretchen von Heute," Zurich, 1890, 7th ed. 1900; "Achmed's Ehe," 1900; "Doppel-Ehen," 1900; "Poetischer Hirt," 1901; "Schattenseiten des Frauenstudiums," 1901. She is also the author of songs against anti-Semitism, and has contributed many articles to the newspapers, among which may be mentioned those contributed to the Berlin "Bühne und Welt": "Toilettenkünstlerinnen auf der Bühne"; critical essays on Sarah Bernhardt, Wolter, Dusé, Réjane, Jane Hading, etc.

GUADALAJARA (גוד אלהגארה ; ואד אלחגארה): City in Castile, Spain. When Tariḳ ibn Zaid conquered the city in 711, he found Jews there, as in Toledo and other places, and gave the conquered city to them to guard. In the "fuero" (charter) which Alfonso VII. gave to the city in 1139, Jews were placed on an equality with the knights: two-thirds of them had to follow the king in battle, while the other third stayed behind for defense. Guadalajara had a considerable Jewish community in the thirteenth century, and in 1290 paid as much in taxes as Ciudad Real. It was very much reduced through the persecution of 1391 and through the enforced baptisms due to it, so that in 1476 it could hardly pay one-third of the former taxes. The number of Maranos in the city was so large that King Juan II. issued a command to the city to treat baptized Jews like persons who were born Christians and to give them official positions.

In 1482 a Jew established a Hebrew printing-press in Guadalajara, at which Solomon ben Moses Levi ibn Alḳabiẓ was engaged as printer and corrector. He brought out in that year an edition of David Ḳimḥi's commentary to the Later Prophets, and (*c.* 1482) Jacob ben Asher's Ṭur Eben ha-'Ezer. Meïr ben Solomon ben Sahulah, who carried on a correspondence with Solomon Adret and Samuel Motot, lived in Guadalajara, and Moses de Leon and Isaac ben Harun Sulaiman were born there. Many of the Jews who were driven out of Guadalajara in 1492 went to Algiers, where they had their own synagogue with a special ritual.

GUARANTY. See ASMAKTA.

GUARDIA, LA, THE HOLY CHILD OF: Subject of a story invented by the Spanish Inquisition shortly after its institution. A Christian boy, whose name, age, and family vary in different accounts, is said to have been crucified and killed by six Maranos and five Jews—not to use his blood for ritual purposes, but to employ his heart for the purpose of working charms. The following persons were accused of the crime:

The four Franco brothers, who were draymen; the woolcomber Benito Garcia, a baptized Jew, who had traveled a great deal; and John de Ocaña; also five Jews: Ça (Isaac) Franco, aged 84 years, formerly resident in Tembleque and afterward in Quintanar; his two sons, Mose and Yuce Franco, the latter a shoemaker in Tembleque; David de Pereyon, a poor man in La Guardia, who appears to have had charge of the ritual ceremonies in the little community; and the Tembleque physician Maestre Yuce Tazarte.

Testimony of Yuce Franco.

The accused were arrested by the Inquisition in 1490, either in Segovia or Astorga, and were summoned before the tribunal at Avila. The physician Yuce Tazarte, Mose Franco, and David de Pereyon died before the beginning of the trial, which lasted from Dec. 17, 1490, to Nov. 16, 1491, and terminated with the condemnation of the accused. The chief witness was Yuce Franco, a young man hardly twenty years old and of limited intellect, upon whose testimony the tribunal laid especial emphasis—all other testimony in the case has been lost or destroyed. Another interesting character in the suit was Benito Garcia, who had been baptized when he was forty, but soon repented his apostasy and returned to Judaism. The confession of Yuce Franco, either voluntary (as was pretended) or forced (through fear of martyrdom and the application of torture), showed that the accused had crucified a child at night in a den situated on the street of La Guardia; that they had put a crown of thorns on his head, opened his veins, caught his blood in a basin, and then torn out his heart with imprecations upon Jesus. Thereupon they were said to have taken the dead child from the cross and to have buried him the same night in a place which could never be found again. Some days later the same persons again gathered at night in the same den to utter curses and, with the assistance of the physician Tazarte, to practise magic by means of the child's heart and a consecrated host. The object of these charms was to bring about the death of all Inquisitors and Christians, to destroy the Christian faith, and to make the Jewish faith prevail generally. Since the charm had no effect, the conspirators met a third time, and sent Benito Garcia with the child's heart and a new host to Rabbi Moses Abenamias in Zamora and to another rabbi of that city, in the hope that they might be more successful in their witchcraft. This was the crime laid to the charge of the Jews and Maranos.

Discrepancies in the Story.

The accused and the witnesses, who were heard separately by the Inquisitors without being brought face to face, contradicted one another in regard to the age of the child, the names of his parents, the place of his birth and residence, and the place where the crime was committed. The child was missed nowhere, was sought nowhere: one person testified that he had been taken in Lille; another that he had been kidnaped in Toledo; a third that Moses Franco had seized him in Quintanar. Only one person knew that the child's father was called Alonzo Martin and that he resided in Quintanar.

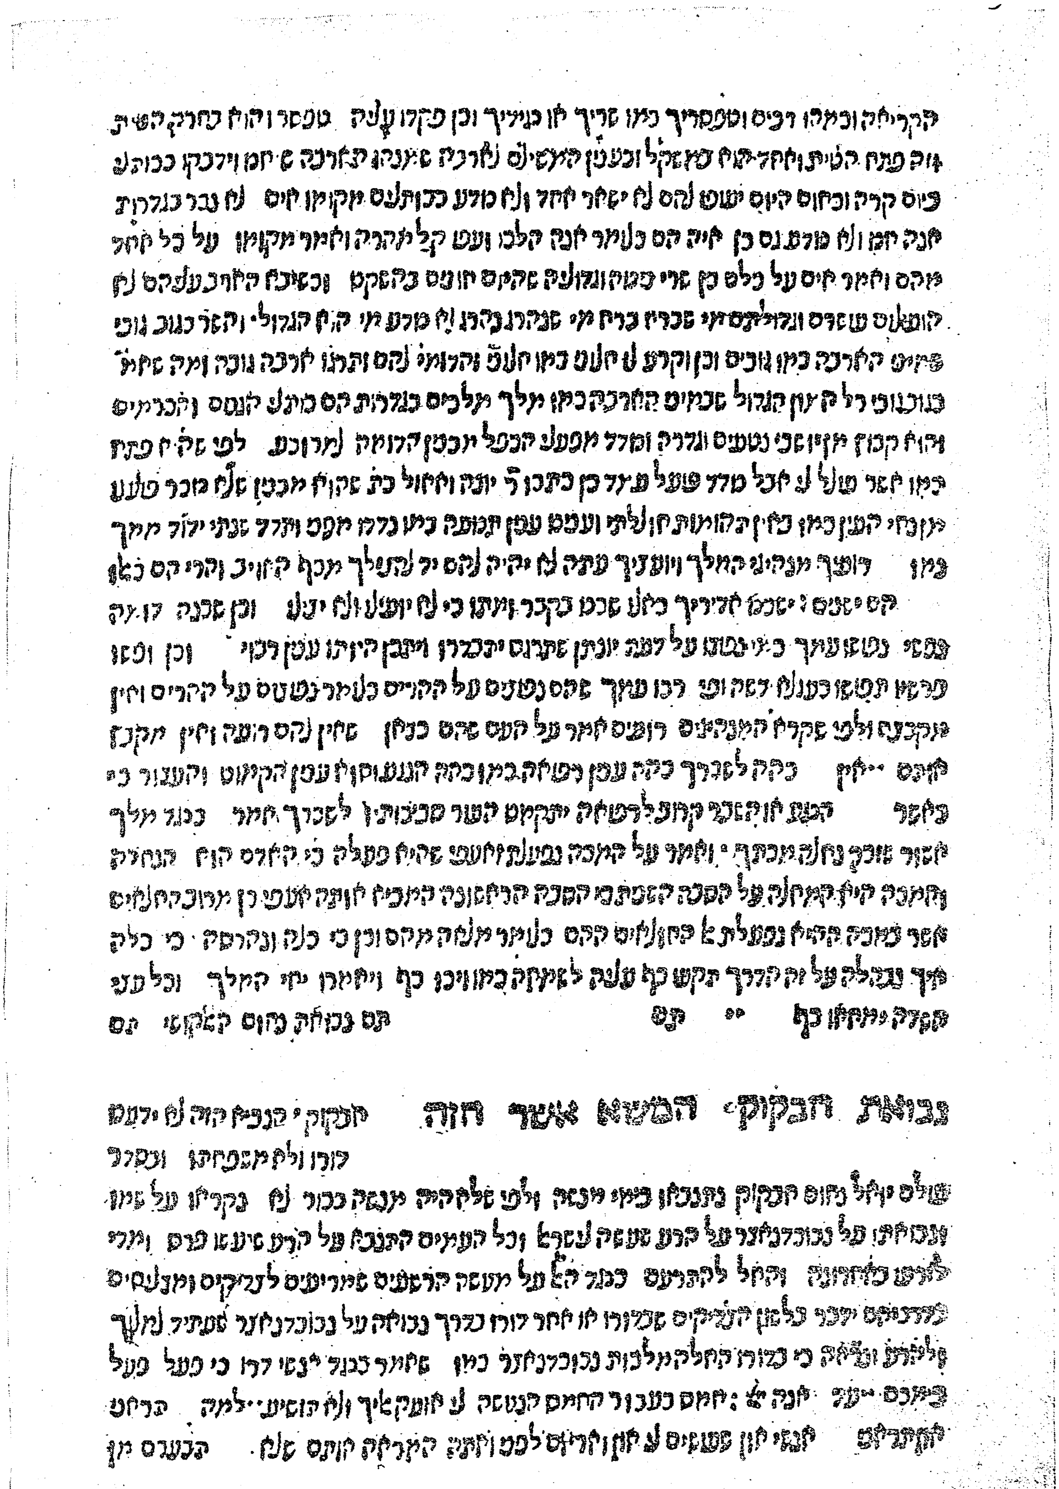
Through fright the innocent Yuce Franco became seriously ill; and the Inquisitor sent a physician, Antonio de Avila, to attend him. Antonio understood Hebrew and was probably a baptized Jew. Franco asked that the Inquisitor send a rabbi to him. Instead of a rabbi a priest was sent, who pretended to be the rabbi Abraham. In Antonio's presence Franco is said to have confessed to this priest that he had been arrested for the murder of an eleven-year-old boy. He made the priest promise to entrust this confession to no one but Rabbi Abraham Senior. Abraham Senior is known to have been that business friend of Isaac Abravanel who later accepted baptism. All the further proceedings were founded on this fabrication. The child of La Guardia never existed, but the unjustly accused persons were either strangled and then burned or were burned alive (Nov. 16, 1491).

The supposed martyrdom of the child of La Guardia, in which even Spanish scholars of modern and of most recent times still believe (Rios, "Hist." iii. 318), has caused wide discussion.

The whole tragedy is represented on glass in a painting at the entrance to the Cathedral of Toledo.

G. M. K.

GUARDIAN AND WARD: The Biblical אמן, or "nursing-father" (Isa. xlix. 23; Esth. ii. 7), is unknown to the Mishnah; a guardian is called "apotropos" (the Greek ἐπίτροπος); the ward is simply "yatom" ("orphan" or "fatherless"). The Mishnah (Giṭ. v. 4) says: "A guardian appointed by the father [which seems to include any other transmitter of inheritance] must swear [at the end of his trust] that he has kept back nothing; one appointed by the



נבואת חבקוק המשא אשר חזה

PAGE FROM THE FIRST EDITION OF DAVID ḲIMḤI'S COMMENTARY ON THE PROPHETS, PRINTED BY SOLOMON IBN ALḲABIẒ AT GUADALAJARA, 1482.

court need not swear." Abba Saul says just the contrary, and is sustained by the Talmud (Giṭ. 52b).

Appointment.

A man who has minor children, or whose wife is pregnant, should, when nearing death, name a guardian, which he may do by word of mouth. He may appoint a minor, a woman, or a bondman (Giṭ. 51a), or, according to later views, he may order his estate to be turned over to his minor heirs direct. When the father fails to act, the court, as "father of the fatherless," should appoint a guardian, who must be a free man and of full age. He should be of good repute, trustworthy, able to assert the rights of his wards and plead their cause, and versed in worldly affairs. If a kinsman, he can not take over real estate (Maimonides, "Yad," Naḥalot, x. 6; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 290, 2). When the court finds that the guardian is wasting the estate of the wards, or when, in the case of a guardian appointed by the court, he falls under suspicion by living beyond his own means, he should be removed (Giṭ. 52b). Under later rulings the appointing court takes an inventory of the ward's estate, of which it keeps one copy, the guardian holding the other.

Committee.

The rule regarding persons of unsound mind and deaf-mutes is the same as that regarding minors; and an apotropos, who in Anglo-American law would be known as a "committee," should be appointed for them, with like powers and duties to those of guardians proper (Ket. 48a; Yeb. 113a). But if an orphan adult shows the habits of a spendthrift, the court has no power to keep his estate from him, or to appoint a committee for him, unless it was so ordered by his father (Naḥalot, x. 8).

A person appointed either by the father or by the court may resign his trust provided he has not taken possession of the ward's property; but after taking possession he may not resign unless he is about to remove from the ward's place of residence; in which case he should turn the property over to the court, in order that it may appoint another guardian. The Mishnah, in the section above quoted, speaks of "children who rely on the master of the house," that is, on some adult, man or woman, in whose family they live. The person so chosen assumes all the duties and has many of the powers of a guardian. Such a person can recover the cost of feeding and clothing the ward when the latter comes of age.

Powers and Duties.

Generally speaking, the guardian "receives and disburses, builds and tears down, leases or plants, and does whatever he finds to be in the interest of his wards; he gives them to eat and to drink, and makes all outlays according to the estate in hand and to their station—neither too liberally nor too scantily" (Ḥoshen Mishpaṭ, 290, 7, following Naḥalot, xi. 4). For money left to infants a guardian is not necessary; the court may invest it upon proper security or in land; but it is the later opinion that for money also a guardian should be found. Movable property may be sold by the court after an appraisement, but a guardian may sell it without the intervention of a court. If a market is near at hand, he should take the movables there and sell them, and invest the proceeds. In cases of doubt—if, for instance, he has wine on hand which, kept, might sour, or which, taken to a distant market, would be exposed to risk of loss—the guardian should act as he would with his own. The guardian may and should sell cattle, slaves, fields, and vineyards if necessary to feed the ward, and should sell them in the order here given; but he should not sell such property to lay the money away, nor should he sell fields to buy slaves, or vice versa, or a poor field to buy a better one, for the venture might miscarry; but one field may be sold to get oxen with which to till the remainder.

If the orphan is sued, the guardian should not himself undertake the defense, for he might lose; but if he does appear and defeats the claim, the judgment is binding. He has no power to manumit a slave, even on the prospect of the slave paying for himself afterward. He should (in Palestine) tithe and take out the "*terumah*" from the ward's crops. He provides the ward with sukkah, lulab, a scroll of the Law, phylacteries, etc., but does not dispense alms or charity in any form on his behalf, not even for the redemption of captives. But the court appointing the committee for a lunatic or deaf-mute may assess payments for charity out of the estate (Giṭ. 51a).

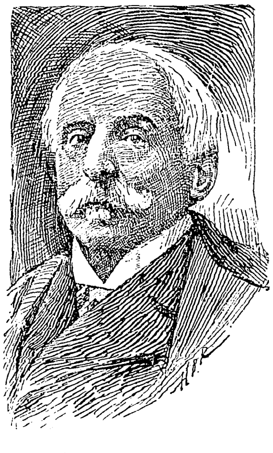
Accounting.

As shown above, only an appointee of the court has to clear himself on oath—the "solemn oath." But when the ward, on coming of age, makes a distinct claim of what is due him, every guardian must clear himself by oath. A guardian is not required to render to the ward or to the court detailed accounts; but religion demands that he should keep a very accurate one for "the Father of the fatherless" who rides the heavens. The guardian is not liable for anything stolen or lost, but he is liable for negligence or fraud.

Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 290, covers nearly the whole subject.

S. S. L. N. D.

GUASTALLA, ENRICO: Italian soldier; born at Guastalla 1828; died at Milan Sept. 28, 1903. Though brought up to a commercial life, he joined the army as a volunteer in 1848. He took part in the defense of Rome, and for his bravery in the battle of Vascello was appointed lieutenant. He afterward went to Piedmont, but, suspected of revolutionary tendencies by the government, fled to London, where he came in connection with Mazzini. In 1859 he returned to Italy and joined Garibaldi at Como. He was wounded in the leg at Volturno (Oct. 1, 1860). After a month's inaction he became a member of Garibaldi's staff. At



Enrico Guastalla.

Aspromonte the whole staff was captured and imprisoned.

Guastalla again saw active service in 1866, and fought under Garibaldi at Como, Brescia, Lonoto, Salo, and Desenzano. He retired from the army with the rank of major and the insignia of knight commandant of the Order of St. Maurice and St. Lazarus. He was member of the Italian Parliament for Varese.

Moritz Güdemann.

GÜDEMANN, MORITZ: Austrian rabbi; born at Hildesheim, Germany, Feb. 19, 1835. He was educated at Breslau (Ph.D. 1858), and took his rabbinical diploma (1862) at the Jewish Theological Seminary of that city. In the latter year he was called to the rabbinate of Magdeburg; in 1866 he went to Vienna as preacher, where he became rabbi in 1868, and chief rabbi in 1890. Güdemann has especially distinguished himself by his investigations into the history of Jewish education and culture. He has published: "Die Geschichte der Juden in Magdeburg," 1865; "Die Neugestaltung des Rabbinenwesens," 1866; "Sechs Predegten," 1867; "Jüdisches im Christenthum des Reformationszeitalters," 1870; "Jüdisches Unterrichtswesen Während der Spanisch-Arabischen Periode," 1873; "Religionsgeschichtliche Studien," 1876; "Gesch. des Erziehungswesens und der Kultur der Abendländischen Juden," 3 vols., 1880–88; "Nächstenliebe," 1890; "Quellenschriften zur Gesch. des Unterrichts und der Erziehung bei den Deutschen Juden," 1894; "Das Judenthum in Seinen Grundzügen und nach Seinen Geschichtlichen Grundlagen Dargestellt," 1902; "Das Judenthum im Neutestamentlichen Zeitalter in Christlicher Darstellung," 1903. In his "Nationaljudentum" (Vienna, 1897) he wrote against the tendencies of Zionism to lay more stress on the national than on the religious character of Judaism, for which he was severely attacked by the friends of the Zionist movement. As far back as 1871, however, he had strongly protested against the proposal of the Jewish community of Vienna to strike from the prayer-book all passages referring to the return of the Jews to the Holy Land (compare his sermon "Jerusalem, die Apfer und die Orgel," 1871), and had even gone so far as to threaten to resign from the board of trustees if his protest should remain unheeded.

S. L. B.

GUENÉE, ANTOINE: French priest and Christian apologist; born at Etampes 1717; died 1803. He wrote, besides various apologetic works, "Lettres de Quelques Juifs Portugais, Allemands et Polonais, à M. de Voltaire," Paris, 1769, often reprinted and translated into English and other languages. The letters are a defense of the Bible, not of Judaism.

GUERON, YAKIR (PRECIADO): Turkish rabbi; born in 1813; died at Jerusalem Feb. 4, 1874. He was the sixth rabbi of Adrianople descended from the Gueron family. He became rabbi in 1835, and eleven years later met Sultan 'Abd al-Majid, whom he induced to restore the privileges formerly conceded to the non-Mussulman communities. Gueron, with the rabbis of Smyrna and Seres, was made an arbitrator in a rabbinical controversy at Constantinople, and was chosen acting chief rabbi of the Turkish capital in 1863. Both 'Abd al-Majid and his successor 'Abd al-'Aziz conferred decorations upon him.

Gueron resigned his office in 1872, and proceeded to Jerusalem, where he died two years later.

GUETTA, ISAAC: Talmudic scholar and promoter of Jewish learning, whose ancestors went to the Orient from Huete, Spain; born June 5, 1777; lived for several years in Triest. In his old age he went to Safed, where, as in Tiberias, he founded Talmudic seminaries, and died Feb. 2, 1857 (8 Shebat, 5617). The scholars of Palestine extol him for his learning and generosity. He is the author of four volumes of novellæ to the Babylonian Talmud, published in Leghorn 1846–47 and in Vienna 1851–56, under the title "Sedeh Yiẓḥaḳ." The modern Hebrew poet David Ara of Triest, author of the collection "Ḳol Dawid" (Venice, 1880), is his grandson.

G. M. K.

GUGGENHEIM, MEYER: American merchant and mining magnate; born in Langenau, Switzerland, 1828. In 1847 he went to America with his father, who settled at Philadelphia; there Guggenheim began business life in the humblest way, dealing, as a traveling salesman, in such commodities as stove-polish and glue, which he afterward learned to manufacture and thus sold at a greater profit. Next he turned his attention to embroideries, gaining a large fortune by importing the Swiss products. In 1881 he transferred his business to New York city under the name of "M. Guggenheim's Sons." About this time he became interested in a silver-mine; in order to work it profitably he bought up a smelting-plant in Denver, Colo., and, with the aid of his sons, devoted himself almost exclusively to smelting operations, building a smelter, in 1888, at Pueblo, Colo. The firm then extended its operations throughout the United States, and even into Mexico, where it built the first complete smelter at Monterey, and another at Aguas Calientes. It was further found necessary to build refining-works, which was done at Perth Amboy, N. J. By this time the firm had become the most important silver-smelting company in the world; it soon entered into a combination of smelting firms known as the "American Smelting and Refining Company" (1900), the firm of M. Guggenheim's Sons retaining a controlling interest. The firm naturally became interested in many mines, and a separate firm, called the "Guggenheim Exploration Company," has been formed to represent this side of its activity.

Of Guggenheim's eight sons, **Daniel**, born in 1858, in Philadelphia, Pa., entered the embroidery business in Switzerland, but is now chairman of the executive committee of the American Smelting and Refining Company. **Simon**, also born in Philadelphia, Dec. 30, 1867, entered the smelting business in 1889, at Pueblo, Colo., and has since resided in Colorado, for which state he was nominated lieutenant-governor in 1894 and governor in 1898.

E. C. J.

GUGGENHEIMER, RANDOLPH: American lawyer; born at Lynchburg, Va., July 20, 1846. His family originally settled in Virginia, where his father was engaged in the cultivation of tobacco. Guggenheimer removed to New York city in 1865, and entered the law school of the New York University, graduating in 1869. Making a specialty of corporation and real estate law, he soon built up a considerable practise. In 1882 he formed a partnership with Isaac and Samuel Untermyer; by the accession of Louis Marshall in 1893 the firm became known as "Guggenheimer, Untermyer & Marshall." Guggenheimer in 1887 was appointed commissioner of the common schools, an office he held for nine years, during which he originated the evening high-school system peculiar to New York city. The establishment of the system of free lectures is likewise due largely to his efforts; and he secured the retention of the German language as a part of the school curriculum.

Guggenheimer was the pioneer in introducing large office-buildings on Broadway, New York. In 1897 he was nominated by the democracy of Greater New York to the office of president of the municipal council, and was elected. In that capacity Guggenheimer acted as mayor of New York city during the absence of the incumbent.

GUGLIELMO, BENJAMIN (?): Italian dancing-master; flourished in the fifteenth century at Pesaro. His master was Domenico di Ferrara, in whose "Liber Ballorum" (1460) he is mentioned. Guglielmo himself wrote a treatise on dancing, "Trattato dell' Arte del Ballare," edited by F. Zambrini, Bologna, 1873; 2d ed. by Messori Boncuglia, 1885. It is one of the earliest in existence; and in it Guglielmo refers to dances devised by himself and by one "Giuseppe Ebreo."

G. J.

GUHRAUER, GOTTSCHALK EDUARD: German philologist and writer; born at Bojanowo, Prussian Poland, 1809; died at Breslau Jan. 5, 1854. He studied philology and philosophy at Breslau and Berlin; and in 1837 passed his examination and became a teacher at the Kollinsche Gymnasium in Berlin. The following two years he spent in Paris, studying especially Leibnitz's works, and then returned to Germany to become librarian of the University of Breslau. He became privat-docent in 1842, and professor in 1843, which position he held until his death.

Among his works may be mentioned: "Mémoire sur le Projet de Leibnitz Relatif à l'Expedition d'Egypte Proposé à Louis XIV. en 1672," Paris, 1839; "Kurmainz in der Epoche von 1672," Hamburg, 1839; "Lessings Erziehung des Menschengeschlechts, Kritisch und Philosophisch Erörtert," *ib.* 1841; "Das Heptaplomeres des Jean Bodin," *ib.* 1841; "G. W. v. Leibnitz, eine Biographie," Breslau, 1842, Supplement 1846; "Joachim Jungius und Sein Zeitalter," Stuttgart, 1850. He edited "Leibnitz's Deutsche Schriften" (1838-40), and "Goethe's Briefwechsel mit Knebel" (Leipsic, 1851), and completed Lessing's biography, begun by Danzel (2 vols., Leipsic, 1853).

GUIDACERIUS, AGATHIUS: Italian Christian Hebraist; born at Rocca-Coragio, Calabria, in the second half of the fifteenth century. Having studied Hebrew under a Portuguese rabbi at Rome, he was appointed teacher of that language at the university. In 1530 he was appointed by Francis I. professor at the Collège de France, where he interpreted both the Hebrew and Greek texts of the Scripture. Guidacerius wrote the following: "Institutiones Grammaticæ Hebraicæ Linguæ," compiled from the grammar "Petaḥ Debarai" and the "Miklol" of Ḳimḥi (Rome, 1514; Paris, 1529, 1539, and 1546); "Peculium Agathi," on the Hebrew letters, vowels, accents, and syllables (Paris, 1537); "Versio Latina Grammaticæ David Kimchi" (Paris, 1540); commentaries to the Psalms; a commentary to Canticles, with the Hebrew and Latin texts (Rome, 1524); a commentary to Ecclesiastes (Paris, 1531).

D. I. BR.

GUIDE, THE. See PERIODICALS.

GUILLAUME OF AUVERGNE: French scholastic; bishop of Paris from 1228 to 1249. He was one of the originators of Christian scholasticism in the thirteenth century. In his writings he displayed an extensive knowledge of Hebrew literature; and, although he never cites Maimonides by name, he was on many occasions influenced by the "Moreh Nebukim." Thus the anonymous Hebrew philosopher cited by Guillaume on the superiority of the matter of heavenly bodies ("De Universo," I., part i., ch. iii., p. 631) is none other than Maimonides (*l.c.* II., ch. xxvi.).

Dependence on Maimonides and Gabirol.

Maimonides' work was frequently utilized by Guillaume, especially in the first part of his "De Legibus." He follows Maimonides' theories on the symbolism of the sacrifice worship and the rational motivation of the Biblical commandments ("De Legibus," xvi. 46; comp. "Moreh Nebukim," iii., ch. xxxi.). Starting with Deut. iv. 6, Guillaume, like Maimonides, concludes that, besides their exoteric sense, the precepts have an esoteric meaning (*ib.*). The numerous commandments were intended to divert the Israelites from certain ideas and customs which were in vogue among the idolatrous nations, especially from the teachings of the Sabeans (*l.c.* i. 24; comp. "Moreh Nebukim," iii. 388). Guillaume combats Maimonides' view that the sacrifice was to be considered only as a concession to the ideas of antiquity; but he accepts this view with regard to some prescriptions concerning the sacrifices (*l.c.* vii. 38; comp. "Moreh Nebukim," iii. 365).

The Jewish philosopher whom Guillaume revered most highly was Solomon ibn Gabirol, whose "Fons Vitæ" he often cited under the title "Fons Sapientiæ." Gabirol, who was known to Guillaume by the name "Avicebron," was believed by him to have been a Christian who lived in an Islamic country. Guillaume was much impressed by Gabirol's theory of the will, which he considered to be the Christian "Logos." Thus, although he combated Avicenna's theory of emanation on the ground that God would not be the immediate cause of all created beings, he did not object to that of Gabirol which leads to the same result ("De Universo," I., part i., ch. xxvi.). Even when he deems it necessary to combat Gabirol's views, he does it without mentioning his name; *e.g.*, when he objects to the theory that there are no immaterial substances, or that even the intellectual substances consist of matter and form (*ib.* II., part ii., ch. vii., p. 850).

Guillaume's attitude toward the Jews was far from benevolent. During his bishopric and through his personal influence the Talmud was burned in Paris (1242). Nor did he spare the Jews in his writings. For him, the omission in the Bible of certain very important dogmas, such as the creation of angels, the immortality of the soul, etc., was due to the narrowness of the intellectual perception of the Jews and to their moral depravity.

Guillaume distinguishes three periods in the intellectual development of the Jews: (1) the Biblical period, when the Jewish nation contented itself with the Bible; (2) the Talmudic and Midrashic, which he calls "the period of the fables"; and (3) the period of the philosophers (*ib.* I., part iii., ch. xxxi., p. 805, col. 2).

GUILT-OFFERING. See ATONEMENT.

GUIMARÃES: City of Portugal. In the fourteenth century it had a wealthy Jewish community, whose quarter was located on the site of the present fish-market, "praça do peixe," and extended to the Holy Ghost street. A few years previous to the expulsion of the Jews from Portugal this community paid a yearly tax of 25,000 reis. For centuries Maranos were living in the city, and it was the native place of the poet Manuel Thomàs and of Manasseh ben Israel's wife.

G. M. K.

GUIZOLFI (GIEXULFIS), ZACHARIAS DE: Prince and ruler, in the fifteenth century, of the Taman peninsula on the east coast of the Black Sea; descendant of Simeone de Guizolfi, a Genoese Jew, who, by marriage with Princess Bikhakhanim and under the protection of the Genoese republic, became ruler of the peninsula in 1419.

Beset by the Turks in 1482, Guizolfi and his Circassian subjects were compelled to retire from his stronghold Matriga (Taman), and sought refuge on the island of Matrice, whence (Aug. 12) he informed the directors of the Bank of St. George in Genoa of his position, and called for 1,000 ducats with which to retain the friendship of his allies, the Goths, who had exhausted his resources; he stated that unless he received the support of the republic he would remove to Wallachia, where the waywode Stefan had offered him a castle.

Notwithstanding the fact that the Turks had captured Tana (Azov) and most of the settlements in Chazaria, Guizolfi continued the war from Matrice, but with only a small measure of success. Learning that he had expressed a desire to come to Russia, and glad of an opportunity to attract the Circassians, the czar Ivan III., Vassilivich, directed Nozdrovaty, his ambassador to the Tatar khan Mengli Girei, to forward a message "sealed with the gold seal" to Zacharias (Skariya) the Jew, at Kaffa. This message, dated March 14, 1484, and forwarded by Luka and Prince Vasili, both court dignitaries, reads as follows:

> "By the grace of God the great ruler of the Russian country, the Grand Duke Ivan Vassilivich, Czar of all the Russias, . . . to Zacharias the Hebrew.
>
> "You have written to us through Gabriel Petrov, our guest, that you desire to come to us. It is our wish that you do so. When you are with us we will give you evidence of our favorable disposition toward you. If you wish to serve us, our desire will be to confer distinction upon you; but should you not wish to remain with us and prefer to return to your own country, you shall be free to go" ("Sbornik Imperatorskavo Ruskavo Istoricheskavo Obschestva," xli. 40. For a second message, dated Oct. 18, 1487, see *ib.* p. 71).

From a despatch in Latin dated Conario on the Kuban, June 8, 1487, and signed "Zachariah Guigursis," it is clear that Guizolfi, intending to accept the czar's hospitality, started for Russia, but while on the way was robbed and tortured by Stefan, the waywode of Moldavia, and returned home. Notwithstanding this experience, Guizolfi and his men declared themselves ready to join the czar provided that guides were furnished them. Replying to this despatch, March 18, 1488, the czar repeated his invitation, and informed Guizolfi that he had notified Dmitri Shein, his ambassador at the Crimean court, that he had requested Mengli Girei to send to Tscherkassy two men to guide Guizolfi to Moscow. He directed Shein to add to this number a Tatar from his own suite.

Several years passed before guides were sent, but in the spring of 1496 they reached the mouth of the Miyusha and Taigana rivers, where Guizolfi was to meet them four weeks after Easter. It had been arranged that in the event of either party reaching the rendezvous before the other, the first should wait until Whitsuntide, and if need be until Peter and Paul's Day. The guides waited until St. Nicholas' Day (Dec. 6), when they learned that Guizolfi was unable to advance on account of disturbances among his people, for "the man Zacharias is substantial, his family is great, and probably it is difficult to induce them to move." In his report to the czar the Crimean ambassador declares that, out of friendship for his royal master, the khan Mengli Girei would take Guizolfi under his protection, but fear she dare not do so, since Guizolfi has antagonized the Turks, who are the khan's protectors (*ib.* pp. 77–114).

From subsequent events it is evident that Guizolfi entered the service of the khan, for further negotiations were carried on, and in April, 1500, the czar, instructing his ambassador, refers to Guizolfi as "Zacharias the Fryazin [*i.e.*, "the Italian"], who had lived in Circassia and is now in the service of Mengli Girei, but who never reached Russia" (*ib.* p. 309).

The czar's repeated invitations to Guizolfi seem to indicate that he hoped the latter's services would be valuable to him in extending Russian influence on the Black Sea. Yet it is strange that during a period of more than eighteen years Guizolfi did not succeed in reaching Russia. Whether the fact that Guizolfi was a Jew had anything to do with the impediments put in his way, it is difficult to ascertain, for no mention of him is to be found in Jewish writings. The different spellings of Zachariah's name in Italian and Russian documents—"Guizolfi," "Guigursis," and "Guilgursis"—may be attributed to errors of the Russian scribes.

H. R.

GUMPERZ, AARON SOLOMON (also called **Emrich** or **Emmerich**): German scholar and physician; born Dec. 10, 1723; died 1769. In March, 1751, Gumperz graduated as M.D. from the University of Frankfort-on-the-Oder, his dissertation being "Ueber die Temperamente." He was the first Prussian Jew who obtained a doctor's degree. Gumperz was especially known for having been Mendelssohn's teacher of philosophy and for having inspired him with a love for literature. He wrote a calendar for the year 5509 (1748–49), and "Megalleh Sod," a supercommentary on Ibn Ezra to the Five Scrolls. Of the latter work that part dealing with Ecclesiastes was the only one published (Hamburg, 1765; Wilna, 1836). It is followed by an essay entitled "Ma'mar ha-Madda'," on religion and philosophy. Mendelssohn strongly recommended this work in his "Bi'ur Millot ha-Higgayon" (§ 14).

G. M. Sel.

GUMPLIN: German satirical poet of unknown date. The only poem of his that has been preserved is a satire of seven strophes, ending with a refrain in which he very wittily criticizes the inhabitants of the Rhine province. Although his vocabulary is not always pure, the versification is perfect and betrays great ability. The name "Gumplin" is given in acrostic. Abraham Geiger published the poem, together with a German translation, in his "Melo Chofnajim."

Bibliography: Zunz, *Z. G.* p. 167; A. Geiger, *Melo Chofnajim*, p. 102.

G. I. Br.

GUMPLOWICZ, LUDWIG: Christian historian and jurist; born at Cracow March 9, 1838; studied at the universities of Cracow and Vienna, and practised law at Cracow. In 1876 he was appointed docent, in 1882 assistant professor, and in 1893 professor, at Graz University. He is the author of a work on jurisprudence, and also of a work entitled "Prawodawstwo Polskie Wzgledem Zydow," which treats of Polish legislation concerning Jews. The author introduces new material and advances original views. According to him, the history of Poland is divided into three periods, the Pyast, Yagellon, and Elected King periods, in each of which the three estates, king, clergy, and legislature, were in constant, frequently in violent, opposition. In the first period the legislative power was in the hands of the king, in the second in the hands of the nobility, and in the third in the hands of the Catholic clergy and of the Jesuits. The kings, the author is inclined to believe, were generally favorably disposed toward the Jews, while the nobility was not altogether unfavorably disposed toward them. The third period is that of the domination of the clergy and of the Jesuits.

The views of the clergy as regards the Jews always remained the same, but until the third period they lacked the power to enforce them. On assuming the education of the Polish youth the clergy taught them to regard the Jews as the enemies of the Church (see POLAND).

H. R. J. G. L.

GUMURJINA: Town in European Turkey, west of Adrianople. It has a population of 26,000, including 1,200 Jews. The Jewish community possesses separate schools for boys and girls with a roll of 200 children, a synagogue, and five charitable societies. A few Jewish artisans dwell in Gumurjina, but the majority of Jews there live by commerce, and several fill public offices. The community is administered by a council of twelve, but is without an appointed rabbi. Religious questions are addressed to the grand rabbinate of Adrianople.

According to local traditions, the foundation of the Jewish community of Gumurjina goes back to the first half of the seventeenth century. The earliest chief rabbi of the city was Rab Judah, said to have died in 1673. In times of distress the Jews go to his tomb to pray. A proof of the presence of Jews in this town at that epoch is the fact that Nathan of Gaza, the acolyte of the pseudo-Messiah Shabbethai Ẓebi, fled there after the conversion of his master to Islam. About the year 1786 an incident occurred that placed the Jews of Gumurjina in grave peril. Motos-Agha, at the head of the brigands who infested the neighboring mountains, won possession of the fort, and when the governor, Ali Effendi, recaptured it, he accused the Jews of having favored the brigands, and threw the most prominent among them into prison. They, however, succeeded in proving the falsity of the accusation and were restored to liberty. In memory of this double deliverance from siege and imprisonment the Jews of Gumurjina observe the 22d day of Elul as a festival under the name of the "Brigands' Purim." Up to 1865 this festival was celebrated with great solemnity; but the arrival of new Jewish settlers who were strangers to the tradition has caused the custom to fall into comparative disuse, though the older inhabitants still maintain it.

GUNI (גוני): **1.** A son of Naphtali (Gen. xlvi. 24; I Chron. vii. 13), and founder of the family of the Gunites (Num. xxvi. 48). In Hebrew, "Guni" is used for the individual and for the family. **2.** A descendant of Gad, and the father of Abdiel, who was a chief in his tribe (I Chron. v. 15).

E. G. H. M. SEL.

GUNSBERG, ISIDOR: English merchant and chess-master; born in Budapest Nov. 2, 1854. When nine years old he went to England, in which country he has since resided, competing in numerous chess tournaments as an English representative. In 1885 he surprised the chess world by capturing the first prize at the Hamburg Chess-Masters' Tournament, beating Blackburne, the English champion, and Tarrasch. His principal subsequent tourney successes have been:

1885. British Chess Association. First prize.
1887. British Chess Association. Tied with Burn for first prize.
1888. Bradford. First prize, beating Mackenzie and Bardeleben.
1888. London. First prize.

In matches he has beaten Bird by 5 to 1, and Blackburne by 5 to 2; drawn with Tschigorin, 9 all; and scored 4 to 6 against Steinitz. He is also very successful in simultaneous play. Gunsberg is chess editor of the "Daily News," London, in which city he now (1903) resides.

GÜNSBURG, KARL SIEGFRIED: German author and preacher; born Dec. 9, 1784, at Lissa; died at Breslau Jan. 23, 1860. He studied philology and philosophy at Berlin, and for a time he published with Ed. Kley "Erbauungen, oder Gottes Werk und Wort" (1813-14). For a few years he also preached in the Jacobson Temple at Berlin, and in 1819 settled at Breslau. He took an active interest in the Jewish community, and presented his library (Aug. 19, 1859) to the Lehr- und Leseverein, which Abraham Geiger founded in 1842. He is the author of "Parabeln," 2 vols., Berlin, 1820 (3 vols., Breslau, 1826); "Der Geist des Orients," Breslau, 1830. In conjunction with Kley he published a prayer-book, "Die Deutsche Synagoge," etc., in 2 parts, Berlin, 1817-18.

S. B. P.

GÜNZBURG: Town of Bavaria, in the province of Swabia, on the Danube. A small but flourishing Jewish community existed there in the sixteenth century. In 1566 the Jews of Günzburg petitioned Emperor Maximilian II. to recognize as rabbi Isaac ha-Levi, who had officiated in that capacity for thirty years. The official recognition was sought in consequence of family quarrels between members of the community, which the rabbi was powerless to settle so long as his authority was unrecognized. Among these members was the rich and influential Simeon Günzburg, ancestor of the Günzburg family. Solomon Luria (ReSHaL; Responsa, No. 11) expresses his astonishment that discord could have found room in such a pious and learned congregation as that of Günzburg.

The community has long since ceased to exist; but the name of the town is familiar to the Jews from the fact of its having been the birthplace of the Günzburg, Günz, and Gaunz families.

BIBLIOGRAPHY: A. Kohut, *Gesch. der Juden in Deutschland*, p. 561; David Maggid, *Zur Gesch. und Genealogie der Günzburge*, St. Petersburg, 1899; *Keneset Yeḥezḳel*, 64b.

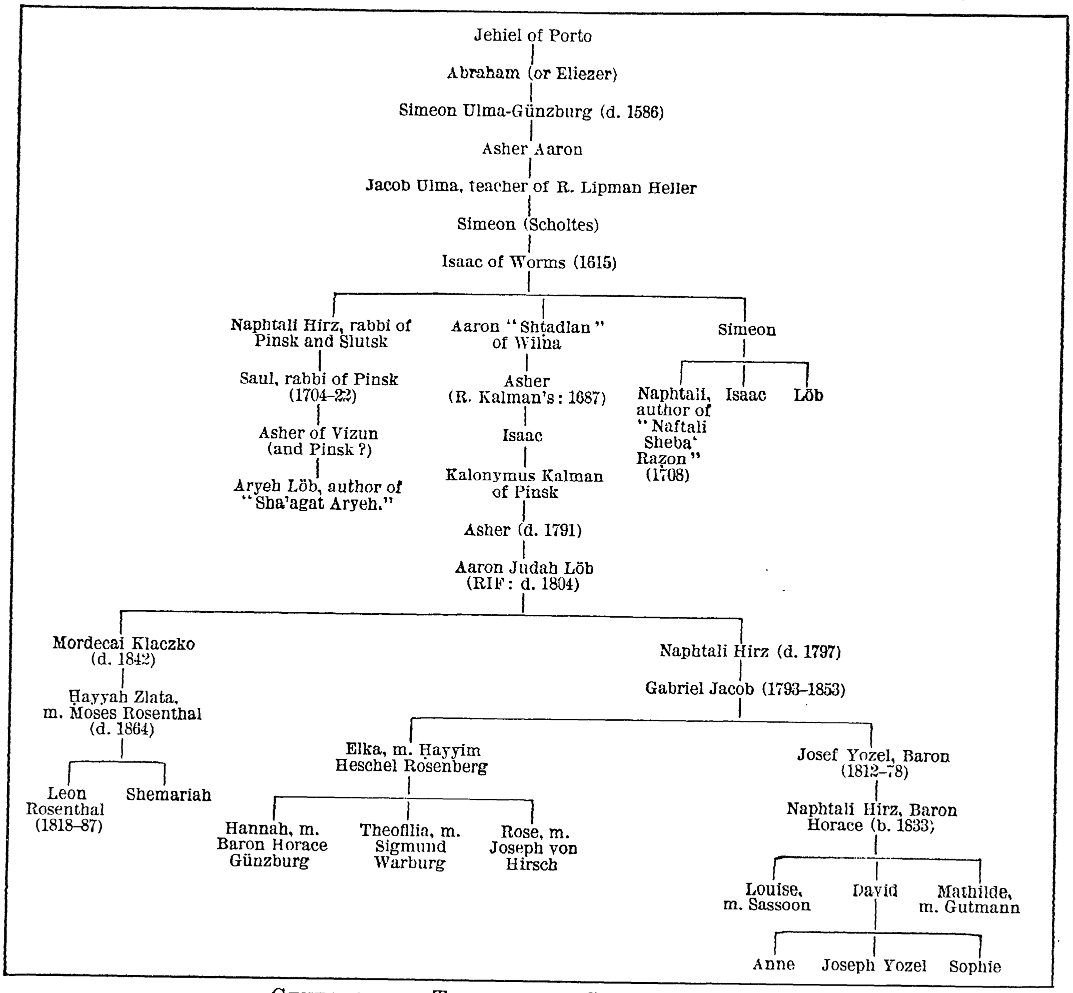
D. I. BR.

GÜNZBURG (also spelled **GINZBURG, GINSBERG, GINZBERG, GINSBURG, GÜNSBERG**): Family which originated in the town of GÜNZBURG. It is believed that the family went thither from the city of Ulm, Württemberg, and that for this reason the best-known progenitor of the family and some of his immediate descendants, as well as certain others, called themselves "Ulma-

Günzburg." The Ulm, Ulma, and Ullman families are supposed to be branches of the Günzburg family. Kaufmann ("R. Jair Chajim Bacharach und Seine Ahnen," p. 45, Treves, 1894) proves that "Gunz" and "Gaunz" are simply variants of "Günzburg."

When, early in the emancipation period, the Jews of Russia and of Austria were ordered by their governments to adopt family names, it was natural that many of them should choose a name so respected and pleasing as that of Günzburg. There is on record a lawsuit instituted by Baer Günzburg of Grodno against a Jewish family of that city who had adopted the same name under the decree of 1804 (Maggid, "Toledot Mishpeḥot Ginẓburg," p. 239, St. Petersburg, 1899). The court sustained the right of Jewish families to adopt any name they chose, and the number of Günzburg families accordingly increased.

The following is a part of the genealogical tree constructed by Maggid in the work quoted above:



Jehiel of Porto
Abraham (or Eliezer)
Simeon Ulma-Günzburg (d. 1586)
Asher Aaron
Jacob Ulma, teacher of R. Lipman Heller
Simeon (Scholtes)
Isaac of Worms (1615)
Naphtali Hirz, rabbi of Pinsk and Slutsk
Saul, rabbi of Pinsk (1704–22)
Asher of Vizun (and Pinsk?)
Aryeh Löb, author of "Sha'agat Aryeh."
Aaron "Shtadlan" of Wilna
Asher (R. Kalman's: 1687)
Isaac
Kalonymus Kalman of Pinsk
Asher (d. 1791)
Aaron Judah Löb (RIF: d. 1804)
Simeon
Naphtali, author of "Naftali Sheba' Raẓon" (1708)
Isaac
Löb
Mordecai Klaczko (d. 1842)
Ḥayyah Zlata, m. Moses Rosenthal (d. 1864)
Leon Rosenthal (1818–87)
Shemariah
Naphtali Hirz (d. 1797)
Gabriel Jacob (1793–1853)
Elka, m. Ḥayyim Heschel Rosenberg
Hannah, m. Baron Horace Günzburg
Theofilia, m. Sigmund Warburg
Rose, m. Joseph von Hirsch
Josef Yozel, Baron (1812–78)

GÜNZBURG, ASHER BEN LÖB. See Löw, Asher.

GÜNZBURG, BENJAMIN WOLF: Polish physician; Talmudic scholar of the eighteenth century. Contrary to the custom of the Polish Talmudists of that time, Günzburg turned his mind to the study of secular sciences. He studied medicine in the University of Göttingen, but did not neglect the Talmud. In 1737 he applied to Jacob Emden to determine the question whether he was allowed to dissect on Saturdays the bodies of dead animals. Emden's answer ("She'elat Ya'abeẓ," No. 45) shows that he held Günzburg in great esteem. Günzburg's medical work is entitled "De Medicina ex Talmudicis Illustrata," Göttingen, 1743. Hillel Noah Maggid thinks that Benjamin Wolf Günzburg of Ostrog, whose novellæ are to be found in Joshua Falk's "Goral Yehoshua'," may be identified with the physician of the Göttingen University.

H. R. M. Sel.

GÜNZBURG, DAVID, BARON: Russian Orientalist and communal leader; born at Kamenetz-Podolsk July 5, 1857. He was educated at home, his teachers being Adolph Neubauer, Senior Sachs, and Hirsch Rabinovich. At the age of twenty he received the degree of "candidate" at St. Petersburg University, after having attended the lectures of Stanislas Guyard at Paris and Baron Rosen at St. Petersburg; later he studied Arabic poetry under Ahlwardt at Greifswald (1879–80). He edited the "Tarshish" of Moses ibn Ezra in a fascicle which was issued by the Meḳiẓe Nirdamim Society, and prepared for the press the Arabic translation of the same work, with a commentary. He published also "Ibn Guzman" (Berlin), and wrote a series of articles on "Metrics," published in the memoirs of the Oriental Department of the Russian Archeological Society (1893) and of the Neo-Philological Society (1892), in the "Journal" of the Ministry of Public Instruction of Russia, and elsewhere.

Günzburg is an enthusiastic patron of Jewish art, and is publishing, with Stassov, "L'Ornement Hébreu" (Berlin, 1903). In this book he gives examples of Jewish ornamentation from various manuscripts from Syria, Africa, and Yemen. He has edited a catalogue of the manuscripts in the Institute for Oriental Languages. Besides he has contributed largely to the "Revue des Etudes Juives," to the "Revue Critique," to "Voskhod," to "Ha-Yom," and to the collections of articles in honor of Zunz, Steinschneider, Baron Rosen, etc.

Günzburg's library is one of the largest private libraries in Europe, and contains many rare books and manuscripts. He is one of the trustees of the St. Petersburg community, a member of the Committee for the Promotion of Culture Among the Jews of Russia, the central committee of the Jewish Colonization Association, the Society for Oriental Studies, the Scientific Committee of the Russian Department of Public Instruction, and a life-member of the Archeological Society of St. Petersburg and of the Société Asiatique of Paris.

H. R. S. J.

GÜNZBURG, GABRIEL JACOB BEN NAPHTALI HIRZ: Lithuanian financier and philanthropist; born at Wilna about 1793; died at Simferopol, Crimea, May 2, 1853. After Günzburg had been married at Vitebsk, he settled at Kamenetz-Podolsk. But his business was distributed over many other places, and he lived for a certain time at St. Petersburg. Günzburg applied his philanthropy to four towns, Wilna, Vitebsk, Kamenetz-Podolsk, and Simferopol; in the last-named town he built a hospital. On the proposition of the Russian minister of finances, Nicholas I. conferred on Günzburg the title of "honorary and hereditary citizen" (Oct. 22, 1848).

Bibliography: Fuenn, *Ḳiryah Ne'emanah*, p. 283; Maggid, *Toledot Mishpeḥot Ginẓburg*, pp. 78–81, 145–147.

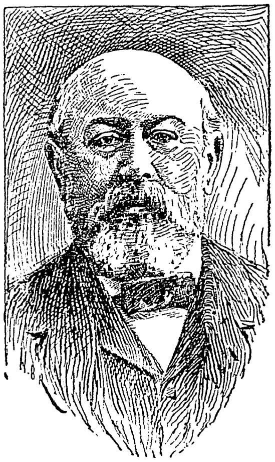
GÜNZBURG, HORACE, BARON: Russian philanthropist; born Feb. 8, 1833, in Zvenigorodka, government of Kiev, Russia, where he received his education. After the Crimean war his father, Joseph Günzburg, then a wealthy merchant and army contractor, settled with his family in St. Petersburg.

Horace first came before the public in 1863 as one of the founders of the Society for the Promotion of Culture Among the Jews of Russia, the only society of the kind in Russia. He was one of the charter members of the society, and after the death of his father in 1878 succeeded him in the presidency, which office he still holds. He was the largest contributor to its support and one of its most energetic workers. The work which made him so widely popular among the Jews was his unremitting effort, in which frequent appeals to the Russian government were involved, toward the improvement of the legal status of his coreligionists, and for the securing by legislation, as well as by other means, of their economic and moral welfare.



Horace Günzburg.

In the year 1870 he was summoned as an expert before the commission on the "Jewish question," which met under the auspices of the Ministry of the Interior.

He was chairman of the Jewish congress which, by permission of the government, assembled in St. Petersburg in 1882. In 1887 he was invited to participate in the discussions of the high commission on the Jewish question, under the presidency of Count Pahlen. In 1880 he became a member of the board of governors of the temporary commission for the organization of a society for the purpose of encouraging Russian Jews to engage in agriculture and trades. Since 1893 he has been chairman of the central committee of the Jewish Agricultural Society. One of the colonies in Argentine is named in honor of Baron Günzburg. In 1890 he was elected president of the Hygienic and Low-House-Rent Society of St. Petersburg. In 1901 he became president of the board of directors of the Jewish Agricultural Farms in Minsk, and director of the Jewish Agricultural School in Novo-Poltavka.

The Jewish community of St. Petersburg is also under obligation to Baron Günzburg for its synagogue, of which he is president. He is also the head of the new school erected in honor of the wedding of Czar Nicholas II. This institution is non-sectarian.

Baron Günzburg is also closely identified with other institutions of a non-sectarian character. He has been an honorary member of the committee of the Prince Oldenburg Infant Asylum since 1863, and honorary member of the Society for Improving the Condition of Poor Children of St. Petersburg since 1876. Between 1868 and 1872 he was consul-general of Hesse-Darmstadt. In 1871 the title "baron" was bestowed upon him by the Grand Duke of Hesse-Darmstadt, permission being given by the czar to accept that title of nobility. In 1880, 1884, and 1888 he received successively the titles of "counsel of commerce," "secretary of state," and "member of the council of commerce of the Treasury Department." For many years he was an alderman of St. Petersburg, but, upon the passage of a statute prohibiting the election of Jewish aldermen, vacated that office. Baron Günzburg was repeatedly elected trustee of the charitable affairs of the Stock Exchange of St. Petersburg and member of the council of the Stock Exchange Hospital. He contributed heavily to the erection of the latter institution. In 1898 he was elected member of the committee of the Society for the Dissemination of Commercial Knowledge, and in the same year became chairman of the house committee of the Women's Sewing-School of the Czarina Maria Alexandrovna. In 1899 he was made trustee of the School of Commerce of Czar Nicholas II. In 1900 he was chosen a member of the committee of the Russian Society for the Protection of Women. He is (1903) a member of the board of the Treasury Department of the Stock Exchange, and a member of the executive board of the St. Petersburg Archeological Institute. Even at his present advanced age he is often invited by the government to sit on commissions for the revision of general legislation. Very recently (1895, 1900–01) he has been associated with such imperial commissions for the amendment of the laws governing the Stock Exchange, stock companies, corporations, and mining companies. The seventieth birthday of Baron Günzburg, which was coincident with the fortieth anniversary of his entry upon an educational career, was celebrated all over Europe and also in New York and many other cities of the United States. On this occasion the Russian government conferred on the baron the medal of St. Anne (1st class). In New York a Baron de Günzburg Fund has been started, the interest of which will be given periodically as a premium for the best work on Jewish history and literature.

H. R. M. R.

GÜNZBURG, ILYA YAKOVLEVICH: Russian sculptor; son of Meyer Jacob; born at Grodno May, 1859. The sculptor Antokolski, on his way through Wilna in 1870, happened to notice one of young Günzburg's attempts at sculpture. Struck by the evidence of ability, he took the boy with him to St. Petersburg. Günzburg was then but ten years of age. He studied for a time with Antokolski, Ryepin, and Semiradski, and later accompanied his patron to Italy. On his return to St. Petersburg he entered the high school, and graduated in 1878.

In 1886 he was graduated from the St. Petersburg Academy of Arts, winning the small gold medal. In 1889 he was awarded a prize for his exhibits at the Paris Exhibition. Since then his work has appeared regularly among the annual exhibits of the St. Petersburg Academy of Arts, and also at other European exhibitions. He has executed about twenty studies in child life, besides a number of portraits and statuettes of famous Russians, such as Tolstoi, Rubinstein, Tchaikovski, D. P. Mendeleyev, and others, as well as a number of busts. He exhibited twelve studies at the Paris Exposition of 1900, and was awarded a gold medal.

His elder brother, **Boris Yakovlevich Günzburg**, is a railway engineer and constructor in the service of the Russian government.

Bibliography: *Mir Bozhi*, May and June, 1902 (an autobiographical sketch).

H. R. D. G.

GÜNZBURG, JOSEPH BEN MORDECAI: Russian Talmudist; lived at Brest-Litovsk in the second half of the seventeenth century and at the beginning of the eighteenth. His father officiated as rabbi of Brest from 1664 until 1685, and Joseph occupied for many years the position of communal leader. He was the author of "Leḳeṭ Yosef," a lexicon for preachers, giving in alphabetical order all the haggadot and the moral sentences found in rabbinical literature, published first in 1688 (Hamburg ?). He wrote also novellæ on the Pentateuch, "Ḥiddushe Torah," which were published together with those of Isaac Benjamin Wolf, author of "Naḥalat Binyamin," under the title "Leḳeṭ Yosef," Offenbach, 1716.

Bibliography: Steinschneider, *Cat. Bodl.* col. 1471; Fürst, *Bibl. Jud.* i. 348; Zedner, *Cat. Hebr. Books Brit. Mus.* p. 348.

G. I. Br.

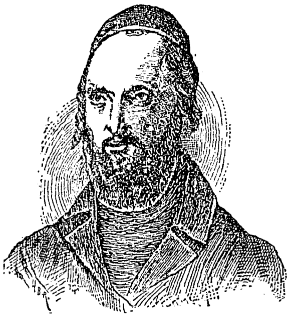
GÜNZBURG, JOSEPH YOZEL BEN GABRIEL JACOB: Russian financier and philanthropist; born 1812; died at Paris Jan. 12, 1878. Having acquired great wealth during the Crimean war, Günzburg established a banking firm at St. Petersburg. There he began to labor on behalf of the welfare of the Jewish community. In Nov., 1861, he was appointed by the Russian government member of the rabbinical commission, the meetings of which lasted five months. He exerted himself to raise the standard of the education of the Jews, and to this effect he founded in 1863 with the permission of the Russian government the Society for the Promotion of Culture Among the Jews, of which he filled the office of president till his death. Owing to Günzburg's efforts, the regulations concerning the military service of the Jews were in 1874 made identical with those of the peoples of other creeds. He also instituted a fund for the Talmud Torah of Wilna, his father's native town. Günzburg was ennobled by the Grand Duke of Hesse-Darmstadt Nov. 9, 1870, and created baron Aug. 2, 1874.

Bibliography: Fuenn, *Keneset Yisrael*, p. 460; *Archives Israélites*, 1878, p. 89.

H. R. M. Sel.

GÜNZBURG, MORDECAI AARON BEN JUDAH ASHER: Russian Hebrew writer; born at Salanty, government of Kovno, Dec. 3, 1795; died at Wilna Nov. 5, 1846. Having studied Hebrew and Talmud under his father, he continued their study at Shavly, until 1816, under his father-in-law. Thence he went to Polangen and Mitau, Courland, where he taught Hebrew and translated legal papers into German. His conscientious and exact teaching won him considerable influence over the Jews of Courland, where, because of his thorough knowledge of German, he came to be known as the "Germanist." He did not stay in Courland long, but after a period of wandering settled at Wilna.

His philosophy of religion was based on the only two books which were within his reach when he was a young man: a Hebrew translation of Mendelssohn's "Phaëdon" and the "Sefer ha-Berit" of Phinehas Elijah b. Meïr. He struggled energetically against Cabala and superstition as the sources of the Ḥasidic movement; but he was at the same time opposed to freethinking, and regarded the German rabbis as unfit for the rabbinical office. Günzburg was the creator of the modern Hebrew prose style. He never hesitated to borrow expressions from Talmudic literature or even from the modern languages, but the expressions he borrowed never conflicted with the spirit of the Hebrew. He begins a chapter generally with a fable. Günzburg's style is in its form somewhat archaic, but is at the same time simple and clear. He exerted a salutary influence over the masses of his coreligionists, and especially over the younger generation. He wrote:



Mordecai Aaron Günzburg.

Gelot ha-Areẓ ha-Ḥadashah, on the discovery of America, adapted from Campe. Wilna, 1823.

Toledot Bene ha-Adam, a universal history, adapted from Politz's "Weltgeschichte." First part *ib.* 1832. A few chapters of the second volume were published in the "Leḳeṭ Amarim," a supplement to "Ha-Meliẓ," 1889 (pp. 53-81).

Ḳiryat Sefer, a collection of 102 model letters in Hebrew. Wilna, 1835.

Mal'akut Filon ha-Yehudi, an adaptation of Eckhard's German translation of Philo's embassy to Caligula. Wilna, 1837.

'Ittote Russiya, a history of Russia. Wilna, 1839.

Ha-Ẓarfatim be-Russiya, a history of the French invasion of Russia in 1812-13. Wilna, 1842.

Maggid Emet, a refutation of Lilienthal's "Maggid Yeshu'ah." Leipsic, 1843.

Debir, a collection of letters, tales, and sketches, mostly translations from the German. Wilna, 1844-62.

Pi ha-Ḥirot, a history of the Russian invasion of France in 1813-15. Wilna, 1844.

Yeme ha-Dor, a history of Europe from 1770 to 1812. Wilna, 1860.

Ḥamat Dammeseḳ, a history of the Damascus affair of 1840. Königsberg, 1860.

Abi'ezer, autobiography. Wilna, 1864.

Tiḳḳun Laban ha-Arami, a satirical poem. Wilna, 1864.

Ha-Moriyyah, a collection of brief essays. Warsaw, 1878.

Lel Shimmurim, a vision, adapted from Zschokke's "Abenteuer." Wilna, 1884.

H. R. M. SEL.

GÜNZBURG-ULMA, SIMON BEN ELIEZER: German scholar; communal worker; born at Günzburg, Bavaria, 1506; died at Burgau Jan. 9, 1585. He was the first who adopted and transmitted to his descendants the name "Günzburg" as a family name. He was a rich merchant, and traveled around in Germany and Poland in the interests of his business. He was also a great Talmudist, and had some knowledge of secular sciences. It is probably owing to these facts that Simon Günzburg is variously described by different historians. Albertrandy, quoted by Sternberg ("Gesch. der Juden in Polen," p. 148), says: "Simon, also called Selig Günzburg, was known as a celebrated architect and geometer. He wrote many works, and was the head of the rabbinate and yeshibah." It seems that Albertrandy confused Simon Günzburg with the physician Selig Günzburg of Slutsk. Czacki cites him as the court physician of King Sigismund August and chief of the community of Posen (Grätz, "Gesch." ix. 448). But Simon Günzburg never settled at Posen. His residence was first at Günzburg, where he built a synagogue and established a cemetery; and then he settled at Burgau, a neighboring town. There also he worked for the welfare of the community, for which reason his name is commemorated in a special prayer.

H. R. M. SEL.

GURLAND, JONAH ḤAYYIM: Russian and Hebrew writer; born at Kleck, government of Minsk, in 1843; died at Odessa March 14, 1890. At the age of ten Gurland entered the rabbinical school of Wilna, from which he graduated as rabbi in 1860. Then he went to St. Petersburg, and was admitted to attend the lectures of the philological faculty, devoting himself to the study of Semitic languages under the direction of Chwolson. During his stay at the university Gurland translated into Russian the fables of Lokman, and published a dissertation on the influence of the Arabian philosophy on Moses Maimonides—a subject proposed by the faculty, and for his treatment of which Gurland received a gold medal. On obtaining in 1864 his first degree ("candidatus") from the university, Gurland devoted three years to the study of the Firkovich collection of Karaite manuscripts in the Imperial Library. The result of his study was the publication, in Russian, of a work on the life of Mordecai Comtino and his contemporaries, which gained for its author the degree of "magister." Gurland was then charged with the cataloguing of the Hebrew books of the Imperial Library. In 1869 he went to Yekaterinoslav, where he was appointed examining magistrate in one of the precincts. In 1873 Gurland was appointed inspector of the normal colleges for teachers at Jitomir, a position which he held for seven years. The government conferred upon him two orders and the title of "college councilor." In 1880, in consequence of illness, Gurland went to Germany, where he sojourned for three years. On his return, he settled at Odessa, and founded there a classic and scientific college of eight classes, with a curriculum including Jewish history and Hebrew literature. In 1888 Gurland was elected government rabbi of Odessa.

Gurland was the author of the following: (1) "O Vliyanii Filosofii Musulmanskoi Religii na Filosofiyu Religii Moiseya Maimonida," St. Petersburg, 1863. (2) "Ma'amar ha-Tammuz," Chwolson's explanation of the term "Tammuz" as it is used by the prophet Ezekiel, translated from German into Hebrew, Lyck, 1864. (3) "Ginze Yisrael be-Sankt Petersburg," on the Karaite manuscripts of the Imperial Library of St. Petersburg. The work is divided into four parts, containing the following subjects: (*a*) a description of voyages to Palestine made by three Karaites of the Crimea in the seventeenth and eighteenth centuries, published at Lyck, 1865; (*b*) a description of the manuscripts of the Imperial Library dealing with mathematics, astronomy, and astrology, published in Russian and German, St. Petersburg, 1866; (*c*) extracts from the writings of Mordecai Comtino, Caleb Afendopolo, and Abraham Bali, published as an appendix to Gurland's dissertation "Novyye Materialy dlya Istorii Yevreiskoi Literatury XV Stolyetiya. M. Kumatiano, Yevo Zhizn, Sochineniya i Sootechestvenniki," St. Petersburg, 1866; (*d*) "Penine ha-Melizot," a collection of sentences, proverbs, and maxims of divers sages, *ib.* 1867. (4) "Tif'eret le-Mosheh, Gloire à Moïse," in honor of Moses Montefiore, St. Petersburg, 1867. (5) "Luaḥ Yisrael," a Jewish almanac in Russian and Hebrew, published first (only Russian) at Kiev, 1877; secondly, at Warsaw, 1878; thirdly, at St. Petersburg, 1879; fourthly, *ib.* 1880. (6) "Luaḥ Yeshurun," Hebrew and Russian calendar for the year 1884, St. Petersburg, 1883. (7) "Le-Ḳorot ha-Gezerot be-Yisrael," a collection of memoirs, documents, and elegies on the persecutions of the Jews in Poland in 1648, with historical annotations, published in "Oẓar ha-Sifrut," 1887–89.

His brother, **Jacob Gurland,** rabbi of Poltava, is the author of "Kebod ha-Bayit," on the rabbinical school of Wilna, 1858.

GUTAH, ZERAHIAH: Talmudic author of the seventeenth century; died at Cairo in 1647. He was a pupil of Jehiel Bassani and Joseph di Trani while living in Constantinople. He removed later to Jerusalem, and thence to Hebron, and finally settled in Cairo. Among his disciples was Judah Sharaf. Two years after Gutah's death his remains were taken to the Holy Land and there buried (see AZULAI). Under the title "Zera' Ya'aḳob" Gutah wrote a commentary on the "Bet Yosef" of Caro; he also composed various haggadic works and made collections of responsa. One volume of these, with the approbations of Bassani and Trani, has been preserved to the present day. Gutah's works are in manuscript only.

D. L. GRÜ.

GÜTERBOCK, LUDWIG: German physician; born at Berlin Oct. 23, 1814 (University of Berlin, M.D. 1837); died there Feb. 28, 1895. He settled in his native city, and practised there until his death.

Güterbock wrote several essays for the medical journals, and was one of the collaborators on the "Jahresberichte über die Fortschritte der Gesammten Medicin in Allen Ländern." He was also the author of "Schönlein's Klinische Vorträge in dem Charité-Krankenhause zu Berlin," Berlin, 1840 (3d ed., 1844), and "Dr. Schönlein als Arzt und Klinischer Lehrer," *ib.* 1842.

GÜTERBOCK, PAUL: German surgeon; born at Berlin June 2, 1844; died there Oct. 17, 1897. He was educated at the universities of Würzburg and Berlin, graduating (M.D.) in 1865. After postgraduate courses in Vienna, Paris, London, and Edinburgh, he began to practise in Berlin in 1866, becoming at the same time assistant at the surgical clinic of the university. In 1873 he was admitted to the medical faculty of the university as privatdocent in surgery; in 1884 he was appointed assessor to the health board of Brandenburg; in 1894 he received the title of "professor," and in 1896 of "Geheimer Medizinalrath." His special surgical province was in male genital diseases. He was one of the collaborators of the "Jahresberichte über die Fortschritte der Gesammten Medicin in Allen Ländern," and has written many essays in the medical journals. Among Güterbock's works the following may be mentioned: "Die Neueren Methoden der Wundbehandlung auf Statistischer Grundlage," Berlin, 1876; "Die Englischen Krankenhäuser," *ib.* 1881; "Die Chirurgischen Krankheiten der Harn- und Männlichen Geschlechtswerkzeuge," Vienna, 1890–97.

GUTMANN, DAVID, RITTER VON: Austrian merchant; philanthropist; brother of Wilhelm von Gutmann; born at Leipnik, Moravia, Dec. 24, 1834. As president of the Israelitische Allianz of Vienna he did much for the relief of his persecuted coreligionists in Russia in 1882, as well as in Rumania in 1900, and after the Kishinef outrages in 1903. He is president of the Jews' poorhouse and of the Baron de Hirsch school-funds for Galicia, and is a member of the board of trustees of the Jewish congregation. In 1879 Gutmann was created Knight of the Iron Crown and raised to the hereditary nobility.

GUTMANN, MOSES: Bavarian rabbi; born in Baiersdorf 1805; died at Redwitz Feb. 1, 1862; son of Yom-Ṭob Gutmann. Moses Gutmann was educated at Erlangen University, and when twenty-two years old was elected district rabbi of Redwitz, which office he held for thirty-five years. He was the first rabbi of Bavaria with an academic education as well as a thorough Talmudical training who espoused the cause of Reform, to which fact his contributions to Geiger's "Zeitschrift für Jüd. Theologie," Stein's "Volkslehrer," and several of his responsa bear witness. He published a translation, with notes, of the Apocrypha, under the title "Die Apokryphen des A. Testaments aufs Neue aus dem Griechischen Text Uebersetzt" (Altona, 1841). His translation of Josephus with a scholarly Latin commentary has remained in manuscript.

GUTMANN, WILHELM, RITTER VON: Austrian merchant; philanthropist; born at Leipnik, Moravia, Aug. 18, 1825; died at Vienna May 17, 1895. Destined for a teacher, the unlooked-for death of his father made it necessary for him to enter into commerce to support his mother and two younger children. Utter failure was the result of his first venture, and the savings of his parents were entirely lost. As manager of a lime-works his attention was directed to the coal-deposits of Silesia, and he planned for their development. In 1853 he and his brother David established the firm which, during the war of 1859-60, despite the difficulties then surrounding business ventures, supplied coal for all the railroads, for all the great factories throughout the empire, and for the cities of Vienna, Budapest, and Brünn. Gutmann Bros. leased some coal-mines from the Rothschilds in 1865, and purchased outright other valuable carboniferous properties in Silesia, Galicia, and Hungary. The close connection between coal and the production of iron easily led the Gutmanns to combine their interests with the Witkowitz iron-works, which they afterward owned conjointly with the Rothschilds and the counts Larisch and Andrassy. With Kuffner they built (1871) the first sugar-factory in Austria.

In philanthropy Gutmann displayed no less enthusiasm and activity than in business. Numerous institutions for the care of the poor and the sick either owe their foundation solely to him or are under obligation to his generous beneficence for assistance. Of such may be mentioned: girls' orphanage at Döbling, founded by the brothers Wilhelm and David, and endowed with 300,000 fl. ($120,000); a hospital for children, with fifty beds, at the Polyklinik in Vienna, to which organization they also gave 60,000 fl. ($24,000) for the erection of the premises. They founded also a hospital at Krems, which accommodates 60 cripples.

Wilhelm von Gutmann was elected to the Lower Austrian Diet, where he gave impetus to the reform of the poor-laws. The community conferred upon him its highest honors. He held the offices of president of the community (1890–92) and of the Jewish Theological Seminary. Through a daughter by a second marriage he became father-in-law to Sir Francis Montefiore. By will he left 200,000 fl. ($80,000), the interest of which was to be divided equally among the indigent Jews and Christians of Vienna. Gutmann was delegate of the Vienna Chamber of Commerce in the Diet of Lower Austria, and honorary citizen of Liepnik and Mährisch-Ostrau.

GUTTMANN, JAKOB: Hungarian sculptor; born in Arad 1811; died in Vienna April 28, 1860. In his early childhood he carved toys, and in 1833 went to Vienna to satisfy his artistic cravings. Here he became an engraver, and worked for three years with his burin. He then received a scholarship from Prince Metternich, which enabled him to study at the Vienna Academy of Fine Arts. He remained here until 1843, receiving awards for an embossed profile in wax of the emperor Joseph II. and for a steel-engraving of Metastasio.

In 1844 Guttmann produced a bronze statuette of Baron Solomon von Rothschild from a portrait, and was commissioned by the baron to execute a replica in marble. The baron also paid Guttmann an annuity, thus enabling him to go to Rome. Here he modeled his bust of Pope Pius IX., and completed his masterpiece, "Der Blumenspender."

While in Rome, Guttmann was deeply interested in the ghetto, which he described in letters to his father. Later he went to Paris; and in 1857 he became insane.

GUTTMANN, PAUL: German physician and medical author; born at Ratibor, Prussian Silesia, Sept. 9, 1833; died in Berlin May 24, 1893. He received his education at the gymnasium of his native town and at the universities of Berlin, Vienna, and Würzburg, graduating from the last-named as doctor of medicine in 1858. The following year he engaged in practise as a physician in Berlin, becoming a privat-docent at the university in 1867, and in 1879 chief physician of the Moabit municipal hospital.

Guttmann's reputation as a clinician was widely extended. He was the author of about eighty essays on different medical subjects. The following are his principal works: "Die Physiologie und Pathologie des Sympaticus" (with Albert Eulenburg), which was published in Berlin in 1873, and which, on its republication in London in 1879, received the Astley-Cooper prize; and "Lehrbuch der Klinischen Untersuchungsmethoden," Berlin, 1884. From 1885 to 1893 Guttmann was the editor of the "Journal für Practische Aerzte."

GUTTMANN, SAMUEL: German gynecologist and medical writer; born at Ostrowo, Prussia, 1839; died at Berlin Dec. 22, 1893. After completing his course at the gymnasium he entered the University of Berlin, graduating thence as doctor of medicine in 1864. In 1866 he settled as a physician temporarily in Drebkau, Prussian Silesia, but subsequently removed to Berlin, where he succeeded in building up a large practise, and became a specialist in gynecology.

For a few years he was a regular contributor to the "Jahrbuch für Practische Aerzte," and was also assistant editor of the "Deutsche Medizinische Wochenschrift," succeeding Paul Albrecht Boerner in the editorship on the death of the latter in 1885. At this time he was also editing the "Reichsmedizinal-Kalender." He was one of the collaborators in the series of publications, edited by Leyden, on the "Influenza Epidemie von 1890–91."

Guttmann wrote many essays on medical subjects; but his forte lay in organization, for which he found a wide field in connection with the journals with which he was editorially associated.

GUTZMANN, HERMANN: German physician; born at Bütow, in Pomerania, Jan. 29, 1865. He received the degree of doctor of medicine from the University of Berlin in 1887, and since 1889 has practised as a specialist in diseases of the vocal organs.

Gutzmann has published: "Verhütung und Bekämpfung des Stotterns in der Schule," Berlin, 1889; "Vorlesungen über die Störungen der Sprache," *ib.* 1893; (with Th. S. Flatau) "Die Bauchrednerkunst," *ib.* 1894; and "Ueber das Stottern," *ib.* 1897. Since 1891 he has been editor and publisher of the "Monatsschrift für die Gesammte Sprachheilkunde."

GUZIKOV, MICHAEL JOSEPH: Russian musician; born at Shklov 1806; died at Brussels Oct. 21, 1837. He was descended from a family of talented musicians, and became while still a youth a skilful performer on many instruments. Accompanied by his father and other members of the family, he made concert tours in Russia, played before the emperor Nicholas and the empress in 1828, and, after successful concerts in Moscow and Kiev, visited Odessa, where he met Lamartine and was advised by him to make a tour of Europe. He resided in Vienna for five months, where he was distinguished by the emperor and Prince Metternich, and befriended by artists and musicians. Guzikov next visited Prague, Dresden, and Berlin, and was well received at the court of Berlin. From Berlin he went to Paris, and thence to Brussels. Here he fell a victim to nervous prostration, of which he died.

Guzikov was the inventor of the straw violin, on which he played with such masterly skill as to create great enthusiasm wherever he went. There are many talented musicians among the Guzikov family in Russia.

H

HAARBLEICHER, MOSES M.: German author; born in Hamburg Nov. 14, 1797; died there Sept. 25, 1869. Following the example of his father, the founder of the Jewish School of Hamburg, and under the influence of his guardian, the father of Gabriel Riesser, he interested himself early in the affairs of the Jews. He took an active part in the establishment of the Tempelverein, being one of the collaborators in the revision of its prayer-book; and he founded the Verein zur Beförderung Nützlicher Gewerbe Unter den Juden, which he directed from 1823 to 1840. In 1840 he became secretary of the congregation of Hamburg. Haarbleicher, who possessed an extraordinary knowledge of Romance and Germanic languages, and wrote with ease in Hebrew, was an acute and clever critic. Forty of his songs and poems are contained in the hymn-book of the Hamburg congregation. His poem "Hagbahah" was often ascribed to Gabriel Riesser. Some years prior to his death he published the first part of "Zwei Epochen aus der Gesch. der Deutsch-Israelitischen Gemeinde in Hamburg," Hamburg, 1866, a valuable work which remained unfinished.

HAAS, ROBERT: German Lutheran minister; lived in the first half of the nineteenth century, in the duchy of Nassau; pastor in the villages of Grävenwiesbach, Dotzheim near Wiesbaden, Dickschied near Langenschwalbach. He was interested in Jewish affairs, and advocated the civic equality of the Jews. Among his friends was Abraham Geiger. He indorsed the rabbinical convention held at Wiesbaden in 1837. In the same year he addressed a circular letter to "all Christians in Germany" to aid in establishing a faculty of Jewish science and a Jewish seminary in a German university. He was the author of "Das Staatsbürgertum der Juden vom Standpunkt der Inneren Politik," Frankfort-on-the-Main, 1837, and of other works.
s. M. Si.

HAAS, SIMḤAH BEN JOSHUA: Traveler and preacher; born in Dobrowitz, Bohemia, 1710; died in Brahilov 1768. He was father-in-law to Solomon Dubno, and was a preacher in Brahilov. In 1764 he wrote an account of his journey to Palestine, "Ahabat Ẓiyyon" or "Sippure Ereẓ ha-Galil" (Grodno, n.d.). A large portion of this book in its printed form was, however, written by the Karaite Samuel ben David, an earlier traveler in Palestine. Haas also published "Neṭi'ah shel Simḥah," specimens of Hebrew poetry and rhetoric (Grodno, 1753), and "Leb Simḥah," on morals and ascetics (*ib.* 1757).

HA-ASIF ("The Harvest"): Hebrew yearbook, edited and published by Nahum Sokolow in Warsaw. Its first volume (5645) appeared in 1884; it continued to appear regularly every year until 1889, when the fifth volume (5649) came out at the end instead of at the beginning of the Jewish year. The sixth and last volume (5654) appeared in 1893. The "Sefer ha-Shanah" (Book of the Year), which is now annually published by Sokolow, is considered a continuation of "Ha-Asif." The "Sefer Zikkaron," a biographical dictionary of contemporary Jewish authors, was published as a supplement to the fifth volume of "Ha-Asif."

Most of the better-known Hebrew writers of the day have contributed to the six volumes of "Ha-Asif," which form an important collection of literary, historical, biographical, and popular scientific essays. They also contain poems, sketches, and novels, some of which possess considerable merit; while its yearly reviews, obituaries, and descriptions of Russo-Jewish communities are of great value to Jewish biography and history. Samuel Alexandrow's "Masseket Nega'im" (Warsaw, 1886) is a criticism of the first two volumes of "Ha-Asif." A list of other reviews of one or more of its numbers is given in the "Bulletin of the New York Public Library," vi. 259.

HABAIAH or **HOBAIAH** (חֲבַיָּה, חָבַיָּה): Head of a family of priests who returned from Babylon with Zerubbabel; *not being able to prove their* genealogy, they were excluded from the priesthood (Ezra ii. 61; Neh. vii. 63). In I Esd. v. 38 the name is given as "Obdia."

E. G. H. M. Sel.

HABAKKUK (חבקוק; LXX. 'Αμβακούμ; Vulgate, "Habacuc"): Prophet; author of the eighth in the collection of the twelve minor prophetical books. The etymology of the name of the prophet is not clear. It seems to be a loan-word representing the Assyrian "ḫambaḳûḳu," a garden-plant (Friedrich Delitzsch, "Prolegomena," p. 84; König, "Historisch-Kritisches Lehrgebäude der Hebräischen Sprache," ii. 1, 473, on the vocalization), and has the appearance of being a writer's pseudonym (F. E. Peiser, "Der Prophet Habakuk," in "Mitteilungen der Vorderasiatischen Gesellschaft," 1903, i. 12). That he was a Levite has been urged on the strength of the postscript to ch. iii. (verse 19, "on my stringed instruments"), which indicates that he owned instruments: only a Levite was authorized to use an instrument to accompany his songs in the Temple. The superscription of the Septuagint apocryphon Βὴλ καὶ Δράκων, in the Codex Chisianus, also designates him a Levite.

The absence of exact information concerning his life left a vacuum that has been filled by myths and legends (see Franz Delitzsch, "De Habacuci Prophetæ Vita"). The above-named apocryphon makes him a contemporary of Daniel, whom he was miraculously privileged to visit in the lion's den and supply with food. In this Greek story his father's name is given as "Jesus" (Joshua). Jewish tradition makes him the son of the Shunammite woman (see Elisha), but nevertheless a contemporary of Daniel (see "Seder ha-Dorot"; Abravanel's commentary to Habakkuk; Zohar, Lek Leka; Neubauer, "The Book of Tobit," Appendix). Of the many conceits current among the cabalists with reference to this prophet, the most curious was that which declared him to be the reincarnation of Adam. His grave was shown at several places (see Hukkok).

The Age and Home of Habakkuk.

Peiser (*l.c.*) contends that Habakkuk is the pseudonym of a Judean prince held as a hostage in Nineveh, and who witnessed the attack of the Medes, in alliance with Chaldea and Babylon, in 625 B.C. But his book announces a second attack. This prince may have been the son or grandson of Manasseh. Peiser shows that Habakkuk displays remarkable familiarity with Assyrian literature, his similes indicating quotations from, and adaptations of, Assyrian mythological writings. By others, Habakkuk is made the contemporary of Jeremiah and a resident of Jerusalem, after the "discovery" of Deuteronomy (621 B.C.), but before the death of Josiah (609 B.C.). By many Jewish commentators he is assigned to the reign of Manasseh. He is, however, clearly under the influence of Isaiah; and the view which makes him a younger disciple of the greater prophet, advanced by Walter K. Betteridge in "Journal of American Theology," Oct., 1903, seems to meet best the situation reflected in the book. The Assyrians, originally regarded by the Prophets as appointed agents of Yhwh, looked upon themselves as "gods" (Isa. xiv.); but under Sennacherib, through a rebellion of the Babylonians (the Chaldeans), the plans of the conqueror are thwarted.

E. G. H.

HABAKKUK, BOOK OF.—Biblical Data: One of the twelve minor prophetical books. It readily falls into two parts: (1) ch. i. and ii.; (2) ch. iii. The first part is a "massa" (a condemnatory prophecy). But contrary to the usage in other prophetical books, it is not stated against what people the prophecy is spoken. As it now stands in the Masoretic text, the first part is in the form of a dialogue. Ch. i. 2–4 laments the prevailing moral corruption, which God does not seem to heed; i. 5–11 contains the divine announcement of an impending judgment through the Chaldeans; i. 12–17 gives the prophet's complaint of the excessive pride and cruelty of the enemy. In ch. ii. God admonishes Habakkuk not to judge hastily that evil is triumphant, but to remain confident (1–4). Five "wos," the contents of the "mashal" or "taunting proverb" (5–6), phrased by the very people oppressed by the conqueror, are enumerated (6, 9, 12, 13, 19). Ch. iii. is a psalm reciting various theophanies, describing God's warlike power, which bends earth, mountains, and rivers to His purposes—yea, even sun and moon, in behalf of His people. The song concludes with a declaration that though the blessings of nature shall fail in days of dearth, the singer will rejoice in the Lord (17–19).

Contents.

Style.

The book abounds in striking expressions and rare words, *e.g.*, the description of the invasion of the Chaldeans (i. 6 *et seq.*); of God as having "eyes too pure to behold evil" (i. 13); of "men as fishes of the sea" (i. 14); of the worship of the fisherman's implements (i. 16); of "the stone that crieth out" (ii. 11); of the folly of idolatry (ii. 18–19). Ch. iii. especially is rich in striking similes (14–15). The book is remarkable also for originality. The author departs from the usual method of the Prophets. In their addresses the nation is central; in Habakkuk's it is God and His government of the world. He attempts to unravel the meaning of God's tolerance of tyranny and wrong. In his questions Habakkuk voices doubts to God, though not against God (G. A. Smith, "The Twelve Prophets," ii. 130 *et seq.*).

——**Critical View:** Ch. i. and ii., on the whole, are regarded as the work of one prophet. Still, the text as now presented has been found to contain certain difficulties. Taking i. 2–4 to be descriptive of Israel's moral corruption, critics have argued that this section could not have been part of a prophecy devoted to the setting forth of the wrongs under which Israel was suffering, a different sense thus attaching to the "wicked" and "righteous" in i. 4 and i. 13 respectively. Giesebrecht ("Beiträge zur Jesaiakritik," pp. 197 *et seq.*) and Wellhausen ("Kleine Propheten," in "Vorarbeiten und Skizzen") therefore consider i. 5–11 to be an older and independent prophecy written previous to the remainder of i. and ii.; ch. i. 12 is regarded as the sequel to i. 4. The subject of the complaint in i. 2 is different from that in ii. 1. Kirkpatrick ("Doctrine of the Prophets," p. 268) holds the book as a whole to be the fruit of religious reflection, giving conclusions reached only "after a prolonged mental struggle."

That i. 5–6, where the power of the Chaldeans is represented as still of the future, and i. 13–16, ii. 10, 17 disagree, though their descriptions of foreign nations appear to be based on actual observation, is another difficulty raised by critical scholars. Budde (in "Studien und Kritiken," 1893, pp. 383 *et seq.*), reverting to a certain extent to Kuenen's disinclination to assume an earlier and a later section (see Kuenen, "Historisch-Critisch Onderzoek," ii. 386 *et seq.*, Leyden, 1889), showed that Habakkuk had in mind two world-powers: an oppressor (i. 2–4), and the Chaldeans, appointed to punish him (i. 5 *et seq.*). But this necessitates the placing of i. 5–11 after ii. 4. The oppressor to be destroyed is Assyria, and the Chaldeans are the implement of God's judgment. It is of the Assyrian's pride that the prophet speaks, not of the Chaldeans' presumptuousness.

Ch. iii. is a psalm, not free from mythological elements and not by Habakkuk. It must have formed part of a liturgical collection, accidentally incorporated with Habakkuk's prophecies (Stade's "Zeitschrift," iv. 157 *et seq.*). The text is corrupt in many places (Wellhausen, "Die Kleinen Propheten," 3d ed.). Verses 17–19 are additions by later hands, verse 18 being a eulogy, such as is frequently found at the close of liturgical songs.

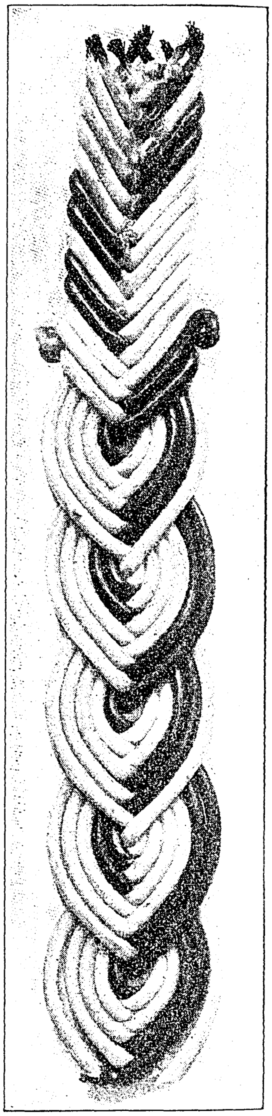
HABDALAH or **ABDALAH** or **ABDALTA** (הבדלה, אבדלה, אבדלתא = "separation"; "distinction"): The rabbinical term for the benedictions and prayers by means of which a division is made between times of varying degrees of holiness, *e.g.*, between Sabbath and work-day, festival and work-day, or Sabbath and festival. The rabbinical law requires that a formal separation be made between holy and profane times, and prohibits the resumption of ordinary work after a holy day until such division shall have been made. This is accomplished by pronouncing the Habdalah. At the evening service of a day following one of greater holiness, words expressing the distinction are inserted in the "'Amidah"; and just before the conclusion of the service a special Habdalah ceremony is performed. This is begun, in all cases, by pronouncing a benediction over a cup of wine, or, if wine can not be obtained, over any other beverage except water ordinarily used in the country where the ceremony takes place. At the conclusion of the Sabbath are added brief benedictions over spices and a freshly kindled light. These are followed by a lengthier benediction in which the distinction between the holy and the profane is emphasized, and thanks are given to God as the Author of this distinction.



Habdalah Light.

Blessing Over Light.

While pronouncing the benediction over the light it is customary to open and close the hands and to gaze at the finger-nails. For this, three reasons are given: (1) in order to obey the Talmudic precept which prohibits the pronunciation of a benediction over light unless one derives some advantage therefrom ("En mebarekin 'al ha-ner 'ad she-ye'otu le-oro"; Ber. 53b); (2) because the nails in their unceasing

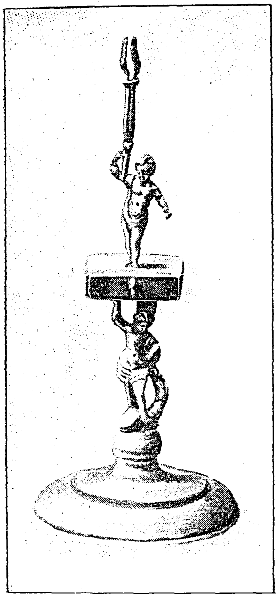
growth are a symbol of the prosperity which, it is hoped, the week will bring ("Ṭur," in the name of Hai Gaon); (3) because the blood, *i.e.*, the life, can be seen through the fingers.

Some modern rabbis consider the blessing over the light as a recognition of the importance of the element fire as an instrument designed by God for the economic subjugation of the world (S. R. Hirsch, "Choreb," p. 109). The usual interpretation is that light having been created by God at the beginning of the week, it is therefore proper to pronounce a benediction over it at the beginning of each recurring week (Gen. R. xii.). A more natural explanation seems to be that, since fire may not be used in any form on the Sabbath, its employment is a demonstration of the fact that the Sabbath has ended and the working-days have recommenced; its use, therefore, is very appropriate in a Habdalah or separation ceremony. This explanation is corroborated by the fact that the blessing over the light forms no part of the Habdalah after festivals on which the use of fire is permitted, while in the Habdalah after the Day of Atonement, which resembles the Sabbath in the prohibition of the use of fire, this benediction is inserted. The candle or taper over which the blessing is spoken must have at least two wicks, giving two or more lights, since the language of the benediction is plural, "who creates the lights of fire" ("bore me'ore ha-esh").



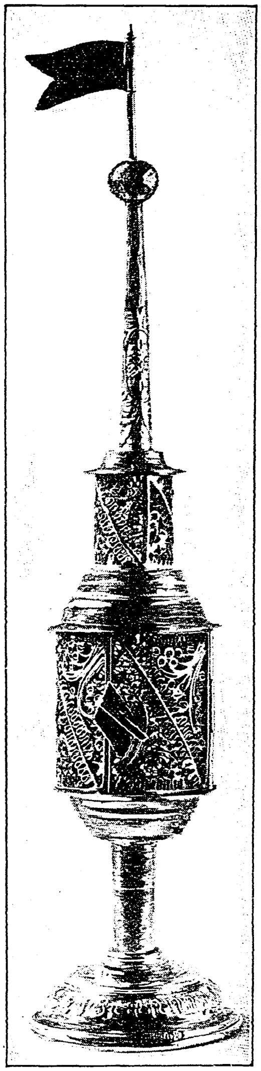
Habdalah Spice-Box and Taper-Holder.

(In the Musée de Cluny, Paris.)

Use of Sweet-Smelling Herbs.

All varieties of spices and odoriferous plants are suitable for the benediction of the spices, except that they must not have been used for any obnoxious purpose, as, for instance, to disguise the odor of decomposition or other foul smells, or for idolatrous worship. Some authorities prohibit the use of sharp, acrid spices, such as pepper. The use of myrtle is enjoined, in allusion to Isa. lv. 13, "Instead of the brier shall come up the myrtle," but it is not obligatory. The reasons usually given for the employment of spices in the Habdalah are that perceptions and enjoyments through the sense of smell are the most delicate; that they afford not a gross, material pleasure, but rather a spiritual one; and that the perfume of spices is, therefore, a comfort to the over-soul of the Sabbath ("neshamah yeterah"), which grieves when the holy day departs (Shulḥan 'Aruk, Oraḥ Ḥayyim, 297; Baḥya to Gen. xxxii.-xxxvi.).

The order of benedictions in the Habdalah is indicated by the mnemonic word י'ב'נ'ה, formed from the initial letters of יין, בשמים. נר, הבדלה = "wine, spices, light, separation-formula." It is customary to sing hymns at the Habdalah service after the close of the Sabbath. Of these, several contain references to the prophet Elijah, who, according to one view, will appear after the conclusion of that day. These hymns are sometimes accompanied by instrumental music, which, forbidden on the Sabbath, is appropriate for the Habdalah. Perhaps the best known of these hymns is that beginning "May He who distinguishes between holy and profane forgive our sins" ("Ha-mabdil ben ḳodesh le-ḥol ḥaṭotenu yimḥol"). Rabbi Moses Sofer, following Mordecai ben Hillel on Yoma, has pointed out that this hymn was originally intended for the Habdalah service after the Day of Atonement ("Ḥatam Sofer, Oraḥ Ḥayyim," No. 67), and it is so employed among the Sephardim when the Day of Atonement falls on the Sabbath.



Silver Spice-Box for Habdalah.

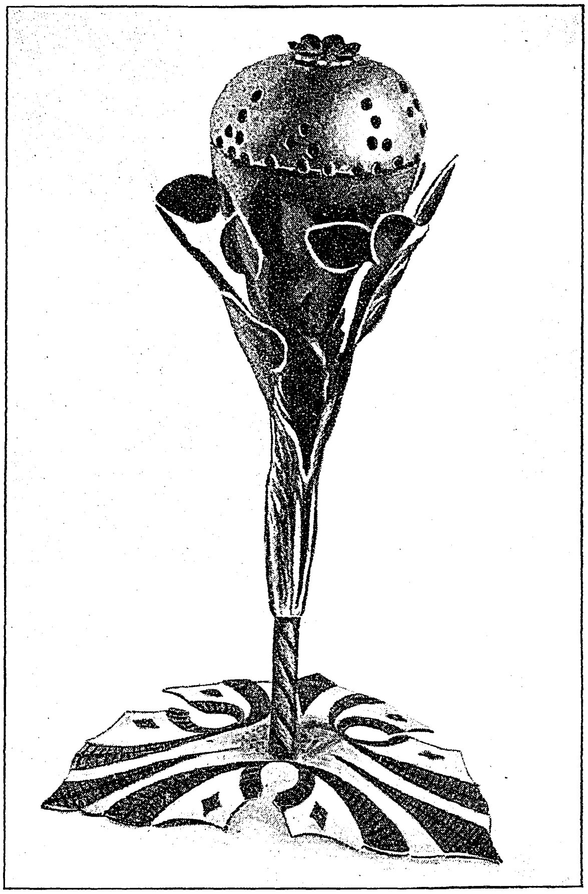
A. B. D.

The Habdalah benediction reads: "Blessed art Thou, O Lord, our God, King of the Universe! Who hast made a separation between what is holy and what is profane [Lev. x. 10; Ezek. xlii. 20]; between light and darkness [Gen. i. 4, 18]; between Israel and other nations [Lev. xx. 26]; between the seventh day and the six working-days. Blessed art Thou who hast separated the holy from the profane." According to another, and apparently older, tradition, these words were added: "between clean and unclean [Lev. xi. 47, xx. 25]; between the upper and the lower waters [Gen. i. 6, 7]; between land and sea [Gen. i. 10]; between the priestly tribe of Levi and the common people of Israel [Deut. x. 8]" (see Pes. 104a). The questions as to whether the benediction over the spices or that over the light was to be recited first, and as to whether the benediction should precede or follow grace after meals, were matters of controversy between the schools of Shammai and Hillel. The Habdalah formula was originally recited in the home at the opening of the evening meal or before each course (comp. Ta‘an. iv. 3, which shows that there was no Friday or Saturday evening service in the Temple; see also Herzfeld, "Gesch. des Volkes Israel," iii. [ii.] 209); soon, however, it came to be recited in the synagogue also: sometimes as a special benediction of the Shemoneh ‘Esreh (this was the view of R. Akiba); sometimes inserted in the last benediction but one (this was the view of R. Eliezer); but it finally became the custom to insert it in the fourth benediction (Ber. v. 2).



Habdalah Spice-Box.

(In the possession of H. Frauberger, Frankfort-on-the-Main.)

Origin of Habdalah.

The Habdalah benediction was afterward ascribed to the "men of the Great Synagogue," and it was held to have been originally instituted as a synagogal benediction; in times of prosperity for the Jews it was the custom to recite it over the cup of wine at the home meal, but when distress befell the people it was recited in its original place (Ber. 33a). The many differences prevailing among the Tannaim and Amoraim concerning the Habdalah (see Pes. 103b *et seq.*; Ḥul. i. 7; Shab. 150b; Yer. Ber. v. 9b) indicate either the lack of any fixed custom or the want of an authority able to establish the custom permanently. While Abba Arika declared the Habdalah in the synagogue to be of greater importance than that at the table over the wine-cup (Ber. 33a), others promised future salvation (Pes. 113a), family continuity through male descendants (Sheb. 18b), and material blessings (Pirḳe R. El. xxi.) to him who recited the Habdalah over the wine-cup. No one was allowed to eat before the Habdalah ceremony (Pes. 107a).

Habdalah Light.

Especial importance was attached to the Habdalah light, the reason given being that it was created on the first day (Pes. 53b, 54a). Opinions differed, however, as to whether it was preferable to recite the benediction over a light produced afresh by friction between pieces of wood or stone, or over a light that had been burning before (Ber. 52b; Pes. 54a). A blazing, torch-like light was considered most appropriate (Pes. 8a). The following legend, obviously based on the connection of the Habdalah with the fourth benediction of Shemoneh ‘Esreh—the thanksgiving for the reason with which God has endowed man—is told by Jose, the pupil of Akiba: "Fire was one of the things God had left uncreated when Sabbath set in; but after the close of the Sabbath, God endowed man with divine wisdom. Man then took two stones, and by grinding them together produced fire; after which he recited the benediction: 'Blessed be He who createth the blaze of the fire'" (Pes. 53b). This is elaborated in Gen. R. xi. (comp. Pesiḳ. R. 23; Yer. Ber. viii. 12b): "The light which God created on the first day lit up the world for man from the time he was created until the sunset of the following day, when the darkness surrounding him filled him with dread and the fear that the tempting serpent would altogether overpower him. Then God furnished him with two bricks, which he rubbed together until fire was produced; whereupon he offered a benediction over the fire." According to Pirḳe R. El. xx., God sent him a pillar of fire, and, holding His hands against it, said the benediction over fire; then, removing His hands, said the Habdalah benediction. Stress is also laid on the fact that one recites the benediction on seeing the blaze of the fire reflected either in the wine-cup or on the finger-nails; if there is no fire, a glance at the reflection of the stars on the finger-nails should prompt the benediction (comp. Midr. Teh. to Ps. xxxv. 2). Healing powers were also ascribed to the Habdalah wine when put upon the eyes (Pirḳe R. El. *l.c.*; comp. Shab. 113b for the "Ḳiddush" wine).

Many other customs sprang up with regard to the Habdalah light, for which a wax candle came into use later on (see "Tanya," xxi., and Ṭur Oraḥ Ḥayyim, 298).

The Spices, and Habdalah Legends.

The spices formed another subject for mystic speculation. The remark of Resh Laḳish that Adam was given a higher soul on Sabbath and was deprived of it at the close of the day, was connected with the custom of reciting a benediction over spices (see Samuel b. Meïr, Pes. 102b; Maimonides, "Yad," Shabbat, xxix. 29). A myrtle was preferably chosen, cabalistic reasons being given for it (Kol Bo xli.; comp. Zohar, Wayaḳhel, and Ḳiẓẓur Shene Luḥot ha-Berit, Hilkot Shabbat). According to the German custom, Isa. xii. 2-3, Ps. iii. 9, xlvi. 12, Esth. viii. 16, and Ps. cxci. 13 are recited before the Habdalah. The Roman Maḥzor and the Portuguese use different verses. With Isa. xii. 3 a legend is connected, according to which water from the wondrous well of Miriam may be drawn at that time, and healing for diseases be obtained by drinking it (Kol Bo xli.). According to another legend Elijah the Prophet, who does not appear on the eve of Sabbaths or of holy days ('Er. 43b), but who is eager to reward faithful Sabbath observance, is expected to appear at the beginning of a new week and fortify those who wait for the redemption of Israel (Abudraham, Hilkot Moẓe'e Shabbat, and Ibn Yarḥi, in Ha-Manhig, Hilkot Shabbat, 71). Many songs and recitations, as well as conjurations referring to Elijah the Prophet, are recited before and after the Habdalah ceremony, together with prayers for the new week's work. It is especially significant that a little prayer in the German vernacular is said, because many pious Jews of old would speak only Hebrew, as the holy language, on the Sabbath day. See HA-MABDIL and ELIJAH IN MEDIEVAL FOLK-LORE.

A. K.

Superstitions.

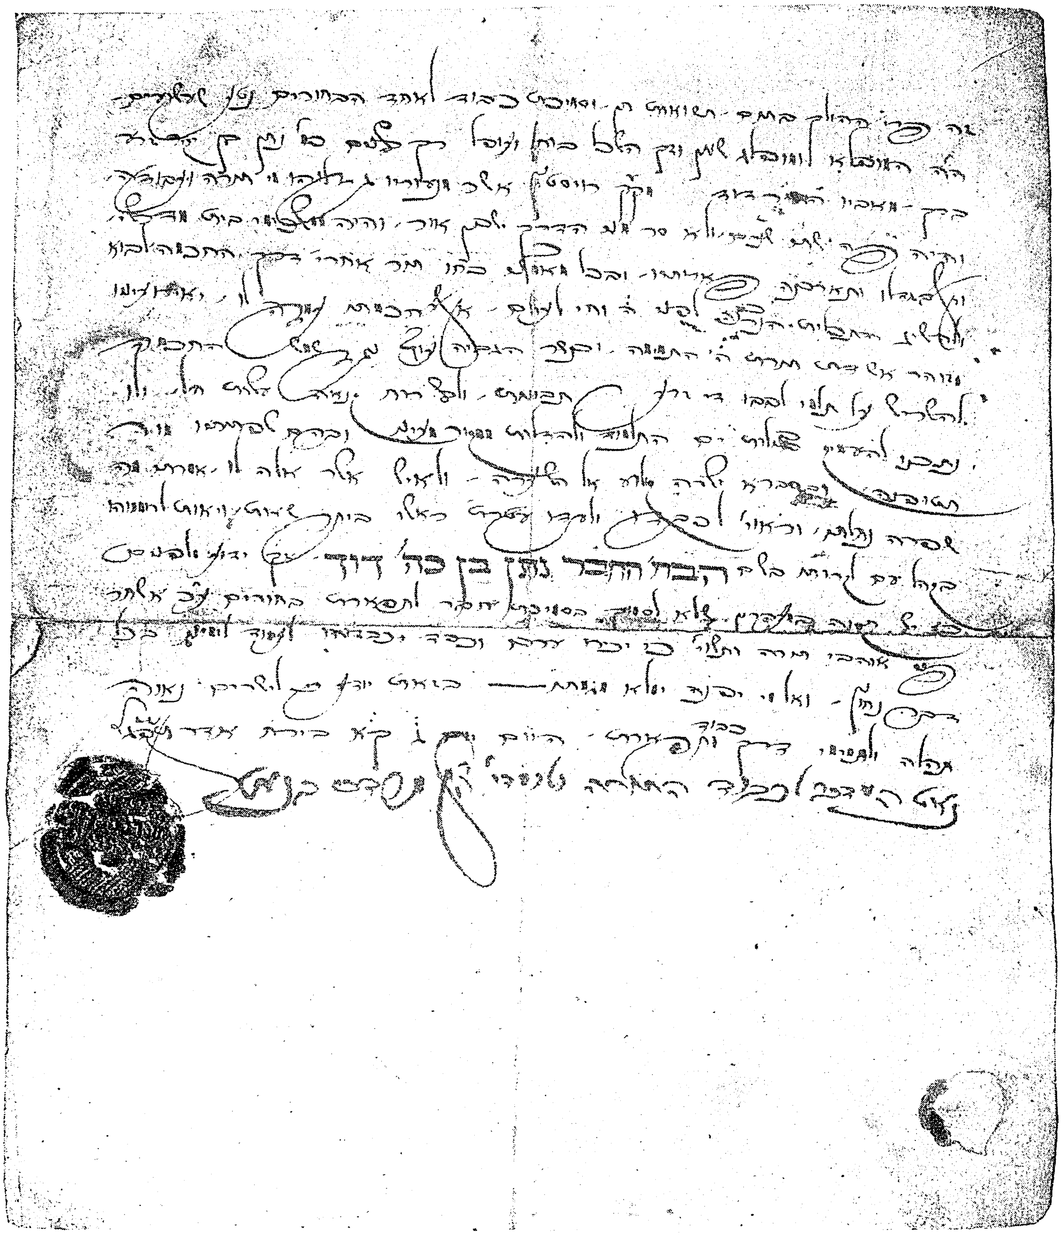
As one of the chief home ceremonies of the Jews it is natural that a certain amount of superstition should have grown up around the custom; but whether such superstitions were derived from the surrounding peoples or not, it is difficult to say. Thus both in Russia and Galicia it is believed that if a girl drink of the wine of Habdalah she will get a mustache ("Urquell," 1893, p. 74), and the same belief is held among the Jews of Baden ("Mitteilungen," iii. 9). If you sprinkle the table-cloth with the wine of Habdalah you will have a "full week" ("Urquell," 1893, p. 33), and if the Habdalah candle burns until consumed you will get good sons-in-law (*ib.* p. 81). Where spirits are used instead of wine, as in Kiev, it is customary to pour what remains after the Habdalah is completed into a metal pan, and set it afire with the Habdalah light. If it burns completely away good luck will result. As it burns, some dip their fingers into the flame and convey their fingers to their pockets, in order to gain a "full week."

J.

ḤABER (חבר = "associate"; "colleague"; "fellow"): Term ordinarily used in rabbinical lore in its original Biblical sense, "companion," "friend" (Ps. cxix. 63; Ab. ii. 9, 10). A Talmudic proverb says, "Thy ḥaber has a ḥaber, and thy ḥaber's ḥaber has a ḥaber; thy words will thus circulate and become public" (B. B. 38b; 'Ar. 16a). The Rabbis urgently recommend study in company, asserting that only in this way can knowledge be acquired (Ber. 63b; Ned. 81a); therefore, if necessary, one should even expend money for the purpose of acquiring a companion (Ab. R. N. viii. 3). A prominent teacher of the second century declared that, while he had learned much from his masters, he had learned more from his "ḥaberim" (Ta'an. 7a). Hence the term came to mean a "companion in study," a "colleague"; and when preceded or followed by the term "talmid" (pupil) it denotes one who is at once the pupil and colleague of a certain teacher, a scholar who from being a pupil has risen to be a colleague or fellow (comp. B. B. 158b; Yer. Sheḳ. iii. 47b). Eventually "ḥaber" assumed the general meaning of "scholar" (B. B. 75a). and appears as a title subordinate to ḤAKAM (comp. Ḳid. 33b). The title "ḥaber" was known in comparatively early times (11th cent.), when it probably referred to a member of a court of justice (see Schechter, "Saadyana," p. 81, note 2); but in Germany in later centuries it indicated that its possessor had devoted many years to the study of sacred literature. In congregational life it was conferred as a rule on married men, but often also on yeshibah graduates who were single. It is worthy of note that Jonathan Eybeschütz conferred it on the Christian professor Tychsen.

"Scholar" in General.

"Ḥaber" also denotes a member of a society or order ("ḥaburah," "ḥaburta," "keneset" = "aggregation," "company," "union"), or of a union of Pharisees for the purpose of carrying out the observance of the laws of "clean" and "unclean" to their fullest possible development. In their eyes, any person about whom there was a doubt as to whether he was particular in the observance of these laws or those concerning the tithes was an 'AM HA-AREẒ. whose contact was defiling. But the term "ḥaber" is by no means synonymous with "Parush" (Pharisee), since not all Pharisees were ḥaberim, though sometimes the generic term "parush" is used in its stead (Tosef., Shab. i. 15). Occasionally the more specific term "ne'eman" (trusty) takes the place of "ḥaber" (Dem. iv. 5, 6). On the Scriptural saying, "He shall . . . cleanse it and hallow it" (Lev. xvi. 19), rabbinical ethics bases the maxim, "Cleanliness leads to holiness" (Yer. Shab. i. 3c; comp. Soṭah ix. 15). But cleanliness was understood to be closely connected with Levitical purity; of this there were several degrees, there being sections in the community which observed its rules more strictly and extensively than did others. Some even extended all the precautions necessary for the priest in eating holy things to the layman who lived on secular food (Hag. ii. 6, 7; see PHARISEES).



DIPLOMA CONFERRING THE ḤABER DEGREE, ISSUED BY MARCUS BENEDICT, 1828.
(In the possession of Prof. G. Deutsch.)

The Bible (Lev. xxvii. 30-32; Num. xviii. 21-28; Deut. xiv. 22-29) lays on the products of an Israelite's farm and on his herds certain imposts to be paid respectively to the priest, the Levite, and the poor (comp. Tobit i. 6-8), but which were not universally paid. The rules governing these imposts, as well as the rules of "clean" and "unclean," were doubtless familiar to the people at large; but not all people found it convenient or possible to comply with them. Particularly difficult must their observance have been in the unsettled state of affairs during the Maccabean wars. It is suggested by some that it was at this time that the so-called "'am ha-areẓ" (who included the great majority of the people), either driven by circumstances or seduced by temptation, neglected them; and that a certain more rigorous minority, not

Levitically Pure.

knowing whom to trust in such matters, formed among themselves associations ("ḥaburot"), the members ("ḥaberim") of which pledged themselves to keep faithfully the rules of Levitical purity and those regarding the tithes. Accordingly the ḥaber is one who strictly observes the laws of "ma'aserot" (tithes) and of Levitical cleanness (see Giṭ. v. 9). To be admitted as a ḥaber the candidate must declare his determination never to present the "terumah" or the "ma'aser" to a priest or a Levite who is classed as an 'am ha-areẓ; nor to allow his ordinary food to be prepared by an 'am ha-areẓ; nor to eat his ordinary food ("ḥullin," grain and fruit from which terumah and ma'aser have been separated) except in a certain state of Levitical cleanness (Tosef., Dem. ii. 2). This declaration must be made before three members of the order, and if they are satisfied that the candidate has lived up to the rules in his private life, he is accepted at once; otherwise he is admitted as a "ben ha-keneset" (son of the union, neophyte; comp. Bek. v. 5; Zab. iii. 2) for thirty days. According to Bet Shammai, this period suffices only when membership is sought for the lesser degrees of purity, while for the higher degrees the period of probation must be extended to a year. After this period, if the candidate has proved his constancy, he becomes a ḥaber or ne'eman. And in this respect no distinction is made between the learned and the ignorant; all must make this declaration. An exception is made only in favor of a scholar attached to a college, it being presumed that he took the pledge when he first joined the college (Bek. 30b).

Degrees of Ḥaburah.

As there are several degrees of Levitical cleanness, so there are several classes of ḥaberim and ne'emanim, pledging themselves to corresponding observances. The lowest class is that which pledges itself to practise Levitical cleanness of "kenafayim" (lit. "wings"). This is a very obscure term, for which no satisfactory explanation has been found. It is generally assumed to mean "hands"; and inasmuch as the Pharisaic maxim is, "Hands are always busy," touching without intention on the part of their owner both clean and unclean things, they are regarded as being in a state of uncertain cleanness; hence one must cleanse them before eating anything Levitically clean (Ṭoh. vii. 8; comp. Mark vii. 3 *et seq.*). This may be legally accomplished by pouring on them one-fourth of a log of water. But that process suffices only where a person wishes to eat ḥullin, ma'aser, or terumah. If he desires to eat the sacrificial portions, he must dip his hands into forty seahs of water; and if about to handle the water of lustration, he must first subject his whole body to immersion (Ḥag. ii. 5; Gem. 18b *et seq.*). As the ordinary Israelite and the Levite are not permitted to handle the most sacred things, it naturally follows that not all men are eligible for the higher degrees; and even of those whose descent does not bar their admission, not all are willing to assume the correspondingly greater precautions incident to the privilege. Provision is therefore made for general admission to the lower degrees, of which most people availed themselves. It is ordained that if one desires to join the order of ḥaberim, but does not wish to subject himself to the duties devolving upon the members of the higher degrees—the precautions necessary to keep himself Levitically clean, as for the more sacred things—he may be accepted; but where, on the contrary, one seeks admission to the higher degrees while refusing to pledge himself to strict observance of the rules governing the lower degrees, he must be rejected (Bek. *l.c.*).

Separation from the 'Am ha-Areẓ.

Having been admitted as reliable in matters of ma'aser, a ḥaber must tithe what he consumes, what he sells of his own producing, and what he buys for the purpose of selling, and must not eat at the board of an 'am ha-areẓ, lest he be served with victuals that have not been properly tithed. If he would become a full ḥaber, he must not sell to an 'am ha-areẓ anything that moisture would render subject to uncleanness (see Lev. xi. 38; Maksh. i.), lest the 'am ha-areẓ expose the goods to contamination; for rabbinical law forbids the causing of defilement even to things secular in Palestine ('Ab. Zarah 55b). Nor must he buy of an 'am ha-areẓ anything so rendered subject to uncleanness, nor accept invitations to the board of an 'am ha-areẓ, nor entertain one who is in his ordinary garments, which may have been exposed to defilement (Dem. ii. 2, 3).

A ḥaber's wife, and his child or servant, are considered, in respect to religious observances, as the ḥaber himself ('Ab. Zarah 39a); therefore the admission of a candidate into the order embraces all the members of his family. Even after the ḥaber's death his family enjoy the confidence previously reposed in them, unless there be reason for impugning their fidelity. The same is the case when one of them joins the family of an 'am ha-areẓ; as long as there is no reasonable suspicion to the contrary, it is presumed that the habits acquired under the influence of the observant head of the family will not be discarded, even under different circumstances. Similarly, the presumption of habit governs the case of members of the family of an 'am ha-areẓ joining that of a ḥaber; they are not considered trustworthy unless they pledge themselves to live up to the rules of the ḥaburah. However, the child or servant of an 'am ha-areẓ entering the house of a ḥaber for the purpose of study is exempt from the operation of that presumption as long as he remains under the ḥaber's direction. On the other hand, when the pupil is the son or servant of a ḥaber and the teacher is an 'am ha-areẓ, the presumption is extended in the pupil's favor. Again, where a man is recognized as reliable while his wife is not—as when a ḥaber marries the widow or daughter of an 'am ha-areẓ—ḥaberim may unhesitatingly buy of him articles of food, but must not eat at his board if it is presided over by his wife. If, on the contrary, the wife is reliable, being the widow or daughter of a ḥaber, while the husband is an 'am ha-areẓ, ḥaberim may eat at his table, but must not buy from him (Tosef., Dem. ii. 14-18).

As to the ḥaber himself, once he has been recognized as such, he continues so as long as he is not found guilty of backsliding. If suspicion of backsliding is reasonably aroused against him, he is suspended from the ḥaburah until he reestablishes his trustworthiness. Similarly, where a ḥaber accepts an office that is considered suspicious—as that of tax-collector or publican—he is suspended from the ḥaburah, but is reinstated upon surrender of the office (Bek. 31a).

Suspension from the Order.

The exact date when the ḥaberim first appeared can not be determined. That they existed, however, as a ḥaburah in ante-Maccabean days, and are identical with those cited in I Macc. xiv. 28 as the "great congregation of priests" (Geiger, "Urschrift," p. 124), is not very probable, since in the later period of the Medo-Persian rule over Palestine no great formative events are on record which could account for so great a separation from the body of the people. The precise period of the ḥaburah's organization should be sought, therefore, in the last decades of the second pre-Christian century. See 'AM HA-AREẒ; DEMAI; MA'ASEROT.

S. S. S. M.

HABER, SOLOMON VON: German banker; born at Breslau Nov. 3, 1760; died Feb. 20, 1839. The son of poor parents, he rose to a position of wealth and eminence by his talents and energy. He settled at Carlsruhe during the stormy years at the end of the eighteenth century. Many of the larger German national loans were effected through him, and he was instrumental also in founding some of the industrial enterprises of the grand duchy of Baden. After being appointed court banker by Grand Duke Karl (1811-18), Grand Duke Ludwig conferred upon him (1829) a patent of hereditary nobility. In 1816, and again in 1819, the ancient prejudice against the Jews that was threatening to break out into open hostility in Carlsruhe was held in check by Haber, who used his influence and position to shield his coreligionists. Haber was instrumental in the founding (1818) of a "Cultusverein," which conducted services on the Hamburger Temple plan. The services, however, were soon discontinued; but the result was that in 1824 the Grossherzogliche Oberrat, which had been founded in 1809, and of which Haber was a member, introduced officially the German sermon. Until his death Haber was a member of the Grossherzogliche Oberrat für die Staatsbürger Mosaischen Glaubens in Baden. One of his sons, Louis, became a member of the Austrian House of Lords (Herrenhaus), having previously embraced Christianity.

S. A. BLUM.

HABERKASTEN, KALMAN (KALONYMUS): Polish rabbi of the sixteenth century. He is the first known rabbi of the city of Ostrog, Volhynia, where he settled after having previously presided over a yeshibah in Lemberg. His daughter Lipka married Solomon Luria, who succeeded to the rabbinate of Ostrog when Haberkasten went to Palestine, about 1560. Haberkasten is known to have made the acquaintance of the great cabalists who then flourished in the Holy Land, and is mentioned by Ḥayyim Vital Calabrese in the manuscript work "Liḳḳuṭe Torah."

K. P. WI.

ḤABIB, JACOB (BEN SOLOMON) IBN: Spanish Talmudist; born at Zamora about 1460; died at Salonica 1516. In his youth Ḥabib studied the Talmud under R. Samuel Valensi. In 1492, when the Jews were expelled from Spain, he settled at Salonica, where he wrote his "'En Ya'aḳob" in the house of Don Judah ben Abraham Benveniste, who placed his rich library at his disposal. Ḥabib also availed himself of the library of Don Samuel Benveniste, which contained, among other great works, a large collection of novellæ on the Talmud by many distinguished commentators. By the aid of the works from these two libraries Ḥabib collected all the haggadic passages from the Babylonian, and many from the Palestinian, Talmud. The publication of this work began in 1516 in the printing establishment of Judah Gedaliah, the author himself carefully reading the proof-sheets; but he died just as the first two orders (Zera'im and Mo'ed) came from the press. His son, R. Levi, completed the labors of his father, but the work appeared before the public without the notes of the author to the last four orders ("sedarim"), and without the index, which the author originally intended to cover the entire work. The haggadot of the Jerusalem Talmud are also lacking.

The "'En Ya'aḳob" is the only work Ḥabib left to the world. The object of the author was to familiarize the public with the ethical spirit of Talmudic literature; at the same time his notes were intended to refute the charges brought against the Talmud by the numerous Spanish converts. The book, which thus appealed to the mass of the unlearned, became very popular. It was often edited and annotated, and served as a text-book of religious instruction. There are over thirty editions known; the latest (Wilna, 1883) contains twenty commentaries, among them one which consists of selections from more than one hundred homiletical works. Of the additions, the most important one is that of Leo di Modena, under the title "Ha-Boneh," which has appeared in all editions since 1684. The author's intention was chiefly to propagate a more rationalistic view of the Talmudic Haggadah. In some editions the title of the whole work is "'En Yisrael."

V.* p. 94; Mielziner, *Introduction to the Talmud*, p. 76; Grätz, *Gesch.* x. 35; Rabbinovicz, *Diḳduḳe Soferim*, Introduction to *Megillah*.

D.—B. FR.

ḤABIB, JOSEPH IBN (called also **JOSEPH ḤABIBA**): Spanish Talmudist; flourished in the fourteenth and fifteenth centuries. Like his predecessor, R. Nissim b. Reuben (RaN), Ibn Ḥabib wrote a commentary on the halakot of Isaac Alfasi, entitled "Nimmuḳe Yosef," published with the text and the commentary of R. Nissim (Constantinople, 1509). Against the opinion of Conforte ("Ḳore ha-Dorot," p. 26a) that Ibn Ḥabib commentated only those treatises which R. Nissim had omitted, Azulai ("Shem ha-Gedolim") proved that Ibn Ḥabib's "Nimmuḳe Yosef" covered the entire halakot of Isaac Alfasi, but a part of it had remained unpublished, and that the commentary to the halakot of Mo'ed Ḳaṭan and Makkot, attributed to R. Nissim, belongs to Ibn Ḥabib. The latter quotes Asher b. Jehiel, Yom-Ṭob ben Abraham, his master RaM, and R. Nissim himself. The "Nimmuḳe Yosef" on Ketubot and Nedarim was also included in the work "Ishshe Adonai" (Leghorn, 1795), and the portion on Shebu'ot in the "Bet ha-Beḥirah" (*ib.* 1795). Azulai says that Ibn Ḥabib was the author of novellæ on the whole Talmud.

K. M. Sel.

ḤABIB, LEVI BEN JACOB IBN: Rabbi of Jerusalem; born at Zamora, Spain, about 1480; died at Jerusalem about 1545. Under King Manuel of Portugal, and when about seventeen, he was compelled to submit to baptism, but at the first opportunity fled to Salonica, where he could follow the dictates of his conscience in safety. In 1523 he went to Jerusalem, but in a short time returned to Salonica. In 1525 he settled permanently at Jerusalem, where his learning won him the position of chief rabbi. There he met Jacob Berab, with whom he often came into conflict on questions of rabbinical law. A serious quarrel broke out between these two rabbis when Berab, becoming chief rabbi of Safed, reintroduced the ancient practise of the ordination of rabbis. They carried on a bitter and envenomed controversy for some time, in the course of which Berab referred to Ibn Ḥabib's adoption of Christianity. The latter frankly admitted the fact, but pointed out that at the time he was a mere youth, that his involuntary profession of Christianity lasted hardly a year, and that he took the first opportunity to escape and rejoin the religion of his fathers. This controversy was chiefly responsible for the fact that the practise of ordination ceased again soon after Berab's death.

Ibn Ḥabib had some knowledge of mathematics and astronomy. In his youth he edited his father's "'En Ya'aḳob" (Constantinople, 1516; see Ḥabib, Jacob ibn). He wrote: "She'elot u-Teshubot," a collection of 147 responsa; "Ḳontres ha-Semikah," a treatise on ordination; "Perush Ḳiddush ha-Ḥodesh," a commentary on Ḳiddush ha-Ḥodesh (rules governing the construction of the calendar in Maimonides' code). All these works were published together at Venice (1565); the last-named work was also published separately (*ib.* 1574-76).

D. M. Sel.

ḤABIB, MOSES IBN: Palestinian rabbi of the seventeenth century. He was a disciple of Jacob Ḥagiz, one of whose daughters he married. He wrote: "Geṭ Pashuṭ," on the laws of divorce, Ortakeni, 1714; "Shammot ba-Areẓ," Talmudic novellæ; Constantinople, 1727; "'Ezrat Nashim," on matrimonial law, *ib.* 1731. Some of his responsa are found in Abraham ha-Levi's "Ginnat Weradim," Constantinople, 1715-16.

Bibliography: Azulai, *Shem ha-Gedolim*; Benjacob, *Oẓar ha-Sefarim*.

D. L. Grü.

ḤABIB, MOSES B. SHEM-ṬOB IBN: Hebrew grammarian, poet, translator, and philosopher of the fifteenth and sixteenth centuries. Being a native of Lisbon, he called himself "Sefardi"; but he left his native country long before the expulsion of the Jews. He lived for a time in the Levant (בארץ ישמעאל), then went to southern Italy, and died in the beginning of the sixteenth century. As grammarian he was under the influence of Efodi, who endeavored to base Hebrew grammar upon logic. He wrote a grammatical work entitled "Peraḥ Shoshan" (British Museum MS. No. 2857), quoted by Ibn Ḥabib himself in "Darke No'am," and frequently by Abraham de Balmes in "Miḳneh Abraham." This book is divided into seven sections (שערים), each consisting of a number of chapters (פרקים). As his chief sources he names Ḥayyuj, Ibn Janaḥ, Ibn Ezra, and Efodi. He finished the book at Naples the 27th of Kislew, a.m. 5245 (= Dec. 15, 1484), having commenced it on the 23d of Siwan, a.m. 5244 (= June 16, 1484). A second and smaller grammatical work by him, entitled "Marpe Lashon," summarizes the principles of the Hebrew language in catechetic form. It appeared at Constantinople about 1520, next in the collection "Diḳduḳim" (Venice, 1506), in the grammar "Debar Ṭob" of Abigdor Levi of Glogau (Prague, 1783), and finally in an edition by Heidenheim (Rödelheim, 1806). With it was printed the "Darke No'am," containing a summary of Hebrew poetics and versification based on Aristotle's "Poetics." In "Darke No'am" Ḥabib makes the statement, often repeated since, that he saw a rimed inscription of two lines on the tombstone of a Jewish general (?) Amaziah, in Spain. The introductory poem, dated the 14th of Nisan, 1486, is dedicated to the physician Joseph Levi, in Bitonto, Apulia. At Otranto Ibn Ḥabib wrote for his pupil Azariah b. Joseph a commentary to Jedaiah Bedersi's "Beḥinat 'Olam," published at Constantinople about 1520 (only a fragment of this edition, now in the possession of Dr. Harkavy, is known), at Ferrara in 1551, and at Zolkiev in 1741. Extracts from this commentary were made by other commentators on the same work, including Yom-Ṭob Lipman Heller, Eleazar b. Solomon in "Migdanot Eleazar," and Jacob b. Naḥum of Tyszowce in "Or Ḥakamim." In this commentary, which evidences its author's thorough knowledge of philosophical literature, Ibn Ḥabib speaks of composing a work entitled "Ḳiryat Arba'," concerning the number four, hence indefinite in subject; but nothing is known about such a work. Ibn Ḥabib translated "She'elot u-Teshubot," questions and answers on the six natural things the body requires, according to the science of medicine; the original is ascribed to "Albertus," probably Albertus Magnus. The manuscript of this translation is in the Bibliothèque Nationale, Paris (No. 977). The contents are quoted by Steinschneider ("Hebr. Uebers." § 486).

K. S. P.

ḤABILLO (XABILLO), ELIJAH BEN JOSEPH (MAESTRO MANOEL): Spanish philosopher; lived at Monzon, Aragon, in the second half of the fifteenth century. He was an admirer of the Christian scholastics, and studied Latin in order to translate into Hebrew some of their works, especially those dealing with psychology. The works which he partly translated and partly adapted (some bearing his name; others, though anonymous, known to be his) were the following of Thomas Aquinas: "Quæstiones Disputatæ, Quæstio de Anima" (Steinschneider, "Cat. Hamburg," No. 267); "De Animæ Facultatibus" (Hebr. title, "Ma'amar be-Koḥot ha-Nefesh"), published by Jellinek in "Philosophie und Kabbala," Leipsic, 1854; and "De Universalibus" (Steinschneider, *l.c.* No. 267); "She'elot Ma'amar be-Nimẓa ube-Mahut," questions on Thomas Aquinas' treatise on being and quality (Neubauer, "Cat. Bodl. Hebr. MSS." No. 2453^{8}). He furthermore translated: three treatises of Occam's (or Okam's), entitled "Summa Totius Logices," to which he added an appendix (MSS. Parma, No. 457); "Quæstiones Philosophicæ," by the same author (*ib.* No. 201); "De Causa," thirty-two premises, with their explanations, by Aristotle (*ib.* No. 457). According to Jellinek and Steinschneider, Ḥabillo also translated, anonymously, Vincenz of Beauvais' "De Universalibus," under the title "Ma'amar Nikbad bi-Kelal" (*ib.* No. 457^{7}).

Bibliography: Munk, in *Orient. Lit.* vii. 725; idem, *Mélanges*, p. 303; Jellinek, *Philosophie und Kabbala*, p. xiv.; Steinschneider, *Hebr. Uebers.* pp. 265, 470, 477, 483; idem, *Cat. Hamburg*, p. 111.

ḤABILLO (CHAVILLO), ELISHA BEN SOLOMON: Venetian Talmudist of the eighteenth century; descendant of a prominent Palestinian family. Judah Chavillo is mentioned as a renowned Talmudist in the responsa "Darke No'am" (iii. 39) of Mordecai Levi of Cairo. Elisha was a disciple of David Pardo and the author of the following works: (1) "Pat Leḥem," containing the ritualistic laws concerning the benedictions, especially the grace after meals (ברכת המזון) (Leghorn, 1794); (2) "Hamon Ḥogeg," commentary on the Haggadah of Passover (*ib.* 1793); (3) "'Abodat ha-Tamid," commentary on the prayer-book according to the Spanish rite (*ib.* 1794), in which he adopted many interpretations of the renowned Shabbethai Ḥayyim, afterward discarding them as being heretical; (4) "Shif'at Rebibim," liturgical poems of David Pardo, with additions of his own (*ib.* 1793).

ḤABILLO, SIMON BEN JUDAH BEN DAVID: Rabbi at Hebron in the middle of the seventeenth century; contemporary of Moses Zacuto, who approved his works. Ḥabillo was the author of: "Ḥebel ben Yehudah," a commentary on the Haggadah of Passover, Mantua, 1694; and "Ḥeleḳ Yehudah," a commentary on Ruth, published together with the text, Venice, 1695. The last-named work is preceded by a prayer of Ḥabillo arranged in the style of Psalm cxix.

Bibliography: Steinschneider, *Cat. Bodl.* col. 2611; Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 331.

K. I. Br.

HABINENU: Initial word, also the name, of a prayer containing in abridged form the Eighteen Benedictions (see Shemoneh 'Esreh), minus the first three and the closing three (see Liturgy). The prayer was formulated by Samuel of Nehardea, to be substituted where time or circumstances prevent the reciting of all the benedictions in full (Ber. 29a). At the close of Sabbaths and festival days, when the "Habdalah" is to be recited, the "Habinenu" does not serve as substitute, nor may it be used when the prayer for rain is to be offered. In the Jerusalem Talmud (Ber. iv. 8a) the version differs somewhat from the commonly adopted one given in the Babylonian Talmud. Translated into English, it reads as follows:

> "Render us intelligent that we may know Thy ways. Circumcise our hearts to fear Thee; forgive us that we may be redeemed. Keep us far from pain, and fertilize for us the green pastures of Thy land. Gather us from the four corners of the earth. Let those who have strayed from Thy knowledge be taught the right way. Lift Thy hand against the wicked. Grant joy to the just in the reconstruction of Thy city, in the restoration of Thy Temple, in the renewal of the kingdom of Thy servant David and of the splendor of the son of Jesse, Thine anointed. Hear us before we call! Blessed be Thou, O Lord! who hearkenest to prayer."

HABOR: River flowing through the land of Gozan; the classical "Chaboras." To the banks of this river Tiglath-pileser carried "the Reubenites, and the Gadites, and the half tribe of Manasseh, and brought them unto Halah and Habor" (I Chron. v. 26). In the ninth year of King Hoshea, Shalmaneser "took Samaria, and carried Israel away into Assyria, and placed them in Halah and in Habor by the river of Gozan" (II Kings xvii. 6, xviii. 11). Habor is identified with the modern Khabur.

E. G. H. B. P.

HACHILAH, HILL OF (גבעת החכילה): A hill in the wooded country of the wilderness of Ziph, where David hid himself from Saul (I Sam. xxiii. 19; xxvi. 1, 3).

E. G. H. M. Sel.

HACHMONI, THE SON OF (בן חכמוני): 1. Jashobeam, one of David's mighty men (I Chron. xi. 11). 2. Jehiel, tutor of David's children (*ib.* xxvii. 32). The former, however, occurs in the English Authorized Version as "an Hachmonite." In the parallel list of II Sam. xxiii. 8, the name of the same hero occurs as "Yosheb ba-Shebet Taḥkemoni," which the Authorized Version translates "the Tachmonite that sat in the seat," the whole sentence being an epithet of Adino the Eznite.

E. G. H. M. Sel.

HACHUEL, SOL: Moorish martyr; beheaded at Fez 1834. On account of domestic troubles she fled from her home to some Mohammedan friends. Two women among these testified that she had agreed to resign herself to the Mohammedan faith. She refused to do this and was cast into prison, whence on appeal she came before the sultan. He was so struck with her beauty that he offered her a place in his harem if she would abjure. This she refused to do, and she was beheaded outside Fez. Her beauty and resolution attracted attention to her fate, which was made the subject of a drama, "La Heroina Hebrea," by Antonio Calle (1852).

ḤAD GADYA ("One Kid"): An Aramaic song, which is recited at the conclusion of the Seder service, held on the first two evenings of the Passover ("Pesaḥ") festival in Jewish households (see Haggadah). It is so called after the introductory phrase, which is also used as a continuous refrain at the end of each of the ten verses of which the poem consists. It belongs to a species of cumulative rimes familiar alike to the child in the nursery and to the folklorist. It was for a long time regarded as an allegorical version of the principle of "jus talionis," a sort of commentary upon Ex. xxi. 24-25. It is, in fact, simply a Jewish nursery-rime, now known to have been borrowed from, or fashioned after, a popular German ballad, the prototype of which seems to have been an old French song. The English translation of this Aramaic doggerel runs as follows:

> "One only kid, one only kid, which my father bought for two zuzim. One only kid, one only kid. The cat came and ate the kid, etc. Then came the dog, and bit the cat, etc. Then came the stick, and beat the dog, etc. Then came the fire that burned the stick, etc. Then came the water, and quenched the fire, etc. Then came the ox, and drank the water, etc. Then came the slaughterer, and killed the ox, etc. Then came the angel of death, and slew the slaughterer, etc. Then came the Most Holy—blessed be He!—and destroyed the angel of death that slew the slaughterer that killed the ox that drank the water that quenched the fire that burned the stick that beat the dog that bit the cat that ate the kid which my father bought for two zuzim. One only kid, one only kid."

According to the commentators, the legend illustrates how the people of Israel were for centuries oppressed and persecuted by all the nations of antiquity, and how the oppressors all perished one by one, and how Israel, the oppressed, survived. The allegorical explanation of the story is this: The *kid* symbolizes the Hebrew nation; Yhwh being the *father*, who bought or redeemed His people through Moses and Aaron (= the two pieces of money) from Egypt. The *cat* is Assyria, conqueror of Israel. The *dog* is Babylonia, the next to oppress the Jews. The *stick* stands for Persia; the *fire*, for Macedonia; the *water*, for Rome; the *ox*, for the Saracens, who conquered Palestine; the *slaughterer*, for the Crusaders; the *angel of death*, for the Turk, now ruling over Palestine; and, finally, the *Most Holy*, for the principle of eternal justice to vindicate Israel, the *one only kid* of the allegory.

Quite an extensive and interesting literature clusters about this curious droll. In 1731 Philip Nicodemus Lebrecht, a baptized Jew, published at Leipsic a tract with the following title: "חד גדיא. Ein Zicklein, das Ist, ein Merckwürdiges Rätzel aus der Jüdischen Oster-Liturgie Welches in Sich Begreifet die Begebenheiten und Schicksahle des Jüdischen Volcks, so Sie von Ausgang Ægypti an biss auf die Zukunft Ihres Annoch Täglich [zu] Erwartenden Messiæ Darunter Verstehen" (comp. Wolf, "Bibl. Hebr." iv. 954, 955). This commentary is borrowed from the Latin of Herrmann von der Hardt, who in 1727 published at Helmstadt an explanation of the "riddle," under the title, "Aenigmata Judaica" (Wolf, *l.c.* p. 1044; Franz Delitzsch, "Zur Gesch. der Jüdischen Poesie," p. 81, Leipsic, 1836; Steinschneider, "Cat. Bodl." col. 1032). In 1732 Christian Andreas Teuber published in Leipsic another treatise, based upon Lebrecht's, entitled: "חד גדיא לא ישראל, *h. e.* Wahrscheinliche Muhtmassung von dem Alten und Dunckeln Jüdischen Oster-Liede: Ein Zicklein, ein Zicklein." Wolf (*l.c.* iv. 1044) gives full information concerning the contents of this book. A number of other Christian writers have published and commented upon this nursery-rime, as though it were a profound philosophical poem, notably Wagenseil ("Belehrung von der Jüdisch-Teutschen Red- und Schreib-Art," 2d ed., pp. 98, 105, Königsberg, 1699) and Bodenschatz ("Kirchliche Verfassung der Heutigen Juden," section viii., pp. 310-319, Erlangen, 1748). In England, too, the legend was known and discussed in the "London Congregational Magazine" for 1834, whence it was reprinted in New York, 1835, under the title, "A Kid, a Kid, or the Jewish Origin of the Celebrated Legend, 'The House That Jack Built'" (see an article describing this little book in "The New York Times Saturday Review," Feb. 9, 1901). In the preface it is called a "parabolical hymn." Henry George published in London in 1862 an essay on the same subject: "An Attempt to Show that Our Nursery Rime 'The House That Jack Built' Is an Historical Allegory, . . . To Which Is Appended a Translation and Interpretation of an Ancient Jewish Hymn" (comp. Steinschneider, "Hebr. Bibl." v. 63).

There are, moreover, a number of Jewish commentaries on "Ḥad Gadya." A partial list of them (the earlier items alphabetically arranged) is given in the bibliography to this article.

Folk-Lore Parallels.

Parallels to this legend may be found in Oriental and Occidental folk-lore. Joseph Jacobs, in the notes to his "English Fairy Tales" (London, 1893), has collected some of the analogues, from "Don Quixote," and from Persian, Indian, and other sources. The origin, however, is now held to be a German folk-song, "Der Herr der Schickt den Jokel aus," a variant of which was sung in certain places in Germany on Sept. 17—a date sacred to a local saint, St. Lambert—and called "Lambertuslied" (see Nork, "Festkalender," pp. 587-588, Stuttgart, 1847). A French chanson, edited by Gaston Paris (see bibliography), is also cited as the prototype of the Chaldaic verses. There are, besides, two other French nursery-rimes, "Ah! Tu Sortiras, Biquette" and "La Petite Fourmi qui Allait à Jérusalem," which bear a striking resemblance to the Jewish legend. G. A. Kohut has republished (see bibliography) the German, French, and modern Greek variants; but perhaps the most curious analogue, in Siamese, was printed in "Trübner's Record" for Feb., 1890 (comp. "Jewish Messenger," New York, April 23, 1897).

As regards the age of the Jewish song, the Prague (1526) edition of the Haggadah does not contain it; but the edition of 1590, published in the same city, prints it with a German translation (comp. Zunz, "G. V." 2d ed., p. 133a; Steinschneider, "Hebr. Bibl." xiv. 52). The Portuguese and South-Arabian (Yemen) rituals do not include either the EḤAD MI YODEA' or the "Ḥad Gadya"; though one Yemen manuscript, in the Sutro Library, San Francisco, is said to contain the latter, added by a later hand, and Zunz found the former in a maḥzor of Avignon ("Allg. Zeit. des Jud." iii. 469). It is interesting to note that a German version of the "Ḥad Gadya" is to be found in Von Arnim and Brentano's anthology "Des Knaben Wunderhorn."

und Zweiten Abende des Ueberschreitungsfestes," No. 31, Posen, 1884. A melody of great interest was traditional in the home of J. Offenbach, the elder, ḥazzan at Cologne; and it may be found, with pianoforte accompaniment, in his edition of the Haggadah (Cologne, 1838). This arrangement is said to be due to Jacques Offenbach, the younger, the well-known composer of opera-bouffe. The text is given in the German version "Ein Lämmchen"; and the setting, slightly abbreviated, reappears in Abraham Baer's "Ba'al Tefillah," No. 773, Göteborg, 1887. An English version, here reproduced, was given in "Young Israel," ii., No. 14, London, 1898.

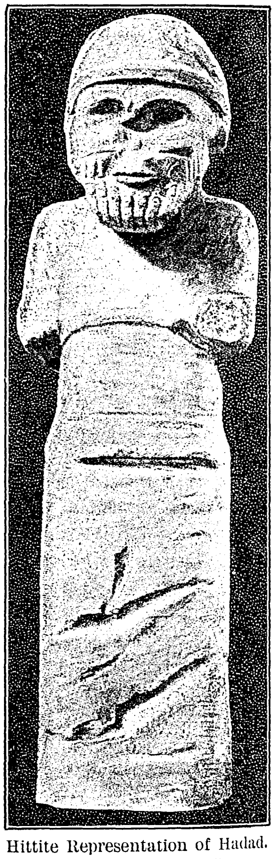
A. F. L. C.

HADAD: Name of an Aramaic, and possibly of an Edomitish, deity. It occurs as an element in personal names, for instance, in "Hadadezer," "Ben-hadad" (see Baudissin, "Studien zur Semitischen Religionsgesch." i. 310). In these compound names, the variant reading occasionally gives "Hadar" for "Hadad." The connection of "Hadad" with "Ezer" is the more usual, and "Ben-hadad" seems originally to have been a secondary form of the common name "Hadadezer," in Assyrian inscriptions "Hadad-idri" ("idri" = עזר; Schrader, "K. G. F." pp. 371, 538–539; *idem*, "K. A. T." 2d ed., p. 200). "Hadad" may have been identical with "Rimmon," or "Raman," since for "Hadad-idri" the equivalent "Raman-idri" is also found. The meaning of this name is apparent from that of the root הדד (= "to make a loud noise"; in Arabic "hadd," used of a falling building, of rain, of the sea, etc., so that "haddah" connotes "thunder"). The name designates the Aramaic weather- or storm-god; as such this element is met with in names on the Zenjirli inscription (see Lidzbarski, "Handbuch der Nordsemitischen Epigraphik," Index), in such compounds as עבדהדד (Scholz, "Götzendienst," etc., p. 245; comp. Euting in "Sitzungsberichte der Königlichen Akademie der Wissenschaften zu Berlin," p. 410; Baethgen, "Beiträge zur Semitischen Religionsgesch." p. 68), and in names on the El-Amarna tablets (Bezold, "The Tell el-Amarna Tablets in the British Museum," p. 155, London, 1892). As to its occurrence in Arabia, see Wellhausen, "Skizzen und Vorarbeiten," iii. 31. According to Halévy ("Etudes Sabéennes," p. 27), "Hadad" represents also a Sabean deity.

In the Old Testament "Hadad," without the addition of a qualifying word (verb), occurs as a personal noun, designating the Edomites. It is probable that where "Hadad" is found alone the second element has dropped out, and "Hadad" must be regarded as denoting the deity (Schröder, "Die Phönizische Sprache," 1869, p. 254; Nestle, "Die Israelitischen Eigennamen," 1876, pp. 114–116; Kerber, "Die Religionsgesch. Bedeutung der Hebräischen Eigennamen," 1897, p. 10). Variants of this name are "Hadar," "Hadad" (Wellhausen, *l.c.* p. 55), "Haddam" (?) in Himyaritic inscriptions ("C. I. S." Him. et Sab. No. 55), and "Hadu," in Nabatæan (G. Hoffmann, in "Zeit. für Assyr." xi. 228).

Earlier Interpretations.

"Hadad" combined with "Rimmon" is found in Zech. xii. 11; the context of the verse shows that the mourning of, or at (see below), Hadadrimmon represented the acme of desperate grief. The older exegetes agree in regarding "Hadadrimmon" as denominating a locality in the neighborhood of Megiddo. The lamentations of Sisera's mother (Judges v. 28), and the assumed weeping over Ahaziah, King of Judah, who died at Megiddo (II Kings ix. 27), have been adduced in explanation of the allusion. The most favored explanation is that given by the Peshiṭta, that the plaint referred to was for King Josiah, who had fallen at Megiddo (II Kings xxiii. 29). The Targum to Zech. xii. 11 combines two allusions, one to Ahab, supposed to have met his death at the hands of a Syrian by the name of "Hadadrimmon," and another to Josiah's fall at Megiddo. These various references to public lamentations over one or the other Biblical personage have been generally abandoned by modern scholars. Following Hitzig, it is now held that Zechariah had in mind a public mourning for the god Hadadrimmon, identified with the Phenician Adonis (Ezek. viii. 14, "Tammuz"), whose yearly death was the occasion for lament. This theory, plausible on the whole, is, however, open to objections arising from the text of the verse in Zechariah.



Hittite Representation of Hadad.
(In the Royal Museum, Berlin.)

"Hadadrimmon" is certainly a compound of two names of deities. The Masoretic text identifies the second element with Rimmon, "the pomegranate," and among modern scholars the attempt has been made to justify this reading on the assumption that the pomegranate was a symbol of the Hadad-Adonis cult. This view, however, still awaits confirmation. In the pictorial representations of Hadad (see "Mitteilungen aus den Orient. Sammlungen," p. 84, plate vi.) the god is shown bearded, wearing a cap and having horns on his head; while the description of the god of Heliopolis (identified with the Aramean Hadad by recent writers like Baudissin) which is found in Macrobius shows him with a whip, or lightning-bolt, in one hand, and with ears of grain in the other. These data, in which the pomegranate is missing, confirm the opinion that Hadad was a god of thunder, corresponding thus to the as-

A Thunder-God.

sumed Assyrian god Raman ("the thunderer"), and that the second element probably read, originally, "Raman." Adonis-Tammuz, however, was a solar deity; the thunder-god is not believed to have died, and why a lament should have been instituted over him and should have become typical of mourning is one of the unsolved riddles in the way of the interpretation now generally favored. It is true, Baudissin (in Herzog-Hauck, "Real-Encyc." vii. 292) deduces from the place-name, Heliopolis, and the material of the statue, gold, as described by Macrobius, that later, as a result of Egyptian influences, the Aramean thunder-god was conceived of as a sun-god. He adduces other pictorial representations, including a seal with the legend "Hadad" ("C. I. S." Aramaic, No. 75). Still, the transformation of the thunderer Hadad into a dying (solar) Adonis-Tammuz appears to be problematic. Of ceremonies, such as are known to have been central in the Adonis cult, in connection with the worship of Hadadrimmon, nothing is known. Nor, even if Hadad, identified with the Adonis of Byblus, or worshiped alongside this Adonis and thus gradually confounded with him (see Baudissin, *l.c.* p. 294), was believed to die every year, are data at hand to prove that such a lament took place at Megiddo.

Difficulties of Identification.

In view of these uncertainties the explanation of "Hadadrimmon" as the name of a locality in the plain of Megiddo has come again to the front, modified by the supposition that the place derived its name from a sanctuary supposed to exist there for the worship of Hadad-Raman. Still, a locality of this name is not known, notwithstanding Jerome's equation "Adadremnon" = "Maximianapolis." Perhaps the modern Rummanah, in the plain of Jezreel, might serve to locate the Biblical (Hadad) Rimmon. Then "Hadadrimmon" would be analogous to such names as "Ba'al-Lebanon," "Ashtart-Karnayim," and would signify the Hadad of the place Rimmon, which place received its name from an old (Canaanitish; see Judges i. 27) temple or altar erected to a deity (Rimmon, or Raman) by later Aramean settlers, and identified with their god Hadad, so that finally it came to be known by the double name.

This leaves open the question as to what mourning could have been observed at this place. The death of Josiah seems to afford the most plausible explanation of the prophet's simile. But even if the mourning is regarded as having taken place where the king died and not at the place of his burial (Jerusalem), it is difficult to believe that the one historical mourning should have been vivid enough in the minds of the people to evoke such an allusion; especially so if Zech. xii. belongs to the apocalyptic writings. The mourning at Hadadrimmon must have been constant and excessive. George Adam Smith ("The Twelve Prophets," ii. 482) calls the locality the "classic battle-field of the land"; the mourning, then, would have reference to the thousands slain in the various battles fought there. But this fails to account for the prominent mention of Hadadrimmon. Perhaps the difficulty would be removed, without recourse to such forced textual emendations as those proposed by Cheyne (in Cheyne and Black, "Encyc. Bibl."), by taking into consideration the fact that Hadad had the qualities of Moloch (see Baudissin, "Moloch," in Herzog-Hauck, "Real-Encyc." xii.). At his sanctuary human sacrifices were usual. Hence the lament both of the victims and of the mothers. As "Gehinnom," the name of a Moloch furnace, occurs as a common apocalyptic simile, why should not "Hadadrimmon" be associated with similar horrors? The murder of him whom the inhabitants of Jerusalem have pierced (Zech. xii. 10, 11), for whom they shall lament as for an only son, as for a first-born, carries out the analogy to the Moloch cult. The first-born (that is, the only son) was offered to this Hadad-Melek-Raman. E. G. H.

HADAD (הדד): Name of several Idumean kings, the meaning of which is "a loud noise." It was primitively the name of an Aramean divinity and formed a part of various Aramean theophorous names, as "Hadadrimmon" and "Hadadezer." The name was borne by: **1.** The third Idumean king, who reigned before the time of the first king of Israel, and who gained an important victory over the Midianites (Gen. xxxvi. 35; I Chron. i. 46). **2.** The last Idumean king (I Chron. i. 51). In Gen. xxxvi. 39 the name occurs as "Hadar." **3.** A member of the royal house of Edom, who escaped the massacre under Joab and fled to Egypt (I Kings xi. 14 *et seq.*: see EDOM). **4.** (חדד) One of the sons of Ishmael (Gen. xxv. 15 [A. V. "Hadar"]; I Chron. i. 30).

E. G. H. M. SEL.

HADADEZER or **HADAREZER** (הדרעזר-הדרעזר): Son of Rehob, and King of Aram-zobah, who, while he was on his way to establish his dominion on the Euphrates, was defeated by David, suffering great loss in chariots, horses, and men (II Sam. viii. 3-12; I Chron. xviii. 3, 4; I Kings xi. 23). After the first repulse of the Ammonites and their Syrian allies by Joab, Hadadezer seized an apparent opportunity to avenge himself. He sent his army to assist the people of Maachah, Rehob, and Ishtob (R. V. "the men of Tob"; II Sam. x. 15; I Chron. xix. 16). They crossed the Euphrates under the command of Shobach (Shophach), the chief of Hadadezer's host. On this occasion David himself commanded. The rout of the Arameans was complete; forty thousand horsemen were slain, including Shobach, the commander-in-chief (II Sam. x. 16-18; I Chron. xix. 16-18).

HADAMARD, ZÉLIE: French actress; born at Oran, Algeria, in 1849. The daughter of an army interpreter and professor of Arabic, she went to Paris and passed at the Conservatoire, making her stage début at the Odéon. After playing in Brussels and Rouen she returned to Paris, where she appeared at several theaters. At the Odéon, to which she afterward became attached, she filled and created many important parts, especially in classic tragedy. On Sept. 13, 1887, she appeared in "Andromaque" at the Comédie Française, where she is still engaged (1903), playing in both tragedy and comedy.

HADASSAH (lit. "the myrtle"): Earlier name of Esther, Mordecai's cousin (Esth. ii. 7). The name "Hadassah" occurs here only. It is not given by the Septuagint. In the Vulgate the name is given as "Edissa." See Esther.

E. G. H. B. P.

HADASSI, JUDAH BEN ELIJAH HA-ABEL: Karaite scholar, controversialist, and liturgist; flourished at Constantinople in the middle of the twelfth century. Regarding the name "ha-Abel," which signifies "mourner for Zion," see Abele Zion. Neubauer thinks that "Hadassi" means "native of Edessa" ("Aus der Petersburger Bibliothek," p. 56). Nothing of Hadassi's life is known except that he was the pupil of his elder brother Nathan. He dealt with Hebrew grammar, Masorah, theology, and philosophy, and knew Arabic and Greek well (Mordecai b. Nisan, "Dod Mordekai," ch. 11). Hadassi acquired his reputation by his "Eshkol ha-Kofer," or "Sefer ha-Peles." It is a treatise on the Commandments, in which the author endeavored to explain them philosophically, and in which he applied all his analytical talent and scholarship. The work embodies not only much of the science of his time, but even legends and folk-lore, so that it has appropriately been termed "a sea of learning." It is written in rimed prose, the general rime throughout the work being ך; and the initial letters of the successive verses form alternately the acrostics of אבגד and תשרק, repeated 379 times. The alphabetic chapters 105–124 are, however, in the regular form of poems. Hadassi began the work on Oct. 9, 1148. Starting from the premise that all laws contained in the Pentateuch, and those added by the Rabbis, as well as the minor ethical laws by which the Jews regulate their daily life, are implied in the Decalogue, Hadassi enumerates, under the head of each of the Ten Commandments, a complete series of coordinate laws; and the whole work is mapped out according to this plan.

Contents of the "Eshkol."

The first commandment, affirming the existence of God, contains alphabets 1–95, in which the author treats of the duties of the created toward the Creator, dealing, for instance, with prayer, repentance, future punishment and reward, and resurrection. Beginning with alphabet 35, Hadassi treats of the nature of God, of creation (מעשה בראשית), of angels, of the celestial bodies, etc. In fact, this part of the work is a compendium of religious philosophy, astronomy, physics, natural history, geography, and folk-lore. The second commandment, affirming the unity of God, contains alphabets 96–129. Here Hadassi refutes the views of other sects; for example, the Christians, Rabbinites, Samaritans, and Sadducees, who maintain the eternity of the world. He is indignant at those who identify the Karaites with the Sadducees, and shows great animosity toward the Rabbinites. Alphabets 99–100 contain a violent attack upon Christianity. The third commandment is discussed in alphabets 130–143; the fourth, in alphabets 144–248. In the latter he treats of the laws concerning the Sabbath, and then proceeds to the holidays and to the laws connected with them, as those relating to sacrifices, which include all laws concerning the priests, slaughtering, ẓiẓit, etc.

This part is the more important as it contains Hadassi's views on exegesis and grammar. For, discussing with the Rabbinites the kinds of work permitted or forbidden on the Sabbath, he is obliged to state his exegetical rules, and he endeavors to show that the Karaites are not inferior to the Rabbinites as exegetes. After giving the thirteen rules ("middot") of R. Ishmael and the thirty-two of R. Eliezer ben Jose ha-Gelili, he gives his own, dividing them into two groups, one of sixty and one of eighty, and finding an allusion to them in Cant. vi. 8. The sixty "queens" denote the sixty grammatical rules, headed by five "kings" (the five vowels); the eighty "concubines" denote the eighty exegetical rules; and the "virgins without number" represent the numberless grammatical forms in the Hebrew language. Considering phonetics as necessary for the interpretation of the Law, Hadassi devotes to this study a long treatise, in the form of questions and answers. The fifth commandment contains alphabets 249–264, treating of the laws regulating the relations between parents and children, of inheritance, mourning, etc. The sixth contains alphabets 265–274, and the seventh, alphabets 275–336, the latter covering all the laws concerning adultery, incest, cleanliness and uncleanliness, women in childbirth, and the fruit of the first three years. The eighth commandment is discussed in alphabets 337–353, covering the laws on the different kinds of theft and fraud. The ninth embraces alphabets 354–362, in which are discussed all kinds of false witnesses, including false prophets. Finally, the tenth commandment contains alphabets 363–379, dealing with the laws implied in the prohibition against covetousness. Hadassi illustrates his explanations by examples interspersed with tales and legends.

His Model and Sources.

Obviously his model was Nissim ben Noah's "Bitan ha-Maskilim," or "Peles Bi'ur ha-Miẓwot," written 370 years earlier. The sources upon which he drew included the "Ma'aseh Bereshit" of R. Ishmael; the Baraita of R. Samuel, for astronomy; the "Yosippon," for history; David al-Muḳammaṣ' work on the sects; Eldad ha-Dani, for legends; while for grammar he utilized especially the Karaite grammarians, though he also made use of the Rabbinites, quoting Judah Ḥayyuj and Ibn Janaḥ. The fact ought to be mentioned that Hadassi has included in his "Eshkol" the first grammatical work of Abraham ibn Ezra ("Moznayim," composed in Rome, 1140), without acknowledging the fact ("Monatsschrift," xl. 68 *et seq.*). In attacking the Rabbinites, he followed the example of his predecessors, as Solomon ben Jeroham, Japheth b. 'Ali, Sahl b. Maẓliaḥ, and others. This work was printed at Eupatoria (1836), with an introduction by Caleb Afendopolo entitled "Naḥal Eshkol." Alphabets 99–100 and part of 98 were excluded from this edition by the censor, but have been published by Bacher in "J. Q. R." (viii. 431 *et seq.*). Hadassi mentions a previously written work of his entitled "Sefer Teren bi-Teren," a collection of homonyms which, he says, was an addition to the eighty pairs of Ben Asher (alphabets 163 ב, 168 ס, 173 נ). There exists also a fragment which Firkovich (Cat. No. 619, St. Petersburg) entitled "Sefer ha-Yalkuṭ" and attributed to Hadassi, while Pinsker regarded it as an extract from Tobiah's "Sefer ha-Miẓwot." P. F. Frankl, however, agreed with Firkovich in regarding it as a part of the "Eshkol ha-Kofer," which Hadassi had previously written in prose. In the Karaite Siddur there are four piyyuṭim by Hadassi.

K. M. SEL.

ḤADDAD, ISAAC: Talmudic scholar of Gerba (an island near Tunis), where he died in 1755. He was a pupil of Ẓemaḥ ha-Kohen, and was the author of two works, "Toledot Yiẓḥaḳ," novellæ on Haggadah and Midrashim (Leghorn, 1761), and "Ḳarne Re'em," novellæ on Rashi's and Mizraḥi's commentaries to the Pentateuch, followed by "Zera' Yiẓḥaḳ," notes on Midrashim (*ib.* 1765).

HADES. See SHEOL.

HADID (חדיד): City mentioned with Lod and Ono (Ezra ii. 33; Neh. vii. 37; xi. 34, 35). From the last-given passage it would seem that Hadid was a Benjamite town, though it is not given in the list in Joshua (xviii. 21–28). An "Adida" (= "Hadid") is mentioned in I Macc. xii. 38, xiii. 13 as having been fortified with gates and bars by Simon the Maccabee. The Mishnah ('Ar. 32a) says that Hadid, as well as Lod and Ono, had been surrounded by walls from the time of Joshua. Hadid may be identified with the modern Al-Ḥadithah, not far from Lydda (Lod), mentioned also by Eusebius ("Onomasticon," *s.v.* "Adithaïm") under the name of "Adatha" or "Aditha," and as east of Diospolis (Lydda). See Zunz in Benjamin of Tudela's "Itinerary" (ii. 439, ed. Asher).

ḤADITH: An Arabic word signifying "narrative" or "communication"; the name given to sayings traced to the prophet Mohammed, or to reports of his actions by eye-witnesses. The authenticity of the ḥadith depends upon the value of the chain of tradition ("sanad," "isnad" = "support") which precedes the quotation or the report ("matn"); that is, upon the trustworthiness of the authorities who have handed down the tradition. Since, on account of the meagerness of the Koran, the most important documents for the religious, ritualistic, and legal development of Islam are contained in the ḥadith, the examination of the authenticity of the latter, with especial regard to the trustworthiness of the channels of transmission, has always formed one of the most important theological concerns of Islam. Notwithstanding the painstaking and precise character of such examinations, European critics hold that only a very small part of the ḥadith can be regarded as an actual record of Islam during the time of Mohammed and his immediate followers. It is rather a succession of testimonies, often self-contradictory, as to the aims, currents of thought, opinions, and decisions which came into existence during the first two centuries of the growth of Islam. In order to give them greater authority they are referred to the prophet and his companions. The study of the ḥadith is consequently of the greater importance because it discloses the successive stages and controlling ideas in the growth of the religious system of Islam. According to the consensus of Mohammedan critics, six canons, in which the most authentic records of the ḥadith are collected, have attained special authority, and form the most important source, next to the Koran, for Islamic theology. The collections of Bukhari (d. 870) and Muslim (d. 875) are those to which the highest authority is ascribed. These are supplemented by four others, namely, the collections of Abu Daud (d. 888), Tirmidhi (d. 892), Nasa'i (d. 914), and Ibn Maja (d. 886). All these works have recently been rendered accessible in the Orient; three-fourths of the Bukhari collection has been printed also in Europe (3 vols., Leyden, 1862–68).

"Sunnah."

Through an inexact extension of the term the contents of these works as well as the ḥadith in general have been called "sunnah," which latter term must be distinguished from "ḥadith." By "sunnah" are to be understood the religious customs handed down from the oldest generations of Islam, whether authenticated in the form of ḥadith or not. Ḥadith, on the other hand, may be a record of what is regarded as sunnah, but is not identical with it. For the sake of offering an analogy from Jewish literature, a parallel has often been drawn between "ḳur'an" and "miḳra" and between "sunnah" and "mishnah." This comparison, however, is quite absurd, for the Arabic "sunnah" (which means "manner," "custom") is etymologically and materially different from the Hebrew word with which it was identified. Just as incorrect was the widely prevalent opinion, which was supported by a comparison of the differences observed in Judaism between Rabbinites and Karaites, that the two great divisions into which Mohammedans are divided, Sunnites and

Shiites, are distinguished from each other through the fact that the former recognize, in addition to the Koran, the traditions of the ḥadith and sunnah, while the latter recognize only the validity of the Koran as a religious document, and not of the ḥadith. For the Shiites also recognize ḥadith as a source of religious doctrine, but they make the condition that the "isnad" be transmitted by authorities whom they regard as trustworthy (Shiitic ḥadith). As far as contents are concerned, the Shiitic ḥadith often coincides with the Sunnitic ḥadith (excepting in regard to the principles of public law).

The scope of the ḥadith includes everything that comes under the influence of religion—the ritual, the law in its entirety, the religious legends, and the ethical precepts and views. Within it a halakic and a haggadic ḥadith may be discriminated. The material which early Islam borrowed from Judaism is also clothed in the garb of the ḥadith. In later generations rabbinical precepts and legends which found their way into Mohammedan literature as a result of intercourse between Jew and Mohammedan were simply claimed as Islamic property, and, put in the technical phraseology of the ḥadith, were ascribed to the Prophet. In the article Islam the subject of derivation from the Halakah is treated more in detail. Even more plainly than in the case of the law and its codification, Jewish influence is seen in those portions of Islamic religious literature which correspond to the Jewish Haggadah, because here its elements were not forced into codified forms, and could therefore develop in greater freedom. This Mohammedan Haggadah seems to have received its final form, if at all, only very late; it is seen expanding freely as long as the impulse to ḥadith-creation remains active to any degree. Apart from the legendary amplifications of Biblical history, whose sources are usually rabbinical Haggadah and apocryphal literature, the moral precepts attributed to Mohammed and his companions and successors also show traces of rabbinical origin. And even Biblical passages are sometimes claimed in Mohammedan literature as ḥadiths of the Prophet. If, on the one hand, for the sake of making a display of learning, citations (including some from rabbinical sources; see "Z. D. M. G." lii. 712) which are foreign to the ḥadith literature are inserted in it as coming from Biblical sources ("taurat" and "zabur"; see *ib.* xxxii. 348 *et seq.*), on the other hand, rabbinic sayings are sometimes inserted as being original Mohammedan ḥadiths. A few characteristic examples must suffice:

(1) ג׳ מפתחות בידו של הקב״ה שלא נמסרו ביד שליח (Ta'an. 2a; comp. ארבעה מפתחות וכו׳, Tan., Gen., ed. Buber, pp. 106, 155): found in Bukhari's "Tauḥid," No. 4; "Istisḳa'," No. 28 (the thought is the same, though five keys are mentioned instead of three or four).

(2) Peah i. 1; see "R. E. J." xliv. 66 *et seq.*

(3) יאה עניותא לישראל כברזא סומקא וכו׳ (Ḥag. 9b); see Schreiner, "Studien über Jeschu'a b. Jehuda," p. 14, note 3, Berlin, 1900.

(4) הרוצה לשקר ירחיק עדיו (an old Jewish saying not found in the Talmud: comp. Brüll's "Jahrb." vii. 28); occurs in Abu Zaid's "Nawadir," pp. 171, 179, Beirut, 1894: "When it pleases you to lie, leave your witness at a distance" (it is possible, however, that this saying was borrowed by the Jews from the Arabs).

(5) קול באשה ערוה (Beẓah 29a), as a religious rule; a literal translation in the "Mufid al-'Ulum," p. 31, Cairo, 1310 A.H.

(6) "In heaven is proclaimed: 'A, the daughter of B, shall be the wife of C, the son of D'"; cited as teaching of the Prophet by Jahiẓ, "Le Livre des Beautés et des Antithèses," ed. Van Vloten, p. 218.

(7) Abot iii. 7; see Goldziher's "Abhandlungen zur Arab. Philologie," i. 193.

Other examples may be found in Barth's "Midraschische Elemente in der Muslimischen Tradition," in the "Berliner Festschrift," pp. 33–40.

G. I. G.

HADLAI (חדלי): An Ephraimite; father of Amasa, who was one of the chiefs of his tribe in the time of Pekah (II Chron. xxviii. 12).

E. G. H. M. Sel.

HADORAM (הדורם): **1.** Son of Joktan; progenitor of one of the Arabian tribes (Gen. x. 27; I Chron. i. 21). **2.** Son of Tou, King of Hamath; sent by his father to congratulate David after his victory over Hadadezer, bearing presents in gold, silver, and brass (I Chron. xviii. 10). In the parallel narrative, II Sam. viii. 9, 10, the name is given as "Joram." See Adoniram.

E. G. H. M. Sel.

HADRACH: Name occurring in Zech. ix. 1. The connection seems to indicate that it was the country in which Damascus was situated, or a neighboring locality. The Septuagint translates the name as "Sedrach." It has been suggested that Hadrach may be the name of a Damascene deity, or of a king of Damascus.

E. G. H. B. P.

HADRIAN: Roman emperor (117–138). At the very beginning of his reign he was called upon to suppress the final outbreaks of Jewish rebellion at Cyrene and Alexandria. According to a late but trustworthy source, he is said to have enticed the Jews of Alexandria into the open country, where about 50,000 of them were killed by his soldiers (Eliyahu R. xxx. 3). Afterward he seems to have avoided conflict with the Jews and to have granted them certain privileges. The Jewish sibyl, in fact, praises him (Sibyllines, v. 248); and Jewish legend says that R. Joshua b. Hananiah was on friendly terms with him, and that Hadrian intended to rebuild the Temple at Jerusalem (Gen. R. lxiv.). This agrees with the statement of Epiphanius ("De Mensuris et Ponderibus," § 14) that the emperor commissioned the proselyte Akylas (Aquila)—who, according to the rabbinical legend, was related to him—to supervise the building at Jerusalem, this of course referring to the city and not to the Temple. Other Christian sources, as Chrysostom, Cedrenus, and Nicephorus Callistus, say that the Jews had intended to build the Temple themselves; but a passage in the Epistle of Barnabas (xvi. 4)—though its interpretation is disputed among scholars—seems to indicate that the Jews expected the pagans to rebuild the Temple.

Scholars also differ as to the cause of the rebellion. According to Gregorovius (comp. Schlatter, "Die Tage Trajans und Hadrians," p. 2), "Palestinians instituted the kingdom of Jerusalem as a protection against the oppressions of Hadrian." Other scholars, however, say that the institution of the Messianic kingdom followed upon the rebuilding of the Temple. Even the ancient sources differ on this point. Thus, Spartianus ("Hadrianus," § 14) reports that the Jews rebelled because circumcision was interdicted; while the more reliable Dion Cassius says (lxix. 12) that Hadrian attempted to turn Jerusalem into a pagan city, which the Jews regarded as an abomination, and they therefore rebelled. It is possible that both of these measures were responsible for the rebellion; on the other hand, it is also possible that they were merely the consequences of it. Hadrian, who had a gentle disposition, was lauded throughout the great empire as a benefactor; he indeed so proved himself on his many journeys. Palestinian cities like Cæsarea, Tiberias, Gaza, and Petra owed much to him; and his presence in Judea in 130 is commemorated on coins with the inscription "Adventui Aug[usti] Judææ." He therefore could have had no intention of offending the Jews; but as a true Roman he believed only in the Roman "sacra" (Spartianus, *l.c.* § 22). It may have happened that in his zeal to rebuild destroyed cities he had disregarded the peculiarities of the Jews. The law against circumcision was founded on earlier Roman laws, and did not affect the Jews only. So long as the emperor was in Syria and Egypt the Jews remained quiet; but after his departure in 132 the rebellion under Bar Kokba broke out.

It seems that Hadrian himself remained in Judea until the rebellion had been put down (Darmesteter, in "R. E. J." i. 49 *et seq.*), and he may have mentioned the Jews in his autobiography, a point that Dion Cassius dwells upon; but he did not use the customary formula in his report to the Senate, that he and the army were well (Dion Cassius, *l.c.*), for the Roman army also was suffering. After the dearly bought victory in 135, Hadrian received for the second time the title of "imperator," as inscriptions show. Now only could he resume the building, on the ruins of Jerusalem, of the city Ælia Capitolina, called after him and dedicated to Jupiter Capitolinus. A series of magnificent edifices that Hadrian erected in Jerusalem are enumerated in a source that gathered its information probably from Julianus Africanus ("Chron. Paschale," ed. Dindorf, i. 474; "J. Q. R." xiv. 748). The temple of Jupiter towered on the site of the ancient Temple, with a statue of Hadrian in the interior (Jerome, Comm. on Isaiah ii. 9). The Jews now passed through a period of bitter persecution; Sabbaths, festivals, the study of the Torah, and circumcision were interdicted, and it seemed as if Hadrian desired to annihilate the Jewish people. His anger fell upon all the Jews of his empire, for he imposed upon them an oppressive poll-tax (Appian, "Syrian War," § 50). The persecution, however, did not last long, for Antoninus Pius revoked the cruel edicts.

After this the Jews did not hold Hadrian's memory in high honor; the Talmud and Midrash follow his name with the curse "Crush his bones." His reign is called the time of persecution and danger, and the blood of many martyrs is charged to his account. He is considered the type of a pagan king (Gen. R. lxiii. 7).

G. S. Kr.

HAFFKINE, WALDEMAR MORDECAI WOLFF: Bacteriologist; born at Odessa, Russia, 1860; graduated from the University of Odessa in 1884 (D.Sc.). He resided for the five following years at Odessa, working in the zoological museum of the university. His researches resulted in several papers, published in Russian and French scientific journals, on the infusoria and lower algæ (1883–1888). In the latter year he was appointed assistant professor of physiology under Professor Schiff at the University of Geneva. After eighteen months he went to Paris to work under Pasteur. Here he studied typhoid and cholera, and discovered the principle and method of inoculation with attenuated virus against cholera. In 1893 he went to India to conduct investigations for the Indian government. Making Calcutta his headquarters, he extended his operations over the whole of Bengal, and into the Punjab, the North-West Provinces, and Assam. In 1896 he was deputed by the Indian government to inquire into the bacteriology of the plague. He discovered an effective method of inoculation, and succeeded in reducing the mortality by 80 or 90 per cent. In recognition of his services he was created C.I.E. The Haffkine method of inoculation has been generally adopted throughout India, and the government plague research laboratory founded by him issues many thousand doses to various tropical countries. Haffkine's contributions to biological research include pamphlets and official reports on heredity and monocellular organisms, infectious diseases in connection with infusoria, the adaptability of microbes to their environment, Asiatic cholera and its etiology, and inoculation against cholera and the Indian plague. He has likewise translated into Russian a German text-book of zoology and a Norwegian work on botany.

J. G. L.

HAFṬARAH (lit. "conclusion"): That portion of the Prophets read immediately after the reading of the Torah in the morning services on Sabbaths, feast-days, and the Ninth of Ab, and in the afternoon services on fast-days. The passage chosen usually contains an explicit reference to some event described in the section previously read from the Torah; for instance, Isa. liv., on account of verse 9, goes with Gen. vi. 9–xi. 32; Hosea xii. 13 with Gen. xxviii. 10–xxxii. 2; Micah v. 6–vi. 8 with Num.

xxii.–xxv. In all of these cases the direct relation of one passage to the other is limited to one verse. Often the two sections bear merely a general resemblance to each other in their content, as is the case with those for most feast-days, those for the four Sabbaths before the Feast of Passover, etc. For example, II Kings iv., on account of verse 16, goes with Gen. xviii.–xxii.; I Kings i. with Gen. xxiii.–xxv. 18, on account of xxiv. 1, with which the weekly lesson originally began; Judges xiii. with Num. iv. 21–vii. 89, on account of vi. 1 *et seq.* Sometimes, when nothing more appropriate could be found, a remote similarity of ideas determined the selection of the hafṭarah: thus, Isa. xlii. 5 would be coupled with Gen. i.–vi. 8; Ezek. xxxvii. 15 with Gen. xliv. 18–xlvii. 27; indeed, sometimes the connection consists only in one word, as between Hosea ii. 2 and Num. i.–iv. 20; Isa. xxvii. 6 and Ex. i. 5. The hafṭarot are definitely fixed; they consist of from ten to fifty-two verses, and are read by the last person called upon by the prayer-leader or the rabbi to read from the Torah. They are preceded by two exordiums on the subject of God's delight in His prophets and their utterances and in the Torah, and are concluded by four laudations—upon God's faithfulness to His promises in regard to the restoration of Zion, the coming of the Messiah, and the reestablishment of the throne of David, upon the revelation of the Torah, upon the Prophets, and upon the feast-day.

Stages of Development.

The hafṭarah has passed through several stages of development (see LITURGY). The Talmudic sources, which trace the custom of reading from the Torah back to Moses and Ezra, do not mention the originator of the hafṭarah, which would seem to point to a later origin. Abudarham, a Spanish teacher of the fourteenth century, traces the hafṭarah back to the time of the persecution under Antiochus IV., Epiphanes (168–165 B.C.), when, owing to the prohibition against reading from the Torah, the corresponding sections from the Prophets were read instead, this practise becoming established as a custom. Although all authority for this explanation is lacking, it is not improbable that the custom dates from the pre-Christian era, and that originally it was observed only on feast-days and on the four special Sabbaths, and was later extended to all Sabbaths. It appears that the Pharisees in their conflict with the Sadducees read in connection with the various sections from the Torah such selections from the prophetical books—principally from the so-called Earlier Prophets—as supported their own interpretation of the laws concerning the festivals. Talmudic statements, together with Luke iv. 17, show that the reading of the hafṭarah on the Sabbath had already been instituted in the first century of the common era (Meg. 25b; Yer. Meg. iv. 75c; Tosef., iv. 34), although the selections at that time were by no means fixed (Meg. iv. 9).

The portions to be read on feast-days were first determined in the middle of the second century (Tosef., Meg. iv. 1); then followed those for the special Sabbaths; for ordinary Sabbaths only a few were fixed, which bore special relation to the sections from the Torah (Tosef., Meg. iv. 18). In the second century the choice of the passage was still left to the scholar who was called upon to read from the Torah (Meg. iv. 5). In Palestine the reading of the Prophets was completed in three years, in accordance with the three-year cycle of readings from the Torah, and consequently necessitated as many selections as there were weeks in the three years.

Triennial Cycle.

A manuscript in the Bodleian Library contains an incomplete list of these, which manuscript came originally from a synagogue in Cairo, probably of the Palestinians, who in the twelfth century still observed the triennial cycle. These hafṭarot consisted often of two or three verses, as in the oldest times, and were repeated in Aramaic, the language of the people, by an official translator, sentence by sentence, as they were read (Meg. iv. 4). Inappropriate passages remained untranslated. At times an address followed the reading from the Prophets (comp. Luke iv. 17 *et seq.*, and Pesiḳta), usually based upon the section from the Torah. In the course of time the hafṭarah grew (comp. Meg. 31a). When the triennial cycle was replaced in Babylonia by an annual cycle, and each three sections of the Torah were read as one, the hafṭarah to the first section was usually preserved, seldom that of the second or third, which is explained by the similarity of the rites in this respect. The Karaites almost always chose the hafṭarah to the middle section. The hafṭarot for the three Sabbaths of mourning before the Ninth of Ab and for the three Sabbaths of consolation after the Ninth of Ab, which have no connection with the section from the Torah, are later, though probably of Palestinian origin; for the former, admonitory speeches are chosen from Jer. i.–ii. and Isa. i.; for the latter, consolatory speeches from Isa. xl.–lxi. The hafṭarot of consolation were later made to extend over the following Sabbaths to the New-Year, and attained such importance that the homilies of the preacher touched only upon the hafṭarah and not upon the Torah (Pesiḳta). However, the extension beyond the three hafṭarot of consolation did not at first find general recognition, and not until later did it become prevalent. The benedictions preceding and following the hafṭarah are first found in the Palestinian treatise Soferim (xiii. 9–14), and, with some variations, in the prayer-book of the gaon Amram of Babylonia (900). For the accents of the hafṭarah see JEW. ENCYC. iii. 540–546, *s.v.* CANTILLATION, Nos. 3–8.

The following is a list of the sidrot and the corresponding hafṭarot for the various Sabbaths, together with the sections and hafṭarot for special Sabbaths and festivals:

SABBATHS.	SIDROT.	HAFṬAROT.
Bereshit	Gen. i. 1–vi. 8	Isa. xlii. 5–xliii. 10 (among Sephardim xlii. 5-21)
Noaḥ	Gen. vi. 9–xi. 32	Isa. liv. 1–lv. 5 (among Sephardim liv. 1–10)
Lek Leka	Gen. xii. 1–xvii. 27	Isa. xl. 27–xli. 16

Sabbaths.	Sidrot.	Hafṭarot.
Wayera	Gen. xviii. 1-xxii. 24	II Kings iv. 1-37 (among Sephardim iv. 1-23)
Ḥayye Sarah	Gen. xxiii. 1-xxv. 18	I Kings i. 1-31
Toledot	Gen. xxv. 19-xxviii. 9	Mal. i. 1-ii. 7
Wayeẓe	Gen. xxviii. 10-xxxii. 3	Hosea xii. 13-xiv. 10 (among Sephardim xi. 7-xii. 12)
Wayishlaḥ	Gen. xxxii. 4-xxxvi. 43	Hosea xi. 7-xii. 12, or Obad. i. 1-21
Wayesheb	Gen. xxxvii. 1-xl. 23	Amos ii. 6-iii. 8
Miḳḳeẓ	Gen. xli. 1-xliv. 17	I Kings iii. 15-iv. 1
Wayiggash	Gen. xliv. 18-xlvii. 27	Ezek. xxxvii. 15-28
Wayeḥi	Gen. xlvii. 28-l. 26	I Kings ii. 1-12
Shemot	Ex. i. 1-vi. 1	Isa. xxvii. 6-xxviii. 13 (among Sephardim Jer. i. 1-ii. 3)
Wa'era	Ex. vi. 2-ix. 35	Ezek. xxviii. 25-xxix. 21
Bo	Ex. x. 1-xiii. 16	Jer. xlvi. 13-28
Beshallaḥ	Ex. xiii. 17-xvii. 16	Judges iv. 4-v. 31 (among Sephardim v. 1-31)
Yitro	Ex. xviii. 1-xx. 26	Isa. vi. 1-vii. 6 (among Sephardim vi. 1-13)
Mishpaṭim	Ex. xxi. 1-xxiv. 18	Jer. xxxiv. 8-22; xxxiii. 25-26
Terumah	Ex. xxv. 1-xxvii. 19	I Kings v. 26-vi. 13
Teẓawweh	Ex. xxvii. 20-xxx. 10	Ezek. iii. 10-27
(Ki) Tissa	Ex. xxx. 11-xxxiv. 35	I Kings xviii. 1-39 (among Sephardim xviii. 20-39)
Wayaḳhel	Ex. xxxv. 1-xxxviii. 20	I Kings vii. 40-50 (among Sephardim vii. 13-26)
Peḳude	Ex. xxxviii. 21-xl. 38	I Kings vii. 51-viii. 21 (among Sephardim vii. 40-50)
Wayiḳra	Lev. i. 1-v. 26	Isa. xliii. 21-xliv. 23
Ẓaw	Lev. vi. 1-viii. 36	Jer. vii. 21-viii. 3 and ix. 22, 23
Shemini	Lev. ix. 1-xi. 47	II Sam. vi. 1-vii. 17 (among Sephardim vi. 1-19)
Tazria'	Lev. xii. 1-xiii. 59	II Kings iv. 42-v. 19
Meẓora'	Lev. xiv. 1-xv. 33	II Kings vii. 3-20
Aḥare Mot	Lev. xvi. 1-xviii. 30	Ezek. xxii. 1-16
Ḳedoshim	Lev. xix. 1-xx. 27	Amos ix. 7-15 (among Sephardim Ezek. xx. 2-20)
Emor	Lev. xxi. 1-xxiv. 23	Ezek. xliv. 15-31
Behar	Lev. xxv. 1-xxvi. 2	Jer. xxxii. 6-27
Beḥuḳḳotai	Lev. xxvi. 3-xxvii. 34	Jer. xvi. 19-xvii. 14
Bemidbar	Num. i. 1-iv. 20	Hosea ii. 1-22
Naso	Num. iv. 21-vii. 89	Judges xiii. 2-25
Beha'aloteka	Num. viii. 1-xii. 16	Zech. ii. 14-iv. 7
Shelaḥ	Num. xiii. 1-xv. 41	Josh. ii. 1-24
Ḳoraḥ	Num. xvi. 1-xviii. 32	I Sam. xi. 14-xii. 22
Ḥuḳḳat	Num. xix. 1-xxii. 1	Judges xi. 1-33
Balaḳ	Num. xxii. 2-xxv. 9	Micah v. 6-vi. 8
Pineḥas	Num. xxv. 10-xxx. 1	I Kings xviii. 46-xix. 21
Maṭṭot	Num. xxx. 2-xxxii. 42	Jer. i. 1-ii. 3
Masse'e	Num. xxxiii. 1-xxxvi. 13	Jer. ii. 4-28 and iv. 1, 2
Debarim	Deut. i. 1-iii. 22	Isa. i. 1-27
Wa'etḥanan	Deut. iii. 23-vii. 11	Isa. xl. 1-26
'Eḳeb	Deut. vii. 12-xi. 25	Isa. xlix. 14-li. 4
Re'eh	Deut. xi. 26-xvi. 17	Isa. liv. 11-lv. 6
Shofeṭim	Deut. xvi. 18-xxi. 9	Isa. li. 12-lii. 13
Ki Teẓe	Deut. xxi. 10-xxv. 19	Isa. liv. 1-10
Ki Tabo	Deut. xxvi. 1-xxix. 8	Isa. lx. 1-22
Niẓẓabim	Deut. xxix. 9-xxx. 20	Isa. lxi. 10-lxiii. 9
Wayelek	Deut. xxxi. 1-30	Isa. lv. 6-lvi. 8 (among Sephardim Hosea xiv. 2-10; Micah vii. 18-20)
Ha'azinu	Deut. xxxii. 1-52	Hosea xiv. 2-10 (among Sephardim II Sam. xxii. 1-51)
Wezot ha-Berakah	Deut. xxxiii. 1-xxxiv. 12	Josh. i. 1-18
Special Sabbaths and Holy Days.		
Rosh Ḥodesh on Sabbath	Weekly portion and Num. xxviii. 9-15	Isa. lxvi. 1-24
Rosh Ḥodesh on day following Sabbath	Weekly portion	I Sam. xx. 18-42
Sheḳalim	Ex. xxx. 11-16	II Kings xii. 1-17 (among Sephardim xi. 17-xii. 17)
Zakor	Deut. xxv. 17-19	I Sam. xv. 2-34 (among Sephardim xv. 1-34)
Parah	Num. xix. 1-22	Ezek. xxxvi. 16-36
Ha-Ḥodesh	Ex. xii. 1-20	Ezek. xlv. 16-xlvi. 18 (among Sephardim xlv. 18-xlvi. 15)
Ḥanukkah on Sabbath	Part of Num. vii.	Zech. ii. 14-iv. 7
Sabbath ha-Gadol	Weekly lesson	Mal. iii. 4-24
Passover, 1st Day	Ex. xii. 21-51; Num. xxviii. 16-25	Josh. iii. 5-iv. 1 (among Sephardim v. 2-vi. 1)
Passover, 2d Day	Lev. xxii. 26-xxiii. 44; Num. xxviii. 16-25	II Kings xxiii. 1-10, 21-25
Passover and Sabbath	Ex. xxxiii. 12-xxxiv. 26; Num. xxviii. 19-25	Ezek. xxxvii. 1-15
Passover, 7th Day	Ex. xiii. 17-xv. 26; Num. xxviii. 19-25	II Sam. xxii. 1-51
Passover, 8th Day	Deut. xv. 19-xvi. 17; Num. xxviii. 19-25	Isa. x. 32-xii. 6
Shebu'ot, 1st Day	Ex. xix. 1-xx. 23; Num. xxviii. 26-31	Ezek. i. 1-28 and iii. 1-12
Shebu'ot, 2d Day	Deut. xv. 19-xvi. 17; Num. xxviii. 26-31	Hab. iii. 1-19 (among Sephardim ii. 20-iii. 19)
Tish'ah be-Ab, Morning	Deut. iv. 25-40	Jer. viii. 13-ix. 23
Tish'ah be-Ab, Afternoon	Ex. xxxii. 11-14, xxxiv. 1-10	Isa. lv. 6-lvi. 8
Rosh ha-Shanah, 1st Day	Gen. xxi. 1-34; Num. xxix. 1-6	I Sam. i. 1-ii. 10
Rosh ha-Shanah, 2d Day	Gen. xxii. 1-19; Num. xxix. 1-6	Jer. xxxi. 2-20
Yom Kippur, Morning	Lev. xvi. 1-34; Num. xix. 7-11	Isa. lvii. 14-lviii. 14
Yom Kippur, Afternoon	Lev. xviii. 1	Jonah i. 1-iv. 11 (Sephardim add Micah vii. 18-20)
Sukkot, 1st Day	Lev. xxii. 26-xxiii. 44; Num. xxix. 12-16	Zech. xiv. 1-21
Sukkot, 2d Day	Lev. xxii. 26-xxiii. 44; Num. xxix. 12-16	I Kings viii. 2-21
Sukkot, on Sabbath	Ex. xxxiii. 12-xxxiv. 26; Num. xxix. 26-31	Ezek. xxxviii. 18-xxxix. 16
Shemini 'Aẓeret	Deut. xiv. 22-xvi. 17; Num. xxix. 35-xxx. 1	I Kings viii. 54-66

ḤAFZ (IBN AL-BIRR) AL-ḲUṬI: Author of the eleventh century, or earlier; according to Steinschneider, possibly identical with Ḥafz (Ḥefeẓ) b. Yazliaḥ. Ḥafz al-Ḳuṭi translated the Book of Psalms into Arabic rime. Moses ibn Ezra, in his "Kitab al-Muḥaḍarah," quotes a passage from the introduction, and Ps. lv. 22-23 of this translation ("Bodl. Libr. Hunt.," No. 599; Neubauer, "Cat. Bodl. Hebr. MSS." No. 1974; see Schreiner in "R. E. J." xxi. 106). Steinschneider recognized a manuscript in the library of the Escurial ("Codex Ambros." No. 86, copied in 1625 by Colville) as this translation of Ḥafz al-Ḳuṭi. As it contains evidences of Christian influence, Hammer designated Ḥafz as a "Jewish renegade"; for the same reason Neubauer makes him an Arabic or Syrian Christian, while Steinschneider maintains that the author was a Jew, and that the traces of Christian influence are due to later additions or emendations. Solomon ibn Gabirol quotes sentences of Ḥafẓ al-Ḳuṭi.

The name "al-Ḳuṭi" is doubtful. In one instance the reading is "al-Futi," which Schreiner (*l.c.*) regards as correct; "al-Ḳuṭi," however, appears more probable. It is generally supposed to mean "the Goth," *i.e.*, the Spaniard, but according to Neubauer the author might have come from Ḳuṭ in Balkh (see Yaḳut's "Mushtarik," iv. 251; but comp. Harkavy in "R. E. J." xxx. 318).

HAGAB (חגב): Family of Nethinim, which returned from Babylon with Zerubbabel (Ezra ii. 46). In I Esd. v. 30 the name is given as "Agaba."

E. G. H. M. Sel.

HAGABA, HAGABAH (חגבא, חגבה): Family of Nethinim, which came back from captivity with Zerubbabel (Ezra ii. 45; Neh. vii. 48). In I Esd. v. 29 the name is given as "Graba."

E. G. H. M. Sel.

HAGAR.—Biblical Data: Egyptian handmaid of Sarah, and mother of Ishmael. According to one narrative, Sarah, having no children, requested Abraham to take Hagar as concubine, so that she might adopt her children (comp. Gen. xxx. 3, where Rachel makes a similar request). When Hagar had conceived she became domineering, and Sarah, with the consent of Abraham, drove her into the wilderness. There, as she sat by a fountain, an angel of the Lord appeared and commanded her to return to her mistress and submit to her. He promised that she should bear a son who would be called "Ishmael" (= "he whom the Lord will hear"), and that he would be a strong fighter ("a wild ass among men"), and would be respected by his brethren (Gen. xvi.). Another narrative tells that when Isaac had been weaned Ishmael "played" with him or "mocked" him (מצחק is ambiguous), and that Sarah demanded of Abraham that he cast out Hagar and her son, that the latter might not inherit with Isaac. Abraham was unwilling to do so, but upon God's command he yielded. Hagar fled again into the wilderness, where Ishmael came near dying of thirst. In the moment of her greatest despair an angel of God appeared to her and showed her a well, promising her that Ishmael would found a great nation. She dwelt with her son in the wilderness of Paran, where he became an archer, and she took a wife for him from Egypt (Gen. xxi. 9-21).

Only one other mention of Hagar is found in the Bible (Gen. xxv. 12), where she is merely referred to as the mother of Ishmael. There are in various passages in Chronicles, however, references to the tribe of Hagarites, who were neighbors of the trans-Jordanic tribes of Israel and were driven from their homes by them (I Chron. v. 10, 18-22; xi. 38; xxvii. 31). The Hagarites have been identified with the Agraioi mentioned by Strabo (xvi. 4, 2), and though Arabians, they do not belong to the Ishmaelites.

——In Rabbinical Literature: According to the Midrash (Gen. R. xlv.), Hagar was the daughter of Pharaoh, who, seeing what great miracles God had done for Sarah's sake (Gen. xii. 17), said: "It is better for Hagar to be a slave in Sarah's house than mistress in her own." In this sense Hagar's name is interpreted as "reward" ("Ha-Agar" = "this is reward"). She was at first reluctant when Sarah desired her to marry Abraham, and although Sarah had full authority over her as her handmaid, she persuaded her, saying. "Consider thyself happy to be united with this saint." Hagar is held up as an example of the high degree of godliness prevalent in Abraham's time, for while Manoah was afraid that he would die because he had seen an angel of God (Judges xiii. 22), Hagar was not frightened by the sight of the divine messenger (Gen. R. *l.c.*). Her fidelity is praised, for even after Abraham sent her away she kept her marriage vow, and therefore she was identified with Keturah (Gen. xxv. 1), with allusion to קטר (Aramaic, "to tie"; Gen. R. lxi.). Another explanation of the same name is "to adorn," because she was adorned with piety and good deeds (*l.c.*). It was Isaac who, after the death of Sarah, went to bring back Hagar to the house of his father; the Rabbis infer this from the report that Isaac came from Beer-lahai-roi, the place which Hagar had named (Gen. xvi. 14, xxiv. 62; Gen. R. lx.; see commentaries *ad loc.*).

Other homilies, however, take an unfavorable view of Hagar's character. Referring to the report that when she had conceived she began to despise her mistress, the Rabbis say that she gossiped about Sarah, saying: "She is certainly not as godly as she pretends to be, for in all the years of her married life she has had no children, while I conceived at once" (Gen. R. xlv.; Sefer ha-Yashar, Lek Leka). Sarah took revenge (Gen. xvi.) by preventing her intercourse with Abraham, by whipping her with her slipper, and by exacting humiliating services, such as carrying her bathing-materials to the bath (*l.c.*); she further caused Hagar by an evil eye to miscarry, and Ishmael, therefore, was her second child, as is inferred from the fact that the angel prophesied that she would bear a child (Gen. xvi. 11), while it had been narrated before that she was pregnant (Gen. xvi. 4). It is further inferred, from the words "she went astray" (Gen. xxi. 14, Hebr.), that as soon as she had reached the wilderness she relapsed into idolatry, and that she murmured against God's providence, saying: "Yesterday thou saidest: 'I will multiply thy seed exceedingly' [Gen. xvi. 10]; and now my son is dying of thirst." The fact that she selected an Egyptian woman as her son's wife is also counted against her as a proof that her conversion to Judaism was not sincere, for "throw the stick into the air, it will return to its root" (Gen. R. liii., end). This Egyptian wife is explained in the Targum of pseudo-Jonathan to refer to Khadija and Fatima, the widow and the daughter of Mohammed (see Zunz, "G. V." 2d ed., p. 288, note a).

S. S. D.

——**Critical View:** While the two narratives, Gen. xvi. and xxi. 9–21, are not directly contradictory, the critical school, pointing to the fact that in both instances Hagar is expelled upon Sarah's request and with the reluctant assent of Abraham, and that in both instances she receives, while sitting by a fountain, a divine message foretelling the great destiny of her son, finds in these narratives two parallel accounts of the origin of the Bedouins, whose racial affinity with the Israelites the latter had to admit, while degrading them by tracing their origin to a concubine of their common ancestor. Accordingly the name "Hagar" is explained as "the fugitive," from the Arabic "hajar" (to flee). Her native country was not Egypt, but Muṣri in northern Arabia, according to Winckler ("Altorientalische Forschungen," pp. 29 *et seq.*, as cited by Holzinger, "Genesis," in "Kurzer Hand-Commentar zum Alten Testament," p. 151). As regards sources, the account in Gen. xvi. is assumed to be Jahvistic, with the exception of verse three, which, apparently repeating verse two, is ascribed to the Priestly Code; the account in Gen. xxi. is put down as Elohistic.

E. C. D.

——**In Arabic Literature:** According to the Midrash (Gen. R. xlv.), Hagar was the daughter of Pharaoh, who presented her to Abraham. The same story is told in Mohammedan tradition. When she bore Ishmael, from whose countenance the light of Mohammed shone forth, Sarah demanded her expulsion. Abraham desired to spare her, but Sarah swore to bathe her hands in her rival's blood. Abraham thereupon pierced Hagar's ear and caused the blood to run over Sarah's hand, that her vow might be fulfilled without sacrificing Hagar's life. When Isaac was born Sarah's jealousy awoke afresh, and she insisted that Hagar should go. Conducted by the archangel Gabriel, Abraham took Hagar and Ishmael into the Arabian desert, and left them at the place where the Kaaba of Mecca was built later on. As soon as Hagar's scant provisions were exhausted she sought water, running and praying, between the hills Safa and Marwah. This she repeated seven times. At last the archangel Gabriel reappeared, and, stamping his foot on the ground, brought forth a spring. This is the holy fountain of Zamzam, near the Kaaba. In commemoration of Hagar's example, running seven times between the two hills mentioned above has been made an important ceremony in the pilgrimage to Mecca. As the spring provided Hagar and Ishmael with water, they remained there, and Abraham visited them every month. When Ishmael was thirteen years old Abraham was told in a dream to sacrifice him. Satan, however, appeared to Hagar and asked her: "Dost thou know whither Abraham went with thy son?" "Yes," she replied; "he went into the forest to cut wood." "No," said Satan; "he went to slaughter thy son." "How can that be," asked Hagar, "since he loves him as much as I do?" "He believes," Satan answered, "that God has commanded him to do so." "If this be so," said Hagar, "let him do the will of God."

HAGAR, HAGRIM: Names used by Jewish medieval writers to designate Hungary and the Hungarians. The expression "Ereẓ Hagar" occurs in Rashi on Yoma 11a, in a responsum of the French tosafist Isaac b. Abraham (died about 1200), and in the "Or-Zarua'" (i. 51a) of Isaac b. Moses (early thirteenth century; comp. Emden, "Megillat Sefer," p. 85, Warsaw, 1896; S. Kohn [in Hungarian] on the Hebrew sources and data for the history of Hungary, pp. 144–159, Budapest, 1881). Since the latter half of the fifteenth century the name "Hagrim" is used more frequently; for instance, by Isaac Tyrnau and by Moses Isserles in his Responsa (No. 82). The "Hagrim" of the Psalms (lxxxiii. 7, Hebr.) is rendered in the Targum by "Hungera'e," which, according to Levy ("Chal. Wörterb." *s.v.*) and Kohut ("Aruch Completum"), means "Hungary." Selig Cassel endeavored to prove ("Auswahl," p. 331) that the "Hungera'e" of the Targum is simply the Aramaic form of the Hebrew for "children of Hagar," or Arabs.

HAGARENES, HAGARITES, or (R. V.) **HAGRITES:** A nomadic people dwelling in the east of Palestine, against whom the tribe of Reuben was victorious in the time of Saul, seizing their tents and taking possession of their territory throughout the east of Gilead (I Chron. v. 10). The war is described (*ib.* 18–20) as having been made by "the sons of Reuben and the Gadites and half the tribe of Manasseh . . . with the Hagarites, with Jetur, and Nephish, and Nodab"; and the booty which the Israelites took from the Hagarites was considerable. The Hagarenes are mentioned in Ps. lxxxiii. 6–8 as confederates against Israel. A Hagarite (A. V. "Hagerite") named Jaziz was the chief overseer of David's flocks (I Chron. xxvii. 31). As to the origin of the Hagarites see Cheyne and Black, "Encyc. Bibl." *s.v.*, and Hastings, "Dict. Bible," *s.v.*

HAGENAU: Fortified town of Alsace, situated on the Moder, sixteen miles north of Strasburg. Attracted by the numerous privileges granted to its inhabitants by Frederick Barbarossa, Jews settled there soon after it received its charter as a city (1164), and a synagogue was established in 1252. Until the middle of the sixteenth century the Jews lived peaceably among their fellow citizens, though at the time of the Crusades they had to petition Emperor Conrad, imploring his protection. In 1262 Richard IV. officially confirmed the privileges of the city in a charter which contained the following paragraphs concerning the Jews: "We desire and ordain that the Jews of Hagenau, serfs of our imperial chamber, according to our letters patent, be subject only to our chamber and to our orders. No one may subject them to uncustomary service, or transgress our law without incurring our disfavor."

Confiscation and Banishment.

In consequence of the refusal of the citizens of Hagenau to submit to Charles IV. while Louis of Bavaria was still alive, John of Lichtenberg entered the city and confiscated the houses and synagogue of the Jews. The townspeople, impoverished by the protracted civil war, in their turn plundered the Jews, subjected them to every imaginable persecution, and finally banished them (1346). The Jews were, however, soon readmitted on condition that they paid the debts of the city. The persecutions of 1349, which the community of Hagenau escaped, brought to the environs of that city a considerable number of Jews. In order to arrest their increase Sigismund, although confirming the protection of Jews already established in the city, prohibited the sale or lease of houses to new arrivals (1436). This, however, did not prevent the municipality from repeatedly granting for a certain sum, the amount of which was continually increased, temporary shelter to the Jews of the environs whenever war or disorders arose in the country. In 1561 the municipal council issued an order prohibiting non-resident Jews from frequenting the synagogue; and the congregation was compelled to sign a treaty in which it pledged itself, under penalty of having the house of worship closed altogether, to enforce the regulation.

During the second half of the sixteenth and the first half of the seventeenth century the condition of the community remained unchanged. Only six families, which had settled at Hagenau in the twelfth century, were allowed to have a permanent residence there; and it was only on a heavy monetary payment that a newcomer was allowed to take the place of a deceased head of one of these families. Besides the yearly taxes to the emperors and to the city, the Jewish residents had to pay for a special permit for maintaining their synagogue and for every interment.

In the Eighteenth Century.

With the occupation of Alsace by France in 1648 the municipality adopted a more liberal policy toward the Jews. In 1657 it granted gratuitously a temporary shelter to Polish refugees. Under the pressure of the government one Gershon, a Jewish purveyor to the army, was admitted as a resident. He was followed by others; so that in 1695 the community numbered nineteen families. But this liberality on the part of the municipality was due to the fact that its finances were in an unsatisfactory condition, and the exorbitant taxes paid by the Jews contributed materially to the income of the city. It is not astonishing, therefore, that as soon as the municipality became more prosperous it showed itself more rigorous toward new Jewish settlers. Thus in 1714 it issued an edict forbidding the citizens to shelter foreign Jews and prohibiting resident Jews from transacting business on Sundays or Christian holy days. In 1720 it issued the following regulations, which remained in force until the French Revolution: "The Jews who are at present living in the city may remain. Only one married son in each family has the right to settle in the city; the other children, both male and female, must on marriage leave it, except when they live in common households with their parents. Grandsons acquire this right of residence only on the death of their grandfather." The Jews of Hagenau were, moreover, restricted in their commercial activity to dealing in horses, cattle, and old clothes, and to the lending of money on interest; and they were closely watched by the Christian merchants, who were jealous of Jewish competition. In 1790 Hagenau ceased to be an imperial privileged city; and the history of its Jewish community thenceforward differs little from that of other communities in France and Germany.

Rabbis.

During the Middle Ages the affairs of the Hagenau congregation had been administered by elected officers. About the middle of the seventeenth century the Jews applied to the municipality for permission to nominate a rabbi. This demand being refused, a certain Löwel, availing himself of his privilege to engage a bookkeeper, brought to the city, ostensibly in that capacity, a rabbi named Meyer, who was registered as Löwel's bookkeeper (1660). Meyer soon gained the favor of the municipality, which tacitly recognized him as judge in civil affairs between Jews. Meyer was very active in the rebuilding of the synagogue (1665) and in the construction of a new edifice (1683), the former one having been burned in 1677. Meyer's successors, until the introduction of consistories, were: Wolf Hohenfelden (d. 1720); Elijah Schwab of Metz (1722–46); Samuel Halberstadt (1746–53); Lazarus Moyses (1753–71); Jequel Gougenheim (1771–?). On the introduction of consistories in France Hagenau was assigned to the consistory of Strasburg. The present rabbi is M. Lévy; and the community numbers 695 Jews in a total population of 17,958.

HAGENBACH: Village in Upper Franconia, Bavaria. That an old Jewish colony existed there is proved by "Das Martyrologium des Nürnberger Memorbuches" (ed. Salfeld, p. 271), which mentions Hagenbach among those places in which the Jewish inhabitants suffered during the persecution in Franconia in 1298. When the Jews of Bamberg were exiled by the prince-bishop Philipp von Henneberg in 1478, numerous petty communities came into existence throughout the diocese under the protection of the country nobility, among which Hagenbach, where the Jews lived under the protection of the Baron von Seefried, held a not unimportant position.

All the country Jews, together with the Jews living under the direct protection of the bishop, formed an association for the purpose of maintaining a common district rabbinate and of representing their common interests in their relations with the lords. Of the five districts which were included in the district rabbinate of Bamberg, Hagenbach was one. When the Jewish corporations of the kingdom were dissolved by the edict of the Bavarian government (1813; see BAVARIA), Hagenbach became the seat of an independent rabbinate including fourteen communities, almost all of which have since been dissolved.

So far as is known the first rabbi of Hagenbach was Benedict Moses Mack, who was followed, in Sept., 1836, by Aaron Seligman. Seligman's successor was Dr. Königshöfer, who afterward was called to Fürth as principal of the orphan asylum. In 1867 the rabbinate of Hagenbach was united with that of Baiersdorf; and in 1894, when this was dissolved, the communities were included in the district rabbinate of Bamberg. At present (1903) the Hagenbach congregation is composed of eight families aggregating thirty persons; it supports a public school.

HAGGADAH (הגדה or אגדה): Derived from the verb הגיד (kal נגד), "to report," "to explain," "to narrate." The verb הגיד sometimes introduces halakic explanations, but the noun הגדה is used only in contradistinction to "halakah," and means a tale, a narrative, an explanation, a homily, including also the gnomic laws of the Rabbis, as well as stories and legends bearing upon the lives of Biblical and post-Biblical Jewish saints. Such topics as astronomy and astrology, medicine and magic, theosophy and mysticism, and similar subjects, falling mostly under the heading of folk-lore, pass as a rule also under the name of "haggadah." It thus stands for the whole content of the non-legal part of the old rabbinical literature. When applied to the Scriptures in order to indicate interpretation, illustration, or expansion in a moralizing or edifying manner, it is used in the form "Midrash Haggadah" (see MIDRASH HAGGADAH).

HAGGADAH (SHEL PESAḤ): Ritual for Passover eve. Ex. xiii. 8, R. V., reads: "And thou shalt tell thy son in that day, saying, It is because of that which the Lord did for me, when I came forth out of Egypt." On the basis of that passage it was considered a duty to narrate the story of the Exodus on the eve of Passover (Mek. *ad loc.*). Whether there was such a ritual for that service in the days of the Temple is, perhaps, doubtful. The New Testament reports of the Passover celebration of Jesus (Matt. xxvi. 17-30; Mark xiv. 12-26; Luke xxii. 1-20) contain nothing beyond a statement in two of the sources that a hymn was sung (Matt. xxvi. 30; Mark xiv. 26), which was undoubtedly the "Hallel." The first mention of any such ritual is found in the Mishnah (Pes. x. 5), where it is reported that R. Gamaliel said, "One who has not said these three words on Passover has not done his duty: 'pesaḥ,' 'maẓẓah' [unleavened bread], and 'maror' [bitter herbs]." It is impossible to suppose that Gamaliel desired merely these three words to be pronounced; he must have meant that the eating did not fulfil the Law (Ex. xii. 8) if the spiritual meaning of the act was not recognized. The opinion is held by many scholars that this Gamaliel was the first of that name (Landshuth, "Hagadavorträge," p. xv., Berlin, 1855; Müller, "Die Haggadah von Serajewo," p. 6, Vienna, 1898), but this opinion, based on the fact that Gamaliel speaks of the Passover lamb, is hardly warranted. It is much more reasonable to assume with Weiss ("Dor," ii. 74) that Gamaliel II. arranged a Passover ritual, just as he arranged the ritual for the daily service and for the grace after meals, because the destruction of the Temple had made it necessary to find new methods of public worship. The mere fact that R. Gamaliel introduced a ritual proves conclusively that the services of Passover eve already existed. This is also borne out by the Mishnah (Pes. x. 4): "The son shall ask his father about the meaning of the ceremonies, and according to the maturity of the son shall the father instruct him. If the son has not sufficient intelligence to ask, the father shall inform him voluntarily." This is done in literal fulfilment of the Biblical passage: "And it shall be when thy son asketh thee in time to come, saying, What is this? that thou shalt say unto him, By strength of hand the Lord brought us out from . . . the house of bondage" (Ex. xiii. 14). Of such questions, the Mishnah, as the context shows, antedates the time of Gamaliel, preserves four:

> "What is the difference between this night and all other nights? On all other nights we eat leavened or unleavened bread; on this night only unleavened?" ". . . On all other nights we eat various herbs; on this night only bitter herbs?" ". . . On all other nights we eat our meat roasted, cooked, or stewed; on this night only roasted?" ". . . On all other nights we dip [the vegetable with which the meal begins] only once [into salt]; on this night twice?"

Development.

Earliest Portions.

This portion has, with some slight alterations, due chiefly to the abrogation of the sacrifice, remained in the present ritual, and its initial words, "Mah Nishtannah," are used as the name of the Haggadah, as in the question: "What has Korah [כורך] to do in the Mah Nishtannah?" Another old part of the ritual is the recital of the "Hallel," which, according to the Mishnah (Pes. v. 7), was sung at the sacrifice in the Temple, and of which, according to the school of Shammai, only the first chapter (cxiii.; according to the school of Hillel, only the first two chapters, cxiii.-cxiv.) shall be recited (Pes. x. 6). After the Psalms a benediction for the Redemption is to be said. This benediction, according to R. Tarfon, runs as follows: "Praised art Thou, O Lord, King of the Universe, who hast redeemed us, and hast redeemed our fathers from Egypt." According to R. Akiba, there should be added the prayer: "Mayest Thou, O God, allow us to celebrate the coming holy days, rejoicing in the rebuilding of Thy city and exulting over Thy sacrificial cult; and may we eat of the sacrifices and of the Passover lambs! Praised art Thou, Redeemer of Israel!" Another passage in the

Mishnah ("It is therefore our duty to thank, praise, exalt, and magnify Him who hath done for us and for our fathers all these wonders, who hath led us forth from slavery to freedom, from sorrow to joy, from mourning to feasting, from darkness to full light, from bondage to redemption! We shall say in His presence 'Hallelujah!'") is, like the introductory remark, "Everybody shall consider himself as if he had been personally freed from Egypt," evidently not originally intended as a prayer, although it has been embodied in the Haggadah.

Another part of the oldest ritual, as is recorded in the Mishnah, is the conclusion of the "Hallel" (up to Ps. cxviii.), and the closing benediction of the hymn "Birkat ha-Shir," which latter the Amoraim explain differently (Pes. 116a), but which evidently was similar to the benediction thanking God, "who loves the songs of praise," used in the present ritual. These benedictions, and the narrations of Israel's history in Egypt, based on Deut. xxvi. 5–9 and on Josh. xxiv. 2–4, with some introductory remarks, were added in the time of the early Amoraim, in the third century; for in explanation of Pes. x. 4 ("He shall begin with the disgrace [*i.e.*, with the reciting of the misery] and shall end with praise"), Rab remarks, "He shall begin with the words, 'In the beginning our forefathers served idols'"; while Samuel says, "We were slaves of Pharaoh in Egypt"—both of which are found in the present ritual. In post-Talmudic times, during the era of the Geonim, selections from midrashim were added; most likely Rab Amram (*c.* 850) was the originator of the present collection, as he was the redactor of the daily liturgy. Of these midrashim one of the most important is that of the four sons, representing four different attitudes toward religion: the wise (or studious), the wicked (or skeptical), the simple (or indifferent), and the ignorant (who is too unintelligent to ask for enlightenment). This division is taken from the Jerusalem Talmud (Pes. 34b) and from a parallel passage in Mekilta (13–14 [ed. Weiss, p. 28b]); it is slightly altered in the present ritual, chiefly owing to a mistake in the quotation of Deut. vi. 20 (Landshuth, *l.c.* p. viii.). These four sons were an attractive subject for illustrators and engravers, and the types found in an Amsterdam Haggadah of the seventeenth century are still largely reproduced. Other haggadic sayings are freely repeated, as the story of R. Eliezer, who discussed the Exodus all night with four other rabbis, which tale is found in an altogether different form in the Tosefta (ed. Zuckermandel, p. 173; see Zunz, "G. V." p. 126). The custom of reading selections from the Talmudic Haggadah antedates Rab Amram, for his predecessor, Rab Naṭronai, speaking of those who omit these selections (possibly the Karaites), says that they have failed to fulfil their duty, that they are heretics who despise the words of the sages, and that they shall be excommunicated from every Jewish congregation (Weiss, "Dor," iv. 115 [ed. Friedmann, p. 10]).

The Haggadah as a Book.

The costliness of manuscripts may have suggested at an early time the writing of the ritual for Passover eve in a separate book. This could hardly have been done, however, before the time of Maimonides (1135–1204), who included the Haggadah in his code ("Yad," after "Ḥameẓ"). The opinion of Friedmann (p. 9), that special books containing the Passover service existed in Talmudic times, is based on a judgment of Raba in favor of a man who claimed a Haggadah ("Sifra de-Agadta") from an estate under the plea that he had lent it to the deceased (Shebu. 46b). This interpretation, however, is not probable, for, according to Rashi, who is upheld by the context, the passage speaks of homiletic works. Existing manuscripts do not go back beyond the thirteenth century, the time, probably, when the service for Passover eve was first written separately, since no mention of the fact occurs in earlier writings. When such a volume was compiled, it became customary to add poetical pieces. This is mentioned in "Tanya," which is an abstract of Zedekiah ben Abraham Anaw's "Shibbole ha-Leḳeṭ," written about 1250 (Landshuth, *l.c.* p. xviii.). These piyyuṭim were not written for this service, but were selected from other collections. The most popular among them is ADDIR HU; another one, beginning כי לו נאה, is fragmentary (Landshuth, *l.c.*). At the end of the service are two nursery-songs, EḤAD MI YODEA' and ḤAD GADYA.

The Haggadah has been very often printed. Adolf Oster of Xanten endeavored to collect all available editions, and in 1890 had acquired 230 (Rahmer's "Jüd. Lit.-Blatt," xvi. 54, xvii. 62, xix. 56); but S. Wiener was able to count 895. The oldest edition extant was printed in Italy, probably in Fano, about 1505; but at least one edition must have preceded it, probably that bound up with the copy of the "Tefillat Yaḥid," Soncino, 1486, and which is now in the possession of M. Sulzberger. From early days it has been customary to translate the Haggadah into the vernacular for the benefit of children. Aaron ha-Kohen of Lunel (14th cent.) mentions it as a laudable custom, and says that it was done in England (Moses Isserles, in his commentary on Ṭur Oraḥ Ḥayyim, 473). A Latin translation was printed in Frankfort-on-the-Main, 1512 (Wiener, "Bibliographie der Oster-Haggadah," No. 4), but this was not for the use of Jews. An edition of Salonica, 1567, contains only the laws in Ladino, but Venice editions of 1609 contain translations of the whole Haggadah into Ladino, Italian, and Judæo-German. From the sixteenth century on the Haggadah was very frequently commentated, mostly from the homiletical point of view. The Wilna edition of 1892 contains 115 commentaries. Typical in this respect is the haggadic commentary of Aaron Teomim, in the edition of Amsterdam (1694–95), entitled "Ḥilluḳa de-Rabbanan." In modern times free translations and modifications have been made, chiefly with the object of eliminating the fanciful Talmudic haggadot. Such are the translations of Leopold Stein (Frankfort-on-the-Main, 1841), H. M. Bien ("Easter Eve," Cincinnati, 1886), I. S. Moses (in the first ed. of the "Union Prayer-Book," pp. 227–257, Chicago, 1892), and Maybaum (Berlin, 1893).

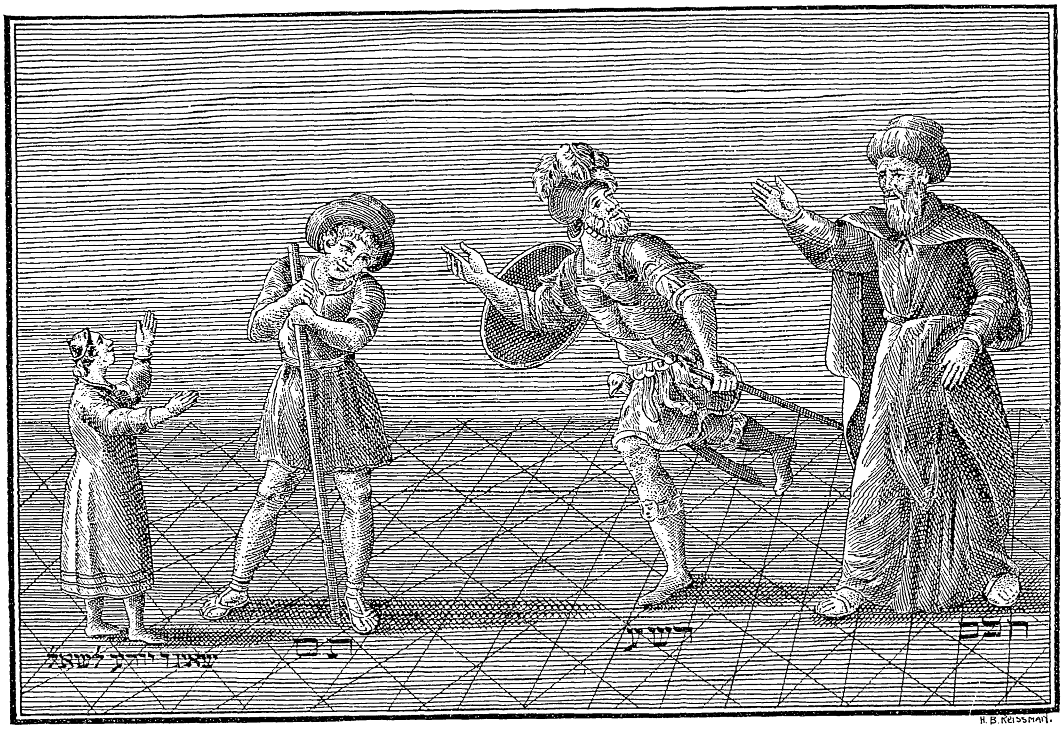
D.

Illumination and Illustration.

The Haggadah, being the chief ritual work for home use in which none of the questions in regard to using human figures for decorative purposes could arise, afforded manifold opportunities for illustration. Accordingly some of the very earliest manuscript copies contained illuminations and miniatures. Of such illustrated manuscripts executed before the spread of printing about twenty-five are known, of which twenty are described in the elaborate work of Müller and Von Schlosser (see bibliography). These are of great variety, in both subject and treatment. Generally speaking, the topics illustrated are either (*a*) historic, centering upon the Exodus; (*b*) Biblical, reproducing Biblical scenes without definite reference to the Exodus; or (*c*) domestic, relating to the actual scenes of the Seder service. The later of two Haggadahs in the Germanic Museum at Nuremberg is especially noteworthy for illustrations of the last type. The German Haggadah possessed by D. Kaufmann, which he dated about 1322, appears to confine its illustrations to the Exodus and an elaborate zodiac. The fifteenth-century Haggadah in the Bibliothèque Nationale has initials, and domestic and historic scenes; while an elaborate manuscript in the possession of Baron Edmond de Rothschild has highly original domestic and Biblical scenes executed in quattrocento style.

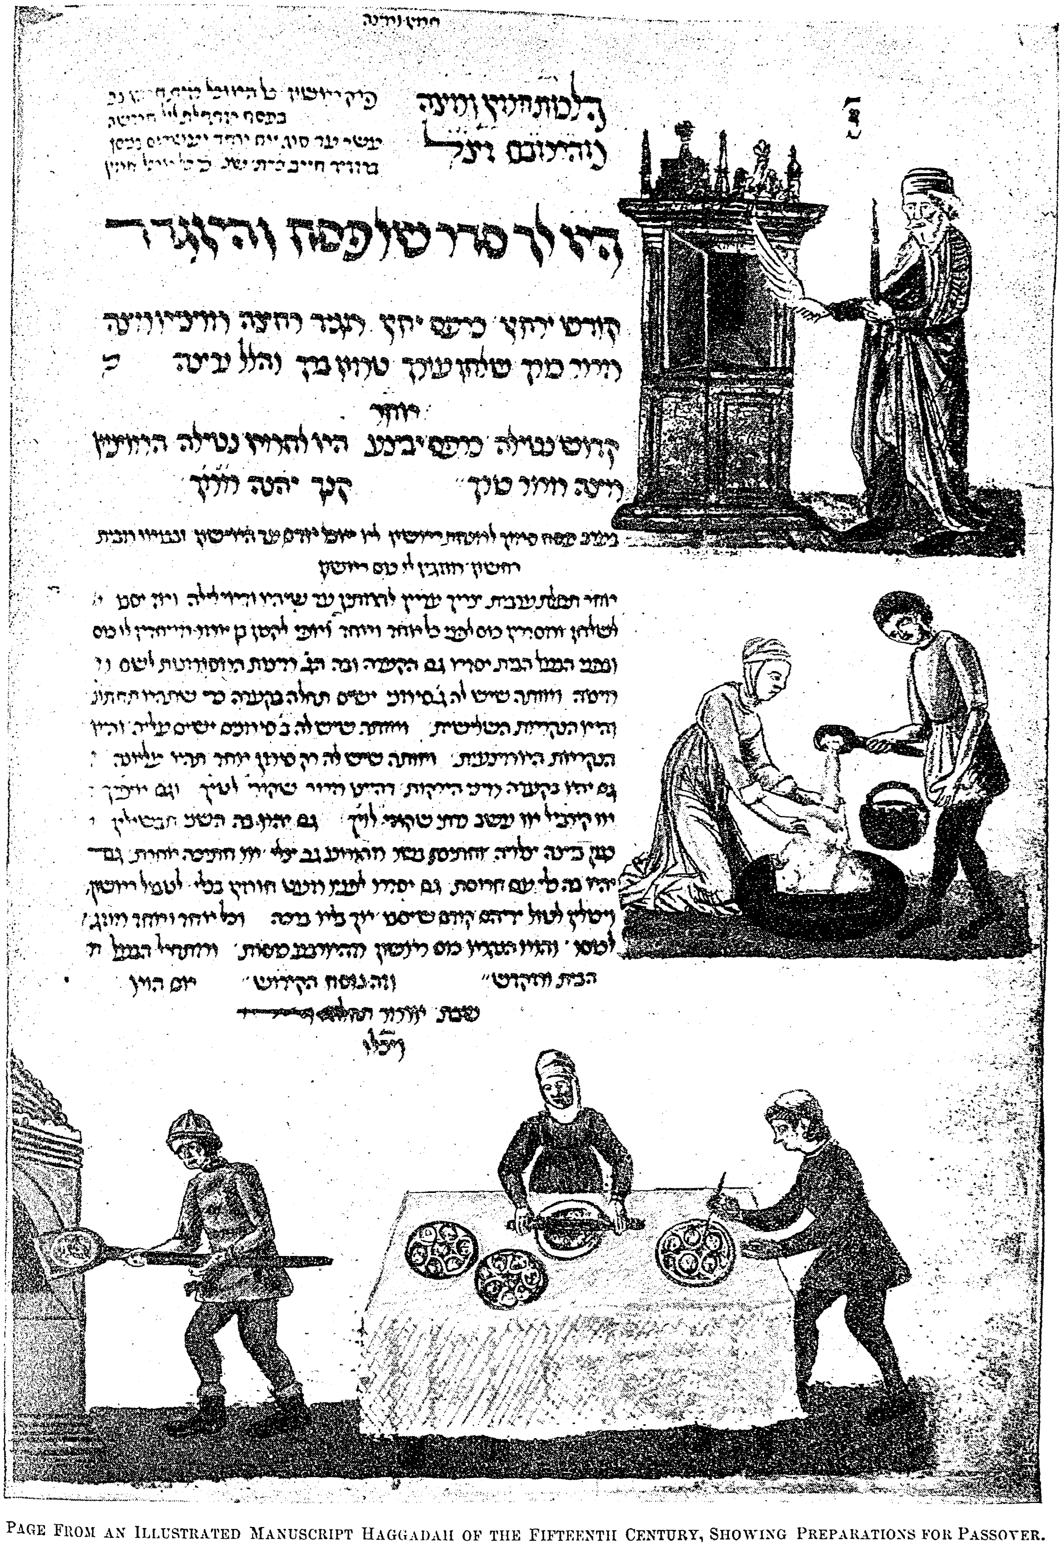


THE FOUR TYPES OF THE HAGGADAH.
(From a Passover Haggadah, Vienna, 1823; in the possession of J. D. Eisenstein.)

Illustrated Printed Editions.

With the introduction of printing, this variety in illustration for the most part ceased. The numerous illustrated editions show a distinct tendency toward monotony, and confine themselves almost entirely to what has above been termed the domestic and the historic sides of the old illuminations. Most of the scenes are now grouped, and the domestic incidents showing the various details of the Seder service are given very often in one engraving. Similarly, the Ten Plagues which were scattered through the manuscripts are now put upon one plate. Most of the manuscripts give the four types of inquirers separately (comp. Müller and Von Schlosser, *l.c.* pp. 175, 195), but in the printed editions these are combined into one engraving, the wicked son invariably being a soldier; whereas in the manuscripts this latter type does not occur until quite late, as, for example, in the Crawford and Balcarres German manuscript of the sixteenth century.

The first illustrated edition appears to be that of Prague, 1526, and was followed by that of Augsburg, in 1534. These set the type of illustrations for the whole of northern Europe, especially for Prague and Amsterdam editions. Of the Italian type, the first illustrated edition appears to be that of Mantua, of 1550, followed by that of 1560, the



PAGE FROM AN ILLUSTRATED MANUSCRIPT HAGGADAH OF THE FIFTEENTH CENTURY, SHOWING PREPARATIONS FOR PASSOVER.

(In the possession of Baron Rothschild, Paris.)

latter having illustrations surrounding each page. The editions of Venice, 1599 and 1629, also contain a considerable number of figures, and from these were derived the Haggadot used in southern Europe. Both northern and southern types almost always confine themselves to the following scenes: Rabbi Gamaliel; the preparation of the mazzot; scenes of the Seder service; the Exodus, with the Ten Plagues.

HAGGADISTS. See Midrash Aggadah.

HAGGAI: Judean prophet of the early post-exilic period; contemporary with Zechariah (Ezra v. 1; III Ezra [I Esd.] vi. 1, vii. 3).

חגי = "Aggeus" in I Esd.; "Aggæus," Ἀγγαῖος = "festal" (born on feast-day) or "feast of Yah" (Olshausen, "Grammatik," § 277b); Wellhausen, in Bleek, "Einleitung," 4th ed., p. 434, takes "Haggai" to be equivalent to "Ḥagariah" (= "God girdeth"). The name is found on Semitic inscriptions—Phenician, Palmyrene, Aramaic, Hebrew; comp. "C. I. S." lxviii. 1 and Lidzbarski, "Handbuch der Nordsemitischen Epigraphik," p. 270, Weimar, 1898; it occurs as "Ḥagga" on a tablet from Nippur (Hilprecht, in "Pal. Explor. Fund Quarterly," Jan., 1898, p. 55).

Very little is known of Haggai's life. Ewald ("Propheten des Alten Bundes," p. 178, Göttingen, 1868) concludes from Hag. ii. 3 that he had seen the first Temple, in which case he would have been a very old man at the time of Darius Hystaspes, in the second year of whose reign (520 B.C.) Haggai appears as a prophetic preacher to stir the people to the work of rebuilding the Temple (Hag. i. 1 *et seq.*).

It is not certain that Haggai was ever in Babylonia. He may have lived continuously at Jerusalem (comp. Lam. ii. 9). At all events, to judge by the extent of his book, his public ministry was brief. That Zechariah was the leading prophet of those times (Zech. vii. 1–4) lends plausibility to the assumption that Haggai was nearing death when he made his appeal to the people. According to tradition he was born in Chaldea during the Captivity, and was among those that returned under Zerubbabel. It has even been claimed that he was an angel of Yhwh, sent temporarily to earth to move the indifferent congregation (see Hag. i. 13). He was remembered as a singer of psalms, and as the first to use the term "Hallelujah." In fact, his name is mentioned in the Septuagint superscriptions to Psalms cxii., cxlv.-cxlix., though not in all manuscripts alike (Köhler, "Die Weissagungen Haggais," p. 32; Wright, "Zechariah and His Prophecies," xix. *et seq.*; B. Jacob, in Stade's "Zeitschrift," xvi. 290; Cheyne and Black, "Encyc. Bibl." ii. 1935, note 2, in reference to Epiphanius, "Vitæ Prophetarum"). By Jewish historiography Haggai is numbered among the "men of the Great Synagogue" (B. B. 15a), or among those that "transmitted revelation" (see Cabala) from their prophetic predecessors to the "men of the Great Synagogue" (Ab. R. N. i. [recension A, p. 2, ed. Schechter]; comp. Yoma 9b). In his days prophetic inspiration was growing less frequent (*ib.*).

Haggai is credited with having instituted certain practical decisions ("taḳḳanot"). Among these were a provision for the intercalation of the month of Adar (R. H. 19b); a decision in favor of enlarging the altar; a decision permitting the bringing of sacrifices independently of the existence or presence of the Temple (Mid. iii. 1; Zeb. 62; Yer. Naz. ii. 7). The organization of the priestly service into twenty-four relays (Tosef., Ta'an. ii.; 'Ar. 12b), and the regulation of the wood-contributions (Tosef., Ta'an. iii.; Ta'an. 28; comp. Neh. x. 35), are traced to him. Other references to Haggai's legislative influence are given in R. H. 9; Yeb. 16a; Ḳid. 43a; Ḥul. 137b; Bek. 57; Naz. 53a. The "seat" (מדוכה) on which he sat as legislator is mentioned (Yeb. 16a).

E. G. H.

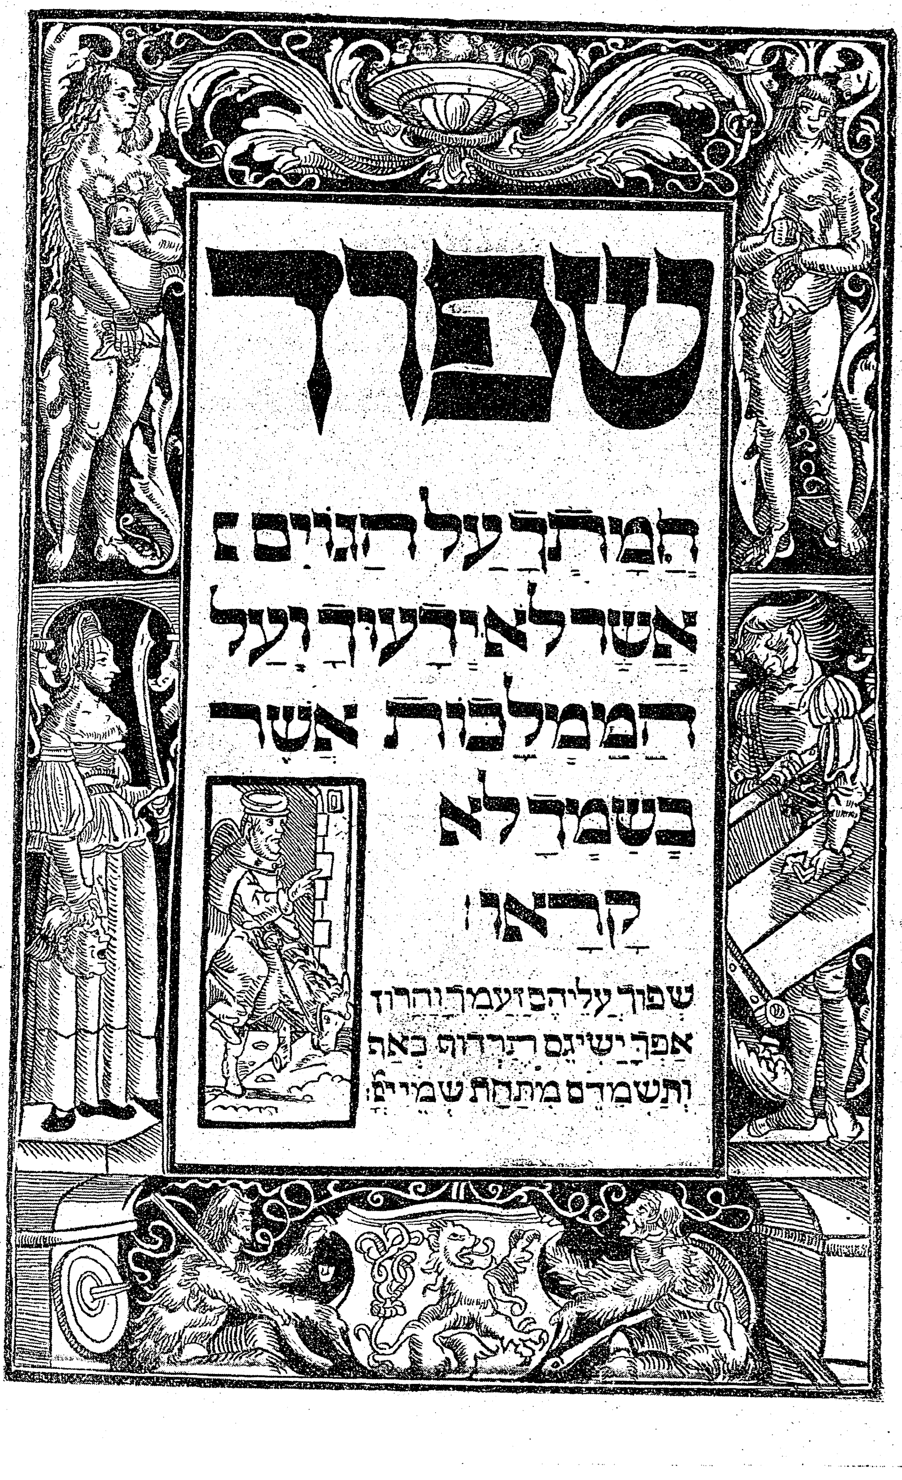
HAGGAI, BOOK OF: One of the so-called minor prophetical books of the Old Testament. It contains four addresses. The first (i. 2–11), dated the first day of the sixth month of the second year of Darius Hystaspes (520 B.C.), described as directed against, or to, Zerubbabel the governor and Joshua the high priest (i. 1), is designed to arouse the people from their indifference to the rebuilding of the Temple, an indifference in glaring contrast to the care taken to secure comfortable and well-appointed private dwellings (i. 4); drought and dearth are announced as a penalty (i. 5–6, 10–11). Their failure to rebuild the Temple is the cause of their disappointment (i. 9). This brief discourse has the desired effect (i. 12). Haggai announces that Yhwh is with them. In the twenty-fourth day of the sixth month (520) work on the Temple begins.

The Four Discourses.

The second address is dated the twenty-first day of the seventh month, and strikes the note of encouragement. It seems that many had again become despondent; the prophet assures these that God's spirit, in accordance with the covenant made at the time of the exodus from Egypt, is with them. Yet a little while, and Yhwh's power will become manifest. All the nations will bring tribute to make this house glorious. What the nations now call their own is in fact Yhwh's. Thus the glory of the later house will be greater than that of the earlier, which so many despair of equaling. Peace will reign in the Second Temple (ii. 1–9).

The third discourse is dated the twenty-fourth day of the ninth month of Darius. It is prefaced by questions addressed to the priests concerning certain applications of the law of Levitical purity. The answers of the priests to his questions furnish the text for his exposition of the people's sin in not erecting the Temple. These shortcomings are the reason for the dearth. Their removal, therefore, will bring Yhwh's blessing (ii. 10–19).

On the same day (the twenty-fourth of the ninth month) Haggai addresses another (the fourth) discourse to Zerubbabel, announcing Yhwh's determination to bring to pass great political upheavals, resulting in the dethroning of kings and the defeating of their armies. In consequence of these wonderful reversals of the prevailing political conditions,



שפוך

חמתך על הגוים
אשר לא ידעוך ועל
הממלכות אשר
בשמך לא
קראו

שפוך עליהם זעמך וחרון
אפך ישיגם תרדוף באף
ותשמידם מתחת שמי יי׃

Page from the First Illustrated Printed Haggadah, Prague, 1526.

Zerubbabel will become the "signet" as the one chosen of Yhwh; that is, Zerubbabel will be crowned as the independent (Messianic) king of independent Judea (ii. 20-23).

Haggai's Style.

Contrasted with the flow and fervor of the utterances of other prophets, Haggai's style certainly justifies the rabbinical observation that he marks the period of decline in prophecy (Yoma 9b). He scarcely ever rises above the level of good prose. The critics have found in this a confirmation of the assumption that Haggai wrote and spoke only after having reached a very ripe old age. Certain turns of phraseology are characteristically affected by him: שימו נא לבבכם (i. 5, 7; ii. 15, 18a, b); ועתה = "and now," introducing an appeal (i. 5; ii. 4, 15). Repetitions of words are frequent: אמר ה׳ (i. 7, 8); נאם ה׳ [צבאות] (ii. 4a, b, c, 6, 7, 8a, b, 14, 17, 23a, b, c); והפכתי (ii. 22, twice); חזק (ii. 4, thrice). Haggai loves to recall in one final word the preceding idea: i. 2b, 12b; ii. 5b (אל תיראו), 19b (מן היום הזה אברך).

"Variæ Lectiones."

The text is in good condition, and the versions do not exhibit important variants. The Septuagint has additions in ii. 10-15, and several omissions, one (ii. 5) very extensive. "Be-mal'akut" (i. 13) is represented by ἐν ἀγγέλοις = "be-mal'ake." The Peshiṭta presents the reading "ḥereb" (sword) for "ḥoreb" (drought) in i. 11, and the "hif'il" instead of the "ḳal" in "u-ba'u" (ii. 7; comp. L. Reinke, "Der Prophet Haggai," pp. 23 *et seq.*, Münster, 1868, on the text of Haggai). Of emendations proposed by modern scholars, the following may be noted: In ch. i. 2 the first עת should be read עתה ("now"), or, still better, corrected into עוד ("as yet"); the versions omit i. 10. עליכם is probably a dittogram of the preceding על כן. For אלהיהם ("their God") in i. 12, the Septuagint, the Peshiṭta, and the Vulgate present אליהם ("unto them"), which is preferable. Ch. i. 13 is held to be suspicious as a later gloss (Böhme, in Stade's "Zeitschrift," vii. 215; Nowack, "Die Kleinen Propheten," in "Handkommentar zum Alten Testament," p. 305, Göttingen, 1897). Ch. ii. 5a is grammatically of difficult construction; the Revised Version inserts "remember"; the Septuagint omits it. It is in all likelihood an interpolation (see Nowack, *l.c.* p. 306). אחת (ii. 6) is doubtful; the Septuagint reads מרעיש instead of מעט. Wellhausen's observation ("Die Kleinen Propheten," *ad loc.*), that the verse combines two originally distinct readings, one as the Septuagint has it and the other that of the Masoretic text, with אחת omitted, is probably based on fact. In verse 8 חמדת has been taken to refer to the Messiah (comp. the name "Mohammed"); but the allusion is distinctly to the "precious possessions" of the nations; perhaps it should be vocalized "ḥamudot." For ii. 9 the Septuagint has a much more complete text, probably originally included (see Wellhausen, *l.c.*, *ad loc.*). The Septuagint addition to ii. 14 is partly taken from Amos v. 10, and the whole looks like a gloss. In ii. 16 something seems to have dropped out of the text (see Nowack, *l.c.* p. 309). ואין אתכם אלי (ii. 17) is clearly corrupt; ואין אתם שבים אלי is the better reading proposed (Nowack, *l.c.*). In ii. 18, from מיום to היכל ה׳ must be considered as an explanatory gloss by a later reader. At the end of verse 22 some verb seems to be required. Wellhausen supplies "shall fall." Instead of וירדו, in reference to the horses' undoing, Grätz ("Emendationes," *ad loc.*) proposes חרדו ("tremble").

The authenticity of ii. 20-23 has been impugned by Böhme (Stade's "Zeitschrift," vii. 215 *et seq.*) on the ground that (*a*) differences of expression indicate a different authorship, and that (*b*) their contents merely repeat Haggai's former assurances; yet this conclusion is not warranted. The concluding discourse is marked in the text as addressed to Zerubbabel alone. This accounts for the repetitions, if there be any; the differences in style are not so striking as to be incompatible with Haggai's authorship.

The Historical Background.

It is clear that in 520 B.C., according to Haggai's explicit statement, the reerection of the Temple had not begun. This is contrary to the common opinion that the work of rebuilding the Temple had been undertaken immediately after the return under Cyrus. Ezra iii. (and iv. 1-5) names the second year after the return as the date when the machinations of the Samaritans brought the enterprise to a standstill. For this reason Haggai has been held to plead merely for the "resumption," not for the "undertaking," of the (interrupted) building operations. Still, neither in Haggai nor in Zechariah is there any indication to justify this modification. Haggai is silent concerning the previous laying of a corner-stone. Far from laying the blame to foreign interference, he is emphatic in denouncing, as the sole cause of the deplorable state of affairs, the indifference and despondency of the Jews. In ii. 18 the laying of the corner-stone is described, either by himself or by a glossarist (see above), as taking place in his own time (Winckler, in Schrader, "K. A. T." 3d ed., p. 293, does not take this view, urging against it Haggai ii. 3, "how do ye see it now"). Probably on the return of the exiles only an altar was set up. Ezra iii. and iv., written much later, ascribe the later occurrences to an earlier date. W. H. Koster ("Het Herstel," 1894, German ed. 1895) argues, partly on these grounds, that no exiles returned under Cyrus, and that the Temple was built by Jews who had been left at Jerusalem (see against him Wellhausen, "Die Rückkehr der Juden," 1895, and Eduard Meyer, "Die Entstehung des Judentums," 1896). This extreme view is inadmissible. But Haggai makes it evident that the Temple was erected only in his time (during Darius Hystaspes' reign, not that of Cyrus), and that its erection was largely due to his and Zechariah's efforts.

Rebuilding of the Temple.

Haggai's description reveals the difficulties with which the small community had to contend; drought and dearth (i. 9 *et seq.*, ii. 15) were among them; and the population must have been small. Under these disheartening circumstances, what encouraged the prophet to urge his people to the enterprise? The conditions of the Persian empire furnish a clue to the answer (comp. Isa.

ix.); in the impending disruption of the Persian power he sees Yhwh's purpose to reestablish Judea's independence under the (Messianic) king Zerubbabel.

In the large Behistun inscription, Darius has left the record of these disturbances, caused by the assassination of pseudo-Smerdis in 521. While Darius was busy fighting the Babylonian usurper Nidintubal, Persia, Susiana, Media, Assyria, Armenia, and other provinces, under various leaders, rose in rebellion against him. These campaigns kept Darius engaged during 520–519, the period of Haggai's first appeals (see Ed. Meyer, "Die Entstehung des Judentums"). Nevertheless, Nowack contends that the predictions in Haggai concerning the great upheavals which, while troubling and overturning all other nations, will result in establishing permanent peace in Jerusalem (ii. 9), are of the nature of eschatological apocalyptic speculations. Haggai, according to him, was the first to formulate the notion of an ultimate opposition between God's rule and that of the heathen nations. The rôle clearly assigned to Zerubbabel in the prediction of Haggai does not seem to be compatible with this assumption. He is too definite and too real a historical personage in the horizon of Haggai to admit of this construction. The "ideal" Messiah is always central in apocalyptic visions.

E. G. H.

HAGGERI: Father of Mibhar, one of David's chosen warriors (I Chron. xi. 38 [R. V. "Hagri"]). In the parallel list, II Sam. xxiii., the words "ben Hagri" (the son of Hagri) are changed to "Bani ha-Gadi" (Bani, the Gadite).

E. G. H. M. Sel.

HAGGI: Second son of Gad and progenitor of the Haggites (Gen. xlvi. 16; Num. xxvi. 15). The name is the same for individual and for family.

E. G. H. M. Sel.

HAGGIAH (חגיה) ("festival of Jehovah"): Levite of the family of Merari; son of Shimea and father of Asaiah (I Chron. vi. 15 [A. V. 30]). In the Septuagint the name is given *'Αγγία* and *'Αμα* and *'Αναια*.

E. C. B. P.

HAGGITES (החגי): Tribal name of the descendants of Haggi, second son of Gad (Num. xxvi. 15); given "Agitæ" in the Vulgate, and *'Αγγει* in the Septuagint.

E. C. B. P.

HAGGITH: One of David's wives; known also as the mother of Adonijah (II Sam. iii. 4; I Kings i. 5, 11; ii. 13; I Chron. iii. 2), but apparently married to David after his accession to the throne. Adonijah is commonly designated as "the son of Haggith" (I Kings i. 5, 11; ii. 13) who was born at Hebron. In II Samuel Haggith and her son Adonijah are fourth in the list of David's wives and sons respectively.

E. G. H. B. P.

HAGIA (Greek, *'Αγία*; Vulgate, "Aggia"): Servant of Solomon (I Esd. v. 34), whose children returned from the Captivity with Zerubbabel. Ezra ii. 57 and Neh. vii. 59 give "the children of Hattil," though this is probably an error. The Septuagint rendering in Neh. vii. 59, Εγγηλ, points more to "Hagia" than to "Hattil."

E. C. B. P.

HAGIN DEULACRES (Ḥayyim Gedaliah, or Dieulacresse): Last presbyter or chief rabbi of England; appointed May 15, 1281. He appears to have been raised to this position by the favor of Queen Eleanor, mother of King Edward I. Hagin was probably a nephew of Elyas, the "Great Presbyter," and was not, it seems, living at the time of the Expulsion, as his name is not mentioned among those who were expelled in 1290, though the house of his son Benedict fell into the king's hands (Jacobs, "Jewish Ideals," p. 185). Neubauer attributes to Hagin the translation of some of Abraham ibn Ezra's astrological works for Henry Bate at Malines ("Rabbins Français," p. 507), but on very insufficient grounds, and on still slighter evidence the translation of the "Image du Monde," credited by others to Mattithiah ben Solomon Delacrut. It has been suggested that Hagin Lane in London was named after this Hagin, who probably lived opposite it, but recent evidence seems to show that its original name was "Hoggen," the Middle English plural of "hog."

Bibliography: Tovey, *Anglia Judaica*, p. 59; *Miscellany of the Soc. Hebr. Lit.* ii. 159; Jacobs, *Jewish Ideals*, pp. 185–188; Grätz, *Gesch.* 3d ed., vii. 180.

J.

HAGIN FIL. MOSSY: Presbyter or chief rabbi of the Jews of England. He appears to have been the chirographer of the Jews of London, and obtained great wealth, but he lost it under Edward I. In 1255 he was appointed presbyter on the expulsion of Elyas from that office. It seems probable that he was a brother of Elyas (Tovey, "Anglia Judaica," p. 58). During the riots preceding the battle of Lewes in 1264 he fled to the Continent. His wife, Antera, and his son, Aaron, seem to have held possession of the only remaining synagogue in London at the Expulsion in 1290.

Bibliography: *Papers of the Anglo-Jewish Historical Exhibition*, pp. 28, 178, 179, 193, 194.

J.

HAGIOGRAPHA (כתובים = "writings"): The third part of the Old Testament canon, the other two being the Law (תורה) and the Prophets (נביאים). It includes the three books א"מ"ת (Hebrew initials of איוב, משלי, תהלים), which in a special sense are designated as the poetic books par excellence, Job, Proverbs, and Psalms; the five Megillot (= "rolls"), which are read on five different festivals, and which include Canticles, Ruth, Lamentations, Ecclesiastes, and Esther; the books of Daniel, Ezra-Nehemiah (considered as two parts of one book), and Chronicles—eleven books in all.

Talmudic Sequence.

The order of the Hagiographa in the Talmud is as follows: Ruth, Psalms, Job, Proverbs, Canticles, Lamentations, Ecclesiastes, Daniel, Esther, Ezra, Chronicles (but see "Halakot Gedolot," ed. Hildesheimer, p. 633). The first place was given to the Book of Ruth on the ground, probably, not only that it contained an episode in the history of the house of David, but also that the genealogy at the end of the book, reaching down to David, was a suitable introduction to Psalms, ascribed to David. The Book of Job followed the Psalms because, on the one hand, the three great hagiographs should be grouped together, and, on the other, Proverbs should not be separated from Canticles, both being ascribed to Solomon. Ecclesiastes was for the same reason placed with the earlier books; and the three later books, Esther, Ezra, and Chronicles, were placed after Daniel because it was assumed that the latter was written earlier (by Daniel himself) at the Perso-Babylonian court. This sequence is found in different manuscripts, with the exception that in some, Proverbs immediately precedes Job, or Canticles precedes Ecclesiastes, and Esther precedes Daniel. The sequence differs among the Masoretes, who, according to Elijah Levita ("Massoret ha-Massoret," p. 120; ed. Ginsburg, p. 67), follow the Sephardic arrangement, which is as follows: Chronicles, Psalms, Job, Proverbs, Ruth, Canticles, Ecclesiastes, Lamentations, Esther, Daniel, Ezra. The German manuscripts give another sequence: Psalms, Proverbs, Job, the five Megillot, Daniel, Ezra, and Chronicles, the five Megillot following the order in which they are now read in the synagogue—Canticles, Ruth, Lamentations, Ecclesiastes, Esther. Many other variations, however, are found in the different manuscripts.

The sequence of the Hagiographa in the Alexandrian canon must also be mentioned, as it not only differs from the Jewish canon in the order of the several books, but also includes a number of works not recognized as canonical in Palestine. Here the Book of Ruth follows Judges; I Ezra and II Ezra (Ezra and Nehemiah) follow the Chronicles; and Esther follows the apocryphal Tobit and Judith, which follow I and II Ezra; of the other books, Job, Psalms, Proverbs, Ecclesiastes, and Canticles, as the specifically poetical books, are placed together; Lamentations is an appendix to Jeremiah (between Baruch and the Letter of Jeremiah); and the Book of Daniel follows, and ranks with, the three greater prophets. Through the Vulgate this sequence was, on the whole, adopted by Luther in his Bible.

Origin of the Collection.

The existence of the Hagiographa collection as a third part of the canon is first stated in the prologue (about 130 B.C.) to Sirach, with which the translator and grandson of the author of Ecclesiasticus prefaced his Greek translation. At the very beginning mention is made "of the many and important things which were transmitted to the Jews through the Law, the Prophets, and the others that followed them." There is no doubt that in this summing up of the Old Testament literature the authors of the Hagiographa are meant by "those that [*κατ' αὐτοὺς* = "as authors"] followed the Prophets." A confirmation of the fact that this Hagiographa collection ranked even then with the older books of the canon is found in a passage in I Maccabees (vii. 17; written probably 100 B.C.), where two verses of a psalm (lxxix. 2–3) are quoted as Holy Scripture; and as all the books of the Hagiographa as now known date back at least to the second half of the second century B.C., it may be inferred that the collection included even then—that is, in the beginning of the first century B.C.—the same books as now, with the exception, perhaps, that single detached portions may have been added later. Again, it is known that the canonicity of certain books of the Hagiographa was disputed—Canticles, Ecclesiastes, and Esther. The canon, including, of course, the Hagiographa, was defined at the Synod of Jabneh about 90, the point at issue being not the admission of new books into the canon, but the exclusion of certain books—Canticles, Ecclesiastes, Esther, Proverbs, Ruth, and even Ezekiel, books that had already been included, but that were deemed by some unworthy of that position. The energetic advocacy of Akiba in behalf of all the books, and the fact that the Mishnah recognized the twenty-four books as of equal canonicity, finally decided the issue.

Another point to be considered is the gradual growth of this collection. Although any conclusions in reference thereto are mainly based on conjecture, it may safely be assumed that the nucleus of the Hagiographa, Psalms, Proverbs, and Job, existed and was held in high esteem at the time when the books of the Prophets were officially read in the synagogue, and that other books were added in the course of time. As in the passage mentioned above (I Macc. vii. 17) an unmistakably Maccabean psalm is quoted, it follows that a Maccabean psalm had previously been admitted into the Psalter, which had then been in existence for a long time and was regarded as canonical. The formula with which the writer of I Maccabees (about 100 B.C.) introduces the passage shows this. To this nucleus the other books were gradually added, none being admitted, however, which an author who lived after the time of Ezra and Nehemiah (with which the period of canonicity ended) wrote under his own name. Thus it happened, for instance, that the highly valuable Book of Sirach was excluded, while Ecclesiastes, because ascribed to Solomon, and the Book of Daniel, because ascribed to the Daniel of the Perso-Babylonian court, were admitted, although the latter at least was certainly written in the period of the Maccabees.

That earlier works, becoming increasingly appreciated, were included at a later date, may be seen in the case of the Chronicles, which were the last admitted, although they form the first part of the great historical work which concludes with the Book of Ezra-Nehemiah. The present sequence of the books of the Hagiographa is by no means identical with the order of their admission, as may be seen in the case of the five smaller books, Canticles, Ruth, Lamentations, Ecclesiastes, and Esther, which were subsequently grouped together for the reason that they were read at the synagogal services on Passover, Pentecost, the anniversary of the destruction of Jerusalem, the Feast of Tabernacles, and Purim; they were written on special scrolls, like the Torah, deriving thence their special name "Ḥamesh Megillot" (Five Rolls).

The Hagiographa was called also חכמה ("Wisdom"), and in later Jewish literature דברי קדש ("Words of Holiness"). It can not now be ascertained when the name "Ketubim" and the Greek designation "Hagiographa" were first given to the collection. They could not have been current at the time when the translator of the Book of Sirach wrote his prologue; otherwise he would not have used such general expressions as "the Law, the Prophets, and the others that followed them," or "the Law, the Prophets, and the other books of the fathers." On the gradual development of the term "Ketubim," however, see Blau, "Zur Einleitung in die Heilige Schrift," p. 22.

E. G. H. V. RY.

ḤAGIZ, JACOB: Palestinian Talmudist; born of a Spanish family at Fez in 1620; died at Constantinople 1674. Ḥagiz's teacher was David Karigal ("Ḳorban Minḥah," No. 105), who afterward became his father-in-law. About 1646 Ḥagiz went to Italy for the purpose of publishing his books, and remained there until after 1656, supporting himself by teaching. Samuel di Pam, rabbi at Leghorn, calls himself a pupil of Ḥagiz. About 1657 Ḥagiz left Leghorn for Jerusalem, where the Vega brothers of Leghorn had founded a bet ha-midrash for him (Grätz, "Gesch." x. 212), and where he became a member of the rabbinical college (Moses ibn Ḥabib, "Geṭ Pashuṭ," p. 129). There a large number of eager young students gathered about him, among whom were Moses ibn Ḥabib, who became his son-in-law, and Joseph Almosnino, later rabbi of Belgrade (Moses Ḥagiz, "Mishnat Ḥakamim," No. 624). Another son-in-law of his was Moses Ḥayyun (Azulai, "Shem ha-Gedolim").

Shabbethai Ẓebi's chief opponent was Jacob Ḥagiz, who put him under the ban (Grätz, *l.c.* x. 475, note 3). About 1673 Ḥagiz went to Constantinople to publish his "Leḥem ha-Panim," but he died before this was accomplished. This book, as well as many others of his, was lost (Moses Ḥagiz, in the introduction to "Halakot Ḳeṭannot"). He also wrote: "Tehillat Ḥokmah," on Talmudic methodology, published together with Simson of Chinon's "Sefer Keritot" (Verona, 1647); "Oraḥ Mishor," on the conduct of rabbis (an appendix to the preceding work; 2d ed., with additions by Moses Ḥagiz, Amsterdam, 1709); "Petil Tekelet," on the "Azharot" of Solomon Gabirol (Venice, 1652; 2d ed., London, 1714); "'Eẓ ha-Ḥayyim," on the Mishnah (Leghorn, 1654-55; 2d ed., Berlin, 1716).

Ḥagiz also translated the "Menorat ha-Ma'or" of Isaac Aboab into Spanish (1656).

D. L. GRÜ.

ḤAGIZ, MOSES: Palestinian rabbi and author; born at Jerusalem in 1671; died at Safed after 1750. His father, Jacob ḤAGIZ, died while Moses was still a child. The latter was therefore educated by his maternal grandfather, Moses GALANTE the younger, who had succeeded his son-in-law. With the death of Moses Galante (1689) support from Leghorn was withdrawn, and Ḥagiz found himself in very straitened circumstances. He went to Safed to collect a claim which his mother had against the congregation, but succeeded only in making bitter enemies, who later persecuted him. Returning to Jerusalem, he was given letters of recommendation, through which he expected to obtain support for a bet ha-midrash which he intended to establish. At Rashid (Rosetta), Abraham Nathan gave him 30,000 thalers to deposit at Leghorn for this purpose. Arriving at Leghorn, he secured from Vega, the protector of his family, a promise of further support; but his Palestinian enemies slandered him and ruined his prospects. He subsequently wandered through Italy, and edited at Venice (1704) the "Halakot Ḳeṭannot" of his father. Somewhat later he went to Amsterdam, where he supported himself by teaching, and occupied himself with the publication of his works. In Amsterdam he made the acquaintance of Ẓebi ASHKENAZI, then rabbi of the Ashkenazic congregation, and assisted him in unmasking the impostor Nehemiah ḤAYYUN. This step, however, made more enemies for him, and, like Ẓebi Ashkenazi, he had to leave the city (1714). Until 1738 he resided at Altona; he then returned to Palestine, settling first at Sidon, and later at Safed, where he died. He married a daughter of Raphael Mordecai Malachi, and was therefore a brother-in-law of Hezekiah da Silva. He had no children.

Moses Ḥagiz was not only a great Talmudic scholar, but also a man of wider secular learning than most of the rabbis of his time. According to Wolf, who knew him personally ("Bibl. Hebr." iii. 908), he understood several languages and was somewhat familiar with modern history (see his "Mishnat Ḥakamim," Nos. 627 and 682); he advocated the study of secular sciences (*ib.* No. 114), and admitted that the Zohar has been interpolated by later scribes (*ib.* No. 108). In regard to his character reports differ; some represent him as filled with sincere religious zeal, others as a contentious wrangler (Grätz, "Gesch." 3d ed., x. 479-482). Jacob Emden describes him as a time-server, and even as religiously insincere, though he respected him as a friend of his father ("Megillat Sefer," pp. 117-122, Warsaw, 1896). Ḥagiz wrote: "Leḳeṭ ha-Ḳemaḥ," novellæ to the Shulḥan 'Aruk (Oraḥ Ḥayyim and Yoreh De'ah, Amsterdam, 1697 and 1707; Eben ha-'Ezer, Hamburg, 1711 and 1715); "Sefat Emet," on the religious significance of Palestine (Amsterdam, 1697 and 1707); "Eleh ha-Miẓwot," on the 613 commandments (Wandsbeck, 1713); "Sheber Posh'im," polemics against Ḥayyun (London, 1714); "Leḳeṭ ha-Ḳemaḥ," commentary on the Mishnah (Wandsbeck, 1726); "Perure Pat ha-Ḳemaḥ," commentary to Daniel (Amsterdam, 1727); "Ẓeror ha-Ḥayyim," ethics (Wandsbeck, 1728); "Mishnat Ḥakamim," ethics (*ib.* 1733); "Shete ha-Leḥem," responsa (*ib.* 1733). Other works of his remained unpublished. He also wrote numerous prefaces to the books of others. His writings are signed המניח, the initial letters of "Moses ibn Jacob Ḥagiz."

HAHIROTH. See PI-HAHIROTH.

HAHN, AUGUST: German theologian and Orientalist; born at Grossosterhausen, Saxony, March 27, 1792; died in Silesia May 13, 1863. He studied theology and Oriental languages at Leipsic, devoting special attention to Syriac. His treatise on Ephraem the Syrian, published in 1819, led to his appointment as professor at Königsberg, where he published "Bardesanes Gnosticus Syrorum Primus Hymnologus" (1819) and, in conjunction with his colleague Sieffert, "Chrestomathia Syriaca sive S. Ephraemi Carmina Selecta" (1825). In 1826 he was called to Leipsic as professor of theology and preacher, and there began a vigorous campaign against the rationalism prevailing in theology and the Church. In 1833 he became professor and a member of the consistory of Breslau, and in 1844 was made general superintendent of the province of Silesia, which post he retained until his death. He was best known by his stereotyped edition of the text of the Old Testament, published by the Tauchnitz firm in Leipsic (1833), and of which hundreds of thousands of copies have been sold.

HAHN, JOSEPH YUSPA NÖRDLINGER (JOSEPH BEN PHINEHAS NÖRDLINGEN): German rabbi; born at Frankfort-on-the-Main in the latter half of the sixteenth century; died there April 3, 1637. He received a good education from his father, the learned rabbi Seligmann. The name "Hahn," as his grandson, Joseph ben Moses Kosman, says in the preface to "Noheg ka-Ẓon Yosef," is derived from the family house called "Zum rothen Hahn." Hahn was the author of "Yosif Omeẓ," which was published at Frankfort-on-the-Main in 1723 by Moses Reiss Darum, son-in-law of Joseph ben Moses Kosman. This interesting work treats of liturgical questions, of the most important moments of religious life, of education, charity, morality, the Christian holidays, and the civil calendar. It is written in a popular style; and short remarks show the author to have been a master of the Halakah. As such he was acknowledged by his contemporaries Isaiah Horowitz, author of "Shene Luḥot ha-Berit," and Joel Särkes, author of "Bayit Ḥadash." He expresses rational views in regard to pedagogics. He recommends adherence to the old rule given in Prov. xxii. 6, "Train up a child according to its way" (A. V. "in the way he should go"), and that the scope, method, and subject of instruction be adapted to the capacity of the child: it should not be compelled to learn what is beyond its comprehension. If not fit for the study of the Talmud, it should receive thorough instruction in the Bible, which is plain and wins the heart for the fear of God. In this work Hahn also tells of the troubles that befell the Frankfort Jews before and during the persecutions caused by Vincent FETTMILCH, of their expulsion in 1614, and of their readmission in 1616. Hahn was a member of one of the forty families to which the privilege of returning was first granted.

In communal affairs Hahn also displayed great activity. He founded a society, Gomel Ḥesed, whose duty it was to render the last honors to the dead, especially to such as had no relatives. The congregation conferred upon him offices of honor; and he officiated as rabbi when the rabbinate was vacant. His name is inscribed in the "memorial book," and his Hebrew epitaph (No. 1590) is found on one of the monuments of the Jewish cemetery of Frankfort.

Another work of Hahn's, containing explanations and glosses to the four codes of the Shulḥan 'Aruk, is still in manuscript.

D. S. MAN.

HAI BEN DAVID: Dayyan, and later gaon in Pumbedita from 890 to 897. He is mentioned in Isaac ibn Ghayyat's "Halakot," in connection with the curious Bagdad custom of reciting the "'Abodah" on the morning of the Day of Atonement, which custom even Hai b. David was unable to abolish. It is probable that he wrote in Hebrew. According to somewhat doubtful Karaitic sources, he wrote an anti-Karaitic book with the purpose of justifying the Rabbinite calendar, the calculation of which is ascribed perhaps by him, if not by Hai ben Sherira, to R. Isaac Nappaḥa (comp. Pinsker, "Liḳḳuṭe Ḳadmoniyyot," pp. 148 *et seq.*).

HAI BEN NAHSHON: Gaon of Sura (889-896) and president of the school of Nehardea. He was, according to a manuscript in the Vatican Library, the author of opinions on many Talmudical tractates. He protested against reciting "Kol Nidre" (Rosh, on Yoma, end; Ṭur Oraḥ Ḥayyim, 619; Kol Bo, § 68). His father, R. Nahshon, and grandfather, R. Zadok, were both geonim.

E. C. M. Sc.

HAI BEN SHERIRA: Gaon of Pumbedita; born in 939; died March 28, 1038. He received his Talmudic education from his father, Sherira, and in early life acted as his assistant in teaching (Schechter, "Saadyana," p. 118). In his forty-fourth year he became associated with his father as "ab bet din," and with him delivered many joint decisions.

Appointment as Gaon.

As a consequence of the calumnies of their antagonists they were imprisoned together, and their property was confiscated, by the calif Al-Ḳadir (997; see Abraham ibn Daud in "M. J. C." i. 67). The imprisonment, however, seems not to have lasted very long. Sherira, then old and sick, appointed his son to the position of gaon (998). Hai's installation was greeted with great enthusiasm by the Jewish population. An old tradition (Abudarham, ed. Venice, p. 70c) says that on the Sabbath after Sherira's death, at the end of the reading of the weekly lesson, the passage (Num. xxvii. 16 *et seq.*) in which Moses asks for an able follower was read in honor of Hai. Thereupon, as hafṭarah, the story of Solomon's accession to the throne was read (I Kings ii. 1–12), the last verse being modified as follows: "And Hai sat on the throne of Sherira his father, and his government was firmly established." Hai remained gaon until his death in 1038 (according to Abraham ibn Daud, *l.c.* p. 66). He was celebrated by the Spanish poet Solomon ibn Gabirol and by Samuel ha-Nagid (see "Ha-Karmel," 1875, p. 614).

His Responsa.

Hai ben Sherira's chief claim to recognition rests on his numerous responsa, in which he gives decisions affecting the social and religious life of the Diaspora. Questions reached him from Germany, France, Spain, Turkey, North Africa, India, and Ethiopia (see Müller, "Mafteaḥ," pp. 197–201 *et seq.*; Harkavy, "Studien und Mittheilungen," iv. 225). His responsa, more than eight hundred in number, deal with the civil law, especially the laws concerning women, with ritual, holidays, etc. Many of them contain explanations of certain halakot, haggadot, and Talmudic matters. In halakic decisions he quotes the Jerusalem Talmud, but without ascribing any authority to it ("Teshubot ha-Ge'onim," ed. Lyck, No. 46). Many of his responsa may have been written in Arabic; only a few of them have been preserved ("Sha'are Ẓedeḳ," Salonica, 1792; Harkavy, "Teshubot ha-Ge'onim," Nos. 83–117, 197, 198, 201, 203, 325, 410, 421; Derenbourg, in "R. E. J." xxii. 202; Steinschneider, "Hebr. Uebers." p. 909; idem, "Die Arabische Literatur der Juden," p. 101; Müller, *l.c.*).

Legal Treatises.

Hai ben Sherira codified various branches of Talmudic law. He wrote in Arabic a treatise on purchases, translated into Hebrew by Isaac Albargeloni with the title "Ha-Meḳaḥ weha-Mimkar" (1078); "Sefer ha-Mashkon," a treatise on mortgage, anonymously translated into Hebrew; "Mishpeṭe ha-Tanna'im," a treatise on conditions, also anonymously translated into Hebrew. These three treatises were published together (Venice, 1604); later editions also contain commentaries by Eleazar ben Aryeh (Vienna, 1800) and by Hananiah Isaac Michael Aryeh (Salonica, 1814). Another anonymous translation of them exists in manuscript under the title "Dine Mamonot." According to Azulai, Hai also wrote in Arabic "Sha'are Shebu'ot," a treatise on oaths. According to another Hebrew source, the original title was "Kitab al-Aiman." This treatise was twice anonymously translated into Hebrew: (1) "Mishpeṭe Shebu'ot" (Venice, 1602; Altona, 1782); (2) "Sefer Meḥubbar be-Ḳoẓer Min ha-Dinim be-Bi'ur Kelalim we-'Iḳḳarim be-Ḥelḳe Ḥiyyub la-Shebu'ah" (Neubauer, "Cat. Bodl. Hebr. MSS." No. 813). The "Sha'are Shebu'ot" were metrically arranged by an anonymous writer, probably of the thirteenth century, under the title "Sha'are Dine Mamonot we-Sha'are Shebu'ot," and by Levi ben Jacob Alkalai. Hai's treatise on boundary litigations, "Meẓranut," is known only through quotations (Rapoport, in "Bikkure ha-'Ittim," x. 93, note 27). "Hilkot Tefillin," "Siddur Tefillah," and "Metibot" are also quoted as his (Rapoport, *l.c.* xi. 91).

Commentaries on the Mishnah.

Hai b. Sherira's philological abilities were directed to the expounding of the Mishnah; of this work only the portion on Seder Ṭohorot is extant; it was published by T. Rosenberg in "Ḳobeẓ Ma'aseh" (Berlin, 1856). This commentary contains especially interesting linguistic notes, Arabic and Aramaic being often adduced for comparison. The author quotes the Mishnah, the two Talmuds, the Tosefta, the Sifra, Targums Onkelos and Jonathan, the Septuagint, the works of Saadia, the "Sifre Refu'ah," and other anonymous sources. He also quotes his own commentary on Zera'im (p. 34) and on Baba Batra (p. 43). These quotations, and many others cited by the 'Aruk, prove that the commentary extended to the whole Mishnah, containing among other explanations historical and archeological notes. Some passages of the commentary are quoted by Alfasi and Hananeel on Yoma, and by Solomon ibn Adret in his "Ḥiddushim" (Weiss, "Dor," iv. 185 *et seq.*), while Abu al-Walid ibn Janaḥ cites Hai's commentary to Sabbath frequently (Bacher, "Leben und Werke des Abulwalid," p. 87). It is uncertain whether Hai wrote commentaries in Arabic on the Bible as a whole or on parts of it. Ibn Ezra, however, in his commentary on Job quotes several of his explanations.

Hai compiled also a dictionary of especially difficult words in the Bible, Targum, and Talmud, the Arabic title of which was "Al-Ḥawi." Abraham ibn Ezra translated this title, in his "Moznayim," into "Ha-Me'assef," while Abu Bukrat's translation, "Ha-Kolel," and Moses Botarel's translation, "Ha-Ḳemiẓah," did not become popular. Fragments of this dictionary were discovered by Harkavy, and published by him in "Miẓpah" (St. Petersburg, 1886), in "Ḥadashim Gam Yeshanim" (No. 7), and in "Mi-Mizraḥ umi-Ma'arab" (1896, iii. 94 *et seq.*); these show that the work was arranged according to an alphabetic-phonetic plan of three consonants in every group; for instance, *s.v.* אהל it quotes the permutations אהל, אלה, הלא, האל, לאה. Judah ibn Balaam is the earliest Jewish author who expressly quotes this dictionary (see his commentary on the Pentateuch, "Kitab al-Tarjiḥ"; Neubauer, "Cat. Bodl. Hebr. MSS." No. 292; Schorr, in "He-Ḥaluẓ," ii. 61). Moses ibn Ezra and some African authors of the twelfth and thirteenth centuries also mention it (Steinschneider, in "Z. D. M. G." lv. 129 *et seq.*).

The "Musar Haskel."

Of Hai's poetical writings few have been preserved, and even of these the genuineness is doubted. The didactic poem "Musar Haskel" is generally regarded as authentic, though Dukes expressed some doubts as to its genuineness, as old Jewish authors like Al-Ḥarizi and Ibn Tibbon do not mention it ("Orient, Lit." xi. 505); and Steinschneider also regarded it as of doubtful authenticity ("Cat. Bodl." p. 2161; "Jewish Lit." p. 366, notes 39, 40). The first edition appeared about 1505 (see Fano); others were published in Constantinople (1531), in Paris (1559), and elsewhere (Steinschneider, "Cat. Bodl." p. 1021). The modern editions are as follows: Dukes, "Ehrensäulen," p. 96; Grätz, "Blumenlese," p. 27; Steinschneider, "Musar Haskel," Berlin, 1860; Weiss, "Liḳḳuṭe Ḳadmonim," Warsaw, 1893; Philipp, "Sämmtliche Gedichte des R. Hai Gaon," Lemberg, 1881; a Latin translation by Jean Mercier, "Cantica Eruditionis Intellectus Auctore per Celebri R. Hai," Paris, 1561; another by Caspar Seidel, "Carmen Morale *Στροφορυϑμον* Elegantissimum R. Chai," etc., Leipsic, 1638. The "Musar Haskel" consists of 189 double verses in the Arabic meter "rajaz," and it is said to have therefore received the title of "Arjuzah." If it really belongs to Hai, he was, as far as is known, the first Eastern writer to use an Arabic meter in Hebrew poetry. Every strophe is complete in itself, and independent of the preceding strophe.

Some piyyuṭim are ascribed to him, as the piyyuṭ beginning with the words "Shema' ḳoli," preserved in the Sephardic liturgy for the evening of the Day of Atonement (Landshuth, "'Ammude ha-'Abodah," p. 62).

Many spurious writings have been ascribed to Hai, especially by later cabalists. Among them are a "Sefer Ḳol ha-Shem ba-Koaḥ" (Moses Botarel, commentary on the "Sefer Yeẓirah," p. 10a, Grodno); "Pitron Ḥalomot," Ferrara, 1552; "Sefer Refafot," *ib.*; "Perush me-'Alenu"; "Teshubah," on the thirteen rules of R. Ishmael and on the Ten Sefirot; "A Letter to the Priests of Africa" (Steinschneider, "Cat. Bodl." p. 1029; *idem*, "Hebr. Uebers." p. 893; Harkavy, "Studien und Mittheilungen," iii. 14). Some of the responsa attributed to him are mere forgeries. Others again were falsified or mutilated by later additions and interpolations, as, for instance, the one containing attacks upon Aristotle and his philosophy ("Monatsschrift," xi. 37; Grätz, "Gesch." vi., note 2; Geiger, in "Wiss. Zeit. Jüd. Theol." i. 206).

Characteristics.

Hai was not only a master of Hebrew lore, but was also familiar with the Koran and the Ḥadith, with Plato, Aristotle, Alfarabi, the grammarian Al-Ḥalil, the Septuagint, the Greek calendar (Harkavy, *l.c.* No. 45), Greek history (*ib.* No. 376), and the Persian translation of "Kalilah wa-Dimnah." He did not hesitate to consult even the Catholicos in an exegetical difficulty (Ps. cxli. 5), as the Sicilian dayyan Maẓliaḥ ibn al-Basak relates in his biography of Hai ("Sirat R. Hai"; see Steinschneider, "Die Arabische Literatur," § 85); he justified his action by saying that scholars in former times did not hesitate to receive explanations from those of other beliefs. He had an exact knowledge of the theological movements of his time, of which that of the orthodox Ash'ariyyah attracted him the most. Moses ibn Ezra, in his "Poetik" (fol. 119b), even called him a Motekallam. He was also competent to argue with Mohammedan theologians, and sometimes adopted their polemical methods (see Harkavy, *l.c.* iii. 173). Hai was orthodox as regards tradition, and upheld custom to its fullest extent. He established the principle that where the Talmud gives no decision traditional customs must be adhered to ("Eshkol," i. 1). He even went so far as to recommend the observance of every custom not in direct opposition to law ("Eshkol," ii. 3). In many passages of his responsa he warns against deviating from a custom even when the meaning of its origin has been lost, as in the case of the practise of not drinking water during the Teḳufot ("Teshubot ha-Ge'onim," ed. Lyck, No. 14). But this did not prevent him from opposing the abuses common to his time. Thus he protested against the practise of declaring null and void all oaths and promises which may be made during the coming year (*ib.* No. 38), and against the refusal to grant an honorable burial to excommunicated persons and their connections (*ib.* No. 41).

Hai's conservative standpoint explains the fact that in the study of esoteric sciences he detected a danger to the religious life and a deterrent to the study of the Law. He warned against the study of philosophy, even when pursued with the plea that it leads to a better knowledge of God.

Of his own views on religious-philosophical subjects only those regarding the anthropomorphisms of the Bible (expressed in his appeal to a well-known dictum of R. Ishmael: "The Torah spoke in language of men") and one or two other subjects (see Schreiner in "Monatsschrift," xxxv. 314 *et seq.*) were known prior to the publication of Ibn Balaam's commentary on Isaiah ("R. E. J." xxii. 202) A responsum of Hai given in this commentary discloses his opinion on the subjects of divine foreknowledge and the predestined length of human life. The essence of divine prescience seems to consist, according to him, in a preknowledge of both hypothetical and actual occurrences. In this he shows the influence of Saadia (Kaufmann in "Z. D. M. G." xlix. 73).

His attitude toward the Cabala is determined by his conservative standpoint. Its elements, as far as they can be traced back to the Talmud, he considered to be true. When the inhabitants of Fez made inquiries regarding the proportions of God ("Shi'ur Ḳomah"), he answered, as one of the signers of the responsum, that God is above any corporeal qualification and that the Talmud forbids the public discussion of these things ("Ṭa'am Zeḳenim," Nos. 54–57). His answer to the question regarding the interpretation of the Talmudic tradition that four men entered paradise is interesting, and has caused much discussion ("Teshubot ha-

Ge'onim," ed. Lyck, No. 99). He refers to the opinion of various scholars that specially favored persons could attain, by means of castigation and the reciting of psalms, to an ecstatic state in which they might behold the heavenly halls ("hekalot") as vividly as if they really had entered them. Contrary to his father-in-law, Samuel ibn Ḥofni, gaon of Sura, he followed former scholars in deeming it not impossible that God should reveal the marvels of heaven to the pious while in this state of ecstasy (see Hananeel and Tosafot to Ḥag. 14b, *s.v.* "Arba'ah she-niknesu . . ."). But all the elements of the later Cabala not found in Talmudic tradition, as the belief that miracles could be performed with the names of God, he designated as foolishness not credited by any sensible man.

The best characterization of Hai is given by Steinschneider ("Hebr. Uebers." p. 910): "Certain cabalistic pieces were ascribed to him; but in truth he was no mystic in the usual sense of the word. In fact he fought against superstition. He was an orthodox Jew, in possession of general culture, but hostile to deeper philosophical research."

HA-'IBRI. See Periodicals.

HAIDA, ABRAHAM BEN SIMEON (also known as **Abraham Lemberger**): Printer in Prague between 1612 and 1628; son of Simeon Haida. In 1610, with Moses Uṭiẓ and Gershon Popers, he assisted in the printing of Samuel Laniado's "Keli Ḥemdah." In 1612 he was associated with Moses Uṭiẓ in the printing of Manoah Hendel's "Manoaḥ Maẓa Ḥen." He also printed the following works: Immanuel ben Solomon's "Maḥberet ha-Tofet weha-'Eden" (1613; according to Steinschneider); "'En Mishpaṭ" (Steinschneider, "Cat. Bodl." No. 3995) and Joseph ben Moses' "Bi'ure Rashi" (1614); Isaac ben David Schik's "Zeri'at Yiẓḥaḳ" and Abraham Sheftel's "Yesh Noḥalin" (1615); Solomon Luria's "Yam shel Shelomoh," on Baba Ḳamma (1616); Solomon ben Jacob's "Shir ha-Shirim" (1626); and many other books. He worked in the houses of Samuel Meisel, Judah ben Jacob Cohen, and Jacob Bak. His sons printed, in 1641, Löb ben Josef Rofe's "Ḳol Yehudah." According to Steinschneider ("Cat. Bodl." No. 5736), Judah Löb Lemberger, author of "Ein Hübsch Göttlich Büchel," may be one of Abraham Lemberger's sons.

G. M. Sel.

HAIDA, SAMUEL: Bohemian cabalistic author; died June 1, 1685, in Prague, where he was dayyan and preacher, and which was probably his native city. He edited the Tanna debe Eliyahu Rabbah with two commentaries and copious references (Prague, 1676); but he changed the text arbitrarily, considering himself to be under the inspiration of the prophet Elijah, whom he believed to be the author of this work of an unknown writer in the tenth century (see Zunz, "G. V." 2d ed., p. 119). In order to receive this inspiration he fasted, visited the graves of pious men, and engaged in different mystic practises. He justifies pilpulistic methods, and finds even for the habit of gesticulations at Talmudic disputations a basis in Biblical and Talmudic literature, for which he is severely criticized by Jair Ḥayyim Bacharach (see "Ḥawwot Ya'ir," Nos. 123, 152, and "Bikkurim," ed. Keller, i. 6).

HAIDAMACKS: Russian brigand bands of the eighteenth century. The disorganized condition of Poland during the eighteenth century made it possible for the discontented peasants and Cossacks of the Greek Orthodox faith to make organized attacks on their Catholic masters—the Polish nobles—and the Jews. The general disorder, and the agitation of the Greek Orthodox priests led to the formation of brigand bands known as "Haidamacks," composed of runaway serfs, Saporogians, and Cossacks from Russian Ukraine. In 1734 and again in 1750, under Cossack leaders, they robbed and destroyed many towns, villages, and estates in Kiev, Volhynia, and Podolia, killing a great number of Jews and Polish nobles. In 1768 occurred the Uman massacre, when Gonta and his followers killed thousands of Jews, sparing neither old nor young.

Russian Parties.

Internal dissensions in Poland caused a division into parties. One joined the Russian government in demanding religious liberty and political freedom for all of the Greek Orthodox faith, while the other opposed these demands, and formed the Federation of Nobles to defend the old order of things. During the armed conflict agitators urged the peasants to rise against the confederacy. A false decree of Catherine II. was circulated which ordered the extermination of the Jews and the Poles. Under the leadership of the Saporogian Cossack Zhelyeznyak bands of Haidamacks in the spring of 1768 swept over the government of Kiev, killing Poles and Jews, and ruining towns and villages. They often hanged together on the same tree a Pole, a Jew, and a dog, accompanied with the inscription, "A Pole, a Jew, and a dog—all of one faith." Thousands of Jews and Poles fled to the fortified city of Uman. So great was the number of fugitives that many could find no room within the city walls, and camped in the adjoining fields. The commandant of the city, Mladanovitch, had under him a detachment of Cossack militia commanded by Gonta. Although there was strong suspicion that Gonta was in sympathy with Zhelyeznyak, Mladanovitch nevertheless sent him against the latter. Gonta and his followers joined Zhelyeznyak, and soon appeared before the walls of Uman. The besieged made a determined resistance during the first day, the Jews working together with the Poles on the city walls.

Massacre at Uman.

There was no able leader to command them, however. Mladanovitch endeavored to negotiate terms of peace with the Cossacks. The latter promised that they would not touch the Poles, while they assured the Jews that their attack was directed only against the Poles. Gonta and Zhelyeznyak with their Haidamacks entered the city and began a most terrible slaughter. Heeding neither age nor sex, they killed the Jews in the streets, threw them from the roofs of tall buildings, speared them, and rode them down with their horses. When the streets were so filled with corpses that it was difficult to pass, Gonta ordered them collected into heaps and thrown outside the city gates to the dogs and pigs. Three thousand Jews fled to the synagogue and made a stand there. Armed with knives, a number of them attacked the Cossacks. Gonta blew in the door of the synagogue with a cannon; the Haidamacks rushed into the building and showed no mercy.

Having finished with the Jews, the Haidamacks turned on the Poles. When Mladanovitch in chains reproached Gonta for his treachery, the latter answered, "You treacherously sold the Jews to me, and I by perjury sold you to the devil."

It is estimated that about twenty thousand Jews and Poles were killed in Uman alone. Throughout the district the Jews were hunted from place to place. Many succumbed to hunger and thirst; many were drowned in the Dniester; and those who reached Bendery were seized by the Tatars and sold into slavery. Smaller Haidamack bands massacred the Jews in other places. Hundreds were killed in Tetiub, Golta, Balta, Tulchin, Paulovich, Rashkov, Lizyanka, Fastov, Zhivotov, and Granov. The determined efforts of the Jews of Brody in behalf of their brethren, and the lawlessness of Gonta, led to an energetic campaign against him. Soon after the Uman massacre Gonta and Zhelyeznyak were taken by the order of the Russian general Krechetnikov and handed over to the Polish government. Gonta was executed in a most cruel manner. His skin was torn off in strips, and a red-hot iron crown placed on his head. The remaining Haidamack bands were captured and destroyed by the Polish commander Stempkovski.

H. R. J. G. L.

HAIFA: Syrian seaport, at the foot of Mount Carmel, and ten kilometers from Acre. Near Haifa are two grottos, one associated with the name of the prophet Elijah, the second with that of Elisha. In Biblical times this region belonged to the tribe of Asher (Judges v. 17). Haifa had a Jewish community during the Talmudic period; the following rabbis are mentioned as having lived there: Abba of Haifa, Ami, Isaac Nappaḥah, and Abdima. The Jews of Haifa make a pilgrimage once every year to the tomb of the above-mentioned rabbi Abdima, which is in their cemetery. From the fifth to the thirteenth century the community was frequently broken up by the numerous conquerors of Palestine, but began to enjoy fairly settled and regular conditions of existence under the comparatively tolerant rule of the Mameluke sultans, at the beginning of the thirteenth century (1221).

Pilgrimages.

In 1084 Elijah ha-Kohen, gaon of Palestine, held a council at Haifa ("J. Q. R." xv. 85). In 1259 R. Jehiel, head of the rabbinical academy of Paris, after making a pilgrimage to the Holy Land, settled at Acre; he died there, and was buried at Haifa. Jacob Baruch, a Jewish traveler from Leghorn, who visited Haifa in 1799, says ("Shibḥe Yerushalayim") that he found a synagogue there. In the middle of the nineteenth century there were but seven Jewish families at Haifa. In 1857 Eleazar Cohen Ḥimsi, a rabbi of Smyrna, who was on his way to Tiberias by way of Haifa, consented to remain at Haifa as spiritual head of the community. He died after officiating twelve years (1857–69). Meanwhile the community was enlarged by the arrival of Jews from Constantinople, Smyrna, Syria, and Morocco. In 1870 Abraham Ḥalfon, a rabbi of Tiberias, but originally from Tetuan, accepted the title of grand rabbi of Haifa, but resigned after one year. Since 1878 two Moroccan rabbis, Mas'ud Ḥaḥuel and Abraham Cohen, both from Tetuan, have acted conjointly as rabbis. About 1882 Abraham Raphael de Léon, originally from Smyrna, acted at Haifa as consular agent of Holland. At the end of 1882 Laurence Oliphant took up his abode at Haifa, which he intended to be the center of the Palestine settlement which he had planned. He found in the town about thirty families who were waiting for government permission to colonize the proposed settlement.

In a population of 4,000 Haifa has 1,000 Jews, who are for the most part poor, and are occupied chiefly with commerce. Some are engaged as carpenters, coppersmiths, blacksmiths, and wheelwrights. In 1881 the Alliance Israélite established two schools, one of which is attended by 180 boys, and the other by 105 girls.

The community has quite an old synagogue and a bet ha-midrash. One half-hour's journey from Haifa there is a Jewish agricultural colony, Zikron Ya'aḳob, or Zammarin.

G. M. Fr.

HAIL: Frozen rain falling in pellets of various sizes and shapes. The Hebrew words for "hail" are: ברד, the most usual term: אלגביש (Ezek. xiii. 11, 13: xxxviii. 22); and חנמל (Ps. lxxviii. 47), the meaning of which is only conjectural. Hailstones were regarded as proofs of God's might (Ecclus. [Sirach] xliii. 15); they are spoken of as being kept in God's storehouses or treasuries (Job xxxviii. 22). The best known hail-storm in the Bible is the seventh plague which God inflicted on the Egyptians immediately before the Exodus (Ex. ix. 13-35; Ps. *l.c.*). On another occasion hail served as God's destroying agent; and it is said that those who died from hailstones were more than those who died by the sword of Israel (Josh. x. 11). For this reason hail is often mentioned as a punishment (Isa. xxviii. 17; Ezek. xiii. 11, 13). Once hail occurs in a description of the appearance of God (Ps. xviii. 13). Hail is very often coupled with fire (Ex. ix. 23, 24; Ps. xviii. 13 [A. V. 12]), and it is also mentioned in connection with thunder (Ex. ix. 23, 28; Ps. xviii. 14).

E. G. H. M. SEL.

HAIM, ISRAEL BEHOR: Servian author; born at Belgrade, Servia. He left his home in 1813 in consequence of the invasion of the Dahjas, and settled at Vienna, where he edited the Ladino translation of the Bible, the daily prayers, and other ritual works, as well as school-books. Returning to Belgrade toward 1838, he devoted himself to Jewish, especially to Judæo-Spanish, literature. Many of his stories and poems, written in Ladino, were destroyed in 1866. Haim also published: "The Sayings of Joshua ben Sira," translated into Ladino, Vienna, 1818; "Ḥobot ha-Lebabot: Este Libro es Llamado en Ladino Obligacion de los Coraçœns, é es Primera vez Tresladado de el Gaon ha-Chasid R. Bahie, é Agora fue Segunda vez Tresladado de . . . ," Vienna, 1822.

HAINDORF, ALEXANDER: German physician, writer, and philanthropist; born at Lenhausen, a village in Westphalia, May 12, 1784; died at Hamm Oct. 16, 1862. The son of poor parents, he went, after their early death, to his grandparents at Hamm, where, though a mere boy, he was obliged to engage in peddling. He studied Hebrew with a Polish Talmudist, and secretly read German books; after many difficulties he finally obtained permission to attend the gymnasium at Hamm. On his graduation he studied medicine at Würzburg, Erlangen, Heidelberg, and Paris. He became privatdocent at Heidelberg, and later practised at Minden. After a few years he accepted an appointment at the Academy of Münster as professor of medicine and surgery, which he retained until that school was dissolved in 1847. Haindorf wrote: "Versuch einer Pathologie und Therapie der Geistes- und Gemüthskrankheiten," Heidelberg, 1811; "Beiträge zur Kulturgesch. der Medicin und Chirurgie Frankreichs und Vorzüglich Seiner Hauptstadt, mit einer Uebersicht Ihrer Sämmtlichen Hospitäler und Armenanstalten," Göttingen, 1815; "Versuche über Hypochondrische und Andere Nerven-Affectionen," translated from the English of John Reid, with notes and additions, Essen, 1819.

Haindorf's chief claims to recognition lie in his efforts in behalf of the spread of culture and Biblical knowledge among his coreligionists. In 1825 he founded at Münster the Verein zur Beförderung von Handwerken Unter den Juden, in connection with a seminary for teachers for the Jewish communities; the influence of this society extended within ten years over Westphalia and Rhenish Prussia, on account of the founder's reputation as a physician and philanthropist. Haindorf was for many years director of this society, and himself gave lectures in natural science. The school enjoyed so high a reputation between 1830 and 1840 that many Christian inhabitants of the city sent their children there. In 1835 the institution was placed on a firm basis by a gift of 25,000 thalers from Haindorf's father-in-law. Several hundred teachers and artisans graduated there in the course of the nineteenth century. A lover of art, Haindorf collected such works as were within his reach, and his picture-gallery included among its four hundred paintings works by the foremost German and Dutch masters. In 1854 he went to Hamm to be near the family of his only daughter, ending his days in retirement. In conformity with his will he was buried at Münster beside his wife, who had died forty-six years previously.

S. M. K.

HAIR.—Biblical Data: The hair of the ancient Hebrews was generally black (comp. Cant. iv. 1, v. 11). In Eccl. xi. 10 black hair is designated as a sign of youth in contrast with the white hair of age. Josephus narrates ("Ant." xvi. 8, § 1) that Herod dyed his gray hair black in order to appear younger. Black hair was in any case considered beautiful, black being the general color, while light or blond hair was exceptional. David is designated as "admoni" = "ruddy" (I Sam. xvi. 12, xvii. 42), this expression being also applied to Esau's hair (Gen. xxv. 25). The Hebrews had thick hair (Ezek. viii. 3). Long, heavy hair was considered as a sign of vitality. In the case of Samson, traced back to religious reasons (he having been dedicated to God), the connection of long hair and bodily strength was based on the current views. Absalom's famous hair (II Sam. xiv. 25 *et seq.*) was considered not only as an ornament, but as a token of strength. A bald head, therefore, was an object of mockery (II Kings ii. 23; comp. Isa. iii. 17, 24).

Fashion Among Men.

From the Old Testament it may be gathered that it was customary for the men to have their hair cut from time to time. The NAZARITES allowed theirs to grow uncut for religious reasons. Absalom, proud of his thick head of hair, had it cut once a year only. But generally the hair was cut oftener. It was never shaved save on special occasions; the high priests and the priests in general were expressly forbidden to have theirs shaved. They were neither to shave their hair according to heathen custom, nor to allow it to grow uncut like that of the Nazarites (comp. Ezek. xliv. 20). There is no other information in the Bible concerning the care of the hair.

As the ancient Egyptians had combs, and as the Assyrians, also, were very careful in dressing their hair, it may be due to mere chance that combs are not mentioned in the Old Testament. The Hebrews, however, did not follow the Egyptian custom of wearing wigs. The Assyrians wore their hair in several braids reaching down to the nape of the neck. Samson's seven braids ("maḥlefot"; Judges xvi. 13, 19) indicate that this fashion obtained, for a time at least, in Israel.

Fashions Among Women.

Among women long hair is extolled as a mark of beauty (Cant. iv. 1, vii. 6). A woman's hair was never cut except as a sign of deep mourning or of degradation (Jer. vii. 29; comp. Deut. xxi. 12). Women gave much thought to the care and decoration of their hair (II Kings ix. 30; Cant. iv. 1, vi. 4, vii. 5; Judith x. 3). The prophet Isaiah derides the many aids used by the women in curling and tending their hair (Isaiah iii.). Josephus mentions the custom—still obtaining in the East—of sprinkling gold-dust on the hair in order to produce a golden shimmer ("Ant." viii. 7, § 3).

Religious Customs.

As a sign of mourning, part of the head, especially in front, was shaved. Although this was forbidden by the Law as a heathen superstition (Deut. xiv. 1; Lev. xxi. 5), the words of the Prophets indicate that it was customary among the people (Isa. xii. 12; comp. *ib.* iii. 24; Jer. vii. 29, xvi. 6; Ezek. vii. 18; Amos viii. 10; Micah i. 16; compare also the same custom among Arab women). The practise can not be interpreted as indicating a renunciation of everything considered in ordinary life to be a mere ornament (comp. Jer. vii. 29).

The Law regards it in an entirely different light, as it forbids shaving of the head on the ground that Israel belongs to Yhwh only (Deut. xiv. 1). Originally, shaving in times of mourning indicated that the hair was sacrificed to the dead (comp. Lucian, "De Dea Syria," 60). The Law also regarded as a heathen custom the shaving of the head in a circle, so that only a strand remained in the center (comp. Jer. ix. 26, xxv. 23, xlix. 32), and forbade it as such to the Israelites (Lev. xix. 27). Herodotus (iii. 8) says expressly that the Arabs intended to imitate thereby the fashion of their god Orotal-Dionysus, and he correctly ascribes to the custom a religious reason. The ancient conception, mentioned above, that the continuously growing hair, like the blood, is a sign of vitality sufficiently explains the sacrifice of the hair.

E. G. H. I. Be.

——**In Rabbinical Literature:** The hair was regarded by the Rabbis as so powerful an augmentation of beauty that married women were recommended to hide it. In connection with this recommendation the Talmud relates the following: Ḳimḥit, the mother of seven sons who successively held the office of high priest, was once asked by what merit of hers she was so blessed in her sons. "Because," said she, "the beams of my house have never seen my hair" (Yoma 47a). In Talmudical times it was the custom for women to plait their hair. "Because she [the wife accused of adultery] plaited her hair to please him [her alleged paramour] the priest loosened her hair" (Num. R. ix.). A man who curled his hair was regarded as a vain person. At the age of seventeen Joseph was still termed "lad" ("na'ar"), because he was childish enough to curl his hair (Gen. R. xxxiv.). Elijah had naturally curly hair; his enemies, however, mocked him, declaring that he curled it (Pesiḳ. R. 26 [ed. Friedmann, p. 129a]). While Samson was filled by the Holy Spirit his hair made a noise like bells, and the sound was heard from Zorah to Eshtaol (Yer. Soṭah 17b). The Midrash finds in the name "Joel ben Petuel" an indication that the prophet who bore it curled his hair like a maiden (Midr. Teh. lxxx.). Absalom was very vain of his hair, and therefore he was hanged by his hair (Soṭah 9b). One who does not wash his hands after shaving his hair has spells of anxiety for three days (Pes. 112a). In enumerating the wonders of Creation, God pointed out to Job the wisdom shown even in the making of human hair. Each hair (נימא) has a separate follicle, for should two hairs derive their nourishment from one follicle, the human eye would be dimmed (B. B. 16a).

Because such was the custom of the heathen the Rabbis forbade the Jews to trim the hair over the forehead, but let it hang down over the temples in curls (Sifre, Aḥare Mot, xiii. 9). A certain Abṭalion ben Reuben, however, was allowed to wear his hair in that fashion (ספר קומי) because he associated with the court (B. Ḳ. 83a). David had four hundred children who wore their front hair in that fashion, while their back hair was in long locks, as in a wig (בלורית; Ḳid. 76b). This way of wearing the back hair is disapproved by the Rabbis. "He who grows his back hair in the form of a wig [בלורית] does so for an idolatrous purpose" (Deut. R. ii.). The king had his hair cut every day; the high priest, every week; an ordinary priest, once a month. The high priest had his hair cut in the "Lulian" (= "Julian") style (לוליינית), which consisted in having the top of one row of hairs touching the root of the other (Sanh. 22b; Ned. 51a). A penalty of one hundred "sela'im" is imposed by the Rabbis for pulling an antagonist's hair (Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 420, 41). The washing of the dead (טהרה) begins with the hair, because human hair is associated with the thoughts ("Sifte Renanot" to "Ma'abar Yabboḳ," ch. xi.). The number of the hairs of the human head is one billion and seven thousand; according to another statement the human head has a billion locks, each lock containing 410 hairs, equivalent to the numerical value of קדוש ("holy"); and each hair has 410 worlds (*ib.*).

S. S. I. Br.

——**Superstitions:** The hair of children is not cut till they are at least three years old. In Palestine this is done on the grave of some saint, as on the "Itilula" of Rabbi Simson ben Yoḥai (Reischer, "Sha'are Yerushalayim," p. 24). Among the Beni-Israel, if the child comes as the result of a vow, its hair is not cut till its sixth or seventh year. It is usual in all these cases to weigh the hair cut off against coins which are given by the parents to charitable purposes. If a person's body is very hairy, it is a sign that he will be very lucky. The hair cut from the head should be burned, or hidden in a crevice where it can be found; if thrown away it will cause a headache. Red-haired persons are supposed to be very passionate and traitorous; hence, perhaps, the red hair attributed to Judas in early Christian art. Albinos can never become great.

In Talmudic times, when a man was to be buried, his hair was cut (M. Ḳ. 8b). This custom seems to be no longer followed. J.

——**Anthropology:** Among Jews the color of the hair has attracted special attention because, while the majority have dark hair, there is found a considerable proportion with blond and red hair, as shown by the appended table (No. 1):

TABLE NO. 1: COLOR OF HAIR AMONG 145,380 JEWISH SCHOOL CHILDREN.

Country.	Number.	Percentage.				Observer.
		Blond.	Brown.	Black.	Red.	
Austria.........	59,808	27.0	55.4	16.9	0.6	Schimmer.
Bavaria	7,054	30.0	50.0	20.0	...	Majer.
Germany	75,377	32.03	54.39	11.46	0.42	Virchow.
Hungary.........	3,141	23.7	57.0	19.3	...	Körösi.

From these figures it is seen that the proportion of dark hair (black and brown) is quite high—66 per cent in Germany, and reaching 76.3 per cent in Hungary. The proportion of fair hair is lowest in Hungary (23.7 per cent) and highest in Germany (32 per cent). In a fair proportion of blond-haired children the hair becomes darker as age advances; it is therefore essential to take observations upon adults. In the appended table (No. 2) are given the results of investigations upon Jews of both sexes and in various parts of the world:

TABLE NO. 2: COLOR OF HAIR AMONG 7,505 JEWS.

Country.	Number.	Percentage.			Observer.
		Dark.	Fair.	Red.	
Ashkenazim (Men).					
Baden	86	84.9	12.8	2.3	Ammon.

	34	88.2	11.8	....	Livi.
Various	375	95.3	2.6	1.1	Beddoe.

The figures in this table show again that dark hair predominates. The percentage of blond Jews varies only slightly, but is greatest in those countries in which the non-Jewish population is blond. Thus in northern Russia (the Baltic Provinces) Blechman found 32 per cent of blonds; in England, according to Jacobs, 25.5 per cent have blond hair. On the other hand, in Caucasia, where the natives are dark, the Jews show 96 per cent of dark hair. The proportion of red hair is also quite high, reaching 4 per cent in some observations. This has been considered characteristic of the Jews by some anthropologists. It appears to be not of recent origin, and was not unknown among the ancient Hebrews (Esau was "red, all over like a hairy garment"; Gen. xxv. 25).

Red Hair.

Races are also differentiated, more or less, by straight, curly, or woolly hair. Among the Jews the distribution of these varieties of hair is shown in the following table (No. 3):

TABLE NO. 3: VARIETY OF HAIR AMONG JEWS.

Variety of Hair.	Blechman.	Weissenberg.	Yakowenko.	Elkind.	Majer and Kopernicki.	Fishberg.	Glück.
Straight	36	84	64.90	97.0	96.56	66.97	52.9
Wavy	36	14	25.71	1.0	2.6	25.66	
Curly	28	2	9.39	2.0	0.84	7.37	47.1

The next table (No. 4) shows that the beard is usually darker than the hair:

TABLE NO. 4: COLOR OF THE BEARD.

Color.	Authority.			
	Blechman.	Weissenberg.	Fishberg.	Yakowenko.
Dark	61.0	73.0	63.72	74.97
Fair................	36.0	15.0	25.38	13.23
Red.................	3.0	12.0	10.90	11.8

By comparing these figures with those in No. 2 it is found that in the beard the proportion of light to dark is much higher. The number of red beards also increases perceptibly.

Hair of Jewesses.

The differences in the color of the hair between the sexes have also been investigated. Jacobs shows that the Jewesses in England have darker hair. Similar observations have been made by Weissenberg in South Russia, by Talko-Hryncewicz in Little Russia, by Yakowenko in Lithuania, and by Majer and Kopernicki in Galicia. On the other hand, Elkind in Poland and Fishberg in America have found conditions different: the males have darker hair than the females.

Cause of Blond Hair.

The true explanation of the existence of Jewish blonds has been the subject of lively discussions among anthropologists. Some believe that it is due to climate and environment (Pruner, Bey, Pritchard, Jacobs), while others attribute it to racial intermixture, particularly to the admission of Aryan blood into modern Jewry (Broca, Virchow, Schimmer, Ripley, and others). Elkind shows that the color of the hair is independent of the cranial index. Virchow's investigations show that in the eastern or darkest provinces of Germany the proportion of blond types among Jews does not decrease; whereas in the Prussian provinces, which are predominantly blond, the Jews show the highest proportion of brunettes, and in Silesia, where the non-Jewish population is of very dark complexion, the Jews have a high percentage of blonds. The same has been shown by Schimmer to be the case in Austria. Andree ("Zur Volkskunde der Juden," pp. 34-40) points out that the fact that red and blond Jews are found in North Africa, Syria, Arabia, Persia, etc., is proof that intermarriage has had little to do with the production of the blond type in eastern Europe. He is of the opinion that there were blonds among the ancient Hebrews, and that the modern red and blond Jews are their descendants. Luschan agrees in this view. Jacobs attributes the erythrism of the Jews to defective nutrition, and shows that it is present not only among the European Jews, but also among those in Algiers, Tunis, Bosnia, Constantinople, Smyrna, and Bokhara, where the presence of Aryan blood could not be admitted.

Grayness and Baldness.

The color of the hair undergoes changes with the advance of the age of the individual. Up to the age of thirty-five or forty the hair remains the same color in the majority of people. If grayness occurs earlier it is considered premature. It has been stated that premature grayness is very frequent among Jews (Weissenberg); but investigations by Fishberg and Yakowenko show that it appears rather later—at about the age of forty-five.

Baldness also is considered premature before the age of forty-five, at which age other signs of decay, such as loosening of the teeth and weakening of sight, begin to appear. It occurs most often among brain-workers and among those exposed to prolonged mental worry and anxiety. Weissenberg found that among Jews between the ages of twenty-one and fifty 16 per cent are more or less bald. Others point out that normal baldness (that is, baldness not due to favus) is not more frequent among Jews than among others. Yakowenko shows that it is found only as an exception among Jews before forty-five, and that when it occurs before this age it is usually due to favus. Fishberg reports only 83 individuals wholly or partially bald among 1,188 Jews over the age of twenty. Only 12 Jews among those less than forty were thus affected.

ḤAJES, MENAHEM MANUS. See Ḥayyut, Menahem.

ḤAJES, ẒEBI HIRSCH B. MEÏR. See Chajes, Ẓebi Hirsch b. Meïr.

ḤAKAM (חכם; Aramaic, חכים; Arabic, "ḥakim"): A wise or skilful man. The word is generally used to designate a cultured and learned person: "He who says a wise thing is called a wise man ["ḥakam"], even if he be not a Jew" (Meg. 16a). Hence in Talmudic-Midrashic literature wise and learned non-Jews are commonly called "ḥakme ummot ha-'olam" (the wise men of the nations; Pes. 94b, and *passim*). "Ḥakam" as an official title is found as early as the first Sanhedrin, after the reconstruction of that body, when the Hadrianic religious persecutions had ceased; in addition to the nasi Simon b. Gamaliel, two other scholars stood at the head of the Sanhedrin, namely, R. Nathan as Ab Bet Din, and Meïr as ḥakam (Hor. 13b). Another ḥakam mentioned by name was Simon, the son of Judah ha-Nasi I., who after the death of his father officiated as ḥakam with his elder brother, the nasi (Ket. 103b). Just what the functions of the ḥakam were is not clear. Rapoport's suggestion that he was the arbiter in matters of ritual prohibition and permission is highly improbable. Zecharias Frankel looks upon the ḥakam as a presiding officer whose duty it was to examine a case in question from all points of view, and, having summed up the results, to present the matter for discussion. It is more probable, however, that the office of ḥakam was created in order to secure a majority in cases of difference of opinion between the nasi and the ab bet din in the affairs of the Sanhedrin; one of the most eminent scholars was always chosen for the post. A baraita (M. Ḳ. 22b) leads to the inference that the ḥakam was always the director of a school ("bet ha-midrash"), for in addition to the Great Sanhedrin, which later came to take the place of an academy, there were also private academies under the direction of eminent scholars. The origin of the office of ḥakam is as doubtful as its duration.

Functions.

Frankel thinks that Joshua b. Hananiah, who lived in the beginning of the second century C.E., was the first ḥakam, but he does not sufficiently support this assertion. The office seems to have existed in Palestine as long as the academy of the nasi. An amora of the fourth century recounts the following rule of etiquette, still observed in his time: "When the ḥakam appears in the academy every one present must rise as soon as he comes within four ells of him, and must remain standing until he has gone four ells beyond" (Ḳid. 33b). It is hardly possible that the office of ḥakam existed in Babylonia, where the relation of the resh galuta to the heads of the academy was entirely different from that existing in Palestine between the latter and the nasi. Here "ḥakam" was merely the term for a Jewish scholar who studied chiefly oral traditions, while the terms "sofer" and "ḳara" were applied to Bible scholars (Ḳid. 49a, b; Soṭah 49a; Yer. Soṭah ix. 23b; Yer. Ta'an. iv. 68a, where "ḥakkim" is used ironically for the ḥakam of the academy). In the Seder 'Olam Zuṭa ("M. J. C." ed. Neubauer, pp. 71 *et seq.*) every resh galuta is accompanied by a ḥakam, who probably had charge of the religious affairs of the exilarchate: but as this work originated in Palestine (comp. Seder 'Olam Zuṭa), the author probably applied Palestinian conditions to Babylon. The Syrian Aphraates, who had met only Babylonian Jews, mentions a man "who is called the 'ḥakkima' of the Jews" ("Homilies," xxiv., ed. Wright, p. 394), but this, too, may mean "the wise man" of the Jews.

Among the Sephardim.

Among the Spanish-Portuguese Jews "ḥakam" is the official title of the local rabbi, but it has not yet been ascertained how old the title is. Solomon ben Adret addresses some of his responsa to people with "le-ḥakam Rabbi . . ." (Responsa, Nos. 79, 395), others again with "la-rab Rabbi . . ." (Nos. 219, 346), but it is possible that "le-ḥakam" simply means "to the wise." The plural, "ḥakamim," is generally used in the Talmud, and also by the Tannaim, to designate the majority of scholars as against a single authority. The Aramean equivalent is "rabbanan."

S. S. L. G.

ḤAḲAN, SAMUEL (SAMUEL HA-LEVI IBN ḤAKIM): Egyptian rabbi of the sixteenth century, first at Cairo, subsequently at Jerusalem (Levi ibn Ḥabib, Responsa, Nos. 10, 110; Conforte, "Ḳore ha-Dorot," *s.v.* "Ashkenazi"; Joseph Taytazak, "She'erit Yehudah," ed. Salonica, 1604, p. 67b). Ḥaḳan was a pupil of Elijah Mizraḥi (Responsa, No. 15). He edited and printed Isaac bar Sheshet's responsa at Constantinople (1546). He is quoted in Caro's "Bet Yosef," in Shulḥan 'Aruk, Ḥoshen Mishpaṭ, § 36, and in Moses di Trani's Responsa, part ii., No. 67. R. Tam ibn Yaḥya, to whom he and Jacob Berab (whose adversary he subsequently became) addressed a question from Cairo, calls him simply "Samuel Ḥaḳan" (חאקאן: see his responsa, "Tummat Yesharim," Nos. 100, 190, Venice, 1621; Taytazak, *s.v.*). It appears from the passages quoted above that he was among the foremost men of his time; but no independent works by him are extant.

HA-KARMEL: Hebrew periodical, edited and published by Samuel Joseph FUENN in Wilna. It was founded in 1860 as a weekly, and was continued as such (with the interruptions usual in the case of all Jewish periodical publications in Russia) until 1871. Eight volumes appeared in these eleven years, of which vols. i.–iii. have supplements in Russian. It then became a monthly, of which four volumes appeared from 1871 to 1881, when the publication was suspended. Ḥayyim Löb Katzenellenbogen was associated with Fuenn in the editorship (see "Letters of J. L. Gordon," No. 87, Warsaw, 1894). Ḥayyim Löb Markon later assisted Fuenn in the same capacity.

"Ha-Karmel" was more of a literary periodical and less of a newspaper than other Hebrew contemporaries like "Ha-Maggid" or "Ha-Meliẓ." It contained much historical material, and its criticisms and book reviews were of a high order. It was one of the important forces of the progressive, or "haskalah," movement in Russia.

HAḲḲAFOT: Processional circuits of the congregation in the synagogue on the Feast of Tabernacles, usually around the ALMEMAR, reminiscent of Joshua vi. and the proceedings in the Temple related in Sukkah 45a. The procession is omitted on the Sabbath, but on other days of the festival a scroll is taken from the Ark to the almemar at the close of the MUSAF, and the possessors of LULAB and ETROG join in procession, following the officiant, who chants the HOSHA'NA refrain and hymn for the day. The chant reproduces the sad tones of the SELIḤOT, but opens and closes with an intonation peculiar to the festival, as here shown. The

term "hakkafot" is also applied to the sevenfold processional during which the scrolls are carried seven times around the synagogue in the service of the Rejoicing of the Law. The traditional chants for this are comparatively modern. The Sephardim make circuits (also called "hakkafot") on HOSHA'NA RABBAH and at the entrance to the cemetery, around a coffin about to be interred.

HAKKOZ (הקוץ): **1.** A priest, chief of the seventh course, appointed by David (I Chron. xxiv. 10). In this passage the ה is considered by the Septuagint to be the definite article, the name being "Ḳoẓ." **2.** Progenitor of a post-exilic priestly family which, not being able to prove its genealogy, was removed from the priesthood (Ezra ii. 61; Neh. vii. 63). **3.** Grandfather of Meremoth, who assisted Nehemiah in reconstructing the wall of Jerusalem (Neh. iii. 4, 21).

E. G. H. M. SEL.

ḤAKMAN IBN ISHMAEL: Egyptian rabbi of the sixteenth century. He wrote novellæ on the Talmud and on Maimonides' "Yad," some of which were included by R. Mas'ud Ḥai b. Aaron Roḳeaḥ in his "Ma'aseh Roḳeaḥ," a commentary on the first part of the "Yad" (Venice, 1742).

HA-ḲOL. See PERIODICALS.

ḤALAFTA: Name of several tannaim and amoraim; frequently interchanged with **Ḥalfa, Ḥalifa, Ḥilfa, Ḥilfai, Ilfa,** and **Taḥlifa.**

ḤALAFTA: Scholar of the first and second centuries (second tannaitic generation), always cited without patronymic or cognomen; his descent is traced back to Jonadab the Rechabite (Yer. Ta'an. iv. 68a; Gen. R. xcviii. 4). He was a senior contemporary of Gamaliel II. and Johanan b. Nuri (Tosef., Shab. xiii. [xiv.] 2; *ib.* Ma'as. Sh. i. 13), and conducted a rabbinic school at Sepphoris. Here he introduced some ritual reforms (Ta'an. ii. 5; R. H. 27a). Tradition relates that, together with Hananiah b. Teradion and Eleazar b. Mattai, he saw the monuments which Joshua had placed in the Jordan (see ELEAZAR B. MATTAI). Ḥalafta seems to have attained an advanced age. He communicated to Gamaliel II. an order given by his grandfather Gamaliel I., and which he had himself heard in the last years of Judea's independence (Shab. 115a); he subsequently participated in the 'Aḳabia controversy (see "R. E. J." xli. 41), and later he is met with in the company of Eleazar b. Azariah, Ḥuẓpit the interpreter, Yeshebab, and Johanan b. Nuri, when they were old (Tosef., Kelim, B. B. ii. 2). But few halakot are preserved in his name, and most of these were transmitted by his more famous son, R. Jose (Kil. xxvi. 6; Tosef., Ma'as. Sh. i. 13; *ib.* B. B. ii. 10; *ib.* Oh. v. 8; Bek. 26a).

E. C. S. M.

ḤALAFTA OF HUNA (HUGA, HEWAH, ḤEFA): Palestinian amora of the third century; senior of R. Johanan. The latter communicates to Ḥalafta's sons a halakah in their father's name (Giṭ. 86b; Yer. Giṭ. ix. 50b).

BIBLIOGRAPHY: Frankel, *Mebo*, 85a.

E. C. S. M.

ḤALAFTA (ḤILFAI) B. ḲARUYA, ABBA (also known as **ḤALFA**): **1.** Tanna of the second century, contemporary of Gamaliel II. Gamaliel once visited him at Ḳaruya (Kiryava; see Neubauer, "G. T." p. 277), and solicited his prayers; whereupon Ḥalafta pronounced over him the blessing of Psalm xx. 5 (A.V. 4) (Midr. Teh. *ad loc.*). As "Ḥilfa" or "Ḥilfai" he is cited in connection with some halakot (Tosef., Ma'as. Sh. iv. 5; Yer. Ma'as. Sh. iv. 54d), and it appears that one of his halakot was taught and practised in Rome (*ib.*).

2. Palestinian amora of the third century, contemporary of Ḥiyya b. Abba (B. B. 123a). They both endeavored to reconcile the apparent discrepancy between the statement of Gen. xlvi. 27, "All the souls of the house of Jacob, which came into Egypt, were threescore and ten," and the list preceding it (8-26), which contains one less. Ḥiyya would have it that the person unnamed in the list was a twin sister of Dinah. This view Ḥalafta rejects, arguing that a twin sister might as well be ascribed to Benjamin. Finally, Ḥiyya quotes Ḥama b. Ḥanina as authority for the assumption that Jochebed was born soon after Jacob and his party entered Egypt, and is therefore reckoned among the souls that originally came with Jacob; with her the full count of seventy is completed (B. B. 123a; see also Gen. R. lxxxii. 8). Bacher ("Ag. Pal. Amor." ii. 177) locates the meeting of these rabbis in Rome. It is nowhere shown, however, that the younger Ḥalafta ever visited Rome, and the context from which Bacher draws the inference speaks of Ḥalafta the elder. As to the prænomen, it appears variously as "Ilfa," "Ḥilfai," "Ḥalifa," "Taḥlifa." Once it is altogether omitted, leaving only the title and cognomen (Gen. R. xix. 3; comp. Pesiḳ. Zuṭarta to Gen. iii. 1). It is probable that to Ḥalafta b. Ḳaruya belongs the remark headed with the curious name of R. Barḳirya. Seeing a procession of coffins containing the remains of people who had died in foreign lands, R. Barḳirya remarked to Eleazar: "What benefit can they derive from being buried here? To them I apply the words: 'Ye made mine heritage an abomination [since ye did not choose to live here],' and 'when ye entered, ye defiled my land [since ye entered as corpses]' " (Jer. ii. 7). Eleazar, however, told him that as soon as such processions reach Palestine, clods of Palestinian earth are laid on the coffins, and that that makes atonement, as the Bible says, "His earth will atone for His people" (Deut. xxxii. 43, Hebr.; Yer. Kil. ix. 32d; comp. Pesiḳ. R. i. 3; Tan., Wayeḥi, 6 [ed. Buber, p. 214], where "Ḳaẓrah" occurs in place of "Barḳirya"). The custom of sprinkling Palestinian earth on the dead is still common (see BURIAL).

E. C. S. M.

ḤALAFTA OF KEFAR HANANIAH, R. or ABBA: Tanna of the second century; junior of R. Meïr, in whose name he transmits the legal maxim: When the condition is expressed before an obligation depending on it, the condition is valid; but when the obligation precedes the condition, the condition is void (see CONDITIONS). From him the Mishnah (Ab. iii. 6) preserves an interesting homily on the number of persons constituting a quorum for the study of the Law. In the treatise Abot, usually incorporated in the Jewish rituals, the name of the author of this mishnah is "R. Ḥalafta b. Dosa of Kefar Hananiah"; in Maḥzor Vitry (ed. Berlin, 1893, p. 508), however, the patronymic does not appear, but there are also some other variants.

BIBLIOGRAPHY: Heilprin, *Seder ha-Dorot*, ii.; Zacuto, *Yuḥasin*, ed. Filipowski, p. 64.

E. C. S. M.

HALAKAH (הלכה): Noun, derived from the verb הלך, "to go," "to walk." The act of going or walking is expressed by הליכה, while the closely related הלכה is used only in the sense of "way of acting," "habit," "usage," "custom," and especially "guidance" and the norm of practise. For instance, when it is said in the Talmud that a halakah is according to this or that rabbi, it is meant that the opinion of the rabbi referred to, though in opposition to other opinions, is decisive for the practise. Sometimes it is used with the meaning of "tradition," as, for instance, when the Rabbis said: "If this is halakah [*i.e.*, tradition] we will accept it; but if it is merely a 'din' [*i.e.*, an argument] it is open to question" (Ker. iii. 9). "Halakah" stands sometimes for the whole legal part of Jewish tradition, in contradistinction to the Haggadah, comprising thus the whole civil law and ritual law of rabbinical literature and extending also to all the usages, customs, ordinances, and decrees for which there is no authority in the Scriptures. In modern works occurs also the term "midrash halakah," covering interpretations, discussions, and controversies connected with the legal part of the Scriptures (see MIDRASH HALAKAH).

BIBLIOGRAPHY: Dictionaries of Kohut, Jastrow, and Levy; Zunz, *G. V.* 2d ed., p. 44.

J.

HALAKOT: The body of religious law which constitutes one of the three main divisions of Jewish oral tradition. Later, the singular form "halakah" was generally adopted, even in reference to a whole collection of halakot, just as "haggadah" took the place of "haggadot." The Halakot were codified by R. Judah ha-Nasi and formed the juridical body of his Mishnah. Thereafter the term "Mishnah" displaced the term "Halakot," except in Palestine, where, even after the codification, the use of the term "Halakot" was continued, so that the Mishnah was known there as "Halakot" (Lev. R. iii.).

E. C. M. Sc.

ḤALALAH: The female issue of a priest's connection with a divorced woman or widow, a connection regarded as illegal. According to the Biblical law, a priest ("kohen") could not marry a harlot, or one "profaned" ("ḥalalah"), or a divorced woman, while the high priest was also forbidden to marry a widow (Lev. xxi. 7-14). The priest who married a woman that had been previously illegally married to another priest was guilty of two transgressions. For instance, if a priest married a divorced woman, she became a ḥalalah, and her issue also was considered "profane." If another priest married her afterward, he transgressed two commandments, that against marrying a divorced woman and that against marrying a ḥalalah (Ḳid. 77a; Maimonides, "Yad," Issure Biah, xix. 1; Shulḥan 'Aruk, Eben ha-'Ezer, vii. 12). The name is restricted to those women with whom connection is regarded as illegal for priests, and is not applied to such as are illegal for all. The female offspring of an incestuous or adulterous connection of a priest is not called ḥalalah, since such a connection is forbidden also to ordinary Israelites (Ḳid. 77b; "Yad," *l.c.* xix. 5).

The Punishment.

The punishment prescribed for the marriage of a priest with a ḥalalah is stripes. Authorities differ as to whether the same punishment was meted out to him if he had had intercourse with such a woman without marriage ("Yad," *l.c.* xvii. 2; RAbD and Maggid Mishneh *ad loc.*). The priest himself, although punished for his transgression, was not disqualified from the priestly office, but the male issue of such a connection was considered "ḥalal," and was not permitted the privileges or the duties of the priest.

The ḥalalah was not regarded as an illegitimate child; the only restrictions upon her were that she could not enjoy the advantages of a daughter of a priest—that is, she could not eat of the heave-offerings ("terumah") or of the sacrificial meats—and that she could not be married to a priest. If she married a non-priestly Israelite, her daughter was not regarded as ḥalalah, and might marry a priest. The issue of the ḥalal, however, retained the same status forever, even to the thousandth generation. The female children of a ḥalal were also regarded as profane, and could not be married into the priesthood (Ḳid. 77a; "Yad," *l.c.* xix. 14, 16; Eben ha-'Ezer, vii. 16). The daughter of a priest was not forbidden to marry a ḥalal, nor into any other class that was unfit for the priesthood (Ḳid. 72b; "Yad," *l.c.* xix. 11; Eben ha-'Ezer, vii. 22). See Illegitimacy; Priestly Code.

E. C. J. H. G.

HALÁSZ (FISCHER), IGNAZ: Hungarian philologist; born at Tés in 1855; died at Budapest April 9, 1901. He studied at the gymnasia of Veszprim and Stuhlweissenburg, and at the University of Budapest. From 1877 to 1892 he taught at the Obergymnasium of Stuhlweissenburg; in 1893 he was appointed professor of Hungarian philology at the University of Klausenburg. Between 1880 and 1890 he was sent three times by the Hungarian Academy of Sciences to the Swedish and Norwegian Laplanders, among whom he gathered much material relating to folk-poetry and comparative philology. The following are the most important of his philological works: "Ritkább és Homályosabb Képzök" (on rare formative sounds; crowned by the Academy); "Magyar Szók az Eszaki Szláv Nyelvekben" (on Hungarian words in North-Slavic languages); "Svéd-Lapp Nyelv" (on the language of the Swedish Laplanders); "Az Ugorszamojed Nyelvrokonság" (on the relationship of the Ugro-Samoyed languages). He collected and translated Finnish folk-songs, translated Grimm's "Household Tales," and published original Hungarian fairy-tales.

G. H. B.

HALBAN, HEINRICH, RITTER VON: Austrian statesman; born at Cracow 1846; died at Gastein Aug. 13, 1902. Halban, whose name was originally **Blumenstock,** studied law at Cracow, and went to Vienna some time before 1870, where he devoted himself to journalism. When Potocki became president of the Council of Ministers (1870) he appointed Blumenstock to a position in the press bureau, where he advocated in the Polish papers the policy of the government. He rose to great prominence under the ministry of Count Taaffe (1878), who made him a court councilor in 1885, and a year later appointed him chief of the Reichsrath's office, in which capacity he had the important task of representing the government in its transactions with the parliamentary parties. Blumenstock, whom Count Taaffe had ennobled with the title of "Ritter von Halban," rose to the height of his power under the ministry of his Galician countryman, Count Badeni (1895), and was considered the real leader in the government. After the resignation of Badeni (1897) he became very unpopular, and retired from public life in 1898. He had been converted to Christianity in the beginning of his career, and was married to a sister of the socialist deputy Victor Adler.

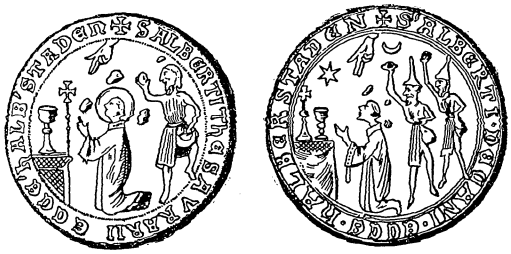
HALBAN, LEO VON. See Blumenstock von Halban, Leo.

HALBERSTADT: Town in the Prussian province of Saxony. The earliest documentary evidence of the presence of Jews in Halberstadt is contained in a letter of protection from Bishop Volrad, dated 1261 (Bishop Volrad decreed that the jurisdiction of the Jews should be upheld ". . . prout et antiquo in civit. Halb. dinoscitur consuetum, . . ."). The

Thirteenth to Sixteenth Century.

scant reports concerning the Halberstadt Jews dating from the thirteenth and fourteenth centuries make them appear as a subject of litigation between the bishop and the city council. In the middle of the fifteenth century the Jewish community must have been in a flourishing condition. It received a setback through the edict of Bishop Ernest II. (who was also Archbishop of Magdeburg) expelling the Jews from his archbishopric in 1493.



Seal of Halberstadt Cathedral; Jews Represented as Stoning St. Stephen.

After some time, however, Jews were permitted to return to Halberstadt; and about the middle of the sixteenth century the Jewish population was again a considerable one, swelled by the immigration of Jews expelled from Nordhausen. Bishop Henry Julius, after harassing the Jews of Halberstadt in the most reckless manner, again expelled them in 1594; but the prospect of an increased tax revenue induced him to readmit them under letters of protection. He even allowed them to build a synagogue. This friendly attitude was brought about at great pecuniary sacrifice by Jacob ben Israel Naphtali, one of the many "shtadlanim" who represented the community. It was only for a comparatively short time, however, that the community enjoyed the possession of a synagogue. The disturbances of the Thirty Years' war set in, which caused the "mad" bishop Christian to impose heavy taxes upon the people. The infuriated mob wreaked vengeance upon the helpless Jews by destroying the synagogue (1621), although the Jews were the victims of extortion to even a higher degree than the rest of the population.

During the Thirty Years' War.

During the Swedish régime the constitutional estates ordered an expulsion of Jews not possessing letters of protection; but in spite of all hardships the community continued to increase in numbers. By the treaty of Westphalia (1648) Halberstadt was annexed to Brandenburg. Elector Frederick William began his administration with the introduction of measures favorable to the Jews; but he, too, would not have "the Jews increase to intolerable numbers"; their number at this time was 280. In 1660 he allowed them to build a schoolhouse, which permission the Jews construed to extend to the erection of a synagogue also. The estates appealed to the elector, who then declared that the building of a synagogue was not included in the permit. This declaration was seized upon by the populace as a pretext for demolishing the beautiful synagogue in the Joeddenstrasse (March 18, 1669), in which work of devastation they were aided by the military. The hammer with which the synagogue was forced open is still preserved in the parish house. Although the elector was very indignant at this high-handed action, he refused permission to rebuild the synagogue, bidding the Jews hold their services at their homes.

The Burden of Taxation.

Notwithstanding the animosity which the people showed toward the Jews, and in spite of the heavy taxes imposed upon the latter, the community still continued to grow. The number of Jewish families at about this time was 120. The burial society still existing dates back to 1679. In this period flourished Issachar ha-Levi Bermann. At the instance of Bermann, Ẓebi Hirsch Bialeh ("Ḥarif"), a noted scholar, went to Halberstadt as rabbi (see Buber, "Anshe Shem," p. 179, Cracow, 1895); and under his direction the Talmud school greatly prospered. The congregation meanwhile groaned under the burden of a heavy debt contracted in previous times in order to meet the demands of the extortionate taxation. In addition to the enormous taxes (amounting to about 2,500 thalers in 1794) the community spent large sums in behalf of the Talmud school and in aid of needy communities. During the Seven Years' war Halberstadt received the unwelcome visit of a French skirmishing party (1760), which laid the Jewish congregation under contribution; and as the sum demanded was not raised, the house of one of the trustees of the congregation was set on fire, and two Jews, together with several prominent citizens, were carried off as hostages.

After an interesting legal contest Hirsch Göttingen, who filled the position of counsel at the Jewish court, as well as that of teacher, was elected by the congregation in 1782 as "Klaus" scholar in opposition to the wishes of the grandson of the founder and a trustee of the fund, who favored another candidate. This gave a footing to the Göttingen family (afterward bearing the name of "Hirsch" for its ancestor) in Halberstadt, which family during nearly a whole century furnished directors to the community, while contributing materially to its general welfare. At the close of the eighteenth century Hirsch Köslin founded the Hazkarat Ẓebi, a school in which, "besides the Bible and Talmud, instruction is given by a head teacher and an assistant teacher in German, arithmetic, and all the branches yielding knowledge requisite in social intercourse." It is one of the oldest Jewish schools in Germany conducted on modern principles.

At the beginning of the nineteenth century Halberstadt was annexed to the kingdom of Westphalia, and its Jewish community came under the jurisdiction of the newly established consistory of Cassel. As president of the consistory was appointed (1808) Israel Jacobson, a native of Halberstadt, who did much toward bettering the condition of the Jews. In 1811 the special Jew-tax was abrogated in Westphalia; and in 1812 the emancipation of the Jews throughout Prussia was announced. Two years later Halberstadt came again under Prussian rule, and the old burdens were not renewed. Thenceforward the congregation, which during the Westphalian régime had greatly declined, steadily increased, mainly owing to immigrations, until the number of Jews exceeded 800. The "Klaus" was reorganized in 1858, the synagogue was renovated in 1879, and on the occasion of the centenary of the school in 1898 a spacious new school-building was erected. The Jews of Halberstadt number at present 820 out of a total population of 42,792.

Previous to 1661 the rabbinical functions were discharged by scholarly members of the congregation, and often also by the directors. The following is a list of rabbis since 1661:

Solomon ben Johanan Reinbach (1661-91); Abraham ben Judah Berlin (1692-1715; later in Amsterdam); Ẓebi Hirsch Bialeh ("Ḥarif") (1718-48); Moses Brisk (1748-57); Meyer Barby (1757-63; later in Presburg); Hirshel Levin (1764-70; formerly in London and afterward in Berlin); Acting Rabbi Eliezer Lichtenstein (1770-72); Jacob Schwanfeld (1772-75; formerly in Peine, near Hanover); Löb Eger (1775-1814); Akiba Eger (1814-24; nephew of the preceding and formerly a "Klaus" scholar); Matthias Lewian (1824-62); B. H. Auerbach (1862-72; formerly in Darmstadt); Selig Auerbach (1873-1901; formerly director of the Jewish town-school at Fürth); Isaac Auerbach, the present (1903) incumbent.

Bibliography: Auerbach, *Gesch. der Israelitischen Gemeinde Halberstadt*, Halberstadt, 1866.

D. B. A.

HALBERSTADT, ABRAHAM BEN MENKI: German Hebraist and Talmudic scholar; died at Halberstadt about 1780. His "Pene Abraham" (unpublished), a treatise on the most difficult halakot of the Talmud, shows him to have been an authority in Talmudic matters. Besides this there exists a collection of very interesting letters written by him to his friend R. Jeremiah at Berlin. A German translation of these letters was published by Auerbach in his "Gesch. der Israelitischen Gemeinde Halberstadt," pp. 187–197. In a long letter dated 1770 Halberstadt defended warmly the memory of Jonathan Eybeschütz, whose pupil he was. In another letter, dated 1774, he defended the study of synonyms, which study was deprecated by R. Jeremiah; and in one dated a year later he expressed his admiration for Wessely and Mendelssohn. In the same letter he severely censured rabbis who have no knowledge of mathematics or astronomy, without which it is impossible to explain many passages in the Talmud.

Bibliography: Auerbach, *Gesch. der Israelitischen Gemeinde Halberstadt*, pp. 78, 99, 187–197.

K. M. Sel.

HALBERSTADT (also **STADTHAGEN**), **JUDAH BEN BENJAMIN:** Rabbinical author of the eighteenth century. He was the author of "Minḥat Yehudah," giving explanations of all passages in Rashi on Berakot in which the word "ke-lomar" occurs. A similar work on Shabbat, 'Erubin, and Berakot appeared later (Altona, 1768). He was also the author of a discourse on "Ẓenon we-Zayit" (Ber. 36a), on the benediction to be recited on eating radishes and olives (Altona, 1765).

K. N. T. L.

HALBERSTADT, MORDECAI: German rabbi; born at Halberstadt at the beginning of the eighteenth century; died at Düsseldorf about 1770. After studying at Frankfort-on-the-Main under Jacob ha-Kohen (1730), Halberstadt became teacher in the rabbinical school of his native town. In spite of his youth he was elected rabbi of Griesheim on the recommendation of his teacher; he subsequently occupied the rabbinates of Darmstadt and Düsseldorf. As a cabalist Halberstadt was called upon by Samuel Heilmann of Metz and Jacob Joshua Falk for an opinion as to whether Eybeschütz's amulets were positively Shabbethaian in spirit. To have given an affirmative answer would have necessarily associated Halberstadt with the enemies and intending excommunicators of Eybeschütz; he therefore merely advised the inquirers to refrain from pressing their attacks further, declaring himself unable to definitely pronounce the amulets Shabbethaian in character. He was the author of a work entitled "Ma'amar Mordekai," responsa (Brünn, 1782), and of a grammatical work, as yet unpublished.

Bibliography: Auerbach, *Gesch. der Israelitischen Gemeinde Halberstadt*, pp. 74–76.

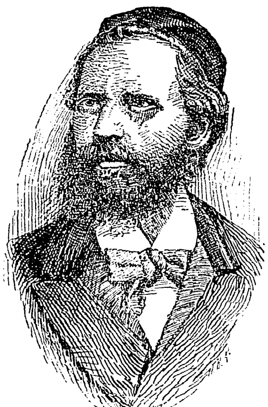
HALBERSTAM, SOLOMON JOACHIM: Austrian scholar; born at Cracow Feb. 23, 1832; died at Bielitz March 24, 1900. His father, Isaac Halberstam, was a prominent merchant who devoted his leisure time to study, and left in manuscript a work which Solomon published in his honor under the title "Siaḥ Yiẓḥaḳ," Lemberg, 1882. This work contains also notices on the genealogy of Halberstam, who numbered eminent rabbis among his ancestors both on his father's and on his mother's side. In 1860 he settled at Bielitz as a prosperous merchant. The larger part of his time, however, he devoted to Jewish learning, and a considerable part of his income to increasing his library, which was especially rich in rare and valuable manuscripts, the love of collecting having been developed in him early. For half a century he corresponded widely with the representatives of Jewish learning of all shades of opinion; and he took part in learned discussions on the most diverse questions, contributing to nearly all the periodicals papers written in Hebrew and in other languages.



Solomon Halberstam.

Halberstam was one of the directors and chief supporters of both the old and the new Meḳiẓe Nirdamim, the publications of which include contributions from him. He contributed valuable introductions to the works of a great number of Hebrew writers, and was also a collaborator on collective works, such as the jubilee or memorial volumes in honor of Grätz, Steinschneider, Kohut, and Kaufmann.

Halberstam's editions are: "Ḥiddushe ha-Riṭba

ʻal Niddah," novellæ and discussions on the treatise Niddah by R. Yom-Ṭob ben Abraham (abbreviated "Riṭba") of Seville, Vienna, 1868; Abraham ibn Ezra's "Sefer ha-ʻIbbur," a manual of calendar science, 1874; Hillel b. Samuel of Verona's "Tagmule ha-Nefesh," 1874; Judah b. Barzilai of Barcelona's commentary on "Sefer Yeẓirah," 1884; and the same author's "Sefer ha-Sheṭarot," 1900.

In 1890 Halberstam issued a complete catalogue of his manuscripts (411 items) under the title "Ḳehillat Shelomoh." The greater part of them was acquired by Montefiore College, Ramsgate, England, while his large collection of printed books, and a considerable number also of manuscripts, was bought by Mayer Sulzberger and presented to the library of the Jewish Theological Seminary of America.

HA-LEBANON. See Brill, Jehiel.

HALÉVY (ḤALFAN), ÉLIE: French Hebrew poet and author; born at Fürth in 1760; died at Paris Nov. 5, 1826; father of **Fromenthal** and **Léon Halévy.** At an early age Halévy went to Paris, where he became cantor. His knowledge of the Talmud and his poetical talent acquired for him the esteem of many French scholars, particularly the well-known Orientalist Sylvestre de Sacy. His first poem was "Ha-Shalom," a hymn composed on the occasion of the treaty of Amiens; it was sung in the synagogue of Paris, in both Hebrew and French, on the 17th Brumaire (Nov. 8), 1801. The poem was praised in Latin verse by the Protestant pastor Marron. In 1808 Halévy composed a prayer to be recited on the anniversary of the battle of Wagram; in 1817, with the help of some of his coreligionists, he founded the French weekly "L'Israélite Français," which, however, expired within two years. To this periodical he contributed a remarkable dialogue entitled "Socrate et Spinosa" (ii. 73). His "Limmude Dat u-Musar" (Metz, 1820) is a text-book of religious instruction compiled from the Bible, with notes, a French translation, and the decisions of the sanhedrin instituted by Napoleon. Halévy left two unpublished works, a Hebrew-French dictionary and an essay on Æsop's fables. He attributes the fables to Solomon (comp. I Kings v. 12-13 [A. V. iv. 32-33]), and thinks the name "Æsop" to be a form of "Asaph."

HALÉVY, JACQUES FRANÇOIS FROMENTHAL ÉLIE: French composer; born at Paris May 27, 1799; died at Nice March 17, 1862. His family name was "Levi"; his father, Élie Halévy, was a Bavarian by birth. At the age of ten he entered the Paris Conservatoire and studied under Cazot (elements of music), Lambert (piano), and Berton (harmony). He won the solfeggio prize in 1811, and the second prize in harmony in 1812. He thereafter became a pupil of Cherubini in composition, with whom he remained for five years; and, after twice winning the second prize at the Conservatoire, he finally secured the Grand Prix de Rome (1819) for his cantata "Herminie." Shortly before his departure for Rome his "De Profundis" (text in Hebrew), composed on the death of the Duc de Berri, and dedicated to Cherubini, was performed at the synagogue in the Rue St. Avoye (March 24, 1820).

Early Works.

After actively prosecuting his studies in Italy Halévy returned to France, where for several years he experienced considerable difficulty in obtaining a hearing for his compositions. His comic opera "L'Artisan" (in one act), performed at the Théâtre Feydeau in 1827, met with but little success, but the three-act opera "Clari," produced at the Théâtre Italien in 1829, the principal rôle being sung by Malibran, made a somewhat better impression, and was probably largely instrumental in securing for the composer the appointment of "chef du chant" at the theater in question, a position which he occupied in association with Hérold.

For several years to come, however, the composer was not destined to score a decided triumph, although opera followed opera in quick succession. Still, the air "Vive, vive, l'Italie," in his comic opera "Le Dilettante d'Avignon" (1829), became exceedingly popular with the Parisian public, while his ballet "Manon Lescaut" (1830), by reason of its melody and verve, also found favor.

Halévy had already attained the age of thirty-six when his masterpiece, "La Juive," a grand opera in five acts, was produced at the Opéra (Feb. 23, 1835), where it was hailed with enthusiasm, and at once secured for its author a European reputation. The opera was presented with unprecedented scenic splendor, the stage-setting alone having cost, it was said, 150,000 francs. Ten months after the first performance of "La Juive" Halévy's musical comedy "L'Eclair" appeared; and, although in spirit the exact antithesis of "La Juive," it immediately became a favorite with Parisian audiences.

Although the composer had given splendid evidence of his extraordinary talent and versatility in these two widely divergent compositions, he now lost much of his originality and became imitative rather than creative—a deterioration ascribed partly to the influence of Meyerbeer, then at the zenith of his fame, and partly to Halévy's carelessness in the selection of librettos. At all events, it may be said that, out of about twenty dramatic works, chiefly comic operas, which followed upon "La Juive," only a few, such as "Les Mousquetaires de la Reine" (1846) and "Le Val d'Andorre" (1848), are still occasionally produced. Nevertheless, many of them, and notably "La Dame de Pique" (1850), although perhaps lacking in dramatic interest, are replete with melody.

Professorship in the Conservatoire.

In 1851 Halévy obtained a professorship at the Conservatoire, where Gounod, and afterward Bizet, were among his pupils, the latter subsequently marrying Halévy's daughter. In 1854 Halévy was appointed permanent secretary of the Académie des Beaux-Arts, and his "Souvenirs et Portraits, Etudes sur les Beaux Arts" (1869), written in this capacity, constitute a very attractive series of criticisms and eulogies. Halévy's "Leçons de Lecture Musicale," published in 1857 and since revised, is still the standard textbook on solfeggio in the elementary schools of Paris.

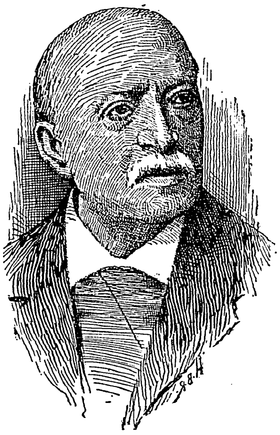
S. J. So.

HALÉVY, JOSEPH: French Orientalist; born at Adrianople Dec. 15, 1827. While a teacher in Jewish schools, first in his native town and later in Bucharest, he devoted his leisure to the study of Oriental languages and archeology, in which he became proficient. In 1868 he was sent by the Alliance Israélite Universelle to Abyssinia to study the conditions of the FALASHAS. His report on that mission, which he had fulfilled with distinguished success, attracted the attention of the French Institute (Académie des Inscriptions et Belles-Lettres), which sent him to Yemen to study the Sabean inscriptions. Halévy returned with 686 of these, deciphering and interpreting them, and thus succeeding in reconstructing the rudiments of the Sabean language and mythology. Since 1879 Halévy has been professor of Ethiopic in the Ecole des Hautes Etudes, Paris, and librarian of the Société Asiatique.

Halévy's scientific activity has been very extensive, and his writings on Oriental philology and archeology, which display great originality and ingenuity, have earned for him a world-wide reputation. He is especially known through his controversies, still proceeding, with eminent Assyriologists concerning the non-Semitic Sumerian idiom found in the Assyro-Babylonian inscriptions. Contrary to the generally admitted opinion, Halévy put forward the theory that Sumerian is not a language, but merely an ideographic method of writing invented by the Semitic Babylonians themselves.



Joseph Halévy.

Biblical Researches.

For the student of specifically Jewish learning the most noteworthy of Halévy's works is his "Recherches Bibliques," wherein he shows himself to be a decided adversary of the so-called higher criticism. He analyzes the first twenty-five chapters of Genesis in the light of recently discovered Assyro-Babylonian documents, and admits that Gen. i.-xi. 26 represents an old Semitic myth almost wholly Assyro-Babylonian, greatly transformed by the spirit of prophetic monotheism. The narratives of Abraham and his descendants, however, although considerably embellished, he regards as fundamentally historical, and as the work of one author. The contradictions found in these narratives, and which are responsible for the belief of modern critics in a multiplicity of authors, disappear upon close examination. The hypothesis of Jahvistic and Elohistic documents is, according to him, fallacious.

The following are Halévy's principal works, all of which have been published in Paris:

Rapport sur une Mission Archéologique dans le Yemen, 1872.
Voyage au Nadjran, 1873.
Mélanges d'Epigraphie et d'Archéologie Sémitiques, 1874.
Etudes Sabéennes, 1875.
Etudes Berbères, Epigraphie Lybique, 1875.
La Prétendue Langue d'Accad. Est-Elle Touranienne? 1875.
Etudes sur le Syllabaire Cunéiforme, 1876.
Recherches Critiques sur l'Origine de la Civilisation Babylonienne, 1876.
La Nouvelle Evolution de l'Accadisme, 1876-78.
Prières des Falachas, Ethiopic text with a Hebrew translation, 1877.
Documents Religieux de l'Assyrie et de la Babylonie, text with translation and commentary, 1882.
Essai sur les Inscriptions du Safā, 1882.
Mélanges de Critique et d'Histoire Relatifs aux Peuples Sémitiques, 1883.
Aperçu Grammatical sur l'Allographie Assyro-Babylonienne, 1885.
Essai sur l'Origine des Ecritures Indiennes, 1886.
La Correspondance d'Amenophis III. et d'Amenophis IV. Transcrite et Traduite, 1891-93.
Les Inscriptions de Zindjirli, two studies, 1893, 1899.
Tobie et Akhiakar, 1900.
Recherches Bibliques, a series of articles begun in "R. E. J."; continued, after 1893, in the "Revue Sémitique d'Epigraphie et d'Histoire Ancienne," founded by Halévy; and published in book-form in 1895.
Nouvelles Observations sur les Ecritures Indiennes, 1895.
Le Sumérisme et l'Histoire Babylonienne, 1900.
Taazaze Sanbat (Ethiopic text and translation), 1902.
Le Nouveau Fragment Hébreu de l'Ecclésiastique, 1902.
Les Tablettes Gréco-Babyloniennes et le Sumérisme, 1902.
Essai sur les Inscriptions Proto-Arabes, 1903.
Etudes Evangéliques, 1903.

Halévy is the author of "Maḥberet Meliẓah we-Shir," Hebrew essays and poems (Jerusalem, 1895). In the earlier part of his life he was a regular contributor to the Hebrew periodicals, the purity of his Hebrew being greatly admired.

HALÉVY, LÉON: French author and dramatic writer; brother of Jacques François Fromenthal Halévy; born at Paris Jan. 14, 1802; died at Saint Germain-en-Laye Sept. 2, 1883. After finishing a course at the Lycée Charlemagne, Halévy became a disciple and collaborator of Saint Simon, aiding in the foundation of his organ, "Le Producteur," and writing the introduction to his work, "Opinions Littéraires, Philosophiques et Industrielles," in which Rodrigues and Bailly also assisted. In 1831 Halévy was appointed assistant professor of French literature at the Ecole Polytechnique, but abandoned the position three years later. In 1837 he was attached to the Ministry of Public Instruction as chief of the bureau of scientific societies, and remained there until his retirement in 1853, after which he devoted the remainder of his life to literature. Halévy wrote a large number of poems, translations, plays, and other works. Among the poems may be cited: "Le Vieux Guerrier au Tombeau de Napoléon," 1821; "La Peste de Barcelone," 1822; "Poésies Européennes," 1828; "Œuvres Lyriques d'Horace," 1831 (2d ed., 1856). His plays include: "Le Czar Demetrius," 1829, staged at the Théâtre Français; "Le Duel," a two-act comedy, produced at the Théâtre Français; "L'Espion," 1828, a five-act drama, produced at the Odéon (in collaboration with Drouineau); "Le Chevreuil," 1831 (in collaboration with Jaime); "Indiana," 1833; "Leone Leoni," 1840; "Un Mari," 1843; and "Le Balai d'Or," 1843. Among Halévy's later plays were: "Le Mari aux Epingles," 1856; "Ce Que Fille Veut," 1858; "Un Fait-Paris," 1859; "Electre," 1864. Of Halévy's other works may be mentioned: "Résumé de l'Histoire des Juifs Modernes," 1828; "Recueil de Fables," 1844 (2d ed., 1856; crowned by the Academy); "La Grèce Tragique," 1846; "Vie de Fromenthal Halévy," 1862.

S. V. E.

HALÉVY, LUDOVIC: French dramatist; born in Paris Jan. 1, 1834; a son of Léon Halévy and a nephew of Jacques François Fromenthal Halévy. He was educated at the Lycée Louis le Grand in Paris; after graduating he entered the service of the government. During this period he wrote several comic operas under the nom de plume of "Jules Servières." His success with these induced him to resign his position (1865), and devote himself entirely to the drama in association with Henri Meilhac. The operas written by Halévy and Meilhac were successfully produced on nearly all the stages of Europe and America.

Halévy's earlier plays include: "Bataclan" (1855; music by Offenbach); "L'Impresario" (1856; with Battu); "Le Docteur Miracle" (1857; with Battu); "Orphée aux Enfers" (1858); "La Chanson de Fortunio" (1861); "Le Pont des Soupirs" and "La Baronne de San Francisco" (1862).

The following were produced in collaboration with Meilhac: "La Belle Hélène" (1865; music by Offenbach, one of his greatest successes); "Le Train de Minuit" (1863); "Barbe-Bleue" (1861); "La Grande Duchesse de Gérolstein," a satire on militarism (1867; music by Offenbach); "Froufrou" (1869); "Le Réveillon" (1872); "La Petite Marquise" (1874); "Carmen" and "La Cigale" (1877); "Le Petit Duc" (1878); "La Petite Mademoiselle" (1879). In 1882 the partnership came to an end. There were rumors of a quarrel, which, however, were denied by Halévy. Meilhac continued to produce plays, while Halévy devoted himself to literature. "Froufrou" is their most famous play. It ran for 250 nights at the Gymnase and for 100 more at the Porte Saint Martin, with Sarah Bernhardt in the cast; it was revived at the Théâtre Français in 1892.

Halévy's novels include: "Un Scandale" (1860); "L'Invasion," "Madame et Monsieur Cardinal," "Le Rêve," "Le Cheval du Trompette," and "Quand On Attend Ses Messes" (1872); "Marcel" (1876); "Les Petites Cardinal" (1880); "L'Abbé Constantin" (1882); "La Famille Cardinal," "Criquette," "Deux Mariages," "Un Grand Mariage," "Un Mariage d'Amour," and "Princesse" (1886); "Les Trois Coups de Foudre" and "Mon Camarade Mussard" (1886); "Karikari" (1892).

Halévy was decorated with the cross of commander of the Legion of Honor, and became a member of the Academy in 1884.

ḤALFON, ABBA MARI: Italian astronomer of the fifteenth and sixteenth centuries. In 1492 he was at Naples, where he studied astronomy. Ḥalfon was the author of "Ṭa'ame Miẓwot," containing explanatory notes on the ALFONSINE TABLES, and still extant in manuscript (MS. Naples, iii. F 12; MS. Parma, De Rossi, No. 336, 7, under the title "Ṭa'ame ha-Kelalim"). According to A. Berliner, the "Bayit Ne'eman," a Hebrew translation or paraphrase of a commentary by Ibn Rajal on the same astronomical tables, with an introductory Hebrew poem, found in the Naples codex, was the work of Abba Mari, who signed thereto the same initials (אמת = "Abba Mari Talmid") as those used by him in his "Ṭa'ame Miẓwot." An elegy written by Ḥalfon

(1490) at Lucca on the death of Jehiel of Pisa was published by D. Kaufmann ("R. E. J." xxvi. 106).

ḤALFON, ELIJAH MENAHEM: Italian Talmudist and physician; son of the astronomer Abba Mari and son-in-law of Kalonymus ben David (Maestro Calo); flourished at Venice in the middle of the sixteenth century. In a collection of responsa compiled by Joseph Graziano of Modena, Ḥalfon gives his opinion on the question whether a Jew may instruct Christians in Hebrew. Citing numerous passages from the Talmud, which he elucidates with logical acumen, Ḥalfon shows that elementary instruction may certainly be given, if only for the purpose of enabling non-Jews to comply with the seven laws given to Noah. Ḥalfon was one of the rabbinical authorities from whom Francesco Georgio obtained for Richard Croke a rabbinical opinion regarding the divorce of Henry VIII. This circumstance, and his friendship for Solomon Molcho, brought about a quarrel between Ḥalfon and the physician Jacob Mantino.

Ḥalfon's authority as a Talmudist was widely recognized, and a responsum of his, in which he calls himself the grandson of Joseph Colon, is found in Moses Isserles' collection of responsa (No. 56, ed. Cracow). Ḥalfon was also a versatile poet, and several of his productions are still extant in manuscript (Neubauer, "Cat. Bodl. Hebr. MSS." No. 948, 6).

HALFORD, GEORGE EDWARD: Private in the mounted infantry of the City of London Imperial Volunteers; born 1878; died at Karee, near Bloemfontein, May 15, 1900, during the war with the Transvaal (1899–1900). He was educated at University College School, London, and, entering the volunteers, became lance-corporal in the 1st Middlesex (Victoria and St. George's). On the outbreak of war he enlisted among the mounted infantry of the volunteer force, and took part in the fighting round Paardeberg; serving later as one of the escort of the Boer general Cronje as far as the Modder River station on his way to Cape Town and St. Helena. Halford subsequently took part in the great march to Bloemfontein; and its accompanying hardships and privations culminated in an attack of fever to which he succumbed.

BIBLIOGRAPHY: *Jewish Chronicle*, June 30, 1900.

J. G. L.

HALHUL: City in the hill country of Judah, mentioned in the list of cities in the inheritance of that tribe (Josh. xv. 58). Halhul was about four miles to the north of Hebron, and, according to a Jewish tradition (Hottinger, "Cippi Hebr." p. 32), was the burial-place of Gad, David's seer (I Sam. xxii. 5; II Sam. xxiv. 11). It is probably the modern Ḥalḥul.

E. G. H. B. P.

HALI: Town on the boundary of Asher, mentioned in Josh. xix. 25 between Helkath and Beten. The Septuagint gives the name as "Aleph."

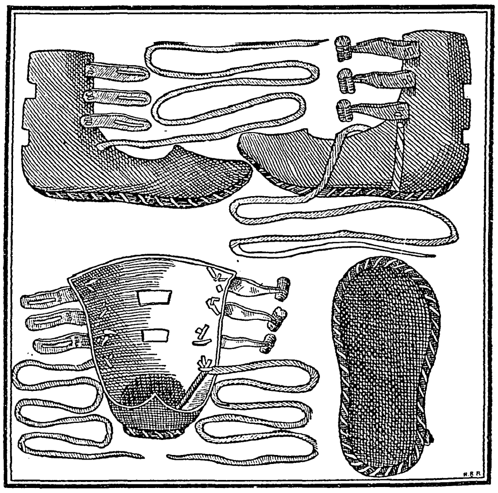
E. G. H. B. P.

ḤALILAH: Biblical term denoting "far be it [from me, thee, etc.]." In Talmudic literature it has two distinct meanings, derived from the two meanings of the root "ḥalal" (to profane; pollute). In some instances its signification is cognate to that given to it in the Bible (Gen. R. xlix. 16; Yalḳ. to Gen. lxxxiii.); in other places it has the meaning of "round about," "in turn," from "ḥalal" (to bore, pierce, make hollow or round), usually in conjunction with the word "ḥazar" (to turn around, begin again; Suk. 55b; Ket. 95a; Zeb. 10a).

In later Hebrew and in the Yiddish language the word is employed in its original meaning, but carries with it greater emphasis than is given to it in the Bible, having the signification of "God forbid," "by no means." It is sometimes strengthened, in colloquial speech, by the addition of the word "we-ḥas" (may He have pity). The expression is very common in Yiddish, and is especially used to ward off the evil effects of an ill-omened utterance.

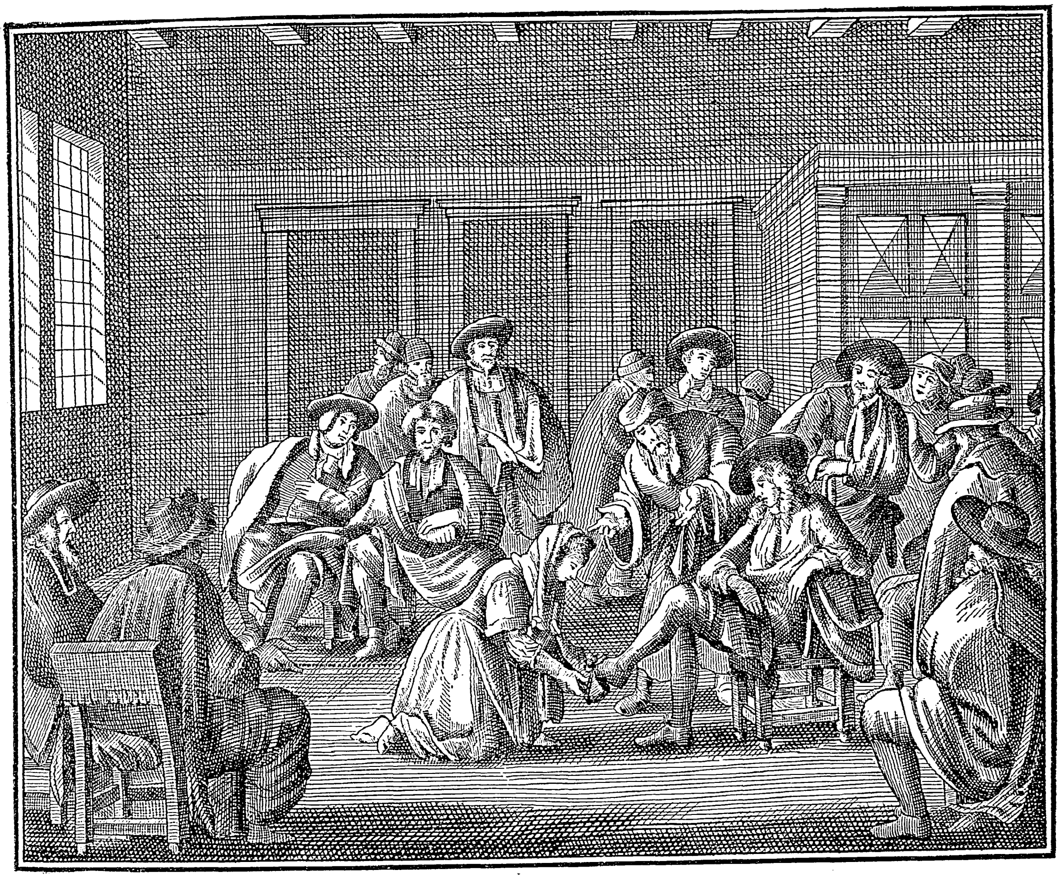
E. C. J. H. G.

ḤALIẒAH ("taking off," "untying"): The ceremony of the taking off of a brother-in-law's shoe by the widow of a brother who has died childless, through which ceremony he is released from the obligation of marrying her, and she becomes free to marry whomever she desires (Deut. xxv. 5–10). It may be noted that only one brother-in-law need perform the ceremony. The old custom of the levirate marriage (Gen. xxxviii. 8) is thus modified in the Deuteronomic code by permitting the surviving brother to refuse to marry his brother's widow, pro-



The Ḥaliẓah Shoe.
(After Bodenschatz, 1748.)

vided he submits to the ceremony of ḥaliẓah (see LEVIRATE; YEBAMAH). In the Talmudic period the tendency against the original custom was intensified by the apprehension that the brother-in-law might desire to marry his brother's widow from other motives than that of "establishing a name unto his brother," and therefore many rabbis of Talmudic as well as of later times preferred ḥaliẓah to actual marriage (Yeb. 39b). Thus the ancient institution of the levirate marriage fell more and more into disuse, so that at present ḥaliẓah is the general rule and marriage the rare exception (Shulḥan 'Aruk, Eben ha-'Ezer, 165, and commentaries). In theory, however, the Biblical law of levirate marriage is still presumed to be in force, and in the ceremonies attending upon ḥaliẓah the presumption is that the brother-in-law brings disgrace upon himself and upon his family by refusing to marry his brother's widow.

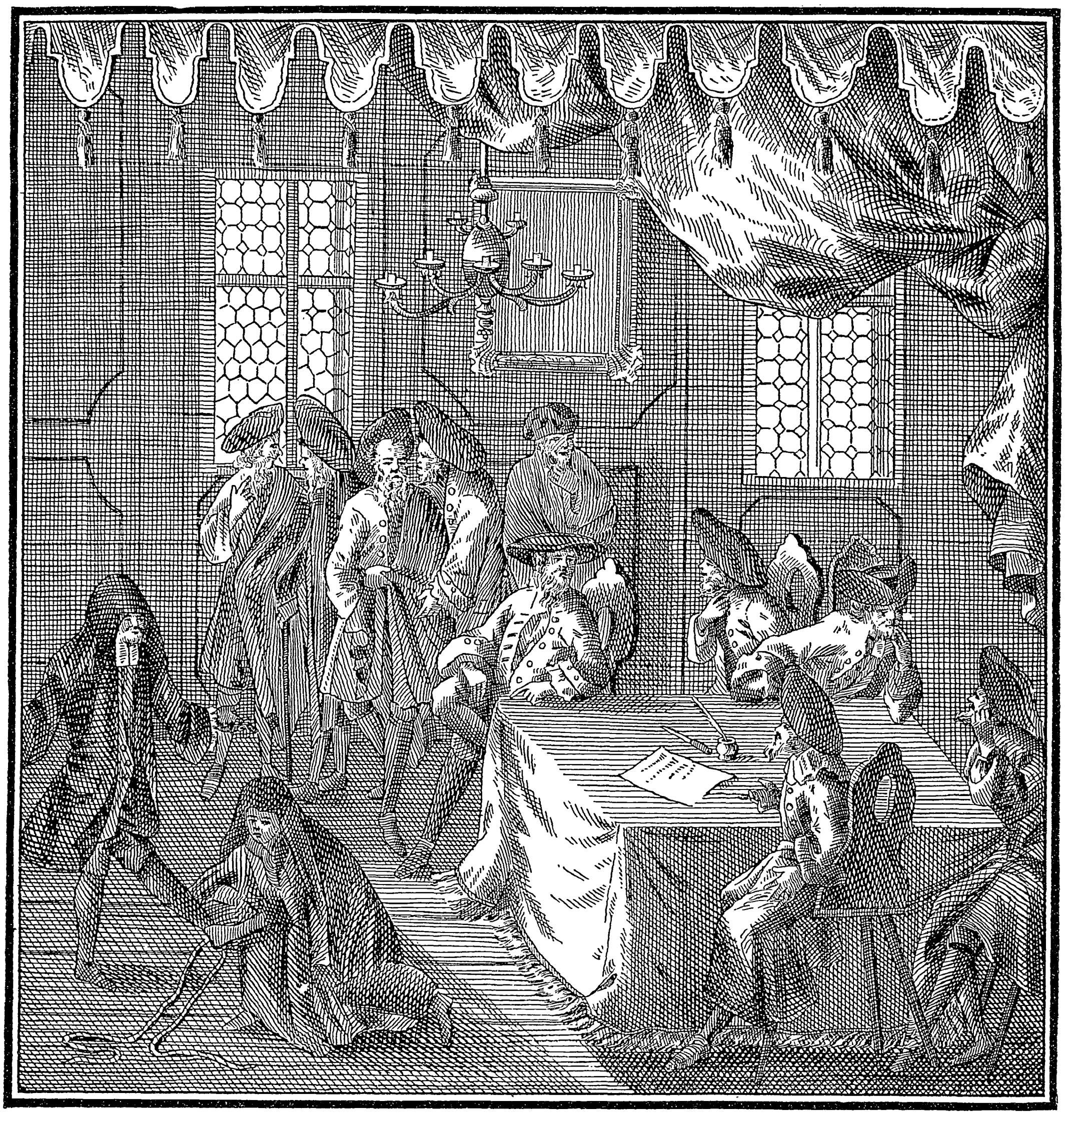


ḤALIẒAH SCENE IN HOLLAND, EARLY EIGHTEENTH CENTURY.
(From a Dutch translation of Leo di Modena's "Riti," Amsterdam, 1725.)

The Ceremony.

The ceremony as described in Deuteronomy (*l.c.*) is very simple. The widow loosens the shoe of the brother-in-law in the presence of the elders of the town, spits upon the ground before him, and pronounces a certain prescribed formula. This ceremony, however, was later elaborated by the Rabbis, making the act more solemn and more public. The Rabbis declared that the ceremony should take place before a court of three, who need not be very learned, but must at least understand Hebrew (Yeb. 101a; Shulḥan 'Aruk, Eben ha-'Ezer, 169, 1). All those who are disqualified from testifying in legal matters (see EVIDENCE) are disqualified also from acting on this board of judges (Yeb. 101a). These three should appoint two others to assist them, and at the service on the evening preceding the day of the ceremony they should appoint a place for its performance, so as to give the matter more publicity. The place chosen is usually the synagogue court or the house of the rabbi, although the ceremony may take place in the house of the widow. All investigations with regard to the parties concerned in the ḥaliẓah should be conducted on the previous day, on which both are instructed in the details of the ceremony, and on which the "yebamah" (widowed sister-in-law) is not allowed to partake of any food. The ḥaliẓah should not be performed in the evening (Yeb. 104a), nor on a Sabbath or a holiday (Beẓah 36b), nor on the eve of a Sabbath or a holiday ("Terumat ha-Deshen," § 227).

On the day set for the ḥaliẓah, immediately after the morning service, when all the people are still in the synagogue, the three judges and their two assistants, who also act as witnesses, repair to the appointed place. The three judges sit on one bench, the two assistants on a bench placed beside it; the "yabam" (brother-in-law) and the yebamah stand between them. Before the ceremony is commenced a thorough public examination is made of the case. The relationship of the parties must be clearly established and their maturity ascertained. If he or she is a minor, a deaf-mute, a mute, or an idiot, or if his foot is crooked or turned to one side, the ḥaliẓah can not be performed. The court must also know whether she is left-handed or whether he is left-footed, and must be convinced that more than ninety-one days have passed since the death of her husband (see Divorce; Levirate). To establish these matters it is not necessary to have legally eligible witnesses. Even those who are otherwise disqualified from testifying may become witnesses. Both the yabam and the yebamah must be made aware of the fact that by this ceremony the widow becomes free to marry whomever she may desire.



Ḥaliẓah Ceremony Among German Jews, Eighteenth Century.
(From Bodenschatz, "Kirchliche Verfassung," 1748.)

After these preliminary details, and after the yabam makes a public declaration that he has not been forced by any outside influence to submit to the ḥaliẓah, but that he does it of his own free will, the actual ceremony commences.

The Ḥaliẓah Shoe.

The shoe, which is usually the property of the community, is brought forth and examined as to its cleanliness and construction, in accordance with the precepts of the law. The ḥaliẓah shoe is made entirely of leather, usually from the skin of a clean animal. It is made of two pieces, the upper part and the sole,

PRINTED HALIZAH BLANK USED BY MODERN AMSTERDAM JEWS.

(In the possession of Prof. G. Deutsch.)

sewed together with leather threads. Three small straps are attached to the front of the shoe, each of which has a knot ("ḥumrata") at the top to fit a hole made on the other side of the shoe. Two white leather straps are attached to either side of the shoe, by which it is fastened to the leg. The yabam must have his right foot, on which the shoe is placed, washed very scrupulously, and after he has strapped it on he must walk four cubits in the presence of the judges. Then the chief of the judges reads the following passage, which the yebamah repeats word for word: "My brother-in-law refuses to raise unto his brother a name in Israel; he will not marry me"; then the yabam is required to repeat the sentence: "I do not wish to take her." He then presses his right foot against the floor while she loosens the straps with her right hand and, holding his leg in her left hand, takes off the shoe and throws it some distance away. Then she places herself in front of the yabam, spits on the floor in front of him, and repeats these words after the presiding judge: "So shall it be done unto that man who will not build up his brother's house, and his name shall be called in Israel, 'the house of him that hath his shoe loosed.'" She repeats the last phrase three times, the assembly reciting it three times after her. Then the yabam returns the shoe to the court, and the judges say: "May it be the will [of God] that Jewish women be no more subjected to ḥaliẓah or to yibbum." As they rise, the chief of the judges says: "Blessed be He who sanctified us with the commandments and statutes of Abraham our father." All the passages recited by the yabam and by the yebamah must be read in Hebrew as they are found in the original in Deuteronomy, and if the parties do not understand Hebrew the passages must be translated for them (Eben ha-'Ezer, 169; "Seder Ḥaliẓah" and commentaries *ad loc.*).

The Formulas.

Various reasons have been offered for the ceremony of loosening the shoe. From the incident related in the Book of Ruth (iv. 7, 8), which certainly refers to this ancient custom, it would seem that the loosening of the shoe was a symbol for a transfer of rights, and had no stigma attached to it. Some of the later rabbis (Jehiel of Paris, for instance) say that the removal of the shoe symbolized the entrance into a state of mourning. From the time when the yabam actually refused to marry his brother's widow and thus perpetuate his name in Israel, his brother was considered dead, and the yebamah, by drawing off his shoe, thus declared to him that from that time on he was a mourner ("Perush Seder Ḥaliẓah," 82; comp. Weill, "La Femme Juive," part iv., ch. v., Paris, 1874).

In order to prevent the yabam from extorting money from the widow who wishes to be released from the shackles of perpetual widowhood, the Rabbis established the institution of the "sheṭar ḥaliẓah" (see Deed). This institution provides that at the marriage of a young couple all the brothers must sign a document in which they pledge themselves to submit to the act of ḥaliẓah without claiming any remuneration in case their brother dies childless ("Naḥalat Shib'ah," p. 22, Warsaw, 1884). If at the time of marriage there was a minor brother, who could not legally sign the document, there was the institution of the "sheṭar biṭḥon ḥaliẓah," established by the Rabbis for such cases, by which the father of the bridegroom promises to pay to the bride a certain sum of money if this son should refuse to submit to the ceremony of ḥaliẓah (*ib.* 23; comp. "Pitḥe Teshubah"; Eben ha-'Ezer, 165, note 10; see Inheritance). Notwithstanding this, cases often occur where brothers-in-law demand money before they will submit to the ceremony.

Sheṭar Ḥaliẓah.

The Reform view, as expressed in various treatises written by the leaders of the movement, and as adopted at the different rabbinical conferences held in Germany and in America, is that the ceremony of ḥaliẓah is not essential to the remarriage of the widow. The Philadelphia conference (1869) resolved that "The precept of levirate marriage and of ḥaliẓah has lost to us all meaning, import, and binding force." The Second Israelitish Synod, held in Augsburg (1871), also passed a resolution to the same effect, with the addition that "For the sake of liberty of conscience, however, no rabbi will refuse, on request of the parties, to conduct the ceremony of ḥaliẓah in a proper form." The great majority of Jews, however, still cling to this ancient institution and observe it in all its details.

ḤALLAH: The priest's share of the dough. The Biblical law in the case of ḥallah (Num. xv. 17–21; comp. Neh. x. 38), as in the case of the heave-offering ("terumah"; Num. xviii. 11), is indefinite. It enjoins the separation of the ḥallah "from the first of your dough," but does not specify how much dough there should be, or what proportion of the dough should go to the priest. The Rabbis, however, made the law more explicit by limiting it. According to their definition the dough, in order to be subject to the law of ḥallah, must consist of at least one omer ($1\frac{4}{5}$ cabs, or enough to fill a vessel 10 x 10 x $3\frac{1}{9}$ inches in size; see Weights and Measures) of flour (Ḥal. ii. 5; comp. 'Eduy. i. 2), the portion due to the priest being $\frac{1}{24}$ of the dough of a private household and $\frac{1}{48}$ of that of a baker ('Eduy. i. 7). The priest's share was taken from the dough and not from the flour (comp. Yer. Ḥal. iii. 1).

Obligation on Owner.

The obligation rested upon the person to whom the dough belonged, and not upon the person who kneaded it. Hence if the dough belonged to a non-Jew, and it was prepared by a Jew, no portion of it went to the priest, even if the non-Jew afterward presented it to the Jew. A Jew, however, was obliged to separate ḥallah from his dough even when it was prepared by a non-Jew (Ḥal. iii. 5). Dough prepared as food for animals was not subject to this obligation, unless it was also partaken of by men (Ḥal. i. 8). The priest's portion was taken only from dough made from the flour of one of these five kinds of cereal: wheat, barley, spelt, oats, and rye (Ḥal. i. 1). Dough made from the flour of rice, millet, or peas was excepted. The dough must have been prepared for the baking of bread, but not for pastry or cakes of any kind (Ḥal. i. 4). If the separation of the ḥallah from the dough had been forgotten, it could be made after the bread was baked (Sifre to Num. xv. 21).

The Biblical expression "when you eat of the bread of the land" clearly indicates that the law of ḥallah applies only to Palestine; but, in order that this institution should not be forgotten in Israel, the Rabbis ordained that it should also be observed beyond Palestine and for all time. Since, however, it can no longer be observed as a priestly offering, because everything now is in a state of impurity, the portion taken from the dough is thrown into the fire and need not be proportionate to the amount of the dough; the obligation can be discharged with the smallest portion (Ḥal. iv. 8–11). When the dough is thrown into the fire a blessing should be pronounced. At present the laws pertaining to the separation of ḥallah are very lenient, both with regard to the separation and with regard to the holiness attached to it (Maimonides, "Yad," Bikkurim, v.-viii.; Shulḥan 'Aruk, Yoreh De'ah, 322–330). See Priestly Code; for ḥallah as sacrifice see Sacrifice; Thank-Offering.

HALLE-ON-THE-SAALE: University town in the Prussian province of Saxony. Jews settled there soon after the city was founded, in the beginning of the twelfth century, the wealthy members of the community having business relations with the nobility in the vicinity. The Jews, who were at first subject to the archiepiscopal court and then to the mayor, lived in a quarter of their own, called the "Judendorf," and had a synagogue and cemetery. Like their coreligionists in other parts of Germany, they were repeatedly plundered and persecuted. It is doubtful whether they suffered much up to the time of the Second Crusade (1145), but they certainly did in 1206, 1261, 1349, and 1492. Several times, as in 1314 and 1446, they had to leave their homes, and in 1493 they were peremptorily expelled by Archbishop Ernst. Two centuries later a new community was formed, the authorities permitting some exiled families from Halberstadt to settle at Halle in 1692. They laid out a cemetery in 1693, and built a synagogue in 1700. They were still subjected to medieval restrictions: they were forbidden to acquire real estate or to attend the university, and their commerce was limited by special laws. The general privilege granted by Frederick William I. of Prussia, dated Feb. 26, 1704, regulated their civic status; yet in 1724 the synagogue and houses of the Halle Jews were demolished during a conflict with the students, and special taxes were laid upon them during the Seven Years' war.

The Westphalian government granted full citizenship to the Jews in a royal decree of 1808, by which the body-tax, the protection money, and other extra taxes were abolished. When Halle came again under Prussian rule, the Jewish community of the town included about 150 persons. By the law of July 23, 1847, separating the Jews into synagogal districts, some neighboring communities were affiliated with the community of Halle, for which a representative constitution was drawn up. The first rabbi, Dr. Fröhlich, was installed in 1860. In 1864 a new cemetery was laid out and a new synagogue was built, to which an organ was added in 1900. The school, attended by 130 children (1903), is under the direction of the local rabbi, Dr. Fessler. There are a ḥebra ḳaddisha, a women's society, a "Rat und Tat" society (for the relief of business men in distress), a B'nai B'rith lodge, etc. Halle has (1903) a population of 156,624, including 1,300 Jews.

D. S. Sa.

——**Typography:** Moses Benjamin Wulff, court Jew at Dessau, obtained in 1694 a privilege from the Prince of Dessau to establish a printing-office in that city. He began to publish books in 1696, but financial difficulties compelled him to abandon the business. One of his typesetters, the proselyte Moses ben Abraham, was called to Halle in 1706 to assist J. H. Michaelis in the printing of the Bible. The citizens protested against the presence among them of a Jew without a royal letter of protection, and the king sustained their objection. Michaelis, however, procured registration at the university for the printer's son Israel Moses, who thereby became exempt from the jurisdiction of the city authorities, and upon the intercession of the university the king permitted the father to reside in Halle so long as the printing of the Bible was in progress, but under the stipulation that he should do no other work. Moses ben Abraham nevertheless printed various other books there: Jacob Reischer's responsa, "Shebut Ya'aḳob" (1709); five Talmudic tractates, which were to form part of an edition of the Babylonian Talmud already planned by his former employer, Moses Benjamin Wulff, who gave him the necessary type and machinery; some Talmudic works; a prayer-book; two descriptions, in Judæo-German, of the conflagrations at Altona and Frankfort-on-the-Main; etc.

Altogether sixteen books were issued by the press of Halle. In 1711, the university, provoked because Moses ben Abraham printed other works than those issued by the university press, complained to the king, but without effect. In 1714, however, the university drew the king's attention to the fact that Moses had printed a prayer-book containing the 'Alenu, which had recently been prohibited by royal order. Moses and Berechiah Berak, the author of the last book printed in Moses' office, were arrested, and further printing was prohibited. In 1717 the university endeavored to obtain a grant for the reopening of the establishment, but the king refused to give it. Of special interest is the fact that

Moses ben Abraham employed exclusively members of his family, and that his daughter Gella, who was an experienced typesetter, wrote little verses in Judæo-German in which she invited people to purchase her father's books.

D.

HALLE, AARON BEN WOLF (called also **Wolfsohn**): Translator and commentator of the Bible; born 1754 at Halle; died at Fürth March 20, 1835; son of Dr. Wolf of Fürth. He was a follower of Moses Mendelssohn; editor (1797) of the periodical "Ha-Meassef" (in which he signed himself א׳ה׳ or וו״ן); and professor at the Königliche Wilhelmsschule at Breslau from 1792 to 1807. He was also one of the founders of the Gesellschaft der Freunde in Berlin (1792). Together with his friend Joel Löwe he edited Mendelssohn's German translation of the Song of Solomon (Berlin, 1788). His translations of Lamentations, Ruth, and Esther were published (Berlin, 1788) with a Hebrew commentary by Joel Löwe and a Hebrew introduction. With Isaac Euchel, Friedländer, and others, he made a translation of the Hafṭarot (*ib.* 1790); he also translated Kings (Breslau, 1800); Job, which he provided with a Hebrew commentary (Prague, 1791; Vienna, 1817-1818); and the first two chapters of Habakkuk ("Jedidja," ii. 107). He further published: "Abtalion," a Hebrew primer, containing the grammatical elements, with a preface by David Friedländer (Berlin, 1790, and frequently reprinted); "Exegetisch-Kritische Anmerkungen über die Vision Habakuks" (Breslau, 1806); "Jeschurun," a refutation of the newly made charges against Judaism (edited, with Gotthold Salomon, Breslau, 1804); "Leichtsinn und Frömmelei," a family scene in three acts (Amsterdam, 1796-98).

S. M. K.

HALLEL (lit. "praise"): The name given in the Talmud and in rabbinical writings to Ps. cxiii.-cxviii. considered as a single composition, which they undoubtedly are. They are more distinctively known as the "Hallel of Egypt," as distinguished from Ps. cxxxvi., the "Great Hallel," and from Ps. cxlvi.-cxlviii. (in a baraita apparently designated as a kind of Hallel: Shab. 118b).

Late Origin.

These psalms were evidently written to be sung publicly on some day of thanksgiving, as appears from the verse: "This is the day which the Lord hath made; we will rejoice and be glad in it" (Ps. cxviii. 24). The Aramaic word "tagmulohi" would seem to indicate a late date; the thrice-repeated cry "I shall cut them down," with "the Lord hath chastened me sore," points to a bloody war, at first unsuccessful; the words "open to me the gates of righteousness" point to the recovery of the Temple: all these together make it probable that the "Hallel" psalms were written for the Feast of Ḥanukkah, during which they are still recited every morning. Hallel is also recited on the night of the Passover as part of the family service, as it was in the days of the Temple (Pes. x. 4); on the first day of the Feast of Unleavened Bread; on Pentecost; and on the Feast of Booths (see Suk. iv. 1). Of course, where the festival days are doubled, one night and three days are added (Ta'an. 28b), making (aside from the nights) twenty-one days on which Hallel is deemed obligatory. But a Palestinian of the first generation after the Mishnah speaks (Ber. 14a) of certain days on which the entire Hallel is not recited, and on which the recital is of lesser sanctity. These days are: (1) the days of Unleavened Bread after the first, or first and second; (2) all New-Moon days other than the New Moon of Tishri, which is kept as the Day of Memorial. On these days Ps. cxv. 1-11 and cxviii. 1-11 are omitted to show the later rise and the lesser sanctity of the custom of saying Hallel upon them.

Benediction Preceding.

The early sages boldly undertook to give this custom the force of Scriptural command by prefixing the benediction, "Blessed . . . who has sanctified us by His commandments and commanded us to read the Hallel." This, at least in the German ritual, is the form used on all occasions, while with the Sephardim it is used only before the incomplete "half-Hallel"; on the days of the "full Hallel" they bless Him "who commanded us to complete the Hallel." These benedictions were in general use during the eleventh and twelfth centuries, and though both Rashi and Maimonides ("Yad," Megillah, iii. 7), the greatest authorities on Jewish law, protested against the use of such a benediction before half-Hallel as unauthorized, on the ground that the recital of Hallel on New Moons, etc., was not even a commandment of the scribes, the benediction has kept its place in the prayer-book.

Ps. cxviii. opens and ends with a much older verse: "O give thanks unto the Lord; for he is good: for his mercy endureth for ever." This verse dates back not only to the days of Ezra, but to the days of Jeremiah and to Solomon's Temple. It was well known even to those otherwise wholly ignorant of the sacred tongue. Hence it grew to be the custom when Hallel was recited in public for the people to repeat after the leader only the first verse, even when he gave out the second, third, and fourth —"Let the house of Israel," etc., "Let the house of Aaron," etc., "Let them now that fear," etc.—and this usage is still in force (Suk. 38b).

"His Mercy Endureth for Ever."

Beginning with Ps. cxviii. 20, the reader gives out every verse to the end of the chapter, the congregation repeating it after him; but in countries where the Polish minhag is used every one says each of these verses twice. The verse "We beseech thee, O Lord, save now," etc. (Ps. cxviii. 25, Hebr.), is cut up into its hemistichs, each of which is given out separately.

On Sukkot the palm-branch is shaken in all directions while the first hemistich is chanted ("Hoshi'ahna").

Hallel is closed with this benediction: "O Lord, our God, may all Thy works praise Thee, and Thy saints who do Thy will, and all Thy people Israel, in glad song, bless and honor . . . Thy glorious name; for to thank Thee is proper, and pleasant is it to play melodies to Thy glorious name, for from everlasting to everlasting Thou art God: Blessed be Thou, O Lord, the King praised in hymns!" For the Hallel in the Passover night service see HAGGADAH.

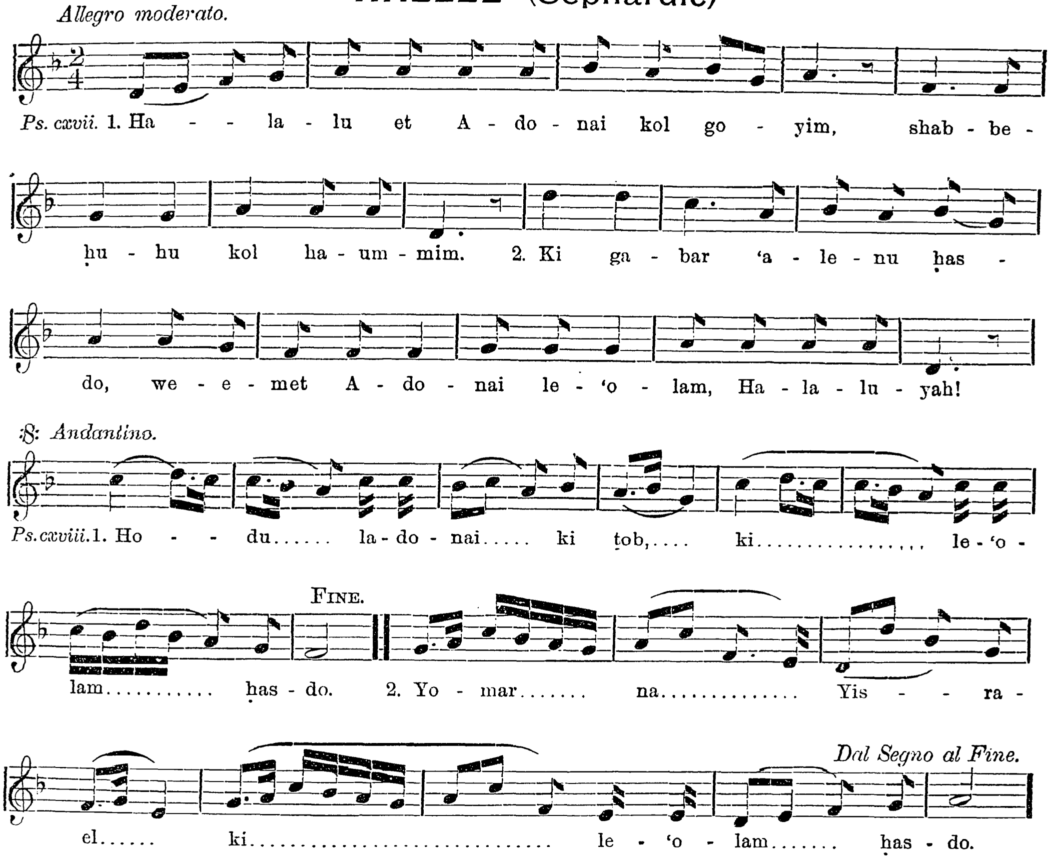
A. L. N. D.

All trace is lost of the chants to which the Hallel was intoned before a comparatively modern date. In consequence there is no general tradition: every composer of synagogue music offers his own setting. In the medieval period the folk-song of the day was reproduced in the Hallel, where the contemporary expression of joyousness always supplanted the older cantillatory intonations, as Ps. cxvii. and cxviii., at least, were approached. Many such melodies, often of marked beauty, have been preserved in the synagogues of the Sephardic ritual. A rich store of them will be found in the collections of De Sola and Aguilar ("Ancient Melodies of the Liturgy of the Spanish and Portuguese Jews"), and Consolo ("Libro dei Canti d'Israel"). Typical, and of particular interest because of their use in many Ashkenazic and Reform synagogues, are the two well-contrasted old melodies here presented (comp. De Sola and Aguilar, "Ancient Melodies," Nos. 42, 43; Salaman and Verrinder, "Music of the West London Synagogue of British Jews," i.; Cohen and Davis, "Voice of Prayer and Praise," Nos. 62, 63; Pauer and Cohen, "Traditional Hebrew Melodies," No. 12). The first of these is wide-spread among the northern Jews as a tune for table-hymns (see ZEMIROT).

Musical Setting.

Spanish Tunes.

HALLEL (Sephardic)



Allegro moderato.
Ps. cxvii. 1. Ha - - la - lu et A - do - nai kol go - yim, shab - be - hu - hu kol ha - um - mim. 2. Ki ga - bar 'a - le - nu has - do, we - e - met A - do - nai le - 'o - lam, Ha - la - lu - yah!
Andantino.
Ps. cxviii. 1. Ho - - du...... la - do - nai..... ki tob,.... ki................ le - 'o - lam........... has - do.
Fine.
2. Yo - mar....... na.............. Yis - - ra - el...... ki............................. le - 'o - lam....... has - do.
Dal Segno al Fine.

The earlier part of the Hallel was rarely chanted at length, being usually read through in a rapid undertone. Where the chant took a definite form it was simple in outline and usually plaintive in character. A good traditional example is given in Cohen and Davis, "Voice of Prayer and Praise" (No. 57); it is reminiscent of the "Tonus Peregrinus" of the Church, the irregular chant which, utilized principally for Ps. cxiv., is believed to be of French origin and to date from about the ninth century.

The chief hymn-tune of each festival has now become indissolubly associated with the first verses of Ps. cxviii., and is often finely worked into the choral setting of the preceding passages, as in the deservedly esteemed Hallel settings by J. L. Mombach (comp. Cohen and Davis, *l.c.* Nos. 64 [Ḥanukkah], 147 [Passover], 153 and 154 [Pentecost]).

In the case of the Feast of Tabernacles the wa-

Festival Themes. ving of the palm-branch (see LULAB) is the most characteristic feature of the celebration of the festival; and consequently the chant associated with the ceremony has been taken as the "representative theme" for the festival. As such it is employed for the response MI KAMOKA (Ex. xv. 11, 18) in the evening service, which is also chanted to the "representative theme," according to the following general scheme for days on which the Hallel is sung:

New Moon (no general tradition).
Feast of Dedication (MA'OZ ẒUR).
Festival of Passover (ADDIR HU).
Festival of Pentecost (AḲDAMUT).
Festival of Tabernacles (lulab chant).

The last has been handed down in two forms, a major and a minor, and exhibits traces of the intervals smaller than a semitone, which, with its mystical character, resulting from unenunciated vocalization between the syllables of the text, seem to point back to an original framework derived from the Orient. In most incongruous juxtaposition, several poor, jingling tunes are, in the North-German tradition, often associated with the majestic old theme (comp. Marksohn and Wolf, "Auswahl Alter Hebräischen Synagogal-Melodien," No. 3, and note; Baer, "Ba'al Tefillah," No. 816a, b, c, d). In the theme itself may be detected analogies with an old Provençal strain utilized by Bizet in his music to "L'Arlésienne," and with the melodies quoted in JEW. ENCYC. *s.v.* ASHRE HA-'AM and GESHEM.

Among eminent modern composers, J. Meyerbeer and F. Halévy have contributed settings for the Hallel and other texts to S. Naumbourg's "Zemirot Israel," Paris, 1863. Halévy's Hallel has become so familiar to French Jews that it has furnished main themes for a set of quadrilles founded by Henri Cohen on festival melodies, and entitled "Zemannim le-Sason" ("Le Temps de Rejouissances," Paris, 1883). Similarly Mombach's fine adaptation of the Aḳdamut for the Pentecost Hallel found favor in England as a pianoforte duet.

A. F. L. C.

HALLELUIAH (הַלְלוּ־יָהּ or הַלְלוּיָהּ, the dagesh in the first ל being dropped according to the Masoretic rule by reason of the shewa and the second ל following it; 'Αλληλούϊα in the Septuagint): A doxological expression signifying "Praise ye the Lord," the sacred name being shortened to its first two letters. Except in Ps. cxxxv. 3 it is found only at the beginnings or ends of psalms; namely, civ., cv., end; cvi., beginning and end; cxiii., beginning; cxv., cxvi., cxvii., end; cxxxv., cxlvi., cxlvii., cxlviii., cxlix., cl., beginning and end. In some of these psalms, *e.g.*, cxiii., cxlviii., cl., this opening phrase is developed in the words which follow it; in others, such as cxi. and cxii., it does not run naturally into the psalm, and seems to have been prefixed by the authorities of the Temple to fit the psalm into public worship. The Hebrew words have been retained in the Vulgate, and through it have come not only into Christian psalteries, but also into modern hymns; the English versions, however (both A. V. and R. V.), render them always as "Praise ye the Lord."

E. G. H. L. N. D.

HALPERINE-KAMINSKY, ELY: Russian writer; born at Vassilkof April 9, 1858. After having completed his studies at the University of Odessa he went (1880) to Paris, where he has since resided. The French secretaries of state and of commerce have on several occasions drawn upon his knowledge of French and Russian affairs, and entrusted him with important commissions, which he has very successfully fulfilled. Since 1883 he has been editor of the "Franco-Russe," a Parisian publication printed in both French and Russian. In 1883-85 he was secretary of the "Médecine Populaire," "Science Populaire," and "Science Pour Tous."

Halperine-Kaminsky has translated into French the works of many of the important Russian authors, such as Pushkin, Gogol, Tolstoi, Turgenef, Dostojevski, Nekrassov, Boborykin, and Stchedrin; he is also a regular contributor to the foremost French and Russian journals.

Among his works are the following: "Les Mammifères Ovipares" (1885); "Pushkin et Sa Correspondance" (1887); "Le Grand-Duc Constantin, Poète" (1892); "Chez Tolstoi" (1898-1900).

H. R. F. T. H.

HALPHEN, FERNAND: French composer; born at Paris Feb. 18, 1872; pupil of J. Massenet, G. Fauré, and André Gedalge. In 1895 he won the first "accessit" for fugue at the Conservatoire, and in 1896 the second "Grand Prix de Rome" for his cantata "Mélusine." His chief works are: a Sicilian, a suite for orchestra, 1896; a symphony, Monte Carlo, 1897; a sonata for piano and violin, 1899; "Le Cor Fleuri," lyric opera in one act, based on the play by the late Ephraim Micaël. He has also composed several songs, and pieces for the piano, violin, horn, etc.

S. A. A. G.

HALPHEN, GEORGES-HENRI: French army officer and mathematician; born at Rouen Oct. 30, 1844; died at Versailles May 21, 1889. He studied at the Ecole Polytechnique, and afterward at the Ecole de Metz, becoming lieutenant in 1866 and captain in 1870. He was decorated on the battle-field of Pont-Noyelles, and fought also at Bapaume and Saint-Quentin. In 1873 Halphen became tutor at the Ecole Polytechnique, and in 1880 the Académie des Sciences of the French Institute awarded him the chief mathematical prize for his "Mémoire sur la Reduction des Equations Différentielles Linéaires aux Formes Intégrales." In 1881 his work on the classification of curves ("Journal de l'Ecole Polytechnique," lvii. 1) was crowned by the Academy of Berlin. In 1886 Halphen was made a member of the Académie des Sciences. He returned to active service in 1887 as major. Of Halphen's many mathematical treatises may be mentioned: "Sur la Théorie des Points Singuliers des Courbes"; "Sur les Congruences"; "Sur les Equations Différentielles"; "Sur les Courbes Gauches, les Fonctions Elliptiques," etc. He devoted the last three years of his life to his "Traité des Fonctions Elliptiques et de Leurs Applications" (Paris, 1886-89; the third volume posthumous). A full list of his works is given in the "Journal des Mathématiques," 1889.

ḤALUḲḲAH (lit. "division," "distribution"): An organized collection of funds for distribution among the indigent Jews in the Holy Land, and for the aid of those who, moved by religious motives, desire to journey thither. Sympathizing coreligionists of almost every congregation in the "outland" ("ḥuẓ la-areẓ") form a standing committee, presided over by an officer variously called "gabbai," "amarkol," or "paḳid" (chief, governor, or appointee), under whose supervision collections in his city or district are made, the money being remitted by him semiannually to the proper "menahalim" (leaders) in Jerusalem, who distribute it among the needy—learned, elderly men, the destitute, and widows and orphans taking precedence.

Origin.

The history of the haluḳḳah may perhaps be said to date back to the earliest rabbinical periods, when the academies in the Holy Land were supported mainly by voluntary contributions from congregations elsewhere, and by the fees received for decisions in Jewish civil suits and for the performance of religious offices. In the Middle Ages R. Jehiel (1257) transferred his yeshibah from Paris to Jerusalem. He was accompanied by his three hundred disciples, consisting of French and English Jews who had been maltreated in their native countries. But Jehiel and his pupils soon found themselves without means of support. Consequently he sent R. Jacob of Paris as a representative "meshullaḥ" (messenger) to solicit relief in Palestine and Turkey. R. Jacob appears to have been the first Palestinian meshullaḥ recorded, although the term "messenger of Zion" ("sheliaḥ Ẓiy-you") was applied in the period of the Amoraim (4th cent.) to R. Ḥama b. Ada (Beẓah 25b), who traveled between Babylon and Palestine delivering decisions and messages, and probably soliciting relief. Another early feature throwing light on the ḥaluḳḳah is the charity-box, the introduction of which, though attributed to R. Meïr Ba'al ha-Nes ("the miracle-worker"), was due to meshullaḥim, who toward the end of the seventeenth century used it for the collection of the ḥaluḳḳah fund; such boxes are placed in Orthodox Jewish dwellings and synagogues all the world over, and are stated to exceed 250,000 in number at the present time, all bearing the name of R. Meïr Ba'al ha-Nes. This R. Meïr, contrary to the popular notion, is not R. Meïr the Tanna, but R. Meïr ha-Ḳaẓin ("the chief"), whom R. Jacob of Paris, in describing his tomb at Tiberias, called "Ba'al ha-Nes."

Under Egyptian rule the Jews of Palestine increased both in number and in prosperity. The ḥaluḳḳah contributions until the fifteenth century came mostly from Turkey, Egypt, and other countries in Asia and Africa. In the famine of 1441 the Jewish community of Jerusalem, probably for the first time, sent a meshullaḥ to European countries; the meshullaḥ's name was 'Esrim we-Arba'ah ("twenty-four")—a surname; not, as Grätz supposes, a title of honor indicating his knowledge of the twenty-four books of the Bible. The meshullaḥ was directed to go first to Constantinople, to obtain there the necessary credentials from the central committee headed by Moses Capsali, who, however, had to withhold his sanction, the war between Turkey and the Egyptian Mamelukes, who ruled Palestine, making the latter a belligerent state, the exportation of money to which was prohibited.

Influence of Joseph Caro.

Under the Ottomans in the sixteenth century the Jews of Palestine were settled mostly in Galilee, toward which there set a stream of exiles from Spain; and the ḥaluḳḳah contributions appear to have come in regularly without the intervention of meshullaḥim. About this time Joseph Caro of Safed established a precedent in Jewish charity-law, based on the verse, "If there be among you a poor man of one of thy brethren within any of thy gates in thy land," etc. (Deut. xv. 7). According to his interpretation, "thy gates" refers to the city of Jerusalem, and "thy land" to the Holy Land (Palestine), which, therefore, have a prior claim upon Jewish charity ("Bet Yosef" to Ṭur Yoreh De'ah, 251, 3); formerly it had been held that the passage referred to any residential city or adopted country (Sifre, Deut. 116 [ed. Friedmann, p. 98]). The reputation of Safed as the home of famous Talmudists and cabalists, including Caro and Luria, brought abundant support from abroad for scholars in the Holy Land.

The Taḳḳanah of 1625.

To provide for a permanent increase of the ḥaluḳḳah, the communities of Palestine, early in the seventeenth century, adopted an ordinance ("taḳḳanah") invalidating any will not made in the presence of the parnas; this had the effect of reminding testators of their duty toward the community of Jerusalem (Luncz, "Jerusalem," ii. 87). Another taḳḳanah was afterward issued which practically amounted to a confiscation, for the benefit of the ḥaluḳḳah, of the chattels, money, and accounts of a deceased Jew who left no resident heirs. There were many evasions, and in several instances the well-to-do, before taking up their residence in the Holy Land, stipulated a certain sum which was to be paid to the community upon their death in place of the fulfilment of the decree. This so-called "inheritance tax" was strenuously opposed by the richer classes, and it was spasmodically abolished and reenacted. The income from this tax, however, never amounted to one-third of the ḥaluḳḳah, and to supply the deficiency there was no alternative but to resort to the meshullaḥim, who as a result became so numerous, and such frequent visitors in the European congregations, that they were regarded as wandering tramps, a nuisance and a reproach.

Moses Ḥagiz, a typical meshullaḥ, in his "Sefat Emet" (Amsterdam, 1697), deplores the low estimate of the meshullaḥ entertained by the general public, and in reply to a Spanish contributor, (1) shows why the Holy Land is religiously superior to other countries, (2) urges the duty of settling there even prior to the fulfilment of the prophecies, (3) speaks of the calamities and tribulations of the Jews in Jerusalem, and (4) explains why the funds contributed in all parts of the world are insufficient. Referring to the meshullaḥim, he says: "They are sent abroad to acquaint our people in foreign countries of Jewish conditions in the Holy Land, and to enlist sympathy and support for the standard-bearers of the Tabernacle of God, who keep alive Jewish hopes and inspirations in the Land of Israel." He points out that the fact that "Christians will remit thousands of pounds annually for the maintenance of a Christian settlement is a challenge to the Jews who neglect to provide for the beloved sons of Zion."

Ḥagiz estimated the appropriation of the ḥaluḳḳah for 1,500 souls in Palestine, including 1,000 in Jerusalem, to be 10,000 lire. Toward this sum there was an income from communal taxes of 2,000 lire; from legacies 2,000 lire; collected by meshullaḥim 2,000 lire; leaving a deficiency of 4,000 lire; Jewish indebtedness already amounted to sixty thousand "shekalim" (florins?).

Ḥagiz was aware of the fact that the meshullaḥim were not liked, that they were abused no less than were the "ḥakamim" in Jerusalem, who were suspected and accused of "leading a luxurious life and spending the funds of the ḥaluḳḳah in drinking coffee and smoking tobacco." Nevertheless he was ready to state under oath that the ḥaluḳḳah barely supplied one-third of their actual necessaries of life. The main sources of the ḥaluḳḳah at that time in Europe were London, Amsterdam, Venice, and Leghorn.

Borrowing from Gentiles.

To meet the drain on the ḥaluḳḳah, the Jerusalem community borrowed from Gentiles at an enormous rate of interest, up to 45 per cent per annum, mortgaging their communal property; and when they failed to meet the obligations at maturity, the leaders of the congregation were imprisoned and held for ransom. R. David Melammed, a meshullaḥ of Hebron, rendered a decision to the effect that inasmuch as the representative Jews of Hebron were held under bail for taxes and other indebtedness of the community, they came under the category of " captives held for ransom," whose claims, therefore, took precedence over all other charitable matters having a special fund for disposal, and were not a perversion of charity (his responsa, in Ezekiel Silva's "Mayim Ḥayyim," Amsterdam, 1718).

Contracts with the Meshullaḥ.

Till the middle of the eighteenth century the management of the ḥaluḳḳah was entirely in the hands of the Sephardim, who were classed as (1) rich or dependent on their own relatives, (2) working men and employees, and (3) ḥakamim and scholars of the yeshibot. The third class took one-third of the ḥaluḳḳah; one-third was appropriated for poor widows, orphans, and for temporary relief to helpless men; one-third was used in defraying the communal expenses. The distribution was made semiannually, before the Passover and the New-Year festivals. The meshullaḥim kept up their work in the Levant, in Italy, Germany, France, Holland, and England, with occasional visits to Russia, Poland, and America. A regular legal contract was drawn up between the community and the meshullaḥ. The community undertook to provide for the meshullaḥ's family during his absence and to advance his initial traveling expenses. The meshullaḥ on his part undertook to devote his attention and best endeavors to arousing the people by lectures, to urging the gabbaim to increase their remittances, and to opening up new sources of income. The commission was usually fixed at 45 per cent on all contributions coming direct from him or that were due to his influence, and 10 per cent on all income from his territory during the ten years following his return. It generally took the meshullaḥ from three to ten years or longer to complete his mission. In an important city he sometimes accepted a rabbinate or the position of a "maggid"-preacher, and held it for some time. Occasionally he undertook the promotion of a business enterprise. He was also useful as a news-gatherer before newspapers came into existence. In short, the services of the average old-style meshullaḥim were distinctly valuable, in spite of the shortcomings of some among them who thought chiefly of personal gain, and cared little for the cause they represented. Pseudo-meshullaḥim, who represented no community, but traveled on their own behalf, also contributed largely to bring discredit upon the office and duty they had fraudulently assumed.

Among the early meshullaḥim to America were R. Moses Malki of Safed, who visited the Newport congregation in 1759, and R. Samuel Cohen of Jerusalem (1775). An interesting meshullaḥ was Raphael Ḥayyim Isaac Carregal of Hebron, who was in Newport in 1771 and 1773, after visiting the West Indies (Curaçao, 1764). These meshullaḥim are mentioned by Ezra Stiles in his Diary ("Publications Am. Jew. Hist. Soc." No. 10, pp. 18–32). Carregal refers to David Melammed as his teacher.

Among the Ashkenazim.

The Ashkenazim at that time formed but a small minority of the Jewish settlers in Palestine. The efforts of Jehiel of Paris to maintain a yeshibah in Palestine in the thirteenth century, as already observed, had failed; and a second attempt, by R. Judah ha-Ḥasid of Siedlce, Poland, who with many followers emigrated to the Holy Land in 1701, was likewise futile. Not till the middle of the eighteenth century was the presence of the Ashkenazim felt. They came from the ranks of the Ḥasidim in Poland and South Russia; using the same liturgy and ritual as the Sephardim, they were easily assimilated with them, and received a share of the ḥaluḳḳah. The share, however, they asserted, was not in proportion to their numbers. They complained to the Ashkenazic gabbaim in Europe, and finally seceded from the Sephardim. With the aid of the Council of the Four Lands, they established headquarters for their separate ḥaluḳḳah at Lublin, Poland. Later, R. Abraham Gershon Kutawer, leader of the Ḥasidim in Hebron, sent meshullaḥim to Metz and diverted the ḥaluḳḳah revenue from that source to his own section of the Holy Land. In a letter of Aryeh Judah Meisels of Apta, written in Jerusalem, the Ashkenazim accused the Sephardim of bad faith, declaring that, in spite of assurances to the contrary, the Ashkenazim were discriminated against and compelled to rely entirely upon their own resources (Luncz, "Jerusalem," ii. 148–157).

While the Ashkenazim at Jerusalem and Hebron separated from the Sephardim and managed their own ḥaluḳḳah, the Ashkenazim at Safed were still united with the Sephardim and drew from the general ḥaluḳḳah, the headquarters for which were in Constantinople. A letter dated 1778, and written from Safed by Israel Perez Polotzker to the gabbaim of Vitebsk, Russia, states that their meshullaḥim came to the house of Baruch Ananio, the head gabbai of the central committee at Constantinople, and received 3,000 lire. Out of this sum they paid 2,000 lire to the pasha for taxes and 250 lire for expenses of the meshullaḥim, the balance (750 lire) going to the ḥaluḳḳah (MS. in New York Public Library). In the credentials issued to R. Abraham ha-Kohen of Lask, a Jerusalem meshullaḥ sent to Poland in 1783, the Sephardic central committee writes that Ashkenazim in the Holy Land were taken care of and given a proportionate share of the ḥaluḳḳah (Schwarz, "Tebu'at ha-Areẓ").

At Tiberias.

A section of the Ḥasidim from South Russia settled in Tiberias. Their leader was R. Menahem Mendel of Vitebsk, who sent a meshullaḥ regularly to Poland and Volhynia, and in a businesslike manner rendered receipts for past donations signed by the leaders in Tiberias, with requests for further assistance. Contributions poured in, and the only difficulty experienced by the meshullaḥ was the safe delivery of the funds at Tiberias and Jerusalem, as the roads via Constantinople were infested by bands of robbers. He had to wait sometimes for three or four months for a protected vessel sailing from Constantinople to Haifa or Acre; and thence a safe-conduct with armed soldiers to Tiberias and Jerusalem was necessary. Meanwhile, the ḥaluḳḳah being exhausted, the Ḥasidim had to borrow money in anticipation of the next remittances. The requirements of the ḥaluḳḳah at that time exceeded 700 ducats ("Ḥibat ha-Areẓ," p. 61).

A systematic propaganda for the ḥaluḳḳah was introduced by R. Abraham Kalisker, leader of the Ḥasidim in Tiberias. He secured the assistance of R. Mordecai of Niesvizh, who issued a proclamation, dated "22 Adar I., 5556 [1796]," and addressed to all Jews of Poland, imploring every male and female, adult and minor, whether living in cities or villages, to subscribe a fixed sum every week for the support of their countrymen who had settled in the Holy Land. The amount was to be paid quarterly, in addition to special donations at weddings, circumcisions, and other religious rejoicings. This proclamation was approved by other rabbis in Poland, and the result was a substantial increase in the ḥaluḳḳah. Nowadays the ḥaluḳḳah is distributed among the four cities Jerusalem, Hebron, Tiberias, and Safed.

The Perushim-Ashkenazim, coming from Lithuania, Russia, were then few in number and without organization in the Holy Land, and consequently were without an adequate share in the ḥaluḳḳah. R. Menahem Mendel and R. Israel, both of Shklov, together with twenty other Perushim (disciples of R. Elijah of Wilna) left Russia and settled in Safed in 1801. R. Israel, in order to establish a permanent income for the ḥaluḳḳah of the Perushim congregation, constituted himself the meshullaḥ for Lithuania and White Russia; he succeeded in his task (introduction to his "Pe'at ha-Shulḥan," Safed, 1837). The ḥaluḳḳah of the Perushim was increased by R. Aryeh Löb Katzenellenbogen of Brest-Litovsk and by Ḥayyim of Volozhin, who issued proclamations to the effect that the contributions put in the boxes bearing the name of R. Meïr Ba'al ha-Nes should not be used for candles in the synagogues, as was the custom in some cases, nor for any but the specific purpose of supporting the poor in the Holy Land. This movement tended to transfer all property rights in the Ba'al ha-Nes boxes to the ḥaluḳḳah fund. The headquarters for the ḥaluḳḳah of the Perushim were then removed from Shklov to Wilna. Similarly the headquarters of the rest of the Continent were removed from Metz to Amsterdam, where the central committee combined the ḥaluḳḳah interests of the Sephardim and Perushim (Luncz, "Jerusalem," ii. 148–157).

After 1850 the Ashkenazic congregations, or "kolelim," at Jerusalem began to split into various sections, beginning with the Hollandish-German kolel, followed by the Warsaw and the Hungarian kolelim, until now there exist no less than twenty-five kolelim in Jerusalem. The motive for each separation has invariably been self-interest, to enlarge the ḥaluḳḳah portion of that particular kolel whose members are few in comparison with the contributions derived from their native land. It can not be denied, however, that the splitting up of the Ashkenazic community into many small congregation-groups has stimulated the tendency to home rule and aroused the spirit of emulation, and that the result has been greater economy, a more effective and energetic management, and a general increase of the ḥaluḳḳah.

Some kolelim give certain of their beneficiaries an advance share over other members ("ḳedimah"), the privileged ones being men of learning and distinction. Children are generally allowed half a share. The share of an individual is sometimes mortgaged for several years in advance, the beneficiary assigning his right through a regular form of contract called "shi'bud," which is discounted at from 5 to 10 per cent, according to the reliability of the kolel which recognizes the assignment.

The Wa'ad ha-Kelali.

The separation of the kolelim, each working for itself and managed by its own committee in Jerusalem, caused no little anxiety to those who had no kolel to care for them, as, for instance, those from foreign countries without a representative congregation in Palestine. The secession also gave the community much concern regarding general expenses, such as the salaries of the rabbis, the Turkish military taxes, and the usual bakshish to the Turkish officials. For these purposes the central committee, or "wa'ad ha-kelali," was organized in 1866 in Jerusalem by Rabbi Meïr Auerbach, who was succeeded by R. Samuel Salant in 1878. This committee represented the general interests of all the Ashkenazim in Palestine, while the Sephardim continued the management of their affairs under the guidance of the ḥakam bashi of Jerusalem.

The wa'ad ha-kelali employed special meshullaḥim, whom they sent to countries without a representative kolel in Palestine. This plan resulted in opening up many new sources for the ḥaluḳḳah in South Africa, Australia, England, and particularly in America. Thus the meshullaḥim of the Sephardim found themselves in direct competition with the meshullaḥim of the Ashkenazim. The friction between the two sections increased their expenses and tended to lessen the revenue. In 1871 the Sephardim and Ashkenazim compromised on the following basis of settlement regarding the American contributions: (1) Jerusalem to be the point for all remittances; (2) the Ashkenazim in Jerusalem to receive from the ḥaluḳḳah fund an advance of $500 per annum; (3) 15 per cent of the remainder to be advanced for the poor of both parties in Jerusalem; (4) the remainder to be divided: 60 per cent for both parties in Jerusalem and Hebron, and 40 per cent to Safed and Tiberias. The distribution by the central committee, irrespective of the kolel affiliations, is known as the "minor ḥaluḳḳah" ("ḥaluḳḳah ḳeṭannah"), and averages about one dollar per person.

Publication of Accounts.

R. Joseph Riwlin, as secretary of the central committee, reorganized it in 1885, introduced a modern system of bookkeeping, and issued printed reports of the receipts and expenditures of the ḥaluḳḳah, thus coming into touch with the gabbaim and the contributors. These reports, known as "shemesh ẓedaḳah" (the sun of righteousness), contain items of history relative to almost every country in the world. At the time of the earliest reports the contributions intended for division between the Sephardim and the Ashkenazim were usually sent to Nathan Marcus Adler, chief rabbi of England, who forwarded the proper amounts to the ḥakam bashi, Raphael Meïr Fanijil, and R. Samuel Salant, in Jerusalem. The North-American Relief Society for the indigent Jews of Jerusalem, whose

CONTRACT BETWEEN A SHELIAH AND THE SEPHARDIC CONGREGATION AT JERUSALEM.

(In the possession of J. D. Eisenstein, New York.)

members were Portuguese and German Jews, sent about $750 per annum through the chief rabbi of England, with instructions to divide the amount between the two parties.

American Contributions.

Contributions intended for Ashkenazim only were sent to R. Samuel Salant. The New York Society for the Relief of the Poor in Palestine forwarded to him about $1,250 yearly. Baltimore was the next best center, sending about $500 yearly through the congregations Chizuk Emoonah and Shearith Israel. Altogether the American contributions to the ḥaluḳḳah did not exceed $5,000 per annum up to 1885. But through the energetic work of Riwlin the increase of the Ashkenazic ḥaluḳḳah from America was soon apparent, and was largely due to the reports and the activity of the meshullaḥim, who covered every state from Maine to California. The agreement of 1871 with the Sephardim had become obsolete by that time, and to strengthen their position in America the Sephardim, following the example of their opponents, began to issue, in 1891, similar reports, entitled "Ha-Moreh li-Ẓedaḳah" (The Guide for Charity). The Sephardim, tired of opposing the Ashkenazim in North America, retired, and confined their attention to Italy, the Barbary States, Turkey, Egypt, Yemen, Persia, India, Turkestan, etc. The result was that the two factions entirely separated as regards the ḥaluḳḳah, each working in its own sphere.

ירושלים

Ḥaluḳḳah Box.

The American Jews in Palestine, following the examples of the other kolelim, strove to organize their own kolel. J. G. Wilson, the United States consul at Jerusalem, in his approval of the project dated Feb. 10, 1879, said that "a responsible agency for the distribution of their charities may be the means of great and lasting good," and promised cooperation to the best of his power. But the central committee would not allow this new kolel to exist, and, instead, satisfied the few American claimants for assistance. After several other attempts the Americans finally succeeded in organizing their kolel (Aug., 1895), and induced Rabbi Joshua Löb Diskin in Jerusalem to accept their rabbinate and to receive all contributions for the American kolel.

"Kolel America."

The members in New York contributing to the American kolel were incorporated Dec. 17, 1897, as "The American Congregation, the Pride of Jerusalem." The receipts were, in 1898, $943; in 1899, $1,255; in 1900, $1,762. The central committee, fearing the consequence of the separation, effected a settlement in 1901 on a basis of two-thirds for themselves and one-third for the Kolel America from all collections made in the United States and Canada. The two-thirds were to be used for general expenses, and the balance divided into three parts, one part for the Perushim, one part for the Ḥasidim, and the remainder for Safed and Tiberias. The total amount of the American collections for the ḥaluḳḳah is now about $20,000 per annum, and the number of American applicants in the Holy Land in 1902 was nearly 300. After deducting the expenses of the meshullaḥim, etc., they receive about $5,500 yearly. In the above-mentioned incomes are included those from certain houses (see Jerusalem, Modern).

A good deal has been said and written against the ḥaluḳḳah. The Hebrew and Jewish newspapers and periodicals are almost unanimous in criticizing the method, principally for the reasons: (1) that the ḥaluḳḳah promotes mendicancy and pauperism; (2) that it encourages idleness and thriftlessness; (3) that it fosters differences between the Sephardim and Ashkenazim; (4) that it gives to the rabbis who control the distribution too much power to hamper and prevent modern schools for manual labor and secular knowledge; (5) that the distributions are made unjustly, many who do not need or deserve aid being beneficiaries, while others, like the Yemenites and the extremely poor, are ignored.

Objections to the Ḥaluḳḳah.

It is even claimed that the ḥaluḳḳah managers oppose the introduction of agriculture as a means of ameliorating the condition of the poor, and that they are hostile to the Zionist movement for fear it might interfere with them and end their power. All these accusations may have some basis of fact. The rabbis, however, disclaim any intention on their part to oppose agriculture and industry for the young and coming generation, so long as a proper religious training is not neglected. They say that the purpose of the ḥaluḳḳah is only to give aid to the helpless, and especially to learned men. Indeed, the editor of "Ha-Lebanon" defended the public support of the ḥaluḳḳah for the settlers in the Holy Land on the ground that the Christians support their cloisters and nunneries.

It is undeniable that the ḥaluḳḳah produces some good results. It has centralized the thoughts of the Jews in every part of the world; it preserves the traditional idealism of Jewish learning; it aids the helpless, and in many cases assists the mechanic and artisan to earn a living for his family; above all, it is an inducement to keep alive a Jewish settlement in the Holy Land. Nevertheless, the problem of organization is not entirely solved.

A list of the best-known meshullaḥim, with their dates and spheres of activity, is given here:

1441. 'Esrim we-Arba'ah: Europe.
1600. Judah de Leon: Italy (Nepi-Ghirondi, "Toledot Gedole Yisrael," p. 166).
1650. Nathan b. Reuben David Spiro: Italy and Germany (*ib.* p. 61).
1659. Benjamin ha-Levi: the Levant and Italy (Michael, "Or ha-Ḥayyim," No. 593).
1676. Joseph b. Eliezer: Italy and Germany.
1676. Shalliṭ Riqueti: Italy and Germany (with the preceding, author of "Iggeret Mesapperet").
1690. Judah Saraf: the Levant and Italy (Michael, *l.c.* No. 835).
1695. Abraham Yiẓḥaḳi: Italy (Nepi-Ghirondi, *l.c.* p. 206).
1695. Samuel ha-Kohen: Italy, etc. (*ib.* p. 359).
1695. Abraham b. Levi Conque: Italy, Germany, and Poland (Michael, *l.c.* No. 154).
1700. Ḥayyim Asael b. Benjamin: Smyrna (*ib.* No. 895).
1705. Gedaliah Ḥayyim: Italy (*ib.* No. 664).
1709. Nathan Mannheim: Germany and Poland.
1709. Jacob of Wilna: Germany and Poland (with the preceding, author of "Meorot Natan").
1710. David Melammed.
1712. Ḥayyim Ḥazzan (Michael, *l.c.* No. 871).
1712. Abraham Rovigo (*ib.*).
1718. Ḥayyim Jacob b. Jacob David: the Levant and Europe (*ib.* No. 877).
1720. Ephraim b. Aaron Nabon: Italy (*ib.* No. 518).
1730. David Capsoto: Holland (Nepi-Ghirondi, *l.c.* p. 76).
1730. Moses Ḥagiz: the Levant and Europe for a period of 50 years (Azulai, "Shem ha-Gedolim," i. 34).
1740. Baruch Gad: Media and Persia (Nepi-Ghirondi, *l.c.* p. 58).
1750. Baruch of Austria (*ib.* p. 62).
1750. Ḥayyim Joseph David Azulai: the Levant and Europe, including England, for 56 years. His "Ma'agal Yashar" contains part of his itinerary.
1750. Ḥayyim Abraham Ẓebi: Italy (*ib.* p. 115).
1750. Ḥayyim Mordecai Ẓebi: Italy, etc. (Michael, *l.c.* No. 886).
1750. Raḥmim Nissim Mizraḥi: the Levant and Italy (Nepi-Ghirondi, *l.c.* p. 312).
1759. Moses Malki: America ("Publications Am. Jew. Hist. Soc." p. 18).
1760. Ḥayyim Nissim Jeroham of Wilna: Germany ("Ḳiryah Ne'emanah," p. 114, together with other meshullaḥim).
1760. Yom-Ṭob al-Ghazi: the Levant and Italy (Nepi-Ghirondi, *l.c.* p. 167).
1765. Ḥayyim Moda': Holland (wrote approbation to "Pe'er ha-Dor").
1765. Jacob al-Yashar: Persia.
1767. Issachar Abulafia: Italy (wrote approbation to "Yad Malachi").
1770. Abraham Solomon Zalmon: Europe (Nepi-Ghirondi, *l.c.* p. 61).
1772. Abraham Segre: Germany (Nepi-Ghirondi, *l.c.* p. 25).
1773. Isaac Carregal: West Indies and the British Colonies of North America.
1776. Jacob Raphael Saraval: Holland and England (*ib.* p. 206).
1780. Judah Samuel Ashkenazi (*ib.* p. 214).
1783. Abraham ha-Kohen of Lask: Germany and Poland.
1790. David Ḥayyim Ḥazzan: Italy.
1796. Joseph Aben Samon: Tripoli (wrote approbation to "Ḥayye Abraham").
1800. Israel of Shklov: Lithuania and White Russia.
1804. Israel Raphael Segre (Nepi-Ghirondi, *l.c.* p. 25).
1807. Ḥayyim Baruch of Austria: Germany (wrote approbation to "Oẓar ha-Ḥayyim").
1810. Solomon David Ḥazzan: the Levant and Italy (Nepi-Ghirondi, *l.c.* p. 343).
1830. Joseph Edels Ashkenazi: Italy (*ib.* p. 212).
1848. Isaac Covo: Egypt.
1850. Isaac Farḥi: Italy (*ib.* p. 220).
1850. Levi Nehemias: Italy (*ib.*).
1850. Joseph Schwarz: the United States (author of "Tebu'at ha-Areẓ").
1856. Moses Ḥazzan: the Levant (author of "Naḥalah le-Yisrael").
1865. Raphael Meïr Fanijil: Europe (ḥakam bashi and author of "Leb Marpe").
1885. Moses Riwlin: Australia.
1885. Nathan Natkin: the United States (d. 1888, in New York).
1890. Abraham ibn Ephraim: Persia (Sephardic).
1903 (at present):
  Shalom Ḥamadi: Yemen (Sephardic).
  Benjamin ha-Kohen: Caucasia, Russia (Sephardic).
  J. Meynḥas: India (Sephardic).
  Eliezer Zalman Grajewski: the United States.
  Joshua Löb Süssenwein: the United States (author of "Ẓir Ne'eman," Jerusalem, 1898).
  Solomon Joseph Eliach.

Statistics.

The following statistics, for the year 1902, give the number of persons in each (Ashkenazic) kolel, the amount of its ḥaluḳḳah, and the average amount per capita:

TABLE OF THE ḤALUḲḲAH: 1902.

Name of Kolel.	Year Organized.	Number of Individuals.	Average per Individual.	Total Amount.
RUSSIA.				
1. Wilna-Samogitia	....	2,200	$5.45	$12,000
2. Grodno	1856	1,650	4.55	7,500
3. Minsk	....	1,003	2.49	2.500
4. Reussen	1860	700	4.65	3,250
5. Slonim	1868	131	9.16	1,200
6. Suwalki-Lomza	1867	616	11.35	7,000
7. Pinsk	1878	700	1.07	750
8. Warsaw	1852	1,313	14.17	18.600
9. "ḤaBaD"	....	1,320	5.68	7,500
10. Karlin	1875	368	2.05	750
11. Jitomir	....	304	2.30	700
12. Volhynia	....	1,160	1.55	1,800
13. Bessarabia	....	56	2.23	125
14. Liboshoi	....	50	3.50	175
15. Koydenow	1890	180	13.89	2,500
RUMANIA.

18. Lemberg	....	777	10.30	8,000
19. Kosow	1890	150	5.60	840
20. Viznitza	....	125	9.60	1,200
21. Bukowina	....	160	8.75	1,400
22. Siebenbürgen	....	60	26.67	1,600
23. Hungary	1830	1,300	30.76	40,000
24. "HoD"	1849	180	33.77	6,080
25. America	1897	292	18.50	5,400
Total		15,506	$8.56 average	$132,750

Nos. 1-7, 22-25, are Perushim; Nos. 8-21 are Ḥasidim; No. 1 includes Kovno, Courland, and Finland; No. 4 includes a province in White Russia and Shklov and Moghilef; No. 8, except Suwalki and Lomza; No. 9, "ḤaBaD," initials of Ḥokmah, Binah, De'ah, a cabalistic name symbolizing a society of Ḥasidim who read the Zohar; Nos. 14 and 15, government of Minsk; No. 24, "HoD," initials of Holland-Deutschland.

The following table shows the ḥaluḳḳah receipts of the Sephardim and Ashkenazim from America in 1890-99:

Year.	Sephardim.	Ashkenazim.	Year.	Sephardim.	Ashkenazim.
1890..........	$5,095	$21,320	1896..........	$13,178	$26,334
1891..........	6,840	26,441	1897..........	12,768	28,670
1892..........	8,221	24,644	1898-99.......	19,907	63,949
1893..........	9,327	24,363			
1894..........	14,159	20,070	Average....	$10,263	$26,172
1895..........	13,147	25,931			

The receipts of the wa'ad ha-kelali from 1885 to 1890 were as follows: 1885, $10,276; 1886, $13,385; 1887, $15,550; 1888, $14,936; 1889, $20,052; showing a decided increase during the period.

A. J. D. E.

HAM.—Biblical Data: Second son of Noah (Gen. v. 32); mentioned second in the table of the nations (Gen. x. 6), where his descendants are given. In Gen. ix. 24 he appears as the youngest of Noah's sons, who treated his father with irreverence when the latter was under the influence of drink. J.

——**In Rabbinical Literature:** Ham is represented by the Talmudists as one of the three who had intercourse with their wives in the Ark, being punished therefor in that his descendants, the Ethiopians, are black (Sanh. 108b; Gen. R. xxxvi. 11). Some explained the obscure passage Gen. ix. 22-24 as follows: Ham emasculated his father, saying, "My father has three sons already; and now he wishes a fourth son." Therefore Noah cursed Canaan, Ham's fourth son, saying, "Thou hast hindered me from having a fourth son; I will curse thy own fourth son." According to another opinion, Ham defiled his father, and Noah cursed Canaan because Ham, with his father and his two brothers, had been previously blessed by God (Sanh. 70a; Gen. R. xxxvi. 4). Another opinion declares that the mutilation of Noah was committed by Canaan, but was really caused by Ham mentioning his father's nakedness in the presence of Ham's youngest son (Ex. R. xxx. 5). Possibly Ham saw Canaan's deed and did not condemn him for it (Yalk., Gen. 61; comp. "Da'at Zekenim" *ad loc.*). Ham was punished by having his descendants led into captivity with their buttocks uncovered (Isa. xx. 4; Gen. R. xxxvi. 8).

J. M. Sel.

——**Critical View:** The modern critics regard the story narrated in Gen. ix. 24 as having been originally told of Canaan, "Ham father of [Canaan]" being a later insertion. The ethnographic conceptions of the ancient Hebrews first divided the races they knew into those related to them (Shem), those inhabiting the land (Canaan), and those outside (Japheth). Later on this threefold division seems to have been applied to all nations known to the Israelites, and then, it being impossible to regard Canaan as representative of the south, Egypt took that place. "Ham" is, according to this view, equivalent to "Egypt," one of the names of which was "Chemi" (black, referring to the dark color of the soil of the Nile valley). Accordingly, in the table of nations Ham is reported to have four chief branches: Cush = Ethiopia, Mizraim = Egypt, Phut = Libya, and Canaan. These four divisions were then subdivided, among the descendants of Cush being the Babylonians, Accadians, and Assyrians; among those of Mizraim, the Philistines and the Cypriotes (Caphtorim); among the Canaanites, Sidon, Heth, and nine other smaller tribes like the Jebusites, and the Amorites (Gen. x. 6-20). The exact basis of this classification is not clear. It is mainly geographical, all the nations south of Palestine being included in the list of the descendants of Ham; but this scarcely accounts for the presence of Canaan among the sons of Ham, which may have been due to the need of reconciling the legend of Noah's disgrace with the modern cosmogony. J.

ḤAMA: Babylonian scholar of the fourth amoraic generation; contemporary of Papa (Ket. 86a), and successor of Naḥman b. Isaac in the rectorate of the academy at Pumbedita (356-377; Grätz, "Gesch." 2d ed., iv. 366; comp. Sherira's "Iggeret"). Coming from Nehardea (see B. B. 7b; Rashi *ad loc.*), he became known as "the amora of Nehardea" (Sanh. 17b). As rector of an academy many undecided cases were submitted to him, and his decisions have been approved by later generations as good law (B. B. 7b; Shebu. 48b). On one occasion, however, he signally failed, and was severely criticized. King Shabur inquired of him, "Where does your Law prescribe burial for the dead?" Ḥama found no answer. When Aḥa b. Jacob heard of Ḥama's failure, he exclaimed, "The world is ruled by fools! Why did he not quote the verse (Deut. xxi. 23), 'Thou shalt in any wise bury him that day'?" (Sanh. 46b). Ḥama made his living by "ṭarsha," *i.e.*, selling goods to venders on credit and at the prices prevailing in the higher markets, but assuming the risks of transportation (B. M. 65a; comp. 69b).

Jost ("Gesch. des Judenthums und Seiner Sekten," ii. 197) erroneously identifies him with Ḥama b. Tobiah, who is said to have caused a priest's daughter to be burned for adultery (Sanh. 52b), contrary to the Pharisaic mode of execution and against the law abrogating capital punishment in the absence of the Great Sanhedrin (see Capital Punishment). This Ḥama was a later Babylonian amora, of whom nothing more is known.

S. S. S. M.

ḤAMA B. BISA (BISAI): Amora of the third century, who formed the middle link of a scholarly trio, and who exceeded his predecessor, as his successor in turn exceeded him, in the acquisition of knowledge. Like many other students, he left home and family, being gone twelve years. When he returned, fearing to startle his family, he went first to the local bet ha-midrash, whence he sent word to them of his arrival. While there his young son Hoshaiah soon engaged him in a discussion, neither knowing the other. Ḥama, admiring the logical bent of the young man's mind, sorrowfully reflected on his long absence from home, where he himself might have raised such a son. He at last went to his house, and there, while seated beside his wife, he saw enter his late interlocutor at the bet ha-midrash. Surmising that he had come to continue the discussion, Ḥama rose to receive him, whereupon his wife surprised him by exclaiming, "Does a father ever rise before a son?" (Ket. 72a). On another occasion father and son were discussing a point of civil law. They disagreed and submitted their views to Bisa, the father of Ḥama, who sided with Hoshaiah. On this occasion Rami b. Ḥama expressed the hope that in the learned trio would be fulfilled the Scriptural saying, "A threefold cord is not quickly broken" (Eccl. iv. 12; B. B. 59a).

According to the tosafists (B. B. 59a, *s.v.* "Weha-Ḥut"), the Hoshaiah here cited is identical with Hoshaiah Rabbah. Bacher ("Ag. Pal. Amor." i. 89) adopts this view, but Frankel ("Mebo," p. 85b) rightly questions its tenability. There is no doubt that Hoshaiah Rabbah's father's name was "Ḥama," but it is cited with the addition of "Father of R. Hoshaiah" (Yer. Sheb. ii. 33d; Yer. Niddah iii. 50c). Only once does the name "Ḥama b. Bisa" appear so as to leave no doubt of his being a contemporary of Judah I., and, therefore, the father of Hoshaiah Rabbah (Niddah 14b). But the patronymic is an error, and the parallel passage reads correctly: "Ḥama, the father of Hoshaiah" (Yer. Niddah ii. 49d). It is probable that Ḥama was the father of the younger Hoshaiah, and flourished contemporaneously with Rami b. Ḥama, the son-in-law of R. Ḥisda.

Bibliography: Heilprin, *Seder ha-Dorot*, ii.

J. S. M.

ḤAMA B. ḤANINA: Palestinian amora of the third century; contemporary of R. Johanan (Shab. 147b). Like his father, Ḥanina b. Ḥama, he directed a school at Sepphoris (Yer. Sanh. x. 28a), and was well known in the circles of the halakists (comp. Shab. *l.c.*; Yer. Shab. v. 7c; Yer. Suk. ii. 52d; Yer. Meg. iii. 74b). He was distinguished as a haggadist, in which field he occupied a high position, haggadists like Levi frequently quoting him (comp. Pesiḳ. iv. 37a, vii. 67b, xvii. 132a, xxiii. 153a, b, xxxi. 195a). Who his teachers were is nowhere stated. Possibly R. Ḥiyya the Great was one of them (see Sanh. 29a: Ḥiyya's patronymic is doubtless a mistake).

In his homilies Ḥama sought to convey practical lessons. Thus, commenting on the Scriptural command, "Ye shall walk after the Lord your God" (Deut. xiii. 5 [A. V. 4]), he asks, "How can man walk after God, of whom it is written, 'The Lord thy God is a consuming fire'?" (*ib.* iv. 23 [A. V. 24]). But, he explains, the Bible means to teach that man should follow in God's ways. "As He clothes the naked (Gen. iii. 21) so do thou clothe the naked" (Soṭah 14a). According to Ḥama death was inflicted upon Adam not so much because of his sin as to prevent wicked men in the future from proclaiming themselves immortal gods (Gen. R. ix. 5). Ḥama's ancestors were wealthy, and built many synagogues. On one occasion, while visiting, with his colleague Hoshaiah II., the synagogues at Lydda, he proudly exclaimed, "What vast treasures have my ancestors sunk in these walls!" To this Hoshaiah responded, "How many lives have thy ancestors sunk here! Were there no needy scholars whom that treasure would have enabled to devote themselves entirely to the study of the Law?" (Yer. Peah viii. 21b).

HA-MABDIL: A hymn signed with the acrostic "Isaac ha-Ḳaṭon" (Isaac ben Judah ibn Ghayyat, 1030-89), obviously written for the Ne'ilah service of the Day of Atonement, but now used in the Habdalah at the close of the Sabbath. Of its many musical settings the finest is the following old Spanish melody.

HAMADAN: Persian city; 160 miles west-southwest of Teheran. Hamadan is generally identified with the ancient Ecbatana, the Achmetha of the Bible, capital of Media Magna. It seems that the Jews settled there soon after its foundation and prospered; but with its conquest by the Arabs (634) persecutions began. Benjamin of Tudela, who was there in the middle of the twelfth century, makes the statement that he found there fifty thousand Jews. From the following remark of Edrisi, also, it is evident that the city was inhabited by a great number of Jews: "The commerce of this place was very considerable, which accounts for the great number of Jews it contained." Later, under the Sufi and Afghan dynasties (seventeenth and eighteenth centuries), the Jews of Hamadan suffered heavily.

The Judæo-Persian poet Babai b. Luṭaf of Kashan described in verse the persecutions of the Jews throughout Persia under Abbas I. (1595-1628), Abbas II. (1639-66), and under the first kings of the Afghan dynasty. The Jews of Hamadan suffered especially at the hands of Mohammed Bey, the fanatical vizier of Abbas II., who gave them the alternatives of embracing Islam or of leaving the country empty-handed. Those who refused to do either were put to death. The offer of rich rewards for apostasy occasioned a considerable number of conversions among the poor Jews. Maḥmud Shah (1725) massacred a great number of Jews, among them being the rabbi of Hamadan, Mulley Musa. Another massacre occurred by order of Tahmas Kuli Khan, better known as "Nadir Shah" (1735-47).

In spite of these persecutions there was still a considerable number of Jewish families at Hamadan at the beginning of the nineteenth century. M. L. Dubeux says: "Hamadan in the year 1818 contained about nine thousand houses and from forty to fifty thousand inhabitants, including six hundred Jewish families." But this number diminished considerably within twenty years, for Flandin, who was at Hamadan in 1839 and 1840, says: "The Jews fabricate an immense quantity of imitation Greek and Sassanid coins. They number about two hundred families, and I think their predilection for Hamadan is due to the tradition that Mordecai and Esther were buried there." Benjamin of Tudela mentions the sepulcher: "In front of one of the synagogues of Hamadan is the sepulcher of Mordecai and Esther." Benjamin II. speaks of it at greater length; he says that the Jews hold it in great veneration, and visit it at the end of every month and at Purim. They even sacrificed there, and gave the sacrifices to the poor, in order to win the protection of Mordecai and Esther. In his time (19th cent.) there were at Hamadan three synagogues and three rabbis. One of them, R. Elijah, had the title of "nasi"; the second was R. Aaron. Dr. Polak, physician to Nasir al-Din Shah from 1855 to 1860, had an opportunity to observe minutely the condition of the Jews of Hamadan, as this town was the summer residence of the king. He wrote as follows:

> "The Jewish colony lives in a special quarter in the midst of the town, in a ghetto. Their sanctuary is a small monument, built in the shape of a dome, and, according to tradition, contains the tombs of Mordecai and Esther. The Jews earn their living by all kinds of gold- and silver-work, in which they are as clever as the Caucasians; by glass-cutting, silk-weaving, dealing in old clothes and in skins. Many of them are masons, blacksmiths, tailors, and shoemakers; some practise medicine, which they study according to the works of Avicenna, who is buried at Hamadan. They live under great difficulties, because they are considered as outcasts; they are constantly exposed to the caprices of the governor, who uses every pretext to plunder them. . . . Should a Jew appear in the street dressed decently, or on horseback, the spectators are indignant at him for daring to appear like a true believer. Should he, on the contrary, be dressed miserably, he is followed by a crowd of young rascals, who throw mud and stones at him."

If the numbers given by Dubeux and Flandin are exact, the Jews of Hamadan have increased remarkably, in spite of persecutions; for, according to the report of the director of the Alliance school at Hamadan, there are in that town about 5,000 Jews.

HA-MAGGID. See PERIODICALS.

ḤAMAI (commonly called **Ḥamai Gaon**): Pseudonym of a cabalist belonging, according to Jellinek, to the school of Isaac the Blind. The works which bear this name are: "Sefer ha-Yiḥud," probably on the Tetragrammaton, quoted by Meïr ibn Gabbai ("'Abodat ha-Ḳodesh," 9th ed., Cracow) and Moses Cordovero ("Pardes," 65th ed., Korez); "Sefer ha-'Iyyun," on the existence and unity of God, and followed by a mystical prayer in the style of the "Hekalot de Rabbi Neḥunya ben ha-Ḳanah," arranged in the order of the Eighteen

Benedictions. The "Sefer ha-'Iyyun" was published at Warsaw in 1798, among the "Liḳḳuṭim" of Hai Gaon, the end of the "Sefer ha-'Iyyun" bearing the special title "Sha'are Shamayim." A small fragment which was found embedded in R. Gamaliel's prayer ("Sefer ha-Yiḥud") was published by Jellinek.

HAMAN THE AGAGITE.—Biblical Data: Son of Hammedatha; chief minister of King Ahasuerus (Esth. iii. 1–2). As his name indicates, Haman was a descendant of Agag, the king of the Amalekites. On account of his attempt to exterminate the Jews in the kingdom of Ahasuerus, he is frequently called "the persecutor of the Jews" (צרר היהודים; Esth. iii. 10; viii. 1; ix. 10, 24). His machinations against the Jews and his downfall are remembered during the Feast of Purim. Filled with annoyance because Mordecai did not bow before him, Haman resolved upon the extermination of the Jews throughout the whole kingdom. He drew lots to determine the day of the massacre, and the lot fell on the 13th of Adar (Esth. iii. 4–7). He offered the king ten thousand talents of silver for permission to do with the Jews as he pleased. The permission was granted, and he accordingly despatched letters to all parts of the Persian kingdom to massacre the Jews on the 13th of Adar (iii. 8–15). His intrigues, however, were baffled by Esther. In order to throw him off his guard she invited him to a banquet to which she had also asked the king. Haman, looking upon this as an indication of special favor, in his pride went so far as to prepare a gallows whereon to hang Mordecai (v. 14). But in that night a sudden change occurred in Haman's fortunes. His own answer to the king's question what should be done to him whom the king delighted to honor, which Haman supposed referred to himself, obliged Haman to lead Mordecai, his mortal enemy, clad in royal garments and seated on the king's horse, through the streets of Shushan and to proclaim: "Thus shall it be done to the man whom the king delighteth to honor" (vi. 9). Afterward, while Haman was again drinking with the king at a banquet prepared by Esther, the latter exposed to the king Haman's plot. The king, filled with anger, ordered his officers to hang Haman on the very gallows which he had prepared for Mordecai (vii. 9). Ahasuerus bestowed upon Esther Haman's house (viii. 1); the ten sons of Haman were executed on the 13th of Adar and then hanged (ix. 7–9, 14).

E. G. H. M. Sel.

——In Rabbinical Literature: Haman is identified by the Talmudists with Memucan, the last of the seven princes "which saw the king's face" (Esth. i. 14), giving to "Memucan" the signification of "prepared for punishment" (Targ. to Esth.; Meg. 12b). Haman was a direct descendant of Agag in the sixteenth generation and consequently an Amalekite (Targ. Sheni; Josephus, "Ant." xi. 6, § 5). The Septuagint, however, gives for "ha-Agagi" ὁ Μακεδών in Esth. ix. 24, while in the preceding instances no translation whatever is given. Having attempted to exterminate the Jews of Persia, and rendering himself thereby their worst enemy, Haman naturally became the center of many Talmudic legends. Being at one time in extreme want, he sold himself as a slave to Mordecai (Meg. 15a). He was a barber at Kefar Ḳarẓum for the space of twenty-two years (*ib.* 16a). Haman had an idolatrous image embroidered on his garments, so that those who bowed to him at command of the king bowed also to the image (Esth. R. vii.).

Haman was also an astrologer, and when he was about to fix the time for the massacre of the Jews he first cast lots to ascertain which was the most auspicious day of the week for that purpose. Each day, however, proved to be under some influence favorable to the Jews. He then sought to fix the month, but found that the same was true of each month; thus, Nisan was favorable to the Jews because of the Passover sacrifice; Iyyar, because of the small Passover. But when he arrived at Adar he found that its zodiacal sign was Pisces, and he said, "Now I shall be able to swallow them as fish which swallow one another" (Esth. R. vii., Targ. Sheni iii.). Haman had 365 counselors, but the advice of none was so good as that of his wife, Zeresh. She it was especially that induced Haman to build a gallows for Mordecai, assuring him that this was the only way in which he would be able to prevail over his enemy, for hitherto the just had always been rescued from every other kind of death. As God foresaw that Haman himself would be hanged on the gallows He asked which tree would volunteer to serve as the instrument of death. Each tree, declaring that it was used for some holy purpose, objected to being soiled by the unclean body of Haman. Only the thorn-tree could find no excuse, and therefore offered itself for a gallows (Esth. R. ix.; Midr. Abba Gorion vii., ed. Buber, Wilna, 1886; in Targum Sheni this is narrated somewhat differently).

Haman selected a thorn-tree in the king's garden, and, singing and rejoicing, set it up before his door, and said to himself, "To-morrow, in the morning, at the time of the reading of the 'Shema',' I shall hang Mordecai." Then he measured the tree by comparing it with his own person to see whether it was suited to the purpose. Just then a "bat ḳol" came from heaven saying, "The tree is suited to thee; it is prepared for thee since the day of creation." He then went to the bet ha-midrash, where he found Mordecai surrounded by his pupils to the number of 22,000, all with dust on their heads and clad in sackcloth. Haman placed chains upon their necks and feet, and set guards over them, saying to himself, "I will first massacre these, and then I will hang Mordecai." It was the cry of these pupils ascending to heaven that brought about the sudden change in Haman's fate (Esth. R. ix.; Midr. Abba Gorion v.).

Haman tried hard to avoid the humiliation of leading Mordecai through the streets of Shushan; he implored the king to spare him that disgrace and offered every kind of reparation to Mordecai, but the king remained inflexible (Targ. Sheni vi.). At the time of leading Mordecai through the streets of Shushan, Haman performed the duties of four different callings: barber, bath attendant, groom, and public crier.

He was also compelled to bend forward that Mordecai might mount from his back on to the horse (Meg. 16a). It is also said that when King Ahasuerus rose from the banquet in anger and went into his garden he saw angels in the form of men felling the trees, who said that they were ordered to do so by Haman (*ib.*). According to Esth. R. x., it was the angel Michael that felled the trees and who afterward pushed Haman on to Esther's couch.

Haman was hanged on the second day of the Passover feast (Esth. R. and Meg. *l.c.*). The Talmudists did not agree as to the number of Haman's sons; according to Rab there were thirty: ten had died, ten were hanged, and ten became beggars. According to the Rabbis, the beggars were seventy in number; according to Rami bar Abi, there were altogether two hundred and eight (Meg. 15b). Pietro Perreau published in Steinschneider's "Hebr. Bibl." (vii. 46-47) a supposed text of Haman's circular regarding the massacre of the Jews (comp. "Midrash Panim Aḥerim," first text, ed. Buber). The manuscript, which is found in the Parma Library (No. 924), dates from the thirteenth century. See PURIM.

HAMATH (חמת): A city and district on the northern frontier of Palestine (Num. xiii. 22, xxxiv. 8; I Kings viii. 65; and elsewhere), situated at the foot of Mount Hermon (Josh. xiii. 5; Judges iii. 3). It is once called חמת רבה = "the great Hamath" (Amos vi. 2). The inhabitants, who were called "Hamathites" (החמתי), seem to have been a Hamitic race included among the descendants of Canaan (Gen. x. 18). There is no mention of the kingdom of Hamath till the time of David, when, it is stated, Toi, King of Hamath, warred with Hadadezer, King of Zobah; and, on the defeat of the latter by David, Toi sent his son to congratulate the Jewish king (II Sam. viii. 10).

Hamath was certainly one of the tributary kingdoms of Solomon (I Kings v. 4), as is evidenced by the fact that Solomon built store-cities there (II Chron. viii. 4). After the death of Solomon, Hamath seems to have regained her independence; for an inscription of Shalmaneser II. (860 B.C.) states that Irhuleni, King of Hamath, made an alliance with the Hittites, with Damascus under Ben-hadad, with Ahab of Israel, and with others. It has been inferred from II Kings xiv. 28 that Jeroboam II. (*c.* 810 B.C.) recovered Hamath; but the reading of the passage is doubtful, the text apparently being corrupt. Amos, however, who prophesied in the time of Jeroboam II. (Amos i. 1), speaks of Hamath as desolate (*ib.* vi. 2).

In the Assyrian inscriptions it is stated that Eni-Ilu, King of Hamath, brought tribute to Tiglath-pileser III. (730 B.C.), who distributed a part of it among his generals, annexing nineteen districts to Assyria and transporting 1,223 Hamathites to the sources of the Tigris. Sargon, too, boasts of having defeated the Hamathites and of having settled in their country 4,300 Assyrians. The statement as to the conquest of the Hamathites by the kings of Assyria is confirmed by II Kings xviii. 34, xix. 13. According to the Bible, Shalmaneser, King of Assyria, transported some Hamathites to Samaria (*ib.* xvii. 24). On the other hand, Isaiah speaks of Hamath as one of the places containing exiled Israelites (Isa. xi. 11). The people of Hamath made an idol named "Ashima" (*ib.* xvii. 30).

Hamath was known to the Greeks and Romans by the name "Epiphaneia," given to it by Antiochus Epiphanes (Josephus, "Ant." i. 6, § 2; Jerome, "Onomasticon," *s.v.* "Aemath"). In the Midrash, Hamath is called פיפניא (= "Epiphaneia"; Gen. R. xxxvii. 8). Still, Targ. pseudo-Jonathan to Num. xiii. 22, Targ. Yer. to Num. xxxiv. 8, and the Syriac version of I Chron. xviii. 16 render "Hamath" by "Antiocheia," which was the most important Syrian town at the time of the Targumists. This place is now known by its ancient name, "Ḥamah." Burckhardt visited it in 1812, and saw the Hittite inscriptions in relief on stones. He describes the place as situated on both sides of the Orontes, and as having a population of 30,000.

HAMATH-ZOBAH: A place mentioned in II Chron. viii. 3, as having been taken by Solomon. Some conjecture that Hamath-zobah is the same as Hamath; but the rendering of the former as "Baesoba" by the Greek translators indicates that the two were distinct.

HA-MAZKIR: A bibliographical magazine published by M. Steinschneider, twenty-one volumes of which, covering the years 1858–82, were issued. Its full title reads: "המזכיר: Hebräische Bibliographie: Blätter für Neuere und Aeltere Literatur des Judenthums." It is an invaluable aid to the student of Jewish literature and history, as it contains, besides bibliographical information of the most varied sort, many independent essays and researches by Steinschneider himself and by the leading Jewish scholars of the period. It was continued in 1890 by N. Brüll, in Frankfort-on-the-Main, under the title "Central-Anzeiger für Jüdische Literatur." Brüll died before the first volume was completed. This was followed in 1896 by the "Zeitschrift für Hebräische Bibliographie," published by H. Brody (Frankfort-on-the-Main); from 1900 on in conjunction with A. Freimann. G.

HAMBERGER, C. H.: Physician in Leipsic; died March 2, 1847, at an advanced age. He translated G. B. de Rossi's "Dizionario Storico degli Autori Ebrei" into German under the title "Historisches Wörterbuch der Jüdischen Schriftsteller und Ihrer Werke," Leipsic, 1839. His "Nordische Götterlehre," which appeared in 1826 under the pseudonym "H. A. M. Berger," was republished with the title "Nordische Mythologie," and under his own name, Zittau, 1835.

HAMBRO, JOSEPH: Aulic councilor to the King of Denmark; born at Copenhagen Nov. 2, 1780; died in London Oct. 3, 1848. He began his career with a Hamburg firm, afterward, however, devoting himself, as general agent, to the development of his father's business. In this he was successful, establishing a branch in London, and extending his transactions throughout the northern countries of Europe. Hambro became an aulic councilor and Knight of the Dannebrog, and as early as 1820 "Hofraad Hambro" was spoken of as "the richest man in Copenhagen." Toward the end of his life his health broke down, and he lived for a time in Italy. He married a Christian, and had his son baptized. In 1831 with his entire family he took up his permanent abode in London. He did not identify himself very closely with the affairs of his congregation. He remained, however, a member of the synagogue to the last, and was buried in the cemetery of the Great Synagogue.

HAMBRO' SYNAGOGUE: Founded in London by Mordecai Hamburger in 1702, as a protest against the tyranny of Abraham of Hamburg, the parnas of the Great Synagogue. Its members met at Hamburger's house, in Magpye alley, Fenchurch street, the rabbi being Jochanan Holleschau. It was the first attempt at an independent synagogue, and the ecclesiastical authorities of both the Sephardim and Ashkenazim combined to obtain an injunction against a place of public Jewish worship in St. Mary Axe, so near to both Duke's Place and Bevis Marks. A veto was obtained from the corporation; but notwithstanding this the synagogue was erected in the garden attached to Hamburger's house, the foundation-stone being laid Siwan 3, 5485 (1725), by Wolf Präger, after whom the synagogue was sometimes called. Generally, however, it was spoken of as "the Hambro'," as it followed the ritual of Hamburg. Holleschau was succeeded by Meshullam Zalman, son of R. Jacob Emden, and he by Hirschel Levin, father of Dr. Herschell. The synagogue was pulled down in 1893 to make room for city improvements, and its place in the United Synagogue of London was taken by a new synagogue erected in Union street, Commercial road. See also London.

HAMBURG: German city on the right bank of the Elbe, between Sleswick-Holstein and Hanover. The first Jewish settlers were Portuguese Maranos, who had fled from their own country under Philip II. and Philip III., at first concealing their religion in their new place of residence. In 1603 the aldermen ("Bürgerschaft") made complaints to the senate about the growing influx of Portuguese Jews. The senate asked the theological faculties of Jena and Frankfort-on-the-Oder for their opinions in the matter, and in 1612, after many negotiations, it was agreed that, in consideration of a payment made for their protection, the Jews should be tolerated in the town as strangers, though they were not to be allowed to practise their religion publicly. According to a "rolla" or list of that time, they numbered 125 adults, besides servants and children. From 1611 they possessed a cemetery in Altona, which was used until 1871 (see illustration *s.v.* Altona). In 1617 they obtained the right to choose four sworn brokers from among their own people; and later on this number was increased to fifteen.

Seventeenth-Century Sephardim.

These Portuguese Jews, mainly engaged in the wholesale trade, greatly helped the commerce of the town. They were the first to open up trade with Spain and Portugal; they imported from the colonies sugar, tobacco, spices, cottons, etc., and they took a prominent part in the foundation of the Bank of Hamburg (1619). Of their eminent men the best known is the physician Rodrigo de Castro, who lived in Hamburg from 1594 till his death. In recognition of his valuable professional services the senate granted him the privilege of owning real estate in the town. Other notables were: Boccario Rosales, who distinguished himself as an astronomer, the emperor conferring upon him the title of "comes palatinus"; Joseph Frances, the poet; Moses Gideon Abudiente, the grammarian; and Benjamin Mussafia, the physician, philosopher, and linguist.

As early as the year 1627 the Portuguese Jews possessed a small place of worship, styled "Talmud Torah," in the house of Elijah Aboab Cardoso. Emperor Ferdinand II. addressed bitter complaints to the senate about this "synagogue," the Catholics not being allowed to build a church in Hamburg at that time. But, in spite of this protest and the violent attacks of the Protestant clergy, the senate continued to protect the Jews. Their first ḥakam was Isaac Athias of Venice, whose successor was Abraham Ḥayyim de Fonseca (d. Iyyar, 5411 = 1651), also ḥakam of another synagogue, Keter Torah. In 1652 the Portuguese formally constituted themselves a congregation with a large synagogue, Bet Israel, and chose as chief rabbi ("ḥakam de naçao") the learned David Cohen de Lara (d. 1674). With him Ḥakam Moses Israel, and, a little later, Judah Carmi were rabbis of the congregation (both died in 1673). In 1656 Isaac Jesurun was called from Venice to Hamburg, there to take the place of chief rabbi ("ḥakam geral") . . . "for the promotion of religion and the general welfare," . . . as the oldest minute-book of the congregation says. Apparently offended by this call, Cohen de Lara took leave for a few months and afterward went to live at Amsterdam. After the death of Jesurun (1665), De Lara went back to Hamburg, where he died.

Among the early elders of the congregation was Benedict de Castro, a son of Rodrigo, and, like his father, a well-known physician. In 1663 the Sephardic congregation, at that time the only acknowledged Jewish community at Hamburg, consisted of about 120 families. Among these were several distinguished by wealth and political influence: Daniel Abensur (d. 1711) was minister resident of the King of Poland in Hamburg; Jacob Curiel (d. 1664) and Nuñez da Costa acted in a similar capacity to the King of Portugal; Diego (Abraham) Texeira (d. 1666) and his son Manuel (Isaac) Texeira, who administered the fortune of Queen Christina of Sweden. Manuel was the celebrated minister resident of Queen Christina in Hamburg. Jacob Sasportas taught from 1666 to 1672 at a bet ha-midrash founded by Manuel Texeira, and was often called upon, as ḥakam, to decide religious questions.

The Hamburg Sephardic Jews took great interest in the movements of the false Messiah Shabbethai Ẓebi. They arranged celebrations in his honor in their principal synagogue, the young men wearing trimmings and sashes of green silk, "the livery of Shabbethai Ẓebi." Sasportas tried in vain to damp this enthusiasm, which was to be bitterly disappointed a few years later. Other rabbis of the congregation were Jacob ben Abraham Fidanque, Moses Ḥayyim Jesurun (d. 1691), Samuel Abaz (d. 1692), and Abraham ha-Kohen Pimentel (d. 1697).

In 1697 the freedom of religious practise which the congregation had obtained was disturbed by hostile edicts of the aldermen, and the Jews were extortionately taxed. On this account many of the rich and important Portuguese Jews left Hamburg, some of them laying the foundation of the Portuguese congregation of Altona. Internal quarrels, and especially the withdrawal of Jacob Abensur (minister resident of the King of Poland) and his followers, were other causes of the decline of the Sephardic congregation in Hamburg.

Ashkenazim.

In the meantime the German Jews had been increasing in importance and numbers, though they were not yet publicly protected by the Hamburg authorities. In 1583 twelve German-Jewish families had asked in vain for admission to the town; in the second quarter of the seventeenth century several Jewish merchants went to Hamburg, mostly from Altona, where, through the tolerance of the counts of Schaumburg, Jews had for some time been admitted. In the Danish safe-conduct ("Schutzbrief") of 1641 granted to the Jews of Altona, protected Jews ("Schutzjuden") living in Hamburg are mentioned. In 1648 the council of aldermen issued an order expelling the German Jews ("Hochdeutsche Juden") from the town. They moved to Altona, and were required to pay a monthly tax for the privilege of transacting business in Hamburg. In 1657 the Swedes invading Altona drove them out, and they, together with the other Jews of Altona, fled to Hamburg. At this time fifteen Jewish families remained in Hamburg tacitly tolerated by the senate, and out of these families, which lived under Danish protection, the Altona congregation in Hamburg was formed. Other German Jews were admitted after 1654, under the protection of the privileged Portuguese congregation—at first only as servants of the Portuguese—and these founded the Hamburg congregation, which continued to be under the control of the Portuguese till 1671. David Tebel is mentioned as their first rabbi. In 1671 both the Hamburg and the Altona congregation in Hamburg placed themselves under the chief rabbi of Altona. Soon afterward the Jewish congregation of Wandsbeck with its branch congregation in Hamburg joined this union, making one congregation known as "The Three Communities" (see ALTONA), the first chief rabbi being Solomon Mirels of Neumark (d. 1706).

The German Jews of Hamburg were principally engaged in retail businesses, and they soon became an important factor of the new town ("Neustadt"), founded in the first half of the seventeenth century. But, having no right to live in Hamburg, they were persecuted most violently by the clergy, and their services were often disturbed. In 1697 the aldermen forced the senate to exact a large sum of money from the German Jews and to impose heavy restrictions upon them. In spite of the state of suppression in which the German Jews lived at this time there was much spiritual life among them. As a writer Glückel Hameln, who lived in Hamburg in 1700, deserves mention here: she left a highly interesting autobiography in Judæo-German.

Eighteenth Century.

In 1710 an imperial commission, which visited the town for the purpose of making peace between the senate and the aldermen, fixed the position of the Hamburg Jews by certain regulations ("Reglement der Judenschaft in Hamburg Sowohl Portugiesischer als Hochdeutscher Nation"), promulgated in the name of Emperor Joseph I. This edict became the fundamental law for the treatment of the Jews in Hamburg during the ensuing century. The German Jews were legally settled in Hamburg, and they enjoyed almost the same rights as the Portuguese.

The Portuguese, proud of their noble lineage, were very dissatisfied at being put on a level with the German Jews, and segregated themselves more and more from them. As a result of this exclusiveness, and for want of fresh accessions, their community declined in the course of the eighteenth century and lost its leading position among the Hamburg Jews. Still, it had some well-known ḥakams; *e.g.*, Jacob de Abraham Basan, who wrote an order of prayers (still extant) for a fast-day held after the earthquake of Lisbon (1755); and Benjamin Benveniste (d. 1757). But learning and interest in Jewish affairs waned in the Portuguese community, and its institutions were neglected. The sheḥiṭah, formerly under its sole supervision, went over to the German community, which in exchange had to pay to the Portuguese one-fourth (since 1856 one-eighth) of the total proceeds of the meat-tax. The principal synagogue of the Portuguese congregation was burned in the great fire of 1842; and since then they have possessed a small place of worship only, the service being maintained with all the old Spanish rites and melodies. Since the beginning of the nineteenth century they have had no ḥakam. Their last preacher and spiritual chief was Judah CASSUTO, who officiated as ḥazzan from 1827 to 1893.

During the eighteenth century the three German communities of Hamburg flourished in their union with Altona and Wandsbeck. They had many eminent rabbis, of whom the most important were Ezekiel Katzenellenbogen (1712–49), Jonathan Eybeschütz (1749–64), and Raphael ha-Kohen (1776–99). The last chief rabbi of the Three Communities was Ẓebi Hirsch Zamosz (1803–07).

In 1811, Hamburg being incorporated in the French empire, the Jews of that town were forced by an order of Napoleon to withdraw from the congregation of the Three Communities, and to form of the three Hamburg congregations a new community. The constitution of this new community was established in the following year. At the same time the old restrictions were abolished, and full equality before the law was given to the Hamburg Jews, as to all the Jews in the French empire. During Davoust's terrorism in the winter of 1813–14 the Jewish community had much to suffer through the expulsion of its poorer members. In 1814, the town being freed from the French occupation, and the senate reestablished, civil rights were again denied to the Jews, although the latter had shown great attachment to their native town. This injustice was sanctioned by the Congress of Vienna ("Deutsche Bundesacte"), 1815. Of all the French institutions there remained only the civil registers of births, marriages, and deaths (these were kept separately for the Jews until 1865). In 1818 the Tempel was founded—a synagogue with an entirely modified service, and with an organ, a choir, and a new and much abridged prayer-book. The Orthodox party obtained a strong leader in Isaac BERNAYS, who became chief rabbi or ḥakam of the German-Jewish community in 1821. Though conserving the old forms of the service, he introduced the sermon in German, and treated the old Jewish teachings in a modern scientific spirit. He strongly opposed the Tempel, where Eduard Kley (1818–40) and Gotthold Salomon (1818–57; d. 1863) preached; their successors were N. Frankfurter (1840–66), Max Sänger (1867–82), and H. Jonas (1858–89). After the sudden death of Bernays (1849), Anshel Stern became chief rabbi of the German-Jewish congregation (1851–88).

Nineteenth Century.

In 1848 the Revolution brought about the emancipation of the Jews in Hamburg as in many other states of the German Confederation. In 1849 all members of the German-Jewish, as well as of the Portuguese congregation were free to acquire citizenship in the town. Every new Jewish settler, however, Portuguese excepted, was obliged to join the German-Jewish congregation, which formed a separate political corporation in the state. In 1864 this obligation was abolished. The old German-Jewish congregation was now dissolved, and again constituted itself a congregation in which membership was voluntary. It retained the exclusive care of all the institutions connected with education, charity, and burial. The management of affairs relating to public worship was transferred in 1867 to the Confederation of Synagogues for the Orthodox, and to the Tempel-League for the Reform Jews. The Confederation of Synagogues received at the same time the two large synagogues belonging to the congregation, and in return undertook to pay the salaries of the chief rabbi and other officials and to administer all the other ritual institutions, especially the sheḥiṭah. Since 1889 Marcus Hirsch (formerly at Alt-Ofen and Prague) has officiated as chief rabbi. The preachers of the Tempel-Verein or league are D. Leimdörfer (since 1882), Paul Rieger (since 1902), the latter's predecessor in office having been C. Seligmann (1889).

The German-Jewish congregation possesses two principal synagogues—one, situated in the Elbstrasse, built in 1788 after the designs of the architect Sonnin; the other, on the Kohlhöfen, opened in 1859, and having 600 seats for men and 400 for women. The Tempel-League has its own house of worship, with about 400 seats for men and 250 for women. Besides these there are several smaller synagogues maintained by societies, especially in the part of the town "Vor Dem Dammthor," with its large Jewish population. The largest of these is the Neue Dammthor-Synagoge, where Dr. Grunwald officiated as preacher until Aug., 1903, when he was succeeded by Dr. Loewenthal. The hospital of the German-Jewish congregation, founded in 1843 by Salomon Heine in remembrance of his wife, and later richly endowed by his son Karl Heine, possesses accommodation for 120 patients in the main building, and has an annex for smallpox and other infectious diseases. The community has, besides, an orphan asylum for boys, another for girls, a home for aged people, and an infirmary.

Institutions.

The schools of the community are:

1. The Talmud Torah, founded in 1804 as a school for the poor, and for the teaching of Hebrew only, but wholly reorganized by Bernays in 1822 by the addition of lessons in German and various elementary studies. After Bernays' death it was conducted by Chief Rabbi Stern and changed into a high school, with lessons in French and English. Since 1889 it has been conducted by Dr. Goldschmidt, with a staff of 20 teachers and 500 pupils. 2. A high school of Jewish foundation, for boys, which was changed under Dr. Rée's direction into an interdenominational school, called "Stiftungsschule of 1815," and is now attended mainly by Christian pupils. 3. The Girls' School, founded in 1818, now housed in a building erected at the expense of Marcus Nordheim (d. 1899), where 600 girls are taught by 18 governesses and 2 masters, the head mistress being Miss Marcus. 4. Since 1893 there exists a high school for girls, founded under the chief rabbi Hirsch.

The community possesses two ancient burying-grounds, which are seldom used now: one at Ottensen, a suburb of Altona, the oldest part of which was acquired in 1664, and another, "on the Grindel," acquired in 1711, and which served as principal cemetery for the community after that of Altona, formerly common to both towns, was forbidden (1834) to the Hamburg Jews. Since 1883 the community has owned a large burial-place adjoining the municipal cemetery at Ohlsdorf; but as the inviolability of the graves was guaranteed for a certain time only, Chief Rabbi Stern did not consider the cemetery to be in accordance with the Jewish law. He therefore induced a number of his followers to buy a plot of land at Langenfelde, near Altona, for use as a burial-ground.

There are three religious foundations (called "Klaus"), which maintain several scholars who live exclusively for the study of the Talmud and deliver regular lectures thereon; also a large number of charitable institutions of various kinds, including free dwellings for the poor, and societies for loans, for the distribution of food, fuel, and clothes, and for the assistance of poor school-children, widows, strangers, mourners, the sick, the aged, and lying-in women.

There are also provisions for free scholarships, for the transportation of poor school-children to the country ("Feriencolonien"), and for the promotion of handicrafts. Hamburg possesses a society for Jewish history and literature, another for Jewish folklore, and a Jewish public library.

Besides the rabbis the following important Hamburg Jews deserve mention here: Salomon Heine (1767–1844), a financial genius and most charitable man, founder of the Jewish hospital; Gabriel Riesser (1806–63), who fought for the emancipation of the Jews, member of the Frankfort national assembly in 1848 and of the parliament of Erfurt in 1850, judge in Hamburg (the first Jew in Germany to hold that office) from 1860, and vice-president of the council of aldermen; M. Isler, chief librarian of the municipal library; Anton Rée (1815–91), pedagogue and member of the Reichstag; Isaac Wolffson (1817–95), lawyer and president of the council of aldermen, member of the commission for the new German civil code; M. W. Hinrichsen, member of the Reichstag (d. 1902); Siegmund Hinrichsen, president of the council of aldermen (d. 1902); B. Pollini, manager of the Hamburg Theater (d. 1897). The following were born at Hamburg: Samson Raphael Hirsch (1808–88), the energetic leader of modern Orthodox Judaism; Jacob Bernays, the philologist (1824–81), professor at the University of Bonn; Michael Bernays, his brother (1834–97), professor in Munich.

The Jewish population at Hamburg, which in 1814 numbered about 7,000, was 17,300 out of a total population of 626,000 in 1895. The number of contributing members of the German congregation is 3,535; that of the Portuguese, about 400.

D. A. Fe.

——**Typography** (including that of **Altona**): According to the Oppenheim Catalogue, which, however, is questioned by Steinschneider, the "'Asarah Ma'amarot" was printed in 1680 at Hamburg. There is no doubt concerning the fact that from 1686 Thomas Rose, a Christian bookseller of Hamburg, was engaged in printing Hebrew books; the Earlier Prophets, with the commentary of Abravanel and the annotations of Jacob Fidanque, bear his imprint. Samuel ben Jacob of Glogau, who, in 1689, printed, in conjunction with a certain Gamaliel, the "Zera' Berek," was a compositor in Rose's office. Between 1700 and 1708 no mention of Rose occurs; but his establishment still existed in 1715. In 1708 he published the "Ṭa'ame ha-Miẓwot," which had been, in the previous year, edited at Amsterdam; in 1715 he published the "Miktab me-Eliyahu," the last work known to have come from his press.

His son Johann continued his establishment until 1721. Among his publications were the "Leḳeṭ ha-Ḳemaḥ" of Moses Ḥagiz (1711) and the "Sha'are Torah" of Solomon Hanau (1719). From this press came, according to Steinschneider, the "Zemirot Purim" (1715), a Purim parody with a Judæo-German translation by Samuel ben Mordecai Poppert.

Isaac di Cordova.

During 1710–11 Isaac Hezekiah di Cordova established a press for which Isaac ben Joseph Benveniste and Isaac ben Moses Ḥayyim Levi Horwitz were compositors. No typographical records exist for the years between 1721 and 1780; but in the latter year a press was founded by Leser and Nathan ben Moses Mai. It endured ten years; among its compositors at various times were Jacob ben Judah Löb ben Zerach (1788) and Mattathiah ben Judah Löb Guttmann (1790).

The first printing establishment at Altona was founded by the above-mentioned Samuel ben Mordecai Poppert in 1720, in which year he produced the "Megillat Anṭiokus"; but, his means being limited, his productions were few. Between 1721 and 1731 he issued the following: an index to the Talmud entitled "Me'orer ha-Zikkaron"; Jacob ben Joel's annotations on the Pentateuch entitled "She'erit Ya'aḳob"; Ezekiel Katzenellenbogen's directions for "Jahrzeit"; "Seliḥot"; "Abot de-Rabbi Natan"; dirges for the Ninth of Ab; "Danielbuch," in Judæo-German rimes; a new edition of the above-mentioned Purim parody; and, finally, "Spanische Heiden," in Judæo-German. A new printing-press, which, however, had but a brief existence, was founded in 1732 by Ephraim Heckscher with the "Zera' Yisrael" of Israel ben Jacob as its first publication.

In 1735 Aaron ben Elijah Cohen opened a printing establishment, which was still active in 1764. But for the "Adne Paz" of Ephraim ben Samuel Heckscher, published in 1743, nothing would be known of the "Neue Druckerei" founded by Abraham ben Israel Halle. Owing to its proximity to Hamburg, the printing-house in Altona was practically a branch of that of the former city. Among the printers of Altona may be counted Jacob ben Ẓebi Emden (יעב״ץ), from whose press came the polemical works against Jonathan Eybeschütz. The most important printing establishment of Altona was that founded by Moses ben Mendel Bonn, which is still active, the most noteworthy of its later productions being the catalogue of the manuscripts of the Hamburger Stadtbibliothek, edited by Steinschneider (1878).

J. I. Br.

HAMBURGER, JACOB: German rabbi and author; born at Loslau, Silesia, Nov. 10, 1826. He received his early education in Ratibor, and then attended the yeshibot of Hotzenplotz, Presburg, and Nikolsburg, and the University of Breslau. In 1852 he was called as rabbi to Neustadt-bei-Pinne, and in 1859 went to Mecklenburg-Strelitz as "Landesrabbiner," which position he still (1903) occupies. In addition to various articles and sermons, he has published "Geist der Hagada, Sammlung Hagadischer Aussprüche aus den Talmudim und Midraschim," Leipsic, 1859. This work, published by the Institut zur Förderung der Israelitischen Literatur, was intended as the first of a series, but was never continued. It may be regarded as the forerunner of the Jewish encyclopedia which he began to publish in 1862, under the title "Realency-clopädie des Judenthums," of which three volumes have appeared. The first part contains Biblical articles, and the second Talmudic articles, the third being supplementary. A second edition appeared in Leipsic in 1896. As the work of one man it is a remarkable monument of the author's industry and learning.

D.

HAMBURGER (HAMBURG), JACOB BEN MORDECAI WIENER: Chief rabbi of Prague; died Nov. 12, 1753. Hamburger was one of the rabbis who in 1725 signed the address to the Polish Jews warning them against the Shabbethaians. He was the author of a work entitled "Ḳol Ḳol Ya'aḳob," containing novellæ on several treatises of the Talmud, collectanea on the Shulḥan 'Aruk, and homiletic notes on the Pentateuch arranged in the order of the parashiyyot (Prague, 1802).

K. M. SEL.

HAMBURGER, MORDECAI (known also as **Marcus Moses**): English communal leader; born in Hamburg about 1660; died in London about 1730; founder of the Hambro' Synagogue. He was a son of R. Moses ben Löb, one of the founders of the Altona community. He married Fradche, the daughter of Glückel von Hameln, and settled in London at the beginning of the eighteenth century. Having challenged the validity of a divorce granted by R. Uri Phoebus (Aaron Hart) to Ascher Ensel Cohen from his first wife on the ground that the pressure of his creditors compelled him to emigrate to the West Indies, Mordecai was put in "ḥerem." His business was thus brought to a standstill, and his offer of £500 as a guarantee for his future good conduct was refused. Mordecai thereupon opened a synagogue in his own house in Magpye alley, Fenchurch street, and engaged as rabbi Jochanan Holleschau, formerly his teacher, who had previously been a member of the London bet din. Several distinguished Continental rabbis, including Ẓebi Ashkenazi, dissolved the decree of excommunication against Mordecai, who then purchased a burial-ground in Hoxton and a site for a new synagogue in St. Mary Axe. Through the influence of Moses Hart, of the Great Synagogue, brother of R. Uri Phoebus, the city prohibited the erection of the synagogue in St. Mary Axe. In 1711 pecuniary troubles forced the hitherto successful Mordecai to emigrate; but in 1721 he returned to London with a large fortune, and in spite of the opposition of the Dukes Place and Bevis Marks synagogues, he built his long-projected synagogue in the garden adjoining his house in Magpye alley (1725). The synagogue was styled the HAMBRO' as conforming originally to the Hamburg minhag.

J. S. LE.

HAMBURGER, WOLF (ABRAHAM BENJAMIN): Talmudical scholar and head of the yeshibah in Fürth; born Jan. 26, 1770; died May 15, 1850. He was a contemporary of R. Moses Sofer, and is mentioned by the latter in his "Ḥatam Sofer." He wrote: (1) "Sha'ar ha-Zeḳenim," in two parts, the first containing homilies, responsa, and ethics; the second, responsa on civil law (Sulzbach, 1830); (2) "Simlat Binyamin," in three parts: (*a*) "Simlat Binyamin," responsa on the ritual laws of Oraḥ Ḥayyim and Yoreh De'ah; (*b*) "Naḥalat Binyamin," responsa on the ritual laws of Eben ha-'Ezer, Ḥoshen Mishpaṭ, and Haggadot, followed by a treatise on circumcision and by some homilies; (*c*) "Sha'ar Binyamin," halakic novellæ on different sections of the Talmud (Fürth, 1840–41); (3) "Ḳol Bokim," a funeral oration on the death of Meshullam Zalman Cohen (*ib.* 1820); (4) "Allon Bakut," funeral orations on the death of Herz Scheuer and others (2 vols., *ib.* 1823); (5) a funeral oration on the death of Maximilian Joseph I., King of Bavaria (*ib.* 1825).

Hamburger was one of the last, if not the last, head of a yeshibah in Germany who, without holding an official position in the congregation, devoted his time to the teaching of the Talmud; his wife carried on a business, and thus supported the household. Hamburger was strictly Orthodox, although opposed to religious ecstasy and mysticism ("Allg. Zeit. des Jud." 1846, pp. 266, 343). With the beginning of the Reform movement, about 1830, when the government aided the advocates of innovations in the Jewish fold, he had to contend with many adversities of which he bitterly complains in his books (see especially preface to "Simlat Binyamin"). His yeshibah was closed, and he was forced to leave the city. A great many prominent rabbis were his disciples, among them: Seligman Baer BAMBERGER of Würzburg, Isaac Löwy of Fürth, and David EINHORN.

HA-MEBASSER. See PERIODICALS.

HA-MEḤAḲḲER. See PERIODICALS.

HA-MELIẒ (lit. "the interpreter," but used in Neo-Hebrew in the sense of "advocate"): The oldest Hebrew newspaper in Russia. It was founded by Alexander ZEDERBAUM, in Odessa, in 1860, as a weekly, and was transferred to St. Petersburg in 1871. Its publication was several times suspended for lack of support or by order of the authorities; but it was always revived by the resource and energy of Zederbaum. "Ha-Meliẓ" began to appear daily in 1886; it is the only Hebrew daily paper published in the Russian capital. Leon Rabinowitz, who succeeded Zederbaum in 1893, is the editor (1903). "Ha-Meliẓ" has always been a representative of the progressive or "haskalah" movement, and even so severe a critic as Kowner admits that "it has been more useful to the Jews than have the other Hebrew newspapers" ("Ḥeḳer Dabar," pp. 52 *et seq.*, Warsaw, 1866). While it is not so literary or scientific as some of its contemporaries, it usually has more news and discussions of interest, and is consequently more popular.

TITLE-HEADING OF THE FIRST NUMBER OF "HA-MELIẒ."

Dr. J. A. Goldenblum was for many years associated with Zederbaum in its publication. A. S. Friedberg and J. L. Gordon are the best known of its associate editors. Almost every prominent Hebrew writer of the last forty years has at one time or another contributed to it. "Ḳohelet" (St. Petersburg, 1881), "Migdonot" (*ib.* 1883), "Meliẓ Aḥad Minni Elef" (on the occasion of the appearance of No. 1,000; *ib.* 1884), "Leḳeṭ Amarim" (*ib.* 1889), and "Arba'ah Ma'amarim" (*ib.* 1893) are collections of literary and scientific articles which appeared as supplements to "Ha-Meliẓ" in Zederbaum's time. "Ha-Yeḳeb" (*ib.* 1894), "Ha-Osem" and "Ha-Gat" (*ib.* 1897), and "Ha-Gan" (*ib.* 1899) are similar publications issued by Zederbaum's successor.

J. P. WI.

HAMELN (also known as **Hamelin**): Prussian town on the Hamel and Weser. Jews are recorded as present in Hameln as early as 1277. About the middle of the following century (1341) a considerable number of Jews lived there. They were admitted by the city council at moderate tax rates for terms of ten, sometimes only six, years; on May 1, 1344, they were permitted to build "ene scole" (synagogue); not long after, at the time of the Black Death, they were expelled. Before 1557, however, they had been readmitted, for in that year Duke Henry the Younger decreed the expulsion of all Jews living on Guelfic territory. On Jan. 6, 1590, his successor, Henry Julius, issued a like decree. The city council of Hameln, like those of Hanover and Göttingen, pleaded for its Jewish inhabitants; and when the Jews of Prague petitioned Emperor Maximilian II. for his intervention, upon the latter's advice the duke repealed the order.

At the end of the seventeenth century only a few Jewish families lived in Hameln: Glückel von Hameln, whose memoirs have made the place famous in Jewish history, mentions two. Until about the middle of the preceding century they had supported themselves by money-lending. Not until the political transformation of Germany after 1848 did their social position improve. At present about fifty Jewish families live in Hameln.

The only prominent names in the history of the Jewish congregation are those of Joseph Hamelin and Joseph Gershon Spiegelberg. The former, who was the father-in-law of Glückel, is mentioned in some documents under the name of "Jost" or "Jobst Goldschmidt"; in one of these documents the complaint is made that "he is surrounded with such pomp that it can scarcely be told." In 1659 he became the father-in-law of the famous court Jew Liepmann Cohen, or Liffmann Behrens, of Hanover, whose daughter Genendel married David OPPENHEIM. Joseph Gershon Spiegelberg (1802-44) was the central figure in his community, which still enjoys the fruits of his remarkable activity. He was a veterinary surgeon, who even in that reactionary period was honored with commissions from the royal Hanoverian government; and he was very active in congregational affairs. A benevolent society has existed in Hameln for centuries. The synagogue now in use was designed by the architect Oppler (who built the synagogue at Hanover also); it was dedicated July 2, 1879. The present cemetery has been in use since 1742; of the older cemeteries there is no trace. The following among the rabbis of Hameln should be mentioned: Eliezer Leser Langenzahn (d. 1749); Nathan ben Löb Hamel (d. 1751); Joseph, son of Simeon Levi (d. 1761); Moses Judah Selkeli (d. 1782). Joshua Leszynsky (d. July 9, 1893) was "official of the synagogue" during the fifties and sixties of the last century. He was succeeded by Abraham Rosenbaum (1873-97). Hameln's present population of about 20,000 includes 243 Jews.

D. S. Bac.

HAMELN, GLÜCKEL OF (Glückel von Hameln): German diarist; born about 1646 in Hamburg; died 1724 at Metz. In 1649, when the German Jews were expelled from Hamburg, Glückel's parents moved to Altona; but in consequence of the Swedish invasion of that city in 1657 they returned to Hamburg. Glückel frequented the "ḥeder" and was made acquainted with the Holy Scriptures as well as with the German-Jewish literature of the time. When barely fourteen she was married to Ḥayyim Hameln, and settled in the small town of Hameln. After a year the young couple moved to Hamburg, and lived there at first in modest circumstances, which by their industry were soon greatly improved. For a time they were associated with Jost Liebmann, afterward court jeweler to the Great Elector.

Glückel had six sons and as many daughters, whom she brought up very carefully and married to members of the best Jewish families in Germany. Her eldest daughter was married to a son of the wealthy court Jew Elias Gompertz at Cleve, and the wedding (1674) was celebrated in the presence of members of the electoral family of Brandenburg.

In 1689 Ḥayyim Hameln died, and Glückel was left with eight young children, the four others being already married. Besides their education she had to direct the large business left by her husband, which she managed with great success. She had planned, after she should have married all her children, to spend the remainder of her life in Palestine, but heavy losses in business changed her plans, and at the age of fifty-four she married the wealthy banker Cerf Levy of Metz (1700). Unfortunately, one year after the marriage Levy lost both his own fortune and that of his wife, and Glückel, hitherto accustomed to opulence, became dependent upon her husband's children. After the death of Levy (1712) she settled in the home of her daughter Esther, wife of Moses Krumbach-Schwab of Metz. Here she passed the last years of her life, occupied with the writing of her memoirs.

Glückel left an autobiography consisting of seven books written in Judæo-German interspersed with Hebrew, in which she relates her own varied experiences and many important events of the time. She often adds homiletic and moral stories of some length, taken partly from Midrash and Talmud, partly from Judæo-German books, which evidence wide reading. Her son, **Moses Hameln,** rabbi of Baiersdorf and son-in-law of the court Jew Samson Baiersdorf, copied the whole work from his mother's manuscript, and from this copy David Kaufmann edited it. The work contains most valuable information about the life of the German Jews, especially in Hamburg and Altona.

Bibliography: *Die Memoiren der Glückel von Hameln*, edited, with an introduction, by D. Kaufmann, Frankfort-on-the-Main, 1896; A. Feilchenfeld, *Die Aelteste Gesch. der Juden in Hamburg*, Breslau, 1899.

ḤAMEẒ. See Leaven.

HAMMATH ("hot springs"): One of the fortified cities of Naphtali (Josh. xix. 35). It is probably the same as Hammoth-dor, which was allotted to the Levites in Naphtali (*ib.* xxi. 32), and which, in the parallel list of I Chron. vi. 76, is called "Hammon." For its geographical position see Emmaus.

E. G. H. M. Sel.

HAMMEAH, TOWER OF (A. V. "tower of Meah"): Tower near the sheep-gate of Jerusalem (Neh. iii. 1, xii. 39). The rendering of the Greek version, "the tower of the hundred," might be interpreted to mean that the tower either was garrisoned by one hundred men, or was one hundred cubits high, or had one hundred steps.

E. G. H. B. P.

HAMMEDATHA (המדתא): Father of Haman (Esth. iii. 1, 10; viii. 5; ix. 10, 24). He is generally designated as the "Agagite," being referred to only once (*ib.* ix. 10) without that epithet. The name, derived from the Persian, signifies "given by the moon."

E. G. H. M. Sel.

HAMMER: The following designations for "hammer" are found in the Hebrew Bible:

1. "Maḳḳabah" ("maḳḳebet"): A tool or implement used by the stone-cutter for hewing stone (I Kings vi. 7); by the smith in fashioning iron (Isa. xliv. 12), or in fastening an idol "that it move not" (Jer. x. 4); and by the Bedouin to drive his tent-pin into the ground (Judges iv. 21).

2. "Paṭṭish": This word manifestly signifies a larger implement than the maḳḳabah. It was used to smooth gold plates (Isa. xli. 7) and to break rocks in pieces (Jer. xxiii. 29). In Jer. l. 23 Nebuchadnezzar is called "the hammer ["paṭṭish"] of the whole earth."

3. "Halmut 'amelim": A term occurring in Judges v. 26, and of which the meaning is very doubtful. "Halmut" is usually translated "hammer," but the grammatical construction of the word makes a concrete meaning improbable. It is also little likely that "'amelim," which accompanies it, is a derisive designation for "workmen." Probably there is a mistake in the text; but it is difficult to see how it might be improved.

4. "Kelappah": A designation found in Ps. lxxiv. 6. It is perhaps synonymous with the Assyrian "kalabah" and "kalapati," and seems to designate a kind of ax or hatchet rather than a hammer.

E. G. H. W. N.

HAMMERSCHLAG, JOSEPH (NATHAN NAT'A ḤAZZAN BEN MOSES NAPHTALI HIRSCH): Moravian cabalist; lived in the seventeenth century. He was the author of the following: "Or ha-Ganuz," commentary on part of the Zohar (begun in 1648); "Sefer Mo'ade ha-Shem," a treatise on the calendar, beginning with the year 1681 (written at Nikolsburg); cabalistic notes on the prayers, written on the margins of printed copies of the Psalms and of the prayers for the first evening of Rosh ha-Shanah. These three works are extant in manuscript in the Bodleian Library.

Bibliography: Neubauer, *Cat. Bodl. Hebr. MSS.* Nos. 2168, 3; 1999, 3; 2277, 1; Fürst, *Bibl. Jud.* i. 360; Wolf, *Bibl. Hebr.* iii. 853.

K. M. Sc.

HAMMERSTEIN, OSCAR: American theatrical manager; born at Berlin May 8, 1848, where he was educated. In March, 1863, he emigrated to America and settled in New York city, where he engaged in cigar-making. Turning to journalism, he became editor of the "United States Tobacco Journal"; he also invented cigar-making machinery which in some respects revolutionized the industry. In 1883 Hammerstein entered the theatrical field as manager of the old Thalia Theater, later becoming connected with Neuendorff in the management of the Germania Theater. Hammerstein subsequently built and managed the following theaters in New York: Harlem Opera House; Harlem Music Hall; Columbus Theater; Manhattan Opera House; The Olympia; Criterion Theater; Victoria Theater; and Belasco Theater; he is now (1903) building the Drury Lane Theater. Hammerstein has written a number of musical productions, some of which have attained wide popularity. Among the more important of these are: "The Kohinor," a musical comedy (1894); "Margarite," an opera ballet (1895); "War Bubbles," a musical comedy (1896); "Santa Maria," an opera (1896); and "Sweet Marie," an opera (1901).

S. I. G. D.

HAMMON: **1.** A place in the territory of Asher, mentioned in Josh. xix. 28, between Rehob and Kanah. It is believed that the ruins now called "Umm el-'Amud" (or "'Awamid") occupy its site. **2.** A city allotted to the Levites out of the tribe of Naphtali, and assigned with its suburbs to the descendants of Gershom (I Chron. vi. 61 [A. V. 76]).

B. P.

3. Name of a deity (אל חמן) mentioned in two Phenician inscriptions dedicated to "El-Ḥammon" and discovered by Ernest Renan in the ruins of Hammon, the modern Umm al-'Awamid, between Tyre and Acre. One of these inscriptions is dated 221 B.C., under the government of Ptolemy III. The Biblical place-names were possibly connected with the name of this deity.

E. G. H. M. Sc.

HAMMURABI: King of Shinar; perhaps identical with Abraham's contemporary, Amraphel, who is mentioned in Gen. xiv. 9; the sixth king in the first dynasty of Babylon. Hammurabi was the founder of the united Babylonian empire; he conquered Rim-Sin, King of Larsa and Sumer-Accad, joined the northern and southern kingdoms, and thus established the Babylonian empire, with its capital at Babylon. It is supposed to have been Hammurabi who laid the foundations of Babylon's prosperity, and made it the first city of the Orient, a position which it maintained until the time of the Seleucids. The direct traces of the connection between this first dynasty of Babylon and the West are still scanty. An inscription on a stone slab seems to represent Hammurabi in the capacity of "King of Amurru."

His Reign.

Hammurabi ruled from 2267 to 2213 [2394–2339, Oppert]. His father and predecessor was Sin-muballit. The later Babylonians regarded Hammurabi's period as the golden age of the Babylonian empire. After conquering the south Hammurabi improved its economic conditions. In the preceding period the canals, the efficient condition of which was essential to the cultivation of the land, had probably been very much neglected. Hammurabi endeavored to restore to the land its former fruitfulness by building a new canal, which he named "Hammurabi Is the Blessing of the People." Other accounts in his inscriptions record his building operations in connection with the most important sanctuaries of the land. Thus he continued the work, already begun by his predecessor Rim-Sin, on the temple of Ishtar at Zarilab in southern Babylonia; he "made rich" the city of Ur, the home of Abraham; rebuilt the sun-temples at Larsa and Sippar; and beautified and enlarged the temples of Babylon (E-sagila) and Borsippa (E-zida). Hammurabi died after an unusually long reign (fifty-five years), and left the newly founded Babylonian empire, firmly established and unified, to his son Samsu-iluna (2209–2180 [2339–2304, Oppert]). The latter's policy, like that of his successors, seems to have been the same as Hammurabi's.

Hammurabi's Code.

The most important of all the Hammurabi inscriptions is without doubt that found at Susa, containing his code of laws. This inscription was brought to light on the acropolis of Susa by J. de Morgan, at the head of a French archeological expedition, as a result of excavations carried on in December and January, 1901–02. The laws are inscribed in forty-four lines on a block of black diorite 2.25 meters in height, and constitute the most valuable known monument of Babylonian culture, the oldest document of the kind in the history of human progress. A bas-relief on the monument shows the king in a devout attitude before the sun-god Samas, who, seated, instructs him in the law. The god wears a crown, while in his right hand he holds a style and a circular object of symbolic import. This monument stood originally in the sun-temple of Ebabarra at Sippar. Thence it was carried to Susa by the Elamite conqueror Shutruk-Naḥḥunte in 1100 B.C. From a statement in the inscription it appears that a duplicate of the stone codex was erected in the temple of E-sagila at Babylon. Fragments of a second copy have been found in Susa itself. Four fragments of a copy in clay made for Assurbanipal's library are preserved in the British Museum. The code is a collection of decrees, which, however, do not constitute a legal system as generally understood. Private and criminal law are not separated. The transitions are arbitrary and lack any logical principle of succession. Paragraphs 128–194 are especially noticeable, containing regulations concerning marriage, family possessions, inheritance, and adopted children.

The picture of civilization which these laws unroll compels a change in the traditional ideas of the ancient Orient. A large number of regulations show a wholly unsuspected degree of culture. Manual labor, architecture, ship-building, commerce, and agriculture form the subject-matter of the code. There was a decided advance over the Bedouin civilization, since the Babylonians were under the protection of a prince who was like a father to his subjects. Only the slave seems to have been excluded from this protection; he was regarded as a chattel, as in Mosaic law, but with the difference that the "'ebed" in Israel was protected by the law against inhuman treatment (Ex. xxi. 20), whereas the slave in Babylonia, according to paragraph 282, was exposed to pitiless barbarity. The degrees of the social scale are not shown very clearly. The ranks of priest, king, free-born, and freedman were distinguished, as well as the class of slaves. Artisans belonged to the lower classes; even the physician was reckoned among them. Like them, he received a "wage"; whereas the architect, like the artist, received a "fee" ("kistu"). Paragraphs 198–214 contain the penal code; a free-born man was about equivalent to two freedmen, and a freedman to about two slaves.

Hammurabi Before the Sun-God.
(From a stele found at Susa.)

Parallels with Mosaic Code.

The laws concerning marriage and inheritance, property and punishments, show much similarity to the regulations of the Torah. Genesis xvi. 3 and xxx. 3, where the relation of Sarah to Hagar, and of Rachel to Bilhah, is spoken of, have light thrown upon them by paragraph 145 of Hammurabi's code: "If a man takes a wife and she bears him children and he desires to take a concubine—if he takes the concubine into his house, this concubine shall not be equal to the wife." In Lev. xx. 10 and Deut. xxii. 22 it is decreed that in case of adultery on the part of a wife both parties to the guilt shall be put to death; paragraph 129 of Hammurabi's code corresponds to this: "If any man's wife is found lying with another man, they shall both be bound and thrown into the water." Exactly the same law is found in Deut. xxii. 25-26 as in the code, paragraph 130: "If any one forces the betrothed of another, who has not yet known a man and is still living in her father's house—if he is found lying with her, he shall be put to death, but the woman shall be guiltless." An accusation brought against a woman by her husband is decided by appealing to God's judgment: the "jealousy offering" in Num. v. 11–31 is a parallel. Paragraphs 7 and 122 treat of the business of depositing goods (comp. Ex. xxii. 6–7); paragraph 176 assures to the public steward the right of holding property (comp. Gen. xv. 2; II Sam. ix. 2, 9, 10). Paragraph 117 sheds light on II Kings iv. 1; Isa. xxvii. 2, l. 1; it shows that bondage for debt, which could be made to include the whole family, terminated in the fourth year, as against the seventh according to Mosaic law (comp. Ex. xxi. 2).

The "Lex Talionis."

The *lex talionis*, indicated in Ex. xxi. 23–25; Deut. xix. 21; Lev. xxiv. 19, is also met with in the code, in fifteen places. But as in the Mosaic law (Ex. xxi. 26, 29–32; Lev. xxiv. 18; Num. xxxv. 31) the retaliatory punishment may be commuted by substitution or by a monetary satisfaction, so also in the code of Hammurabi, which distinguishes many cases in which a payment proportionate to the injury committed may be exacted. There is another class of punishments, found also in old Egyptian law, which falls under the law of retaliation: "If a physician wounds a man severely with the operating-knife and kills him, or if he opens a tumor with the operating-knife and the eye is injured, one shall chop off his hands" (§ 218). A similar fate befell the unskilful tattooer, according to paragraph 226. The code classes the casting of spells (§§ 1 and 2) as an offense against religion. The same verb, "abâru," appears in Deut. xviii. 11 as in paragraph 157, and with a like meaning: "If any one lies with his mother after his father, they shall both be burned," a decree which recalls Lev. xx. 11. Bearing false witness knowingly was punished with death, according to §§ 3 and 11 (comp. Deut. xix. 16–21). Revenge, or private enforcement of justice, was allowed in cases of burglary and stealing if (§§ 22, 26) the evil-doer was taken *in flagrante delicto*: Ex. xxii. 2 has a similar regulation. The principle that a man is responsible for damage caused by his carelessness is clearly brought out in the code. Among others belonging to this class of regulations is paragraph 229, to which Deut. xxii. 8 is comparable.

There is a parallel between paragraphs 251–252 of the code and Ex. xxi. 29–32, as regards the fine which the owner of vicious oxen must pay in the event of an accident if he has not taken proper precautions. If an animal is torn to pieces in the field by a wild beast, the shepherd is not responsible, according to paragraph 244 of the code (comp. Ex. xxii. 12). As in Ex. xxi. 28 the owner of an animal that gores is not liable to confinement on account of injury caused by his animal, so also in the code (§ 250). The "elders" are named with the judges as officers of the law, just as in Deut. xix. 12 the "ziḳne 'ir" appear as criminal magistrates. Bribing the judge was forbidden. An oath of purgation was accepted as proof in Ex. xxii. 7, 10–11: the same conception is met with in various places in the code. The Book of the Covenant makes a distinction in Ex. xxi. 13 between actions with and without intent: so does the code (§ 206). According to Ex. xxi. 22 the fine to be paid for injuring a pregnant woman was fixed by the husband; according to paragraph 209 of Hammurabi's code the fine was ten shekels. The law in Ex. xxi. 26 gives freedom to a slave whose eye is destroyed by his master: the code gives the slave the half of his value (§ 199).

Mode of Composition.

Superiority of Mosaic Code.

The fact that these laws are not arranged in logical classifications gives ground for the supposition that Hammurabi's code originated in a collection of important decisions. It contains, therefore, only typical cases from legal practise. Hence one seeks in vain in this code of Hammurabi for norms in the juridical sense which has attached to the term since Binding ("Handbuch des Strafrechts," i. 159); it does not contain pure commands of the lawgiver, like the Ten Commandments, "where the commands are given in a short and imperative form." However uncertain the interpretation, there is no manner of doubt that the Torah excels Hammurabi's code from an ethical-religious standpoint. The code, indeed, contains humane regulations, such as those clauses which treat of freeing a captive; which excuse a man from the payment of his taxes where the harvest has failed; which protect one in bondage for debt against ill treatment; which limit the right to dispose of goods given in security for debt. But the humanity of these provisions is outweighed by regulations such as those dealing with the legally organized system of prostitution (§§ 178–180), or with the conditions in the wine-shop in which evil people assembled (§ 109), and by the typical cases mentioned of outrageous cruelty toward animals (§§ 246–248), all which clauses evidence a low plane of morality.

A law such as Ex. xx. 17; Deut. v. 21, "thou shalt not covet" (which the Decalogue, with a perception of the fact that covetousness is the root of all lawbreaking, places above all other earthly laws), is not to be found anywhere in the code. Hence it follows that the code does not recognize the law of neighborly love, since self-restraint is wholly foreign to it. The institutions of the Torah which protect those who are weak economically, which set bounds to the unlimited growth of wealth, and which care for the poor are peculiar to itself. The law of love to one's neighbor (Ex. xxiii. 4 *et seq.*), which takes account of the stranger and even of the enemy, is nowhere discernible in Hammurabi's code. The law of retaliation, of cold, calculating equity, "as thou to me so I to thee"; the revenge of the stronger on the weaker—these form a broad foundation on which the love of one's neighbor finds no place.

Hammurabi's service to religion consisted chiefly in the fact that he opposed the use of spells and enchantments. A similar advance in this direction had already been made by King Gudea. The discovery of Hammurabi's code completely disproves one of the chief hypotheses of the Wellhausen school, that a codification on the part of the Hebrews was impossible before the ninth century.

G. S. Fu.

HAMNUNA I.: Babylonian amora of the third century; senior to Joseph b. Ḥiyya (Ket. 50b; Tosef., Ket. *s.v.* יתיב). He was a disciple of Rab (Abba Arika), from whom he received instruction not only in the Halakah (B. Ḳ. 106a), but also in ethics ('Er. 54a; comp. Ecclus. [Sirach] xiv. 11 *et seq.*). He seems to have been prominent among his fellow students, following Rab's example. What the master directed others to do or to omit, he directed his colleagues. "Charge your wives," said he, "that when standing by the dead they pluck not their hair out [for grief], lest they transgress the inhibition, 'Ye shall not make any baldness between your eyes for the dead'" (Deut. xiv. 1; Yer. Ḳid. i. 61c; comp. Yer. Ma'as. iv. 51c.; Yer. Suk. iv. 54b). He honored Rab's memory not only by citing him as an authority ('Er. 77b, *et al.*), but also by endeavoring to prevent deviations from customs once established by Rab. When a scholar came to Ḥarta de-Argaz and decided a ritualistic point contrary to the opinion of Rab, Hamnuna excommunicated him, arguing that the scholar should not have ventured to act thus at Rab's last residence (Shab. 19b). In Haggadah he is not often met with. Once he quotes a saying of Rab's ('Ab. Zarah 19b).

E. C. S. M.

HAMNUNA II.: Babylonian amora of the third and fourth centuries; in the Babylonian Talmud sometimes referred to as **Hamnuna Saba** ("the elder"), to distinguish him from a younger Hamnuna. He was a native of Harpania (Hipparenum; Neubauer, "G. T." p. 352), but paid his poll-tax at Pum-Nahara, to which place he was therefore assumed to belong (Yeb. 17a). He sat at the feet of the most prominent teachers of the latter half of the third century, among whom were Adda b. Ahabah, Judah b. Ezekiel, and 'Ula; and by most of them he was greatly respected for his talent (Giṭ. 81b; Yeb. 17a; Shebu. 34a). But he was most esteemed by his teacher Ḥisda, under whom he rapidly rose from the position of pupil to that of colleague (Shab. 97a; 'Er. 63a; Yer. Hor. iii. 47c). Subsequently Huna became his teacher; and as long as Huna lived Hamnuna would not teach at Ḥarta de-Argaz, the place of Huna's residence ('Er. 63a). Hamnuna eventually became a recognized rabbinical authority, and the foremost scholars of his generation, like Ze'era I., applied to him for elucidations of obscure questions (Ber. 24b). The "resh galuta" (exilarch) repeatedly consulted him on scholastic points (Yer. Shab. xii. 13c; Shab. 119a). As a haggadist he strongly advocated the study of the Law, which, according to him, should precede everything, even good deeds (Ḳid. 40b). Providence decreed the destruction of Jerusalem solely because children were not schooled in the Law, as it is written, "I will pour it [fury] out upon the children abroad" (Jer. vi. 11), which is a reference to the fact that the children are abroad, and not in the schools (Shab. 119b). Therefore as soon as a child learns to talk it must be taught to say, "The Torah which Moses hath commanded us is the inheritance of the congregation of Jacob" (Deut. xxxiii. 4, Hebr.; Suk. 42a).

In the numerical value of תורה ("Torah") Hamnuna finds Scriptural support for Simlai's declaration that the Israelites received at Sinai six hundred and thirteen commandments: To the people Moses communicated תורה (400 + 6 + 200 + 5 = 611), and the first two of the Decalogue were communicated to them directly by God (Mak. 23b; comp. Ex. R. xxxiii. 7). He declared that insolence is providentially punished by absence of rain. This teaching he derives from Jer. iii. 3: "The showers have been withholden, and there hath been no latter rain"; because "thou hadst a whore's forehead, thou refusedst to be ashamed" (Ta'an. 7b). Hamnuna was a considerable liturgical author. To him are ascribed five benedictions which an Israelite should utter at the sight of different Babylonian ruins (Ber. 57b), two to be spoken on seeing large armies (Ber. 58a), and one before engaging in the study of the Torah (Ber. 11b). The last one has been universally adopted, and is still recited at the public readings of the Torah. Various other prayers are ascribed to him (Ber. 17a), one of which is incorporated in the ritual (see Hamnuna Zuṭa). Hamnuna died at the same time as Rabbah b. Huna, and their remains were transported together for burial in Palestine.

E. C. S. M.

HAMNUNA OF BABYLONIA: Teacher of the Bible; junior of Ḥanina b. Ḥama and senior of Jeremiah b. Abba, both of whom he consulted on an exegetical question (Yer. B. B. vii. 15c; comp. Yer. Ta'an. iv. 68a; Eccl. R. vii. 7). He was the innocent cause of great provocation to Judah I., and of consequent neglect of Ḥanina. Judah lectured on Ezek. vii. 16, and misquoted it. His pupil Ḥanina publicly corrected him, and when the patriarch asked him where he had learned Bible, he replied, "From R. Hamnuna of Babylonia." As Hamnuna was Ḥanina's junior, it appeared to the patriarch that Ḥanina jested at his expense, as if implying that mere tyros knew the Bible better than he. This so angered him that he told Ḥanina, "If thou ever visitest Babylonia, tell the people that I have appointed thee ḥakam" ("sage," a title less honorable than "rabbi"). By this Ḥanina understood that Judah would never promote him to an academic rectorate (Yer. Ta'an. *l.c.*; Eccl. R. *l.c.*; see Ḥanina b. Ḥama).

E. C. S. M.

HAMNUNA ZUṬA: Babylonian amora of the fourth century; junior and contemporary of Hamnuna II. (hence his cognomen "Zuṭa"). Hamnuna II. had composed a penitential prayer beginning "My God! Before I was formed I was worthless" (see Confession). This prayer Raba adopted and recited daily, while Hamnuna Zuṭa appropriated it for recitation on the Day of Atonement (Yoma 87b; comp. Ber. 17a).

HA-MODIA' LA-ḤADASHIM. See Periodicals.

HAMON: Ancient family, originally from Spain, which settled in Turkey and produced several physicians. The following were among its more important members:

1. **Aaron b. Isaac Hamon:** Physician at Constantinople about 1720.

2. **Joseph Hamon:** A near relative of Isaac Hamon; born, probably, at Granada, Spain. Expelled from his home, he went at an advanced age to Constantinople, where, according to "Shalshelet ha-Ḳabbalah" (p. 50b), he was physician to Sultan Salim I.

3. **Joseph Hamon:** Son of Moses Hamon (No. 5) and grandson of Joseph Hamon (No. 2); died before 1578. Like his father, he was physician at the court of the sultan, and a patron of Jewish learning. He was also a member of a society at Constantinople formed for the cultivation of Jewish poetry, other members being Saadia Longo, who addressed a poem to Hamon, and Judah Sarko, who addressed to him a rhetorical composition on his marriage. Hamon was one of those to whom the Jews of Salonica were indebted for having their

ancient privileges restored by Salim II. in 1568. Hamon's widow addressed a letter to Judah Abravanel in January, 1578.

Bibliography: Carmoly, *Dibre ha-Yamim li-Bene Yaḥya*, p. 39; Almosnino, *Me'ammez Koaḥ*, p. 7a; Steinschneider, *Hebr. Bibl.* ii. 84.

4. Judah Hamon: Physician at Adrianople; died there May 17, 1678 ("El Progreso," i. 194 *et seq.*).

5. Moses Hamon (Amon): Son of Joseph Hamon (No. 2); born in Spain about 1490; died before 1567. Going with his father to Constantinople, he became physician to Sultan Sulaiman I. This "famous prince and great physician," as he is called by Judah ibn Verga, accompanied the monarch on all his expeditions, enjoying great favor on account of his knowledge and skill. He was a fine linguist, versed in Arabic, Turkish, and Persian, and was a patron of Jewish learning. He printed some Hebrew works at Constantinople as early as 1515 and 1516. He also built in that city, at his own cost, a school which was presided over by the learned Joseph Taitazak of Salonica. He did not, however, translate the Pentateuch into Persian, nor the prayers of the Israelites into Turkish, as Manasseh b. Israel records; but he had Jacob Tavus' Persian Pentateuch translation, together with Saadia's Arabic translation, printed at his own expense in 1546.

Hamon, who was everywhere highly respected on account of his firm character and philanthropy, was a fearless advocate of his coreligionists. When about 1545 the Jews of Amasia were falsely accused of having murdered a Christian for ritual purposes, and the innocence of those that had been executed was established soon after by the reappearance of the missing man, Hamon induced the sultan to decree that thenceforward no accusation of the kind should be entertained by any judge of the country, but should be referred to the royal court (see Danon in "El Progreso," i. 148 *et seq.*, where a legendary account of the event is given, probably taken from "Me'ora'ot 'Olam," Constantinople, 1756).

Hamon was also called upon to decide communal difficulties. After an affray which arose in the Jewish community of Salonica Hamon summoned the instigators to Constantinople and induced the sultan to send a judge to Salonica to investigate the affair and to punish the guilty ones (see Danon, *l.c.* i. 162 *et seq.*, 178 *et seq.*, where several of Hamon's Hebrew letters are reprinted). The sultan, at Hamon's request, exempted the latter's descendants from all taxes.

Bibliography: Conforte, *Ḳore ha-Dorot*, ed. Cassel, pp. 32b, 34b; *Shebeṭ Yehudah*, pp. 33, 53, 111; Joseph ha-Kohen, *'Emeḳ ha-Baka*, p. 105; Samuel Usque, *Consolaçao as Tribulaçoens de Yisrael*, p. 208a; M. A. Levy, *D. Bibl.* ii. 67, 83; Carmoly, *Histoire des Médecins Juifs*, p. 159; Grätz, *Gesch.* ix. 33, 339; *R. E. J.* xl. 230.

6. Moses Hamon: Physician at Constantinople; nephew of Moses Hamon (No. 5). He was one of the signers of the document drawn up by the Jewish scholars of Constantinople in 1587, asking that they be exempted from the communal taxes.

Bibliography: Samuel de Avila, *Keter Torah*, p. 2a.

D. M. K.

HAMON-GOG (more fully **Valley of Hamon-gog**): A glen at one time known as "the valley of the passengers on the east of the sea," so named after the burial there of "Gog and all his multitude" (Ezek. xxxix. 11, 15).

E. G. H. B. P.

HAMOR (**חמור**): A Hivite prince; father of Shechem, whose defilement of Dinah caused the destruction of a whole city, including his own family (Gen. xxxiii. 19, xxxiv. 2, and *passim*). Hamor had great influence over the Shechemites; for on his advice they circumcised all their males (Gen. xxxiv. 24). As the inhabitants of Shechem are called "the children [sons] of Hamor" (*ib.* xxxiii. 19; Josh. xxiv. 32), and "the men of Hamor" (Judges ix. 28), it would seem that Hamor was the founder of Shechem, and that the expression "the father of Shechem" is applied to him just as "the father of Bethlehem" (I Chron. ii. 51) and "the father of Tekoa" (*ib.* iv. 5) are applied to the founders of those cities respectively.

E. G. H. M. Sel.

HAMRAM. See Hemdan.

HAMUEL (R. V. **Hammuel**; **חמואל**): The son of Mishma, a descendant of Simeon (I Chron. iv. 26).

E. G. H. M. Sel.

HAMUL (**חמול**): The younger son of Pharez, Judah's son by Tamar, and head of the family of the Hamulites (Gen. xlvi. 12; Num. xxvi. 21; I Chron. ii. 5).

E. G. H. M. Sel.

ḤAMUL ELIEZER MAẒLIAḤ B. ABRAHAM DE VITERBO: Roman rabbi and physician in the sixteenth and seventeenth centuries. He was of a family of rabbis, physicians, and merchants. In 1570 he appears as "fattore" or representative of a Jewish congregation, but in 1587 he is mentioned as occupying the Roman rabbinate. He is described as one of the most erudite rabbinical scholars of his age. Among his contemporaries were R. Joseph b. Sabbatai de Rieti of Sienna and R. Raphael b. Benjamin di Modigliano. Besides many responsa, he wrote a Latin essay defending his coreligionists against the charge of falsifying the Scriptures. This he addressed to Cardinal Sirleto, Protector of the Neophytes in Rome. To the Italian reader he is best known by his "Il Tempio di Oratori" (Venice, 1585), a translation of Moses Rieti's מעון השואלים, which became one of the most popular devotional works among the Italian Jews. This translation he dedicated in Hebrew verse to Donna Corcos, daughter of Solomon Corcos, president of the congregation. As does his letter to Sirleto, it bears his Italian name, "Lazaro Hebreo da Viterbo."

Bibliography: Vogelstein and Rieger, *Gesch. der Juden in Rom*, ii. 363 *et seq.*

E. C. S. M.

HAMUTAL (**חמוטל**): Daughter of Jeremiah of Libnah and mother of Kings Jehoahaz and Zedekiah (II Kings xxiii. 31, xxiv. 18; Jer. lii. 1). In the last two passages the more correct reading is "Hamital," which is invariably adopted by the Septuagint.

E. G. H. M. Sel.

ḤANA (ḤUNA) B. BIZNA: Babylonian scholar of the third and fourth centuries; judge at Pumbedita (B. Ḳ. 12a). He especially cultivated the field of Haggadah, in which he became distinguished. R. Sheshet, who once attempted to criticize Ḥana's homiletic expositions, but was soon defeated, remarked, "I can not contend with Ḥana in the field of the Haggadah" (Suk. 52b). As a halakist Ḥana seems to have been an independent thinker. In spite of criticism he allowed himself to frequent pagan barber-shops in the suburbs of Nehardea ('Ab. Zarah 29a). To him belongs the credit of preserving from oblivion the name and teachings of Simon Ḥasida, a late tanna rarely mentioned by any other rabbi (Ber. 3b, 43b; Ket. 67b; Yeb. 60b; *et al.*).

E. C. S. M.

ḤANA B. ḤANILAI: Babylonian scholar and philanthropist of the third century; the junior of Huna I. and Ḥisda (Beẓah 21a, 40a). The Talmud relates of him that he was wont to employ scores of bakers in the preparation of bread for the poor, and that his hand was ever in his purse, ready to extend help to the needy. His house was provided with entrances on all sides, that the wayfarer might the easier find entry, and none ever left it hungry or empty-handed. He would leave food outside the house at night, that those who felt shame in soliciting might help themselves under cover of darkness. Eventually his house was destroyed. 'Ula and Ḥisda once saw the ruins; Ḥisda was much moved at the sight, and when 'Ula inquired the cause of his emotion, Ḥisda acquainted him with its former splendor and hospitality, adding, "Is not the sight of its present condition sufficient to force sighs from me?" 'Ula, however, replied, "The servant should not expect to fare better than his master: God's sanctuary was destroyed, and so was Ḥana's house; as the former, so will the latter be: God will restore it" (Ber. 58b; comp. Meg. 27a). Notwithstanding his learning and his wealth, Ḥana was extremely modest and obliging, ready even to lift physical burdens from the shoulders of the worthy. Huna once carried a shovel across the street; Ḥana met him and at once offered to relieve him. Huna, however, would not permit it. "Unless," said he, "thou art accustomed to do such things at home, I can not let thee do it here: I will not be honored through thy degradation" (Meg. 28a).

E. C. S. M.

HANAMEEL (חנמאל; R. V. **Hanamel**).—**Biblical Data:** Son of Shallum and cousin of Jeremiah. The latter purchased a field from him for seventeen shekels of silver in token of his belief that the Israelites would return to their land (Jer. xxxii. 7-12).

E. G. H. M. SEL.

——**In Rabbinical Literature:** Hanameel was the son of Shallum, the man who was miraculously resurrected from the dead (Pirḳe R. El. xxxiii.). His mother was the prophetess Huldah. Like his parents, he was possessed of great piety and learning; he knew the names of the angels, and could conjure them at will (see INCANTATION). Thus when the Chaldeans were besieging Jerusalem he conjured angels, who, in obedience to his summons, came down from heaven as warriors and put the enemies of Israel to flight. Thereupon God changed the names of the angels so that Hanameel's conjurations would be unavailing to prevent the destruction of Jerusalem. Hanameel, however, summoned the "Prince of the World" (שר העולם), an archangel in charge of the government of the world (see METAṬRON), who actually lifted Jerusalem up to heaven. The city could not then be destroyed until God had cast it down again, and had made it impossible for the "Prince of the World" to come to its aid (Ekah Zuṭa, ed. Buber, p. 62). A legend closely related to this haggadah is found in Lam. R. ii. 2 (ed. Buber, p. 110, end). On his father's as well as his mother's side Hanameel was a descendant of Rahab by her marriage with Joshua, being one of eight prophets that resulted from this marriage (Sifre, *l.c.*; Meg. *l.c.*; comp. Seder 'Olam R. xx.).

J. L. G.

HANAMEEL THE EGYPTIAN: High priest; flourished in the first century B.C. After assuming the government of Palestine, Herod surrounded himself with creatures of his own; from among these he chose one Hanameel to fill the office of high priest made vacant by the ignominious death of Antigonus (37 B.C.). Hanameel (Ananelus) was an Egyptian according to the Mishnah (Parah iii. 5), a Babylonian according to Josephus ("Ant." xv. 2, § 4); though of priestly descent, he was not of the family of the high priests. But Hanameel's incumbency was of short duration. Prudence compelled Herod to remove him, and to fill his place with the Hasmonean ARISTOBULUS (35 B.C.). The youthful Hasmonean, however, was too popular with the patriotic party; though he was a brother of Mariamne, Herod's beloved wife, he was treacherously drowned at Herod's instigation (35 B.C.), and Hanameel was restored to the high position. How long he continued in office historians do not state; but it could not have been for many years, since after the execution of Mariamne (29 B.C.) Herod remarried, and appointed his second father-in-law, Simon b. Boethus, to the high-priesthood, removing Joshua b. Fabi. Hanameel is credited with having prepared one of the total of seven "red heifers" (see Num. xix.) which were provided in all the centuries from Ezra's restoration to the final dispersion of the Jews (Parah *l.c.*).

E. C. S. M.

HANAN (חנן): **1.** A Benjamite chief (I Chron. viii. 23). **2.** The sixth son of Azel, also a Benjamite, of the family of Saul (*ib.* viii. 38). **3.** Son of Maachah, one of David's mighty men (*ib.* xi. 43). **4.** Progenitor of a family of the Nethinim, who returned from captivity with Zerubbabel (Ezra ii. 46; Neh. vii. 49). **5.** Son of Igdaliahu, a man of God, whose sons had a chamber in the house of the Lord (Jer. xxxv. 4). **6.** One of the Levites who assisted Ezra in the reading of the Law (Neh. viii. 7), and who sealed the covenant (*ib.* x. 10). **7.** One of the chiefs who also sealed the covenant (*ib.* x. 22).

8. Another signatory to the covenant (*ib.* x. 26). **9.** Son of Zaccur, and one of the storekeepers of the provisions taken as tithes (*ib.* xiii. 13).

E. G. H. M. Sel.

HANAN (ḤANIN, ḤANINAN): Scholar of the third amoraic generation (third century). He was probably a Babylonian by birth and a late pupil of Rab, in whose name he reports halakot and haggadot (Yoma 41b; Suk. 15b *et seq.*; Ned. 7b); and is found associating with Anan, who lived and died in Babylonia (Ḳid. 39a). Frequently, however, he appears in Palestine, where he waged controversies with the foremost scholars of his generation: Ela, Hoshaiah II., Levi (Yer. Dem. vi. 25c; Gen. R. xxix. 4; Num. R. xiii. 8). Hanan teaches: Whoso invokes God's retribution on his neighbor suffers first. Thus, Sarah called on God to judge between her and Abraham (Gen. xvi. 5), and soon thereafter, it is written (Gen. xxiii. 2), "Sarah died . . . and Abraham came to mourn for Sarah, and to weep for her" (B. Ḳ. 93a). Israel's enslavement in Egypt was a divine retribution for selling Joseph. "The Holy One, blessed be He! said to the [eponyms of the] tribes, 'Joseph was sold for a servant: as ye live, ye shall annually repeat the statement, "We were servants of Pharaoh in Egypt" ' " (Midr. Teh. x 2). The last verse forms part of the Seder service. In the threefold threat conveyed in Deut. xxviii. 66, Hanan finds foreshadowed the mental anguish of him who possesses no land and is obliged to buy provisions by the year or by the week from the markets, or by the day from the shopkeeper (Yer. Shab. viii. 11a; see Bebai I.; comp. Aḥai b. Josiah). Hanan married into the patriarchal family, and for many years had no children. When at last he was blessed with a son, Hanan died. At his funeral this elegy was pronounced: "Happiness to sorrow was changed; mirth and mourning have met; joy was succeeded by wailing; at the first caress died the caresser." The child was named Hanan after its father (M. Ḳ. 25b).

E. C. S. M.

HANAN (ḤANIN), ABBA: Tanna of the second century; younger contemporary of Simon of Shezur, Josiah, and Jonathan (Mek., Mishpaṭim, 8, 12, 20; Nazir 45a). Possibly he sat at the feet of Eliezer b. Hyrcanus, in whose name he transmits many halakic midrashim (seventeen in Sifre, Num. 4 [Ḥanin], 7, 11, 23, 35, 52, 68, 72 [Hanin], 107 [five times], 118, 126, 133, and 137; and elsewhere). Indeed, it may be said that Abba Hanan was simply Eliezer's mouthpiece. Only once (Sifre, Deut. 94) does he appear independent of Eliezer, and Bacher ("Ag. Tan." i. 131) represents him here as opposing his master (see Tosef., Sanh. xiv. 3); but a careful comparison of the sources proves that there is no antagonism. Eliezer's harsh verdict refers to minors who followed their elders in apostasy (שהודחו), while his junior speaks of minors who were not guilty of the crime. Occasionally Abba Hanan appears to report also in the name of Eleazar (Mek., Mishpaṭim, 20), but the version is not authentic, and Weiss ("Introduction to the Mekilta," p. xxx.) proves it to be erroneous.

HANAN B. ABISHALOM. See Hanan the Egyptian.

HANAN THE EGYPTIAN: 1. (Hanan b. Abishalom.) One of the police judges at Jerusalem in the last decades of its independence (see Admon b. Gaddai). Several of his decisions have been preserved (Ket. xiii. 1 *et seq.*). **2.** Disciple of Akiba, quoted among "those who argued before the sages" (Sanh. 17b; comp. Yer. Ma'as. Sh. ii. 53d). Only one halakah is preserved in his name (Yoma 63b).

HANAN OF ISKIYA (ASIKIA): Rector of the Talmudical academy at Pumbedita. Hormizd IV. having disgraced the latter years of his reign by cruel persecutions of the Christians and the Jews, the Talmudical academies of Sura and Pumbedita were closed, their masters removing to Firuz-Shabur, in the neighborhood of Nehardea. The accession of Hormizd's general, Bahram Chobin, relieved the Jews from persecution; the oppressive enactments of Hormizd were repealed, and Hanan returned to Pumbedita, reopened the academy, and assumed the rectorate, which he held for nineteen years (589–608).

Thus far almost all historians agree, but not in regard to Hanan's inauguration of the era of the Geonim. Some, believing that the line of the Saboraim covered several generations—from the death of Rabina bar Ḥuna (499) to the middle of the seventh century—include Hanan in the list of the Saboraim. Others, however (see Halevy, "Dorot ha-Rishonim"), following the tradition that Giza ('Ena, Gada) and Simuna were the last of the Saboraim (see "Seder Tanna'im we-Amora'im"), and that Hanan of Iskiya sat at the feet of the disciples of these masters, begin the geonic period with the restoration of the Pumbedita academy, and to its promoter they ascribe the origination of the title "Gaon" (see Gaon). Be this as it may, Hanan of Iskiya is remembered as the restorer of the Pumbedita Talmudical academy, and as the head of a line of teachers covering over four hundred years (589–1038)—to the death of Hai Gaon and the end of the geonic period.

HANANEEL: Babylonian scholar of the third century; disciple of Rab (Abba Arika) and colleague of Beruna and Isaac b. Maḥseiah (Yer. Ber. vi. 10d; Pes. 103a). He was a great halakist, and so familiar with his master's opinions that once, when an explanation of a certain current decision was sought of Ḥuna, the latter would not discuss it until it had been ascertained of Hananeel that Rab held the decision as law (Bek. 24b). By profession he was a scribe, and was so skilful and reliable that Ḥisda declared that the whole Law might be written out by Hananeel from memory were it not that the sages forbade writing Scripture in that manner (Meg. 18b; comp. Yer. Meg. iv. 74d). Hananeel's name appears quite frequently in the Jerusalem, as well as in the Babylonian, Talmud, Ze'era I. having carried to Palestine many of his teachings, particularly such as refer to the scribe's functions (Yer. Meg. i. 71c, *et al.*). But few haggadot are connected with his name, and even these are merely repetitions from Rab (Pes. 68a, *et al.*).

HANANEEL BEN AMITTAI: Spiritual leader of the Jewish community of Oria, Italy, in the ninth century. He is said to have been descended from a Jerusalem family, members of which were taken to Italy by Titus. In the Ahimaaz Chronicle Hananeel is credited with great learning and piety, and is said to have been well versed in the secret knowledge of Cabala, through which he performed miracles. Ahimaaz also relates a disputation Hananeel had with the Archbishop of Oria.

HANANEEL IBN ASKARA. See SHEM-ṬOB BEN ABRAHAM GAON.

HANANEEL BEN ḤUSHIEL: Rabbi of Kairwan; Biblical and Talmudical commentator; born at Kairwan about 990; died, according to Abraham Zacuto ("Yuḥasin," 98b), in 1050. It seems that his father, Ḥushiel, was his only master, but as by correspondence he learned a great deal from Hai Gaon, he was supposed by some French scholars, among them the tosafists R. Tam and R. Isaac (RI), to have been Hai's pupil. After his father's death, Hananeel and his companion Nissim b. Jacob ibn Shahin were named rabbis of Kairwan, and together presided over the school. Hananeel had, besides, a large business and was very rich, so that he left to his nine daughters a fortune of ten thousand gold pieces (Abraham ibn Daud, "Sefer ha-Ḳabbalah"). He was one of the first rabbis after the fall of the geonic school, and he contributed greatly to the spread of the study of the Talmud. In several places of Europe his name was well known, but not his origin, so that he was called by some scholars "Hananeel the Roman." He contributed largely to the revival of the Talmud of Jerusalem, which had up to his time been neglected, supplanted as it was by its younger companion, the Talmud of Babylon. Through his commentary to the Talmud he especially rendered great service in establishing the correct text of that work, of which he had before him the oldest manuscripts. Hananeel strictly followed Hai Gaon in his commentaries, in so far as the latter confined himself to plain interpretation and avoided mysticism. Of all the quotations from Hananeel made by later commentators, there is not a single one which is mystical in character. Hananeel certainly knew Arabic and also Greek, as is shown by his explanation of many Arabic and Greek words. But, unlike his companion Nissim b. Jacob, he wrote all his works in good Hebrew. He even composed an elegy on Hai Gaon in Hebrew verse.

The works bearing Hananeel's name are: (1) A commentary on the Pentateuch, in which there is much directed against the Karaites. It is cited by many later Biblical commentators, chiefly by Baḥya b. Asher. Rapoport has gathered all the quotations from Hananeel made by Baḥya, and has published them in the "Bikkure ha-'Ittim" (xii. 34–55), and Berliner has added to these extracts those made by other commentators, and has published them, with Hananeel's commentary to Ezekiel, in the "Migdal Ḥanane'el." (2) A commentary to the Talmud, which was much utilized by Isaac Fasi (RIF), and Nathan b. Jehiel, the author of the "'Aruk," both of whom were supposed to have been Hananeel's pupils. The manuscripts of this commentary are to be found in Munich MS. No. 227, and contain the treatises Pesaḥim (published by Stern, Paris, 1868), 'Ab. Zarah, Shebu'ot, Sanhedrin, Makkot (published by Berliner in the "Migdal Ḥanane'el" in 1876), and Horayot. The Vatican MS. No. 127 contains Yoma, Megillah, Rosh ha-Shanah, Ta'anit, Sukkah, Beẓah, and Mo'ed Ḳaṭan; No. 128 contains Shabbat, 'Erubin, Pesaḥim, and Ḥagigah; and finally Codex Almanzi in London contains Baba Ḳamma, Baba Meẓi'a, Sanhedrin, Makkot, and Shebu'ot. But S. D. Luzzatto proved in "Literaturblatt des Orients" (xi. 243) that the commentary on 'Erubin belongs to Hananeel b. Samuel. A fragment of the commentary to Yoma has been found by Schechter in the Genizah of Cairo, and has been published by him in his "Saadyana," p. 116, Cambridge, 1903. It seems, however, from the "'Aruk" that Hananeel's commentary covered all the treatises of the Talmud. (3) A collection of responsa, quoted in the "Shibbole ha-Leḳeṭ" and in other responsa collections. (4) "Sefer ha-Miḳẓo'ot," decisions on ritual laws, quoted by Mordecai on Ketubot, No. 175, and on Shebu'ot, No. 756. (5) "Sefer Ḥefeẓ," decisions on civil laws. Rapoport, however, proved (*l.c.* note 36) that the author of this work was Ḥefeẓ b. Yaẓliaḥ. (6) "Seder Tefillah," a prayer-book of the same kind as that of Saadia and Amram Gaon. There is also a "pizmon" beginning "Ḥasadeka tagbir," signed "Hananeel," which may mean Hananeel b. Ḥushiel.

E. C. M. SEL.

HANANIAH (חנניה): **1.** A son of Heman the singer, and chief of the sixteenth of the twenty-four musical divisions into which the Levites were divided by King David (I Chron. xxv. 4, 23). **2.** One of the captains of King Uzziah's army (II Chron. xxvi. 11). **3.** Father of Zedekiah, one of the princes who sat in the house of King Jehoiakim (Jer. xxxvi. 12).

4. Son of Azur of Gibeon; a false prophet in the reign of Zedekiah (*ib.* xxviii. 1). He prophesied in the fourth year of Zedekiah's reign that two years later Jeconiah and all the captives of Judah, together with the vessels of the Lord's house which had been transported to Babylon by Nebuchadnezzar, would be brought back to Jerusalem. Hananiah thereupon took the yoke from Jeremiah's neck and broke it as a token that the yoke which had been imposed by Nebuchadnezzar on Israel would also soon be broken (*ib.* xxviii. 2-10). Jeremiah, however, was commanded by God to tell Hananiah to replace the wooden yoke by an iron one, as the yoke to be borne by the Israelites would be still stronger than the former one had been (*ib.* xxviii. 13-14). Jeremiah denounced Hananiah as a false prophet, and assured him that he would die that same year for having taught rebellion against the Lord. Hananiah died three months later (*ib.* xxviii. 17).

According to R. Joshua b. Levi (Yer. Sanh. xi. 7), Hananiah b. Azur was not a false prophet, but he used to repeat Jeremiah's prophecies in different places in Jerusalem, attributing them to himself. In the above-mentioned case where Hananiah seemed to contradict Jeremiah, it was by a miscalculation that he announced the restoration of Israel within two years. It is further said (*ib.*) that there is a discrepancy in the passage where Hananiah's death is recorded: "Hananiah the prophet died the same year in the seventh month" (Jer. xxviii. 17): for as, according to the Jewish reckoning, the seventh month was the first of the year, it could not be "in the same year." The Talmudists inferred that Hananiah died on the eve of New-Year's Day, after commanding his family to keep secret his death in order to prove Jeremiah mistaken.

5. Grandfather of Irijah, captain of the ward at the gate of Benjamin (Jer. xxxvii. 13). **6.** Head of a Benjamite family (I Chron. viii. 24). **7.** The companion of Daniel, Mishael, and Azariah. He was named "Shadrach" by Nebuchadnezzar, and together with Mishael and Azariah (Meshach and Abednego) was cast into the fire by command of Nebuchadnezzar (Dan. i. 6, 7, 11, 19; ii. 17; iii. 12-23). See AZARIAH IN RABBINICAL LITERATURE. **8.** Son of Zerubbabel (I Chron. iii. 19). **9.** Son of Bebai, who returned with Ezra from Babylon (Ezra x. 28). **10.** One of the apothecaries who built a portion of the wall of Jerusalem in the time of Nehemiah (Neh. iii. 8). **11.** One of the chiefs of priestly families in the days of Joiakim, the high priest (*ib.* xii. 12). **12.** Ruler of the palace at Jerusalem under Nehemiah; "a faithful man" (Neh. vii. 2). **13.** A signatory to the covenant in the time of Nehemiah (*ib.* x. 23).

E. G. H. M. SEL.

HANANIAH (AḤUNAI): Exilarch (761-771?). He was a younger brother of ANAN BEN DAVID, the founder of Karaism; according to the Karaites, whose contention was that Anan's father was the son of the exilarch Ḥasdai, he was a nephew of Solomon ben Ḥasdai. The only source for the nomination of Hananiah as exilarch after the death of his uncle Solomon ben Ḥasdai is the Karaite ELIJAH BEN ABRAHAM (Pinsker, "Likkuṭe Ḳadmoniyyot," Supplement, p. 103), who quotes an anonymous Rabbinite author as follows: "Anan had a younger brother called Hananiah, and though Anan was older and more learned than his brother, he was not elected exilarch on account of his want of religion; his brother Hananiah was preferred to him." As the exilarch who was elected in 771 was called Zakkai ben Aḥunai, Grätz ("Geschichte," v. 386) supposes Hananiah to be identical with Aḥunai, Zakkai's father.

BIBLIOGRAPHY: Grätz, *Gesch.* 3d ed., v. 165, 385 *et seq.*; Fürst, *Gesch. des Karäert.* section ii., note 8.

J. M. SEL.

HANANIAH (ḤANINA): Palestinian amora of the third and fourth centuries; junior of Ḥiyya b. Abba and Ze'era I. (Yer. Ber. vii. 11b). He was frequently described as the "comrade of the Rabbis" (חברין דרבנין). In the Babylonian Talmud he is never cited with his cognomen; and in the Jerusalem Talmud also he is frequently quoted by his prænomen alone. Thus he appears in the report of a legal controversy between him and Haggai, in which R. Ela participated (Yer. Ḳid. iii. 63d). With the latter he repeatedly had heated discussions. Ela exclaiming, "God save us from such opinions!" and Hananiah retorting, "Rather may God save us from thy opinions!" (Shab. 83b; Ket. 45b; B. Ḳ. 65b).

Hananiah was a Babylonian by birth, and was assumed to have been the brother of Rabbah b. Naḥmani ("Yuḥasin," 129a), a descendant of the priestly house of Eli (R. H. 18a; Sanh. 14b); but he and another brother, Hoshaiah ("Oshaiah" in the Babylonian Talmud), emigrated at an early age to Palestine. They settled at Tiberias, whither they ineffectually urged Rabbah to follow them (Yer. Ta'an. i. 64a; Ket. 111a). Here they plied the shoemaker's trade for a living. They established themselves on a street inhabited by prostitutes, who patronized them. Because they preserved their modesty and chastity, in spite of their evil associations, even the women learned to revere them and to swear "by the life of the saintly rabbis of Palestine" (Pes. 113b). They were also famous as workers of miracles, and when they desired to prepare some savory meal in honor of the Sabbath, legend says they were compelled to resort to transcendental means in order to produce it (Sanh. 65b). Their exemplary life as well as their scholarship prompted Johanan to ordain them as teachers, but for reasons not stated—possibly because of the associations into which their trade led them, or perhaps because of their youth—he failed to carry out his intentions. This was a source of regret to the venerable teacher, but the brothers eased his mind by pointing out that, being descendants from the house of Eli, they could not expect to be promoted to "elderships," since of that house the Bible has said: "There shall not be an old man in thine house forever" (I Sam. ii. 32; Sanh. 14a). Hananiah died on a semi-festival, and, as a mark of distinction and of general mourning, his coffin was, contrary to custom on such days, made on the public street (Yer. M. Ḳ. i. 80d).

HANANIAH (ḤANINA): Palestinian scholar of the fourth amoraic generation (fourth century): nephew of R. Hoshaiah, junior of Ze'era I., and contemporary of Jose II. (Yer. Ta'an. i. 64a, where his name is erroneously given as "Ḥanaiah"). Once he is represented as opposing "the rabbis of Cæsarea" in halakic controversy (Yer. Shab. i. 3a). He is also mentioned as having consulted Abba b. Zabda (Yer. Meg. iii. 74d); but the text here is so mutilated as to lose its reliability for chronological purposes (see Frankel, "Mebo," p. 88b).

E. C. S. M.

HANANIAH (ḤANINA), Nephew of R. Joshua: Tanna of the second century; contemporary of Judah b. Bathyra, Matteya b. Ḥeresh, and Jonathan (Sifre, Deut. 80). Who his father was is not stated; nor is anything known of his early years. He was named after his grandfather, Hananiah, and educated by his uncle, from whom he received his cognomen. In some baraitot, however, he is cited by his prænomen alone (Suk. 20b; Ket. 79b; see Hananiah b. 'Aḳabia). In the days of Gamaliel II. he once ventured to give a decision, for which he was summoned before that patriarch; but his uncle, by reporting that he himself had given Hananiah the decision, mollified Gamaliel (Niddah 24b). It was probably about that time that Hananiah fell in with some sectaries at Capernaum. To remove him from their influence his uncle advised him to leave the country, which he did, emigrating to Babylonia, where he opened a school that eventually acquired great fame (Sanh. 32b; Eccl. R. i. 8, vii. 26). He returned to his native country with ritualistic decisions which had been communicated to him by a Babylonian scholar, and which he submitted to his uncle (Suk. 20b). But during the evil days following the Bar Kokba rebellion, seeing the noblest of his people fall before the vengeance of the Romans, he again emigrated to Babylonia, settling at Nehar-Peḳod (see Neubauer, "G. T." pp. 363 *et seq.*). The appearance of Hananiah in Babylonia threatened to produce a schism in Israel fraught with far-reaching consequences: it created a movement toward the secession of the Babylonian congregations from the central authority hitherto exercised by the Palestinian Sanhedrin.

Movement for Independence of Babylonian Schools.

Believing that Roman tyranny had succeeded in permanently suppressing the religious institutions which, in spite of the Jewish dispersion, had held the remnants of Israel together, Hananiah attempted to establish an authoritative body in his new home. To render the Babylonian schools independent of Palestine, he arranged a calendar fixing the Jewish festivals and bissextile years on the principles that prevailed in Palestine. In the meantime, however, Hadrian's death had brought about a favorable change in Judea. In March, 139 or 140, a message arrived from Rome announcing the repeal of the Hadrianic decrees (see Meg. Ta'an. xii.); soon thereafter the surviving rabbis, especially the disciples of Akiba, convened at Usha, and reorganized the Sanhedrin with Simon b. Gamaliel II. as president (R. H. 31b *et seq.*; see Rapoport, "'Erek Millin," pp. 233b *et seq.*). They sought to reestablish the central authority, and naturally would not brook any rivals. Messengers were therefore despatched to Nehar-Peḳod, instructed to urge Hananiah to acknowledge the authority of the parent Sanhedrin, and to desist from disrupting the religious unity of Israel.

Deputation from Palestine.

The messengers at first approached him in a kindly spirit, showing him great respect. This he reciprocated, and he presented them to his followers as superior personages; but when he realized their real mission he endeavored to discredit them. They, for their part, contradicted him in his lectures; what he declared pure they denounced as impure; and when at last he asked them, "Why do you always oppose me?" they plainly told him, "Because thou, contrary to law, ordainest bissextile years in foreign lands." "But did not Akiba do so before me?" asked he; to which they replied, "Certainly he did; but thou canst not compare thyself with Akiba, who left none like him in Palestine." "Neither have I left my equal in Palestine," cried Hananiah; and the messengers retorted, "The kids thou hast left behind thee have since developed into horned bucks, and these have deputed us to urge thee to retrace thy steps, and, if thou resist, to excommunicate thee." The Palestinian sources relate that the deputies, to impress upon him the enormity of secession from the parent authority, publicly parodied Scriptural passages. One of them substituted "Hananiah" for "the Lord" in "These are the feasts of the Lord" (Lev. xxiii. 4). Another recited, "Out of Babylonia shall go forth the Law, and the word of the Lord from Nehar-Peḳod," instead of "Out of Zion" and "from Jerusalem" (Isa. ii. 3). When the people corrected them by calling out the proper readings, the deputies laconically replied, גבן (= "With us!" Yer. Ned. vi. 40a). They also declared that the steps taken by Hananiah and his followers were tantamount to building an altar on unholy ground and serving it with illegitimate priests. Altogether, they pointed out, his course was a renunciation of the God of Israel.

The people recognized their error, and repented; but Hananiah held out. He appealed to Judah b. Bathyra, then in Nisibis, for support; but the latter not only refused to participate in the secession movement, but prevailed on Hananiah to submit to the orders emanating from the Judean Sanhedrin (Ber. 63a; Yer. Ned. *l.c.*). Hananiah ended his life peacefully in Babylonia (Eccl. R. i. 8).

Although Hananiah was a prominent figure in his day, rivaling for a time the patriarch in Judea, his name is connected with but few halakot, either original (Tosef., Peah, iii. 3; Ket. 79b) or transmitted ('Er. 43a; Beẓah 17b; Suk. 20b; Niddah 24b), and with still fewer halakic midrashim (Mek., Bo, 16; Sifre, Num. 49, 116; Ḥag. 10a; Shebu. 35b). As to haggadot, only two or three originated with him. One declares that where Scripture says, "King Solomon loved many strange women" (I Kings xi. 1), it does not mean to impugn his chastity; but it implies that he transgressed the Biblical inhibition, "Thou shalt not make marriages with them" (Deut. vii. 3; Yer. Sanh. ii. 20c). Another asserts that the tables of the Decalogue (Deut. iv. 13) contained after each command its scope in all its ramifications; that the Commandments were interwoven with expositions as are the billows of the sea with smaller waves (Yer. Sheḳ. vi. 49d; Cant. R. v. 14).

S. S. S. M.

HANANIAH (ḤANINA) B. 'AḲABIA (AKIBA): Tanna of the second century; contemporary of Judah b. 'Ilai (M. Ḳ. 21a), and probably one of the younger pupils of Gamaliel II. (Ket. viii. 1). His name rarely appears in connection with haggadot; but he was firmly grounded in the Halakah. Rab expresses great admiration for Hananiah's acumen (Shab. 83b). Notwithstanding his prominence, his prænomen as well as his patronymic is uncertain: "Hananiah" and "Ḥanina" for the former, and "'Aḳabia" and "Akiba" for the latter appearing promiscuously in connection with one and the same halakah (comp. 'Ar. i. 3; Sifra, Beḥuḳḳotai, xii. 8; 'Ar. 6b; Tosef., Parah, ix. [viii.] 9; Ḥag. 23a; Yeb. 116b). However, there is reason to believe that "'Aḳabia" is his right patronymic, and that he was the son of 'Aḳabia b. Mahalaleel (see "R. E. J." xli. 40, note 3). Hananiah was very fearless in the expression of his opinions and also opposed those of the leaders of academies, the "nasi" and his deputy (Tosef., Pes. viii. 7; Shab. 50a). His residence was at Tiberias, where he abrogated many restrictions which had hampered the comfort of the people ('Er. 87b, and parallel passages). Sometimes Hananiah (or Ḥanina) is cited without his patronymic (compare, for example, Yer. 'Er. viii. 25b and Shab. 83b), and one must be careful not to mistake him for an elder tanna of the same name, or vice versa (see Hananiah [Ḥanina], nephew of R. Joshua). To avoid such mistakes one must observe the associates cited in the debate or statement. If these belong to the age of Meïr, Jose, and Simon, Hananiah, the subject of this article, is meant; if they are of a former generation, R. Joshua's nephew is intended.

Bibliography: Bacher, *Ag. Tan.* ii. 370; Brüll, *Mebo ha-Mishnah*, i. 211; Frankel, *Darke ha-Mishnah*, p. 186; Heilprin, *Seder ha-Dorot*, ii., *s.v.*

E. C. S. M.

HANANIAH B. 'AḲASHIAH: Tanna whose name became very popular by reason of a single homiletic remark, as follows: "The Holy One—blessed be He!—desired to enlarge Israel's merits; therefore He multiplied for them Torah and commandments, as it is said [Isa. xlii. 21, Hebr.], 'The Lord was pleased, in order to render him [Israel—read: צדקו] righteous, to magnify the Law and to make it great'" (Mak. iii. 16). This mishnah is usually subjoined to each chapter of the treatise Abot embodied in the rituals (see Abot). One halakah also is ascribed to him (Tosef., Sheḳ. iii. 18; anonymous in Sheḳ. viii. 8). When he lived, and who his teachers were, can not be ascertained. He probably was a brother of the equally rarely cited Simon b. 'Aḳashiah.

Bibliography: Bacher, *Ag. Tan.* ii. 376; Brüll, *Mebo ha-Mishnah*, i. 212; Frankel, *Darke ha-Mishnah*, p. 187.

E. C. S. M.

HANANIAH (ḤANINA) B. ḤAKINAI: Tanna of the second century; contemporary of Ben 'Azzai and Simon the Temanite (Tosef., Ber. iv. 18; see Ḥalafta). Sometimes he is cited without his prænomen (Sifra, Emor, vii. 11; Shab. 147b). Who his early teachers were is not certainly known. From some versions of the Tosefta (*l.c.*) it appears that Ṭarfon was one of them, but that his regular teacher was Akiba. It is related that he took leave of his wife and attended Akiba twelve or thirteen years without communicating with his family, whom he recovered in a remarkable way (Ket. 62b; Lev. R. xxi. 8). He was one of the few who, though not regularly ordained, were permitted to "argue cases before the sages" (דנין לפני חכמים: Sanh. 17b; comp. Yer. Ma'as. Sh. ii. 53d). Several halakot have been preserved in his name, owing their preservation to Eleazar b. Jacob II. (Kil. iv. 8; Mak. iii. 9; Tosef., Ṭoh. vi. 3; Ḳid. 55b); and he also left some halakic midrashim (Sifra, Meẓora', v. 16; Sifra, Emor, vii. 11, comp. Shab. 110b; Men. 62b, comp. Sifra, Emor, xiii. 8).

Hananiah also delved into the "mysteries of the Creation," concerning which he consulted Akiba (Ḥag. 14b); and he appears as the author of several homiletic remarks. According to him, God's relation to distressed Israel is expressed in Solomon's words (Prov. xvii. 17): "A brother is born for adversity"; by "brother" is understood "Israel," for it is elsewhere said (Ps. cxxii. 8): "For my brethren and companions' sakes, I will now say, Peace be within thee" (Yalḳ., Ex. 233; comp. Mek., Beshallaḥ, iii.). With reference to Lev. v. 21 (vi. 2) ("If a soul sin, and commit a trespass against the Lord, and lie unto his neighbor," etc.), he remarks, "No man lies [acts dishonestly] against his fellow man unless he first becomes faithless to God" (Tosef., Shebu. iii. 6). From a comparatively late date comes the statement that Hananiah b. Ḥakinai was one of the "ten martyrs" (see Zunz, "G. V." 2d ed., p. 150; see also "Massekct Aẓilut").

E. C. S. M.

HANANIAH B. JUDAH: Tanna of the second century; contemporary of Akiba. His name appears only twice in rabbinic lore: once in connection with a halakic midrash, where he directs his remarks to Akiba (Sifra, Ẓaw, ii. 3), and once with a homiletic remark on the baneful effect of anger. With reference to Lev. x. 16 *et seq.*, where it is related that Moses was angry with Eleazar and Ithamar for burning the goat of the sin-offering, R. Judah (b. Ilai) says: "Hananiah b. Judah was wont to say, 'Grievous is the result of passion: it caused even Moses to err.'" Judah adds: "Now that Hananiah is dead, I venture to controvert his statement, 'What provoked Moses to passion? It was his error'" (Sifra, Shemini, ii. 12).

Bibliography: Bacher, *Ag. Tan.* i. 441.

E. C. S. M.

HANANIAH (ḤANINA) OF ONO: Tanna of the second century. Hananiah is remembered for a feat he accomplished in the interest of traditional law. While Akiba was in prison, awaiting his doom at the court of Tyrannus Rufus, an important marital question was debated in the academy, but without a decision being reached. Hananiah therefore ventured to approach Akiba's prison and to solicit from the master a ruling. This he obtained and brought to his colleagues (Giṭ. vi. 7; see Rashi *ad loc.*). In connection with this question the names of Meïr and Jose are cited with that of Hananiah (Giṭ. 67a); this places Hananiah with Akiba's younger pupils, about 139-165 C.E. He is reported to have testified before (Simon b.) Gamaliel concerning the rule governing intercalations enacted in Galilee (Tosef., Sanh. ii. 13; comp. Yer. Sanh. i. 18d *et seq.*).

E. C. S. M.

HANANIAH (ḤANINA) B. TERADION: Teacher and martyr in the third tannaitic generation (second century); contemporary of Eleazar ben Peraṭa I. and of Ḥalafta, together with whom he established certain ritualistic rules (Ta'an. ii. 5). His residence was at Siknin, where he directed religious affairs as well as a school. The latter came to be numbered among the distinguished academies with reference to which a baraita says: "The saying [Deut. xvi. 20], 'That which is altogether just shalt thou follow,' may be construed, 'Follow the sages in their respective academies. . . . Follow R. Hananiah b. Teradion in Siknin' " (Sanh. 32b). Hananiah administered the communal charity funds, and so scrupulous was he in that office that once when money of his own, designed for personal use on Purim, chanced to get mixed with the charity funds, he distributed the whole amount among the poor. Eleazar b. Jacob so admired Hananiah's honesty that he remarked, "No one ought to contribute to the charity treasury unless its administrator is like Ḥanina b. Teradion" (B. B. 10b; 'Ab. Zarah 17b). Comparatively few halakot are preserved from him (Ta'an. ii. 5, 16b; R. H. 27a; Tosef., Miḳ. vi. 3; see also Yoma 78b; Men. 54a). Hananiah ingeniously proved that the Shekinah rests on those who study the Law (Ab. iii. 2).

Hananiah's life proved that with him these were not empty words. During the Hadrianic persecutions decrees were promulgated imposing the most rigorous penalties on the observers of the Jewish Law, and especially upon those who occupied themselves with the promulgation of that Law. Nevertheless Hananiah conscientiously followed his chosen profession; he convened public assemblies and taught the Law. Once he visited Jose b. Ḳisma, who advised extreme caution, if not submission. The latter said: "Ḥanina, my brother, seest thou not that this Roman people is upheld by God Himself? It has destroyed His house and burned His Temple, slaughtered His faithful, and exterminated His nobles; yet it prospers! In spite of all this, I hear, thou occupiest thyself with the Torah, even calling assemblies and holding the scroll of the Law before thee." To all this Hananiah replied, "Heaven will have mercy on us." Jose became impatient on hearing this, and rejoined, "I am talking logic, and to all my arguments thou answerest, 'Heaven will have mercy on us!' I should not be surprised if they burned thee together with the scroll." Shortly thereafter Hananiah was arrested at a public assembly while teaching with a scroll before him. Asked why he disregarded the imperial edict, he frankly answered, "I do as my God commands me." For this he and his wife were condemned to death, and their daughter to degradation. His death was terrible. Wrapped in the scroll, he was placed on a pyre of green brush; fire was set to it, and wet wool was placed on his chest to prolong the agonies of death. "Wo is me," cried his daughter, "that I should see thee under such terrible circumstances!" The martyr serenely replied, "I should indeed despair were I alone burned; but since the scroll of the Torah is burning with me, the Power that will avenge the offense against the Law will also avenge the offense against me." His heart-broken disciples then asked: "Master, what seest thou?" He answered: "I see the parchment burning while the letters of the Law soar upward." "Open then thy mouth, that the fire may enter and the sooner put an end to thy sufferings," advised his pupils; but he said, "It is best that He who hath given the soul should also take it away: no man may hasten his death." Thereupon the executioner removed the wool and fanned the flame, thus accelerating the end, and then himself plunged into the flames ('Ab. Zarah 17b *et seq.*).

Condemned to Death for the Law's Sake.

It is reported that, on hearing his sentence, Hananiah quoted Deut. xxxii. 4, "He is the Rock, his work is perfect: for all his ways are judgment"; while his wife quoted the second hemistich, "A God of truth and without iniquity, just and right is he"; and his daughter cited Jer. xxxii. 19, "Great in counsel, and mighty in work: for thine eyes are open upon all the ways of the sons of men: to give every one according to his ways, and according to the fruit of his doings" (Sifre, Deut. 307; 'Ab. Zarah *l.c.*; Sem. viii.).

Of the surviving members of Hananiah's family are mentioned two daughters: the learned Beruriah, who became the wife of R. Meïr, and the one marked for degradation, whom R. Meïr succeeded in rescuing ('Ab. Zarah 18a). Hananiah had also a learned son. It is related that Simon b. Hananiah applied to this son for information on a point of ritual, and that the latter and his sister, presumably Beruriah, furnished divergent opinions. When Judah b. Baba heard of those opinions, he remarked, "Hananiah's daughter teaches better than his son" (Tosef., Kelim, B. Ḳ. iv. 17). Elsewhere it is reported of that son that he became a degenerate, associating with bandits. Subsequently he betrayed his criminal associates, wherefore they killed him and filled his mouth with sand and gravel. Having discovered his remains, the people would have eulogized him out of respect for his father, but the latter would not permit it. "I myself shall speak," said he; and he did, quoting Prov. v. 11 *et seq.* The mother quoted Prov. xvii. 25; the sister, Prov. xx. 17 (Lam. R. iii. 16; comp. Sem. xii.).

HANASIA, AHUB B. MEÏR. See Ibn Muhajar Ahub.

HANAU: Town in the province of Hesse-Nassau, Prussia. Jews settled in the territory of the counts of Hanau in the first half of the thirteenth century. Reinhard of Hanau was one of the princes who pledged the king's peace in 1265, probably intending thereby to protect the Jews living within his domain. In 1277 and 1286 King Rudolph made assignments of the Jews of Hanau, and pawned the Jews of Assenheim, Münzenberg, and Nidda; in 1300 King Albert disposed similarly of the Jews of Hanau, Windecken, Babenhausen, and Steinau; and in 1310 King Henry VII. also concluded some transactions of a similar nature. In 1285 Jews of Wetterau emigrated with R. Meïr of Rothenburg in order to escape from their German oppressors. The Jews of Hanau also suffered in the general persecutions of 1337 and 1349. In 1592 they were expelled from the territory. Until 1603 there are only occasional references to Jews in the county of Hanau.

When Count Philipp Ludwig II. came into power he invited many wealthy Jews to his city (1603), permitted them to build a synagogue, and gave them a definite legal status. In spite of the intolerance of the Christian clergy the condition of the Jews was favorable, and continued so under the successive governments of the Landgraf of Hesse (1736), of France (1803), of the grand duchy of Frankfort (1810), of Hesse (1813), and of Prussia (1866). The community had a synagogue, cemetery, bakehouse, slaughter-house, hospital, and shelter for the homeless ("hekdesh"), and its own fire-engine and night-watchman.

In 1603 the community numbered 10 persons; in 1707, 111 families; in 1805, 540 persons; in 1900, 657 persons. In 1903 there were 670 Jews there, the total population being 29,846. The town is the seat of the provincial rabbinate of Hanau, which includes 40 communities, the most important of which are Hanau, Bergen, Birstein, Bockenheim, Gelnhausen, Hochstadt, Langenselbold, Lichenroth, Schlüchtern, Sterbfritz, and Wachenbuchen. The district is subject to the Königliche Vorsteheramt der Israeliten, under the presidency of the provincial rabbi. Most of these communities, especially Hanau, have burial and philanthropic societies and memorial foundations.

The following scholars and rabbis of Hanau may be mentioned, some of whom directed the yeshibah:

Naphtali b. Aaron Mordecai Schnaittach ("Cat. Rosenthal." p. 548).
David Cohn ("Monatsschrift für Gesch. und Wissenschaft des Judenthums," 1897, p. 428).
Menahem b. Elhanan (d. 1636).
Jacob Simon Bunems (d. 1677).
Haggai Enoch Fränkel (d. 1690).
Maier Elsass (d. 1704).
Moses Brod (*c.* 1720).
Israel b. Naphtali (d. 1791).
Moses Tobias Sondheim (d. 1830).
Samson Felsenstein (d. 1882).
Dr. Koref (successor of the preceding).
Dr. S. Bamberger (successor of the preceding).

The grammarian Solomon Hanau was born at Hanau (1687).

Bibliography: Aronius, *Regesten*; Salfeld, *Martyrologium*; E. I. Zimmermann, *Hanau, Stadt und Land, Kulturgesch. und Chronik*, pp. 476–521, Hanau, 1903 (contains bibliography of public records and printed works: p. 515); *Statistisches Jahrbuch des Deutsch-Israel.-Gemeindebundes*, 1903.

D. S. Sa.

HANAU, SOLOMON BEN JUDAH: German grammarian; born at Hanau (whence his surname) in 1687; died at Hanover Sept. 4, 1746. When but twenty-one he published at Frankfort-on-the-Main, where he had settled, a Hebrew grammar in which the ancient grammarians were severely criticized. These criticisms, coming from so young a man, caused much resentment, and he was forced to write a retractation, which was attached to each copy of his grammar. In spite of this his position at Frankfort became untenable, and he went to Hamburg, where he taught for seventeen years. Hanau criticized likewise the daily prayer-book published by Elijah and Azriel Wilna, though it had received the approbation of the most prominent rabbis of that time; and he was forced to leave Hamburg also. He went to Amsterdam, where he stayed several years; on his return to Germany he settled at Fürth. There he found an adversary in Seligman Grieshaber, who had written, in collaboration with Meïr of Prague, two pamphlets against two of Hanau's works. After many polemical bouts Hanau removed to Berlin, and later to Hanover, where he died. He wrote the following works:

"Binyan Shelomoh," a Hebrew grammar, Frankfort-on-the-Main, 1708; "Yesod ha-Niḳḳud," on the Hebrew vowels, Amsterdam, 1730; "Perush," a commentary, dealing with vocabulary and grammar, on the Midrash Rabbah to the Pentateuch, and the Five Scrolls, 1777; "Ẓohar ha-Tebah," a comprehensive grammar, with emendations entitled "Mikseh ha-Tebah," published at Berlin, 1733; "Ḳure 'Akkabish," in reply to the attacks of Grieshaber and Meïr of Prague upon his "Ẓohar ha-Tebah," Fürth, 1744; "Sha'are Torah," a comprehensive grammar, Hamburg, 1718; "Sha'are Zimrah," on the Hebrew accents and vowels, issued together with the preceding work; "Sha'are Tefillah," grammatical annotations on the prayer-book, Jessnitz, 1725. The last-named work was severely criticized by Jacob Emden in his "Luaḥ Ereẓ," and by Mordecai of Düsseldorf in "Ḳonṭres Hassagot 'al Siddur Sha'are Tefillah."

J. I. Br.

HANAU, ẒEBI HIRSH HA-LEVI BEN HAGGAI ENOCH (with the family name **Fränkel**): German rabbi; born at Vienna in 1662; died at Gemund, Bavaria, in 1740. He resided for many years at Frankfort-on-the-Main, where he assisted Jair Ḥayyim Bacharach in preparing his responsa, "Ḥawwot Ya'ir," for publication, and edited the works of Gershon Ashkenazi—"'Abodat ha-Gershuni," responsa, and "Tif'eret ha-Gershuni," homilies, 1699. Hanau was for a time rabbi of Idstein, while living in Frankfort. In 1702 he was made district rabbi of the Palatinate, and took up his residence at Heidelberg. Seven years later, owing to the great influence which his brother Elhanan had with the margrave Wilhelm Friedrich, he was appointed district rabbi of Ansbach. Elhanan, however, soon fell into disgrace, and both brothers were thrown into prison; Hanau was accused of witchcraft on account of his cabalistic studies. For twenty-four years Hanau remained in jail, until an inundation threatened the safety of the prison, and the prisoners were removed. The city councilors, moved with compassion at the sight of the old man, obtained from the margrave his liberation.

During his stay in prison Hanau wrote an abstract of the first 189 sections of the Yoreh De'ah; a commentary on Psalm cxix. and Hallel, entitled "Dodi li-Ẓebi"; and a poem of thirty-two verses describing his life in prison. Hanau was antagonized by David Oppenheim, who, in his "Nish'al Dawid," severely criticized several of Hanau's decisions given at Heidelberg.

Bibliography: Carmoly, in *Israelit*, 1868; Leopold Löwenstein, *Gesch. der Juden in der Kurpfalz*, p. 150; Kaufmann, in *Ha-Goren*, i. 72.

D. I. Br.

HANBURY, LILY: English actress; educated in London, where she is still (1903) residing. Her début was made in 1888 at a revival of W. S. Gilbert's "Pygmalion and Galatea" at the Savoy Theater in that city. She has since appeared on most of the leading stages of the English metropolis. Her repertory is a most extensive one, and includes the following rôles: *Countess Wintersen* in "The Stranger"; *Hetty Preene* in G. R. Sims's "Lights o' London"; *Petra* in Ibsen's "Enemy of the People"; *Nellie Denver* in "The Silver King"; and *Julia* in "The Rivals." She has also played in "The Prisoner of Zenda," "The Dancing Girl," "The Red Lamp," and "A Bunch of Violets." Her chief successes have, however, been in Shakespearian plays, mainly under the management of Wilson Barrett and Beerbohm Tree, respectively; the characters presented by her having been: *Ophelia* and the *Player Queen* in "Hamlet"; *Portia* in "The Merchant of Venice"; *Calpurnia* in "Julius Cæsar"; and *Chorus* in "Henry V." She has also been very successful in the part of *Penelope* in "Ulysses," *Lady Blessington* in "Last of the Dandies," and *Marita* in "Royal Rival."

Bibliography: *Who's Who*, 1903; *The Era*, London, March 16, 1901.

J. A. P.

HAND: Traces of the custom of tattooing are found in the expression "to inscribe the hands for some one" (Isa. xliv. 5, xlix. 16; comp. Gal. vi. 17; see Grunwald, "Cultur- und Kunstgesch. Entwicklung der Schriftzeichen," p. 1). The phrases "the hand of Absalom" (II Sam. xviii. 18), for Absalom's tomb, and "will I give in mine house and within my walls a memorial and a name" (Isa. lvi. 5, R. V.), recall the custom of tattooing the hands with the token of the sun-god Baal, which at that time was a symbol of strength (Judges ix. 24; Isa. xxxv. 8; Ps. xxxvi. 12, lxxi. 4, xcvii. 10). To lay the hand on the mouth (Prov. xxx. 32) indicates silence; to "take one's soul in one's hand" (Hebr.) is the English to "take one's life in one's hand" (comp. Job xiii. 14; Judges xii. 3; I Sam. xix. 5; Ps. cxix. 109). To open the hand is a sign of generosity (Deut. xv. 11). In Derek Ereẓ Zuṭa iv. 7 it is said: "The reward for thy hands which thou hast restrained from unlawful goods shall be that the mean shall have no hold upon thee; the reward for thy hands which thou hast not closed against the needy shall be that the lords of silver and gold can do thee no harm."

Hand of God.

God lifts His hand and swears by it (Deut. xxxii. 40). It is an expression of His power (Ex. iii. 20, xiii. 3, *et al.*). It comes upon the Prophets and fills them with His spirit (Ezek. i. 3). An ancient midrash in the Pesaḥ Haggadah concludes, from the fact that Israel saw the "hand" of God at the Red Sea, that there must have been many more than ten plagues in Egypt, since one finger alone had caused ten (Mek. 33b). Each of the five fingers of God's right hand has a special function (Löw, "Die Finger," vi. *et seq.*). A hand protruding from the clouds is a Christian symbol for God (Löw, *l.c.* viii.). The hand of an angel at Abraham's sacrifice is found on tombstones in Altona and Ouderkerk (Grunwald, in "Mittheilungen der Gesellschaft für Jüdische Volkskunde," x. 126). According to the Haggadah, man was originally created with undivided hands, and Noah was the first to have fingers (see Finger).

It was a custom to place the left hand on a tomb and quote Isa. lviii. 11 (Löw, *l.c.* xi.). On the use of the hand and fingers in sorcery see Grunwald, *l.c.* v. 16, 35, 40, 66. For the spirits of the thumb see Steinschneider, "Hebr. Bibl." vi. 120, x. 84. On gesticulation see Löw, *l.c.* xix.

The wedding-ring is placed on the index-finger of the right hand (*ib.* xx.). There is a trace of finger-counting in the "Hekalot" (Jellinek, "B. H." iii. 22, No. 94). The five fingers are considered as the appointed ministers of the five senses (Gershom b. Solomon and others; D. Kaufmann, "Die Sinne," p. 76). The tip of the index-finger has the most acute sense of touch (*ib.* p. 179).

To clap the hands together was a sign of joy (II Kings ii. 2, *et al.*). To "strike hands" ("teḳi'at kaf") was to go surety for some one (Prov. vi. 1, xi. 15, xvii. 18, xxii. 26; Job xvii. 3); in rabbinical law it was a token of giving and taking at the conclusion of a sale (Maimonides, "Yad," Mekirah, iii.; Caro, Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 198, 11). The acquisition of movable goods was established by seizing the object with the hands. The hand of the priest is filled when he is installed in office (Ex. xxix. 24; Lev. viii. 27).

Laying on of Hands.

The laying of hands ("samak") on the head as a sign of dedication is found in the Bible, where one gives up one's own right to something and transfers it to God (comp. Ex. xxix. 5, 19; II Chron. xxix. 23). Here the hands are placed on the head of the animal whose blood is to be used for the consecration of priests or for the atonement of the sins of the people. The same ceremony was used in transferring the sins of the people to the scapegoat (Lev. xvi. 20–22), and with all burnt offerings except the sin-offerings (Lev. i. 4; iii. 2, 13; iv. 4, *et al.*). The laying of hands on the head of a blasphemer (Lev. xxiv. 14) should also be noted here. Jacob on his deathbed placed his right hand on the head of Ephraim (Gen. xlviii. 14). The Levites were consecrated through the laying on of hands by the heads of the tribes (Num. viii. 10). The time-honored prototype of Ordination through laying on of hands is the consecration of Joshua as successor to Moses (Num. xxvii. 18; Deut. xxxiv. 9). This rite is found in the New Testament (Acts vi. 3, xiii. 3) and in the Talmud ("semikah"), and was observed at the appointment of members of the Sanhedrin (Sanh. iv.). It was gradually discontinued in practise, however, although it was preserved nominally. The semikah, moreover, could take place only in Palestine (Sanh. 14a; see Hamburger, "R. B. T." *s.v.* "Ordinirung"). The laying of hands on the heads of children to bless them (Gen. xlviii. 14; Mark x. 16; Matt. xix. 13 *et seq.*) has been continued to this day. According to Job ix. 33, the judge placed his hands on the heads

Hand in Taking Oath.

of the disputing parties. To place one's hand on one's own head was a token of grief (II Sam. xiii. 19). The act of placing the hands or fingers on some one to heal him, and that of touching some one to obtain healing, are often referred to in the New Testament (Mark v. 23, vii. 32, *et al.*; see also Ordination). The act of placing the hand under the hip to emphasize an oath is spoken of in Gen. xxiv. 2, xlvii. 29, where, according to the reckoning of the cabalists, the letters in the words נא ידך have the numerical value מילה, and are interpreted as referring to placing the hands on the genitals, which interpretation is corroborated by other expositors (see Winer, "B. R." *s.v.* "Eid"). Later the hand was placed on a roll of the Torah in taking an oath, or on the tefillin, or else the Torah was taken in the hand or arm ("neḳiṭat ḥefeẓ"). In certain localities the one taking the oath put his right hand on the page containing the Decalogue in a printed copy of the Pentateuch. The hands were lifted in taking an oath (Gen. xiv. 22); the hands were also lifted at the announcement of the "end" in Rev. x. 5–7; in praying (Ps. xxviii. 2: later in Christian communities; comp. Clement's "Epistle," Corinth, i. cap. 2); in praising God (Ps. xliv. 21 [A. V. 20], cxxxiv. 2); in benediction (Lev. ix. 22; comp. Num. vi. 22 *et seq.*). Jesus took leave of his disciples with lifted hands (Luke xxiv. 50). According to the Zohar (ii. 67a, iii. 145a), the ten fingers should be raised only in praying and for the priestly benediction. For washing of hands see Ablution.

Kissing the Hand.

Kissing the hand is unknown to the Old Testament. Job xxxi. 27 does not refer to kissing the hand, but to holding it before the mouth in token of respect. In Ecclus. (Sirach) xxix. 5 reference is made to kissing the hand on receiving a present; but the Talmud knows it only as a foreign custom. Akiba thinks it strange that the Medes kiss the hand (Ber. 8b). Simon ben Gamaliel speaks of it as a universal Oriental custom (Gen. R. lxxiv., beginning). Simeon ben Laḳish (3d cent.) relates that when two athletes have wrestled, the conquered one kisses the hand of the victor (Tan., Wayiggash, beginning). The Zohar, in like manner, has Eleazar and Abba kiss the hand of their master, Simeon ben Yoḥai (i. 83b; in i. 250b all who hear him do the same; comp. ii. 21b, 62a, 68a, 87a; iii. 31a, 65b, 73b). In Idra Zuṭa iii. 2906 Eleazar kisses his master's hands at the latter's death. Gavison, also, in "'Omer ha-Shikḥah" on Prov. xvii. 6, relates that when Isaac Alfasi was about to die, Maimonides (read instead "Joseph ibn Migash") kissed his hand, whereupon the teacher's spirit fell on him (Bacher, in "R. E. J." xxii. and xxiii.: "Le Baisement des Mains dans le Zohar"; comp. Dunash ben Labraṭ's introductory poem to his "teshubot" against Menahem ben Saruḳ; Judah ha-Levi, "Diwan," ed. Brody, p. 149, Nos. 98 *et seq.*; Azulai, "Shem ha-Gedolim," *s.v.* "Eliyahu ha-Kohen" ["we-nashaḳ yadaw"]; see Kiss).

In pronouncing a benediction the priest raises his hands with his little and ring fingers and middle and index fingers pressed together. This custom is not found in the Talmud. According to Pesiḳ. 49a, Cant. ii. 9 is thus illustrated, the "windows" being represented by the priest's shoulders, and the "lattice" by his fingers.

Miscellaneous Uses.

A priest's hands represented as in benediction on a tombstone indicate that the deceased was descended from the family of Aaron; on the title-page of a book they indicate that the printer was descended from the family of Aaron (Löw, *l.c.* viii.). The hand is also represented on the walls of synagogues and on mirrors (see Grunwald, *l.c.* x. 127). A hand is generally used as a pointer for the Torah (see Yad). A hand with two ears of grain and two poppy-heads is seen on coins (Levy, "Jüd. Münzen," p. 82). Two hands joined together are often represented on ketubah blanks, and on the so-called "siflones-tefillah" there is a hand hewing a tree or mowing down flowers. On physicians' tombstones in Altona and Ouderkerk is represented a hand with a bundle of herbs, and other stones have a hand with a pen (*ib.*; Grunwald, "Portugiesengräber"; *idem*, in "Mittheilungen," x.).

There are special rules for the use of the right and left hands respectively in putting on the "tefillin," in taking the "etrog," and in some details of the toilet (Ber. 62a; see Right and Left).

The Nails.

According to the Haggadah, Adam's hands—indeed, his whole body—were covered with a horny skin up to the time of his fall (Löw, *l.c.* xxi.). Cutting the nails is governed by superstitious regulations. At the Habdalah one looks at one's hand in front of a lighted candle, possibly because one must make some use of the light over which the blessing is to be spoken, and also perhaps to distinguish the nails from the flesh (Löw, *l.c.* xxi.; see Habdalah; Nails). Palmistry ("ḥokmat ha-yad"), which has been traced back to the time of Job, still forms a theme for the writing of books (*e.g.*, one edited by Natan Schriftgiesser, Warsaw, 1882; comp. Rubin, "Gesch. des Aberglaubens," p. 75). A hand, either inscribed or cast in metal, was often used as an amulet.

Staining the Hand.

The custom of staining the hands with henna was perhaps known and practised among the ancient Jews (Hartmann, "Hebräerin am Putztisch," ii. 356 *et seq.*). Jewish sources of later times speak of it (see Shulḥan 'Aruk, Yoreh De'ah, 198, 17). Dyed hands, except where such dyeing was the universal custom, or where the owner was a dyer by trade, prevented the priest from giving his blessing, as the sight of them disturbed his devotions (Meg. 24b, *et al.*).

On the night of Hosha'na Rabbah any one who tries to read his future from his shadow (Moses Isserles on Oraḥ Ḥayyim, 664, 1) and does not see the right hand, will lose a son during the year; if he fails to see the left hand, he will lose a daughter; if a finger, he will lose a friend (Buxtorf, "Synagoga Judaica," p. 464).

HANDICRAFTS: Since the article Artisans was written, the preliminary results of an inquiry made during the years 1898-99 by the Jewish Colonization Association as to the occupations of the Jews of Russia have been published, giving the classes of handicrafts in which over half a million Russian Jews are engaged, as follows:

Industries.	Employers.	Employers and Employees.	Industries.	Employers.	Employers and Employees.
Food.........	43,665	57,887	Chemicals....	2,764	3,617
Clothing.....	84,915	193,954	Building......	19,791	31,590
Leather......	40,522	85,306	Textiles......	10,589	18,428
Wood.........	25,653	49,588	Miscellaneous	5,998	11,695
Metal-mining	13,296	28,393	Totals......	259,396	500,986
Metal-manufacturing...	12,203	20,528			

Besides this some details have been given as to the occupations of Jewesses. It is impossible to state whether they are included in the above numbers or not.

Occupations.	Employers.	Employers and Employees.	Occupations.	Employers.	Employers and Employees.
Tailoresses...	9,191	33,419	Cigarette-makers........	991	1,732

ḤANINA I. See ḤANINA B. ḤAMA.

ḤANINA (HANANIAH) II.: Amora of the fifth century; contemporary of the Palestinian Mani II., and of Rabina, one of the compilers of the Babylonian Talmud (Yer. Ber. iii. 6a; Niddah 66b). Ḥanina attended the schools of Palestine, his native country, and concluded his pupilage under Mani II. (Yer. Pes. i. 27d; Yer. M. Ḳ. iii. 82c). He gradually rose to his master's level and discussed with him as a "fellow student" many halakic questions (Yer. Sanh. ii. 19d; Yer. Shebu. vi. 37b). Eventually he removed to Sepphoris, where he became the religious head of the community; hence he is sometimes cited as **Ḥanina of Sepphoris** (Yer. Ned. ix. 41b). When, in consequence of Roman persecutions at Tiberias, Mani also removed to Sepphoris, Ḥanina resigned the leadership in his favor—an act of self-abnegation extolled by the Rabbis as having few parallels (Yer. Pes. vi. 33a). Ḥanina, however, did not long remain in Palestine. As the persecutions became general and intolerable, he emigrated to Babylonia, where ASHI frequently sought information from him (B. B. 25b; Ḥul. 139b). Ḥanina's family accompanied him, and were highly respected in their adopted country. There Ḥanina's daughter married the son of Rabina (Niddah 66b).

BIBLIOGRAPHY: Halévy, *Dorot ha-Rishonim*, ii. 576.

J. S. M.

ḤANINA (HANANIAH) B. ABBAHU: Palestinian amora of the fourth generation, sometimes cited as **Ḥanina of Cæsarea** (Cant. R. i. 2). The Talmud relates that his father, R. Abbahu, sent him to the academies at Tiberias to study, but that he devoted himself instead to pious deeds, such as attending the dead. Abbahu thereupon wrote to him, "Is it because there are no graves in Cæsarea that I have sent thee to Tiberias?" (see ABBAHU). In the Halakah several precedents of his father's are reported by Ḥanina (Yer. Yeb. iv. 6a; Yer. Ket. iv. 29b; Yer. Ḥal. iii. 62c). He also reports a halakic midrash in the name of ABDIMA OF ḤAIFA (Ḳid. 33b); occasionally he endeavors to account for a predecessor's opinion (Yer. Niddah iii. 50c); but nothing original from him in the domain of Halakah is preserved. In the province of the Haggadah, on the contrary, he has left some original though hyperbolic remarks. Thus, commenting on Jer. ix. 9 (A. V. 10), where the prophet declares, "Both the fowl of the heavens and the beast are fled; they are gone," Ḥanina says, "Seven hundred species of fish, eight hundred species of locust, and countless species of fowl accompanied the Israelites from Palestine into their Babylonian exile; and when the latter returned all the creatures returned with them, except the fish called 'shibbuṭa' [mullet]" (Yer. Ta'an. iv. 69b; see Jastrow, "Dict.").

In his lectures Ḥanina occasionally uses homely illustrations. Speaking on Lam. ii. 1, he says: "A king had a child: the child cried, and the king took it on his lap; it continued crying, and he raised it in his arms; still it cried, wherefore he raised it upon his shoulders. Then the child soiled him, and the king at once put it down on the floor. How different was the child's ascent from its descent! The former was gradual, the latter sudden. Thus it went with Israel. At first God took him by the arms (Hosea xi. 3), then He caused him to ride (Hosea x. 11); but when he sinned 'He cast down from heaven unto the earth the beauty of Israel'" (Lam. R. ii. 1). Ḥanina also makes use of the numerical values of letters in his endeavor to reconcile haggadic differences. One rabbi advances the opinion that the name of Israel's Messiah will be "Ẓemaḥ" (צמח = "sprout"; comp. Zech. iii. 8); another, that it will be "Menahem" (= "comforter"). Ḥanina thereupon observes, "There is no difference of opinion between them; the total value of the letters in the name suggested by the one is the same as that of the letters in the name suggested by the other." צמח ($90 + 40 + 8 = 138$) corresponds with מנחם ($40 + 50 + 8 + 40 = 138$; Yer. Ber. ii. 5a).

J. S. M.

ḤANINA (HANANIAH; ḤINENA) B. ADDA (IDDA): Babylonian scholar of the third century. He was skilled in both Halakah and Haggadah; ADDA B. AHABAH appears to have been his teacher in the former (Pes. 75a; ‘Ab. Zarah 40a); in the latter he seems to have been a pupil of Tanḥum b. Ḥiyya. From Tanḥum, Ḥanina received the following illustration of the relative positions of the prophet and the elder (teacher, sage): "A king delegated two commissioners; with respect to one he wrote, ‘Unless he exhibits to you my signature and my seal, credit him not’; with reference to the other he wrote, ‘Even if he shows you neither my signature nor my seal, credit him.’ So it is said regarding the prophet: ‘ . . . and giveth thee a sign or a wonder’ [Deut. xiii. 2 (A.V. 1)]; while of the sages it is said: ‘According to the sentence of the law which they shall teach thee, and according to the judgment which they shall tell thee, thou shalt do’" (Deut. xvii. 11; Yer. Ber. i. 3b; Yer. Sanh. xi. 30b; Yer. ‘Ab. Zarah ii. 41c; Cant. R. i. 2). In the Book of Isaiah יאמר (the future: "will say"), instead of the usual אמר ("saith"), is used eight times (i. 11, 18; xxxiii. 10; xl. 1, 25; xli. 21, twice; lxvi. 9). This peculiarity, according to Ḥanina, contains an allusion to the corresponding number of prophets that were to appear after the destruction of the (first) Temple: Joel, Amos, Zephaniah, Haggai, Zechariah, Malachi, Ezekiel, and Jeremiah (Pesiḳ. xvi. 128b; see Buber *ad loc.*). An elder namesake of Ḥanina was a tanna, contemporary of Ahai b. Josiah, with whom he discussed a halakic midrash (Mek., Mishpaṭim, v.; comp. Sifra, Ḳedoshim, ix. 6, 14).

J. S. M.

ḤANINA B. ‘AGUL: Palestinian scholar of the third century; junior contemporary of Ḥiyya b. Abba and Tanḥum b. Ḥanilai. Ḥanina applied to Ḥiyya to explain why the expression "that it may go well with thee," contained in the second version of the Decalogue (Deut. v. 16), was not embodied in the first version (Ex. xx. 12). Ḥiyya thereupon gave him this remarkable answer: "Instead of asking me that, ask me whether the expression is embodied in either version: I do not even know it is there! However, apply to Tanḥum b. Ḥanilai, who has frequented the school of the expert haggadist Joshua b. Levi." Ḥanina did so, and was told that the promise was omitted from the first version because the first tablets of the Decalogue were destined to be broken (see Ex. xxxii. 19). This is explained by a later haggadist, who stated that the inclusion of the promise in the tablets that were destined to be broken would have been very discouraging to the people, who would have seen in the breaking of them a foreshadowing of the cessation of God's goodness (B. Ḳ. 54b *et seq.*). With reference to Isa. lxiv. 3 (A. V. 4: "Neither hath the eye seen, O God, beside thee, what he hath prepared for him that waiteth for him"), Ḥanina remarks: "The Jews who attended the banquet given by Ahasuerus [Esth. i.] were asked whether God would ever provide better entertainment for them; to which they replied, ‘Should God furnish us the like of this we should protest, since we have had such viands at the board of Ahasuerus’" (Esth. R. i. 5, where עגול is corrupted to עטל). His name appears also in connection with a halakah which he reports as having originated with Hezekiah, probably the son of Ḥiyya (Yer. Yeb. vi. 7c).

J. S. M.

ḤANINA (HANANIAH) B. ANTIGONUS: Tanna of priestly descent; contemporary of Akiba and Ishmael (Bek. vii. 5). It is supposed that in his youth he had witnessed the service of the Temple of Jerusalem, since he knew the fluters that played before the altar (Tosef., ‘Ar. i. 15; comp. ‘Ar. ii. 4). If this were so, Ḥanina must have enjoyed unusual longevity, as he often appears in halakic controversy with Akiba's latest disciples. Be this as it may, he was learned in the laws relating to the priests, and many such laws are preserved in his name (Ḳid. iv. 5; Bek. vi. 3, 10, 11; vii. 2, 5; Tem. vi. 5), while precedents reported by him regarding the services and appurtenances of the Temple influenced later rabbinical opinions. On marital questions also he is often cited as an authority (Yeb. xiii. 2; Niddah vi. 13 [comp. *ib.* Gem. 52b], viii. 2), as well as on other matters (Sheb. vi. 3; ‘Er. iv. 8). Some halakic midrashim also have come down from him (Bek. vii. 2, 5; Mek., Yitro, Baḥodesh, 6); but of haggadot there is only one under his name. He says: "Whosoever practises the precept concerning the fringes on the borders of [כנפי] garments (Num. xv. 38 *et seq.*) will realize the promise: ‘Ten men . . . shall take hold of the skirt of [בכנף] him that is a Jew, saying, We will go with you: for we have heard that God is with you’" (Zech. viii. 23). "On the other hand," continues Ḥanina, "he who violates the precept concerning the skirt [כנף] is included in the verse ‘take hold of the ends of [בכנפות] the earth, that the wicked might be shaken out of it’" (Job xxxviii. 13; Sifre, Num. 115). According to him, when an aged man dies after not more than three days' sickness, his death may be termed "excision" (כרת = "cutting off"; see Jew Encyc. iv. 484, *s.v.* Death), a visitation for secret violations of the Sabbath or of the dietary laws (Sem. iii. 10).

J. S. M.

ḤANINA B. DOSA: Scholar and miracle-worker of the first century; pupil of Johanan b. Zakkai (Ber. 34b). While he is reckoned among the Tannaim and is quoted in connection with a school and its disciples, no halakot and but few haggadot are preserved as from him (Baraita of R. Eliezer xxix., xxxi.; Midr. Mishle x. 2). His popularity, however, which he enjoyed throughout his life, and which rendered him immortal among the mystics, rests not on his scholarship, but on his saintliness and thaumaturgic powers. From the several maxims attributed to him it may be seen that he was a member of the Ḥasidim: "Whosoever's fear of sin precedes his learning, his learning will endure; but where learning precedes fear of sin, learning will not endure"; "Where a man's works are greater than his learning, his learning will stand; but where his learning is greater than his works, his learning will not stand"; "Whosoever earns the good-will of humanity is loved of God; but whoso is not beloved of man is not beloved of God" (Ab.

iii. 9, 10; Ab. R. N. xxii. 1 [ed. Schechter, p. 35a]; for the corresponding Ḥasidean principles see Jew. Encyc. v. 225, *s.v.* Essenes). There are, also, other teachings which betray his Ḥasidic schooling. Ḥanina, like all the ancient Ḥasidim, prayed much, and by his prayers he is said to have effected many miracles.

Influence of His Prayers.

It is related that when the son of Johanan b. Zakkai was very sick, the father solicited the prayers of Ḥanina. Ḥanina readily complied, and the child recovered. The overjoyed father could not refrain from expressing his admiration for his wonderful pupil, stating that he himself might have prayed the whole day without doing any good. His wife, astonished at such self-abasement on the part of her famous husband, inquired, "Is Ḥanina greater than thou?" To this he replied, "There is this difference between us: he is like the body-servant of a king, having at all times free access to the august presence, without even having to await permission to reach his ears; while I, like a lord before a king, must await an opportune moment" (Ber. 34b). Similarly, at the solicitation of Gamaliel II., Ḥanina entreated mercy for that patriarch's son, and at the conclusion of his prayers assured Gamaliel's messengers that the patient's fever had left him. This assurance created doubt in the minds of the messengers, who promptly asked, "Art thou a prophet?" To this he replied, "I am neither a prophet nor the son of a prophet; but experience has taught me that whenever my prayer flows freely it is granted; otherwise, it is rejected." The messengers thereupon noted down Ḥanina's declaration, and the exact time when it was made; on reaching the patriarch's residence they found that Ḥanina had spoken truly (*ib.*; comp. Ber. v. 5; Yer. Ber. v. 9d).

Ḥanina never permitted anything to turn him from his devotions. Once, while thus engaged, a lizard bit him, but he did not interrupt his prayers. To his disciples' anxious inquiries he answered that he had been so preoccupied in prayer as not even to feel the bite. When the people found the reptile, dead, they exclaimed, "Wo to the man whom a lizard bites, and wo to the lizard that bites R. Ḥanina b. Dosa!" His wonderful escape is accounted for by the assertion that the result of a lizard's bite depends upon which reaches water first, the man or the lizard; if the former, the latter dies; if the latter, the former dies. In Ḥanina's case a spring miraculously opened under his very feet (Yer. Ber. v. 9a). The Babylonian Gemara (Ber. 33a) has a different version of this miracle.

As Rain-Producer.

Ḥanina's prayers were efficacious in other directions also. While traveling he was caught in a shower and prayed "Master of the universe, the whole world is pleased, while Ḥanina alone is annoyed." The rain immediately ceased. Arriving home, he altered his prayer: "Master of the universe, shall all the world be grieved while Ḥanina enjoys his comfort?" Thereupon copious showers descended. With reference to his rain-governing powers it was said, "Beside Ben Dosa's prayers those of the high priest himself are of no avail" (Ta‘an. 24b). When, one Sabbath eve, his daughter filled the lamp with vinegar instead of oil, and then sadly told him of her mistake, he remarked, "He who hath endowed oil with the power of burning may endow vinegar with the same power"; and the lamp burned on throughout the whole of the next day (Ta‘an. 25a).

The Miracle of the Golden Table-Leg.

Notwithstanding his wonder-working powers, Ḥanina was very poor. Indeed, it became proverbial that, while the whole world was provided for through Ḥanina's great merits, he himself sustained life from one Sabbath eve to another on a basket of carob-beans. For some time the outside world had been kept in ignorance of his privations; his wife did all that was possible to maintain an appearance of comfort, and though she had no flour with which to make dough, she would put fuel into the oven every Friday and cause columns of smoke to rise, thus making her neighbors believe that, like them, she was baking the Sabbath meals. In time, however, one woman's suspicion was aroused, and she determined to surprise Ḥanina's wife and discover the truth. But a miracle prevented exposure. When the woman appeared at Ḥanina's house and looked into the smoking oven it was full of loaves. In spite of the miracle, Ḥanina's wife induced him to collect from heaven an advance portion of his future lot. Ḥanina complied with her request, and, in answer to his prayer, a golden table-leg was miraculously sent him. Husband and wife were happy; but that night the wife had a vision of heaven in which she saw the saints feasting at three-legged tables while her husband's table had only two legs. She awoke full of regret at the importunity which had deprived his table of a leg, and insisted that he pray for the withdrawal of the treasure. This he did, and the golden leg disappeared. Of this miracle the Talmud says: "It was greater than the former, since heaven gives, but never takes" (Ta‘an. 24b *et seq.*).

By a miracle Ḥanina was once prevented from partaking of untithed food. One eve of Sabbath he sat down to his frugal meal, when suddenly the table receded from him. After thinking a while he recollected that he had borrowed some spices from a neighbor and that he had not separated the required tithe (see Ḥaber). He thereupon adjusted the matter, and the table returned to him (Yer. Dem. i. 22a). It is stated that Ḥanina's donkey would not eat untithed food. Thieves had stolen the animal and confined it in their yard, furnishing it with the necessary provender; but the donkey would neither eat nor drink. As this continued for several days, the thieves concluded to free the animal, lest it starve to death and render their premises noisome. On its release it went straight home, none the worse for its long fast (Ab. R. N. viii. 8 [ed. Schechter, p. 19b]; comp. Yer. Dem. i. 21d; Shab. 112b).

Once Ḥanina was greatly grieved at not being able, with other pious people, to present something to the Temple. In his despondency he walked out of town, and, seeing a huge rock, he vowed to carry it to Jerusalem as a gift to the Holy City. He smoothed and polished it, and then looked around for help to transport it. Five laborers appeared, and offered to carry the rock to its destined place for one hundred gold pieces. Ḥanina, who did not possess half that amount, turned away in despair. Soon, however, other laborers appeared and demanded only five "sela'im," but they stipulated that Ḥanina himself should aid in the transportation. The agreement concluded, they all seized the rock, and in an instant stood before Jerusalem. When Ḥanina turned to pay the laborers they were nowhere to be found. He repaired to the Sanhedrin to inquire what disposition he should make of the uncollected wages. The Sanhedrin heard his tale and concluded that the laborers were ministering angels, not human laborers, and that Ḥanina was therefore at liberty to apply the money to his own use. He, however, presented it to the Temple (Cant. R. i. 1; Eccl. R. i.).

Thus was Ḥanina's life a succession of miracles (see Pes. 112b; B. Ḳ. 50a). A comparatively late mishnah remarks, "With the death of Ḥanina b. Dosa wonder-workers ['anshe ma'aseh'] ceased to exist" (Soṭah ix. 15). His general character was likewise extolled. A contemporary rabbi, **Eleazar of Modi'im**, lecturing on Ex. xviii. 21, cited Ḥanina b. Dosa and his colleagues as illustrations of the scope of the expression "men of truth" (Mek., Yitro, Amalek, 1). Two centuries later a haggadist, commenting on Isa. iii. 3, said, "By the term 'honorable man' is meant one through whose merits Heaven respects [is favorable to] his generation; such a one was Ḥanina b. Dosa" (Ḥag. 14a). Nor was Ḥanina's wife soon forgotten; long after her death, legend relates, a party of seafarers espied a work-basket studded with diamonds and pearls. A diver attempted to seize it, but was deterred by a "bat ḳol" which said that the precious basket was designed for the wife of Ḥanina b. Dosa, who would eventually fill it with blue wool ("tekelet"; Num. xv. 38) for the saints of the future (B. B. 74a).

Ḥanina lived at 'Arab, in Galilee, whither he was first attracted by the fame of Johanan b. Zakkai (Ber. 34b). There he served as an example of Sabbath observance (Yer. Ber. iv. 7c), and there he and his wife were buried.

S. S. M.

ḤANINA (HANANIAH) B. GAMALIEL II.: Tanna of the first and second centuries; witness, and perhaps victim, of the Roman persecutions, when, of thousands of scholars at Bethar, only his younger brother Simon b. Gamaliel II. is said to have escaped (Yer. Ta'an. iv. 69a; comp. Lam. R. ii. 2). A baraita records a halakic controversy between Ḥanina and Akiba, though the opinion of neither was adopted as law (Niddah 8a); and a mishnah cites an exegetical discussion between Ḥanina and Jose the Galilean, in which the opinion of the former was adopted by the Rabbis (Men. v. 8). His brother Simon reports as from Ḥanina a halakah opposed to his own views, but which he admits as the more reasonable (Tosef., Niddah, vii. 5); and Jose b. Ḥalafta points out that a statement made by Simeon b. Yoḥai had previously been made by Ḥanina (Tosef., Neg. ii. 11). Ḥanina never quotes as authorities his predecessors or contemporaries, not even his own father, and only once cites an opinion held successively by a number of his own house (Niddah 8b). It may be assumed that Tryphon was one of his teachers, for Ḥanina mentions some more or less private matters in connection with Tryphon's life, and speaks of him in reverential terms (Ned. 62b; Ḳid. 81b). At least fifteen halakot are preserved under Ḥanina's name (Weiss, "Dor," ii. 144). As a haggadist he appears inclined to adhere to the plain sense of the Scriptural texts.

The following is a specimen of Ḥanina's homiletics: "Of the Decalogue, five commandments were engraved on one tablet, and five on the other [comp. Deut. iv. 13]. The first commandment, 'I am the Lord thy God,' is therefore on a line with the sixth, 'Thou shalt not kill,' for whoso sheddeth human blood defies the Lord in whose image man was created. The second, 'Thou shalt have no other gods before me,' is in line with the seventh, 'Thou shalt not commit adultery,' for whoso serves other gods is necessarily faithless to the Lord" (comp. Ezek. xvi. 32; Hosea iii. 1); similarly with the rest of the commandments, taken in pairs (Mek., Yitro, Baḥodesh, 8). His respect for the judiciary and his sympathy with his fellow man, even when fallen, is shown in a remark on Deut. xxv., according to which the administration of legal punishment by a human tribunal exempts the sinner from deserved heavenly retribution. He further says: "Before the sinner submits to the sentence of the court he is spoken of as 'the wicked man'; but having submitted to the verdict he must again be acknowledged as 'thy brother'" (*ib.* 2-3; Mak. iii. 15; Sifre, Deut. 286). In his own house he was exceedingly strict, causing his domestics to stand in great awe of him. To avoid his displeasure they were once on the point of putting before him forbidden food in place of some that had been lost. An amora of the third century cites this as a warning to all men not to be domineering in their homes, lest in fear of the master's displeasure the domestics commit a wrong (Giṭ. 7a).

S. S. M.

ḤANINA B. ḤAMA: Palestinian halakist and haggadist; died about 250; frequently quoted in the Babylonian and the Palestinian Gemara, and in the Midrashim. He is generally cited by his prænomen alone (R. Ḥanina), but sometimes with his patronymic (Ḥanina b. Ḥama), and occasionally with the cognomen "the Great" ("ha-Gadol"; Ta'an. 27b; Pesiḳ. R. v. 15a). Whether he was a Palestinian by birth and had only visited Babylonia, or whether he was a Babylonian immigrant in Palestine, can not be clearly established. In the only passage in which he himself mentions his arrival in Palestine he refers also to his son's accompanying him (Yer. Soṭah i. 17b), and from this some argue that Babylonia was his native land. It is certain, however, that he spent most of his life in Palestine, where he attended for a time the lectures of Bar Ḳappara and Ḥiyya the Great (Yer. Sheb. vi. 35c; Yer. Niddah ii. 50a) and eventually attached himself to the academy of Judah I. Under the last-named he acquired great stores of practical and theoretical knowledge (Yer. Niddah ii. 50b), and so developed his dialectical powers that once in the heat of debate with his senior and former teacher Ḥiyya he ventured the assertion that were some law forgotten, he could himself reestablish it by argumentation (Ket. 103b).

Relations with Judah I.

Judah loved him, and chose him in preference to any other of his disciples to share his privacy. Thus when Antoninus once visited Judah, he was surprised to find Ḥanina in the chamber, though the patriarch had been requested not to permit any one to attend their interview. The patriarch soothed his august visitor by the assurance that the third party was not an ordinary man ('Ab. Zarah 10a). No doubt Ḥanina would have been early promoted to an honorable office had he not offended the patriarch by an ill-judged exhibition of his own superior familiarity with Scriptural phraseology (see Hamnuna of Babylonia). However, the patriarch, on his death-bed, instructed Gamaliel, his son and prospective successor, to put Ḥanina at the head of all other candidates (Yer. Ta'an. iv. 68a; comp. Ket. 103a). Ḥanina modestly declined advancement at the expense of his senior Efes, and even resolved to permit another worthy colleague, Levi b. Sisi, to take precedence. Efes was actually principal of the academy for several years, but Sisi withdrew from the country, when Ḥanina assumed the long-delayed honors (*ib.*; Shab. 59b). He continued his residence at Sepphoris, where he became the acknowledged authority in Halakah (Yer. Sheḳ. i. 46a; Yer. Beẓah i. 60a; Yer. Giṭ. iv. 46b), and where also he practised as a physician (Yoma 49a; comp. Yer. Ta'an. i. 64a).

His Unpopularity.

According to Ḥanina, 99 per cent of fatal diseases result from colds, and only 1 per cent from other troubles (Yer. Shab. xiv. 14c). He therefore would impress mankind with the necessity of warding off colds, the power to do so, he teaches, having been bestowed upon man by Providence (B. M. 107b). But neither his rabbinical learning nor his medical skill gained him popularity at Sepphoris. When a pestilence raged there, the populace blamed Ḥanina for failing to stamp it out. Ḥanina heard their murmurs and resolved to silence them. In the course of a lecture, he remarked, "Once there lived one Zimri, in consequence of whose sin twenty-four thousand Israelites lost their lives (see Num. xxv. 6-15); in our days there are many Zimris among us, and yet ye murmur!" On another occasion, when drought prevailed, the murmurs of the Sepphorites again became loud. A day was devoted to fasting and praying, but no rain came, though at another place, where Joshua b. Levi was among the suppliants, rain descended; the Sepphorites therefore made this circumstance also to reflect on the piety of their great townsman. Another fast being appointed, Ḥanina invited Joshua b. Levi to join him in prayer. Joshua did so; but no rain came. Then Ḥanina addressed the people: "Joshua b. Levi does not bring rain down for the Southerners, neither does Ḥanina keep rain away from the Sepphorites: the Southerners are soft-hearted, and when they hear the word of the Law, they humble themselves; while the Sepphorites are obdurate and never repent" (Yer. Ta'an. iii. 66c).

As a haggadist Ḥanina was prolific and resourceful—often, indeed, epigrammatic. Among his ethical aphorisms are the following: "Everything is in the power of Heaven, except the fear of Heaven." He bases this doctrine of free will on the Scriptural dictum, "And now, Israel, what doth the Lord thy God require [Hebr. שאל = "request"] of thee, but to fear the Lord thy God" (Deut. x. 12; Ber. 33b). With reference to Ps. lxxiii. 9, "They set their mouth against the heavens, and their tongue walketh through the earth," he says, "In general, man sins either against the sojourner on earth or against Heaven, but the evil-tongued sins against both" (Eccl. R. ix. 12; comp. Yer. Peah i. 16a). "Whoso avers that God is indulgent [that is, leaves sin unpunished] will find the reverse in his own life's experience; God is long-suffering, but 'his work is perfect: for all his ways are judgment'" (Deut. xxxii. 4; B. Ḳ. 50a). He predicts everlasting punishment for him who seduces a married woman, or who publicly puts his neighbor to shame, or who calls his neighbor by a nickname (B. M. 58b).

His Family and Pupils.

Of Ḥanina's family, one son, Shibḥat, or Shikḥat, died young (B. Ḳ. 91b); but another, Ḥama, inherited his father's talents and became prominent in his generation (see Ḥama b. Ḥanina). One of his daughters was the wife of a scholar, Samuel b. Nadab by name ('Ar. 16b); another died during Ḥanina's lifetime, but he shed no tears at her death, and when his wife expressed astonishment at his composure he told her that he feared the effects of tears on his sight (Shab. 151b). He lived to be very old, and retained his youthful vigor to the last. He attributed his extraordinary vitality to the hot baths and the oil with which his mother had treated him in his youth (Ḥul. 24b). In his longevity he recognized a reward for the respect he had shown his learned elders (Eccl. R. vii. 7). Among his pupils were such men as Johanan b. Nappaḥa and Eleazar II., both of whom became rabbinical authorities in their generation, and in whose distinction he lived to rejoice. One morning, while walking, leaning on the arm of an attendant, Ḥanina noticed throngs of people hurrying toward a certain place. In answer to his inquiry, he was informed that R. Johanan was to lecture at the academy of R. Benaiah, and that the people were flocking thither to hear him. Ḥanina thereupon exclaimed, "Praised be the Lord for permitting me to see the fruit of my labors before I die" (Yer. Hor. ii. 48b).

ḤANINA B. IDDI. See Ḥanina b. Adda.

ḤANINA (ḤINENA) B. IḲA (YAḲE: with the appositive "bar" = "son of" **Beroḳa,** or **Beriḳa**; comp. Yer. Shab. vii. 10b, xx. 17c): Scholar of the fourth century; contemporary with Pappa and Zebia (Ber. 25b; Niddah 52a). That he was a Babylonian by birth is evidenced by his reporting halakot of Judah b. Ezekiel, who never visited Palestine (Ber. 25b, 43b, where the prænomen is "Huna"; but comp. Rabbinovicz, "Diḳduḳe Soferim," *ad loc.*). Of his last days the Gemara relates: R. Pappa and R. Huna b. Joshua were traveling and met R. Ḥanina b. Iḳa. Not having seen him for at least thirty days, they, according to custom, pronounced the benediction: "Blessed be He who endoweth with wisdom those who fear Him." They also thanked God for permitting them to see Ḥanina once more. Ḥanina returned their compliments, and thereupon died (Ber. 58b).

s. S. M.

ḤANINA (ḤINENA) B. ISAAC: Palestinian haggadist of the fourth century; contemporary of Samuel b. Ammi, with whom he engaged in an exegetical controversy (Yer. Ber. ii. 10a; Gen. R. xv. 7: "Ḥinena"). Huna the Younger cites as Ḥanina's the following comment on the significance of the movements of the ram which Abraham offered in the place of Isaac (Gen. xxii. 13): "Abraham noticed the ram caught in a thicket, and escaping only to be caught in another thicket. The Lord thereupon said: 'Abraham, thus will thy descendants be entangled by their sins and come in conflict with various kingdoms: freed from Babylonian oppression, they will fall under Media; from Media, under Greece; from Greece, under Edom [Rome].' Abraham then inquired, 'Lord of the Universe, will this be their lot forever?' The Lord answered, 'They will ultimately be delivered at the sound of the ram's horn.' Therefore the Biblical saying, 'The Lord God shall blow the trumpet,'" etc. (Zech. ix. 14; Yer. Ta'an. ii. 65d; comp. Gen. R. lvi. 9). Ḥanina believed that the impatience of Israel's progenitors was less irritating than the patience of their descendants. He cites as an example Jacob's impatient remonstrance with Laban for searching through his household goods (Gen. xxxi. 33 *et seq.*). On the other hand, where patience was called for, stinging language was used, as shown in David's appeal to Jonathan (I Sam. xx. 1; Gen. R. lxxiv. 10; Yalḳ., I Sam. xx. 1; comp. Pesiḳ. xiv. 116b).

Bibliography: Bacher, *Agada der Palästinensischen Amoräer*, iii. 681 *et seq.*

s. S. M.

ḤANINA KATOBA: Palestinian scribe or notary, who acquired some familiarity with law. Only one halakah, which he learned from Aḥa, is connected with his name (Yer. Sanh. ii. 19c; Yer. Hor. iii. 47a).

s. S. M.

ḤANINA B. PAPPA: Palestinian amora, halakist, and haggadist; flourished in the third and fourth centuries; a younger contemporary of Samuel b. Naḥman (Yer. Sheb. v. 36a). His name is variously written **Ḥanina, Hananiah,** and **Ḥinena** (comp. Yer. Ber. i. 4b; Yer. M. Ḳ. iii. 83c; Cant. R. i. 2; Yalḳ., Cant. i. 2). That he possessed great stores of learning is shown by the frequency with which he is cited in both Talmud and Midrash; and he enjoyed the companionship of the foremost teachers of his generation. With Simon (Shimeon) b. Pazzi he discussed exegetics, and he was associated with Abbahu and Isaac Nappaḥa on the judiciary (Giṭ. 29b; B. Ḳ. 117b). Legend has surrounded his name with supernatural incidents (see Jew. Encyc. i. 361, *s.v.* Alexandri).

Legends About Him.

Ḥanina was very charitable, and distributed his gifts at night so as not to expose the recipients to shame. But as the night is assigned to the evil spirits, his procedure displeased the latter. Once the chief of the spirits met him and asked, "Do you not teach the Biblical inhibition, 'Thou shalt not remove thy neighbor's landmark'? Why then do you invade my province?" Ḥanina answered, "Does not the Bible also teach, 'A gift in secret pacifieth anger'?" thus reminding the spirit that no evil could befall him. On hearing this the spirit became disheartened and fled (Deut. xix. 14; Prov. xxi. 14; Yer. Peah viii. 21b ["Hananiah"]; Yer. Sheḳ. v. 49b ["Ḥinena"]). Once Ḥanina was tempted by a matron, but at his word his body became repulsive with sores; when, by the aid of witchcraft, the temptress removed them, he ran away and hid in a haunted bath-house. There he spent the night, and escaped at daybreak (Ḳid. 39b, 81a).

Ḥanina is reputed to have been providentially guarded against errors of judgment. On one occasion he made a mistake in connection with a mourning, and in the succeeding night was corrected by a dream in which he heard the message, "Thou hast disobeyed the mouth of the Lord" (I Kings xiii. 21; Yer. M. Ḳ. iii. 83a). In his public lectures Ḥanina frequently illustrated God's wisdom as manifested in nature (Ḥul. 60a; Niddah 31a), and expressed many eschatological thoughts. Starting with Isa. xliii. 9 ("Let all the nations be gathered together, and let the people be assembled: who among them can declare this, and show us former things? let them bring forth their witnesses, that they may be justified"), he delivered the following homily, perhaps the longest and most connected of all haggadot:

"In the future the Holy One—blessed be He!—will take a scroll of the Law, and invite all who have observed its behests to appear and receive their due reward. All nations will come promiscuously, but the Lord will say, 'Let each nation with its historians come in singly.' Edom [Rome] will then appear, when the Lord will ask, 'Wherewith have ye occupied yourselves?' Edom will answer, 'Lord of the Universe, we have erected many market-places, built many baths, amassed silver and gold: all this we did that the children of Israel might devote themselves to the practise of the Law.' Thereupon God will say, 'Consummate knaves, whatever ye have accomplished ye have done from self-interest; ye have erected market-places to people them with prostitutes; built baths to benefit yourselves; and as for the silver and the gold, that is Mine [see Ḥag. ii. 8]. But is there one among you that can tell about this [Law]?' As soon as they hear they will depart crestfallen, and Persia will enter. To the question as to their occupation the Persians will answer that they have built bridges, conquered cities, and waged wars, all to afford Israel opportunities for keeping the Law. However, they too will be rebuked by the Lord, who will point out that whatever they have done has been prompted by selfish motives; they in turn will be asked, 'Who of you can declare this [Law]?' Persia will then retire in confusion; so it will go with every other nation except Israel.

"At last the nations will protest, 'Lord of the Universe, didst Thou ever offer us the Law, and we fail to receive it?' To which the Lord will rejoin: 'Show us former things; I have offered you seven precepts, which you accepted; did you keep them?' Whereupon they will ask, 'And did Israel keep the Law?' Then the Lord will say, 'I Myself bear witness that Israel did.' The nations: 'May a father bear witness for a son? Thou hast said [Ex. iv. 22], "Israel is my son, even my first-born."' The Lord: 'Then heaven and earth will testify.' The nations: 'Heaven and earth are interested witnesses, for the

Bible says [Jer. xxxiii. 25, Hebr.], "Were it not for My covenant to be kept day and night, I should not have appointed the ordinances of heaven and earth."' The Lord: 'From among yourselves witnesses will come and testify that Israel has faithfully kept the Law. Nimrod can testify that Abraham did not worship idols; Laban can testify that there was no ground for suspecting Jacob of misappropriation; Potiphar's wife can testify that Joseph could not be suspected of immorality; Nebuchadnezzar can testify that Hananiah, Mishael, and Azariah never bowed to an image; Darius can testify that Daniel never neglected prayer; Bildad the Shuhite, and Zophar the Naamathite, and Eliphaz the Temanite can testify that Israel has kept the Law.' Then the nations will propose: 'Give us the reward in advance, and we will keep the Law.' Thereunto the Lord will answer, 'Whoso toiled on the eve of the Sabbath [*i.e.*, stored up good deeds against the time when nothing more could be done] may feast on the Sabbath-day; but whoso did not toil on the eve of the Sabbath, whereon shall he feast during the Sabbath?'" ('Ab. Zarah 2a *et seq.*).

s. S. M.

ḤANINA (ḤANIN) B. PAZZI: Palestinian haggadist of the third and fourth centuries. His teachings are confined to the midrashic literature. It is suggested that he may have been the brother of the better-known amora Simon b. Pazzi; but if so, he never cites that brother. Among the comparatively few sayings known to be his is the following: "To the office of designer of the Tabernacle God appointed Bezaleel and Aholiab [Ex. xxxi. 2, 6]—the first being a member of Judah, the largest of the tribes; the second, of Dan, the smallest of the tribes—that people may learn not to slight the small, and that the greater should not be proud; great and small are alike before God" (Ex. R. xl. 4; Tan., Ki Tissa, 13). Speaking of the early motherhood of Hagar (Gen. xvi. 4) and of Lot's daughters (*ib.* xix. 23 *et seq.*), and comparing them with the long barrenness of Sarah, Ḥanina says, "Weeds require neither hoeing nor sowing; they spring up of themselves, and grow and thrive; while to produce wheat, how much trouble and anxiety must be endured!" (Gen. R. xlv. 4).

s. S. M.

ḤANINA OF SEPPHORIS. See Ḥanina (Hananiah) II.

ḤANINA (HANANIAH) OF SHALḲA: Palestinian haggadist of the fourth century; a contemporary of Joshua of Siknin. He has left no original haggadot. In the few instances in which his name appears in the midrashim, it is joined with that of Joshua, the two haggadists reporting interpretations of their predecessors, Johanan and Levi (Tan., Ki Teẓe, 9: "Shakla"; *ib.*, ed. Buber, p. 10; Pesiḳ. iii. 25b; Esther R. ii. 2; Midr. Shemuel xiv.: "Hania b. Shalda"). He is probably identical with the Salcha mentioned in Deut. x. 3, or with the Seleucia of Josephus ("B. J." iv. i. § 1; see Neubauer, "G. T." p. 271; Hastings, "Dict. Bible," iv. *s.v.* "Salecah").

s. S. M.

ḤANINA OF SURA: Babylonian scholar of the fifth century; the junior of Mar Zuṭra, who reports to Ashi a halakic objection raised by Ḥanina (Niddah 52a). It is said that at one time Ḥanina's mother had such an aversion for her husband that she would not live with him. Mar Zuṭra succeeded in bringing them together again; and Ḥanina was the offspring of the reunion (Ket. 63b). In the haggadic literature he does not appear, but in halakah he is quoted as an authority (Soṭah 25b; Ḳid. 79a). He endeavors to reconcile conflicting opinions of others (Ber. 52b; Shab. 23b; see Rabbinovicz, "Diḳduḳe Soferim," *ad loc.*). According to Ḥanina, since there is no "bitter water" (see Num. v.) to prove a woman's fidelity, a man must not so readily suspect his wife of unfaithfulness, as it may lead to forced yet gratuitous separation (Soṭah 2b).

s. S. M.

ḤANINA B. TERADION. See Hananiah b. Teradion.

ḤANINA (ḤINENA) B. TORTA: Palestinian scholar of the third century; disciple of Johanan and contemporary of Ammi and Isaac Nappaḥa (Tem. 29a, 31a; Ned. 57b; comp. Yer. Ter. vii. 55a). He was born in Ṭirna, or Torta, identified by Neubauer ("G. T." p. 267; comp. p. 363) with Ṭuria in Palestine, or Be-Torta in Babylonia. If the latter identification is correct, Ḥanina was a Palestinian immigrant from Babylonia. One halakic midrash, by Jannai, is cited by him (Ned. 57b); he reports halakot in the name of Hezekiah b. Ḥiyya (Yer. Peah iii. 17d) and Hoshaiah (Yer. Ter. x. 47b); while Ḥiyya b. Abba cites Ḥanina himself as an authority (Yer. Ber. iii. 6d).

s. S. M.

ḤANINAI (ḤANINA) KAHANA B. ABRAHAM: Principal (gaon) of the academy at Pumbedita (782–786). Nothing is known of his life and labors except that he displeased the exilarch, and was therefore removed from office, Huna Mar ha-Levi being installed in his place.

Bibliography: Grätz, *Geschichte der Juden*, v. 421.

s. S. M.

ḤANINAI (ḤANINA) KAHANA B. HUNA: Gaon of Sura (765–775); contemporary of Malka b. Aḥa, principal of the academy at Pumbedita. Ḥaninai was a pupil of the gaon Judah, who prevented the election of Anan, the founder of the Karaite sect, to the exilarchate, and succeeded to the office himself. Ḥaninai united with his brother gaon at Pumbedita to remove the exilarch, Naṭronai b. Ḥabibai (Zebinai), electing Zakkai b. Aḥunai instead. Ḥaninai left several responsa, and to him is ascribed a midrash on Num. xi. 16, extracts from which are preserved in the Yalḳuṭ (see Yalḳ., Num. 636).

Bibliography: Grätz, *Gesch.* v. 184; Halévy, *Dorot ha-Rishonim*, iii. 92b, 105a; Weiss, *Dor*, iv. 41; Zunz, *G. V.* p. 292.

s. S. M.

HANNAH (חנה): One of the two wives of Elkanah and mother of the prophet Samuel. The first chapter of I Samuel and the first half of the second are almost entirely devoted to her.

Hannah was considered as a prophetess by Jonathan b. Uzziel. In his targum he thus explains the first five verses of I Sam. ii. as being a prophecy: Verses 1, 2: These indicate that her son Samuel would be a prophet, and that her great-grandson, Heman, the singer, would stand with his fourteen sons among the musicians in the Temple. Verses 3–5: These foretell the rout of Sennacherib; the fall of Nebuchadnezzar and that of the Macedonian kingdom; the fatal end of Haman's sons; and the return of Israel from Babylon to Jerusalem. Hannah is likewise counted among the seven prophetesses in Meg. 14a.

It is further said that the silent prayer of Hannah ought to be taken as an example by every one (Ber. 31a). Hannah, it is also said, was the first who called God by the name "Ẓebaoth" (*ib.* 31b). She was remembered by God on New-Year's Day (R. H. 11a), and for this reason I Sam i. is read as the haftarah on that day. The expression "And Hannah prayed" (I Sam. ii. 1), though the following passages contain no prayer, is explained (Ber. 31b) as meaning that, independently of the following passages, Hannah really addressed a prayer to God for having spoken bitter words against Him before she bore Samuel.

E. G. H. M. Sel.

HANNATHON: City of Zebulun, apparently on the northern boundary, about midway between the Sea of Galilee and the valley of Jiphthah-el (Josh. xix. 14).

E. G. H. B. P.

HANNAUX, EMMANUEL: French sculptor; born at Metz in 1855. He began to study at the industrial school at Strasburg, but returned to Metz on the outbreak of the Franco-Prussian war in 1870. Wishing to remain in France, he then went to Nancy, where he continued his studies at the Ecole de Modelage et de Sculpture, supporting himself by carving pipes. Going to Paris in 1876, he was admitted to the Ecole des Beaux-Arts, entering the classes of Dumont, Thomas, and Bonassieux. At the Salon of 1889 Hannaux was awarded a third medal for his "Le Bûcheron"; in the same year he received a second medal for his patriotic group "Le Drapeau," now in the Draguignan Museum; and in 1894 he received the first medal for his "Orphée Mourant," now at the museum of Luxembourg. His "Fleur du Sommeil" was bought by the French government for the museum of Puy. Among Hannaux's best-known busts are those of the Bishop of Metz, Dupont des Loges, Dr. Pinel, Ambroise Thomas, the academicians Henri Weil and Joseph Derenbourg, Mme. Coralie Cahen, and the Baroness de Hirsch.

In 1900 Hannaux was made a chevalier of the Legion of Honor. He was commissioned to execute the bas-reliefs for the Château d'Eau at the exposition of that year. In the Salon of 1903 Hannaux received the "Médaille d'Honneur."

S. M. Bl.

ḤANNELES (ḤANELES), JUDAH LÖB BEN MEÏR (named "Ḥanneles" after his mother, Hannah): Rabbinical author of the sixteenth century. He wrote "Wayiggash Yehudah" (Lublin, 1599), a commentary on Jacob ben Asher's "Ṭur Oraḥ Ḥayyim," printed together with the text of the "Ṭur." In an eighteenth-century Dyhernfurth edition it is printed with the "Bet Yosef" and other commentaries.

S. M. Sc.

HANNOVER, NATHAN (NATA) BEN MOSES: Russian historian, Talmudist, and cabalist; died, according to Zunz ("Kalender," 5623, p. 18), at Ungarisch-Brod, Moravia, July 14, 1663. Jacob Aboab, however, in a letter to Unger (Wolf, "Bibl. Hebr." iii., No. 1728), gives Pieve di Sacco, Italy, as the place of Hannover's death, without indicating the date. The place of his birth is equally uncertain. According to Nepi-Ghirondi ("Toledot Gedole Yisrael," p. 270) he was born at Cracow, but Steinschneider says that Nathan Hannover and Nathan of Cracow were two different persons.

Hannover lived for a time at Zaslav, Volhynia; and when this town was attacked by the Cossacks he fled from Russia. He went first to Prague, then to Venice, where he studied Cabala under Ḥayyim Cohen, Moses Zacuto, and Samuel Aboab. Later he became rabbi of Jassy, Moldavia, and afterward, according to Jacob Aboab, he returned to Italy. Hannover is chiefly known for his work entitled "Yewen Meẓulah" (Venice, 1653), a complete history of the persecutions of the Jews in Russia and Poland under Bogdan Chmielnicki in 1648 and 1649. Hannover in this work gives a brief description of the Polish government of the time and of its relations to the Cossacks, and thus indirectly indicates the causes which led to the Cossack outbreak. He also gives a very vivid picture of Jewish life in Poland and of the yeshibot.

This work, owing to its historical value, was translated into Judæo-German (1687), into German (1720), and into French by Daniel Levy (published by Benjamin II., Tlemçen, 1855). This last translation was revised by the historian J. Lelewel, and served as a basis for Kayserling's German translation (also published by Benjamin II., Hanover, 1863). The "Yewen Meẓulah" certainly places Hannover among the best historians of the seventeenth century. Kostomarov, utilizing Mandelkern's Russian translation, gives many extracts from it in his "Bogdan Chmielnicki" (iii. 283-306).

Hannover's other works are: "Ṭa'ame Sukkah," a homiletic explanation of the Feast of Tabernacles (Amsterdam, 1652); "Safah Berurah," a dictionary of the Hebrew, German, Italian, and Latin languages, and arranged in Hebrew alphabetical order (Prague, 1660)—in a second edition, by Jacob Koppel b. Wolf (Amsterdam, 1701), French was included; "Sha'are Ẓiyyon," a collection of mystical prayers, religious customs, and ascetic reflections; it was taken chiefly from cabalistic works, and was very popular among the Eastern Jews. It appeared first in Prague in 1662, and enjoyed such popularity that it was several times reedited (see Benjacob, "Oẓar ha-Sefarim," p. 604). Reference is also made by Hannover in his books to the following three unpublished works: (1) "Neṭa' Sha'ashu'im," homilies on the Pentateuch; (2) "Neṭa' Ne'eman," a cabalistic work; and (3) a commentary on the "Otiyyot de R. 'Aḳiba."

HANNOVER, RAPHAEL LEVI: Mathematician and astronomer; son of Jacob Joseph; born at Weikersheim, Franconia, 1685; died at Hanover May 17, 1779. He was educated at the Jewish school of Hanover and at the yeshibah of Frankfort-on-the-Main, and became bookkeeper in the house of Oppenheimer of Hanover. Here he attracted the attention of Leibnitz, and for a number of years was one of his most distinguished pupils, and afterward teacher of mathematics, astronomy, and natural philosophy. He wrote: "Luḥot ha-'Ibbur," astronomical tables for the Jewish calendar (Leyden-Hanover, 1756); "Tekunat ha-Shamayim," on astronomy and calendar-making, especially commenting on the Talmudical passages on these topics, with glosses of Moses Tiktin (Amsterdam, 1756). An enlarged revision of the latter work, with two other astronomical works of his, is in manuscript. The "Luḥot ha-'Ibbur" has been published with M. E. Fürth's "Yir'at Shamayim," on Maimonides' "Yad," Ḳiddush ha-Ḥodesh (Dessau, 1820-21).

HANOVER: Capital of the Prussian province of the same name. Jews lived there as early as the first half of the fourteenth century, and they were well treated by the authorities. The municipal law ("Stadtrecht") of 1303 contained a clause, revoked later, to the effect that no one was to offend the Jews either in word or in deed. In 1340 the Jews were allowed to slaughter their own cattle, notwithstanding the opposition of the regular butchers. In a document of 1342 mention is made of a Jew named Dustman in connection with a commercial transaction.

According to an inscription in the vestry of the Markt-Kirche dated 1350, after the Black Death, the Jews of Hanover, who had been accused of poisoning wells, were banished from the city. It is probable that at this time the municipal law referred to above was erased from the burgher roll. Not until two decades later did a Jew again live in Hanover; and he was expelled (June 1, 1371) by an edict of Dukes Wenceslaus and Albert of Saxony and Lüneburg.

Expulsion.

Although by this same edict the citizens were assured that henceforth and forever no Jews would be allowed to live in Hanover, the dukes just mentioned granted to the city council a few years later (June 8, 1375) the privilege of admitting Jews ("Privilegium de Judæis Recipiendis") and of retaining the taxes payable by them. The dukes, on their part, undertook to protect the Jews, who were granted the privilege, among others, of fishing in the "Judenteich" at Castle Lauenrode.

Documents of the years 1403, 1407, and 1415, having reference to the collection of "Opfer-pfennige," taxes, interest, and rents from the Jews of Lower Saxony, mention Jews of the city of Hanover. From 1439, regulations are met with referring directly to the Jews of Hanover, as, for example, in matters of suretyship (1439) and residence. In 1445 it was forbidden, under a penalty of 5 Bremen marks, for a Jew or a linen-weaver to live on the dike in the "Brühl" of Hanover (now Lange Strasse). On Aug. 4, 1451, Bishop Nicholas of Minden, to whose diocese Hanover belonged, issued an order compelling the Jews to wear the badge—for the men yellow rings on the breast of the overcoat or mantle, and for the women two bluish stripes on the upper garments. Two years later (July 20, 1453) the council of Hanover addressed two letters to the council of Hildesheim requesting the discontinuance of the suit brought before the ecclesiastical court by a citizen against the Jew Nachtman of Hanover.

On June 5, 1499, an agreement was entered into by the city council and some Jews, among whom were Lauwe, Samson, and Solomon van Aschersleben, by which the council agreed to receive the Jews into the city for a term of eight years, together with Solomon, their rabbi and precentor, and his son Humprecht, as well as their families, and to accommodate them with lodgings in certain houses situated on the Zwinger and belonging to the council. For this privilege the Jews were to make an immediate payment of 20 Rhenish gulden and an annual one of 150 gulden. Permission was also given them to kill their own cattle.

Admission for Eight Years.

Thirty years later (July 25, 1529) the council, by order of Duke Erich, gave permission to the Jew Michael of Derneburg to build for himself and family a dwelling-house in the new town ("Neustadt"), where also the Jews Fibes and Menneke had resided (letter of the duke, Oct. 18, 1516). Michael was promised protection by the magistrate in consideration of an annual payment of 8 Rhenish gulden.

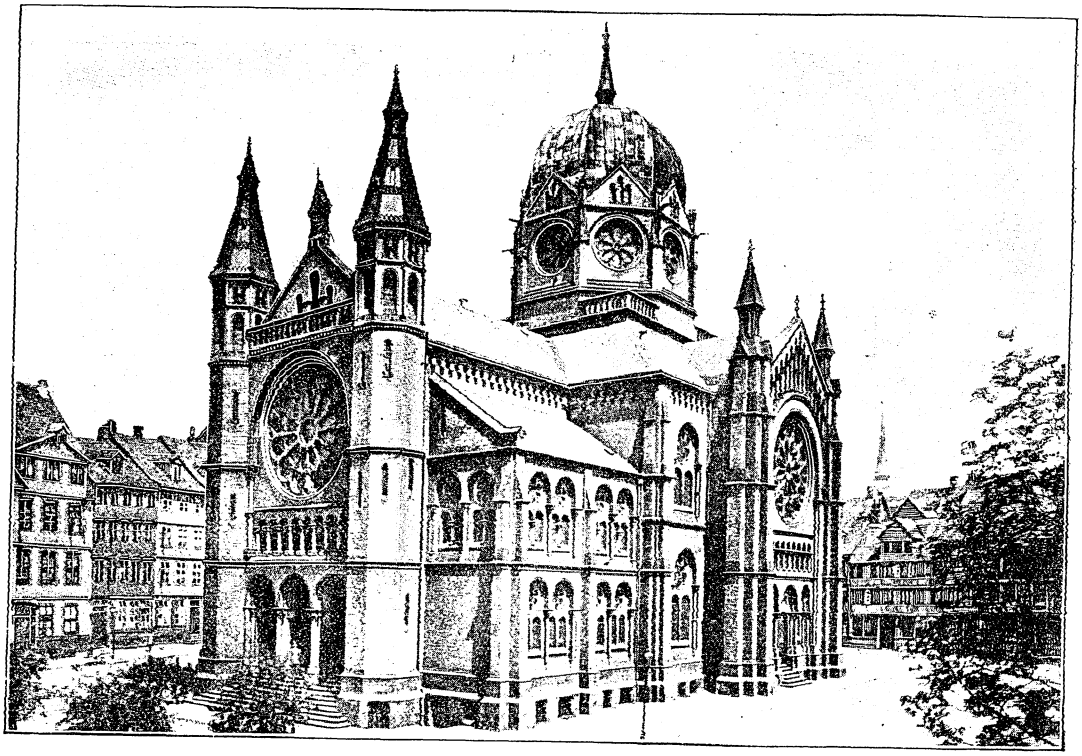
Among other Jews who lived in Hanover in the middle of the sixteenth century were the following: Nachmann (mentioned in a letter of Jan. 5, 1549, from Heinrich of Steinberge, Oelbisfelde, to the council); Isaac; Sander, his son-in-law; Isaac's two sons, Fibes and Abraham, to whom the council in 1550 issued a letter of protection (charging 12 gulden yearly or 200 in a lump sum); Menlynn; Lazarus; Feibelmann; David Meyer; and Simon (of the Neustadt), who, together with the above-mentioned Isaac, Sander, and Fibes, became surety for Abraham of Peine (July 2, 1553) on his release from prison, to which he had been committed on a charge of fraud.

Hanoverian Jews in Constantinople.

In 1564 several Hanoverian Jews sojourned in Constantinople, where they transacted important business with the Turks and assisted in securing the release from prison of a Hanoverian nobleman, Lebant von Reden.

Duke Erich the Younger issued an edict on Jan. 8, 1553, by which he banished all Jews from his territory, and an order dated Nov. 28, 1574, refused the Jews in Hanover protection and safety. It appears, however, that those Jews who stood under the direct protection of the council remained in Hanover for some time longer. Moreover, the magistracy interposed occasionally in behalf of its Jews, as when, in 1554, it addressed a letter to the council of the principality of Calenberg on behalf of Isaac and his son Fibes, whom the governor Alfen had imprisoned. Fibes afterward obtained the duke's favor, and in 1563 transacted some business for him; he also purchased in 1580, according to the register of apothecaries, a silver mug weighing 80 half-ounces (at 1 thaler per ounce) for use in the dispensary. In the same year (Nov. 4) the council granted a letter of protection to the Jew Levi, son of Michael, for which he had to pay 100 Rhenish gold florins, besides a yearly tax of 20 florins.

After 1584, when Duke Julius of Brunswick took possession of the principalities of Göttingen and Calenberg (to the latter of which Hanover belonged), Jews were again permitted to reside in those provinces. They had, however, to contend with the hostility of the populace, which was especially incited by the clergy of Hanover, so that the magistrates in 1587 found it necessary to solicit the opinions of the faculties of Leipsic, Wittenberg, and Helmstedt as to whether rights guaranteed to the Jews were bound to be respected. The answer of the universities was to the effect that the promises given to the Jews must be kept.



Synagogue at Hanover.
(From a photograph.)

On May 3, 1588, it was ordered by the council that business connections between Christians and Jews must cease, and the authorities of the old town ("Altstadt") also decided that only adherents of the Augsburg confession should be tolerated. After this several Jews left the city and settled in neighboring places, particularly in Wunstorf.

In 1608 Jews again settled in the Neustadt, at the invitation of the prefect, Fritz Molins, who had houses erected for their accommodation and one for their synagogue; the latter, however, was torn down in 1613 by order of the ruling prince. A synagogue had formerly existed in the Judenstrasse (previously the Schuhstrasse, now the Ballhofstrasse), and here the court preacher, Dr. Urbanus Rhegius, preached (1533), attempting to convert the Jews to Christianity.

Although in the seventeenth century the province of Calenberg at each session of the Landtag voted against the admission of Jews, it seems that the princes, like Duke Johann Friedrich and Elector Ernst August, admitted several well-to-do Jewish families in order to promote the growth of the Neustadt, which had been enlarged and built up. Of the Jews of Hanover at this period who frequented the Leipsic fairs (1683–99) may be mentioned Liepmann Cohen (Leffmann Behrends), who stood in high favor at the Guelfic court. He succeeded in obtaining permission (renewed Oct. 9, 1697, by Georg Ludwig) to appoint a district rabbi, to whom also the Jews of Lüneburg, Hoya, and Diepholz had to subordinate themselves. In 1673 he caused to be issued a rigorous edict for the protection of the bodies reposing in the Jewish cemetery in Hanover. In 1688 a small synagogue was established in the house of Levin Goldschmidt (Löb Hannover), and in 1703–04 a new synagogue building was erected by Liepmann Cohen and his son, Naphtali Hirz, on the site of the old one, torn down in 1613. The new synagogue belonged to the bankrupt estate of the Behrends Brothers, and was sold in 1743 to the highest bidder. Court agent Michael David and the philanthropist Solomon Gottschalk were the purchasers; and they presented it to the Jewish community.

In the Seventeenth Century.

During the Seven Years' war the Jews of Hanover had in 1757 to provide 2,000 sheets and 1,000 shirts for the soldiers, besides paying in common with the other Jews of the country the war-tax of one thaler per head and 10 per cent on personal property, no distinction being made regarding sex. On the twenty-seventh of Ṭebet, 5522 (Jan. 1, 1762), the ח"ק דב"ח וג"ח benevolent society was founded in Hanover. It is still in existence. On Jan. 1, 1802, on the declaration of peace between England and France, a thanksgiving service was held in the synagogue by the Jewish community.

Under Franco-Westphalian rule (1806–13) matters pertaining to the Jewish cult were regulated by the consistory, and the celebration of divine service was allowed, through the intercession of Count von Hardenberg, to continue in the established form.

In 1821 the community welcomed George IV. of Great Britain and Hanover with a Hebrew poem with German translation. In 1831 the elders and deacons of the congregation sent to the government a petition asking for full rights of citizenship for all the Israelites of the kingdom of Hanover, which was supported by Councilor Schlegel in the lower house. The laws of 1842 and 1844, which regulated the synagogue, school, and charities of the community, are still in force. During the years 1864–70 a new synagogue was built from designs by the architect Oppler.

Under British Rule.

The congregation at present numbers more than 4,000. Since 1848 it has supported a seminary for Jewish teachers, the present director being Dr. Knoller. The following district rabbis have officiated in Hanover:

Rabbis.

Joseph b. Meshullam Cohen (d. 1703).
Joseph Meyer b. Abraham Moses (d. 1735).
Isaac Selig Kara (d. 1755).
Abraham Meïr Cohen (d. 1758).
Aryeh Löb (Leibusch) b. Jacob Joshua Falk (also known as "Levin Joshua"; d. March 6, 1789).
Issachar Bär (Berisch), son of the foregoing Aryeh Löb (d. Nov., 1803).
Marcus (Mordecai) Adler.
Nathan Marcus Adler, son of Marcus Adler (died in England in 1890).
Samuel E. Meyer (d. July 6, 1882).
The present rabbi (1903) is S. Gronemann.

Of other distinguished men of learning who have lived in Hanover may be mentioned: Joseph Oppenheim (formerly rabbi in Holleschau, and a son of R. David Oppenheim of Prague); Solomon Hanau (d. Sept. 15, 1746); Raphael Levy (d. May 17, 1779); Abraham Oppenheim (d. Nov., 1786); Abraham b. Ḥayyim Lisker (d. 1784); M. Wiener, school-director (d. March 31, 1880); and Prof. S. Frensdorff (d. March 24, 1880).

G. A. Lew.

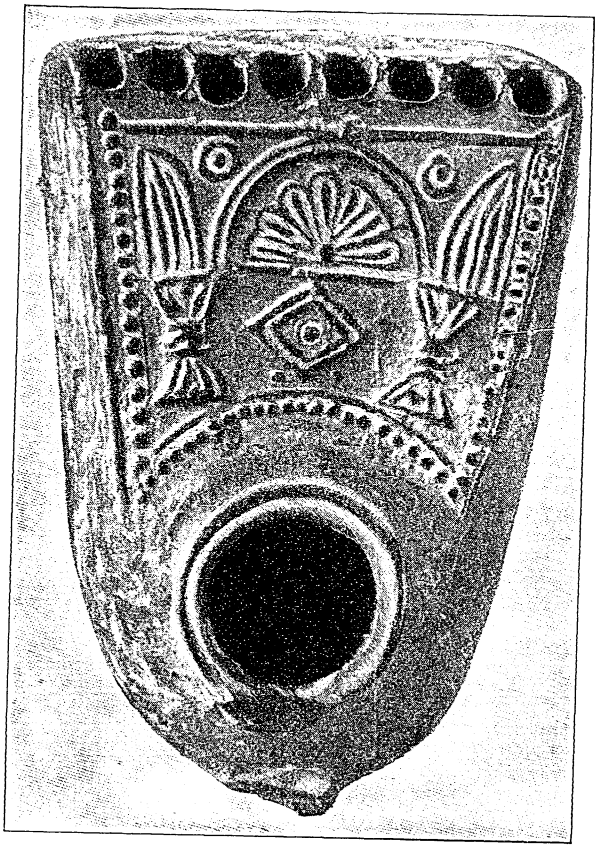
ḤANUKKAH: The Feast of Dedication, also called "Feast of the Maccabees," celebrated during eight days from the twenty-fifth day of Kislew (December), chiefly as a festival of lights. It was instituted by Judas Maccabeus, his brothers, and the elders of the congregation of Israel, in the year 165 B.C., to be celebrated annually with mirth and joy as a memorial of the dedication of the altar (I Macc. iv. 59) or of the purification of the sanctuary (II Macc. i. 18). Three years earlier, on the same day, Antiochus Epiphanes had caused a pagan altar to be set up at the altar of burnt offerings in the Temple at Jerusalem, and sacrifices to be offered to his idol (I Macc. i. 41–64; II Macc. vi. 2). The idol called "Zeus Olympius" was probably also called "Ba'al Shamayim," of which שקוץ שמם seems to be a cacophemy (Dan. xi. 31, xii. 11; I Macc. i. 54; see Hoffmann, "Ueber Einige Phönizische Inschriften," 1889, p. 29).

After having recovered the Holy City and the Temple, Judas ordered the latter to be cleansed, a new altar to be built in place of the one polluted, and new holy vessels to be made. When the fire had been kindled anew upon the altar and the lamps of the candlestick lit, the dedication of the altar was celebrated for eight days amid sacrifices and songs (I Macc. iv. 36), similarly to the Feast of Tabernacles (II Macc. x. 6; comp. *ib.* i. 9), which also lasts for eight days, and at which during the Second Temple (Suk.

v. 2–4) the lighting of lamps and torches formed a prominent part. Lights were also kindled in the household, and the popular name of the festival was, therefore, according to Josephus ("Ant." xii. 7, § 7), Φῶτα = "Festival of Lights."

Supposed Origin.

In the Talmud it is principally known as the "Feast of Illumination," and it was usual either to display eight lamps on the first night of the festival, and to reduce the number on each successive night, or to begin with one lamp the first night, increasing the number till the eighth night. The Shammaites, usually representatives of the older traditions, favored the former custom; the Hillelites advocated the latter (Shab. 21b). Josephus thinks that the lights were symbolical of the liberty obtained by the Jews on the day of which Ḥanukkah is the celebration. The Talmudic sources (Meg. *eodem*; Meg. Ta'an. 23; comp. the different version Pes. R. 2) ascribe the origin of the eight days' festival, with its custom of illuminating the houses, to the miracle said to have occurred at the dedication of the purified Temple. This was that the one small cruse of consecrated oil found unpolluted by the Hasmonean priests when they entered the Temple, it having been sealed and hidden away, lasted for eight days until new oil could be prepared for the lamps of the holy candlestick. A legend similar in character, and obviously older in date, is that alluded to in II Macc. i. 18 *et seq.*, according to which the relighting of the altar-fire by Nehemiah was due to a miracle which occurred on the twenty-fifth of Kislew, and which appears to be given as the reason for the selection of the same date for the rededication of the altar by Judas Maccabeus (comp. Ḥag. iii. 10, 18, 20; Num. R. xiii. 4).



Ḥanukkah Lamp Found in Jerusalem Excavations.
(In the possession of J. D. Eisenstein.)

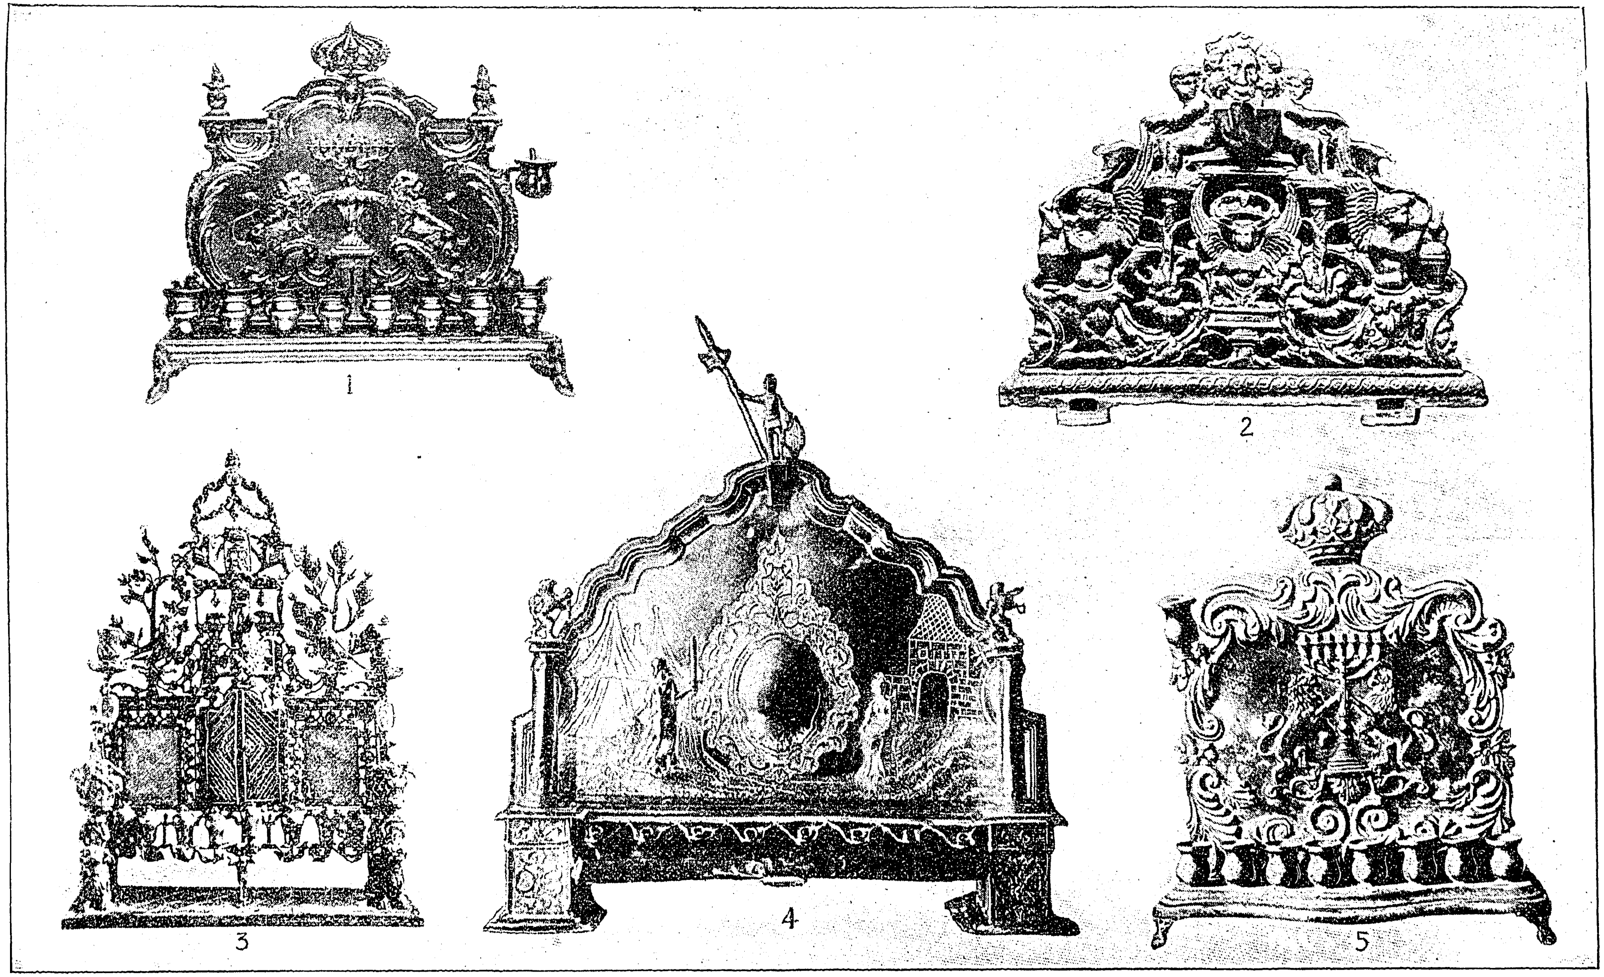
The actual reason for the selection of the twenty-fifth of Kislew by Judas Maccabeus for the dedication of the altar is stated to have been, as mentioned above, that on the very same day three years earlier Antiochus Epiphanes had a pagan altar set up at the altar of burnt offerings in the Temple of Jerusalem and sacrifices offered to his idol (I Macc. i. 41–64; comp. II Macc. vi. 2, where the heathen god is called "Zeus Olympius"). The twenty-fifth of Kislew was accordingly a day sacred also to the heathen before it became a Jewish festival. According to Ewald ("Gesch. des Volkes Israel," 3d ed., iv. 407) and Wellhausen ("Israelitische und Jüdische Gesch." p. 210; comp. Paulus Cassel, "Weihnachten," pp. 57, 97, and p. lii., notes), it had been celebrated as the winter solstice feast by the Jewish people before it became a historical festival associated with the great Maccabean victory. Regarding the historical data connected with the Ḥanukkah feast see MACCABEES; MACCABEES, BOOKS OF.

In the Synagogue.

In Pharisaic circles the political achievements of the Hasmoneans were pushed into the background, and the very name of Judas Maccabeus fell into oblivion. For some time Ps. xxx.—which, according to verse 1 (A. V. heading), was sung by the Levites in the Temple "at the dedication of the House" (of God), that is, Ḥanukkah—was also recited in the synagogue (Masseket Soferim xviii. 2; comp. Pesiḳ. R. 2). Later on only the HALLEL was recited, as on any other festival of thanksgiving; and in the "hoda'ah" (thanksgiving) benediction "Shemoneh 'Esreh" the liturgical formula "'Al ha-Nissim" was inserted, referring briefly to the victory achieved over the Syrians by the Hasmonean Mattathias and his sons. The erroneous designation of Mattathias as son of Johanan the high priest seems to rest upon the late Hebrew apocryphal "Megillat Antyokus" or "Megillat Ḥanukkah," which has other names and dates strangely mixed. The liturgical part inserted reads as follows:

"[We thank Thee] also for the miraculous deeds and for the redemption and for the mighty deeds and the saving acts wrought by Thee, as well as for the wars which Thou didst wage for our fathers in days of yore at this season.

"In the days of the Hasmonean Mattathias, son of Johanan the high priest, and his sons, when the iniquitous kingdom of Greece [Syria] rose up against Thy people Israel, to make them



Ḥanukkah Lamps.

1. Silver, modern (from the collection of the late Rabbi Benjamin Szold, Baltimore). 2. Bronze, Italian, 15th cent. (in the Victoria and Albert Museum, London). 3. Silver, English (?), 16th cent. (in the possession of E. A. Franklin, London). 4. Silver, Nuremberg, 17th cent. (in the possession of N. S. Joseph, London). 5. Silver, modern (in the possession of Maurice Herrmann, New York).

forget Thy Law and to turn them away from the ordinances of Thy will, then didst Thou in Thine abundant mercy rise up for them in the time of their trouble, plead their cause, execute their judgment, avenge their wrong, and deliver the strong into the hands of the weak, many into the hands of few, the impure into the hands of the pure, the wicked into the hands of the righteous, and insolent ones into the hands of such as are occupied with Thy Law. Both unto Thyself Thou didst make a great and holy name in Thy world, and unto Thy people didst Thou achieve a great deliverance and redemption as at this day. Whereupon Thy children entered the sanctuary of Thy house, cleansed Thy temple, purified Thy sanctuary, kindled lights in Thy holy courts, and appointed these eight days of Ḥanukkah in order to give thanks and praises unto Thy holy name."

Scriptural Readings.

The Pentateuch readings for the eight Ḥanukkah days are taken successively from Num. vii., the chapter relating to the gifts of the twelve princes of Israel on the occasion of the dedication of the altar of the tabernacle in the wilderness. On the eighth day the verses Num. vii. 54–viii. 4 are read, the last four verses referring to the kindling of the lights of the holy candlestick (Meg. iii. 6; Bab. 31a). The twenty-fifth of Kislew was taken by tradition to have been also the date of the dedication of the altar in the time of Moses (Pesiḳ. R. 6; Ex. R. lii.; Num. R. xiii. 4).

Chief importance is attached by rabbinical law to the kindling of the Ḥanukkah lamp, the sole object of which, however, was originally not the lighting of the house within, but the illumination of the house without, so that passers-by should see it. Accordingly lamps were set up near the door leading to the street; and when a house had doors on several sides, lamps were placed in front of each door. As many lights were kindled as there were persons in the house. Only when there was danger of persecution, as was the case in Persia under the rule of the fire-worshipers, were the lamps placed indoors. As the lights were intended only for illumination in honor of the feast, reading by them was prohibited (Shab. 21b–23a).

Kindling the Lights.

He who lights the Ḥanukkah lamp and those who see it kindled recite the benedictions, "Blessed be the Lord our God, King of the Universe, who hast sanctified us by Thy commandments and enjoined us to kindle the Ḥanukkah lamp," and "Blessed . . . who has done wondrous things to our fathers in days of yore at this season." See also SHE-ḤEḤEYANU (Shab. 23a; comp. Yer. Suk. iii. 53d, and "Tanya," xxxv.).

Women also are enjoined to kindle the Ḥanukkah lamp (Shab. 23a). In fact, Jewish legend loved to connect the heroic deed of Judith with the Maccabean story (see JUDITH).

The kindling of the Ḥanukkah lights is solemnized also by songs extolling God as Israel's Deliverer (see MA'OZ ẒUR). In view of the fact that work ought not to be done by the Ḥanukkah light—especially by women ("Tanya," *l.c.*; Ṭur Oraḥ Ḥayyim, 670)—games, riddles, and other pastimes were indulged in on Ḥanukkah evenings (Bodenschatz, "Kirchliche Verfassung der Juden," ii. 3, 4, 6; Berliner, "Aus dem Inneren Leben der Deutschen Juden im Mittelalter," 1900, p. 32; Brüll's "Jahrb." ix. 18; Abrahams, "Jewish Life in the Middle Ages," pp. 385, 396; Tendlau, "Sprüchwörter und Redensarten," 1866, p. 52).

Ḥanukkah is mentioned in John x. 22 as "the feast of the dedication."

HANUN (**חנון**): **1.** Son of Nahash, King of Ammon. Having dishonored David's messengers, Hanun involved the Ammonites in a war with David which proved disastrous to them (II Sam. x. 1–14). **2.** One who, with the people of Zanoah, repaired the valley gate in the wall of Jerusalem (Neh. iii. 13). **3.** The sixth son of Zalaph, who also assisted in the repairing of the wall (*ib.* iii. 30).

E. G. H. M. SEL.

HAPAX LEGOMENA.—Biblical Data: Words or forms of words that occur once only. There are about 1,500 of these in the Old Testament; but only 400 are, strictly, "hapax legomena"; *i.e.*, are either absolutely new coinages of roots, or can not be derived in their formation or in their specific meaning from other occurring stems. The remaining 1,100, while appearing once only as a form, can easily be connected with other existing words; as, for instance, אמץ (Job xvii. 9) and אמצה (Zech. xii. 5); הריסה (Amos ix. 11) and הריסות (Isa. xlix. 19); השמעות (Ezek. xxiv. 26); מעבד (Job xxxiv. 25); and מעמד (Ps. lxix. 3); these one would obviously refer to the verbs אמץ, הרם, שמע, etc., which are of frequent occurrence in the Bible.

Some of the hapax legomena are ordinary words, and their non-recurrence is merely an accident, there having been no need of using them again. In some portions they are due to the subject-matter being somewhat removed from the usual trend of thought in the Old Testament; as, for example, in the Book of Job, where the wealth of ideas is paralleled by a corresponding richness of language. Besides, in portions of the Bible composed in the north of Palestine many words may have been used which were not in vogue in the south. In passages dealing with technical or individual things, as, for instance, Lev. xi. and Deut. xiv. (lists of animals), or Ezek. xxvii. (enumeration of articles of merchandise), a comparatively large number of hapax legomena may be expected. Some are introduced for the sake of assonance (comp. I. M. Casanowicz, "Paronomasia in the Old Testament," p. 42), and a few are loan-words.

The following is an alphabetical list of the absolute or strict hapax legomena of each book. The verbal forms are quoted in the third person singular perfect of the conjugation or voice in which they occur:

GENESIS.

xli. 43 (an exclamation),	אברך	xv. 2, possession,	משק
xliii. 11, pistachio-nuts,	בטנים	xxviii. 12, ladder,	סלם
vi. 14, gopher-wood,	גפר	xli. 23, blasted,	צנם
xxi. 16, shoot,	טחה	xl. 11, press out,	שחט
xxxvi. 24, hot springs,	ימים	xxiv. 21, gaze, contemplate,	השתאה
xxv. 30, feed,	הלעיט	xlix. 17, species of serpent,	צפיפון
xlvii. 13, faint,	להה		
xxx. 37, almond,	לוז		
xlix. 3, sword,	מכרה		

EXODUS.

ix. 31, in bloom,	גבעל	xvi. 33, pot,	צנצנת
xxx. 34, galbanum,	חלבנה	xvi. 31, wafer,	צפיחית
xxi. 10, conjugal duty,	עונה	xxx. 34, onycha,	שחלת

HANUKKAH LAMPS.

1. Bronze, French, attributed to 12th cent. (in the Musée de Cluny, Paris). 2. Yellow copper, modern (in the synagogue at Pogrebishche, Russia). 3. Silver (?), medieval (in the possession of Dr. Albert Figdor, Vienna). 4. Yellow copper, modern (in the synagogue at Padua, Italy). 5. Silver and bronze, 17th cent. (in the possession of Jacob H. Schiff, New York).

LEVITICUS.

xi. 30, ferret,	אנקה	xi. 30, species of lizard,	לטאה
xxi. 20, testes,	אשך	xxvi. 16, pining,	מדיבות
xiii. 39, tetter,	בהק	i. 16, crop (of bird),	מראה
xxi. 20, crookbacked,	גבן	xi. 22, cricket,	סלעם
xi. 29, weasel,	חלד	iii. 9, spine,	עצה
xi. 30, species of lizard,	חמט	xi. 29, species of lizard,	צב
xi. 22, bald locust,	חרגל	xix. 28, cutting,	קעקע
xxii. 22, swelling,	יבלת	xiv. 37, hollows,	שקערורות
xi. 30, chameleon,	כח	xxi. 20, blemish,	תבלל
xi. 35, range (for pots),	כירים	vi. 14, (?)	תפינים

NUMBERS.

xi. 5, melons,	אבטחים	vi. 4, (?)	חרצנים
xxi. 15, slope,	אשד	xx. 24, path,	משעול
xi. 5, onions,	בצלים	xi. 5, cucumbers,	קשאים
vi. 4, (?)	זג	xi. 5, garlic,	שום

DEUTERONOMY.

xxiii. 14, shovel,	אזן	xxxii. 34, store up,	כמס
xiv. 5, wild goat,	אקו	xxxii. 15, be fat,	כשה
xxxiii. 25, security,	דבא	xxxii. 24, wasted,	מזה
xiv. 5, pygarg,	דישן	xvi. 10, measure,	מסה
i. 41, be light-hearted,	הון	xxvii. 9, keep silence,	הסכת
xxxiii. 22, leap forth,	זנק	xxxii. 26, scatter,	הפאה
xiv. 5, chamois,	זמר	xviii. 3, maw,	קבה
xxviii. 22, fiery heat,	חרחר	xxxii. 18, neglect,	שיה
xxv. 18, be in the rear,	נחשל	xxxiii. 3, (?)	תכה

JUDGES.

xvi. 16, press, urge,	אלץ	iii. 23, (?)	מסדרון
iii. 16, cubit,	גמד	iii. 22, (?)	פרשדון
v. 28, cry,	יבב	iv. 18, rug,	שמיכה

I SAMUEL.

ii. 33, grieve,	האדיב	xiii. 21, point,	קלשון
xix. 20, company,	להקה	v. 9, break out,	נשתר
xxi. 9, press, urge,	נחץ	xv. 33, tear in pieces,	שסף
xiii. 21, (?)	פצירה		

II SAMUEL.

xxi. 20, length,	מדון	xxi. 16, spear,	קין
xiii. 9, pan,	משרת	i. 9, giddiness,	שבץ
xxiii. 8, lance,	עצן	xvii. 29, kind of cheese,	שפה

I KINGS.

v. 3, (?)	ברברים	xx. 33, ascertain,	החליט
v. 23, rafts,	דברות	vii. 33, spokes,	חשקים

II KINGS.

vi. 25, dove's dung,	דביונים	x. 22, wardrobe,	מלתחה
iv. 35, sneeze,	זרר	iv. 42, sack,	צקלון
xxiii. 5, planets,	מזלות	vi. 25, a measure,	קב

ISAIAH.

ix. 17, roll upward,	התאבך	lvi. 10, bark,	נבח
xix. 10, grieved,	אגם	xxxiii. 1, accomplish,	הנלה
xiii. 21, screech-owl,	אח	xxx. 30, tempest,	נפץ
xli. 24, naught,	אפע	xlii. 14, gasp,	נשם
liv. 12, carbuncle,	אקדח	xxviii. 25, appointed,	נסמן
xiv. 15, larch,	ארן	li. 8, moth,	סס
lix. 10, magnates,	אשמנים	lv. 13, brier,	סרפד
xlvi. 8, show manliness,		lxiv. 5, uncleanliness,	עדים
firmness,	התאשש	l. 4, sustain,	עות
v. 6, waste, desolation,	בתה	v. 2, dig,	עזק
vii. 19, rugged height,	בתה	xi. 15, heat or might,	עים
xxvii. 9, chalkstone,	גיר	xxxii. 4, stammerer,	עלג
xvii. 6, berry,	גרגר	xlii. 22, ensnare,	הפח
xxx. 6, herd of camels,	דבשת	iii. 24, (?)	פתיגיל
xlvii. 13, astrologer,	הבר	xxxiii. 20, wander,	צען
lvi. 10, dream,	הזה	xxii. 24, offspring,	צפיעה
lxiv. 1, brushwood,	המסים	xxxiv. 15, arrow-snake,	קפוז
xviii. 5, sprig,	זלזל	xliv. 8, tremble,	רהה
i. 6, press out,	זרר	xl. 4, rugged country,	רכסים
xlviii. 9, restrain,	חטם	iii. 19, veil,	רעלה
i. 17, oppress,	חמץ	lvii. 20, mire,	רפש
xxx. 24, salted,	חמיץ	iii. 16, look wantonly,	שקר
iii. 16, mince one's steps,	טפף	xliv. 13, pencil,	שרד
xxxiii. 19, impudent,	נועז	xix. 9, combed (flax),	שריק
lxi. 10, clothe,	יעט	iii. 18, cauls,	שביסים
xxii. 18, ball,	כדור	xlvii. 2, train (of dress),	שבל
lxvi. 20, dromedaries,	כרכרות	xxxvi. 12, urine,	שינים
xxxiv. 14, (?)	לילית	liv. 8, overflowing,	שצף
i. 22, mix,	מהל	xviii. 5, cut off,	התז
xvii. 1, heap of ruins,	מעי	xliv. 14, holm-tree,	תרזה
xl. 15, drop,	מר		

JEREMIAH.

l. 15, bulwark,	אשיה	xv. 8, anguish,	עיר
xiv. 9, be astounded,	נדהם	xxix. 26, shackles,	צינק
xxxvi. 18, ink,	דיו	xlvi. 20, gadfly,	קרץ
xiii. 23, stripes,	חברברות	xlix. 24, terror,	רטט
xxxvii. 16, stores,	חניות	ii. 23, roam, traverse,	שרך
x. 7, appertain,	יאה	v. 8, roam,	השכים
li. 34, belly,	כרש	xlvii. 3, stamping (of	
x. 17, bundle,	כנעה	horse),	שעטה
li. 38, growl,	נער	xliii. 10, ornament,	שפריר
xlviii. 9, fly,	נצא	ii. 24, desire,	תאנה

EZEKIEL.

xxi. 20, (?)	(?) טבחה אבחה	xxi. 20, sharpened,	מעט
i. 14, lightning,	בזק	xvi. 4, cleansing,	משעי
xxvii. 24, (?)	ברומים	vii. 11, (?)	נה
xvi. 40, cut down,	בתק	ii. 6, brier,	סרב
v. 1, barber,	גלב	xlvii. 2, trickle,	פכה
xxvii. 11, (?)	(?) גמדים	xxvii. 17, (?)	פנג
iv. 9, millet,	דחן	iv. 15, dung,	צפיעים
xxvii. 15, ebony,	הבנים	xvii. 5, willow-tree,	צפצפה
xlii. 12, (?)	הגינה	xlvi. 22, join, bind,	קטר
xxiii. 24, kind of weapon,	הצן	xvii. 9, cut off,	קוסס
xiii. 10, wall,	חיץ	vii. 25, terror,	קפדה
xxvii. 20, cover,	חפש	xlvi. 14, sprinkle,	רסס
xxiii. 15, turbans,	טבולים	xli. 16, panel-work,	שחיף
xiii. 12, daubing,	טיח	xxxix. 2, lead on,	ששא
xiii. 10, lead astray,	הטעה	xlvii. 12, healing,	תרופה

HOSEA.

ii. 15, jewels,	חליה	xiii. 1, trembling,	רתת
iii. 2, measure,	לתך	viii. 6, splinters,	שבבים
xi. 9, wrath,	עיר	v. 2, (?)	שחטה
ix. 14, be dry, withered,	צמק	xiii. 5, drought,	תלאובת
xiii. 14, destruction,	קטב		

JOEL.

i. 17, shrivel,	עבש	ii. 20, stench,	צחנה
iv. 11, hasten,	עוש		

AMOS.

iii. 12, piece,	בדל	vii. 14, dress,	בלס

JONAH.

iv. 8, sultry,	חרישית	i. 5, ship,	ספינה

MICAH.

vi. 14, emptiness,	ישח	vii. 3, weave together,	עבת
iv. 7, cast off,	נהלאה	i. 13, bind,	רתם

NAHUM.

iii. 17, species of locust,	גוב	iii. 17, princes,	מנזרים
ii. 4, spear,	ברוש	ii. 4, something pertaining to war-chariots,	פלדות

HABAKKUK.

ii. 11, beam,	כפיס	iii. 14, (?)	פרזים
i. 9, (?)	מגמה	iii. 17, stalls,	רפתים

ZEPHANIAH.

ii. 9, possession,	ממשק	i. 11, laden,	נטילים

ZECHARIAH.

ii. 12, apple (of the eye),	בבה	iv. 12, spouts,	צנתרות
ix. 12, stronghold,	בצרון	xiv. 6, (?)	קפאון
		i. 8, sorrel,	שרקים

MALACHI.

iii. 21, tread down, עסס

PSALMS.

xxi. 3, desire,	ארשת	cxiv. 1, be an alien,	לעז
xxxi. 23, be cut off,	נגרז	cxliv. 13, garners,	מזוים
xlv. 9, cassia,	קציעות	cxix. 103, pleasant,	נמלץ
xciii. 3, noise,	דכי	lviii. 7, fangs,	מלתעות
l. 20, thrust,	דפי	xcix. 1, quake,	נוט
lxii. 4, set upon,	הותת	lxxii. 17, sprout,	נון
lxxii. 6, heavy drops,	זרזיף	lx. 9, storm,	סעה
lxxviii. 47, hailstones,	חנמל	cxl. 4, adder,	עכשוב
xviii. 46, come forth,	חרג	civ. 12, branches,	עפאים
lxviii. 32, magnates,	חשמנים	lxxxviii. 16, faint,	פון
cxix. 70, be covered up,		xlviii. 14, traverse,	פסג
stupid,	טפש	lxxii. 16, abundance,	פסה
cxix. 131, crave,	יאב	xii. 2, vanish,	פסס
lv. 23, burden,	יהב	lx. 4, break, split,	פצם
x. 10, helpless,	(חל כאים)	lxviii. 28, throng,	רגמה
lxxiv. 6, ax,	כילפות	xxxi. 21, conspiracy,	רכסים
lxiii. 2, long,	כמה	lxviii. 31, piece,	רץ
lxxx. 14, uproot, ravage,	כרסם	lxviii. 17, look askance,	רצד
lxxiv. 6, hatchet,	כשיל	lviii. 9, snail,	שבלול

Proverbs.

vii. 16, yarn,	אטון	iv. 24, sinfulness,	לזות
xxx. 31, (?)	אלקום	xxiii. 2, throat,	לע
xxv. 11, occasion,	אפנים	xxix. 21, scion,	מנון
x. 3, desire,	הוה	xxx. 15, (?)	עלוקה
xxi. 8, straight,	וזר	xxvii. 22, pestle,	עלי
xxx. 31, well girt, swift,	זרזיר	xvi. 30, compress,	עצה
vii. 16, stripe,	חטב	xxix. 21, spoil by indulgence,	פנק
xii. 27, urge,	חרך	xxiii. 2, knife,	שכין
xxxi. 19, distaff,	כישור	xxx. 28, kind of lizard,	שממית
xxi. 14, bend,	כפה	xxiii. 7, reckon, calculate,	שער
xxvi. 18, hurl about,	התלהלה		

Job.

ix. 26, cane,	אבה	xxxviii. 31, bands,	מעדנות
xxxiv. 36, O that,	אבי	xxxviii. 33, dominion,	משטר
xxxviii. 28, drop,	אגל	xxxviii. 10, spring,	נבך
xxv. 5, be bright,	האהיל	iii. 4, daylight,	נהרה
xxx. 24, prayer,	בעי (ב + עי ?)	xli. 12, nostrils,	נחירים
x. 10, cheese,	גבינה	xxx. 13, tear up,	נתס
xxi. 33, tomb,	גדיש	iv. 10, be torn out,	נתע
vii. 5, clod,	גוש	x. 22, order,	סדרים
xvi. 15, crust, skin,	גלד	vi. 10, jump up,	סלד
xli. 14, leap,	דוץ	xx. 22, plenty,	ספק
xl. 12, tear down,	הדך	xxx. 25, be bowed down,	עגם
xix. 3, be impudent,	הכר	xxi. 24, pail or trough,	עטין
xxxiii. 20, be loathsome,	זהם	xli. 10, sneezing,	עטישה
xxviii. 17, glass,	זכוכית	xxxix. 30, suck, sip,	עלע
xvii. 1, extinguish,	נזעך	xxxix. 5, wild ass,	ערוד
vi. 17, be burning,	זרב	xxxiii. 24, deliver,	פדע
xxxi. 33, bosom,	חב	xv. 27, fat,	פימה
xxix. 18, phenix,	חול	xxvi. 9, spread,	פרשז
vi. 6, white of an egg,	חלמות	xxxv. 15, arrogance,	פש
xxxiii. 9, clean,	חף	xviii. 2, chase,	קנצים
ix. 26, swoop,	טוש	xxvi. 11, sway, tremble,	רופף
xviii. 3, be foolish,	נטמה	xv. 12, wink,	רזם
xxi. 20, destruction,	כיד	xxxiii. 25, be green, fresh,	רטפש
xli. 11, spark,	כידוד	xl. 31, sharp weapon,	שכה
xv. 24, attack,	כידור	xxxviii. 36, (?)	שכוי
iii. 5, darkening,	כמרירים	xl. 16, muscles,	שרירים
xxxviii. 32, (?)	מזרות	iv. 18, error,	תהלה
xxxvii. 9, (?)	מזרים	xli. 21, club,	תותח
xl. 18, hammered stave,	מטיל	xvii. 6, spitting,	תפת
xxx. 4, sea-purslane,	מלוח		
xv. 29, possession,	מנלה		

Canticles.

vi. 11, walnut,	אגוז	vii. 3, roundness,	סהר
iii. 9, palanquin,	אפריון	vii. 9, branches of palm-tree,	סנסנים
vii. 10, glide down,	דבב	ii. 11, winter,	סתו
i. 10, strings,	חרוזים	i. 17, rafters,	רהיטים
ii. 9, lattice,	חרכים	iv. 4, (?)	תלפיות
v. 3, defile,	טנף	v. 11, (?)	תלתלים
iv. 14, saffron,	כרכם		

Ruth.

i. 13, seclude oneself,	נעגן	ii. 16, bundles,	צבתים
ii. 14, give,	צבט		

Lamentations.

iii. 16, cover over,	הכפיש	iii. 11, tear into pieces,	פשח
iv. 2, be weighed,	סלא	iv. 8, shrivel,	צפד
ii. 1, cloud,	עוב	i. 14, be bound,	נשקד
iii. 59, oppression,	עותה		

Ecclesiastes.

xii. 3, cease,	בטל	xii. 12, study,	להג
x. 8, ditch,	גומץ	viii. 1, interpretation,	פשר

Esther.

viii. 10, (?)	אחשתרנים	vii. 4, damage,	נזק
i. 8, compulsion,	אנס	i. 6, spotted marble,	סחרת
i. 6, mother-of-pearl,	דר	viii. 10, (?)	רמכים
i. 6, white cloth,	חור	viii. 15, robe,	תכריך
i. 6, cotton,	כרפס		

Daniel.

xi. 45, palace,	אפדן	xi. 43, treasures,	מכמנים
ix. 24, decreed,	נחתך	x. 21, inscribe,	רשם

Ezra.

i. 9, knife,	מחלף	iii. 7, permission,	רשיון

Nehemiah.

vii. 3, shut,	גוף	iii. 15, cover,	טלל

I Chronicles.

xv. 27, be clothed,	כרבל	xxix. 2, precious stone,	רקמה
xix. 4, nates,	מפשעה	xxix. 2, marble or alabaster,	שיש
xxix. 2, precious stone,	פוך		

II Chronicles.

xxxvi. 16, woke,	הלעיב	ii. 15, need,	צרך
iii. 15, capital (of column),	צפת	ii. 15, floats,	רפסדות

The following table gives the number of the absolute hapax legomena and the total number of unique forms, not including those of the Aramaic portions of the Old Testament:

Book.	Absolute Hapax Legomena.	Total.	Book.	Absolute Hapax Legomena.	Total.
Genesis	14	49	Habakkuk	4	12
Exodus	6	29	Zephaniah	2	6
Leviticus	20	51	Haggai	..	1
Numbers	8	21	Zechariah	5	19
Deuteronomy	20	48	Malachi	1	5
Joshua	..	6	Psalms	37	132
Judges	6	27	Proverbs	21	63
I Samuel	7	18	Job	60	145
II Samuel	6	17	Canticles	13	30
I Kings	4	26	Ruth	3	3
II Kings	6	27	Lamentations	7	26
Isaiah	60	201	Ecclesiastes	4	19
Jeremiah	19	75	Esther	9	14
Ezekiel	30	109	Daniel (Hebr. portion)	5	13
Hosea	9	21	Ezra (Hebr. portion)	2	6
Joel	3	8	Nehemiah	2	9
Amos	2	11	I Chronicles	5	11
Obadiah	..	4	II Chronicles	4	21
Jonah	2	3			
Micah	4	6			
Nahum	4	9			
			Totals	414	1,301

E. G. H. I. M. C.

——**In Rabbinical Literature:** A large number of the difficult words which are lexically treated in the Talmud and Midrash are hapax legomena. In the exegesis of the Talmud and Midrash, however, the hapax legomena are treated in no way differently from the other rare and difficult words which occur in the Scriptures, and a special term does not even exist for them. They by no means receive a consciously systematic treatment, though an examination of a number of examples reveals the use of various methods, which may be classified as follows:

Methods of Interpretation.

1. Traditional interpretation; that is, when the interpretation of a hapax legomenon is based on tradition. In this case the meaning is, of course, more easily preserved when the context justifies or indicates it. Palestinian tradition, *e.g.*, explained the hapax legomenon שמיכה (in Judges iv. 18) which, from the context, might mean either "cloth" or "vessel," to mean "cloth" ("sudra"), while that of Babylon regarded it as equivalent to "vessel" ("mesiklah"; Lev. R. xxiii. 10). Rabina, one of the last Babylonian amoraim, at the end of the fifth century, in discussing אחשתרנים (Esth. viii. 10), stated that at times tradition failed and the meaning of a hapax legomenon was avowedly lost (Meg. 18a).

2. Interpretation by means of a parallel passage in the Mishnah. Thus, for example, an amora of the fourth century, R. Ze'era, explains the hapax legomenon הלעיטני (Gen. xxv. 30) according to Shab. xxiv. 3 (מלעיטין אותו, "They stuff the camel with food"; Gen. R. lxiii. 12).

3. Interpretation by derivation from a foreign language. Thus Jose, a tanna of the middle of the second century, detected in the word אברך (Gen. xli. 43) a Hebrew form of the Greek 'Αλαβάρχης (see ABRECH); and Samuel, a Babylonian amora of the third century, explained דר in Esth. i. 6 as being identical with the precious stone called "darra" (Arabic "durra," pl. "durr" = "pearl"), found in the cities on the coast.

Midrashic Method.

4. Interpretation on the basis of etymological analogy, with a homiletic-midrashic exposition of the word. The derivation of words from biliteral roots was still a grammatical principle in the Talmudic period; שׂק, for example, is given as the stem of the hapax legomenon משק (Gen. xv. 2; see Gen. R. xliv. 9), consequently a haggadist of the third century connected משק with שקק (likewise from root שׂק), "to long for," and explained the expression "ben meshek beti" (Gen. xv. 2) according to this etymology. In these words, he said, Abraham meant to indicate Lot, who longed ("she-nafsho shokeket") to become his heir (Gen. R. xliv. 9). In like manner, R. Ishmael connects the hapax legomenon דר (Esth. i. 6) with דרור ("liberty"). Ahasuerus, he explains, granted to all traders "liberty," that is, the right to trade (Meg. 12a). Another example of this kind is furnished by the midrashic treatment of the hapax legomenon שפיפון (Gen. xlix. 17). The word שפי in the phrase הלך שפי (Num. xxiii. 3; generally translated "hill") having been interpreted by the Midrash to mean "lameness," שפיפון was considered as a form derived from it by reduplication, and, in the case of Samson, as denoting "lameness on both sides of the body." In these and similar cases it is not easy to decide whether etymology has produced the Midrash, or the Midrash has produced the etymologic comparison.

5. The interpretation of a hapax legomenon as a composite of, or contraction from, two words. The solution of a composite form into its component parts is held by Resh Lakish to be the *ultima ratio*; for, after reading through the whole Bible to explain the hapax legomenon שמיכה (Judges iv. 18) and finding no object with this name, he was compelled to explain it as a composite of שמי + כה (= "my name here," or "my name like this"). This, he says, may prove that the wicked Sisera did not touch Jael (Lev. R. *l.c.*). The hapax legomenon כרפס (Esth. i. 6) is explained as a composite of כר + פס (כרים של פסים = "curtains of colored stuffs"; see also the explanations of ABRECH).

Saadia's Treatise.

The method of explaining Biblical hapax legomena from parallels in the vocabulary of the Talmud was adopted by Saadia in a little Arabic composition, the only extant manuscript of which exists at Oxford (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1448, 2); it is entitled "Tafsir al-Sab'in Lafẓah al-Faradah." It was published four times in 1844: by L. Dukes, in "Zeitschrift für die Kunde des Morgenlandes," v. 115 *et seq.*, and in Ewald and Dukes, "Beiträge zur Gesch. der Aeltesten Auslegung und Spracherklärung des Alten Testamentes," ii. 110 *et seq.*; by A. Geiger, from a copy of Derenbourg, in his "Wiss. Zeit. Jüd. Theol." v. 317 *et seq.*; and by A. Jellinek, under the title "Pitron Tish'im Millot Bodedot," in Benjacob's "Sefer Debarim 'Attikim," i. Later it was published by Solomon Buber in "Bet Oẓar ha-Sifrut," i. 33 *et seq.*, Yaroslav, 1887. In this small work ninety, or, according to Dukes's and Steinschneider's reckoning, ninety-one difficult or rare words of the Bible, are treated; not all of them, however, are hapax legomena. It is curious that the Arabic title speaks of only seventy words; but Dukes and, after him, Bacher and Buber, explain this discrepancy by the fact that in early times "sab'in" (seventy) was incorrectly written for "tis'in" (ninety). However, as an old authority like Jepheth ben 'Ali cites the title "Sab'in," and as it is not even certain that the number ninety is accurate, and in view of the construction of the little work, Geiger suggested that it is not complete and independent, but merely a fragment of an anti-Karaite production, in which Saadia endeavored to convince the Karaites of the value of tradition from a linguistic standpoint. Therefore it must be supposed that this fragment of seventy words was later supplemented by others. This manuscript has no alphabetic nor other methodical arrangement; Steinschneider has endeavored to remedy this by supplying an index to the Biblical passages ("Cat. Bodl." col. 2197). The work is especially valuable as being the oldest example of Hebrew lexicography. In using the lexical material scattered through the Talmud and Midrash, in adducing parallels from rabbinical literature and sometimes from the Arabic, Saadia has contributed largely to an understanding of the hapax legomena. Saadia's method of treating these may best be seen from a few examples—No. 1: צרכך (II Chron. ii. 15), according to the Mishnah word צריך ("it is necessary"; "he must"); No. 15: חלמות (Job vi. 6), according to חלמון מבחוץ ('Ab. Zarah 40a, "If the yolk [of the egg] is outside"); No. 18: וכפים (Hab. ii. 11), from גזית, כפיסים, לבינים, בונין (B. B. 2a, "[Where it is customary to build] with hewn stone, with half bricks, with whole bricks," etc.); No. 75: נשקד (Lam. i. 14), from כלבא בשקדי (read בזקירא; B. Ḳ. 22a, "The dog [injured itself] in jumping").

Saadia's work is cited by such early writers as Dunash ben Labraṭ, Jepheth ben 'Ali, Jonah ibn Janaḥ, Jacob ben Reuben, etc., and was used by the Jewish lexicographers of the Middle Ages, sometimes with, and sometimes without, mention of the source (see Jellinek in "Orient, Lit." vii. 139).

Special investigations and monographs on hapax legomena are not found in the literature of the Middle Ages; but they have been included in the general field of lexicography, where they occupy no independent position (see LEXICOGRAPHY).

HAPHRAIM (**חפרים**): City of Issachar, between Shunem and Shihon (Josh. xix. 18, 19). In the "Onomastica Sacra," *s.v.* "Aphraim," it is spoken of as still known under the name of "Affarea," six miles from Legio (Lajjun), to the north. About that distance from Lajjun and two miles west of Sulam (the ancient Shunem) stands the village of Al-'Afulah, which may be the representative of Haphraim (Baedeker-Socin, "Palestine," 2d ed., p. 238). Haphraim is possibly identical with Aphærema mentioned in I Macc. xi. 34.

HAPPINESS (**אשרי, אשר**).—**Biblical Data:** Everywhere in the Old Testament the joyous and harmonious notes of life are accentuated. Life is synonymous with good and blessing. This predominant note of happiness was undoubtedly the outcome of faith and of a complete dependence upon and trust in God the Creator of all. Happiness is to be found in the personal relation between man and his Maker: the closer this relation, the greater the happiness. "Blessed is the nation whose God is Yhwh (Ps. xxxiii. 12a). "In thy presence is fulness of joy" (*ib.* xvi. 11b; comp. *ib.* iv. 6 *et seq.*).

Love of God and obedience to His Law are also conducive to happiness. "Hear therefore, O Israel, and observe to do it; that it may be well with thee, . . . and thou shalt love Yhwh thy God with all thy heart, and with all thy soul, and with all thy might" (Deut. vi. 3 *et seq.*). "Blessed is every one who feareth Yhwh; that walketh in his ways" (Ps. cxxviii. 1). "She [Wisdom] is a tree of life to them that lay hold upon her; and happy is every one that retaineth her" (Prov. iii. 18).

Trust and confidence in God lead also to happiness. "Whoso trusteth in Yhwh, happy is he" (Prov. xvi. 20). "O taste and see that Yhwh is good; blessed is the man that trusteth in him" (Ps. xxxiv. 8).

The joyous strain of existence bursts forth everywhere. The cult is also marked by a character of joy and cheer, for it signifies union between the Creator and His creation, man. "Hail Yhwh, thou whole earth, with rejoicings; Serve Yhwh with delight; come before him with songs of gladness. . . . Enter his gates with thanks, and his courts with rejoicing" (Ps. c. 1-4). "Rejoice in thy feast" (Deut. xvi. 14).

Nowhere does joy degenerate into frivolity or immorality. In his most joyful mood man's dependence upon Yhwh is never lost sight of. Nor does joy ever become wholly selfish; it is consecrated by making others participate in it. The commandment that enjoins the celebration of the Festival of Weeks closes with the injunction, "Thou shalt rejoice before Yhwh, thy God, thou and thy son, and thy daughter, and thy manservant, and thy maidservant, and the Levite, . . . and the stranger, and the fatherless, and the widow that are within thy gates" (Deut. xvi. 9-11; comp. *ib.* xiv. 26).

Asceticism is not only discouraged, but is looked upon as being sinful. Man should seek for joy in his daily work and rejoice while young. "Rejoice, O young man, in thy youth" (Eccl. xi. 9a). "Rejoice in all that ye put your hand unto" (Deut. xii. 7). "Go thy way, eat thy bread with joy" (Eccl. ix. 7a).

——**In Rabbinical Literature:** The joy of living, so clearly discernible through Biblical ages, is somewhat marred in rabbinical literature by changed political and religious conditions. The sad present contrasted with the past made the lot of the people seem hard and cruel. Besides the loss of political freedom, the disappointment of Messianic hopes made life dreary. Still, the optimistic view of life prevailed on the whole. Faith in God dissipated all despair and darkness and made life worth living. Thus one reads: "He who made the day will provide daily sustenance" (Mek., Beshallaḥ). "All that God has created is of use" (Shab. 77b). "He who still has some bread in his basket and asks, 'What shall I eat on the morrow?' has little faith" (Soṭah 48b). The discouragement of asceticism noticed in the Bible is evident in the following Talmudical sayings: "If thou hast the means to enjoy life, enjoy it" ('Er. 54a). "The whole world has been created that man may find pleasure" (Shab. 30b).

The many benedictions ordained by the Rabbis to be pronounced over whatever one enjoys in eating or drinking, or over some pleasing or remarkable sight, show their attitude toward the enjoyment of life. Marriage, which Christianity considered a concession to the flesh and as something to be discouraged, the Rabbis, equally with the Bible, considered to be man's duty. "It is a religious duty for man to marry" (Ḳid. 2b). "To be unmarried is to live without joy, without blessing, kindness, religion, or peace" (Yeb. 62a). [Quite characteristic are the following sayings of the Rabbis: "The Shekinah rests on man, not when he is troubled and grieved, but when he is filled with joy and enthusiasm over the performance of a good deed" (Shab. 30b). Accordingly, "men should put themselves into the attitude of prayer, not after grief, but after the experience of a holy joy over a good deed performed" (Ber. 31a). "Since the destruction of the Temple God Himself lacks complete happiness" ('Ab. Zarah 3b); therefore, "man should not open his mouth fully to laughter" (Ber. 31a). Nevertheless, legend tells of jesters who were deemed worthy of paradise because they cheered the cheerless (Ta'an. 22a; comp. Yer. Ta'an. i. 64b, the story of Pentakaka the Jester).—K.]

K. A. G.

HARA: District mentioned in I Chron. v. 26 as one of those to which Tiglath-pileser brought the Reubenites, Gadites, and the half tribe of Manasseh. Like the other places with which it is associated, Hara must have been situated in western Assyria. In the Septuagint the place is not mentioned, nor does it occur in the parallel passage, II Kings xviii. 11, which has the addition "and in the cities of the Medes." Though omitted by the Septuagint in I Chron. v. 26, there can be no doubt that "Hara" appeared in the original Hebrew, for Jerome transliterates it by "Ara."

E. G. H. B. P.

HARADAH (חרדה): One of the stations of the Israelites during their wanderings in the desert (Num. xxxiii. 24, 25).

E. G. H. M. SEL.

HARAN: **1.** Third son of Terah and consequently the youngest brother of Abraham; he was born in Ur of the Chaldees, where he died while his father was still living. He had three children, Lot and two daughters, Milcah and Iscah. Milcah became the wife of her uncle Nahor (Gen. xi. 27–29). Josephus mentions that Haran's monument was shown in his time; and that there was also a Haran, son of Nahor, Terah's father, begotten when Nahor was one hundred and twenty years old ("Ant." i. 6, § 5). According to the Rabbis, who interpreted "Ur" to mean "fire," Haran was thrown after Abraham into the furnace by Nimrod. Haran had no firm belief in God. He said to himself: "Should Abraham perish in the furnace, I will side with Nimrod; if he come out alive, I will be with Abraham." Therefore he perished in the flames (Gen. R. xxxviii.; Yalḳ., Gen. 62).

2. A Levite in the time of David; one of the family of Shimei (I Chron. xxiii. 9).

J. M. SEL.

HARAN (חרן = "road"; compare Assyrian "ḥarranu"): City to which Terah went from Ur of the Chaldees, and where Terah died (Gen. xi. 31, 32). It was situated in ARAM-NAHARAIM, generally translated "Mesopotamia" (Gen. xxiv. 10), and is definitely indicated as in Padan-aram (Gen. xxv. 20; xxviii. 2, 5–7). As Nahor was the only son of Terah who settled at Haran, it was called "the city of Nahor" (comp. Gen. xxiv. 10, xxvii. 43). Haran was the birthplace of Rebekah, and it was thither that Eliezer went to meet her (Gen. xxiv. 10). Thither, also, Jacob fled from before his brother Esau; there he married his uncle Laban's daughters, and there he acquired his great wealth (Gen. xxviii. 10, xxix.–xxxi. *passim*). Haran occurs again in the Bible in connection with a much later period. It is mentioned as being taken by the Assyrian kings (II Kings xix. 12), and as having had commercial intercourse with Tyre (Ezek. xxvii. 23). The statement of II Kings xix. 12 is confirmed by Assyrian inscriptions in which Haran is very frequently mentioned. The inscriptions also affirm that Assurbanipal (Sardanapalus) was crowned at Haran, and that Nabunaid restored the temple of Sin at Haran (Schrader, "K. B." i. 39, ii. 52, *et al.*). The general opinion is that the Biblical Haran is identical with the Carrhæ, in Mesopotamia, famous for the defeat of Crassus by the Parthians and known to the Arabs as "Ḥarran," the abode of the Sabeans. Joseph Halévy, however, concluded that Haran must be sought for in Syria and not in Mesopotamia. Halévy, translating "Ḥaran" as "hollow place," is inclined to identify it with a place named "Spelunca" by Ptolemy, not far from Damascus. The Arabian geographers certainly identify the Ḥarran of the Sabeans with the Biblical Haran. Yaḳut ("Mu'jam al-Buldan") says that according to some the city was built by Haran, the brother of Abraham, and that it was then called הרן, but that according to others Haran was the first city built after the Flood. Haran (Carrhæ) is in the territory of Muḍar, a day's journey southeast of Edessa.

HARARI, JUDAH (ARYEH): Liturgical poet; lived at Montpellier in the second half of the thirteenth century. He is highly praised by Abraham Bedersi in the poem entitled "Ḥereb ha-Mithappeket." Several of his piyyuṭim have been preserved in the ritual of Carpentras and in Maḥzor manuscripts. The surname "Harari" (of the mountain) was given in the Middle Ages to Jacob ben Makir ibn Tibbon, of Montpellier, to Aaron ben Abraham ben Jacob, of Marseilles, to Abraham ben Solomon, of Bagnoles, and later to several Jews of Italy and the East.

K. S. K.

HARARITE: Epithet applied to some of David's heroes. Owing to the discrepancy which exists generally between the books of Samuel and the Chronicles, it is uncertain whether the appellation refers to two or to three men. In II Sam. xxiii. 11, there is mentioned Shammah, son of Agee, a "Hararite" (הררי), and in verse 33 of the same chapter, "Shammah the Hararite" (ההררי); but in the corresponding list of I Chron. xi. the latter is called "Shammoth the Harorite" (ההרורי), and the former, "Jonathan the son of Shage the Hararite" (*ib.* xi. 34). This epithet is also applied to Ahiam "the son of Sharar the Hararite" (הארדי; II Sam. xxiii. 33), or "the son of Sacar the Hararite" (I Chron. xi. 35).

E. G. H. M. SEL.

HARBONA, HARBONAH (חרבונא, חרבונה): One of the seven eunuchs who served Ahasuerus and to whom the order was given to bring Queen Vashti before the king (Esth. i. 10). He suggested that Haman should be hanged on his own gallows (*ib.* vii. 9). According to R. Eleazar (Meg. 16a), Harbona had first been in league with Haman, but, seeing that his plot had failed, abandoned him. It is further said (Esther R. x.) that it was the prophet Elijah who appeared before Ahasuerus in the guise of Harbona, and that therefore Harbona should be remembered for good. A liturgical piece for Purim beginning "Shoshannat Ya'aḳob" ends with the words, "and let Harbona, too, be remembered for good."

E. G. H. M. SEL.

HARBURG: City on the Elbe, six miles south of Hamburg, in the Prussian province of Hanover. Jews were not admitted to Harburg until the seventeenth century, when Duke William August (1603–1642) established a mint there which he leased in 1621 to the Jews Benedictus Bock of Itzehoe and the brothers Meyer and Joseph Moyses of Altona. These three Jews with their families he took under his protection, allowing them not only to travel freely in his territory and to engage in trading, but also to settle in "Harborgk" (Harburg). The Harburg Jews remained under ducal jurisdiction and were not placed under municipal authority. Those Jews, also, who had business relations with the mint were granted safe-conducts. The duke issued to his Hebrew subjects patents freeing them from the poll-tax and state taxes. In March, 1622, the mint-farmers, who were in debt, fled from Harburg, whereupon the duke had them arrested at Altona; and before being set at liberty they were required to pay the costs of their confinement, and to swear that they would pay their debts and that they would never return. The same duke, on Nov. 22, 1621, had entered into a contract with Magnus Isaac of Wandsbeck and Marcus Jost of Harburg for minting at Moisburg, but they also soon became bankrupt and fled, leaving unpaid a debt of 1,400 thalers.

Jew Minters.

A privilege of Feb. 26, 1708, stated expressly that Jews would be tolerated in Harburg. A list dated Aug. 29, 1722, records 9 Jewish households aggregating 51 persons. In 1725 there was in Harburg a Jewish schoolmaster named Magnus Breslauer. In 1755 the city contained but 8 Hebrew families.

Edicts Against Jews.

In consequence of complaints made by the retail dealers against the Jews of Hamburg and those of Altona who came to Harburg with their wares, non-resident Jews were prohibited from trading in the city (July 28, 1719), and on Jan. 3, 1721, it was decreed that no Jew who had moved to Harburg should be allowed to employ help if he had grown sons "fit to engage in trade." A strict edict was also issued against peddling by Jews, which was followed (Aug. 18, 1731) by a renewal of a regulation of Jan. 5, 1708, forbidding Jews to acquire houses or other real estate. In 1764 Simon Behrens, who had lent the city the sum of 1,500 thalers with which to pay the indemnity demanded by the French troops in 1757, received permission to buy the house which he was occupying; but in 1773, when twenty-two houses were for sale, he was not allowed, although supported by the city council, to purchase a second one. In 1690 the princely government of Celle, with the acquiescence of the Harburg city council, assigned a burial-ground to the Jews of Harburg. On Aug. 10, 1776, the Hanoverian government, in response to a petition of Simon Behrens, granted permission for the establishment of a synagogue in a house which was to be bought by the Jews for the purpose. It was officially decreed on July 16, 1787, that every Jewish family enjoying, for a certain tax, the privilege of citizenship in Harburg, should in addition pay annually into the city treasury 1 thaler, 18 Marien-groschen, if it had a whole house to itself, or 18 groschen in case it occupied an apartment merely. This payment was in lieu of the surplice-fees ("loco jurium stolæ").

At the beginning of the nineteenth century there was a Portuguese Jew living in Harburg named Moses Levy Ximenes, alias Moses Ximenes Pereira. In 1851 the community consisted of 15 individuals. At present (1903) it numbers about 50 families, aggregating about 300 persons.

D. A. Lew.

HARBURGER, HEINRICH: German jurist; born at Bayreuth, Bavaria, Oct. 2, 1851. He received his education at the gymnasium of his native town and at the University of Munich, whence he was graduated as doctor of law. After being admitted to the bar he became, in 1878, privat-docent of the juridical faculty of his alma mater. In the following year he was appointed judge ("Amtsrichter") of one of the district courts in Munich, and in 1885 second attorney ("zweiter Staatsanwalt") of the Munich circuit court, where in 1890 he became one of the senior judges ("Landgerichtsrath"). In 1896 he was made honorary professor at Munich University. In 1897 he was transferred to the court of appeals at Munich as attorney ("Staatsanwalt"), and in 1899 was appointed one of the senior judges ("Oberlandgerichtsrath") at this court.

Harburger is one of the few jurists of Germany who are at the same time judges and university professors. He has also the distinction of being the first Jew in Germany to become attorney at a court of appeals. He is a contributor to the leading law journals and a member of the Institute of International Law. Among his works may be mentioned: "Die Renumeratorische Schenkung," Munich, 1875; "Der Strafrechtliche Begriff 'Inland' und Seine Beziehungen zu Völkerrecht und Staatsrecht," *ib.* 1882; "Strafrechtspracticum," *ib.* 1892.

S. F. T. H.

HARBY: American family; resident in the southern part of the United States.

Solomon Harby: First of the family in North America; son of Isaac Harby, lapidary to the emperor of Morocco. He settled at Charleston, S. C., where his son, Isaac Harby, was born.

Isaac Harby: Journalist; born 1788; died in New York 1828; studied law, but subsequently opened a school on Edisto Island, S. C. He afterward edited the "Quiver," the "Investigator" (later known as the "Southern Patriot"), the "City Gazette" (1822), and the "Charleston Mercury." He was also distinguished as an author and playwright. His first play, "The Gordian Knot," was written in 1807; it was followed by "Alexander Severus" and by "Alberti" (1819), his best-known play, at the first performance of which President Monroe was present. As a political writer he became widely known by his "Letters on the Presidency" (1824). Harby was the originator of the first Reform movement in the United States. In 1825 he, with others, founded the Reform Society of Israelites, the principal objects of which were abridgment of the liturgy and the introduction of English into the service. An account of his work in this connection may be found in the "North American Review," xxiii. Harby included among his friends Thomas Jefferson, Edward Livingston, and Sir Walter Scott. In 1828 he removed to New York, where he established a school and contributed to the "Evening Post." His remains are interred in the old cemetery on Eleventh street, New York.

Levi Myers Harby: Captain in the United States navy. Brother of Isaac Harby; born in Georgetown, S. C., 1793; died at Galveston, Texas, 1870. At nineteen he became a midshipman in the United States navy, and during the War of 1812 was taken prisoner by the British, and was confined in Dartmoor Prison until the close of the war. In 1823 he was sailing-master on the U. S. vessel "Beagle." He subsequently became a captain in the Revenue Marine Service, and also served under Commodore Porter in the antipiratical squadron. Captain Harby took part in the Texan war of independence, and served in the Mexican war, the Seminole war, and the Bolivian war of independence. His name is frequently given as "Captain Levi Charles Harby" or "Captain Charles Levi Harby." He served the United States government for half a century. At the outbreak of the Civil war he resigned his commission and joined the Southern cause as captain of artillery in the Confederate army. Subsequently he was put in command of the fleet at Sabine Pass. He distinguished himself in the defense of Galveston, and was in command of Galveston harbor at the close of the war.

Captain Harby married Leonora De Lyon of Savannah. His sons are H. J. and J. D. Harby.

Washington Harby: Brother of Isaac Harby; educator and author of several plays, one of which, "Nick of the Woods," became popular.

Henry J. Harby: Brother of Isaac Harby. He took an active part in the Nullification movement in South Carolina.

Caroline de Litchfield Harby: Sister of Isaac Harby; born about 1800; died 1876. She was a writer of verse, and was associated with Isaac Harby in his educational work in New York.

Samuel Harby: Physician; son of Isaac Harby. He settled in New Orleans, La., where he became editor of the "New Orleans Bee."

Leah Cohen Harby (Mrs.): Granddaughter of Isaac Harby; born at Charleston Sept. 7, 1849; known also as **Lee C. Harby.** She is a member of the New York, the Texas, and the South Carolina historical societies, and of many other learned associations, and has written on historical subjects. She has been an officer of Sorosis and of the Daughters of the American Revolution, and a director of the Daughters of the Confederacy and of the Memorial Association of Charleston. During the West-Indian Exposition in Charleston (1901) she was a member of the women's executive committee and one of the editors of the "Interlude," the women's paper issued during the exposition. Among her writings are: "The City of a Prince"; "Texan Types and Contrasts"; "Land of the Tejas"; "Earliest Texas"; "Judy Robinson—Milliner"; and a number of poems, short stories, and magazine articles. Mrs. Harby was the successful competitor for the prize offered for a "Flag Song" for the state of Texas.

A. L. Hü.

HARDEN, MAXIMILIAN: German author; born at Berlin Oct. 20, 1861. Educated in the German capital, where he still resides, he became well known through his political and social articles in the "Nation," "Frankfurter Zeitung," and especially in the "Gegenwart," written over the nom de plume of "Apostata"; they were collected and published under that name in Berlin in 1892. In the same year he founded the "Zukunft," one of the leading German journals, which he is still (1903) editing. He was recently arrested and imprisoned by the government under the charge of lese-majesty. Harden embraced Christianity when a mere boy. His original name was Witkowski (see his "Zukunft," Oct., 1903).

HARDT, HERMANN VON DER: German Protestant theologian and philologist; born at Melle, Westphalia, Nov. 15, 1660; died Feb. 28, 1746. He studied at Osnabrück, Jena, and Hamburg, and became professor of Oriental languages at the University of Helmstädt (1690). He was a prolific author. Among his works dealing with Hebrew literature are: "Dissertatio de Fructu, Quem ex Librorum Judaicorum Lectione Percipiunt Christiani" (Jena, 1683); "De Accentuatione Hebræorum" (Leipsic, 1692); "Programma Quo ad Philologicam Hoseæ et Commentatorum Rabbinicorum Publicam Enarrationem," etc. (Helmstädt, 1704); "Ænigmata Judæorum Religiosissima" (*ib.* 1705); "Programma in Aben Esram Publice Recensendum, Jeremia Recensito et Jobo Exspectato" (*ib.* 1712); "Programma in Rashium, Publice Recensendum" (*ib.* n.d.); "Hoseas Historiæ et Antiquitati Redditus" (*ib.* n.d.); "Versio Latina Tract. Mischnici Taanit" (*ib.* 1712); "Commentarius in Pirke Abot" (*ib.* 1728).

J. M. Sc.

HARE (ארנבת): Animal mentioned in Lev. xi. 6 and Deut. xiv. 7 among the unclean animals, "because he cheweth the cud, but divideth not the hoof." The idea that the hare chews the cud probably arose from the constant moving of its jaws and lips. With the Arabs the flesh of the hare is considered a delicacy. There are at present five species of hare in Palestine, of which the *Lepus syriacus* and the *Lepus ægyptiacus* are the most common. The rabbit (*Lepus cuniculus*) is not found in Syria. The Talmud speaks of the hare as a ruminant (Ḥul.

59a). The fur of the hare, termed "wool" ("ẓemer"), was used in weaving (Men. 39b).

HARFIDIL: Name of a Gothic Jew occurring in a Hebrew epitaph found near Parthenit. Chwolson places the inscription in the fifth century; and the change from the Wulfianic name "Harjafrithila" ("th" as in Eng. "this") to "Harfidil" ("fidil" from "frithila") he attributes to the local Jewish jargon, just as in another epitaph of that class "Benike" is given for "Berenike" (with omission of "r").

ḤARIF MOSES PHINEHAS BEN ISRAEL: Polish rabbi and author; died in Lemberg 1722. He was the grandson of Moses Ḥarif the Elder and the father of Israel and Hirsch Ḥarif, the latter of whom became rabbi of Yaborow, Galicia. In 1684 he occupied the position of rabbi at Lemberg, where he remained till his death. He was one of the most influential members of the Council of Four Lands. His approbations, dated at the meeting of the council at Yaroslav in 1685, are found in the "Naḥalat Azriel" (1687), in the "Toledot Yiẓḥaḳ," and in the collection of responsa entitled "Bet Ya'aḳob" (1693). As author he is known by his responsa relating to the spelling of the names in documents of divorce, and by additions to the list of names in the book written on that subject by Solomon Luria. He is frequently mentioned in "Ṭib Giṭṭin" by Solomon Margolioth, in "'Emeḳ Halakah we-Ta'am Man" (p. 10b) by Menahem Mannele, and in R. Alexander's "Beḥor Shor," p. 65.

Bibliography: Buber, *Anshe Shem*, pp. 160–162.

ḤARIF, ẒEBI HIRSCH. See Courland.

HARIPH (חריף): The children of Hariph, to the number of one hundred and twelve, returned from captivity with Zerubbabel (Neh. vii. 24). Hariph was one of the chiefs who sealed the covenant with Nehemiah (*ib.* x. 20). In the parallel list of Ezra (ii. 18) this name is replaced by "Jorah." The ethnical form of "Hariph" is "Hariphite" (החריפי; according to the "ketib" החרופי; I Chron. xii. 5). Akin to "Hariph" is "Hareph" (*ib.* ii. 51).

E. G. H. M. Sel.

ḤARITH IBN 'AMR: Yemenite king who embraced Judaism; born about 260; ascended the throne about 320; died about 330. Nothing is known of this king's history, as he is mentioned only by Abu al-Fida ("Historia Anteislamica," ed. Fleischer, p. 118), and by Aḥmad Dimishḳi in his "Sharḥ 'Utba al-Yamani." He was the great-grandson of Abu Karib, who is known as the first Yemenite king who embraced Judaism. According to the list of the Yemenite kings given by Abu al-Fida, Ḥarith was the thirty-seventh king from Ḳaḥṭan, the Arabic Yoktan, founder of the dynasty; but Caussin de Perceval makes him the forty-sixth. He is not to be confounded with Ḥarith ibn 'Amr, the Kindite prince (as is done by Grätz, "Gesch." 3d ed., v. 77, 368), who lived two centuries later.

Bibliography; Pococke, *Specimen Historiæ Arabum*, p. 427; Caussin de Perceval, *Essai sur l'Histoire des Arabes*, i. 111, and table i.

G. M. Sel.

ḤARIZI, JUDAH B. SOLOMON. See Al-Ḥarizi, Judah b. Solomon.

HARKAVY: Russo-Jewish family. It originated, according to a tradition current in the family, with Mordecai Jaffe, author of the "Lebushim." The immediate ancestor was Joseph of Turetz (d. 1778), Turetz being a town near Nowogrudok, in the province of Minsk. The first member of the family to assume the name "Harkavy" was Gershon of Nowogrudok (d. 1824), son of Joseph of Turetz.

Abraham Harkavy: Son of Jacob Harkavy. See Harkavy, Albert. A. Ha.

Alexander Harkavy: Russian-American writer and linguist; born at Nowogrudok, Minsk government, May 5, 1863. Alexander was educated privately, and at an early age evinced a predilection for philology. In 1879 he went to Wilna, where he worked in the printing-office of the Romm Bros. In 1882 he went to America, in 1885 to Paris; he subsequently returned to America, and settled in New York, where he now (1903) resides.

It is partly due to Harkavy that Yiddish is now recognized as a language. His Yiddish dictionaries show that its vocabulary is as ample as that of the average modern language, and that, if lacking in technical terms, it is richer in idiomatic and characteristic expressions.

Alexander Harkavy's most important works are: "Complete English-Jewish Dictionary" (1891); "Dictionary of the Yiddish Language: Yiddish-English" (1898); pocket editions of English-Yiddish and Yiddish-English dictionaries; "Amerikanischer Briefsteller" (English and Judæo-German, 1899); "Ollendorf's Method of English: in Yiddish" (1893); "Uchebnik Angliskavo Yazyka" (1892); "Torat Leshon Anglit," an English grammar in Hebrew (1894); "Ha-Yesh Mishpaṭ Lashon li-Sefat Yehudit?" (1896), in which he shows that Yiddish has the essential elements and forms of a living language; "Don Kichot," a Judæo-German translation (1897–98).

Bibliography: E. Harkavy, *Dor Yesharim*, New York, 1902; Eisenstadt, *Ḥakme Yisrael be-Amerika*, p. 33; *Ha-Leom* (Harkavy's autobiography), vol. ii., New York, 1903.

J. D. E.

Alexander Süsskind Harkavy: Scholar and merchant; third son of Gershon Harkavy; born 1785; died 1841. In 1827 he became rabbi of Nowogrudok, which office he retained until his death.

Deborah Romm: Daughter of Joseph Bezaleel Harkavy, and head of the Hebrew publishing firm of Widow & Brothers Romm, of Wilna.

Elhanan Harkavy: Eldest son of Gershon Harkavy; died at Jerusalem in 1838. He devoted his life to study, and in his later years settled in Jerusalem. On the tombstone over his grave, on the Mount of Olives, he is designated as "Elhanan Ashkenazi."

Elhanan Harkavy: Brother of Alexander Harkavy; born at Nowogrudok; author of "Dor Yesharim."

Elijah Harkavy: Scholar and merchant; died 1827; second son of Gershon Harkavy.

Gershon Harkavy: Talmudist; son of Moses Solomon Harkavy; born 1823; died 1875.

Gershon Harkavy: Son of Joseph of Turetz. He was a disciple of Elijah of Wilna. In his declining years he settled in Safed, Palestine, where he founded a Talmudical academy, and maintained it by the proceeds of vineyards bought for the purpose. He had four sons, Elhanan, Elijah, Alexander Süsskind, and Moses Solomon.

Jacob Harkavy: Son of Elhanan Harkavy; born 1799; died 1894. He was at the head of a Talmudical academy at Jerusalem for forty-three years.

Jacob Harkavy: Son of Gershon Harkavy; author of a brochure in Russian on Jewish education (Wilna, 1902).

Joseph Bezaleel Harkavy: Talmudist; son of Elhanan Harkavy; died 1873. He was the son-in-law of Rabbi Samuel Strashun of Wilna.

Joseph Moses Harkavy: Talmudist; son of Rabbi Alexander Süsskind; born 1812; died 1881.

Moses Solomon Harkavy: Merchant and philanthropist; fourth son of Gershon Harkavy; born at Nowogrudok 1805; died 1872.

Vladimir (Wolf) Harkavy: Jurist at Moscow; son of Joseph Bezaleel Harkavy.

BIBLIOGRAPHY: E. Harkavy, *Dor Yesharim*, New York, 1903.

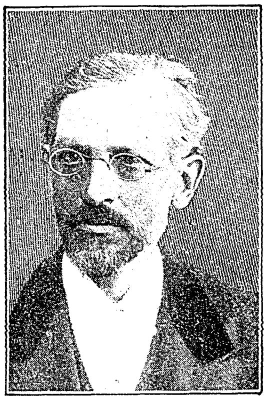
HARKAVY, ALBERT (ABRAHAM YAKOVLEVICH): Russian Orientalist and historian; born at Novogrudok, government of Minsk, Oct. 27, 1839. His father, Jacob Harkavy, was a wealthy merchant and a prominent Talmudic scholar, connected by descent with the Jaffe family. At the age of fifteen Harkavy was sent to the yeshibah of Volozhin; and on the completion of his course there he took up secular studies, including German and French.



Albert Harkavy.

In 1858 he entered the rabbinical school of Wilna; in 1863 the University of St. Petersburg, where he studied Oriental languages, and from which he graduated with the degree of master of history (1868), his graduating thesis being "Skazaniya Mussulmanskikh Pisatelei o Slavyanakh i Russkikh" (St. Petersburg, 1870). This work presents a collection of narratives by Mohammedan writers upon the Slavs and Russians. Harkavy was then sent abroad by the university to qualify for the chair of Semitic history; he continued his studies at Berlin under Rödiger and Dümichen, and in Paris under Oppert (1868–70); but in consequence of a misunderstanding with one of the faculty his appointment was not approved. In 1872 Harkavy graduated as doctor of history, his thesis being "O Pervonachalnom Obitalishchye Semitov," etc., a study of the origins of the Semites, Aryans, and Hamites (*ib.* 1872). In the previous year he had published "Ob Istoricheskom Znachenii," etc., an essay on the importance of the Moabite inscription. After graduation he was attached to the Ministry of Public Instruction.

This date marks the beginning of his work on the Hebrew and Arabic manuscripts in the Imperial Public Library of St. Petersburg, where he devoted himself particularly to the critical examination of the Firkovich manuscripts. In 1877 Harkavy received the appointment of librarian, which office he still (1903) occupies. Since 1873 he has been repeatedly sent abroad in the interest of historical and archeological research—to examine Biblical manuscripts (1873), as delegate to the congress of Orientalists (1877), to examine Palestinian and other Oriental monuments (1886). For his achievements in historical research the orders of Saint Stanislas (3d and 2d degrees) and Saint Anne have been conferred upon him by the Russian government, and he has also been raised to the rank of councilor of state. The labors of Harkavy have continued unremittingly for a period of more than forty years, and have opened up the field of early Russo-Jewish history. He has made accessible extensive collections hitherto but little known, and has thereby shed new light on obscure periods in Russian as well as Russo-Jewish history. His methods are best illustrated by his treatises on the Jewish history of southern Russia, the Caucasus, the Crimea, Chazaria, and ancient Kiev. Not a little of his time has been devoted to investigations in the history of the Polish-Lithuanian Jews and of the Karaites, and he deserves great credit for his exposure of Firkovich's falsifications.

Apart from his work as a historian, he has rendered important services to the Jews of Russia by participation in their communal life. Beginning in 1864, Harkavy acted for a number of years as secretary of the Society for the Promotion of Culture Among the Jews of Russia, and since 1873 he has been one of the directors of the Jewish community of St. Petersburg.

Works.

Among his numerous works in Russian, Hebrew, German, and French, there should be mentioned his "Ha-Yehudim u-Sefat ha-Slawim," studies in the early history of the Jews of Russia, first published in Russian by the Imperial Russian Archeological Society under the title "Ob Yazykye Yevreyev," etc. (St. Petersburg, 1865). Harkavy's aim here was to prove that the first Jews who settled in South Russia did not come from Germany, as was supposed by Grätz and other historians, but from Greece through the Black Sea region and the Crimea, and from the Orient by way of the Caucasus. He furthermore showed that Slavonic was the language spoken by the Jews in the Slavonic countries until the arrival of German Jews in great numbers during the Crusades. He proved that the Jewish writers in Russia and other Slavonic countries used Slavonic words and phrases in their Biblical and Talmudic commentaries. The Slavonic names among the Slavonic Jews, the Slavonic inscriptions in Hebrew characters on Polish coins, the tradition among the Russian Jews that their ancestors spoke Slavonic, and the testimony of early writers, are effectively cited by him in support of his contention.

Besides this work he has published:

Skazaniya Yevreiskikh Pisatelei, o Chazarskom Tzarstvye. St. Petersburg, 1874.

Chazarskiya Pisma (in "Yevreiskaya Biblioteka," 1881-82).

Rus i Russkiye v Srednevyekovoi Yevreiskoi Literaturye (in "Voskhod," 1881-82).

Istoricheski Ocherk Sinoda Chetyriokh Stran (in "Voskhod," 1884).

Les Mots Egyptiens de la Bible (reprint from "Journal Asiatique," Paris, 1870).

Zikkaron la-Rishonim we-gam la-Aḥaronim. Studien und Mittheilungen aus der St. Petersburg Kaiserlichen Bibliothek. 5 vols. St. Petersburg, 1879-82. Contains biographies and works of Samuel ha-Nagid, Samuel ben Hophni, Saadia Gaon, Hai Gaon, and other geonim, from manuscripts in the St. Petersburg library, annotated by Harkavy.

Neuaufgefundene Hebräische Bibelhandschriften (paper read before the Imperial Academy of Sciences of St. Petersburg, April, 1884: published in "Zapiski . . . Akademii," series vii., vol. 32, No. 8).

O Yazykye Yevreyev Zhivshikh v Drevneye Vremya na Russi. St. Petersburg, 1886.

Notes to the Russian translation of Grätz's "Geschichte." 2 vols., 1889-1902.

Notes to the Russian translation of Karpeles' "History of Jewish Literature." St. Petersburg, 1889-90.

Notes and additions to P. Rabinovich's Hebrew transl. of Grätz's "Geschichte," vols. iii.-viii. Warsaw. 1893-99.

Harkavy has contributed many valuable articles on the early history of the Jews in Russia to: "Measef Niddaḥim" (supplement to "Ha-Meliẓ," parts i. and ii.); "Ha-Karmel," 1862 *et seq.*; "Monatsschrift," 1883 *et seq.*; "Russko-Yevreiski Arkhiv," 1883; Brüll's "Jahrbücher," 1876; "Voskhod," 1881-84; "Ben 'Ammi," part i., St. Petersburg, 1887; "Ḥadashim gam Yeshanim," in "Ha-Miẓpah," vol. i.; "Ha-Asif," vol. i.; "Keneset Yisrael," i. and iii.; "Ha-Karmel" (Russian), 1865, etc. He has also written many articles on other subjects in Hebrew and Oriental literature in Steinschneider's "Hebr. Bibl."; Berliner's "Magazin"; "Z. D. M. G."; "Yevreiskoye Obozreniye"; "Russki Yevrei"; "Golos"; "Journal Asiatique"; "Revue Critique"; "R. E. J."; the publications of the Russian Imperial Academy of Sciences and of the Russian Imperial Archeological Society; the Journal of the Ministry of Public Instruction; etc.

Harkavy is a member of the Russian Imperial Archeological Society; the Russian Imperial Geographical Society; the St. Petersburg Philological Society; the Moscow Society for the Promotion of Natural Sciences, Anthropology, and Ethnography; the Odessa Society of History and Antiquities; the Société Asiatique of Paris; the Société des Etudes Juives; the Deutsche Morgenländische Gesellschaft; and the Madrid Academy of Sciences (corresponding member). The medal of Isabella the Catholic was conferred upon him by the Spanish government in 1889. He was also the first Jew and the first Russian to be made a corresponding member of the learned Oriental Society Sullogos of Constantinople. On Feb. 18, 1902, Harkavy's friends celebrated the fortieth anniversary of his literary and historical activity, his first article having appeared Feb. 18, 1861, in the earliest Russo-Jewish organ, "Razsvyet."

HARLAND, HENRY (pseudonym, **Sydney Luska**): American author; born at St. Petersburg March, 1861; educated at the College of the City of New York and at Harvard. From 1883 to 1886 he was in the office of the surrogate of New York, after which he removed to London and became editor of the "Yellow Book," to which many well-known authors contributed. He is the author of the following novels dealing with Jewish subjects: "Mrs. Peixada"; "As It Was Written"; and "The Yoke of the Thorah" (1900).

BIBLIOGRAPHY: *Who's Who in America.*

A.

HARLOT. See PROSTITUTION.

HARO: City in La Rioja, in the diocese of Calahorra, Spain. In the fifteenth century it contained a Jewish community, the members of which were engaged in agricultural, commercial, and industrial pursuits, particularly in tanning, and lived in the De la Mota quarter. The Jews as well as the Moors of Haro were forbidden to sell or to exchange real estate owned by Christians. When, owing to oppressive war-taxes, the population of Haro became impoverished and was forced to dispose of its real estate, the city council, by a decree issued Sept. 8, 1453, forbade Christians to sell or to pledge their houses, gardens, or vineyards to Jews, whether native or foreign. In cases where this decree was violated the sale was declared void, and both buyer and seller, if they had given or received anything as a pledge, were sentenced to pay a fine of 2,000 maravedis each. In 1474 the Jews of Haro and of Peñacerrada â Laja paid 2,500 maravedis in taxes. Before the expulsion of 1492 Jews owned fifty-five houses in Haro.

HAROD: Name of a well beside which Gideon and his army encamped on the morning of the day which ended in the rout of the Midianites (Judges vii. 1), and where the test of the people by their mode of drinking apparently took place (*ib.* 4-8). Harod was situated south of the Hill of Moreh (the present Jabal Dahi), where the Midianites were encamped in the valley of Jezreel. It is now called 'Ain Jalud.

E. G. H. B. P.

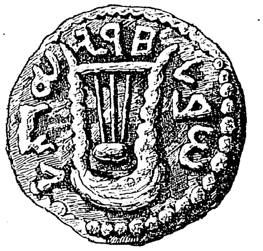
HAROSHETH (HAROSHETH OF THE GENTILES): City supposed to have stood near Hazor, in the northern part of Canaan, afterward known as Upper Galilee, or Galilee of the Gentiles. It was so called on account of the cosmopolitan character of its inhabitants. Harosheth was the home of Sisera, general of the armies of Jabin, King of Canaan, whose seat was Hazor (Judges iv. 2). Here Sisera mobilized the forces (verse 13) that were defeated in the ensuing battle on the banks of the Kishon. Barak and his victorious troops followed the defeated army to Harosheth; "and there was not a man left" (verse 16).

E. G. H. B. P.

HARP AND LYRE: The ancient Hebrews had two stringed instruments, the "kinnor" (כנור) and the "nebel" (נבל). In the English versions of the Old Testament the former word is wrongly translated "harp." In both instruments the strings were set in vibration by the fingers, or perhaps by a little stick, the plectrum (as Josephus says). Bow instruments were unknown to the ancients. The strings were made of gut, metal strings not being used in olden times. The body of the instrument was generally made of cypress (II Sam. vi. 5) or, in very precious instruments, of sandalwood (I Kings x. 11; A. V. "almug").

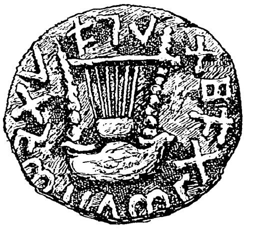
When Used.

The kinnor and nebel are often mentioned together. As in the case of all instrumental music among the Hebrews, they were used principally as an accompaniment to the voice (see Music). Instruments were used on joyous occasions, such as banquets and festive processions (Gen. xxxi. 27; I Sam. x. 5; II Sam. vi. 5; Isa. v. 12), and especially in the Temple service (Ps. xxxiii. 2, xliii. 4; Neh. xii. 27; I Chron. xvi. 5); here also in accompaniment to songs of praise and thanksgiving (I Chron. xvi. 16; II Chron. v. 12; Ps. xxxiii. 2; lvii. 9, lxxi. 22). They were never used on occasions of mourning (Isa. xxiv. 8; Ezek. xxvi. 13; Lam. v. 14; Ps. cxxxvii. 2; Job xxx. 31). The more popular of the two instruments was the kinnor, which is much more frequently mentioned in the Old Testament than the nebel. Its invention is ascribed to Jubal (Gen. iv. 21). It was used on family occasions and at popular festivals (Gen. xxxi. 27; Job xxi. 12), and was played upon both by the noble and by the lowly. David, the shepherd-boy, was a noted player (I Sam. xvi. 16). The nebel, on the other hand, seems to have been reserved exclusively for religious occasions (Amos v. 23; Ps. cxliv. 9). In connection with secular events (Amos vi. 5; Isa. xiv. 11), its use appears to have been regarded as unseemly and profane. Regarding the form of the two instruments, it is evident from the Old Testament that they could be played while the performer was walking (I Sam. x. 5; II Sam. vi. 5; Isa. xxiii. 16); hence they must have been easy to carry.



Coin of Bar Kokba Bearing Lyre with Three Strings.

(After Madden.)



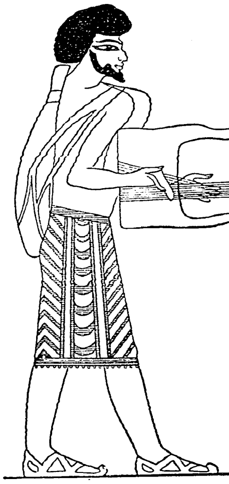
Coin of Simon Nasi Bearing Lyre with Six Strings.

(After Madden.)

From the name "nebel" it has been inferred that the shape of this instrument, or of its sounding-board, was similar to that of the bulging vessel of the same name in which wine was kept, or that the sounding-board was made of some animal membrane (נבל = "skin"). This, however, is a very questionable explanation.

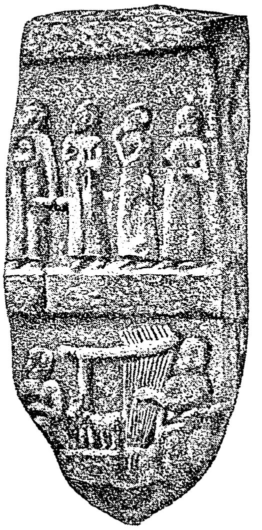
Similarity to Greek Instruments.

Reliance must therefore be placed upon tradition and the analogies furnished by the ancient Greek, Egyptian, and Babylonian instruments. The translation of "kinnor" by *κιθάρα* presupposes a similarity between the Hebrew and the Greek instruments, a supposition that is confirmed by the illustrations of the kinnor found on Jewish coins (see illustration), which is very similar to both the Greek lyre and cithara. If these had been foreign instruments derived from the Greeks, they would not have been represented as emblems on coins. On the other hand, the Hebrew cithara, the kinnor, is not found in its original form, but in the modified form it assumed under Greek influence. The earliest shape of this instrument, which readily explains that on the coins intended as ornaments, is perhaps represented on an Egyptian tomb at Beni Hassan (see illustration). Here the instrument consists of a long, rectangular board, the upper half of which is cut out so as to form a kind of frame; and above this opening the strings, running parallel to one another, are strung lengthwise across the board. The player holds the instrument in a horizontal position against his chest, and touches the strings with his left hand, while his right holds a little stick serving as a plectrum. The illustration furthermore shows that the instrument did not originate in Egypt, but with the Asiatic Semites; for it is carried by Asiatic Bedouins praying for admission into Egypt. The instrument was subsequently introduced into Egypt, where it was modified in form.



Bedouin Playing a Harp.

(After an Egyptian painting in the tombs of the Beni Hassan.)



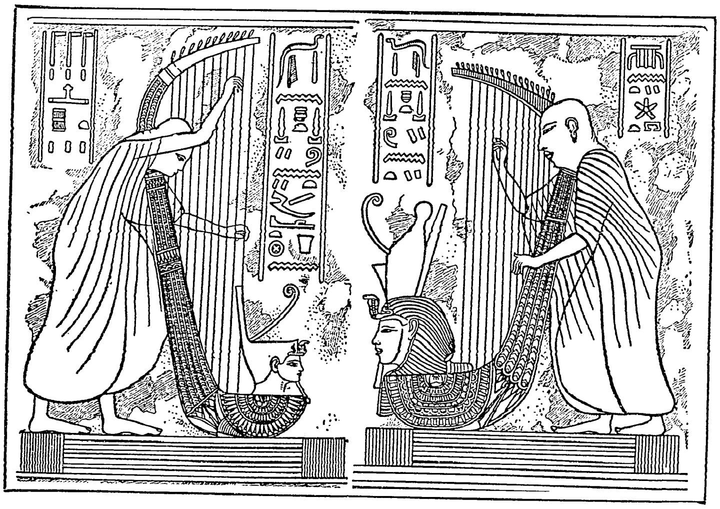
Harper; on a Babylonian Bas-Relief, About 3000 B.C.

(After Ball, "Light from the East.")

The same instrument is again found in its primitive form on an Assyrian relief, here also played by Semitic prisoners, from the western districts. The representations on Jewish coins, mentioned above, appear in comparison with these primitive forms as further developments under the influence of Greek taste. In one of the instruments there is under the strings a curious sounding-board like a kettle-drum; such a sounding-board is mentioned by the Church Fathers in describing the instrument. As it appears from the foregoing that the instrument was widely used among the Semites, and as the Biblical references, as well as those found in Josephus, seem to apply best to the cithara, it may be assumed that this instrument corresponds to the kinnor. The number of strings evidently varied. In the old Egyptian illustration there are eight strings; the later Egyptian cithara has from three to nine strings; the instruments on the coins have from three to six strings; and Josephus says that the cithara had ten and the nebel twelve strings.

The Nebel.

Regarding the nebel there are different views, of which the principal two may be mentioned here. According to one opinion the nebel was identical with the harp. Among the ancient Egyptians there is found, in addition to the large, upright harp, a small portable instrument of that class, which, like the nebel of the Old Testament, the harpist could play while walking. This harp consists of a wide, flat board, with another board fastened at right angles at one end. Across this frame are stretched strings decreasing in length from the center to the sides. A somewhat different Assyrian harp is pictured in a Kuyunjik relief, where a band of musicians going to meet the victorious Assurbanipal is represented. An illustration of a Babylonian harp is again somewhat different, showing but five strings. Although Josephus mentions twelve strings, it must be remembered that the instrument underwent various changes of form in the course of time.



Egyptian Harpers.
(From a wall-painting in the tomb of Rameses III.)

According to another view the nebel is to be compared with the "sanṭir" (still used among the Arabs), perhaps in view of the Septuagint rendering of the word by "psalterion" (= פסנטר; Dan. iii. 5). The sanṭir consists of a longish, shallow box across which the strings are fixed, the player holding it on his lap. The earliest form of the instrument is found, together with the harp, in the above-mentioned illustration from Kuyunjik. The strings here are strung parallel across the box; the player holds the plectrum in his right hand; it is not clear whether he touches the strings with his left hand also. It is said in reference to the last-named instrument that the name "nebel" would apply very well to it, whether one imagines a bulging sounding-board or one made of an animal membrane. The words "pi ha-nebel" (Amos vi. 5) would in this case refer to the opening in the sounding-board. But, as stated above, this interpretation is very questionable. Jerome's statement that the nebel had the delta form (Δ) argues in favor of a harp-like instrument, as does also the statement of Josephus ("Ant." vii. 12, § 3) that the nebel was played with the fingers, which seems hardly possible in the case of the cymbals.

Finally, there is the tradition that the nebel, unlike the kinnor, was an instrument that stood upright.

HARRIS, SIR AUGUSTUS GLOSSOP: English actor, playwright, and theatrical manager; born in Paris 1852; died at Folkestone, England, June 22, 1896. Harris made possible the renascence in London of grand opera, which had lapsed for want of support. Educated in Paris and Hanover, he forsook a mercantile life to appear (Dec., 1873) at the Theater Royal, Manchester, as *Malcolm* in "Macbeth." Subsequently he supported Barry Sullivan, and then became stage-manager for Colonel Mapleson at Covent Garden.

In 1879 he became manager of Drury Lane Theater—previously a graveyard for theatrical fortunes—where his shrewd management and improved methods of staging laid the foundation of his success. Plays written by Harris, some in collaboration with Petit and Hamilton, were: "The World" (his first production), "Youth," "Human Nature," "A Run of Luck," "The Spanish Armada," "A Million of Money," "The Prodigal Daughter," "A Life of Pleasure," and "The Derby Winner." The last-named was produced in the United States under the title "The Sporting Duchess."

Harris gave his first season of grand opera at Drury Lane in 1887, and so successful was it that he engaged Covent Garden Theater for the following year. The greatest musical artists in the world came under his management. A feature of Harris' Drury Lane management was the elaborate scale on which he produced the Christmas pantomime each year.

Despite his arduous and incessant labors, Harris found time to devote to politics, and became a member of the London County Council, representing the Strand division. He was appointed sheriff in 1891 and deputy lieutenant of the city of London. It was at this time that Harris was knighted.

In 1894 Harris went to the United States, where he and Augustin Daly produced "Hänsel und Gretel." On his return to London the strain of work broke down his health, and he died shortly afterward.

HARRIS, DAVID: English soldier and mine-director; born in London 1852. He arrived at the Kimberley diamond fields about 1873, and in dealing in diamonds and claims met with great prosperity. While engaging in business he became an ardent soldier. In 1878 he fought under Sir Charles Warren as an officer in the Diamond Fields Horse throughout the Kaffir war and the Griqualand West rebellion, and was mentioned in despatches for gallantry in the field. In 1896 he successfully led 600 of the Kimberley Rifles against a savage native force at Poquana, a place about 80 miles from Kimberley.

Harris was for some time parnas of the Kimberley synagogue. On the death of Barney Barnato (his first cousin) in 1897, Harris was elected unopposed as member for Kimberley in the Cape Assembly.

Although Colonel Harris had retired from the service, at the outbreak of war with the Boers in 1899 he assisted in the defense of Kimberley in conjunction with the imperial forces, being at the head of 2,000 men until the town was relieved by General French. He is now (1903) the representative of the firm of Barnato Brothers in Kimberley.

HARRIS, MARK: English surveyor and soldier; born March 15, 1869; killed in action in Bechuanaland April 6, 1897. He was a son of Ephraim Harris, head master of the Jews' School at Manchester, where he was educated; afterward he was articled to an architect and surveyor. Later on he went to South Africa, and at Port Elizabeth acted as borough surveyor. He joined the Prince Albert's Guards, and, working his way up from the ranks, obtained his commission as lieutenant. Harris was next engaged in mapping out Pondoland. In 1896 he was employed in the public works department at Port Elizabeth. He then exchanged for the Duke of Edinburgh's Own Volunteer Rifles with his former rank. On Feb. 24, 1897, this column, about 1,000 strong, started for Bechuanaland. A battle was fought on March 15 at Kuruman, and desultory fighting continued till April 6, when a second engagement with Galishwe took place at Mamssepe, which was captured with the loss of Harris.

HARRIS, MAURICE HENRY: American rabbi; born Nov. 9, 1859, in London, England; educated in London and at Columbia College, New York city, graduating in 1887 (M.A., Ph.D.), and at the Emanu-El Theological Seminary of New York city.

In 1883 Harris was elected rabbi of Temple Israel of Harlem, New York, a position he still holds (1904). He is vice-president of the Society for the Aid of Jewish Prisoners, second vice-president of the New York Board of Jewish Ministers, and a director of the Jewish Protectory.

Among his works are the following: "The People of the Book: a Biblical History" (3 vols.); "Selected Addresses" (3 vols.); two Chautauqua syllabi of Jewish history and literature from the Cabala to Mendelssohn. Harris has also contributed to the "Jewish Quarterly Review" and to the "North American Review."

HARROW. See AGRICULTURE.

HARRWITZ, DANIEL: German chess master; born 1823 in Breslau, Silesia; died Jan. 9, 1884, at Botzen, Tyrol; received most of his chess-training from Anderssen. Harrwitz lived for some time in France, and at intervals in England. His chess career may be said to have begun in Paris in 1845. In the following year he lost a match with Staunton at the odds of a pawn and two moves, but won another at pawn at move. He then defeated Horwitz and Löwenthal in England and De Rivière in Paris. In 1858 he lost a match with Morphy by 2 games to 5; but before the match he won an additional game, thus gaining the rare distinction of winning three games from that distinguished player. In 1862, owing to ill health, Harrwitz was compelled to relinquish active participation in the game. As a giver of odds, he was perhaps the most successful of all chess-players.

In 1853–54 Harrwitz published "The British Chess Review." He was also the author of "Lehrbuch des Schachspiels," Berlin, 1862.

HARSELANI, ABRAHAM AL-: Karaite scholar; flourished in Babylonia in the tenth century. He is cited in Al-Hiti's chronicle as having disputed with the rabbinical authorities of his time. He is also quoted by Mordecai ben Nissim in the "Dod Mordekai" (p. 11b) as a Karaite authority. None of Harselani's works is extant.

HARSITH: One of the gates of Jerusalem, mentioned in Jer. xix. 2 (R. V.); it led into the Valley of Hinnom. The meaning of the name can not be ascertained. The Authorized Version gives "east gate," evidently connecting it with "ḥeres" (the sun).

E. G. H. B. P.

HART (Hebr. "ayyal," the female or hind: also "ayyalah" and "ayyelet"): One of the clean animals enumerated in Deut. xiv. 5 (comp. xii. 15, 22; xv. 22), and among those provided for the table of Solomon (I Kings v. 3 [A. V. iv. 23]). It is certain that one of the *Cervidæ* is intended by "ayyal," but the particular species common in Palestine in Biblical times can not now be determined; the fallow deer (*Cervus dama*) is still met, though rarely, in the neighborhood of Sidon. The Septuagint renders "ayyal" by ἔλαφος, which would suggest the *Cervus elaphus*. Some also (comp. Winer, "B. R." *s.v.* "Hirsch") regard "yaḥmur," mentioned with "ayyal" (A. V. "fallow deer"; R. V. "roebuck"), as a species of hart, perhaps the *Cervus platyceros*, smaller than the common hart and surpassing it in swiftness. The swiftness and gentleness characteristic of the hart render it an image of agility as well as of feminine grace and tenderness (Gen. xlix. 21; II Sam. xxii. 34; Ps. xviii. 33; Isa. xxxv. 6; Hab. iii. 19; Prov. v. 19; Cant. ii. 17, viii. 14). Its maternal affection is alluded to in Jer. xiv. 8; its timidity in Job xxxix. 1; Ps. xxix. 9; its eager panting for water in Ps. xlii. 1. These frequent references to the qualities and habits of the hart, the localities deriving their names from it (Josh. x. 12, xxi. 24; Judges xii. 12), and the fact that it was used for food, show that it was at one time quite common in Palestine.

In the Talmud "ayyal" ("ayyalah," "ayyalta") and "ẓebi" are used as generic names for the whole deer family. The hart is caught with nets; its skin is used to make parchment (Ket. 103b); its flesh tastes like that of the heifer (Bek. 29b). The male has branched antlers (Ḥul. 59b), adding every year one tine (Yoma 29a); and the frequent shedding of the antlers gave rise to the proverbial expression, "He placed his money upon the horn of a hart," that is, he lost it in a bad enterprise (Ket. 107b). On the difficulties which the female experiences in copulation and in the bearing of young see 'Er. 54b; Bek. 7b; B. B. 16b; Yoma 29a (comp. Aristotle, "On Generation of Animals," v. 2, 3, and Pliny, "Historia Naturalis," x. 63, 83); and on the generation of the "yaḥmurta" (female of the "yaḥmur") see Bek. 7b. The hart is the swiftest of all animals (Ket. 112a), and it is therefore used as an example of alertness in doing the "will of the Father in heaven" (Ab. v. 20). For a hart to cross one's path was considered a bad omen (Sanh. 65a).

E. G. H. I. M. C.

HART: Several families of this name, of Anglo-Jewish origin, settled early in the English possessions in America, including Canada.

Isaac Hart: One of the earliest Jewish residents of Newport, R. I. He settled there as early as 1750, and soon became known as a successful merchant. On June 13, 1756, he was one of several who purchased the land for the first synagogue of Newport. During the War of Independence Isaac Hart favored the British cause, and it is related that he met his death in 1780 by being "inhumanely fired upon and bayoneted" by the American soldiers ("Rivington's Gazette," Dec. 2, 1780). In New York a **Moses Hart** acquired burgher rights as early as June 22, 1713 or 1714; a **Solomon Hart, Jr.,** took the oath of allegiance under the Act of 1740.

Ephraim Hart: Merchant; born in Fürth, Bavaria, in 1747; died in New York July 16, 1825. The original name of his family was "Hirz." It is not known in what year he came to America, but in 1782 he was residing as a merchant in Philadelphia, and in that year he joined the Mickvé Israel congregation. He married in 1783 Frances Noah, a sister of Manuel Noah. Later he removed to New York and engaged in the commission and brokerage business. On April 2, 1787, he was registered as an elector of the Shearith Israel congregation. By 1792 he had become one of the most successful merchants in the city, and at this time he helped to organize the Board of Stock-Brokers, now known as the "New York Stock Exchange." His name occurs in 1799 in a "list of owners of houses and lots valued at £2,000 or more." He was one of the founders, in 1802, of the Ḥebra Ḥesed Veemet, a charitable organization connected with the Shearith Israel congregation. He was a state senator in 1810, and it is said that at the time of his death he was a partner of John Jacob Astor.

Joel Hart: Physician; the only son of the foregoing; born in Philadelphia in 1784; died in New York June 14, 1842. He received the degree of M.D. from the Royal College of Physicians and Surgeons, London. He was one of the charter members of the Medical Society of the County of New York. He married, May 2, 1810, in London, Louisa Levien, and had issue. On Feb. 7, 1817, he was appointed by President Madison United States consul at Leith, Scotland, and remained there in that capacity until 1832, when he returned to New York and resumed the practise of medicine. He was well known in masonic circles in New York city.

Myer Hart: First merchant of Easton, Pa.; his original name was "Myer Hart de Shira." He went to America at an early age, and at once engaged in trade. He is classed among the founders of Easton (1750), and was the first shopkeeper there; his name occurs in a list (1752) of the eleven original families of Easton. From the tax-lists of Northampton county it is evident that he was one of its richest merchants. On April 3, 1764, Myer Hart took the oath of allegiance to the colonial government. During the Revolutionary war he was the agent at Easton of David Franks, for the "care of Prisoners in the British Service"; on March 19, 1778, he refuted a charge of cruelty and insult to the prisoners. In August, 1779, he petitioned the "Supreme Executive Council" in regard to the removal of a tenant. About 1782 he must have removed to Philadelphia, for in that year his name occurs among the original members of the Mickvé Israel congregation; in 1785 it occurs in the first Philadelphia directory. In September, 1786, owing to failure in business his estate was sold by the sheriff. The exact date of his death is unknown, although it has been stated that he lived to near the close of the century. He married a daughter of Abraham and Esther de Leon, and had issue.

Michael Hart: Another early resident of Easton; not related to the foregoing; born in 1738; died March 23, 1813. He removed to Pennsylvania early in life, soon becoming one of the wealthiest residents of Easton, according to the assessments on his property. He was (1782) one of the original members of the Mickvé Israel congregation, Philadelphia. He was a member of the first fire-company of Easton. His first wife, Leah, died July 4, 1786, aged 32; his second wife, Esther, was a daughter of the Rev. Jacob Raphael Cohen. One of the children by the second marriage was **Louisa B. Hart,** well known in the Jewish community of Philadelphia.

Abraham Hart: American publisher; born in Philadelphia, Pa., Dec. 15, 1810; died at Long Branch, N. J., July 22, 1885. At an early age he secured a position in the firm of Carey & Lea, publishers, and continued in their employ until 1829, when he engaged in business with Edward L. Carey under the firm name of Carey & Hart. Many famous books were issued by them. Among the productions of their press were Griswold's "Poets and Poetry of America" (1842), and Longfellow's "Poets and Poetry of Europe" and his "Poems" (1845). They were the first to collect and publish separately the fugitive pieces of Macaulay, Jeffrey, and other well-known English essayists. The most celebrated book issued by Carey & Hart was the now very rare "Yellowplush Correspondence" (1838), the first book of Thackeray's ever published, preceding by several years the first English edition of any of his works. In 1845 Carey withdrew from the firm, and Henry Carey Baird was associated with Abraham Hart under the name of Hart & Baird. Four years later Baird withdrew, and Hart continued the publishing business until 1854, when he retired. The firm had become one of the best-known publishing-houses in America.

Abraham Hart was greatly interested in the Jewish charitable and educational societies of Philadelphia. He was president of the board of managers of the Jewish Foster Home, the (first) Jewish Publication Society, the board of trustees of Maimonides College, and the Mickvé Israel congregation. He was for many years treasurer of the Hebrew Education Society (1848-75), and was interested in the establishment of the Jewish Hospital and the Young Men's Hebrew Association.

Bernard Hart: Merchant; born in England in 1764; died in New York in 1855. He went to Canada in 1777, and removed to New York in 1780, where he engaged in business, keeping up the trade connections he had formed in Canada. During the yellow-fever epidemic of 1795 he was unceasing in his devotion to the afflicted. In 1797 Hart was quartermaster of a brigade of state militia, of which James M. Hughes was brigadier-general. He married in 1806 Rebecca (b. 1783; died 1868), daughter of Benjamin Mendez Seixas, and by her had several children, one of whom was Emanuel HART.

In 1802 he had associated himself with Leonard Lispenard under the firm name of Lispenard & Hart, and conducted a general commission business. Hart withdrew from the firm in 1813, and then continued in business alone. In 1831 he succeeded Jacob Isaacs as secretary of the New York Stock Exchange, and continued in office until 1853. Hart was interested in the formation of some of the earliest social organizations of New York city, and his name frequently occurs in the records of the Congregation Shearith Israel.

Charles Henry Hart: Son of Samuel Hart; born in Philadelphia Feb. 4, 1847; graduated from the University of Pennsylvania in 1869 (A.M., LL.B.); admitted to the bar Nov. 14, 1868. On Feb. 17, 1894, Hart met with a severe railroad accident, in consequence of which he gave up the practise of law. He then devoted himself to the study of the history of American art. He has been a director of the Pennsylvania Academy of the Fine Arts, and was appointed chairman of the committee on retrospective American art at the World's Columbian Exposition, Chicago, 1893. He is a member of many learned societies, and has been corresponding secretary of the Numismatic and Antiquarian Society. Hart is a recognized authority on early American painters and engravers, and is a constant contributor to the magazines on this subject. He has published: "Historical Sketch of National Medals," New York, 1866; "Turner, the Dream Painter," New York, 1879; "Memoir of William Hickling Prescott," 1868; "Bibliographia Lincolniana," Albany, 1870; "Browere's Life Masks of Great Americans," New York, 1899; "Gilbert Stuart's Portraits of Women," New York, 1902; "Hints on Portraits and How to Catalogue Them," Philadelphia; etc.

A. A. S. W. R.

John Isaac Hart: American dental surgeon; born in New York city Aug. 7, 1865; son of Benjamin I. Hart and grandson of John I. Hart. He was educated at the Columbia Grammar School (New York city) and at the New York College of Dentistry, graduating as doctor of dental surgery in 1886, in which year he began to practise. In 1895 he became professor of operative dentistry, dental pathology, and therapeutics at the New York Dental School, which position he still occupies (1903).

Hart has filled several important positions: in 1899 he was vice-president of the National Dental Association; in 1902 vice-president of the Odontological Society of New York; in 1900-02 president of the New York State Dental Society. He also takes an active interest in communal affairs.

Hart has contributed several essays to the dental journals, among them being "Minute Structure of Dentine," in "Dental Cosmos," 1891, and "The Care of the Teeth from the Second to the Twelfth Year," in "Information," 1900.

A. F. T. H.

The following were among the representatives of the family in Canada:

Aaron Hart: Founder of the Hart family in Canada; born in London, England, in 1724; died at Three Rivers, province of Quebec, Canada, in 1800. He crossed the Atlantic with Sir Frederick Haldimand when that general went to take part in the war in which England wrested Canada from the grasp of France. After being a short time in New York, Hart was appointed commissary officer in Amherst's army, and he was one of those who rode with the staff of that general when he entered Montreal in 1760. Subsequently he was attached to Haldimand's command at Three Rivers. At the close of the war he took up his residence at the latter place, where he entered into extensive mercantile operations and acquired large estates. He became seignior of Becancourt and of Ste. Marguerite and owner of the Fief Marquisat Dusable. At his residence in Three Rivers he received a visit from

Edward, Duke of Kent, the father of Queen Victoria. He assisted in repelling Montgomery's invasion in the winter of 1775, and took an active part in the military operations of that period. He married Dorothea Judah, whose brother, Uriah Judah, was prothonotary of Three Rivers.

Aaron Hart left four sons, **Moses, Ezekiel, Benjamin,** and **Alexander**, and four daughters: **Catharine** married Dr. Bernard Samuel Judah of New York, whose son, Samuel Judah, became attorney-general of Indiana; **Charlotte** married Moses David of Montreal; **Elizabeth** remained unmarried; **Sarah** married Samuel David of Montreal. **Moses Hart,** the eldest son of Aaron Hart, received the seigniory of Ste. Marguerite and the Fief Marquisat Dusable from his father, and became also seignior of Courval. His descendants are still prominent in Jewish communal affairs in Montreal, notably **Dr. David A. Hart,** born at Three Rivers in 1844, and **Lewis A. Hart**, born at Three Rivers in 1847. The latter was president of the Spanish and Portuguese congregation of Montreal in 1891. He was for some years lecturer on notarial practise at McGill University, and was the author of "On Christian Attempts to Convert Jews" and "Some Questions Answered," two ably written works of a controversial character.

Ezekiel Hart: Second son of Aaron Hart; born at Three Rivers in 1767; died in 1843. He succeeded his father as seignior of Becancourt. He was the first Jew elected to the Canadian Parliament, and distinguished himself by the leading part he took in the struggle of 1807-09 to obtain full civil rights for his coreligionists in Canada (see Canada). During the War of 1812-14 he served with distinction as an officer of militia. He was survived by seven children, one of whom, **Samuel Becancourt Hart,** took a leading part in securing the passage of the Act of William IV. which conceded political equality to the Jews in Canada. **Aaron E. Hart** and **Adolphus M. Hart,** also sons of Ezekiel Hart, were prominent members of the legal profession. Adolphus M. Hart was the author of a history of the Mississippi Valley. He married Constance, a daughter of Benjamin Hart, and one of their sons, **Gerald E. Hart,** of Montreal, was the author of "The Fall of New France," recognized as one of the best works on one of the most important epochs in Canadian history.

Benjamin Hart: Third son of Aaron Hart; born in 1779 at Montreal; died in 1855. He resided with his parents at Three Rivers, removing some years after his father's death to Montreal. He took a leading part in Jewish communal work in the latter city during the earlier half of the last century (see Canada). He was also identified with many Montreal non-sectarian institutions, and was one of the founders of the Montreal General Hospital. He married Harriot Judith Hart, a daughter of Ephraim Hart of New York, who was one of the founders of the New York Stock Exchange. He left numerous offspring.

Aaron Philip Hart, eldest son of Benjamin Hart, was distinguished as a learned member of the Montreal bar. He actively engaged in political life, and during the rebellion of 1837-38 raised a company of loyalist militia. Other members of the family were active in helping to preserve peace in the district of Three Rivers. **Wellington Hart,** the second son of Benjamin Hart, died in Montreal in 1891. He resided for a time in the United States, where he became colonel of a Michigan regiment. He was later attached to the War Department at Washington. Returning afterward to Canada, he became manager of the Metropolitan Bank at Coaticook. **Frederick Hart,** third son of Benjamin Hart, was adjutant-general of Louisiana.

A. C. I. de S.

HART, AARON (known also as **Uri Phoebus**): First chief rabbi of the Ashkenazic Jews in England; born at Breslau in 1670; died in the year 1756. After studying at a yeshibah in Poland, he married the daughter of R. Samuel ben Phoebus of Fürth, author of a commentary on Eben ha-'Ezer. It was probably through the influence of his wealthy brother, Moses Hart, founder of the Great Synagogue, Duke's place, London, that he was appointed rabbi of the first Ashkenazic synagogue in that city. This was opened in Broad street, Miter square, in 1692.

Hart published in 1707 a small work entitled "Urim we-Tummim," which is of interest as being the first Hebrew book printed in London.

HART, EMANUEL B.: American congressman; born in New York Oct. 29, 1809; died Aug. 29, 1897. When twenty years old he joined the volunteer fire department of New York, as a member of engine company No. 9, and continued in active service five years. Hart was a Jackson Democrat, and one of the challengers at the polls in the exciting election of 1832. In 1845 he was elected alderman of the fifth ward, and was reelected the following year, but refused a third nomination. Subsequently he was appointed a delegate to the Democratic state convention, and as a member of Tammany Hall was elected chairman of the Tammany general committee in 1849. In 1851 Hart was elected to Congress by a heavy majority. Under President Buchanan's administration he was appointed surveyor of the port of New York, and on the expiration of his term served for a year in the same office at President Lincoln's request.

Hart was sent to Europe by the United States Treasury in 1860 for the purpose of investigating frauds in the revenue. To his report a number of important reforms have been attributed. In 1867 he was offered the nomination of the sixth congressional district of New York, but refused; in 1868 he was a presidential elector. Hart was made a commissioner of emigration in 1869, and two years later was elected member of the board of aldermen. He served as excise commissioner under Mayor Cooper in 1879, and on the election of President Cleveland was appointed disbursing agent at the custom-house, New York. Later Gen. Daniel E. Sickles, then sheriff, appointed him cashier of his office. For years Hart held the presidency of the Mount Sinai Hospital, and the office of treasurer to the Hebrew Relief Society, as well as the presidency of the Home for the Aged and Infirm.

A. F. H. V.

HART, ERNEST ABRAHAM: English physician and editor; born in London 1836; died there Jan. 7, 1898. He was educated at the City of London School and Queen's College, Cambridge. Choosing medicine as a profession, he was entered at St. George's Hospital, where he had a distinguished career as a student. In 1856 he became a member of the Royal College of Surgeons of England. He took up as a specialty diseases of the eye, and acquired an extensive consulting practise in London.

In 1858 Hart began to publish editorial articles in the "Lancet," and two years later he was appointed coeditor of that journal. In 1866 he became editor of the "British Medical Journal," the organ of the British Medical Association, and the subsequent growth of that association and of the "Journal" was largely due to his labors. His next appointment was as surgeon to the West London Hospital; and while attached there he devised a method of treating a special form of aneurism, which proved of great service. In 1864 he was appointed ophthalmic surgeon to St. Mary's Hospital, and a few years later became aural surgeon and dean of the medical school attached to the hospital. During this period he contributed various practical papers to the transactions of the Royal Medical and Chirurgical Society and to the reports of the Moorfields Ophthalmic Hospital.

Dr. Hart, in his public capacity, originated many beneficent schemes for the alleviation of public evils which his position as chairman of the Parliamentary Bills Committee of the British Medical Association, to which he was elected in 1871, enabled him to carry through. He caused the appointment of a commission to inquire into the state of the London workhouse infirmaries, which led to the establishment of the Metropolitan Asylums Board; and he embarked on a campaign against baby-farming, which resulted in the Infant Life Protection Act. Hart was chairman of the National Health Society, and was an active member of the executive committee of the International Health Exhibition of 1885. The record of his public work covers nearly the whole field of sanitary legislation in England during the thirty years which preceded his death.

Under the title of "The Eternal Gullible," Hart published a series of articles exposing the shams of hypnotism, mesmerism, etc.; and at the time of his death he was engaged in editing "Masters of Medicine," a series of lives of eminent medical men. He also contributed to the "Nineteenth Century," the "Century," and the "Forum."

Hart took great pride in his race, and when quite young wrote articles in "Frazer's Magazine," strenuously urging the emancipation of the Jews. In 1877 he published "The Mosaic Code," an exposition of Pentateuchal sanitation.

In 1893 the University of Durham conferred on him the degree of D.C.L., "honoris causa."

J. G. L.

HART, HENRY JOHN: Australian magistrate; born in New York May 7, 1820; died 1884. Educated at Columbia College, New York, he was destined for the legal profession; but, evincing a distaste for the law, he left New York and went to Sydney in 1839. In 1841 he took up his abode in Melbourne, and for some years engaged in commercial pursuits. He took a prominent part in the search for gold-fields in Victoria. In 1854 he was appointed a commissioner of the supreme court. In January, 1855, he left Victoria for Europe, but returned to the colony in 1857 and was gazetted a territorial magistrate. Afterward he was thrice elected by the citizens of Melbourne auditor of that city.

Through Hart's exertions a grant of land was obtained for a synagogue. Hart was honorary secretary of the East Melbourne congregation and its president for six years. He was for upward of twenty years on the board of management of the Melbourne Hospital, the Lying-in Hospital, and the Sick Children's Hospital, and was vice-president of the Eye and Ear Hospital.

In 1866 Hart was acting consul of the United States of America, and later was appointed vice-consul of Italy. He was also one of the royal commissioners of the International Exhibition at Melbourne in 1881.

J. G. L.

HART, SIR ISRAEL: Ex-mayor of Leicester, England; born 1835. Chairman of the Hart and Levy Company, wholesale clothing manufacturers, he has been prominently identified with the municipal life of Leicester since the year 1874, when he was elected to the town council. In 1884 he was elevated to the bench of aldermen, and elected mayor, being reelected in 1885, 1886, and 1893. In 1885 he became high bailiff of the borough of Leicester.

Hart has presented Leicester with a free library and an ornamental fountain. He contested Central Hackney in 1900.

HART, MOSES: Founder of Duke's Place Synagogue, London; born in Breslau; died in London 1756; brother of Rabbi Uri Phoebus (Aaron HART), chief rabbi of the Ashkenazic Jews of England. During the high-treasurership of Lord Godolphin in the reign of Queen Anne, a government appointment was conferred upon Hart, and thereby he attained to great affluence. In 1722, being actuated by religious zeal and by the fact that the London Jewish community had outgrown its temporary house of prayer, Hart contributed a liberal sum, which covered the cost of erecting a permanent edifice. This was the first building of the Great Synagogue, London; it was inaugurated on New-Year's eve, 1722.

HART, SOLOMON ALEXANDER: Artist, and librarian at the Royal Academy, London; born at Plymouth April, 1806; died in London June 11, 1881. In 1823 he was entered at the Royal Academy as a student of painting. His earliest work was a portrait miniature of his father, which was exhibited in 1826. He continued for a time to paint miniatures, and exhibited his first oil-painting, entitled "Instruction," at the British Institution in 1828. In 1830 he exhibited "The Elevation of the Law" at the Suffolk Street Gallery. He was elected an A.R.A. in 1835 and a R.A. in 1840, and from 1854 to 1863 acted as professor of painting at the Royal Academy, in 1864 becoming librarian to that institution. During 1841–42 Hart visited Italy, and made an elaborate series of drawings of architectural interiors and of sites famous in history, which he intended for publication. He subsequently abandoned this intention, and made use of these drawings in several scenic and historical Italian pictures. Hart was curator of the Painted Hall at Greenwich, and frequently gave his services to the British and South Kensington museums.

Among Hart's Jewish works are: "Hannah, the Mother of Samuel"; and "The Conference Between Manasseh ben Israel and Oliver Cromwell," which was bought by F. D. Mocatta, who subsequently presented it to Jews' College.

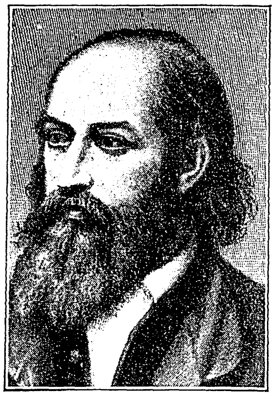
HARTFORD. See Connecticut.

HARTMANN, ANTON THEODOR: German author; born at Düsseldorf June 25, 1774; died at Rostock April 20, 1838. At Göttingen, Eichhorn led him to turn his attention to the study of the Old Testament and of Oriental languages. He taught for fifteen years, and was then called to Rostock (1811) as professor of Old Testament theology. His many works were for the most part of a belletristic character. The following two deserve special mention: "Die Hebräerin am Putztische und als Braut: Vorbereitet Durch eine Uebersicht der Wichtigsten Erfindungen in dem Reiche der Moden bei den Hebräerinnen von den Rohesten Anfängen bis zur Uepigsten Pracht" (3 vols., Amsterdam, 1809–10), on which De Quincey wrote one of his essays; "Historisch-Kritische Forschungen über die Bildung, das Zeitalter und den Plan der Fünf Bücher Mose's, Nebst einer Beurtheilenden Einleitung und einer Genauen Charakteristik der Hebräischen Sagen und Mythen," his principal work (1831). The latter book presents the most consistent development of the so-called "fragment-theory." About 1835 he wrote several pamphlets against the emancipation of the Jews, to which Gotthold Salomon replied.

Bibliography: *Allgemeine Deutsche Biographie*, x. 680 *et seq.*

J. K. H. C.

HARTMANN, MORITZ: Austrian poet; born at Przibram, Bohemia, Oct., 1821; died at Oberdöbling, near Vienna, May 13, 1872. He was educated at the gymnasiums at Jung-Bunzlau and Prague, and at the universities of Prague and Vienna. After traveling in Italy, Switzerland, Germany, and France he went to Vienna (1842). He revisited Germany in 1844, and lived for some time after in Brussels. In 1847 he returned to Prague. He took part in the Revolution of 1848, and was elected representative to the Parliament at Frankfort-on-the-Main. He went with Blum and Fröbel to Vienna, escaping to Frankfort when the troops under Windischgrätz were victorious. When the revolution in Baden broke out (1849) he again sided with the revolutionists, and when this revolution also failed he was compelled to flee from Germany. In 1853 he was sent to the Crimea as war correspondent for the "Kölnische Zeitung." Expelled from Constantinople in 1854, he went to France. In 1860 he settled in Geneva, where he became teacher of German literature and language. In 1862 he became editor of the "Freya" in Stuttgart; in 1867 one of the editors of the "Allgemeine Zeitung"; in 1868 he went to Vienna as editor of the "Neue Freie Presse."



Moritz Hartmann.

Among Hartmann's works are: "Kelch und Schwert," Leipsic, 1845; "Reimchronik des Pfaffen Mauritius," Frankfort-on-the-Main, 1849; "Der Krieg um den Wald," *ib.* 1850; "Adam und Eva," Leipsic, 1851; "Schatten," Darmstadt, 1851; "Neuere Gedichte," Leipsic, 1851; "Tagebuch aus Languedoc und Provence," Darmstadt, 1853; "Novellen," Berlin, 1858; "Die Diamanten der Baronin," *ib.* 1873; "Gedichte in Neuer Auswahl," Stuttgart, 1874. He translated from the Hungarian Petőfi's poems "Gedichte," Darmstadt, 1851, and edited "Bretonische Volkslieder" (with L. Pfau), Cologne, 1859.

His collected works appeared in ten volumes in Stuttgart, 1873–75.

S. F. T. H.

HARTOG, CÉCILE: English composer and pianist; born in London. She studied music under C. K. Salaman, and afterward at the Royal Academy of Music, London, also receiving instruction from F. H. Cowen, Bargiel, Oscar Beringer, and

Karl Klindworth (Berlin). Cécile Hartog has published a number of songs and of pieces for piano and clarionet. Among her musical settings the best known are: Browning's "The Years at the Spring," Lang's "Northern Song," Zangwill's "Sunset," Heine's "Snow May Drift," and Mrs. Lucas' "Song of the Jewish Soldier." Her first and great success was "Swinging."

Miss Hartog is also the composer of "Barbara's Song Book," a book of songs for children, and author of "Poets of Provence," in the "Contemporary Review," October, 1894.

J. I. H.

HARTOG, EDOUARD DE: Dutch composer; born in Amsterdam Aug. 15, 1826; studied under Bartelmann, Döhler, Mme. Dulcken, and Hoch; subsequently with Elwart and Litolff, and still later with Heinze and Damcke. In 1852 he settled in Paris, where he taught pianoforte, composition, and harmony. In 1853 he composed his first opera, "Le Mariage de Don Lope," which was not produced till 1868 (Théâtre Lyrique, Paris). De Hartog became prominent through his orchestral works, particularly those composed in 1857 and 1859. He has written, besides the opera mentioned above: "L'Amour et Son Hôte" (Brussels, 1873); Forty-third Psalm, for soli, chorus, and orchestra; two string quartets; "Lorenzo Aldini," opera; and many pieces for the violin, violoncello, harp, and organ. He was also a contributor to Pougin's supplement to Fétis' "Biographie Universelle."

De Hartog is a member of the Netherlands Musical Society; and he has been decorated with the orders of Leopold and of the Oaken Crown.

Bibliography: Riemann, *Musik-Lexikon*; Baker, *Biog. Dict. of Musicians*, New York, 1900.

S. A. P.

HARTOG, LEVI DE: Dutch jurist; born at Gorinchem (Gorkum), Holland, Nov. 6, 1835; studied law and (under Professor Dozy) Oriental languages at the University of Leyden (LL.D. 1859). De Hartog settled as a lawyer and private tutor in Leyden, and in 1865 was appointed teacher of general history and politics at the Hoogere Burgerschool, Haarlem. In 1866 he filled a similar position in Utrecht, and in 1877 was appointed professor of law at the University of Amsterdam. Since 1888 he has been a member of the Royal Academy of Sciences (Koninklijke Akademie van Wetenschappen).

De Hartog takes great interest in Jewish affairs. Since 1887 he has served on the board of trustees of the theological seminary, and in 1898 was appointed president of that institution. Since 1885 he has been chairman of the Dutch section of the Alliance Israélite Universelle, and since 1890 of the Maatschappij tot nut der Israelieten in Nederland.

Among De Hartog's works are: a collation of the Leyden MS. of Ben Sira for Steinschneider's "Alphabetum Syriacum" (Leyden, 1857; see introduction by Steinschneider); "De Jodenvervolging in 1096," in the "Gids," 1856; "Gronden der Staats-Provinciale-en-Gemeente-Inrichting van Nederland" (1866; 8th ed., 1901); "Leven van R. P. Dozij in Mannen van Beteekenis" (1884); "De Staatsregelingen en Grondwetten van Nederland van 1798 af tot op Heden"; and "Das Staatsrecht des Königreichs der Niederlande," in Marquardsen's "Das Oeffentliche Recht der Gegenwart."

Bibliography: Sijthoff, *Lexicon*; *Almanak Amsterdamsche Studenten-Corps*, 1887 (portrait); Feestnummer, *Propria Cures*, Nov. 1, 1902 (portrait); *Een Halve Eeuw*.

S. E. Sl.

HARTOG, MARION: English writer; born at Portsea on Oct. 22, 1821; fifth daughter of Joseph Moss. She was educated by her parents, and at an early age began with her sister Celia the composition of poems and stories. At sixteen they published by subscription a book of poems entitled "Early Efforts," 1838. A little later Marion went to London and gained a livelihood as a teacher. In 1840 she published three volumes of tales entitled "The Romance of Jewish History," which were followed by "Tales of Jewish History." By this time the sisters were engaged in literary work for different publications, including the "Bradford Observer," the "Metropolitan Magazine," and Jewish periodicals. In August, 1845, Marion married Alphonse Hartog, of whom she had been taking French lessons, and shortly after her marriage established a boarding- and day-school for young children, which she continued to conduct until 1884. In 1855 she founded the "Jewish Sabbath Journal," but the cares of her school and family absorbing all her time, and the journal not proving a financial success, it was discontinued.

Many of Mrs. Hartog's children have become eminent. Of her sons, Numa Edward Hartog was senior wrangler at Cambridge; Marcus and Philip Hartog are distinguished men of science. Her daughters are Mme. Arsène Darmesteter, the portrait-painter, and Cécile Hartog, the composer and pianist.

Bibliography: *Jew. Chron.* Aug. 23, 1895; *Young Israel*, Oct., 1898.

J. G. L.

HARTOG, NUMA EDWARD: First Jewish senior wrangler; born in London May 20, 1846; died June 19, 1871. At Pinches' Commercial School and afterward at University College School he gained all the principal prizes. In 1862 he obtained the Jews' Commemoration Scholarship at University College, London, and was twice awarded the Andrews' Scholarship. He matriculated at London University in 1862, obtaining honors wholly without precedent there.

In 1865 Hartog entered Trinity College, Cambridge, with a minor scholarship, and in January, 1869, he appeared as the first Jewish senior wrangler. He was, however, prevented from taking a fellowship by his inability to subscribe to the required test. In the movement for the removal of Jewish disabilities he was a prominent figure, and his straightforward evidence before a committee of the House of Lords helped considerably to secure the passing of the Universities Tests Act in 1871.

His brother, **Marcus Hartog,** is an English botanist, born in London in 1850; professor of natural history at Queen's College, Cork.

Bibliography: *Jew. Record*, Feb. 5, 1869; June 23, 1871; *Jew. Chron.* June 23, 1871; Morais, *Eminent Israelites*; *The Times* (London), May 30, 1871; June 21, 22, 23, 1871.

J. G. L.

HARTOG, PHILIP JOSEPH: English chemist and educationist; born in London March 2, 1864; educated at University College School, at Owens College, Manchester, and at the universities of Paris and Heidelberg; B.Sc. of Victoria University, Manchester, and of the University of London. He worked under Berthelot in the laboratories of the Collège de France till 1889. In that year he was elected to a Bishop Berkeley Scholarship at Owens College, and in 1891 and 1895 to assistant lectureships in chemistry at the same institution. In 1895 Hartog became lecturer to the university, and in 1901 he was appointed member of the court of the university.

Hartog's work lies chiefly in the field of thermochemistry; and he has published the results of his investigations on the thermochemistry of the sulfites and of iron nitrid, on the flame spectrum of nickel compounds, on the latent heat of steam, etc. He has also written most of the articles on chemists in the latter half of the "Dictionary of National Biography." He edited a history of Owens College on the occasion of its jubilee in 1900. Hartog has contributed many articles to scientific and other magazines, and is interested in Manchester Ruskin Hall, an evening college which was established in the interest of working men.

J. I. H.

HARTOGH, ABRAHAM FRANS KAREL: Dutch jurist and deputy; born at Amsterdam Dec. 29, 1844; died at The Hague Feb. 13, 1901; LL.D. Leyden 1869. Hartogh settled as a lawyer in Amsterdam, and soon became one of the capital's most prominent leaders of the Liberal party. In 1886 he was elected to Parliament as a member of the Second Chamber for Amsterdam, which position he occupied uninterruptedly till his death. Hartogh introduced a bill on civil procedure, which was accepted after strong opposition in the First Chamber on July 7, 1896. He was also successful in securing certain rights for women, particularly as regards proceedings for divorce.

Among Hartogh's works may be mentioned: (1) "Treatise on the Financial Responsibility of the State for the Damages Caused by the Faults of Its Functionaries," 1869; (2) "Voorstel van Wet tot Wijziging van het Wetboek van Burgerlyke Rechtsvordering," 4 vols., The Hague, 1895-98; and (3) "De wet van 7 July, 1896 ("Staatsblad," No. 103), tot Wijziging van het Wetboek van Burgerlyke Rechtsvordering," with annotations by A. F. K. Hartogh and C. A. Cosman, The Hague, 1897.

HARTVIGSON, ANTON: Danish pianist; born at Aarhus, Jutland, Oct. 16, 1845; brother of Frits Hartvigson. He studied under Neupert and Tausig. After appearing in several concerts in Copenhagen he went to London, where for ten years he was professor of music at the Royal Normal College for the Blind, and where he gave important annual recitals. He resides (1903) in Copenhagen, where he gives annually a series of lectures on the chief works of pianoforte composition. In 1900 the King of Denmark conferred on him the title of "Royal Professor."

Bibliography: *Salmonsen's, Store Illustrerede Konversationsleksikon.*

S. F. C.

HARTVIGSON, FRITS: Danish pianist; born at Grenaae, Jutland, May 31, 1841. His first instructors in piano were his mother and Anton Rée. In 1859 he went to Berlin, where he studied under Hans von Bülow. Hartvigson's first important appearance in public was in Copenhagen in 1860. Since then he has been received with enthusiasm in most of the European capitals. His repertoire includes the compositions of Liszt, Bronsart, Brahms, Rubinstein, and Raff. Especially distinguished was his performance in Liszt's "Todtentanz" for piano and orchestra, given under the leadership of Hans von Bülow in 1878 in England.

Hartvigson settled in London in 1864, and played at the Crystal Palace Saturday concerts, at the Richter and Henschel orchestral concerts, and at the Philharmonic Society concerts; at the last-named he introduced Liszt's Concerto in E-flat (1872). From 1872 to 1875 he lived in Russia, and when he returned to London was appointed pianist to the Princess Alexandra of Wales. He was made a knight of the Order of Dannebrog by the King of Denmark.

Hartvigson is an honorary member and a professor (appointed 1888) of the Royal Academy of Music, examiner in the Royal College of Music, and professor in the Royal Normal College for the Blind. Among his pupils were Alfred Hollins and Pauline Ellice.

S. F. C.

HARVEST: The Palestinian harvest began in April with the cutting (hence "ḳaẓir") of the barley. The lentil and pea ripened at the same time, and the reaping of the wheat and spelt followed two weeks later, although, of course, the time varied with the climatic conditions in the different districts. While in the lowlands around Jericho the barley harvest began early in April, along the coast it began eight days later, and in the mountains it was often from two to four weeks later. The harvesting of grain usually lasted seven weeks. It is doubtful whether the Feast of Maẓẓot was at the beginning of the harvest: at any rate the chief harvest festival ("ḥag ha-ḳaẓir") was the Feast of Weeks (see Shebu'ot). The grain was cut with a sickle ("ḥermesh," "maggal"), as is still the custom in Palestine (Deut. xvi. 9). The reaper ("ḳozer") grasped a number of ears with one hand (Isa. xvii. 5; Ps. cxxix. 7), and cut them off quite high up; perhaps in early times the single ears were plucked out by hand. The cut grain lay in rows ("'amir") behind the reaper, and was bound into sheaves ("alummah"; Gen. xxxvii. 7) by the sheaf-binder ("measseef"; Jer. ix. 21: "me'ammer"; Ps. cxxix. 7) and placed in heaps ("gadish").

Lev. xix. 9 and xxiii. 22 ordain that the reapers shall leave something for the poor, and shall not clean the field too thoroughly. During the reaping the workmen refreshed themselves with parched grain ("ḳali"), and with bread dipped in a sour drink ("ḥomeẓ"; Ruth ii. 14). Since the grain was usually thrashed in the open field, the husbandmen used to sleep there as long as the thrashing lasted, as they still do in Palestine. The yield from the seed varied greatly: from sixty to one hundredfold was an unusually rich return (Gen. xxvi. 12); probably thirtyfold was the ordinary return (Matt. xiii. 8), although to-day the average return is considerably less than this.

The harvest celebrations reached their climax in the harvest festival ("ḥag ha-asif"), which was preeminently a vintage festival. On that occasion the land was filled with rejoicing, and the people gave themselves over to mirth and dancing (comp. Judges ix. 27; Isa. xvi. 10; Jer. xxv. 30, xlviii. 33). To-day grapes to be consumed as food are gathered from the beginning of the month of August on, whereas those destined for the wine-press are not garnered until the months of September and October; it was the same in ancient times, since the real vintage festival is the Feast of Tabernacles, which comes in Tishri. Harvest rejoicings are frequently mentioned in the Bible (comp. Isa. ix. 3; Ps. iv. 8 [A.V. 7], cxxvi. 5 *et seq.*). At a time of such rejoicing the poor must not be forgotten, hence the injunction, that the corners and edges of the field, as well as the gleanings and any sheaves that may have been overlooked, be left for the poor and the stranger (Lev. xix. 9, xxiii. 22; Deut. xxiv. 19; Ruth ii. 2, 15 *et seq.*).

ḤASA: Babylonian amora of the third century, contemporary of Naḥman (b. Jacob) and of Ammi (B. M. 57a). Though he was a poor man, people trusted him with their treasures, making him their bailee, without taking receipts from him. It is stated that, rumor having spread the report that Ḥasa had been drowned, Naḥman decided that Ḥasa's wife might marry again, on the ground that, were he still alive, the report of the whereabouts of so great a man would certainly have reached Naḥman's ears (Yeb. 121b; Ket. 85b).

J. S. M.

ḤASAN BEN MASHIAḤ: Karaite teacher of the ninth or tenth century. According to Sahl ben Maẓliaḥ (see Pinsker, "Liḳḳuṭe Ḳadmoniyyot," p. 37), Ḥasan publicly disputed with Saadia, and after Saadia's death wrote against him. In opposition to this, Ibn al-Hiti records that Ḥasan lived in Bagdad, and held disputes there with the Christian physician Abu Ali Isa ibn Zara (see Steinschneider, "Polemische und Apologetische Litteratur," p. 146), who wrote in the year 387 A.H. (= 997 C.E.). This date is, however, far too late for Ben Mashiaḥ.

Of Ḥasan's polemic against Saadia, which was probably written in Arabic, a passage is extant, referring to the antiquity of the present Jewish calendar (the well-known theory of Saadia). In this passage mention is made of certain "Sadducaic writings," which, as is now known, circulated among the Karaites of the tenth century. To this polemical treatise probably belongs another passage in a St. Petersburg manuscript, where Ben Mashiaḥ, after some introductory remarks in Arabic, quotes a complete Hebrew treatise on calendar-science by an otherwise unknown Rabbinite, Joshua ben 'Alan. Hadassi, moreover, quotes from Ḥasan an opinion on the law of inheritance ("Ha-Eshkol," § 257ב); and Ibn Ezra, in the preface to his commentary on the Pentateuch, mentions him (placing him in one class with Anan, Benjamin al-Nahawandi, and Jeshua b. Judah) as representative of Karaite Bible exegesis.

From this it would appear that Ḥasan ben Mashiaḥ also wrote Bible commentaries; and perhaps he is the author of a fragment of an Arabic commentary on Exodus (MS. St. Petersburg), in which the above-mentioned passage against Saadia likewise occurs, and which Harkavy attributes to Sahl b. Maẓliaḥ. On the other hand, the authorship of a treatise on the theodicy, under the title "Sha'ar ha-Ẓedeḳ," of a "Sefer ha-Datot" or "Zikron ha-Datot," and of a law code ("Sefer ha-Miẓwot"), is erroneously ascribed to him.

K. S. P.

ḤASDAI I.: Third exilarch of the Arabian period; died in 730. He was a descendant of Bostanai I. and a successor of Ḥanina b. Adai. His eldest son was Solomon b. Ḥasdai, who also, after his father's death, became exilarch. His second son, David, was the father of Anan ben David, the founder of the Karaites, and, according to Karaite tradition, was gaon. Ḥasdai's son-in-law, probably, was Naṭronai ben Nehemiah, gaon of Pumbedita (719-739). Ḥasdai I. is certainly the exilarch quoted in Al-Ḳazwini's "Athar al-Bilad" (ed. Wüstenfeld, p. 203), though his name is not mentioned. According to this report he showed to Mujahid (724) the two angels Harut and Marut, great teachers of magic (see Hughes, "Dict. of Islam," p. 167). It is related that Mujahid, against Ḥasdai's express condition, pronounced the name of God on seeing them, and thus did not perish.

HASDAI, ABRAHAM BEN SAMUEL HA-LEVI: Hebrew translator; lived in Barcelona about 1230. He is supposed to have been the son of the poet Samuel ibn Abraham ibn Ḥasdai ha-Levi (1165-1216; Grätz, "Geschichte," vi. 195). Abraham Ḥasdai was an enthusiastic partizan of Maimonides, and took part in the struggle between the followers and the opponents of that philosopher. He sent a letter to Judah ibn al-Fakhar of Toledo (see Buxtorf, "Institutio Epistolaris Hebraïca," p. 433, Basel, 1729) in which he expressed the hope of converting him to the Maimonidean party. At the same time he blamed him for his attacks on the old grammarian David Ḳimḥi, and alluded to Meïr ben Todros ha-Levi Abulafia, the other principal adversary of Maimonides, in terms of censure. Moreover, he addressed a letter (Maimonides, "Teshubot, She'elot we-Iggerot," p. 346, Constantinople, 1520–40) to the same Abulafia, in which he expressed astonishment that a man of the latter's connections and position should unite with those who opposed Maimonides and despised a man like David Ḳimḥi. He addressed another letter, in conjunction with his brother Judah (see "Oẓar Neḥmad," ii. 171), to the Jews of Castile, Aragon, Navarre, and Leon, severely arraigning the anti-Maimonidists, who, in their fanaticism, had caused the monks to burn some of Maimonides' writings in Paris and Montpellier.

Ibn Ḥasdai was an industrious translator from Arabic into Hebrew; some Arabic works are known only through his translations. Among his translations are the following: (1) "Sefer ha-Tappuaḥ," from the pseudo-Aristotelian "Kitab al-Tuffaḥah" (Venice, 1519, frequently reprinted; Latin transl. "Biga Dissertationum," Giessen, 1706; German transl. by J. Musen, Lemberg, 1873). The original Arabic text is lost. (2) "Mozene Ẓedeḳ," from Ghazali's ethical work entitled "Mizan al-'Amal." It was published by J. Goldenthal, who rejected Ibn Ḥasdai's for the original Arabic title of Ghazali (Leipsic, 1839). The Arabic original has been lost. Ibn Ḥasdai's translation replaces Ghazali's quotations from the Koran and the Sunna with their equivalents from Bible and Talmud (see Jellinek in "Orient, Lit." v. 573, and Goldenthal's answer to Jellinek in *ib.* vi. 393). (3) "Sefer ha-Yesodot," from Isaac Israeli's "Kitab al-Istiḳsat" (German transl. by S. Fried, "Das Buch der Elemente," Frankfort-on-the-Main, 1900; first appeared as inaugural dissertation, Leipsic, 1884). Ibn Ḥasdai translated the book at the request of David Ḳimḥi; and some passages, compared by Steinschneider, agree exactly with the Latin translation supposed to have been made by Gerard of Cremona. Another Hebrew translation of the book is supposed to be by Moses ibn Tibbon, though both translations have the introduction of Ibn Ḥasdai (see S. Fried's translation, p. 73). The Arabic original is lost. (4) Maimonides' "Sefer ha-Miẓwot." Fragments of Ḥasdai's translation are preserved in quotations by Naḥmanides and Aaron ha-Levi, contained in M. Bloch's "Le Livre des Préceptes," p. 26 (Paris, 1888). (5) Maimonides' "Iggeret Teman." Two passages of Ibn Ḥasdai's translation are given in Steinschneider's "Hebr. Bibl." (xv. 62). There are two other Hebrew translations in existence of both of the foregoing books of Maimonides. (6) "Ben ha-Melek we ha-Nazir" (see Barlaam and Josaphat). The question as to how far Ibn Ḥasdai introduced new stories into the old framework, and as to which Arabic translation of the original Persian or Indian he used, can not at present be determined; but his version is one of the most important factors in the critical inquiry as to how this story of the Buddha was transmitted from East to West. The Hebrew style of Ibn Ḥasdai's translations is elegant and clear. According to De Rossi he also wrote ḥiddushim on several Talmudic treatises (Parma MS. No. 1162. iii. 84); but Steinschneider doubts this (see Benjacob, "Oẓar ha-Sefarim," p. 174).

ḤASDAI (ḤISDAI), ABU AL-FAḌL BEN JOSEPH IBN: Jewish convert to Islam; lived at Saragossa in the second half of the eleventh century. Ibn Abi 'Uṣaibia ("'Uyun al-Anba fi Ṭabaḳat al-Aṭibba") pompously calls him a descendant of the prophet Moses. He relates further that Ḥasdai was an excellent poet, an orator, a clever logician and physician, and was well versed in mathematics and astronomy.

Bibliography: Ibn Abi 'Uṣaibia, *'Uyun al-Anba fi Ṭabaḳat al-Aṭibba*, ii. 50; Steinschneider, *Die Arabische Literatur der Juden*, § 100, note 3, Frankfort-on-the-Main, 1902.

K. I. Br.

ḤASDAI, ABU OMAR JOSEPH IBN: Judæo-Spanish poet of the eleventh century; probably born at Cordova; died between 1045 and 1055. Ibn Janaḥ, in his "Luma'" (p. 152 = "Riḳmah," p. 86; between 1050 and 1055), speaks of Joseph as already dead. He saw him at Saragossa, whither he had gone from Cordova. It appears, however, from Joseph's poem that he was alive in 1045. There is therefore little ground for Luzzatto's supposition ("Notice sur Ḥasdai ben Isaac," p. 60) that Joseph was the son of Ḥasdai b. Isaac ha-Levi, who in 960 was an old man. Only one poem of Joseph's has been preserved, the "Yetomah" (Arabic, "Yatimah" ["unequaled"]), it is a panegyric of Samuel Nagdela and his son Joseph, the latter being at that time a boy between ten and fifteen. The beauty of this poem is equal to its name, and critics recognize it as comparable to those of Ibn Gabirol. It is praised by Moses ibn Ezra in a poem published in "Oẓar Neḥmad" (iii. 44 *et seq.*), and by Al-Ḥarizi ("Taḥkemoni," ch. iii.). The Hebrew text of Ḥasdai's poem was published by L. Dukes in his "Naḥal Ḳedumim" (p. 17), and a German metric translation by Geiger in his "Salomon Gabirol und Seine Dichtungen" (pp. 35 *et seq.*).

ḤASDAI, ABU YUSUF (BEN ISAAC BEN EZRA) IBN SHAPRUT (SHABRUT, SHAFRUT, BASHRUT, or, incorrectly, **SHPROT;** called also **Ḥasdai ha-Nasi):** Spanish physician, diplomat, and patron of Jewish science; born about 915 at Jaen; died 970 or 990 at Cordova. His father was a wealthy and learned Jew of Jaen. Ḥasdai acquired in his youth a thorough knowledge of Hebrew, Arabic, and Latin, the last-named language being at that time known only to the higher clergy of Spain. He also studied medicine, and is said to have discovered a universal panacea, called "Al-Faruk." Appointed physician to the calif 'Abd al-Raḥman III. (912–961), he, by his engaging manners, knowledge, character, and extraordinary ability, gained his master's confidence to such a degree that he became the calif's confidant and faithful counselor.

Without bearing the title of vizier he was in reality minister of foreign affairs; he had also control of the customs and ship-dues in the port of Cordova. Ḥasdai arranged the alliances formed by the calif with foreign powers, and he received the envoys sent by the latter to Cordova. In 949 an embassy was sent by Constantine VII. to form a diplomatic league between the hard-pressed Byzantine empire and the powerful ruler of Spain. Among the presents brought by the embassy was a magnificent codex of Dioscorides' work on botany, which the Arabic physicians and naturalists valued highly. Ḥasdai, with the aid of a learned Greek monk named Nicholas, translated it into Arabic, making it thereby the common property of the Arabs and of medieval Europe.

As Minister.

Ḥasdai rendered important services to his master by his treatment of an embassy headed by Abbot Johannes of Göritz, sent to Cordova in 956 by Otto I. The calif, fearing that the letter of the German emperor might contain matter derogatory to Islam, commissioned Ḥasdai to open the negotiations with the envoys. Ḥasdai, who soon perceived that the letter could not be delivered to the calif in its present form, persuaded the envoys to send for another letter which should contain no objectionable matter. Johannes of Göritz said that he had "never seen a man of such subtle intellect as the Jew Ḥasdeu" ("Vita Johannis Gorziensis," ch. cxxi., in Pertz, "Monumenta Germaniæ," iv. 371).

Ḥasdai secured a great diplomatic triumph during the difficulties which arose between the kingdoms of Leon and Navarre, when the ambitious Queen Toda sought the aid of 'Abd al-Raḥman in reinstating her deposed grandson Sancho. Ḥasdai was sent to the court of Navarre; and he succeeded after a long struggle in persuading the queen to go to Cordova with her son and grandson, in order to prostrate herself before the calif, her old enemy, and implore the aid of his arms (958). The proud Navarrese allowed herself to be vanquished by Ḥasdai—as a Jewish poet of the time expresses himself, "by the charm of his words, the strength of his wisdom, the force of his cunning, and his thousand tricks." Ḥasdai retained his high position under 'Abd al-Raḥman's son and successor, Al-Ḥakim, who even surpassed his father in his love for science.

Jewish Activity.

Ḥasdai was very active in behalf of his coreligionists and Jewish science. When he heard that in the far East there was a Jewish state having a Jewish ruler, he desired to enter into correspondence with this monarch; and when the report of the existence of the state of the Chazars was confirmed by two Jews, Mar Saul and Mar Joseph, who had come in the retinue of an embassy from the Slavic king to Cordova, Ḥasdai entrusted to them a letter, written in good Hebrew addressed to the Jewish king, in which he gave an account of his position in the Western state, described the geographical situation of Andalusia and its relation to foreign countries, and asked for detailed information in regard to the Chazars, their origin, their political and military organization, etc. See Chazars.

Ḥasdai sent rich presents to the academies of Sura and Pumbedita, and corresponded with Dosa, the son of Saadia Gaon. He was also instrumental in transferring the center of Jewish science from Babylonia to Spain, by appointing Moses b. Enoch, who had been stranded at Cordova, director of a school, and thereby detaching Judaism from its dependence on the East, to the great joy of the calif, as Abraham ibn Daud says ("Sefer ha-Ḳabbalah," p. 68). Ibn Abi 'Uṣaibia writes of him: "Ḥasdai b. Isaac was among the foremost Jewish scholars versed in their law. He opened to his coreligionists in Andalusia the gates of knowledge of the religious law, of chronology, etc. Before his time they had to apply to the Jews of Bagdad on legal questions, and on matters referring to the calendar and the dates of the festivals" (ed. Müller, ii. 50).

Ḥasdai marks the beginning of the florescence of Andalusian Jewish culture, and the rise of poetry and of the study of Hebrew grammar among the Spanish Jews. Himself a scholar, he encouraged scholarship among his coreligionists by the purchase of Hebrew books, which he imported from the East, and by supporting Jewish scholars whom he gathered about him. Among the latter were Menahem b. Saruḳ of Tortosa, the protégé of Ḥasdai's father, and Dunash b. Labraṭ, both of whom addressed poems to their patron. Dunash, however, prejudiced Ḥasdai to such a degree against Menahem that Ḥasdai caused Menahem to be maltreated.

ḤASDAI BEN SAMUEL BEN PERAḤYAH HA-KOHEN: Turkish rabbi; born at Salonica; died there Sept., 1677; claimed descent from Joseph ben Gorion. He was a son of the learned Samuel ben Peraḥyah of Salonica, and a pupil of Rabbi Ḥayyim Shabbethai in that city, where he also became rabbi. Ḥasdai was the author of responsa, which appeared under the title "Torat Ḥesed," Salonica, 1722, containing also letters written by him to Aaron ben Ḥayyim. His novellæ on the Ḥoshen Mishpaṭ and on some Talmudic treatises have remained unpublished.

Ḥasdai's uncle, **Daniel ben Peraḥyah,** added notes to Joseph ben Shem-Ṭob's "She'erit Yosef" (Salonica, 1568).

ḤASDAI BEN SOLOMON: Spanish rabbi; born probably in Tudela. He was a pupil of R. Nissim Gerondi in Barcelona. His friend (and probably fellow pupil) Isaac b. Sheshet calls him the "Spanish worthy." He officiated as rabbi until 1379, when the plague broke out in Tudela. Still unmarried, he went to Valencia, where he found a position as rabbi. Ḥasdai, who corresponded with Ḥasdai Crescas, Isaac b. Sheshet, and others, in his stern piety opposed Ḥayyim Galipapa of Pamplona, who had introduced certain ritualistic changes into his community. He objected to the reading in

Spanish of the Esther roll; and in Fraga, where he stopped on a journey, he unsuccessfully attempted to force the community to change a custom which had crept into the liturgy through ignorance.

HASELBAUER. See EYBESCHÜTZ, JONATHAN.

HASHABIAH (חשביה): Name of several Levites, chiefly in the time of the return from Babylon. The most important are: **1.** The fourth son of Jeduthun, appointed by David to play the harp under the direction of his father in the house of the Lord; he had charge of the twelfth division of musicians (I Chron. xxv. 3 19). **2.** Son of Kemuel, a chief of the Kohathite Levites, who, with 1,700 men of his tribe, superintended the business of the Lord and of the king west of the Jordan (I Chron. xxvi. 30, xxvii. 17). **3.** A Levite, one of the chiefs who officiated at the Feast of Passover in the time of King Josiah (II Chron. xxxv. 9). **4.** The "ruler of half the district of Keilah," who repaired a portion of the wall of Jerusalem (Neh. iii. 17). **5.** One of the chiefs of the Levites who, with Nehemiah, sealed the covenant (Neh. x. 12 [A. V. 11], xii. 24).

E. G. H. M. SEL.

HA-SHAḤAR (השחר = "the dawn"): Hebrew monthly; published at Vienna from 1869 to 1884 by P. Smolenskin, who was also its editor. It resembled the German "Monatsschrift," containing scientific articles, essays, biographies, and narratives. It contained also general Jewish news. The objects of Smolenskin were to enlighten the Jews, to spread the knowledge of Hebrew, and particularly to oppose obscurantism. Its publication was interrupted several times for lack of support. "Ha-Shaḥar" greatly influenced the Haskalah movement, especially in Russia, where it was well known. It was read secretly in the yeshibot, in private houses, and in the batte midrashot. Among its contributors were scholars and litterateurs like Brandsteter, Leon Gordon, David Kahana, and Solomon Rubin: the last-named assisted Smolenskin in the editorship. The second volume was reviewed by A. Geiger in his "Jüd. Zeit." (ix. 298–316); the twelfth and last volume was criticized by Eliezer Atlas in "Ha-Asif" (ii. 354–370).

HASHKABAH. See HAZKARAT NESHAMOT.

HASHMONAH: Thirtieth station of the Israelites during their wandering in the wilderness (Num. xxxiii. 29, 30). It was situated not far from Mount Hor. The Septuagint has Σελμωνά, evidently confusing it with the station Zalmonah, mentioned in verse 41.

E. G. H. B. P.

HASHUB (חשוב): **1.** Son of Pahath-moab, who assisted Nehemiah in the repair of the walls of Jerusalem (Neh. iii. 11). **2.** Another Hashub, engaged in the same work (Neh. iii. 23). **3.** One of the chiefs of the people, who sealed the covenant with Nehemiah (Neh. x. 24 [A. V. 23]). **4.** A Levite of the family of Merari (Neh. xi. 15; I Chron. ix. 14).

E. G. H. M. SEL.

HA-SHULAMMIT. See PERIODICALS.

HASHUM (חשם): **1.** Chief of a family the members of which, two hundred and twenty-three in number, returned from captivity with Zerubbabel (Ezra ii. 19; comp. Neh. vii. 22). Seven of them had married foreign women, whom they had to put away (Ezra x. 33). Hashum was among those who sealed the covenant with Nehemiah (Neh. x. 18). **2.** One of the chiefs who stood on the left side of Ezra when he read the Law to the people (Neh. viii. 4).

E. G. H. M. SEL.

HASIDÆANS or **ASSIDEANS** (חסידים; 'Ασιδαιοι: lit. "the pious"): Religious party which commenced to play an important rôle in political life only during the time of the Maccabean wars, although it had existed for quite some time previous. They are mentioned only three times in the books of the Maccabees. In I Macc. ii. 41 it is related that at the commencement of the war, after a number of Maccabeans in the recesses of the desert had allowed themselves to be slain on the Sabbath without offering any resistance, Mattathias and his followers decided to fight on the Sabbath in case of necessity. Thereupon a company of Hasidæans joined them, "mighty men of Israel, . . . such as were voluntarily devoted unto the law." In the second passage (I Macc. vii) it is stated that Alcimus succeeded in persuading Demetrius, the newly elected king of Syria, to appoint him high priest instead of Judas Maccabeus. Whereupon it is said (verses 12–14): "Then did there assemble unto Alcimus and Bacchides a company of scribes, to require justice. Now the Assideans ['Ασιδαῖοι] were the first among the children of Israel that sought peace of them: For, said they, one that is a priest of the seed of Aaron is come with this army, and he will do us no wrong." They were mistaken, however, since Alcimus later caused sixty of them to be put to death. In the parallel passage, on the other hand (II Macc. xiv.), Alcimus describes the political situation of the Jews to Demetrius as follows: "Those of the Jews that be called Assideans, whose captain is Judas Maccabeus, nourish war, and are seditious, and will not let the realm be in peace" (II Macc. xiv. 6).

Account in II. Macc.

The name "Hasidæans" occurs frequently in the Psalms, in the sense of "the pious," "saints" (xxx. 5 [A. V. 4], xxxi. 24 [23], xxxvii. 28). In Talmudic sources the Hasidæans appear as martyrs to their faith (Sanh. 10b); as unselfish and long-suffering (Abot v. 4, 13); as the "saints of former times" ("Ḥasidim ha-Rishonim"); as those who compose themselves inwardly for an hour before prayer (Ber. v. 1) and enjoy special honor at the Feast of Tabernacles, on the day of the drawing of water (Suk. v. 4). To their party, which died out with Joshua Kaṭnuta, Jose ben Joezer probably belonged (Soṭah ix. 15; Ḥag. ii. 7) In the Eighteen Benedictions God's blessing is called down upon them immediately after the

Ẓaddiḳim ("'al ha-Ẓaddiḳim we'al ha-Ḥasidim"), and in later times they appear in general as the ideal representatives of Judaism, so that "Ḥasid" has come to be a title of respect (Num. R. §§ 14, 227a, "Yacob he-Ḥasid"; comp. Tem. 15b; Ta'an. 8a).

Party of the Rebellion.

From these sources have been developed the opinions, generally prevalent among scholars, that the Hasidæans were strongly religious ascetics who held strictly to the Law and loved quiet, and who founded a society or sect that exercised considerable power and authority among the people; and that they were finally drawn into rebellion by Antiochus, who began the war against the Syrians and carried it to a triumphant conclusion. The Hasidæans thus became the chief impelling force in the Jewish struggle for independence (II Macc. xiv. 6).

Concerning the political rôle of the Hasidæans in this war, Wellhausen has endeavored to prove that it was almost insignificant ("Die Pharisäer und die Sadducäer," Greifswald, 1874). According to him they formed an independent association existing apart from the doctors of the Law (comp. I Macc. vii. 12), which attached itself to the Maccabeans after the latter had won their first success (I Macc. ii. 42), but which seized the first opportunity to make peace with Alcimus and thus left the Maccabeans in the lurch. The contradictory passage in II Maccabees, according to which the Hasidæans were the chief force throughout the war, Wellhausen regards as a violently interjected protest against the true representation of them as found in I Maccabees. Several modern scholars (Schürer, Kautzsch, and others) have agreed to this view, which had already been adopted in part by Ewald ("Gesch. des Volkes Israel," iv. 401). But even if the justice of this view were admitted, the origin and tenets of the Hasidæans would be no less obscure than before.

Different Views.

Grätz ("Gesch." ii. 273) supposes them to have developed out of the Nazarenes. After the Maccabean victories, according to Grätz, they retired into obscurity, being plainly dissatisfied with Judas Maccabeus, and appeared later as the order of the Essenes—a theory which is supported by the similarity in meaning between *'Εσσηνοί* or *'Εσσαῖοι* (= Syriac stat. absolute חסין, stat. emphat. חסיא, "pious") and "Ḥasidim" ("pious"), and which has as many advocates (Hitzig, "Gesch. des Volkes Israel"; Lucius, "Die Therapeuten") as opponents (Herzfeld, "Gesch. des Volkes Israel," and others). Others think that the Pharisees were developed from the Ḥasidim (Schürer, "Gesch." ii. 404; Moritz Friedländer, "Gesch. der Jüdischen Apologetik," pp. 316 *et seq.*, 464 *et seq.*).

Since scholars have until recently started with the erroneous hypothesis that Hellenism "took root only in the upper classes of society, the main body of the [Jewish] nation being wholly untouched by it" (Wellhausen, "Israelitische und Jüdische Gesch." p. 240), and that consequently the majority of the people at that time were "pious, and observers of the Law," it would be necessary, in order to account for the Hasidæans, to remove them from their "pious" surroundings and make of them a sect or society of "extra-pious," although the sources mentioned do not justify such a view. The *συναγωγὴ 'Ασιδαίων* of the books of the Maccabees, upon which so much emphasis is laid, corresponds, as has already long been known, to the קהל חסידים of the Psalms, which means neither "sect" nor "society," but only "congregation," with no idea of party. The piety attributed to Ḥasidim in the Talmudic sources is not in any way abnormal or suggestive of sect (Lehmann, in "R. E. J." xxx. 182 *et seq.*). The supposition that they were a sect closely associated with the scribes, and related to them, rests only on the fact that the two classes are mentioned together in I Macc. vii. 12, 13; the genuineness of verse 13, however, has been questioned by Hitzig ("Gesch. des Volkes Israel," p. 417).

Their Position.

Since Moritz Friedländer's investigations (especially in "Der Antichrist," Göttingen, 1901) have shown the great extent to which the Jews in Palestine and in the countries of the Diaspora fell away from orthodox Judaism, even in the third century B.C., the Hasidæans appear simply to have been those "pious" ones who remained true to the customs of their fathers. They lost ground, however, from day to day, as their prayer shows: "Help, Lord; for the Ḥasid ceaseth" (כי גמר חסיד; Ps. xii. 2 [A. V. 1]). They were animated by a profound hatred for the foreign, Hellenic spirit, and for those of their Jewish brethren who were filled with it. In the Maccabean wars they came to an accounting with both. They seem by no means to have been peace-loving hermits or ascetics. Their sentiments and attitude are probably to be seen in Ps. cxlix.: "Sing unto the Lord a new song, and his praise in the assembly of Ḥasidim. . . . The Ḥasidim exult in glory: they sing for joy upon their beds. They have the high praises of God in their mouth, and a two-edged sword in their hand; to execute vengeance upon the nations, and punishments upon the peoples; to bind their kings with chains, and their nobles with fetters of iron: to execute upon them the promised judgment" (Hebr.). This agrees with II Maccabees, according to which the Hasidæans under Judas Maccabeus "continually stirred up war and rebellion, and would not let the country be at peace" (see ESSENES).

J. M. Sc.

ḤASIDIM, ḤASIDISM: Ḥasidism is a religious movement which arose among the Polish Jews in the eighteenth century, and which won over nearly half of the Jewish masses. In its literal meaning the word "Ḥasidism" is identical with "pietism" ("Ḥasid" = "the pious"), and the Ḥasidic teachings resemble the synonymous Protestant teachings in so far as they both assign the first place in religion not to religious dogma and ritual, but to the sentiment and the emotion of faith. Presenting in its inner motives one of the most peculiar phenomena of religious psychology in general, Ḥasidism should in Jewish history be classed among the most momentous spiritual revolutions that have influenced the social life of the Jews, particularly those of eastern Europe.

There has been apparent from time immemorial a struggle for supremacy between two principles in Judaism: the formalism of dogmatic ritual and the direct religious sentiment. The discipline of the Law was in continual conflict with mystical meditation, which gave considerable latitude to individual inclinations in the domain of religion. Such was the nature of the struggle between Pharisaism and Essenism in ancient times, between Talmudism and the Cabala in the Middle Ages, and between rabbinism and the mystic-Messianic movements from the sixteenth to the eighteenth century.

Origin in the Ukraine.

In Poland, where since the sixteenth century the great bulk of the Jewry had firmly established itself, the struggle between rabbinism and mysticism became particularly acute after the Messianic movement called into being by Shabbethai Ẓebi. Leanings toward mystical doctrines and sectarianism showed themselves prominently among the Jews of the southwestern or Ukraine provinces of Poland (Volhynia, Podolia, and Galicia); while in the northwestern provinces, in Lithuania, and in White Russia, rabbinical Orthodoxy held undisputed sway. This was due to the pronounced social difference between the northern or Lithuanian Jews and the southern Jews of the Ukraine. In Lithuania the Jewish masses were mainly gathered in densely populated towns where rabbinical academic culture (in the yeshibot) was in a flourishing state; while in the Ukraine the Jews were more scattered in villages far removed from intellectual centers, and were frequently steeped in ignorance.

The social decay in the south became more intense after the Cossacks' Uprising under Chmielnicki and the turbulent times in Poland (1648–60), which completely ruined the Jewry of the Ukraine, but left comparatively untouched that of Lithuania. The economic and spiritual decline of the South-Russian Jews created a favorable field for mystical movements and religious sectarianism, which spread there from the middle of the seventeenth to the middle of the eighteenth century, and brought about, among other things, the appearance of the Christianizing sect of the Frankists. (See Frank, Jacob.)

Besides these external influences there were deeply seated causes that produced among the greater portion of the Jewish people a discontent with rabbinism and a gravitation toward mysticism. Rabbinism, which in Poland had become transformed into a system of book-lore and dry religious formalism, satisfied neither the unlearned common people nor the learned men who sought in religion an agreeable source of consolation and of forgetfulness of worldly cares. Although rabbinism itself had adopted some features of the Cabala, it had adapted them to fit into its own religious system: it added to the stern discipline of ritualism the gloomy asceticism of the "practical cabalists" of the East, who saw the essence of earthly existence only in fasting, in penance, in self-torture, and in spiritual sadness. Such a combination of religious practises, suitable for individuals and hermits, was not suitable to the bulk of the Jews. Ḥasidism gave a ready response to the burning desire of the common people in its simple, stimulating, and comforting faith. In contradistinction to other sectarian teaching, Ḥasidism aimed not at dogmatic or ritual reform, but at a deeper psychological one. Its aim was to change not the belief, but the believer. By means of psychological suggestion it created a new type of religious man, a type that placed emotion above reason and rites, and religious exaltation above knowledge.

The Ba'al Shem.

The founder of Ḥasidism was a man of the obscure Podolian Jewry, Israel b. Eliezer Ba'al Shem-Ṭob (BeShT). His personal fame as a healer spread not only among the Jews, but also among the non-Jewish peasants and the Polish nobles. He often cured the Jews by fervent prayer, profound ecstasies, and gesticulations. He also at times successfully prognosticated the future, and revealed secrets. Soon acquiring among the masses the reputation of a miracle-worker, he came to be known as "the kind Ba'al Shem" ("Ba'al Shem-Ṭob").

Besht was the idol of the common people. Characterized by an extraordinary sincerity and simplicity, he knew how to gain an insight into the spiritual needs of the masses. He taught them that true religion was not Talmudic scholarship, but a sincere love of God combined with warm faith and belief in the efficacy of prayer; that a plain man filled with a sincere belief in God, and whose prayers come from the heart, is more acceptable to God than the rabbi versed in the Law, and who throughout his life is absorbed in the study of the Talmud and in the observance of petty ceremonials. This democratization of Judaism attracted to the teachings of Besht not only the common people, but also the scholars whom the rabbinical scholasticism and ascetic Cabala failed to satisfy.

About 1740 Besht established himself in the Podolian town of Miedzyboz. He gathered about him numerous disciples and followers, whom he initiated into the secrets of his teachings. not by systematic exposition, but by means of sayings and parables. These sayings were transmitted orally, and were later written down by his disciples, who developed the disjointed thoughts of their master into a system. Besht himself did not write anything. Being a mystic by nature, he regarded his teachings as a prophetic revelation. Toward the end of his life he witnessed the spread in Podolia of the teachings of the Frankists, which, like Ḥasidism, were the outcome of popular dissatisfaction with the existing order of religious matters, but led to negative results.

Fundamental Conceptions.

The teachings of Ḥasidism, as laid down in the sayings of Besht and his first disciples, are founded on two theoretical conceptions: (1) religious pantheism, or the omnipresence of God, and (2) the idea of communion between God and man. "Man," says Besht, "must always bear in mind that God is omnipresent and is always with him; that He is, so to speak, the most subtle matter everywhere diffused. . . . Let man realize that when he is looking at material things he is in reality gazing at the image of the Deity which is present in all things. With this in mind man will always serve God even in small matters."

The second of the above-named conceptions, one which was adopted from the Cabala, consists in the belief that between the world of the Deity and the world of humanity there is an unbroken intercourse. It is true not only that the Deity influences the acts of man, but also that man exerts an influence on the will and mood of the Deity. Every act and word of man produces a corresponding vibration in the upper spheres. From this conception is derived the chief practical principle of Ḥasidism—communion with God for the purpose of uniting with the source of life and of influencing it. This communion is achieved through the concentration of all thoughts on God, and consulting Him in all the affairs of life. The righteous man is in constant communion with God, even in his worldly affairs, since here also he feels His presence. An especial form of communion with God is prayer. In order to render this communion complete the prayer must be full of fervor, ecstatic; and the soul of him who prays must during his devotions detach itself, so to speak, from its material dwelling. For the attainment of ecstasy recourse may be had to mechanical means, to violent bodily motions, to shouting and singing. According to Besht, the essence of religion is in sentiment and not in reason. Theological learning and halakic lore are of secondary importance, and are useful only when they serve as a means of producing an exalted religious mood. It is better to read books of moral instruction than to engage in the study of the casuistic Talmud and the rabbinical literature. In the performance of rites the mood of the believer is of more importance than the externals; for this reason formalism and superfluous ceremonial details are injurious.

Communion the Essence.

It is necessary to live and to serve God in a cheerful and happy frame of mind: sadness and sorrow darken the soul and interfere with communion; hence the injuriousness of asceticism. By means of constant spiritual communion with God it is possible to secure clear mental vision, the gift of prophecy, and to work miracles. The righteous man, or "ẓaddiḳ," is one who has reached the ideal of communion in the highest degree, and therefore appears before God as "one of His own." The rôle of the ẓaddiḳ is that of mediator between God and ordinary people. Through the ẓaddiḳ salvation of the soul is achieved, and earthly blessings are obtained: it is merely necessary to believe in the power of this mediator and favorite of God, who has more or less influence in the "higher spheres."

Ẓaddiḳism, which in time became a complete system, had a far-reaching influence on the later destiny of Ḥasidism. From among the numerous disciples of Besht, two—the preachers Baer of Meseritz and Jacob Joseph Cohen of Polonnoye—more than any others contributed to the spread of his teachings. In Meseritz (Mezhirechye) and Rovno the future great leaders of Ḥasidism were trained. Here also originated what may be termed the ẓaddiḳ dynasties of Poland and Russia. Jacob Joseph Cohen, on his part, spread the Ḥasidic teachings by sermons and books. He laid the foundations of Ḥasidic literature, which in the last three decades of the eighteenth century spread with extraordinary rapidity among the Jewish masses in Poland and Russia.

The Ẓaddiḳim.

This development was favored by the decline in the economic condition of the Jews and by the political disturbances of the period owing to the partition of Poland. The renewed Haidamack movement in the Ukraine, which reached its height in 1768, reminded the Jews of the bloody epoch of Chmielnicki; and the disruption of Poland, which soon followed (1772-95), brought about the division of the entire Polish Jewry among three foreign governments, Russia, Austria, and Prussia, which paid little heed to the old patriarchal organization and communal autonomy of the Polish Jews. During this turbulent time the Jews listened eagerly to teachings which distracted their attention from the existing disturbances, and which lured them into the region of the mysterious and the supernatural. In Podolia, Volhynia, and in a portion of Galicia, Ḥasidism attracted entire communities. There arose everywhere Ḥasidic prayer-houses where service was held according to the system of Besht, with its ecstasies of prayer, its shoutings, and its bodily motions. The Ḥasidim introduced the prayer-book of the Palestinian cabalists ("Nusaḥ Ari"), which differed from the commonly accepted forms by various modifications in the text and in the arrangement of the prayers. They did not observe the hours for morning prayer, but held their service at a late hour; they made some changes in the mode of killing cattle; and dressed on Sabbath in white as symbolic of the purification of the soul. The Ḥasidim were, however, particularly noted for the exalted worship of their "holy" ẓaddiḳim. The logical result of Ḥasidism, Ẓaddiḳism in many places actually prepared the soil for it. The appearance of some miracle-working ẓaddiḳ very often led to the general conversion of the local inhabitants to Ḥasidism. Crowds of credulous men and women gathered around the ẓaddiḳ with requests for the healing of bodily ills, for blessings, for prognostications, or for advice in worldly matters. When the ẓaddiḳ succeeded in affording relief in one of the many cases, or gave fortunate advice, his fame as a miracle-worker was established, and the population of the district remained faithful to the cause of Ḥasidism.

Such were the conditions in South Russia. In the north, however, in Lithuania and in White Russia, Ḥasidism did not sweep entire communities one after another, but spread sporadically; and its adherents remained long in the condition of exclusive sectarians. Fearing the persecution of the powerful rabbis, the Lithuanian Ḥasidim often organized secret meetings where they prayed in their own way, held conversations, and read of the truth of Besht's teachings. Here the fundamental principles of Ḥasidism were acquired in a more conscious way, and less significance was attached to the cult of the Ẓaddiḳim.

In this way Ḥasidism gradually branched out into two main divisions: (1) in the Ukraine and in Galicia and (2) in Lithuania. The first of these divisions was directed by three disciples of Bär of Meseritz,

The Two Schools.

Elimelech of Lizianka, Levi Isaac of Berdychev, and Nahum of Chernobyl, besides the grandson of Besht, Baruch of Tulchin. Elimelech of Lizianka affirmed that belief in Ẓaddiḳism is a fundamental doctrine of Ḥasidism. In his book "No'am Elimelek" he conveys the idea that the ẓaddiḳ is the mediator between God and the common people, and that through him God sends to the faithful three earthly blessings, life, a livelihood, and children, on the condition, however, that the Ḥasidim support the ẓaddiḳ by pecuniary contributions ("pidyonim"), in order to enable the holy man to become completely absorbed in the contemplation of God.

Practically this teaching led to the contribution by the people of their last pennies toward the support of the ẓaddiḳ ("rebbe"), and the ẓaddiḳ untiringly "poured forth blessings on the earth, healed the sick, cured women of sterility," etc. The profitable vocation of ẓaddiḳ was made hereditary. There was a multiplication of ẓaddiḳ dynasties contesting for supremacy. The "cult of the righteous" as defined by Besht degenerated into a system of exploitation of the credulous. Baruch, the grandson of Besht, deriving an immense income from his adherents, led the life of a Polish lord. He had his own court and a numerous suite, including a court jester.

Ḥabad, or Rational Ḥasidism.

The Ḥasidic organization in Lithuania and in White Russia shaped itself along different lines. The teachings of Besht, brought thither from the south, adopted many features of the prevailing tendencies in contemporary rabbinism. The leading apostle of the northern Ḥasidim, Rabbi Zalman of Liozna (1747-1812), created the remarkable system of the so-called Rational Ḥasidism, or "Ḥabad" (the word "ḤaBaD" being formed of the first letters of the words "Ḥokmah," "Binah," "De'ah" = "wisdom," "understanding," "knowledge"). In his "Tanya" (Slavuta, 1796) and in his sermons he advocates an intelligent and not a blind faith, requiring from the Ḥasidim a certain mental preparation, and he assigns the cult of the Ẓaddiḳim a very modest place. In the system of Ḥabad the ẓaddiḳ appears more as a teacher than a miracle-worker. The teachings of Zalman were adapted to the comparatively advanced mental level of the Jewish masses of the northwestern region; and the inevitable process of degeneration which mystical doctrines ultimately underwent appeared here less prominently than in the south.

Opposition to Ḥasidism.

The rapid spread of Ḥasidism in the second half of the eighteenth century greatly troubled the Orthodox rabbis. Rabbinism from the very beginning recognized in it a dangerous enemy. The doctrine of Besht, claiming that man is saved through faith and not through mere religious knowledge, was strongly opposed to the principal dogma of rabbinism, which measures man's religious value by the extent of his Talmudic learning. The ritual formalism of Orthodoxy could not reconcile itself to modifications in the customary arrangement of the prayers and in the performance of some of the rites. Moreover, the Ḥasidic dogma of the necessity of maintaining a cheerful disposition, and the peculiar manner of awakening religious exaltation at the meetings of the sectarians—as, for instance, by the excessive use of spirituous liquors—inspired the ascetic rabbis with the belief that the new teachings induced moral laxity or coarse epicureanism. Still under the fear of the Shabbethaians and the Frankists, the rabbis suspected Ḥasidism of an intimate connection with these movements so dangerous to Judaism. An important factor in connection with this was the professional antagonism of the rabbis: they saw in the ẓaddiḳ a threatening competitor, a new type of the popular priest, who was fed by the superstition of the masses, and who acquired his popularity quickly.

In consequence of these facts a bitter struggle soon arose between rabbinical Orthodoxy and the Ḥasidim. At the head of the Orthodox party stood Elijah ben Solomon, the stern guardian of learned and ritualistic Judaism. In 1772, when the first secret circles of Ḥasidim appeared in Lithuania, the rabbinic "ḳahal" (council) of Wilna, with the approval of Elijah, arrested the local leaders of the sect, and excommunicated its adherents. Circulars were sent from Wilna to the rabbis of other communities calling upon them to make war upon the "godless sect." In many places cruel persecutions were instituted against the Ḥasidim. The appearance in 1780 of the first works of Ḥasidic literature (*e.g.*, the above-named book of Jacob Joseph Cohen, which was filled with attacks on rabbinism) created alarm among the Orthodox. At the council of rabbis held in the village of Zelva, government of Grodno, in 1781, it was resolved to uproot the destructive teachings of Besht. In the circulars issued by the council the faithful were ordered to expel the Ḥasidim from every Jewish community, to regard them as members of another faith, to hold no intercourse with them, not to intermarry with them, and not to bury their dead. The antagonists of Ḥasidism called themselves "Mitnaggedim" (Opponents); and to the present day this appellation still clings to those who have not joined the ranks of the Ḥasidim.

The "Mitnaggedim."

Ḥasidism in the south had established itself so firmly in the various communities that it had no fear of persecution. The main sufferers were the northern Ḥasidim. Their leader, Rabbi Zalman, attempted, but unsuccessfully, to allay the anger of the Mitnaggedim and of Elijah Gaon. On the death of the latter in 1797 the exasperation of the Mitnaggedim became so great that they resolved to denounce the leaders of the Ḥasidim to the Russian government as dangerous agitators and teachers of heresy. In consequence twenty-two representatives of the sect were arrested in Wilna and other places. Zalman himself was arrested at his court in Liozna and brought to St. Petersburg (1798). There he was kept in the fortress and was examined by a secret commission, but he and the other leaders were soon released by order of Paul I. The Ḥasidim remained, however, under "strong suspicion." Two years later Zalman was again transported to St. Petersburg, through the further denunciation of his antagonists, particularly of Abigdor, formerly rabbi of Pinsk. Immediately after the accession to the throne of Alexander I., however, the leader of the Ḥasidim was released, and was given full liberty to proclaim his religious teachings, which from the standpoint of the government were found to be utterly harmless (1801). Thereafter Zalman openly led the White-Russian or Ḥabad Ḥasidim until his death, toward the end of 1812. He had fled from the government of Moghilef to that of Poltava, in consequence of the French invasion.

The struggle of rabbinism with Ḥasidism in Lithuania and White Russia led only to the formation of the latter sect in those regions into separate religious organizations; these existing in many towns alongside of those of the Mitnaggedim. In the southwestern region, on the other hand, the Ḥasidim almost completely crowded out the Mitnaggedim, and the Ẓaddiḳim possessed themselves of that spiritual power over the people which formerly belonged to the rabbis.

Organization.

In the first half of the nineteenth century Ḥasidism spread unmolested, and reached its maximum development. About half of the Jewish population of Russia, as well as of Poland, Galicia, Rumania, and Hungary, professes Ḥasidic teachings and acknowledges the power of the Ẓaddiḳim. In Russia the existence of the Ḥasidim as a separate religious organization was legalized by the "Enactment Concerning the Jews" of 1804 (see RUSSIA).

The Ḥasidim had no central spiritual government. With the multiplication of the ẓaddiḳim their dioceses constantly diminished. Some ẓaddiḳim, however, gained a wide reputation, and attracted people from distant places. To the most important dynasties belonged that of Chernobyl (consisting of the descendants of Nahum of Chernobyl) in Little Russia; that of Ruzhin-Sadagura (including the descendants of Bär of Meseritz) in Podolia, Volhynia, and Galicia; that of Lyubavich (composed of the descendants of Zalman, bearing the family name "Schneersohn") in White Russia; and that of Lublin and Kotzk in the kingdom of Poland. There were also individual ẓaddiḳim not associated with the dynasties. In the first half of the nineteenth century there were well known among them: Motel of Chernobyl, Nachman of Bratzlav, Jacob Isaac of Lublin, Mendel of Lyubavich, and Israel of Luzhin. The last-named had such unlimited power over the Ḥasidim of the southwestern region that the government found it necessary to send him out of Russia (1850). He established himself in the Galician village of Sadagura on the Austrian frontier, whither the Ḥasidim continued to make pilgrimages to him and his successors.

Rabbinical Orthodoxy at this time had discontinued its struggle with Ḥasidism and had reconciled itself to the establishment of the latter as an accomplished fact. Gradually the Mitnaggedim and the Ḥasidim began to intermarry, which practise had formerly been strictly forbidden.

In the first quarter of the nineteenth century Ḥasidism met new opposition from the younger generation of intelligent Jews, who had received a modern education. The crusade against Ḥasidism was started by the Mendelssohnian school in Austria. The Galician writer Joseph Perl published in 1819 a bitter satire against the sect in the form of "Epistolæ Obscurorum Virorum" ("Megalleh Temirin"). He was followed in Russia by Isaac Bär Levinsohn of Kremenetz with his "Dibre Ẓaddiḳim" (1830). At times the embittered foes of Ḥasidism went so far as to urge the government (in Austria and Russia) to adopt repressive measures against the Ẓaddiḳim and the Ḥasidic literature. But at first none of these attacks could weaken the power of the Ḥasidim. They showed everywhere a more stubborn opposition to European culture than did rabbinical Orthodoxy; for they felt instinctively that free criticism was more dangerous to the mysticism of the Ẓaddiḳim than to Talmudic casuistry and ritualistic formalism.

Attacked by the Haskalah.

It was only in the second half of the nineteenth century, when the educational movement among the Russian Jews became stronger, that a period of stagnation and decline for Ḥasidism began. A considerable portion of the younger generation, under the influence of the new movement for enlightenment, repudiated Ḥasidism and began to struggle against the power of the Ẓaddiḳim. The enlightening literature of the HASKALAH attacked Ḥasidism with bitter satire, and the periodicals exposed the adventures of the miracle-working Ẓaddiḳim. Moreover, early in the second half of the century the Russian government instituted a police supervision over the numerous ẓaddiḳim within the Pale of Settlement, and limited their freedom of movement in order to counteract their propaganda. All of these blows, external and internal, together with the general decline of piety among certain classes of the Russian Jews, weakened the growth of Ḥasidism and Ẓaddiḳism. The decay of ẓaddiḳ dynasties and the impoverishment of the Ḥasidic literature became apparent.

Decline of the Movement.

Nevertheless Ḥasidism is so deeply grounded in Russo-Polish Judaism that it has proved impossible to uproot it. It still has its hundreds of thousands of adherents; and, although its development has been temporarily arrested, its vitality can not be doubted. Started as a counterpoise to rabbinical and ritual formalism, it still satisfies the religious requirements of the uneducated masses. In the last two decades of the nineteenth century, owing to a general social reaction in the life of the Russian Jews, a measure of revival was noticed in Ḥasidic circles. In the past ten years the administrative surveillance of the Ẓaddiḳim and the limitation of their movements have been abolished. The result has been a reenforcement of Ẓaddiḳism in some places, where it had been almost superseded. Though not producing at present any prominent personalities in literature or in communal life, Ḥasidism nourishes itself by its stored-up reserves of spiritual power. In the eighteenth century it was a great creative force which brought into stagnant rabbinical Judaism a fervent stream of religious enthusiasm. Under the influence of Ḥasidism the Russo-Polish Jew became brighter at heart but darker in intellect. In the nineteenth century, in its contact with European culture, it was more reactionary than rabbinism. The period of stagnation which it has lately passed through must, however, result in its gradual decay. After having been the object of apology or of vituperation in literature, Ḥasidism has become an object of scientific investigation.

H. R. S. M. D.

HASKALAH (lit. "wisdom" or "understanding," but used in Neo-Hebrew in the sense of "enlightenment," "liberalism"): Generally, "haskalah" indicates the beginning of the movement among the Jews about the end of the eighteenth century in Eastern Europe toward abandoning their exclusiveness and acquiring the knowledge, manners, and aspirations of the nations among whom they dwell. In a more restricted sense it denotes the study of Biblical Hebrew and of the poetical, scientific, and critical parts of Hebrew literature. It is identified with the substitution of the study of modern subjects for the study of the Talmud; with opposition to fanaticism, superstition, and Ḥasidism; with the adoption by Jews of agriculture and handicrafts; and with a desire to keep in touch with the times. Its adherents are commonly called Maskilim.

As long as the Jews lived in segregated communities, and as long as all avenues of social intercourse with their Gentile neighbors were closed to them, the rabbi was the most influential, and often also the wealthiest, member of the Jewish community. To the offices of religion he added the functions of civil judge in all cases in which both parties were Jews, as well as other important administrative powers. The rabbinate was the highest aim of every Jewish youth, and the study of the Talmud was the means of obtaining that coveted position, or one of many other important communal distinctions.

The extraordinary success achieved by Moses Mendelssohn as a German popular philosopher and man of letters revealed hitherto unsuspected possibilities of influence for the cultured Jew. An exact knowledge of the German language was, of course, necessary to secure entrance into cultured German circles, and an excellent means of acquiring it was provided by Mendelssohn in his German translation of the Pentateuch. The familiar text of the Pentateuch, which for many centuries had served as a school-book in the earlier stages of a rabbinical education, became the bridge over which ambitious young Jews could pass to the great world of secular knowledge. The "bi'ur," or grammatical commentary (see Biurists), prepared under Mendelssohn's supervision, was designed to counteract the influence of the Talmudical or rabbinical method of exegesis, and, together with the translation, it became, as it were, the primer of haskalah.

Beginnings in Germany.

The haskalah movement began to spread in Germany in the last quarter of the eighteenth century. Wealthy Jews like the Friedländers and Daniel Itzig were its sponsors, Mendelssohn was its prototype, and Hartwig Wessely was its prophet. The latter's "Dibre Shalom we-Emet," an epistle to the Austrian Jews in which they were advised as to the best way to utilize the advantages extended to them by Emperor Joseph II. in his "Edict of Tolerance," became the program of haskalah. The attacks on that pamphlet were much more severe than those made on Mendelssohn's translation of the Pentateuch, and there is almost conclusive evidence that the "Dibre Shalom we-Emet" was publicly burned in Wilna by order, or at least with the consent, of Elijah Gaon ("Monatsschrift," xix. 478-480, xx. 465-468). These persecutions had the effect of assisting the movement. Wessely found defenders among liberal Judæo-German scholars and among Italian rabbis, and his apologetic writings strengthened the hands of his followers. The friends of Hebrew literature soon formed a society (Ḥebrat Doreshe Leshon 'Eber) for the purpose of publishing the first Hebrew literary monthly, which appeared in 1783 under the name Ha-Meassef (see Meassefim).

Spread to Slavonic Countries.

In Germany the first generation of haskalah was also the last. Jews of ability soon attained prominence in the social and intellectual life of the German nation, and the salon proved more attractive to them than the "Meassef." The "friends of Hebrew literature" soon tired of Hebrew, and changed their name to "Shoḥare ha-Ṭob weha-Tushiyyah" (Verein für Gutes und Edles; 1787). The formation respectively of the Gesellschaft der Freunde (1792) and the Verein für Cultur und Wissenschaft des Judenthums (1821), in Berlin, marked the passing of a large proportion of intelligent German Jews from haskalah to assimilation, and, in many instances, to Christianity. Polish and Bohemian Jews like Israel Samoscz, Herz Homberg, Isaac Satanow, and Solomon Dubno stood at the cradle of the haskalah, and when they returned to Poland (as did the above-named, with the exception of Satanow) they spread its tenets among their coreligionists, who had been up to that time strict Rabbinists. The "battle between light and darkness," as the Maskilim fondly described their movement, was soon raging in Bohemia and Galicia, spreading later to Russia. But the hopes of speedy emancipation awakened by the premature liberalism of Joseph II. were not fulfilled, and the haskalah, which was transitory in Prussia, took root in the Austrian dominions. In Bohemia the conflict was less severe, because many rabbis there recognized the utility of secular learning and encouraged the modern spirit (see Fuenn, "Safah le-Ne'emanim," pp. 109 *et seq.*, Wilna, 1881). The Jeiteles family, and men like Peter Beer, did much for Bohemian haskalah, and the printing-office of Moses Landau in Prague, like the earlier establishment of the "Ḥinnuk Ne'arim" in Berlin under Satanow, issued valuable contributions toward a rejuvenated literature. In Prague, as in other Austrian localities where the German influence was strong, the movement soon took almost the same course as in Germany, and the second period of haskalah therefore really belonged to the least Germanized portion of the empire—the province of Galicia.

In Galicia.

The condition of the Jews of Galicia, already deplorable, was made worse by the partition of Poland, and the haskalah movement was introduced in Galicia in such manner as to almost justify the view that it was one of the afflictions due to the new régime. Herz Homberg, the friend of Mendelssohn, was the chief inspector of all the schools established for the Jews in Galicia. The teachers under him were mostly Bohemian Jews, and, with the assistance of the Bohemian Christians, who then almost monopolized the governmental positions in Galicia, they forced the Jews to study Hebrew and German in accordance with the program of the Berlin haskalah. But there soon arose other forces which exerted an attracting influence. The reformative work of Joseph Perl, and his clever anti-Ḥasidic writings, paved the way for a revival of Hebrew literature, and continued the work of the Meassefim. The speculations of Nachman Krochmal, and the investigations of S. L. Rapoport, as well as the excellent writings of Erter, Samson Bloch, and their contemporaries, attracted many followers and imitators whose love for the Hebrew language was disinterested and who worked for haskalah without expectation of reward. The small bands of Maskilim in the various communities were encouraged by wealthy men of liberal tendencies, who cherished the haskalah and assisted the dissemination of its literature, which otherwise could not have supported itself. Thus such periodical, or collective, publications as the "Kerem Ḥemed" and "Oẓar Neḥmad" were published by men who had no thought of financially profiting thereby. The same can be said of Schorr's "He-Ḥaluẓ." At the present time (1903) scholars like Lauterbach, Buber, and other Maskilim of means, are the leaders of the Galician haskalah; it is almost exclusively a literary movement, and its output properly belongs to Neo-Hebrew literature.

In Russia.

In the Russian movement the influence of Elijah Gaon of Wilna and of his school was very small in all directions, and in some respects was hostile to haskalah. Mendel Levin of Satanov (1741?–1819) may be considered the first of Russian Maskilim. He was, like Herz Homberg, a personal friend and follower of Mendelssohn; but as he had not the authority which Homberg enjoyed in Galicia, he could do neither as much good nor as much mischief. The direction of the influence exerted by Solomon Dubno is more doubtful; after he had left Mendelssohn and settled in Wilna he seems to have become distinctly Orthodox (see Yatzkan, "Rabbenu Eliyahu me-Wilna," pp. 118-120, Warsaw, 1900). Tobias Feder, Manasseh Iliyer, Asher Ginzberg, and perhaps also Baruch of Shklov, may be classed among the earliest Maskilim of Russia. Besides these there was a number of men of wealth and position in various cities, especially in southern Russia, who were friendly toward the Berlin haskalah, and encouraged its spread in their respective localities. Hirsch Rabinovich and Abigdor Wolkenstein of Berdychev, Hirsch Segal in Rovno, Leibush Khari in Meseritz (Mezhirechye), Berl Löb Stockfish in Lutzk, Meïr Reich in Bar, Joshua Hornstein in Proskurov, and Mordecai Levinson in Kamenetz-Podolsk were influential in their own circles, and to some extent leaders toward liberalism (Gottlober, in "Ha-Boḳer Or," iv. 783). But they had no plan or program, nor anything to guide them except the example of Mendelssohn; they contented themselves with studying Hebrew and a little German, and with ridiculing the Ḥasidim, who in their turn denounced them as "apiḳoresim," or heretics.

Influence on Education.

Thus the haskalah, which served in Germany as a stepping-stone to secular culture, and in Austria led to the enjoyment of minor advantages, in Russia almost involved ostracism. The Maskil was estranged and often persecuted in the Jewish community, and met with neither sympathy nor recognition in the outside world, where he was entirely unknown. Nevertheless, the number of Maskilim constantly increased, and soon attempts were made to found schools where children could obtain an education more in accordance with the principles of haskalah than was provided by the "ḥeder." Hirsch (Hyman) Baer Hurwitz (later professor of Hebrew in University College, London), of Uman in the Ukraine, opened in that city, in 1822, the first secular Jewish school in Russia, to be conducted, as he expressly stated in his application for permission to establish it, "after the system of Mendelssohn." His example was followed in other cities, especially in those of New Russia, where Jews had been treated liberally since 1764, when the country was opened to them, and where "merchants from Brody and teachers from Tarnopol" had planted the seed of Galician haskalah. Similar schools were established in Odessa and Kishinef, and later in Riga (1839) and Wilna (1841). But as far as haskalah in the restricted sense is concerned, the attempt failed in these schools, as well as in the rabbinical schools established later. Haskalah has not evolved a plan applicable in systematically conducted schools. The teachers who were autodidacts remained the greatest Maskilim. The pupils, with very few exceptions, abandoned Hebrew studies as soon as they had acquired a thorough knowledge of Russian and other living languages, which were taught by non-Maskilim and often by non-Jews.

The Russian haskalah found a leader and spokesman in Isaac Bär Levinsohn. His "Te'udah be-Yisrael," which became the program of haskalah, is in essence an amplified "Dibre Shalom we-Emet," supported by a wealth of quotations. Though this work, like most of the others by the same author, was intended to convince the old generation, the Orthodox, of the utility and the legality of haskalah from the religious point of view, it convinced only the young (see Mandelstamm's letter to Levinsohn in Nathanson's "Sefer Zikronot," p. 81, Warsaw, 1875); and the approbation of that work by R. Abraham Abele Posveller, the great Talmudical authority of Wilna, is believed to have been given for political reasons (Yatzkan, *l.c.* p. 119). Levinsohn's works helped to solidify the ranks of the Maskilim and to increase their number. The issue was now joined between the progressists and the conservatives, and persecutions of the weaker side were not unknown. The masses and most of the communal leaders were on the conservative side; but when the

Russian government began to introduce secular education among the Jews it unwittingly turned the scale in favor of the Maskilim, of whom it knew very little.

Lilienthal and Uvarov.

Uvarov, minister of public instruction under Emperor Nicholas I., worked out all his plans for Jewish education under the influence of Maskilim like Nissen Rosenthal of Wilna, and of men, like Max Lilienthal, who were inspired by them. The abandonment of the Talmud and the study of Hebrew and German were the basis of Uvarov's schemes and the cause of their ultimate failure. But they gave official sanction to the program of haskalah; and Lilienthal, who was sent by Uvarov to visit Jewish communities to induce them to establish schools, is aptly designated by Weissberg as "an emissary of haskalah." He was received joyously by Maskilim as one clothed with governmental authority to carry out their plans, and was glorified by them to the point of absurdity. Lilienthal apprised Uvarov of the existence of groups of Hebrew scholars and friends of progress in many cities, and Uvarov, who until then had thought all Russian Jews ignorant and fanatical, perceived that these Maskilim could be employed as teachers in the schools which he was about to establish. He accordingly gave up the plan of importing from Germany the several hundred Jewish teachers to whom Lilienthal had practically promised positions. This action on the part of Uvarov was resented by Lilienthal, and seems to have been the reason for his departure for America (1845).

But although Leon Mandelstamm, who was commissioned by the government to continue the work of Lilienthal, was one of the Maskilim, the cause of haskalah was not materially strengthened by the establishment of primary and rabbinical schools, except in so far as they provided teaching positions for Maskilim. The oppressive candle-tax, instituted to support these schools, and the other severe measures against the Jews taken simultaneously with the efforts to educate them, aroused indignation against haskalah. Later, when the more liberal policy of Alexander II. opened new prospects to the Jew with a good Russian education, the Maskilim with their Hebrew and German lost their hold even on the younger generation. The schools in Wilna and Jitomir, in which the ideals of haskalah were to be realized, went from bad to worse. The Maskilim could not control the situation for reasons which are best indicated by the fact that among the twenty-one representatives of the Jewish community of Wilna (the center of haskalah in northwestern Russia for half a century) who waited on Governor-General Nazimov in 1857, there was not one who could intelligently state in Russian his complaints in regard to the mismanagement of the rabbinical schools (Benjacob, in his letter to Levinsohn in Atlas' "Ha-Kerem," p. 54, Warsaw, 1887).

The Society for Culture.

The Russian haskalah movement, as an educational force, culminated in the Society for the Promotion of Culture Among the Jews in Russia (1863). The men at the head of that society modified the old Mendelssohnian program to suit Russian conditions, and thereby rendered invaluable service to the cause of education. The mild and cautious attempts at religious reform, as exemplified by the "Berliner Schul" of Wilna and "Chorschulen" (modernized synagogues) in most of the larger towns in Russia, are also due to the progressive movement. But its greatest achievement is the creation of a Neo-Hebrew literature and a large Neo-Hebrew reading public. The difficulties encountered by Jews in their efforts to obtain a good secular education and the inadequacy of school accommodations caused them, in that thirst for knowledge which distinguishes the Russian Jews, to turn to Hebrew studies, often to the exclusion of more useful subjects. The works of the masters of Jewish literature went through many editions, and of some of them, as Mapu's "Ahabat Ẓiyyon," hundreds of thousands of copies were sold. The activity of the Hebrew periodical press, and of large publishing-houses which provide work for a host of comparatively well-paid writers, has done much to stimulate haskalah in Russia.

The only movement in Russian Judaism and in Neo-Hebrew literature which has affected, and to some extent transformed, haskalah is the nationalistic. It really began with Peter Smolenskin, who rebelled against the old indefinite program and against Mendelssohn himself. As the situation of the Jews became worse, and the hope of emancipation almost disappeared, the Maskilim, with few exceptions, joined the national movement, and "haskalah" became almost synonymous with "Zionism." Still, the change is more apparent than real. The foremost Maskil of to-day, Asher Ginzberg, as the leader of the Culture-Zionists, advocates the harmonization of Jewish with general culture by means of the Hebrew language; this, except for the nationalistic tendency, is in essence the old program of Wessely and the Berlin school of haskalah. See Education; Levinsohn, Isaac Bär; Literature, Neo-Hebraic; Maskilim; Mendelssohn, Moses; Rabbinical Schools in Russia; Wessely, Hartwig.

HASMONEANS: The family name of the Hasmonean dynasty originates with the ancestor of the house, 'Ασαμωναῖος (Josephus, "Ant." xii. 6, § 1; xiv. 16, § 4; xvi. 7, § 1) = חשמונאי or חשמוני (Middot i. 6; Targ. Yer. to I Sam. ii. 4), who, according to Wellhausen ("Pharisäer und Sadducäer," note 94), is said to have been the grandfather of Mattathias. The high-priestly and princely dignity of the Hasmoneans was founded by a resolution, adopted in Sept., 141 B.C., at a large assembly "of the priests and the people and of the elders of the land, to the effect that Simon should be their leader and high priest forever, until there should arise a faithful prophet" (I Macc. xiv. 41).

Recognition of the new dynasty by the Romans was accorded by the Senate about 139 B.C., when the delegation of Simon was in Rome. Therefore, from a historic point of view, one can speak of a Hasmonean dynasty only as beginning with Simon.

When Jonathan the Maccabee fell into the power of Tryphon, Simon, his brother, assumed the leadership (142), and after the murder of Jonathan took the latter's place. Simon, who had made the Jewish people entirely independent of the Syrians, reigned from 142 to 135. In Feb., 135, he was assassinated at the instigation of his son-in-law Ptolemy.

Simon was followed by his third son, John Hyrcanus, whose two elder brothers, Mattathias and Judah, had been murdered, together with their father. John Hyrcanus ruled from 135 to 104. According to his directions, the government of the country after his death was to be placed in the hands of his wife, and Aristobulus, the eldest of his five sons, was to receive only the high-priesthood. Aristobulus, who was not satisfied with this, cast his mother into prison and allowed her to starve there. By this means he came into the possession of the throne, which, however, he did not long enjoy, as after a year's reign he died of a painful illness (103).

Aristobulus' successor was his eldest brother, Alexander Jannæus, who, together with his two brothers, was freed from prison by the widow of Aristobulus. Alexander reigned from 103 to 76, and died during the siege of the fortress Ragaba.

Alexander was followed by his wife Alexandra, who reigned from 76 to 67.

Against her wishes, she was succeeded by her son Aristobulus II. (67–63), who during the illness of his mother had risen against her, in order to prevent the succession of the elder son, Hyrcanus.

During the reign of Alexandra, Hyrcanus had held the office of high priest, and the rivalry between him and Aristobulus brought about a civil war, which ended with the forfeiture of the freedom of the Jewish people. Palestine had to pay tribute to Rome and was placed under the supervision of the Roman governor of Syria. From 63 to 40 the government was in the hands of Hyrcanus II.

After the capture of Hyrcanus by the Parthians, Antigonus, a son of Aristobulus, became king (40–37). His Hebrew name was Mattathias, and he bore the double title of king and high priest.

After the victory of Herod over Antigonus and the execution in Antioch of the latter by order of Antony, Herod the Great (37–4) became king of the Jews, and the rule of the Hasmonean dynasty was ended.

HASSENAAH: The sons of Hassenaah rebuilt the fish-gate in the wall of Jerusalem (Neh. iii. 3). The name occurs twice (Ezra ii. 35 and Neh. vii. 38) without the definite article, while in Neh. xi. 9 (R. V.) and I Chron. ix. 7 (R. V.) it occurs in the form of "Hassenuah." See Cheyne and Black, "Encyc. Bibl."

E. G. H. M. SEL.

HASSLER, SIMON: American musician; born in Bavaria July 25, 1832; died in Philadelphia, Pa., Jan. 25, 1901; son of Henry Hassler, also a musician, who, with his family, emigrated to the United States in 1842. Simon received a sound musical education, and in 1852 made his first public appearance as a violinist. He became a member of the orchestra which his father had established in Philadelphia, and later succeeded to its leadership. From 1865 to 1872 he was leader of the orchestra at the Walnut Street Theater in the same city, and subsequently of the Chestnut Street Theater and of the Chestnut Street Opera-House. He was chosen to direct the orchestra at the Centennial Exposition at Philadelphia in 1876, and conducted at many festivals.

Hassler composed music for Shakespeare's plays, numerous marches, and other orchestral pieces.

A. A. P.

HAST, MARCUS: London cantor and composer; born at Warsaw in 1840. In 1864 he went to Germany to study music, and on his arrival at Breslau was appointed cantor at the chief Orthodox synagogue. While at Breslau he gave instruction to many cantors since conspicuous for their merit, among them Rosenthal (Berlin), Birnbaum (Königsberg), Grützhändler (Warsaw), Goldberg, and Ziegelroth. In 1871 he was chosen to succeed Simon Ascher as chief cantor of the Great Synagogue, London.

Hast has since published a large number of transcriptions of Hebrew melodies as well as many original compositions, achieving marked success with his numerous synagogal "pièces d'occasion," most of them for chorus and orchestra. Among his published works are: "The Divine Service" (1873); "Bostanai," a dramatic sacred cantata (1876); "Azariah," an oratorio, produced at Glasgow (1883); "The Death of Moses," performed at Queen's Hall, London (1897); "The Fall of Jerusalem" (1901); the Seventy-second Psalm; "Victoria," a cantata.

HA-TOR. See Periodicals.

HATRA'AH: Caution or warning given to those who are about to commit a crime. The Rabbis consider the fact that not all men are lawyers (comp. "Yad Malaki," Din 24), and therefore many sin through ignorance or error. To prove guilty intention, which alone can render one amenable to the full penalty for his crime, the Rabbis provide that, prior to the perpetration of a crime, the one who is about to perpetrate it must have been cautioned of the gravity of his project (Sanh. v. 1, 8b; Mak. 6b). This proviso they try to deduce (probably only in the way of "support") from certain peculiar expressions and phrases used by Scripture in connection with various crimes and their punishments (Sanh. 40b).

The caution has to be administered immediately before the commission of the crime (Sanh. 40b; Maimonides, "Yad," Sanhedrin, xii. 2), and, according to the better opinion of the legists, alike to the scholar and to the layman, since by this caution alone may the court be enabled to distinguish between error and presumption (Sanh. 8b; "Yad," *l.c.* xiv. 4). The caution must name the particular punishment which the commission of the contemplated misdemeanor entails—whether corporal or capital. If the latter, the particular mode of death (see Capital Punishment) has to be mentioned, or the legal penalty attached to the crime can not be imposed (Sanh. 8b; Mak. 16a).

Diverse Operations of the Caution.

Besides establishing guilty intention on the part of the culprit, this proviso operates in diverse directions. (*a*) It serves the court as a guide in passing sentence on one convicted of aggravated or continuous misdemeanor. For instance: A Nazarite (Num. vi. 2–4; Naz. i. 2, 3b) subjects himself to the penalty of flagellation if he violates his vow of abstemiousness by drinking a certain measure (¼ log) of wine (Naz. vi. 1, 34b; "Yad," Nezirot, v. 2). In case he is guilty of drinking several such measures in succession, how is he to be punished? The preliminary caution decides. If it is legally proved that due warning had been administered to him before each drink, he is punishable for each drink separately; otherwise, if he was forewarned once only, he is punishable for one violation only (Naz. vi. 4, 42b; Mak. iii. 7). (*b*) In passing sentence on one convicted of an offense entailing both corporal and capital punishment, the preliminary caution serves the court as an index to the penalty to be imposed. For example: The Bible (Lev. xxii. 28) forbids the killing of a cow or a ewe "and her young both in one day"; and rabbinic law imposes the penalty of flagellation on the violator of this prohibition (Ḥul. v. 3, 78a, 82a). Another law imposes the penalty of death on the Jewish idolater (Deut. xvii. 5; Sanh. vii. 4). When both of these transgressions are committed simultaneously, as when one slaughters an animal and its young in one day as an offering to an idol, the question is, Which penalty does he incur? Both he may not receive; for rabbinic law prohibits the administration of more than one punishment for any one offense (Mak. 13b). Which, then, should the court impose here? Again the warning decides. If it is proved that the culprit was warned of the death-penalty, a sentence of death will be awarded; if flagellation only was mentioned in the warning, flagellation will be administered (Ḥul. 81b). (*c*) Where a convict incurs two capital punishments, the one mentioned in the warning is administered. For instance: The law punishes the crime of adultery with death by strangulation (Lev. xx. 10; Sanh. xi. 1; see Capital Punishment), and that of criminal conversation with one's own mother-in-law with death by burning (Lev. xviii. 17; Sanh. ix. 1; see Capital Punishment). If one is charged with having had criminal conversation with a married woman, and that woman is his mother-in-law, the penalty will depend upon the import of the antecedent caution. Where he was forewarned that the consummation of his project will be adultery, entailing the penalty of strangulation, he will be strangled; but where the warning stated that the crime would amount to that species of incest entailing burning, the more severe death will be awarded (Sanh. ix. 4, 81a; Yeb. 32a).

Between Two Deaths.

From the benefit of this proviso rabbinic law excludes the false witness (Deut. xix. 19; Mak. 4b) and the instigator to idolatry (Deut. xiii. 2–10; Sanh. vii. 10, 67a): the first because the nature of the crime does not admit of forewarning (Ket. 33a); and the latter because of the heinousness of the crime in a theocratic commonwealth (see Abetment). The burglar is also excluded from its operation (see Homicide), his crime of breaking in being his warning (Ket. 34b; Sanh. 72b). So are all those excluded who are guilty of misdeeds for the commission of which the Mosaic law prescribes the penalty of excision (כרת; Mak. 13b).

S. S. S. M.

HATRED (שנאה): Feeling of bitter hostility and antagonism toward others. It is intrinsically wrong when the good is hated, but it is proper to hate the evil. The Decalogue speaks of those that hate God (Ex. xx. 5; Deut. v. 9); so also Num. x. 35; Deut. vii. 10, xxxii. 41; Ps. lxxxiii. 3 (A.V. 2). To hate such persons is declared by the Psalmist to be meritorious (Ps. cxxxix. 21–22); for they are the wicked ones that "hate instruction" (Ps. l. 17), "right" (Job xxxiv. 17), "knowledge" (Prov. i. 22, 29), and "him that rebuketh in the gate" (Amos v. 10). The prophet expressly admonishes men to "hate the evil and love the good," in order to "establish judgment in the gate" (Amos v. 15). God Himself hates whatever is abominable or morally perverse (Deut. xii. 31, xvi. 22; Isa. i. 14, lxi. 8; Amos v. 21; Hos. ix. 15; Zech. viii. 17; Mal. ii. 16; Ps. v. 6 [5], xi. 5; Prov. vi. 16). Likewise men should "hate evil" (Ps. xcvii. 10; Prov. viii. 13), "covetousness" (Ex. xviii. 21), "wickedness" (Ps. xlv. 8 [7]), especially "every false way" (Ps. cxix. 104), and accordingly the congregations of "evil-doers" (Ps. xxvi. 5) and "them that regard lying vanities" (Ps. xxxi. 7 [6]).

Hatred is unbrotherly where love should prevail, and therefore the Law says, "Thou shalt not hate thy brother in thine heart" (Lev. xix. 17). This prohibition is not, as is often asserted with reference to Matt. v. 43 *et seq.*, confined to kinsmen (see BROTHERLY LOVE). Only idolaters and doers of evil are excluded from the universal law of love (Deut. vii. 2-10), whereas even an enemy's beast should be treated with kindness (Ex. xxiii. 5-6). One ought not to rejoice at the destruction of the man that hateth him (Job xxxi. 29; Prov. xxv. 21 *et seq.*). The hatred most frequently denounced in the Psalms is that caused by no wrong-doing on the part of the hated and persecuted one (Ps. xxxv. 19, lxix. 5 [4], cix. 5). It was this hatred without reason which caused the brothers of Joseph to do evil (Gen. xxxvii. 4).

"Hatred without cause" ("sine'at ḥinnam") is therefore the rabbinical term for the vice of hatred; and the Talmud is emphatic in denouncing it. On its account the Second Temple was destroyed (Yoma 9b). It undermines domestic peace (Shab. 32b). It is equal in wickedness to any one of the three capital sins (Yoma 9b). To leave no doubt as to the extent of the prohibition of hatred, the Rabbis use the term "sine'at ha-beriyyot" (hatred of fellow creatures; see CREATURE), and condemn such hatred as is detrimental to the welfare of mankind (Abot ii. 11). "Whosoever hateth his brother is a murderer," is Pharisaic as well as New Testament teaching (R. Eliezer in Derek Ereẓ Rabbah xiii. is prior to I John iii. 15). On the other hand, the Rabbis maintain the same sound view regarding the necessity of hatred of sin and of all things or persons of an evil character as that inculcated by the Old Testament. The impudent man who hates God should be hated (Ta'an. 7b). So should all those heretics and informers who alienate the people from their Father in heaven (Ab. R. N. xvi.; Shab. 116a), and he who is a wrong-doer in secret (Pes. 113b), for God Himself hates persons who lack modesty and purity of conduct (Nid. 16b) and indulge in lasciviousness (Sanh. 93a). Only those who deserve love are included in the command of love; those who are hated by God on account of their evil ways should be hated by men (Ab. R. N., after Ps. cxxxix. 21 *et seq.*).

K.

HATSEK, IGNAZ: Hungarian chartographer and engraver; born April 7, 1828, at Olmütz. He was educated in the public and the Jewish schools of his native town. During 1848 and 1849 he was lieutenant of the Honvéd artillery, and in 1851 became chartographer to the state surveying department of Hungary. This position he resigned in 1894, and since then he has lived in Budapest.

Among the many maps which he has drawn or etched during his forty-three years of active service may be mentioned: railroad maps of Austria-Hungary; an atlas containing maps of the comitats of Hungary; an atlas of the government of Hungary for the emperor; a special atlas of Hungary for the prince imperial.

S. F. T. H.

HATTARAT HORA'AH (lit. "permission to teach and decide"): A rabbinical diploma; a written certificate given to one who, after a thorough examination, proves himself competent and worthy to be a rabbi. It is a substitute for the "semikah," which could be conferred only in Palestine, by a member of the Sanhedrin. The hattarat hora'ah, unlike the Christian ordination, confers no sacred power, and is not a license; it is simply a testimonial of the ability of the holder to act as rabbi if elected. A community had, however, a perfect right to, and often did, elect a rabbi who had no diploma. The diploma was regarded as a merely formal document acquainting the people that the person named in it was fit to teach and to render decisions. A scholar who succeeded as principal of the yeshibah, or who acted as colleague of the rabbi, was not required to hold a diploma. Some authorities, however, require that a rabbi have a "degree" in order to be entitled to perform the rite of "ḥaliẓah" or to grant a divorce (annotations to Shulḥan 'Aruk, Yoreh De'ah, 242, 14).

The usual title of a Babylonian scholar was "Rab"; of one ordained in Palestine, "Rabbi." Later on the title "Rabbi" was indiscriminately used for every scholar who held a rabbinate. Thus the title "Rabbi" lost its value among the Ashkenazim. The Sephardim, however, still held it in respect as a mark of great learning. The ordinary scholar they called "ḥakam"; and the chief among them is called in Turkey "ḥakam bashi" (see David Messer Leon in "Kebod Ḥakamim," ed. Meḳiẓe Nirdamim, p. 63, Berlin, 1899).

The title "Moreh Hora'ah" (= "a guide for decisions"; Ket. 79a) is evidently derived from the degree of hattarat hora'ah. Jacob Möln (מהרי"ל; d. 1427) and his teacher, Shalom of Vienna, introduced into Germany the title "Morenu" (= "our guide and teacher") for one who obtained the quasi-semikah.

Accompanying Titles.

Don Isaac Abravanel (commentary to Ab. vi. 1) accuses the Ashkenazim of aping the Gentiles in using the title "Doctor" (Gans, "Ẓemaḥ Dawid," ed. Frankfort-on-the-Main, 1692, p. 42b).

The earliest form of hattarat hora'ah was called "iggeret reshut" (= "letter of permission") or "pitḳa de-dayyanuta" (= "writ of jurisdiction"). It was composed in Aramaic, in the geonic period of the ninth century, and read as follows:

> "We have appointed Peloni b. Peloni [*i.e.*, N, son of N] a justice in the town of . . . and have invested him with authority to administer the civil laws, and to supervise all matters relating to the Commandments and to things prohibited and permitted and to things connected with the fear of God. And whosoever will not obey the verdict, he (the judge) has authority to deal with him as he thinks proper. The miscreant is likewise liable to [the punishment of] Heaven" (geonic responsa "Zikkaron la-Rishonim," § 180; ed. Harkavy, iv. 80, Berlin, 1887).

This document, given by the principals of the

Babylonian yeshibot, was of an authoritative nature. It invested the recipient with full power to act, in his limited jurisdiction under the Greco-Roman or Persian rule, in matters of religion and civil law. The justice could compel a defendant to appear before him for judgment. But, unlike the justice who obtained the Palestinian semikah, he had no right to impose monetary fines ("ḳenas"), nor to inflict the regulation stripes ("malḳut"), much less capital punishment (Sanh. 31b). He could, however, at his discretion imprison and inflict light bodily punishment for various offenses. This quasi-semikah was kept up in Babylon during the Middle Ages.

The rabbinical diploma was known in the thirteenth century as "ketab masmik," *e.g.*, in the collection of Barzilai, "Sefer ha-Sheṭarot" (p. 131, Berlin, 1898). Maimonides speaks of Samuel ha-Levi as "the ordained rabbi of Bagdad" ("Iggeret ha-Rambam," art. "Resurrection") with more or less right of special jurisdiction. In Spain, where the king granted full privileges to the rabbis in accordance with the Jewish law, there was even a revival of the semikah right to inflict capital punishment. Asheri in 1325 says: "In all countries that I have heard of, except in Spain, the Jews have no penal jurisdiction; and I was surprised when I came here to find that they sentenced to capital punishment without a proper Sanhedrin" (Resp. Rosh, rule xvii. 8; comp. Graetz, "Hist." iv. 53).

Authority Congregational.

In any event, the hattarat hora'ah or quasi-semikah could not give personal power to the rabbi without the consent of the community; and such power was limited to the community that elected him and to his sphere of influence. Isaac b. Sheshet rendered a decision (1380) on this point in the case of the French community of Provence, which would not permit the interference of Meïr ha-Levi, chief rabbi in Germany, in its affairs (Responsa, Nos. 268-273; comp. Graetz, "Hist." vi. 152). Isaac b. Sheshet says it was the custom of the German and French rabbis to give diplomas to the disciples of their respective yeshibot and to recommend them for vacant rabbinical positions (*ib.*).

The hattarat hora'ah, although it invested the rabbis of Würzburg with special authority to inflict corporal (not capital) punishment within the limits of their jurisdiction, could not compel the defendant living in another town to appear before them. R. Joseph Colon (end of 15th cent.) decided that a plaintiff must bring suit in the defendant's town before the resident rabbi (J. Colon, Responsa, No. 1, beginning, Venice, 1519).

Samuel of Modena says: "No matter how superior a rabbi may be, he has no right to interfere in the district of another rabbi" (Responsa, iv. 14, Salonica, 1582; comp. "Bet Yosef" to Ṭur Ḥoshen Mishpaṭ, § 11).

Extent of Authority.

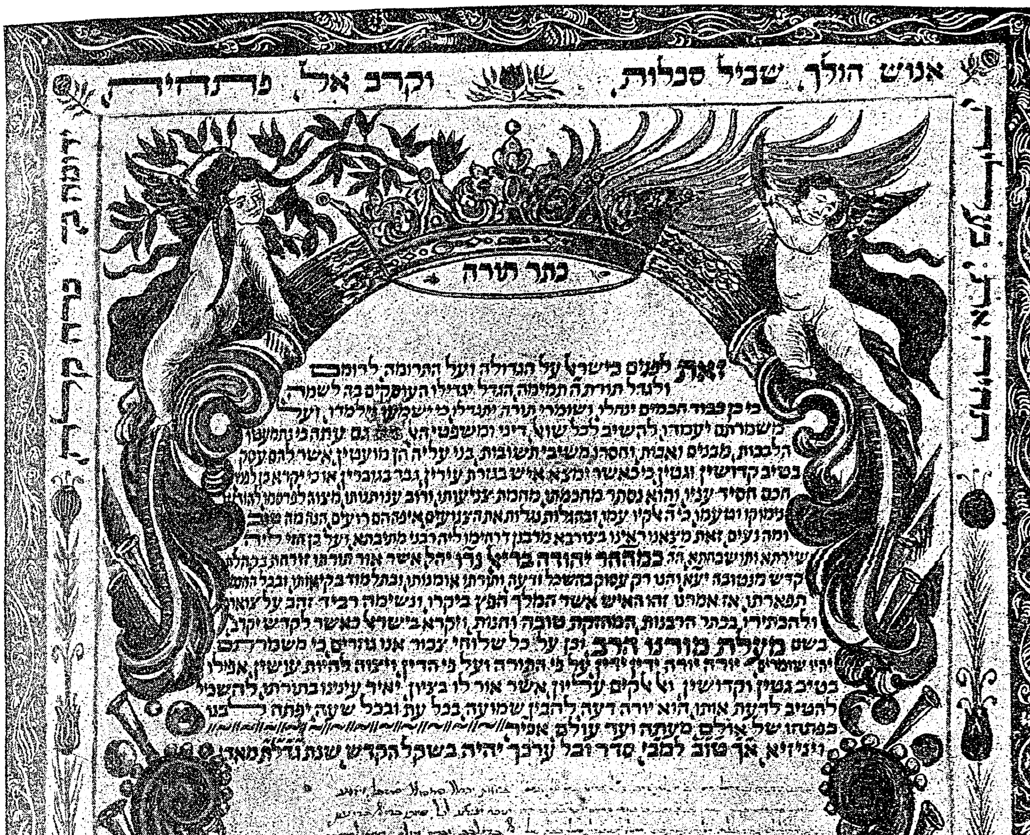
In the ordinance enacted at Ferrara by the rabbis of Italy (June 21, 1554), clause 4 provides that "outside rabbis shall not interdict or establish ordinances or in any way meddle in litigations occurring in the town of another rabbi, unless such rabbi voluntarily withdraws from the action. And in a place where the community has elected the rabbi, no other resident rabbi shall interfere with him without the consent of the community" ("Paḥad Yiẓḥaḳ," *s.v.* "Taw," p. 158a, Berlin, 1887). This "taḳḳanah" was applied by Samuel Archevolti in his decision quoted in "Palge Mayim," p. 15a (Salonica, 1608).

Even in the same city where there are various congregations, the rabbi elected in one can not interfere with another. David Messer de Leon, who received the highest degree of the quasi-semikah from Judah Müntz of Padua, and was elected by the Castilian Jews in Avlona in 1512, could not enforce a Sabbath prohibition among the Portuguese Jews in the same place; and in endeavoring to preach against them he was insulted by their parnas, Abraham de Collier. The rabbi used his prerogative to excommunicate the parnas. The matter was submitted to David ha-Kohen of Corfu, who decided in favor of De Leon in the main issue as a matter of law, and required of the offender to ask De Leon's pardon (Responsa, No. 22; ed. Salonica, 1803, pp. 80a-84a). And yet De Leon is blamed for forcing his views on the Sephardic community (Bernfeld, introduction to De Leon's "Kebod Ḥakamim," p. xv.).

Thus it is seen that the hattarat hora'ah does not absolutely confer authority on the rabbi, but grants it only subject to his being appointed, or his orders approved, by the community. For this reason the diploma of the modern semikah is more in the form of a certificate of recommendation. Although the phraseology is partly that of the original semikah used by Judah ha-Nasi I., יורה יורה ידין ידין (="he may teach; he may judge"), the teaching refers only to "issur we-hetter" (= "dietary and ritual laws"), and the judging to civil cases. The repetition of the words is employed to emphasize the ordination. Other phrases are: כל מן דין סמיכא לנו (="all like him we ordain"), and מתון ומשיג שמעתתא אליבא דהלכתא (="he is careful, and reaches decisions in accordance with the law"). These phrases usually occur after a short introduction referring to the recipient's learning and character and his general fitness as a leader of a community.

Age and Qualifications of Holder.

The proper age to receive the semikah or the hattarat hora'ah is eighteen years or more. Eleazar b. Azariah was elected chief rabbi when eighteen years old (Ber. 28a). Rabbah was ordained at the same age, and kept his position for twenty-two years. He died at the age of forty (*ib.* 64a; Yeb. 105a). Hai Gaon, also, was ordained at eighteen. David Messer de Leon received his degree at eighteen, at Neapolis ("Kebod Ḥakamim," p. 64). The question what degree of learning entitles a scholar to receive the diploma is fully discussed by De Leon in his "Kebod Ḥakamim." It is necessary for the student to be master of the original sources of Bible and Talmud and to possess a logical reasoning power. Such a scholar was known as "Sinai" (*i.e.*, "the first source") and was called "the master of wheat," in contradistinction and as being superior to the student who possessed rather a capacity for pilpulistic argumentations and who was known as the "mountain-raiser" (Ber. 64a). Isaac b. Sheshet quotes the



אנוש הולך שביל סבלות וקרב אל פתחיה

כתר תורה

זאת לעם בישראל על הגדולה ועל התרומה לרוממם
ולגדל תורת ה׳ תמימה הגדל יגדילו העוסקים בה לשמה

Rabbinical Diploma of the Seventeenth Century.

(In the possession of E. N. Adler.)

responsum of Asheri against those who decide blindly by Maimonides' code without having a thorough knowledge of the Talmud; and as an example he refers to a great man of Barcelona who admitted that he could not comprehend the Yad ha-Ḥazaḳah on Zera'im and Ḳodashim because he had not a sufficient knowledge of the sources of these halakot and of the respective treatises in the Talmud (Responsa, No. 44, end).

David ha-Kohen of Corfu complains bitterly against those rabbis who "ride on the horse of rabbinism" and who render decisions without seeing the light of the Talmud or the light of wisdom, but have the gift of the tongue to raise themselves up to the high position (Responsa, xxii. 80a). Other authorities complain of the appointment of rabbis through the action of the government, or through the influence of money, when the appointees do not possess the necessary qualifications of a rabbi (J. Weil, Responsa, No. 68; see Yer. Bik. iii. 3; Sanh. 7b).

Orthodox congregations recognize a hattarat hora'ah only when issued by a rabbi of acknowledged authority who has personally examined the candidate.

The following is a copy of the diploma given by Rabbi Isaac Elhanan Spector of Kovno (d. 1896), from whom most of the Russian rabbis now hold the hattarat hora'ah:

קושט אמרי אמת ניתן לכתוב. על האי גברא יקירא הרב . יליד
. . . ופלפלתי עמו הרבה והוא מלא דבר ה׳ בש״ס ובפוסקים. וגם
הנהו דרשן מפואר נאה דורש ונאה מקיים: ובכן אמר ייע״ר כהו והילו
לאורייתא. ויורה יורה ידין ידין. בד״מ ואו״ה וגו״ה וטו״ה (בדיני
ממונות ואיס״ר והית״ר וגיטין והליצה וטומאה וטהרה): ויהא רעוא
שישלח לו הרחמן מקום מכובד לפי כבודו. כי ראוי והגון הרב הנ״ל
לנהל צאן קדשים: ובאתי עה״ח יום . ימים לחדש . . לפ״ק:
נאם יצחק אלחנן החופ״ק קאוונע:

[TRANSLATION.]

"Verily, these words of truth may be ascribed to that worthy man, the rabbi . . . , a native of . . . , with whom I have discussed fully, and [found] he is filled with the Word of the Lord in Talmud and in the Codes. He is also an excellent preacher, preaching what is moral and practising the morals he preaches. Therefore I say: Let his power and might in the Torah be encouraged. Let him teach and decide in matters of monetary law; dietary and rituals; geṭ and ḥaliẓah rites; laws relating to pure and impure. And may it be the will of the Merciful to secure him an honorable position according to his honor. As the said rabbi deserves and is able to lead a holy community [lit. "sheep"], I have signed this week-day, . . . , day in month, . . . , and year, . . .

"So says Isaac Elhanan, who dwells with the holy congregation of Kovno."

This form of degree pronounces the holder to be a full-fledged rabbi ("rosh ab bet din" = "the chief of bet din"), while a simple hattarat hora'ah is sometimes given to a dayyan or moreh hora'ah permitting him to render decisions only in dietary and ritual laws ("issur we-hetter"), in which case the limitation is so specified. The certificate given to a shoḥeṭ permitting him to slaughter animals or fowls for kasher meat is designated "ḳabbalah" (= "accepting [authority]").

Graduates from modern rabbinical seminaries, such as those at Breslau and Budapest, receive not only a hattarat hora'ah signed by the professor of Talmudics, but also a diploma in the vernacular.

As an example of a hattarat hora'ah of the Liberal school, that given by Chorin to Zunz, on Nov. 18, 1834, may be cited. The document reads:

A Reform Diploma.

"Before the Congregation, I thank God for His goodness in gratifying my perpetual desire, that the wise in Israel may take to heart the words of our great master Maimonides, to reconcile the Mosaic Law with philosophy, that truth and peace, goodness and virtue, may be spread and fortified. Praised be God that I have now found a highly learned and wise man, well versed in the Jewish Law, and in other useful branches of science; for all these are combined in my dear friend Leopold Zunz. I therefore ordain him to be a rabbi, and empower him with the right to act and decide in matters pertaining to permissions and prohibitions, and especially in matters of marriage and divorce, in accordance with his wisdom and thorough knowledge of the Mosaic Law. With this, he assumes the duty of teaching the Jewish community, by preaching reverence to God, and drawing men nearer to His teachings and His commandments. May our Father in Heaven support him, and grant him strength in his position, that he may reflect honor on all Israel.

"*Aaron Chorin*, Chief Rabbi."

The following diploma is that issued by the Hebrew Union College at Cincinnati:

American Diploma.

"By authority of the State of Ohio, and the Union of American Hebrew Congregations, We, the Faculty and the Board of Governors of this Hebrew Union College, hereby testify that the possessor of this Diploma, . . . , was a regular and successful student of the Rabbinical Course of this College, and of the Academic Course of the University of Cincinnati; and, furthermore, that, at the Regular Final Examination in June, . . . , he proved his competency and worthiness to receive the honors of this College. Therefore, We confer on him the Degree and Title of Rabbi, to be known hereafter as Rabbi . . . , ordained and licensed to perform all Rabbinical functions in the name of God and Israel. In Testimony Whereof, We have appended our names and the seals of the Hebrew Union College and the Union of American Hebrew Congregations.

"Done in the City of Cincinnati, Hamilton County, State of Ohio, this . . . day of . . . , in the year . . . A.M. (. . . C.E.)."

To this are appended the signatures of the president and secretary of the Union of American Hebrew Congregations and of the president and faculty, and the president and secretary of the board of governors, of the Hebrew Union College. This diploma is divided into two columns, English in one, Hebrew in the other, the Hebrew being specific as to the examination of the graduate in Bible, Mishnah, Gemara, Halakah, Haggadah, Biblical exegesis, philosophy, Jewish history, and the grammar of Hebrew and of the allied languages. It further certifies that the graduate has preached satisfactorily in public, and has written an acceptable thesis on Jewish literature, and includes the formula **יורה יורה ידין ידין**.

S. S. J. D. E.

HATTUSH (חטוש): **1.** Son of Shemaiah, a descendant of the kings of Judah, in the fifth generation from Zerubbabel (I Chron. iii. 22). He returned with Zerubbabel and Ezra from Babylon to Jerusalem (Ezra viii. 2; Neh. xii. 2), and was one of those who sealed the covenant with Nehemiah (Neh. x. 5). **2.** Son of Hashabniah; helped Nehemiah to repair the wall of Jerusalem (Neh. iii. 10). Probably the Hattush referred to is the same in both cases.

HAURAN (חורן; in cuneiform inscriptions, "Ḥaurina"; LXX. Αὐρανῖτις; Arabic, "Ḥauran"(: A region east of the Jordan and north of Gilead, reaching east to the desert. It is mentioned in Ezek. xlvii. 16, 18, in connection with the eastern border of the land of Israel, as the land between Damascus and Gilead. The homonymous mountain Hauran (חוורן and חברן) is mentioned in the Mishnah (R. H. ii. 4) as one of the stations upon which fire-signals were given in order to announce the new-moon and festival days to the Jewish inhabitants of Babylonia. See PALESTINE.

HAUSEN, MOSES BEN ASHER ANSHEL: Danish Talmudic scholar: born at Copenhagen 1752; died June 28, 1782. He wrote a work entitled "Ḳaran Or Pene Mosheh," a homiletic commentary to Genesis (Hamburg, 1787). Zedner and Benjacob attribute the authorship of this work to a Meïr b. Isaac, also of Copenhagen; while Azulai ("Shem ha-Gedolim," ii. 132) says that the author's name is not mentioned.

K. M. SEL.

HAUSER, CARL FRANKL: American humorist and writer; born Dec. 27, 1847, at Janoshaza, Hungary; received a rudimentary secular and Talmudic education at home. At Vienna, where he had engaged in business, he obtained a free scholarship at the Theater Academy. Subsequently (1872) he accepted engagements with the Vienna Stadttheater (with which he remained over two years) and with the Duke of Meiningen's troupe at Berlin (1875). Toward the close of 1875 he emigrated to the United States and settled in New York city, where, after a season's engagement at the Germania Theater, he entered journalism (1876) by joining the staff of "Puck" (German edition), of which he became associate editor, holding that position for fourteen years (1876-79, 1881-92). During the seasons of 1879-80 and 1880-81 he was engaged as an actor at the Thalia Theater.

Hauser founded a German humorous weekly, "Hallo," in 1892, conducting it for about two years. Next he joined the staff of the "New Yorker Herold," to which he was a prolific contributor for two years. He is the author of "Twenty-Five Years in America: Recollections of a Humorous Nature" (1900); founder of the "Bürger- und Bauern-Kalender," published annually since 1897; author of the libretto to "Madeleine, the Rose of Champagne," and of material of the same character for six burlesques. He contributed to "Puck" a series entitled "Letters of Dobbljew Zizzesbeisser," of interest to Jews. In the political arena Hauser has taken part in many reform movements as a member of the German-American Reform Union and of the Citizens' Union. He is also a popular lecturer.

A. F. H. V.

HAUSER, MISKA (MICHAEL): Hungarian violin virtuoso; born at Presburg, Hungary, 1822; died at Vienna Dec. 8, 1887; pupil of Joseph Matalay, and later of Kreutzer, Mayseder, and Sechter, at the Vienna Conservatorium. In 1839-40 he first gave a number of concerts in various cities of Germany, and then traveled through Denmark, Sweden, Norway, Finland, and Russia. Ten years later he visited England, North and South America, the West Indies, the South Sea Islands, and Australia, returning to Europe in 1858 by way of India, Turkey, and Egypt. In 1864 he made a tour through Italy and played also in Berlin and Paris, where his feats of virtuosity won him great applause. He made his last public appearance in 1874 at Cologne.

Hauser's compositions, now rarely played, comprise the operetta "Der Blinde Leiermann," and numerous fantasies, rondos, and variations for the violin. His "Wanderbuch eines Oesterreichischen Virtuosen: Briefe aus Californien, Südamerika und Australien" (2 vols., Leipsic, 1858-59) was a reprint of his letters to the "Ostdeutsche Post," Vienna, on his American and Australian tour.

S. J. SO.

HAUSER, PHILIPP: Hungarian physician, and writer on medical topics; born at Nádas, Hungary, April 2, 1832. For several years he attended the Talmudic school at Presburg and that at Nikolsburg, Moravia (1848). In 1852 he began the study of medicine, attending successively the universities of Vienna, Paris, and Bern (M.D. 1858). On the completion of his studies he went as physician to Tangier, where more than 4,000 Jews were living. When the war between Spain and Morocco broke out a year later, Hauser, with many of his coreligionists in Tangier and the coast district, sought refuge at Gibraltar, where he took charge of the provisional hospital established by the Jewish community. After the Spanish had taken Tetuan (Feb., 1860), Hauser went to that city, where the cholera was then raging, in order to relieve the Jews there; a year later he returned to Gibraltar and resumed his practise. He was frequently called for consultations to the interior of Morocco, and to Cadiz and other Spanish cities. In 1872 he settled at Seville; there he succeeded, in spite of many difficulties, in compelling recognition, and was appointed by the municipal council as delegate to the fourth international hygienic congress.

In 1883 Hauser removed to Madrid, where he is one of the very few Jewish physicians. He has published the following works: "Nouvelles Recherches sur l'Influence du Système Nerveux sur la Nutrition" (Bern, 1858); "La Mortalité de la Première Enfance en Espagne Comparée avec Celle de la France" (Paris, 1878); "L'Influence de la Densité de la Population dans la Mortalité des Grandes Villes" (*ib.* 1882); "Estudios Medico-Topograficos de Sevilla" (Seville, 1883); "Estudios Medico-Sociales de Sevilla" (*ib.* 1883); "Estudios Epidemiologicos Relativos a la Etiologia y Profilaxis del Colera" (3 vols., preface by Pettenkofer of Munich; Seville, 1887); "Le Choléra en Europe Depuis Son Origine Jusqu'à Nos Jours" (Paris, 1897; the last-named two works received from the Academy of

Paris the Prix Bréant of 3,000 francs as well as the Pettenkofer prize of 1,500 marks); "La Défense Sociale Contre la Tuberculose" (Madrid, 1898); "Nouvelles Recherches sur le Rapport Entre l'Evolution et la Structure Géologique de la Péninsule Ibérique et les Eaux Minérales d'Espagne"; "Madrid Bajo el Punto de Vista Medico-Social" (2 vols., Madrid, 1902–03).

HAUSFREUND, DER. See Periodicals.

HAUSSMANN, DAVID: German physician; born at Ratibor, Silesia, July 22, 1839; died at Berlin May 26, 1903. He received his education in the Jewish school and in the gymnasium of his native town, and also at the universities of Breslau and Berlin. He received his degree as doctor of medicine from the latter university in 1866. Having served half a year as volunteer in the Kaiser Alexander Regiment in Berlin, he took part as assistant surgeon in the war with Denmark in 1864 and in the Austro-Prussian war in 1866, and as captain-surgeon in the Franco-Prussian war in 1870–71. During this last campaign he was wounded before Metz. For his military services he received the war medals of 1864, 1866, and 1870–71, the "Düppler Sturmkreuz," and the Iron Cross. After his graduation Haussmann practised gynecology in Berlin. From 1867 to 1870 he was prosector at the gynecological hospital of the Berlin University.

Haussmann was a prolific writer. He contributed about sixty essays to the various medical journals, among which may be mentioned: Virchow's "Archiv für Pathologische Anatomie und Physiologie und für Klinische Medizin"; "Berliner Klinische Wochenschrift"; "Deutsche Medizinische Wochenschrift"; "Monatsschrift für Geburtskunde"; "Archiv für Gynäkologie"; "Zeitschrift für Geburtshilfe"; and "Centralblatt für Gynäkologie." These essays treat especially of the origin, prophylaxis, and treatment of the infection and diseases of the embryo during nativity. Haussmann was likewise the author of: "Die Parasiten der Weiblichen Sexualorgane," Berlin, 1870, translated into French by P. E. Walther, Paris, 1875; "Die Lehre von der Decidua Menstrualis," Berlin, 1872; "Die Parasiten der Brustdrüse," *ib.* 1874; "Ueber die Entstehung der Uebertragbaren Krankheiten des Wochenbettes," *ib.* 1875; "Ueber das Verhalten der Spermatozoiden in den Sexualorganen des Weibes," *ib.* 1879; "Die Bindehautinfectionen der Neugeborenen," Stuttgart, 1882.

s. F. T. H.

HAVAS, ADOLF: Hungarian dermatologist; born in Szt. Gál, Hungary, Feb. 14, 1854; studied in Veszprim, Budapest, and Vienna, taking his degree as doctor of medicine in 1880. After a postgraduate course abroad, he returned to Budapest (1883), and was made chief of the department for skin and venereal diseases in the university hospital. In 1884 he became privat-docent; in 1902, assistant professor. His chief works are: "Malleus Humidus"; "Lupus Vulgaris"; "Sarcoma Idiopathicum Multiplicatum Pigmentis Cutis"; "Mycotis Fungoides"; "Lichen Ruber Acuminatus." He has published several essays in Hungarian and German medical journals.

s. L. V.

HAVILAH (חוילה; Εὐιλάτ: lit. "the sandy land"): Name of a district, or districts, in Arabia. According to I Sam. xv. 7, Saul smote the Amalekites from Havilah to Shur (the region of the "wall"), "over against Egypt"; the Ishmaelites are also placed in the same locality (Gen. xxv. 18), which will thus correspond with the northern part of Arabia, the "Melukhkha" or "Salt Desert" of the cuneiform inscriptions. In Gen. x. 29 and I Chron. i. 23, on the other hand, Havilah is a son of Joktan, associated with Sheba and Ophir in the southern portion of the peninsula. As, however, the Assyrian inscriptions show that the power of Sheba extended as far north as the frontiers of Babylonia, it is not necessary to transplant Havilah from the north to the south, more especially as Mesha (Gen. x. 30) is probably the Assyrian "Mas," the northern desert of Arabia. The Havilah of Gen. ii. 11 is certainly to be sought in this direction, since the Pison, which "compassed" it, was, like the Euphrates and Tigris, a river of Eden, the Babylonian "Edin," or the Chaldean plain. It is said that it produced gold, bdellium, and the "shoham" stone. This last has been identified by some Assyriologists with the "samtur" stone of the monuments, which was found in Melukhkha. Glaser makes bdellium the exudation of the balsam-tree.

It is questionable whether the Cushite Havilah mentioned in Gen. x. 7 is to be looked for in Arabia or Africa. Arabian tribes migrated to the opposite coasts of Africa in early times. The fact, however, that Raamah, Sheba, and Dedan are coupled with Havilah is in favor of Arabia; and Havilah, like Sheba, might geographically be described as both Joktanite, or southern, and Cushite, or northern.

Havilah was identified by Bochart and Niebuhr with Khaulan in Tehamah, between Mecca and Sana; by Gesenius with the Khaulotæi of Strabo in northern Arabia; and by Kautzsch with Ḥuwailah on the Persian Gulf; while the supposed African Havilah has been found in the Aualis of Ptolemy and Pliny, now Zeila. Glaser places it in Yemama (central and northeastern Arabia), from which gold was "almost exclusively" brought in ancient times. Ball has pointed out a statement of the Arabic writer Yakut that Ḥawil was the dialect spoken not only by the people of Mahrah in the south, but also by "the descendants of Midian, the son of Abraham."

E. G. H. A. H. S.

ḤAVILIO, SIMON BEN JUDAH. See Ḥabillo, Simon ben Judah ben David.

HAVOTH-JAIR (חות יאיר = "the tent-villages of Jair"): Certain villages or towns on the east of the Jordan in Bashan and in Gilead, named after their conquerors. **1.** The towns of Jair, son of Manasseh, which occupied the whole tract of Argob in Bashan (Num. xxxii. 41; Deut. iii. 14). They were sixty in number, and, contrary to the literal signification of their name, were towns well fortified with high walls and gates (Deut. iii. 4–5; Josh. xiii. 30; I Chron. ii. 23). In the time of Solomon they formed a part of Ben-geber's commissariat district (I Kings iv. 13). It appears from this passage that Jair had villages in Gilead, which also were called "Havoth-jair"; and according to 1 Chron. ii. 22 their number was twenty-three. **2.** The villages of Jair the Gileadite, in Gilead, thirty in number (Judges x. 4).

E. G. H. M. Sel.

HAVRE: French seaport, on the estuary of the Seine. It has a population of 118,478, of whom about 50 are Jews (1903). In 1850 a dozen Jewish families united for the celebration of Rosh ha-Shanah and Yom Kippur, in an apartment at No. 33 Rue Royale. The community was created by a ministerial decree in 1852, and its synagogue, at No. 42 Rue Dauphine, was dedicated by Chief Rabbi Isidor. In 1862 the community, having increased in numbers, built a temple on the Rue du Grand Croissant, which also was dedicated (1864) by Chief Rabbi Isidor. In 1870 the community was included in the rabbinical district of Rouen.

E. C. J. Ka.

HAWAIIAN (formerly **Sandwich**) **ISLANDS:** Group of twelve islands in the North Pacific Ocean, eight of which are inhabited. They have a population of 154,000 (1902), of whom about 100 are Jews. As the territory of Hawaii the islands were annexed to the United States in 1898.

The first Jew who visited Hawaii was A. S. Grinbaum, who arrived in Honolulu in 1856; a few years later the firm of M. S. Grinbaum & Co. was established. It is still in existence, and is one of the largest wholesale houses in the territory. After the overthrow of Queen Liliuokalani in 1893 a number of Jews settled there. In 1901 the first Hebrew congregation of Honolulu was formed, under the presidency of S. Ehrlich (vice-president, Elias Peck); it numbers forty members (1903). Four Jewish weddings have been solemnized under the Jewish ritual by visiting rabbis having special authorization. The cemetery was consecrated Aug. 24, 1902, by Rudolph I. Coffee and by S. Ehrlich, president of the cemetery association. A scroll of the Law, said to be of ancient origin, was owned by King Kalakaua; it is used in the services on holy days.

Bibliography: Coffee, *Jews and Judaism in the Hawaiian Islands*, in *The Menorah*, xxxiii. 259; *American Hebrew*, lxxi. 605.

A. R. I. C.

HAWK: The rendering of נץ given by the English versions; it is enumerated among the unclean birds in Lev. xi. 16; Deut. xiv. 15. The Hebrew word, to which is added "after its kind," may designate any of the smaller diurnal birds of prey, which are numerous in Palestine. Of the *Falconidæ* the kestrels (*Tinnunculus alaudarius* and *Tinnunculus cenchris*) are very common in Palestine. Others, less numerous, are the hobby-hawk (*Falco subbuteo*), the Eleonora falcon (*Falco eleonoræ*), etc. In Job xxxix. 26 the hawk is described as stretching its wings "toward the south," in reference to the migratory habits of the smaller birds.

In the Talmud (Hul. 42a) the hawk is said to kill small birds, while another bird, the "gas," kills large ones. The latter term may denote the *Falco islandicus*, used in hunting.

Bibliography: Tristram, *Natural History of the Bible*, p. 189; Lewysohn, *Zoologie des Talmuds*, p. 164.

J. I. M. C.

HAWKERS AND PEDLERS.—**Biblical Data:** In primitive countries trading was monopolized by traveling merchants. Palestine, an agricultural country, knew the traders mostly as foreigners, chiefly Canaanites (Hosea xii. 8; Isa. xxiii. 8; Prov. xxxi. 24; Job xl. 30). The Hebrew uses either סוחר (Gen. xxiii. 16) or רוכל (I Kings x. 25; Ezek. xxvii.; Cant. iii. 6), both of which mean originally "the wanderer." Aversion to the foreigner, and the narrow prejudices of the farmer, who considered the profit of the merchant ill-gotten, combined to represent the hawker as dishonest. Hosea speaks of the trafficker in whose hands are "the balances of deceit" (xii. 8 [A.V. 7]); and the term for "slanderer" (הולך רכיל) meant originally a "traveling merchant" (Prov. xi. 13, xix. 16). The same idea appears in the verse "A merchant will hardly keep himself from doing wrong; and an huckster shall not be freed from sin" (Ecclus. [Sirach] xxvi. 29). The articles in which the pedler dealt in those days were evidently manifold. Nehemiah speaks of "the fish and all manner of ware" which the "rokelim" brought to town (xiii. 16); but in this case he may, perhaps, refer exclusively to provisions. Canticles iii. 6 seems to indicate that spices were a staple commodity of the ambulant trader; and the Talmud (B. B. 22a) expressly states that they were.

——**In Rabbinical Literature:** With the loss of their national independence and their gradual dispersion into foreign lands, the Jews resorted more and more to commerce. The pedler carried all kinds of merchandise in his boxes; Johanan ben Nuri is called, in allusion to his wide learning, "the pedler's box" ("ḳuppat ha-rokelim"; Giṭ. 67a). In Cant. R. iii. 6 "the powders of the merchant" is explained as a figure for the blessings of Jacob, the source of all blessing, like the box of the merchant which contains all kinds of spices. Spices were imported from distant lands, and since patriarchal times had been carried by Arabian caravans (Gen. xxxvii. 25). In an allegorical introduction to a sermon R. Alexander asks: "Who wishes to buy elixir of life?" ('Ab. Zarah 19b), which question evidently has reference to the spice-pedlers' custom of announcing their wares in the streets. The Talmud decides that the resident merchants of a town have no right to interfere with the trade of the pedlers, for Ezra ordained that pedlers should be permitted to sell their goods in the cities so that cosmetics might be available to the daughters of Israel (B. B. 22a; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 156, 6). The opportunities for intrigues afforded to pedlers are frequently referred to (Yeb. 63b; but see Rabbinovicz *ad loc.*; idem, Ḥiddushim, iv. 13).

Spices.

The trade of the pedler seems to have been considered very profitable; R. Judah (4th cent.) said that the prosperity of the pedlers is due to the merit of Jacob (Cant. R. iii. 6). The character of the pedler, however, is not highly esteemed. His most prominent characteristic is garrulity. In defense of the brevity of the Mishnah the Talmud says: "The Mishnah is not supposed to enumerate every case in the style of a pedler" (B. B. 22a). The Hebrew "rakil" (slander) is derived from "rokel" (pedler), because the talebearer is like a pedler who ingratiates himself with his customers by telling one what another says about him (Yer. Peah 16a; comp. Sifra, ed. Weiss, 89a).

——**In Medieval and Modern Times:** The primitive state of western Europe during the earlier part of the Middle Ages did not permit the development of regular trading centers. Articles of luxury and the products of foreign countries were brought to Germany and eastern Europe by traveling merchants, who also exported amber and other goods, and especially slaves. This trade, at least after the eighth century, was principally carried on by Jews. The charter of Henry IV., issued to the Jews of Speyer (1090), and confirmed by Frederick I. and Frederick II., emphasizes their freedom to deal in all kinds of merchandise within the limits of the empire ("Zeitschrift für die Gesch. der Juden in Deutschland," i. 65 *et seq.*). **In Country Districts.** The rise of city settlements, where Jews lived almost exclusively up to the middle of the fifteenth century, and the restriction of the latter to money-lending, seem to have curtailed the opportunities for peddling; at all events legislation, while very detailed about interest and pledges, has nothing to say about the peddling trade. But when the Jews, by the end of the fifteenth century, were forced to live in villages and small towns, it was necessary for them to seek a livelihood beyond the places of their residence. They went to the villages to buy hides, wool, and produce, and sold various kinds of merchandise, chiefly dry-goods. References to the pedler are frequent from that period down to modern times, when Kompert idealized him in his novel "Der Dorfgeher," and Moriz Oppenheim painted the touching scene of the departure of the "Dorfgänger" from his home. The calling was not very lucrative, and was often beset with dangers from the inclemency of the weather and from highway robbers and marauders. Two striking illustrations of this are found in the responsa of Menahem Mendel Krochmal ("Ẓemaḥ Ẓedeḳ," Nos. 42, 93). For the representation of a German Jewish hawker of the early sixteenth century see Jew. Encyc. iv. 295.

Jewish Hawker of Hamburg, Eighteenth Century.
(After Suhr.)

Very frequently the Jews would peddle in the cities from which, as residents, they had been expelled, but in which they might transact business during the day when provided with a passport. The regular shopkeepers of the cities naturally opposed this competition, and in the course of the eighteenth century frequent instances occur in which cities or countries from which the Jews were excluded prohibited even their temporary presence as pedlers. **Restrictions on Peddling.** Such orders were issued by Frederick Augustus of Saxony, July 10, 1719, and Aug. 16, 1746 ("Codex Augusteus," i. 1899, 2d division, p. 1167; Von Rönne and Simon, "Die Verhältnisse der Juden im Preuss. Staat," pp. 327, 341, Breslau, 1843), and repeatedly since 1712 by the council of the free city of Nördlingen. Exceptions were made in favor of pedlers of goods which could not be bought in the regular shops of the city. Thus the Jews were forbidden to rent warehouses in the cities or to appear on the street with a pedler's bag ("Zwerchsack"). On entering a city they were obliged to report to the police, who detailed a guard to watch them during their stay within it (L. Müller, "Aus Fünf Jahrhunderten," pp. 107 *et seq.*, Nördlingen, 1899). The same prohibition against peddling was issued April 5, 1717, by the emperor Charles VI. for the cities of Brünn and Olmütz, whence the Jews had been expelled in 1454 (D'Elvert, "Zur Gesch. der Juden in Mähren und Oesterreichisch-Schlesien," pp. 95, 100, Brünn, 1895). When, through the influence of the French Revolution, the restrictions on both the residence and the traffic of the Jews were relaxed, the local authorities endeavored to check Jewish settlements by restricting peddling. The Swiss canton of Aargau issued various orders, especially that of Dec. 22, 1804, by which peddling was restricted to absolute necessities (Haller, "Die Rechtliche Stellung der Juden im Kanton Aargau," p. 70, Aargau, 1901). In Munich the "Kurfürst," as a means of checking the increase of Jews in the capital, had already (Oct. 16, 1786) prohibited peddling by them (Taussig, "Gesch. der Juden in Bayern," p. 67, Munich, 1874).

In the Nineteenth Century.

During the nineteenth century, when the movement toward a gradual emancipation of the Jews began, it was frequently stipulated that the Jews must abandon peddling and engage in more productive occupations before being admitted to civil and political rights. Thus the edict of June 10, 1813, established for Bavaria the principle that a license to marry should not be issued to those who engaged in "Schacherhandel" ("Regierungsblatt," 1813, p. 921; Heimberger, "Die Staatskirchenrechtliche Stellung der Isr. in Bayern," p. 182, Freiburg-im-Breisgau and Leipsic, 1894). The same position was taken Oct. 29, 1833, by the electorate of Hesse ("Allg. Zeit. des Jud." 1838, pp. 309 *et seq.*), which was the first country in Germany to grant to the Jews full equality—from which, however, pedlers were excluded. A similar regulation was made by the Prussian government in the temporary law for the Jews of the province of Posen issued June 1, 1833 ("Gesetzessammlung," 1833, p. 66; Von Rönne and Simon, *l.c.* p. 308), which allowed only naturalized Jews to engage in peddling. A law of Mecklenburg dated Feb. 22, 1813, allowed the Jews full freedom in this respect, but expressed the hope that the peddling trade would cease within a short time (Donath, "Gesch. der Juden in Mecklenburg," p. 170, Leipsic, 1874). In more recent times anti-Semitism used restrictions against peddling as a means of depriving the poorest class among the Jews of a livelihood. This was done in Rumania by the law of March 17-29, 1884, which prohibited peddling in the cities of anything except agricultural produce, and restricted it in rural communities by making it dependent on a license issued by the village authorities (Edmond Sincerus [E. Schwarzfeld], "Les Juifs en Roumanie," pp. 65 *et seq.*, London, 1901). An Austrian law of Feb. 25, 1902 (§§ 59-60), affecting commerce was inspired by the same motives.

With the influx of German Jews into America the Jewish pedler became a familiar figure throughout the United States. The immigrants, in most instances poor and knowing no particular trade, would receive goods from their countrymen or relatives on credit and sell them in rural districts until they had earned enough to open a store. Since the arrival of the Russian Jews in 1882 the practise of selling goods on the instalment plan (custom-peddling) has developed among them; while in the large cities some have sought a living as hucksters or by selling small household wares from push-carts. HA-YEHUDI. See PERIODICALS.

HAYEM, ARMAND-LAZARE: French author; born in Paris July 24, 1845; died there 1889; son of Simon Hayem. Hayem forsook commerce for literature and politics. In the last years of the empire he openly advocated Republican doctrines, and in 1871 was elected "conseiller général" for the canton of Montmorency. He was an unsuccessful candidate at the elections of Feb., 1876 and 1881. Hayem was an adherent to the doctrines of Proudhon, and published several political brochures. He was also the author of: "Le Mariage," 1872 (2d ed., 1876); "Le Collier," 1881; "L'Etre Social," 1881; "La Science, l'Homme au XIXeme Siècle," 1885; "Le Don Juanisme," 1886; "Don Juan d'Armana," 1886; "Vérités et Apparences," 1891.

HAYEM, CHARLES: French collector and art patron; born in Paris in 1839; died there May 13, 1902; eldest son of Simon Hayem. His wife was the daughter of Adolphe Franck, and her salon was a center for artists and writers. Hayem's gift of forty-six paintings by the foremost living French artists, together with many objects of art, to the museum of the Palais Luxembourg earned him the title of "Benefactor of French Art."

S. E. A.

HAYEM, GEORGES: French physician; born in Paris Nov. 25, 1841; son of Simon Hayem. He became doctor of medicine in 1868, and later "agrégé" of the faculty of Paris. In 1879 he was appointed professor of therapeutics and materia medica at the Saint Antoine hospital, and in 1886 was elected a member of the Academy of Medicine. He is the author of many important medical works, and has made extensive researches in the pathology of the blood. He is a specialist on stomach disorders, and has achieved some success in the cold-water treatment of cholera. His most important works are: "Des Hémorragies Intra-Rachidiennes," 1872; "Recherches sur l'Anatomie Pathologique des Atrophies Musculaires," 1877; "Cours de Thérapeutique Expérimentale," 1882; "Leçons de Thérapeutique," 1887-93; "Du Sang et de Ses Altérations Anatomiques," 1889; (with Winter) "Du Chimisme Stomacal," 1891. As the editor of the "Revue des Sciences Médicales en France et à l'Etranger" from 1873 to 1898, Hayem contributed articles on allied subjects.

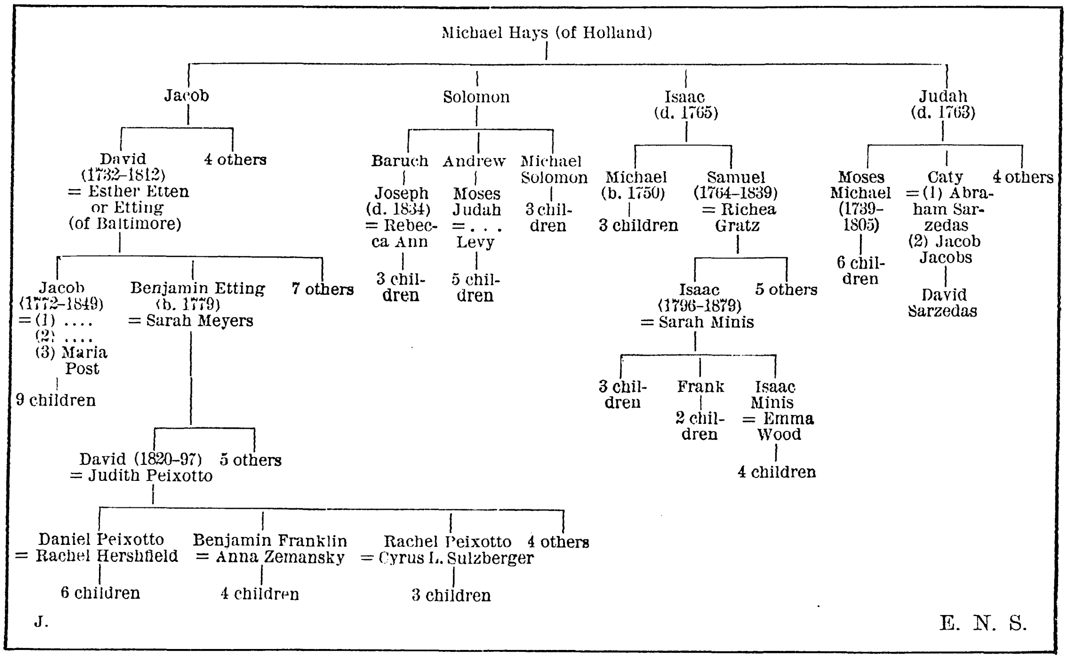
HAYS: Family which emigrated from Holland in the first quarter of the eighteenth century and settled in and near New York city. Records exist of six brothers: (1) Jacob, (2) Judah, (3) Isaac, (4) Solomon, (5) Abraham, and (6) David, whose sons were identified with the colonial cause during the Revolutionary war, and whose descendants are scattered throughout the United States.

1. **Jacob Hays:** Naturalized in 1723. A record exists of the lease of property to him in Rye, N. Y., and his name appears among those active in erecting the first building for the Congregation Shearith Israel, New York city, in 1730. His sons were farmers in Westchester county, New York.



Michael Hays (of Holland)
Jacob
Solomon
Isaac (d. 1765)
Judah (d. 1763)
David (1732–1812) = Esther Etten or Etting (of Baltimore)
4 others

Genealogical Tree of the Hays Family.

Benjamin Hays: Member of Westchester County Militia (J. A. Roberts, "New York in the Revolution"). His house at Bedford, with that of David Hays, was burned during the Royalist raid upon that town in July, 1779 (Rev. Robert Bolton, "Hist. of the County of Westchester").

Michael Hays: Resident of Pleasantville, Westchester county, where in 1785 he bought a large estate. He served upon various important colonial committees ("Calendar of New York Historical Manuscripts"; "Public Papers of Governor Clinton, 1777–1804"). He bequeathed his estate to his brother, David Hays.

David Hays: Born 1732; died 1812; married Esther Etting (or Etten) of Baltimore.

Jacob Hays: Eldest son of the preceding; born 1772; died 1849. He was high constable of New York city from 1802 to 1849. His portrait, painted by the order of the common council, hangs in the governor's room, City Hall, New York. His grandson, **William Jacob Hays** (b. 1830; d. 1875), became known as a painter of animal pictures.

Benjamin Etting Hays: Farmer at Pleasantville, N. Y.; born 1779; died 1858. Though observing strictly the tenets of Judaism, he was known by his neighbors as "Uncle Ben, the best Christian in Westchester county." **David Hays:** Eldest son of the preceding; born 1820; died 1897. He was for many years treasurer of the College of Pharmacy of the City of New York. He married Judith Salzedo Peixotto, and the old family homestead at Pleasantville is now the property of their eldest son.

Daniel Peixotto Hays: Lawyer; eldest son of the preceding; born at Pleasantville, N. Y., 1854. He was appointed chairman of the Municipal Civil Service Commission (1893), and was elected president of the village of Pleasantville (1898), of the Young Men's Hebrew Association of New York (1879), and of Temple Israel, Harlem, New York city (1889).

2. **Judah Hays:** Owner of the sixteen-gun ship "Duke of Cumberland" (1760); naturalized in 1729. **Moses Michael Hays:** Son of the preceding; born 1739; died 1805. He resided in Newport, and afterward in Boston, where he became grand master of the Masonic Grand Lodge of Massachusetts. Among the grandsons of Judah Hays were **David Sarzedas** and Judah Touro. David Sarzedas served as first lieutenant in the Georgia Brigade in the Revolutionary war (White's "Statistics of Georgia"). Judah Touro became known throughout America as a philanthropist.

3. **Isaac Hays:** Freeman of New York city (1748).

Michael Hays: Eldest son of the preceding.

John Hays: Son of the preceding; mayor of Cumberland, Md. (1852–53).

Samuel Hays: Brother of the preceding; born 1764; died 1839. He removed to Philadelphia and married Richea Gratz.

Isaac Hays: Physician; son of the preceding; born 1796; died 1879. He was president of the Academy of Natural Sciences of Philadelphia (1865–1869), and was one of the founders of the Franklin Institute and the American Medical Association. He was the author of that association's code of ethics, which has since been adopted by every state and county medical society in the United States. He edited the "American Journal of Medical Science" from 1827 to 1869, when his son, **Isaac Minis Hays**, one of the secretaries of the American Philosophical Society, became his associate. In 1843 he established the "Medical News"; in 1874 the "Monthly Abstract of Medical Science." He was also editor of Wilson's "American Ornithology," Hoblyn's "Dictionary of Terms Used in Medicine and the Collateral Sciences," Lawrence's "Treatise on Diseases of the Eye," and Arnott's "Physics."

4. **Solomon Hays:** Merchant freeman (1742). He had three sons.

Baruch Hays: Son of the preceding; served as first lieutenant in the Revolutionary war ("Calendar of New York Historical Manuscripts"). **John Hays:** Son of Baruch Hays; born 1770; died 1836. John Hays was one of the pioneers of Illinois. He was sheriff of St. Clair county, 1798–1818; was appointed collector of internal revenue for Illinois territory by President Madison in 1814; and became Indian agent at Fort Wayne in 1822.

Andrew Hays: Son of Solomon Hays. He removed to Canada, and was one of the founders of the Shearith Israel Synagogue, Montreal (1768). His son, **Moses Judah Hays,** became prominent in municipal affairs. He organized Montreal's first water-works and was chief commissioner of police.

5 and 6. **Abraham** and **David Hays** fought in the colonial cause in the Revolutionary war (James A. Roberts, "New York in the Revolution"; "Officers and Men of New Jersey in the Revolutionary War"), but nothing is known of their descendants.

A. R. H. S.

ḤAYYAṬ, JUDAH BEN JACOB: Spanish cabalist; lived in the fifteenth and sixteenth centuries. Himself one of the exiles from Spain, he describes in vivid colors his sufferings and those of his brethren (preface to his "Minḥat Yehudah"). In the winter of 1493 Ḥayyaṭ and his family, with 250 other Spanish refugees, were ordered to leave Lisbon. For four months the ship on which they had embarked remained at sea, as no port would allow the Jews to land for fear of the plague. Finally, the vessel was captured by Biscayan pirates, plundered, and taken to Malaga. The officials of that port would allow the Jews neither to land nor to depart; nor were provisions given them. They were, however, visited by priests who came on board every day to preach Christianity. Driven by hunger, hundreds were converted. Ḥayyaṭ's wife died of starvation, and he himself lay between life and death.

At last the Malaga authorities allowed the Jews to set sail for Africa. Ḥayyaṭ settled in Berbera, but there a new calamity befell him. A Mohammedan, a native of Spain, testified that, during the rejoicings at the conquest of Granada, Ḥayyaṭ had ordered his flock to drag through the streets the effigy of Mohammed. Accordingly he was thrown into a dungeon, and was offered the alternatives of death or the adoption of Islam. After forty days of incarceration he was ransomed by the Jews of Luza, to whom he presented two hundred volumes from his library. He then went to Fez; but a famine which raged there was so severe that he was compelled to turn a hand-mill for a piece of bread scarcely fit for a dog. At night he slept upon the ash-heaps of the town. After many struggles and sufferings he reached Italy and settled at Mantua.

Ḥayyaṭ was one of the greatest cabalists of his time. At the request of Joseph Jabez of Mantua, he wrote a commentary on "Ma'areket ha-Elahut," a cabalistic system of theology, attributed to Perez ben Isaac. This work, together with the text, was published at Ferrara in 1557, under the title "Minḥat Yehudah." In the preface, in which the events of his stormy life are narrated, he glorifies the Cabala, and advises its students concerning the works to be consulted on that subject. According to him, Isaac ibn Laṭif is to be relied upon in everything except in Cabala, "in which he stands only upon one foot"; and Abraham Abulafia is a mere swindler. Ḥayyaṭ recommends: the "Sefer Yeẓirah," which he attributes to the tanna R. Akiba; the "Bahir"; the works of Joseph Gikatilla; those of Shem-Ṭob de Leon; the "Sodot" of Naḥmanides; and the writings of Menahem Recanati.

K. I. BR.

ḤAYYIM (lit. "life"): A common prænomen among the Jews, especially during the Middle Ages. In its Latin form it occurs on the Hebrew mosaic of Kafr Kenna as ביטה, *i.e.* "Vita" ("Pal. Explor. Fund Statement," 1901, p. 377), and in the Jewish catacombs of Venosa (also ביטן; Ascoli, "Inscrizioni," No. 21). The Greek Β´τα occurs upon an inscription at Gallipoli ("C. I. G." No. 2014); it may be the name of a Jewess. In early transcriptions "Ḥayyim" occurs in various forms: in Spain, as "Aim" (Jacobs, "Sources," p. 151), or "Haym" (*ib.* No. 1293); in Germany, as "Hayum" ("Zeit. Gesch. des Oberrheins," xv. 44), "Heyum" (Löwenstein, "Juden in der Kurpfalz," p. 298), "Heium" (*ib.* p. 299), and, in later times, "Chajim"; in France, as "Haguin," "Haquin," "Hagin," "Chakin" ("Sefer ha-Yashar," § 27), "Hakinet," "Haquinet" ("R. E. J." i. 68), "Hakinet," "Chakinet"; in England, as "Hagin"

("Jew. Hist. Soc. Eng." i. 156) and "Agim" (Jacobs, "Jewish Ideals," p. 216).

The Latin "Vita" occurs in various forms. "Vitalis" was a name used by Christians of the first century; from this come "Vital" (ויטל, Würzburg, 1298) and וידלא (Bonn, 1288); and from this, "Vida" (Worms, 1349) and the later "Veitel." It occurs in Provence and Catalonia with the addition of a prefix, as "Anvidal." "Vida" also occurs as a feminine name, or, synonymously, as "Zoë" (זואי, זוי. Zunz, "G. S." ii. 61). Other forms of the same name are "Vives" (ויוש, ויבש, Germany, 13th cent.; וויש, "Or Zarua'"), "Vivis," "Viva" (Majorca, 1391; "R. E. J." xiv. 261), "Vivo" (De Meaux =Jehiel of Paris, this form being often a translation of "Jehiel"). In the later Middle Ages the forms "Vivant" ("R. E. J." i. 69) and "Vivian" occur (Zunz, "G. S." ii. 35). As "caritatives" there are "Vivelin" (ויולין, Nuremberg, 1298) and "Vivelman" (ויבלמן, Bamberg, 1298). In Italy the old form "Vita" was used.

It is interesting to note that in Germany the name became "Hain" ("Hain" or "Heine Goldschmidt" = "Ḥayyim Hamelin"); and the family name of the poet is a derivative of this by way of "Heine-mann" (Freudenthal, in "Monatsschrift," xlv. 460). "Ḥayyim" was also one of the names given to those who had recovered from an illness (Zunz, "Namen des Juden," p. 51). In modern usage its secular parallel is "Henry." It also forms the basis of the surnames "Hyam," "Hyams," "Hiam," and "Hayem."

ḤAYYIM (First Rabbi of Berlin). See Berlin.

ḤAYYIM, AARON IBN (the Younger): Rabbi at Hebron, later at Smyrna; grandson of Aaron ben Abraham ibn Ḥayyim, author of the "Ḳorban Aharon." He was one of the victims of the earthquake which occurred in Smyrna in July, 1688. Considered one of the most prominent Talmudists of his time, he was consulted on ritual questions, and his decisions are quoted by Mordecai ha-Levi (in the "Ḍarke No'am"), by Abraham Amigo, by Solomon ben Benjamin ha-Levi (in "Leb Shelomoh"), by Benveniste (in the "Keneset ha-Gedolah"), and by many other of his contemporaries. According to Azulai, Ibn Ḥayyim was the author of a commentary on "'En Ya'aḳob," which is, however, no longer in existence.

ḤAYYIM, ABRAHAM ISRAEL. See Israel Ḥayyim Abraham.

ḤAYYIM, ABRAHAM BEN JUDAH IBN: Spanish scholar and scribe of the thirteenth century. He wrote a Spanish treatise on the preparation of gold-foil and colors for miniatures; also a treatise, probably in Hebrew, on the Masorah and on the crowned letters in the scroll of the Pentateuch (De Rossi, "Cat. Parma," No. 945). Steinschneider ("Jewish Literature," p. 328, note 53) identifies Ibn Ḥayyim with Abraham ben Ḥayyim, the French liturgist; but, according to De Rossi ("Dizionario," i. 6), Ibn Ḥayyim wrote his first treatise in Spanish.

Bibliography: Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 26; Fuenn, *Keneset Yisrael*, p. 27.

G. M. Sel.

ḤAYYIM BEN BEZALEEL: German Talmudist; died at Friedberg on the Shabu'ot festival, 1588. He was the eldest of the four sons of Bezaleel ben Ḥayyim, and spent his youth at Posen, the native city of the family (comp. "Monatsschrift," xiii. 371). He and Moses Isserles studied with Shalom Shakna, whose methods of teaching Ḥayyim largely adopted. He began his literary activity at Worms, where he had gone in 1549; and, apparently, he succeeded his uncle Jacob ben Ḥayyim as rabbi in that city, after Jacob's death in 1563 (comp. his introduction to "Mayim Ḥayyim," printed in "Ha-Shiloaḥ," § 9). He subsequently went as rabbi to Friedberg; in 1578 this district was ravaged by a terrible plague, which caused the death of one of Ḥayyim's servants. In consequence of this occurrence Ḥayyim and his family were quarantined in his house for two months. During this time he wrote his ethical work "Sefer ha-Ḥayyim," consisting of five books.

Ḥayyim carried on a heated controversy with his former schoolfellow Moses Isserles, also indirectly aiming at Joseph Caro. He did not approve of their attempts to collect the laws found in the Talmud and other authoritative works in a book suitable for the general public. The reasons for his objections he set forth in the introduction to his "Mayim Ḥayyim," which includes a criticism of Moses Isserles' "Torat ha-Ḥaṭṭot." Ḥayyim held that through such codices the study of the Talmud would be neglected and the standing of the rabbis injured, since every layman could turn to these books for the solution of difficult questions. Moreover, the writer of such codes would gain too much authority over other teachers, whereas every rabbi ought to arrive at his decisions independently. Such codes, moreover, could not take into account the minhagim of all countries; and this, again, would lead to constraint in matters of conscience, since every one would have to observe the minhagim obtaining in the place where the author of the code in question was living.

Ḥayyim's works include: "Sefer ha-Ḥayyim," Cracow, 1593; Amsterdam, 1713; Lemberg, 1887; "Mayim Ḥayyim," Amsterdam, 1711; Lemberg, without introduction; "Iggeret ha-Tiyyul," Scriptural comments in alphabetical order, Prague, 1605, and Offenbach, 1717; "'Eẓ ha-Ḥayyim"; "Be'er Mayim Ḥayyim," supercommentary to Rashi's commentary on the Pentateuch.

ḤAYYIM COHEN. See COHEN, ḤAYYIM.

ḤAYYIM B. ELIJAH. See NISSIM, ḤAYYIM B. ELIJAH.

ḤAYYIM, ELIJAH IBN: Rabbi of Constantinople, perhaps the immediate successor of Elijah Mizraḥi; born about 1532; died in the beginning of the seventeenth century. In his responsa the date 1562 is mentioned; another responsum is dated 1601, and it appears from the preface that he was more than seventy years old at his death. Ibn Ḥayyim is the author of several works, although the following only have been preserved: Responsa, part one, under the title שו"ת מהר"אנח, and novellæ to Ketubot (both printed at Constantinople, n.d.); Responsa, part two, included with the "Mayim 'Amuḳḳim" (Venice, 1645); "Imre Shefer," homilies on the Pentateuch (Venice, 1629; 2d ed. Frankfort-on-the-Main, 1712). His only son, Michael, who died at the age of twenty, was noted as a scholar, and contributed to the last-named work of his father.

K. L. GRÜ.

ḤAYYIM OF FALAISE (ḤAYYIM PALTIEL?): French Biblical commentator of the thirteenth century; grandson of the tosafist Samuel of Falaise (Sir Morel). An anonymous commentator on the Pentateuch (Munich MS. No. 62) frequently quotes another commentary (פשטים) on the Pentateuch, the author of which he on one occasion calls "my teacher, Ḥayyim of Falaise"; in other places he speaks of "Ḥayyim," but more often of "Ḥayyim Paltiel." Many passages from Ḥayyim's commentary are given by Isaac b. Judah ha-Levi in his "Pa'aneaḥ Raza" (Munich MS. No. 50). The commentary is called there "Peri 'Eẓ Ḥayyim," and the author is called "Ḥayyim Paltiel" or, more often, "Paltiel Gaon"; he is also mentioned as teacher of Isaac b. Judah. Ḥayyim's commentary is haggadic in character, and shows the author to have possessed a thorough knowledge of the Talmud. Contrary to Ziemlich's supposition ("Monatsschrift," xxx. 305), Gross concluded that Ḥayyim of Falaise must not be identified with Ḥayyim Paltiel b. Jacob, rabbi of Magdeburg, who corresponded with Meïr of Rothenburg and who is quoted by Solomon b. Adret (Responsa, No. 386). On the other hand, Zunz ("Literaturgesch." p. 493) mentions ten liturgical pieces composed by "Ḥayyim b. Baruch, called Ḥayyim Paltiel," who may be the same as Ḥayyim of Falaise. Zunz says (*l.c.*) that he is probably the Ḥayyim Paltiel of Magdeburg, forgetting that the latter's father was called Jacob and not Baruch.

ḤAYYIM OF HAMELN. See HAMELN, GLÜCKEL OF.

ḤAYYIM B. HANANEEL HA-KOHEN: French tosafist of the second half of the twelfth century. He was a pupil of R. Jacob b. Meïr (Tam), with whom he discussed legal questions. Ḥayyim was the maternal grandfather of Moses of Coucy, author of the "Semag" ("Sefer Miẓwot Gadol"), and of Naḥman ha-Kohen, author of "Naḥmoni," quoted in the responsa of Joseph Colon (No. 149). He is quoted in the Tosafot to Ber. 35a, Pes. 118a, Ḳid. 25b, and in other places. He is also mentioned in "Haggahot Mordekai," at the end of tractate Ketubot. Though a Kohen, he expressed his willingness to participate in the funeral of R. Tam, because "great men do not defile" (Ket. 103b).

ḤAYYIM BEN ISAAC REIZES: Head of the yeshibah at Lemberg; born 1687; martyred May 13, 1728. Ḥayyim and his brother Joshua were thrown into prison on the eve of Passover, March 24, 1728, as the result of being falsely denounced by a Jewish convert, who declared they had induced him to renounce Christianity. Ḥayyim and his brother were condemned to be burned at the stake, but were first tortured with extreme cruelty. Their death is commemorated by a special prayer recited at Lemberg on the festival of Pentecost.

ḤAYYIM BEN ISAAC OF VOLOZHIN (ḤAYYIM VOLOZHINER): Russian rabbi and educator; born at Volozhin, government of Wilna, Jan. 21, 1749; died there June 14, 1821. Both he and his elder brother Simḥah (d. 1812) studied under R. Aryeh Löb Ginzberg, who was then rabbi of Volozhin, afterward under R. Raphael ha-Kohen, later of Hamburg. Ḥayyim ben Isaac was a distinguished Talmudist and also a prosperous cloth-manufacturer. At the age of twenty-five he was attracted by the fame of Elijah Gaon of Wilna, whose disciple he became. Submitting to his new teacher's method, he began his studies anew, taking up again Bible, Mishnah, Talmud, and even Hebrew grammar. His admiration for the gaon was boundless, and after his death R. Ḥayyim virtually acknowledged no superior (see Heschel Levin's "'Aliyyot Eliyahu," pp. 55-56, Wilna, 1889).

It was with the view of applying the methods of his teacher that Ḥayyim founded, in 1803, the yeshibah of Volozhin, which became the most important of its kind in the nineteenth century. He began with ten pupils, young residents of Volozhin, whom Ḥayyim maintained at his own expense. It is related that his wife sold her jewelry to contribute to their maintenance. The fame of the institution spread, and the number of its students increased, necessitating an appeal to which the Jews of Russia generously responded. Ḥayyim lived to see his academy housed in its own building, and to preside over a hundred disciples ("Ḥuṭ ha-Meshullash," responsum No. 5).

Ḥayyim's chief work is "Nefesh ha-Ḥayyim," edited by his son (Wilna, 1824; 2d ed., 1837); it is an ethico-cabalistic work, with a distinct anti-Ḥasidic tendency; for, like his master, he was an uncompromising opponent of the Ḥasidim. It lays great stress on the necessity of conforming to all recognized religious practises and on the value of the study of the Torah, deprecating the antinominian tendencies of the Ḥasidim and the mysticism and affected ecstasy which some consider a good substitute for piety and learning. His "Ruaḥ Ḥayyim" is a commentary on Pirḳe Abot, published by Joshua Heschel Levin; it includes additions by his son R. Isaac. Many of his responsa on halakic subjects were lost by fire in 1815. His great-grandson, however, had incorporated some of them in the collection entitled "Ḥuṭ ha-Meshullash" (Wilna, 1882); the first twenty-five numbers belong to Ḥayyim, the remainder to R. Hillel of Grodno and to his son R. Eliezer Isaac. Some of his responsa are found in other works, notably in "Ḳedushat Yom-Ṭob" by R. Yom-Ṭob Lipman of Kapulie (*ib.* 1868).

Ḥayyim's family, which is related to the Rapoport family, has assumed the name of **Fried,** and some of his descendants, bearing that name, now reside in America. See VOLOZHIN.

ḤAYYIM BEN ISRAEL: Spanish philosopher and author; lived in Toledo about 1272–77; a descendant of the Israeli family and a relative of Isaac Israeli, author of the astronomical work "Yesod 'Olam." He wrote a treatise on paradise, which exists in manuscript.

BIBLIOGRAPHY: Zunz, *Additamenta* to *Benjamin of Tudela*, p. 259; idem, *G. S.* i. 170; Steinschneider, *Jewish Literature*, p. 99.

G. M. K.

ḤAYYIM JACOB BEN JACOB DAVID: Rabbi of Smyrna; lived in the seventeenth and eighteenth centuries. According to Michael, he was born at Smyrna and was a pupil of Ḥayyim b. Jacob Abulafia, author of "'Eẓ Ḥayyim." He went to Safed, the rabbis of which town sent him on a mission to North Africa, where he stayed for several years: in 1718 he was in Tunis, in 1729 in Algeria. Not long after his return he was sent to Europe, and while in Holland he published: "Ẓeror ha-Ḥayyim," novellæ on the "Yad" of Maimonides (Amsterdam, 1738); "Samma de-Ḥayye," responsa, and notes to the four Ṭurim (*ib.* 1739).

BIBLIOGRAPHY: Michael, *Or ha-Ḥayyim*, p. 403, No. 877; Fuenn, *Keneset Yisrael*, p. 366; Ghirondi, *Toledot Gedole Yisrael*, p. 102; Zedner, *Cat. Hebr. Books Brit. Mus.* p. 182.

S. S. M. SEL.

ḤAYYIM JACOB BEN JUDAH LÖB SLUTZKI: Russian rabbinical scholar; lived in the first half of the nineteenth century. He was the author of "Niṭe'e Na'amanim," containing the Midrash Konen with a double commentary—"Ẓerof ha-Kesef," explanatory of the text and giving the parallel passages in Bible and Talmud, and "Beḥon ha-Zahab," glosses on the text (Wilna, 1836). According to Fürst ("Bibl. Jud." iii. 346), he also wrote the following (still unpublished) works: "Pardes Rimmonim," a commentary on the Midrash Me ha-Shiloaḥ; "Neḥpah ba-Kesef," a commentary on the Midrash Yonah; "Retuḳot ha-Kesef," a commentary on Elijah Wilna's "Darke Eliyahu"; "Meassef ha-Maḥanot," a glossary to difficult words in Talmud and Midrashim.

H. R. M. SEL.

ḤAYYIM BEN JEHIEL ḤEFEẒ ZAHAB: Talmudist of the fourteenth century; died 1314. He was a brother of Asher ben Jehiel (Rosh). He was educated by his father, Jehiel, and by Samuel of Evreux. Some of his responsa, perhaps all, are included in the "She'elot u-Teshubot" of Meïr Rothenburg (ed. Prague, Nos. 188, 189, 241, 249, 296–298, 339–341, 355, 356, 383, 384, 462–464), with the responsa of his brother (ed. Venice, No. 101, 1). In one responsum (No. 241) he relates that he often officiated as messenger of the community of קולינא, which Michael has assumed to be Cologne. It is doubtful whether the "Ḥefeẓ Zahab" belongs to him or to his father, Jehiel, who is also known as a writer (see Zunz, "Z. G." p. 127); the signatures to responsa Nos. 188 and 189 (חיים בן אמו״ חפץ זהב) make it probable that Jehiel, the father, was its author.

ḤAYYIM B. JOSEPH. See IBN VIVES ḤAYYIM.

ḤAYYIM HA-KOHEN: German rabbi; born at Prague at the end of the sixteenth century; died at Posen about the middle of the seventeenth century. He was the son of Isaac ben Samson ha-Kohen, and, on his mother's side, a grandson of the renowned Löw ben Bezaleel, rabbi of Prague. His brother Naphtali was rabbi at Lublin, and his sister was Eva BACHARACH. From 1628 to 1630 he was rabbi at Frankfort-on-the-Main. The earliest proof of his activity there is a regulation regarding the election of representatives of the congregation. In another document he limits the lectures of learned members of the congregation to the hours from 2 to 4 o'clock on Sabbath afternoon, while he reserves the morning hours of the Sabbath to himself. Among his hearers was Joseph HAHN, who speaks highly of him in his "Yosif Omeẓ" (§§ 520, 529, 729). In 1630 he accepted a call to Posen, where also he was held in high esteem (preface to "Ḥawwot Yair"). In David Oppenheimer's collection is a manuscript written by Ḥayyim's nephew and disciple, Samson Bacharach, which contains Ḥayyim's novellæ and explanations to the four codes of the Shulḥan 'Aruk.

D. S. MAN.

ḤAYYIM HA-LEVI: Physician, and chief rabbi of the united congregations in the archbishopric of Toledo. As the chief rabbi, Zulaimah Alfahan, did not personally administer his office, but resided permanently at Seville, Archbishop D. Pedro Tenorio, Primate of Spain, in 1388 called Ḥayyim ha-Levi, his body physician, to the office of chief rabbi. The archbishop ordered the congregations (perhaps against their will) and all their individual members to acknowledge Ḥayyim ha-Levi thenceforth as their rabbi and dayyan, and to bring all cases before him, and not before any other rabbi or dayyan. Those disobeying this decree were to be punished by a fine of one thousand maravedis, for the benefit of the archiepiscopal treasury. This decree (May 17, 1388) was sanctioned by the king Dec. 14, 1388, with the provision that Ḥayyim hold office for one year from Jan. 1, 1389, and that the congregations receive him on the same terms as the previous rabbi.

ḤAYYIM LISKER. See LISKER, ḤAYYIM.

ḤAYYIM MAL'AK: Polish Shabbethaian agitator; lived in the seventeenth and eighteenth centuries. According to Jacob Emden ("Torat ha-Ḳena'ot," p. 55), Ḥayyim was at first named "Mehallek" (the wanderer), because he traveled to Turkey to learn there the Shabbethaian doctrines, which name was afterward changed by his followers to "Mal'ak" (apostle). But it seems from Ḥakam Ẓebi's answer to Saul, rabbi of Cracow (*ib.*), that he was called "Mal'ak" before he went to the East. At first, like Judah Ḥasid, Ḥayyim headed a Ḥasidic sect and did not openly profess Shabbethaianism. Later (in 1699), when a large group of Ḥasidim made a pilgrimage to Jerusalem under the leadership of Judah Ḥasid, Ḥayyim headed a similar pilgrimage to Jerusalem; but while the former went through Tyrol and Venice, Ḥayyim and his companions traveled via Constantinople. At Jerusalem Ḥayyim made the acquaintance of Samuel Primo, Shabbethai Ẓebi's secretary, and became a fervent admirer of his master. He presided over a small group of Shabbethaians, and preached to them Shabbethaian doctrines. Emden says (*l.c.*) that Ḥayyim carried with him an image of Shabbethai Ẓebi and taught his followers to worship it. Banished from Jerusalem, he went to Salonica, where he joined the DÖNMEH, and wandered as a preacher through various parts of Turkey. At Constantinople he was excommunicated (*c.* 1708); a year later, when he reappeared there, he was banished. He then returned to Poland through Germany, preaching Shabbethaianism as he went.

ḤAYYIM BEN MENAHEM OF GLOGAU: German scholar; lived in the seventeenth and eighteenth centuries. He wrote a work entitled "Mar'eh ha-Ketab bi-Leshon Ashkenaz we-Rashe Tebot" (Berlin, about 1717), a manual, chiefly for the use of women, on reading and writing Judæo-German. It contains rules of vocalization and abbreviations, the correct spellings of names of persons and of Polish and German towns, and a Judæo-German vocabulary. It is from this work that EBER BEN PETHAHIAH plagiarized an abridgment.

ḤAYYIM B. MOSES 'AṬṬAR: Italian rabbi; born at Sale, near Brescia, Italy, 1696; died in Jerusalem 1743. He was educated under the care of his grandfather, R. Ḥayyim. He wrote: "Ḥefeẓ ha-Shem," novellæ on Berakot, Shabbat, Horayot, and part of Ḥullin (Amsterdam, 1732); "Or ha-Ḥayyim," commentary on the Pentateuch (Venice, 1742); "Perot Genusar," or "Peri Toar," novellæ on some of the halakot of the Yoreh De'ah, and chiefly known for its strictures on the "Peri Ḥadash" of Hezekiah da Silva (republished together with the "Or ha-Ḥayyim" at Amsterdam, 1812). He also wrote a work entitled "Rishon le-Ẓiyyon," containing: explanations of seven passages in Berakot, Mo'ed Ḳaṭan, Ta'anit, Megillah, Ḥagigah, Sukkah, Beẓah, and of Maimonides on these tractates; novellæ on the Yoreh De'ah (Nos. 240-293), and the rules relating to a double doubt, ספק ספיקא; explanations on the prophetical books and the Hagiographa (Constantinople, 1751). His "Or ha-Ḥayyim" is very popular among the Jews of the East.

ḤAYYIM B. SAMUEL B. DAVID OF TOLEDO: Spanish rabbi and author; lived at the end of the thirteenth century and at the beginning of the fourteenth. He was a pupil of Solomon b. Adret, and left in manuscript a work, "Ẓeror ha-Ḥayyim," which contains the laws concerning the services for Sabbaths and festivals. Some passages of that work were inserted by Jacob Castro in his "'Erek Leḥem." Ḥayyim also wrote a compendious work entitled "Ẓeror ha-Kesef," containing the rabbinical laws, with many references to the works of the Geonim and of the greatest authorities of Spain and France. This work is divided into five parts. A copy of the "Ẓeror ha-Kesef," written by Solomon b. Abraham Sorrata in 1461, was brought from Cairo by Tischendorf, from which A. Jellinek extracted the preface and the table of contents. These two works are mentioned by Joseph Caro in his "Bet Yosef" and by Moses b. Joseph di Trani in his Responsa (part i., No. 265; part ii., No. 22). Ḥayyim was also the author of novellæ on the Talmud, which are quoted by Bezaleel Ashkenazi in his manuscripts.

According to Heilprin, the same Ḥayyim b. Samuel was the author of another book entitled "Ẓeror ha-Ḥayyim," which treated in poetical form of the Merkabah and gemaṭriot. It is mentioned in "Zeḳan Aharon" by Aaron ha-Levi.

Bibliography: Heilprin, *Seder ha-Dorot*, p. 283, Warsaw, 1891; Azulai, *Shem ha-Gedolim*, part i., p. 56; part ii., p. 126; Benjacob, *Oẓar ha-Sefarim*, pp. 512, 513; Jellinek, in *Monatsschrift*, ii. 245, 287; Fuenn, *Keneset Yisrael*, p. 356.

ḤAYYIM SAMUEL FALK. See Falk, Ḥayyim Samuel.

ḤAYYIM B. SAMUEL HA-KOHEN. See Falk, Joshua ben Alexander ha-Kohen.

ḤAYYIM SHABBETHAI: Rabbi of Salonica; born about 1556; died 1647. After studying in the yeshibah of Salonica under Aaron Sason, Ḥayyim became a member of the bet din presided over by the latter. In 1607 he succeeded his former master as head of the yeshibah and as chief rabbi of Salonica; he officiated forty years, and during that time graduated a large number of Talmudic scholars and rabbis. Ḥayyim Shabbethai was the author of many responsa and decisions. Only four volumes of them have been published: one, under the title of "Teshubot R. Ḥayyim Shabbethai," contains responsa on the ritual laws of the Ṭur Eben ha-'Ezer, with a treatise on the laws of "'agunah" (Salonica, 1651); the other three volumes, published under the title "Torat Ḥayyim" (*ib.* 1713-22), contain responsa on the civil laws of the Ḥoshen Mishpaṭ. In addition to the above he wrote a number of homilies, unpublished, and novellæ to the whole Talmud. Of the latter only those on Ta'anit and on the commentary of R. Nissim to the last chapter of Yoma were published (*ib.* 1797).

ḤAYYIM B. SOLOMON: Russo-Polish preacher; born at Wilna; died there Dec., 1804 (1794?), at an advanced age. His father, R. Solomon b. Ḥayyim, who died in 1766, was dayyan and preacher at Wilna. Ḥayyim was a friend of Elijah Gaon of Wilna and of Raphael ha-Kohen, later of Hamburg, who, as rabbi of Minsk and the surrounding district, appointed him, in 1757, traveling preacher. Ḥayyim appears to have been previously rabbi or preacher in Serhei, now government of Suwalki, for he is usually surnamed "Serheier." In his later years he occupied his father's position as preacher and "moreh hora'ah" in Wilna. Ḥayyim was one of the two commissioners sent out in the summer of 1796 by the rabbis and notables of Wilna, headed by the gaon, to agitate against the Ḥasidim in Lithuania and White Russia, especially in Minsk.

ḤAYYON, GEDALIAH: Turkish rabbi: pupil of Alfandari the Younger (see Azulai, "Shem ha-Gedolim," and Grätz, "Gesch." x. 360); born at Constantinople in the second half of the seventeenth century. He settled at Jerusalem; subsequently he traveled as messenger of the city of Hebron, without receiving compensation, and afterward returned to Jerusalem (Azulai, *l.c.*; Luncz, "Jerusalem," i. 130, No. 238). A scholar by the same name was a contemporary of Elijah ibn Ḥayyim (comp. the latter's responsa, "Mayim 'Amuḳḳim," No. 54; he is also mentioned once in the responsa of Samuel di Modena, Ṭur Eben ha-'Ezer, No. 36). This scholar may have been an ancestor of Gedaliah Ḥayyon. The latter is not known as a scholar, but he was a student of the Cabala, and was considered a man of extraordinary piety.

K. L. GRÜ.

ḤAYYON, MOSES B. AARON: Rabbi of Jerusalem, later of Safed; flourished at the end of the seventeenth and the beginning of the eighteenth century. He was the colleague of Abraham Yiẓḥaḳi (comp. Grätz, "Gesch." x. 517, note 6) and the son-in-law of Jacob ḤAGIZ. In 1701 he signed at Jerusalem a circular letter in favor of Moses Ḥagiz, addressed to the community of Leghorn (see Moses Ḥagiz's "Sheber Poshe'im," No. 11). From the same work (No. 1) it is known that the full name of his father, who was a member of the rabbinical college about 1693, and author of cabalistic works, was Obadiah Aaron Ḥayyon. Unlike his father, Moses Ḥayyon devoted himself more to Talmudic literature. Of his works a few responsa only have been preserved.

K. L. GRÜ.

Father of Scientific Hebrew Grammar.

ḤAYYUJ, JUDAH B. DAVID (Abu Zakariyya Yaḥya ibn Daud): Spanish-Hebrew grammarian; born in Fez, Morocco, about 950. At an early age he went to Cordova, where he seems to have remained till his death, which occurred early in the eleventh century. He was a pupil of MENAHEM BEN SARUḲ, whom he later helped to defend against the attacks of DUNASH BEN LABRAṬ and his followers. Later in life Ḥayyuj developed his own theories about Hebrew grammar, and was himself obliged to step forward as an opponent of the grammatical theories of his teacher. His thorough knowledge of Arabic grammatical literature led him to apply to the Hebrew grammar the theories elaborated by Arabic grammarians, and thus to become the founder of the scientific study of that discipline. The preceding scholars had found the greatest difficulty in accounting, by the laws of Hebrew morphology, for the divergences existing between the regular, or so-called "strong," verbs and the "weak" verbs. A hopeless confusion appeared to reign here in Hebrew; and much ingenuity was spent in endeavoring to discover the principles that controlled the conjugation of the weak verbs. The weakness of Menahem's assertion that there are stems in Hebrew containing three letters, two letters, and one letter respectively was pointed out by Dunash; but, although the latter was on the road to a solution of the problem, it was left to Ḥayyuj to find the key.

His Works.

Ḥayyuj announced that all Hebrew stems consist of three letters, and maintained that when one of those letters was a "vowel letter," such a letter could be regarded as "concealed" in diverse ways in the various verbal forms. To substantiate his theory he wrote the treatise upon which his reputation chiefly rests, the "Kitab al-Af'al Dhawat Ḥuruf al-Lin" (The Book of Verbs Containing Weak Letters). The treatise is in three parts: the first is devoted to verbs whose first radical is a weak letter; the second to verbs whose second radical is weak; and the third to verbs whose third radical is weak. Within each division he furnishes what he considers a complete list of the verbs belonging to the class in question, enumerates various forms of the verb, and, when necessary, adds brief comments and explanations. Preceding each division the principles underlying the formation of the stems belonging to the division are systematically set forth in a series of introductory chapters.

As a supplement to this treatise he wrote a second, which he called the "Kitab al-Af'al Dhawat al-Mathalain" (The Book of Verbs Containing Double Letters), and in which he points out the principles governing the verbs whose second and third radicals are alike. He furnishes a list of these verbs, together with their various forms occurring in the Bible. Besides the two treatises on verbs Ḥayyuj wrote "Kitab al-Tanḳiṭ" (The Book of Punctuation). This work, probably written before his two chief treatises, is an attempt to set forth the features underlying the Masoretic use of the vowels and of the word-tone. In this work he deals chiefly with nouns, and its purpose is more of a practical than of a theoretical character.

A fourth work, the "Kitab al-Natf" (The Book of Extracts), is known to have been written by Ḥayyuj, but only a fragment, still unpublished, and a few quotations by later authors have survived. This was a supplement to his two grammatical works on the verb, and in it he noted the verbs omitted by him in the former treatises. In doing this he anticipated in a measure Ibn Janaḥ's "Mustalḥaḳ," which was devoted to this very purpose. He arranged and discussed the verbal stems in question, not alphabetically, but in the order in which they occur in the Bible.

His Influence.

Ḥayyuj exerted an immense influence on succeeding generations. All later Hebrew grammarians up to the present day base their works on his; and the technical terms still employed in current Hebrew grammars are most of them simply translations of the Arabic terms employed by Ḥayyuj. His first three works were twice translated into Hebrew, first by Moses ibn Gikatilla and later by Abraham ibn Ezra. The following modern editions of his works have appeared:

Ewald and Dukes, "Beiträge zur Geschichte der Aeltesten Auslegung und Spracherklärung des Alten Testaments," Stuttgart, 1844 (i. 123, ii. 155; vol. iii. contains Ibn Ezra's translation of Ḥayyuj).

John W. Nutt, "Two Treatises on Verbs Containing Treble and Double Letters by R. Jehuda Ḥayug of Fez: From a Hebrew Translation of the Original Arabic by R. Moses Giḳaṭilla of Cordova; to Which Is Added the [Arabic text of the] Treatise on Punctuation by the Same Author, Translated by Aben Ezra: Edited from Bodleian MSS. with an English Translation." London and Berlin, 1870.

ḤAYYUN, AARON BEN DAVID: Cabalist; lived at Jerusalem in the seventeenth century. He, together with David Yiẓḥaḳi and Jacob Molko, was dayyan in the rabbinate of Moses Galante. A decision by Ḥayyun concerning the dispute between Mordecai ha-Levi, chief rabbi of Cairo, and Judah Ḥabillo, rabbi of Alexandria, is published in the former's "Darke No'am" on the Shulḥan 'Aruk, Ḥoshen Mishpaṭ (Nos. 47, 48). He was the author of a commentary on the Zohar, of which only a small part was published, under the title "Maḥaneh Aharon" (Leghorn, 1795).

Bibliography: Michael, *Or ha-Ḥayyim*, No. 287; Benjacob, *Oẓar ha-Sefarim*, p. 320, No. 994, where Ḥayyun is called "Aaron b. Abraham."

K. M. Sel.

ḤAYYUN, ABRAHAM BEN NISSIM: Portuguese scholar; father of Don Joseph Ḥayyun, rabbi of Lisbon; lived in the fifteenth and sixteenth centuries. He was the author of an ethical work entitled "Amarot Ṭehorot" (Constantinople, 1516).

ḤAYYUN, NEHEMIAH ḤIYYA BEN MOSES: Bosnian cabalist; born about 1650; died about 1730. His parents, of Sephardic descent, lived in Sarajevo, Bosnia, where probably he was born, although in later life he pretended that he was a Palestinian emissary born in Safed. He received his Talmudic education in Hebron. In his eighteenth year he became rabbi of Uskup, near Salonica. This position, however, he held only for a brief period. Thereafter he led a wandering life, as a merchant, as a scholar, or as a mendicant. In the guise of a saint he constantly sought adventures of love. From Uskup he went to Palestine, then to Egypt. In 1708 he made his appearance in Smyrna, where he won some adherents willing to help him publish his "Mehemnuta de Kulla," and thus secure a rabbinical position for him. In this work he asserted that Judaism teaches a Trinitarian God. This God, he declared, embodies three persons ("parẓufim")—the Ancient of Days ("'Attiḳ"), the Holy King, and the Shekinah. Ḥayyun's own part in this book consists only of two commentaries; the text was anonymously written by a Shabbethaian pupil. Leaving Smyrna, Ḥayyun was led to Jerusalem with pomp and ceremony; but the rabbi of Smyrna, who had seen through his pretensions, warned the rabbis of Jerusalem of his heresies. The immediate consequence was that even before his arrival the rabbis of Jerusalem, though they had never read his work, excommunicated him as a "min," and condemned his book to be burned.

Excommunicated at Jerusalem.

At Prague.

Excommunicated, he met little sympathy anywhere (1709-11) with his cabalistic fraud. In Venice, however (1711), with the approval of the rabbis of that community, he had printed an extract from his work, under the title "Raza di-Yiḥudah," into the beginning of which he had woven the first stanza of a lascivious Italian love-song, "La Bella Margaritha," with a mystical hymn entitled "Keter 'Elyon." In Prague, where he lived from 1711 until 1712, he found an appropriate soil for his teaching. Joseph Oppenheim, the son of David Oppenheim, received him. The cabalistic rabbi of Prague, Naphtali Cohen, was also greatly impressed with his personality. He even highly recommended his book, basing his judgment merely upon fraudulent testimonials. Here Ḥayyun delivered sermons which had a Shabbethaian background, and which he had printed in Berlin (1713) under the title "Dibre Neḥemyah." Moreover, he played the rôle of a wizard, of one who had intercourse with Elijah, of a person capable of resurrecting the dead and of creating new worlds. By writing amulets he earned the money he needed for gambling. By fraudulent introductions he also managed to obtain friends in Vienna, Nikolsburg, Prossnitz, Breslau, Glogau, and Berlin, and formed political connections with Löbel Prossnitz of Moravia. In Berlin (1713), the community of which city was then split into two parties, he succeeded in having his book "Mehemnuta de Kulla," or "'Oz le-Elohim," printed with the approval of the Berlin rabbi, Aaron Benjamin Wolf.

In Amsterdam.

On the prestige he obtained from his book he now tried his fortune in Amsterdam. Almost from the outset he encountered the antagonism of Ẓebi Ashkenazi, rabbi of the German congregation of Amsterdam, who mistook him for another Ḥayyun, an old enemy of his. Ḥayyun surrendered his book to the board of the Portuguese congregation in Amsterdam, in order to obtain permission to sell it. Distrusting their own rabbi, Ayllon, this board brought the matter before Ẓebi Ashkenazi, who, of course, very soon detected its heretical character and called for its author's expulsion. At this point, however, Ayllon, evidently under some unexplained obligation to Ḥayyun, became his defender, and made Ḥayyun's cause entirely his own and that of the Portuguese community. The result was that Ayllon was charged by the board of his synagogue to form a commission to reexamine Ḥayyun's book. Without awaiting the decision of this commission, Ẓebi Ashkenazi and his anti-Shabbethaian friend Moses Ḥagiz excommunicated Ḥayyun (July 23, 1713). They published their decision, with various unjustified calumnies, in pamphlets, which, answered by counter pamphlets, greatly increased the ill feeling between the Portuguese and the German congregation.

The Portuguese commission announced its decision on Aug. 7, 1713. In spite of the objections of two members of the commission, one of them Ayllon's own son, they declared Ḥayyun entirely guiltless of heresy, and he was rehabilitated in a solemn assembly of the great Amsterdam synagogue. But Ḥayyun was excommunicated by many other outside congregations, and his disreputable antecedents and the deceptive means by which he acquired introductions were exposed, especially by Leon Brieli, the aged rabbi of Mantua. In spite of this the members of the Portuguese commission adhered to their decision, but felt themselves bound to publicly exonerate themselves, and for this purpose issued "Ḳosht Imre Emet," a pamphlet which was not without obvious misstatements. Protected by the Portuguese, Ḥayyun could even insult his opponents in pamphlets, and did so. He attacked Ẓebi Ashkenazi, in "Ha-Ẓad Ẓebi," Amsterdam, 1713; Joseph Ergas, in "Shalhebet Yah" and "Ketobet Ḳa'ḳa'"; Ẓebi Ashkenazi, Moses Ḥagiz, and Leon Brieli, in "Pitḳa Min Shemaya"; Moses Ḥagiz, in "Iggeret Shebuḳin," Amsterdam, 1714. At last, however, Ḥayyun left for the Orient, and every one felt relieved. The introductions given him by his supporters were of little avail; wherever he went the doors were barred against him.

Leaves Amsterdam.

In August, 1724, through the influence of a vizier, he succeeded at Constantinople in absolving himself from the excommunication on the condition that he should abstain from teaching, writing, and preaching on cabalistic subjects. Under oath he promised this, but subsequently broke his word. Thus rehabilitated, he went to Vienna and managed, by urging his Trinitarian teachings and professing his intention to convert the Jews to Christianity, to obtain a letter of protection from the Austrian emperor. Secretly he sympathized with the Shabbethaians, but openly he still professed to be an Orthodox Jew. But his game had been played. Before the walls of Prague he faced starvation. In Berlin he threatened to embrace Christianity if support were denied him. His friends in Amsterdam, even Ayllon, forsook him. In April, 1726, he was excommunicated in Hamburg and finally in Altona. He fled to North Africa, where he died. His son turned Christian, and endeavored to revenge his father by calumnious attacks on Judaism.

ḤAYYUT, ISAAC BEN JACOB: Polish rabbi; died at Skala, near Lemberg, Sept., 1726. He was descended from an old Provençal family which first settled in Bohemia, and was the grandson of R. Menahem Manesh Ḥayyut of Wilna. He became rabbi of Skala late in life, and remained there until his death. He wrote thirteen works, which are enumerated in the preface to his "Zera' Yiẓḥaḳ" on the Mishnah, which was published by his son Eliezer (Frankfort-on-the-Oder, 1732). His "Iggeret Ḳeẓ Ḥai," describing in a cabalistic manner "terrible things which he had seen in the upper world," was published in Czernowitz in 1862.

ḤAYYUT, MENAHEM (MANESH, MANUS, MANISH, MANNUSCH) B. ISAAC: Polish rabbi; died at Wilna about May, 1636. He was the son of R. Isaac b. Abraham Ḥayyut, a descendant of a pious Provençal family; his father went to Prague in 1584 (see Gans, "Ẓemaḥ Dawid," *sub anno*). It seems that in his younger days, about 1590, he was rabbi of Torbin, Moravia. He is the first known rabbi of Wilna, and his tombstone is the oldest in the old Jewish cemetery of that city. The Jewish community of Wilna was established in the last decade of the sixteenth century, and as Abraham Samuel Bacharach of Worms (d. 1615) congratulates Ḥayyut on his good position in a far-away place (Responsa, "Ḥut ha-Shani," No. 31) it is probable that the latter was really the first rabbi of Wilna. He is also mentioned in Ephraim Cohen's responsa "Sha'are Efrayim," No. 29, and in Moses Jekuthiel Kaufmann's "Leḥem ha-Panim" on Yoreh De'ah, the first reference indicating Ḥayyut's proficiency in geometry. His only known published work is "Zemirot le-Shabbat," or "Ḳabbalat Shabbat," which appeared in Prague (according to Zunz, "Z. G." p. 303, in Lublin) in 1621, but of which only one copy is known to exist (see Steinschneider, "Cat. Bodl." No. 6348). He was the author of an elegy on the conflagration of Posen and of one on the death of his brother Samuel, which appeared in his father's "Pene Yiẓḥaḳ" (Cracow, 1591). The Bodleian Library contains a manuscript work of his, entitled "Derek Temimim," which contains seven commentaries on the section Balaḳ of the Pentateuch and which is included in the Oppenheim collection ("Collectio Davidis," MS. No. 375, Hamburg, 1826).

Bibliography: Fuenn, *Ḳiryah Ne'emanah*, pp. 63–66, Wilna, 1860; Fürst, *Bibl. Jud.* ii. 321; Zedner, *Cat. Hebr. Books Brit. Mus.* pp. 363, 572; Walden, *Shem ha-Gedolim he-Ḥadash*, p. 93, Warsaw, 1882.

HAZAEL: The most powerful of the kings of Damascus, and a ruler of general historical as well as of Biblical importance. While Ahab was still reigning as King of Israel the prophet Elijah was ordered by Yhwh to anoint Hazael as the coming King of Damascus (I Kings xix. 15). At this time Ben-hadad II. was at the height of his power. It is not mentioned whether Elijah was able to carry out this difficult and dangerous commission; but in any case the prophetic and reforming party in Israel had a share in the promotion of Hazael's ambition. When Joram, the successor of Ahab, was near the end of his reign (about 845 B.C.), Ben-hadad fell sick, and sent Hazael to Elisha, the successor of Elijah, to inquire as to the issue of his sickness. Elisha told Hazael in reply that his master would not recover, and predicted to him that he himself would be the next king, and would wage war against Israel with relentless cruelty. Hazael upon his return assassinated Ben-hadad and seized the throne (II Kings viii. 7–15).

The result of Hazael's encounters with Israel was disastrous to the latter. Joram, in alliance with his nephew Ahaziah, King of Judah, was defeated and wounded at Ramoth-gilead in a battle against the forces of Hazael (II Kings viii. 28 *et seq.*). After the murder of Joram by the usurper Jehu, the latter also found himself compelled to defend his kingdom against Damascus, again without success. Hazael "smote them in all the coasts of Israel," and secured for Damascus not only the long-disputed territory of Bashan and Gilead, but also the whole of the country east of Jordan, which in the days of Omri had been for a time subject to Israel (II Kings x. 32 *et seq.*). These successes of Hazael were followed by invasions of western Palestine, in the course of which he destroyed the city of Gath, ranged at will over the kingdom of Judah, and dictated terms of submission to King Jehoash, from whom he took the richest spoil of the Judean palace and temple in return for cessation of hostilities (II Kings xii. 17–18). His march through Philistia and Judea implies that northern Israel had been rendered helpless, and probably reduced to vassalage.

Still more remarkable was the stand made by Hazael against the attacks of the Assyrians, then under the leadership of Shalmaneser II. (860–825). Hazael's predecessor, Ben-hadad II., had on at least two occasions (854 and 849) been able to secure the aid of several powerful princes in defending the western country against the great conqueror; but Hazael had to endure the brunt of invasion alone. Shalmaneser recounts two great battles fought with Hazael, in 842 and 839, in which he claims to have been victorious. He was, however, unable to take the city of Damascus, and during the latter part of the reign of Hazael southern Syria was unmolested by the Assyrians. Thus, while Hazael was the conqueror and oppressor of Israel, he did memorable service to the Mediterranean coast-land by standing as a bulwark against its most powerful and persistent invader.

ḤAZAḲ, JACOB RAPHAEL HEZEKIAH: Italian rabbi of the eighteenth century; born 1689; died at Padua 1782 (Ab 16). He was a pupil of Mordecai Basan of Verona, whence he went to Padua, where he studied with Moses Ḥayyim Luzzatto. He succeeded Menahem Modena as rabbi at Padua. Ḥazaḳ was involved in a number of arguments with the rabbis at Venice. He was the author of responsa; of notes to the four Ṭurim, "Maginne Ereẓ," "Ashle Rabrebe," "Appe Rabrebe," and "Shifte Kohen"; and of "Sefer Kelalim," on the Gemara and Posḳim.

ḤAZAḲAH (lit. "taking hold," "possession"): The term has various meanings in the Talmud; the one most cognate to the original meaning of the Hebrew root is that of "taking possession," which act constituted acquisition with regard to both movable and immovable property (see ALIENATION AND ACQUISITION). But it is more frequently used to cover the acquisition of property by continued and undisturbed possession during a period of time prescribed by law.

Prescription.

Mere possession was not sufficient to establish a title to real property. The presumption was that "real property is always in the possession of its owner" (B. Ḳ. 95a) until evidence showed that he had sold it or had given it away. Since, however, men are not careful in preserving documentary evidence for more than three years (B. B. 29a), the Rabbis ordained that undisturbed possession for three consecutive years was sufficient to establish a claim to real estate (see CONFLICT OF LAWS). In the case of houses or of other buildings the possessor was required to produce evidence of continuous occupancy, either by himself or by a tenant holding a lease from him, for three full years "from day to day"; while in the case of fields or gardens the prevailing opinion was that possession for three successive harvests of the same kind was sufficient, even when the last harvest had been gathered before the expiration of the three years (B. B. 28a, 36b; Maimonides, "Yad," To'en we-Niṭ'an, xii. 1; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 141, 1, Isserles' gloss).

"Possession not based on a valid claim is not regarded" (B. B. 41a). If the possessor claimed that he had bought the land of its owner, or that it had been given to him, or that he had inherited it, possession for three years was sufficient. But if he said that he took possession of the property because there was no other claimant, possession even for many years was of no value. And if at any time during the three years the owner protested ("maḥa'ah"), either in the presence of the holder or before two witnesses, against the unlawful holding of his property, the fact of possession was of no value in establishing title to the property (B. B. 29a, 38b).

The following persons could not acquire property by prescription: (1) a building contractor; (2) a partner; (3) a steward; (4) a husband his wife's in which he had the right of usufruct; (5) a father his son's, or (6) a son his father's; (7) a guardian his ward's; (8) a minor; (9) an idiot; (10) a deaf-mute (whose property, in turn, could not be acquired by others); (11) a robber. No argument of possession could be advanced to establish a title to the property of a fugitive who had fled in fear of his life, or to property belonging to a synagogue, or to communal charitable institutions (B. B. 42a; Ṭo'en we-Niṭ'an, xiii. 3; Ḥoshen Mishpaṭ, 149).

With regard to movable property the presumption was that it belonged to the possessor unless it was conclusively proved that he held it under false pretenses. Even if the owner brought evidence that the object belonged to him, the possessor was believed if he claimed that he had bought it or that he had received it as a gift, and he needed only to take the rabbinical oath ("hesset") to establish his claim (B. B. 45a; Sheb. 46b). Talmudic law distinguished, however, between objects that people are accustomed to lend or hire and objects that people are not accustomed to lend or hire; the mere claim of possession, even for many years, was not sufficient to establish a title to objects of the former class, and the owner could at any time establish a claim by producing witnesses to testify that they belonged to him; but the latter class of objects could be acquired by mere possession (B. M. 116a; Sheb. 46b; Ṭo'en we-Niṭ'an, viii. [where a more restricted interpretation of the expression דברים העשוין להשאיל ולהשכיר is given]; Ḥoshen Mishpaṭ, 133).

The maxim that anything that is in a man's possession is his did not apply to a mechanic whose occupation it was to repair the objects in question. Even if he had had an object in his possession for a long time, the owner could claim it on the ground that he had given it to him for repair (B. B. 42a, 45a, 47a; Ṭo'en we-Niṭ'an, ix. 1; Ḥoshen Mishpaṭ, 134).

Cattle an Exception.

Small cattle of the kind that are left in the open and allowed to move from place to place were excluded from the principle governing title by possession in movable property, for the supposition was that they had wandered onto other premises without the knowledge of their owner. There is a difference of opinion among the later authorities as to whether three years' possession was sufficient to establish the right of property in them. Large cattle of the kind that are delivered to a shepherd and are always under his control, or infant slaves that are unable to walk, were treated like other movable property, while adult slaves were considered in the same category as immovable property, and a continuous possession of three years was sufficient to establish title to them (B. B. 36b; Ṭo'en we-Niṭ'an, x. 1, 4; Ḥoshen Mishpaṭ, 135).

The Talmudic law applies the principle of ḥazaḳah also to easements or servitudes consisting in the right or privilege of using another's land without compensation. For example, if one causes one of the beams of his house to protrude into the premises of his neighbor, and the neighbor does not object immediately, the owner is regarded as having a ḥazaḳah in the servitude of his neighbor's premises as regards the beam. There are three distinct opinions among the later authorities regarding the nature of this ḥazaḳah. Some (the Geonim and Maimonides) are of the opinion that the ḥazaḳah of easement need not be accompanied by a real claim, nor need it last for three successive years as is required with movable property. Others (Jacob Tam, R. Jonah, Solomon ben Adret) hold that this case is in all respects similar to the case of immovable property, needing both a real claim and three years' possession. Others, again, adopt the compromise of Samuel ben Meïr, who regards easements as immovable property in so far as they require a real claim to title, but with the difference that they do not require three years' possession to establish the right (Maimonides, "Yad," Shekenim, xi. 4; comp. "Maggid Mishneh" *ad loc.*; Ḥoshen Mishpaṭ, 153–155; see Easement).

Presumption.

Presumptions are principles formed on a vast amount of judicial experience, by which the court is guided not only in settling the question as to which of the contending parties incurs the burden or responsibility of bringing proof of the assertions made in pleading, but also in rendering a decision in doubtful cases. Although inferior to actual evidence and entirely disregarded when refuted by it, presumption was still a potent factor in Jewish law, and exerted a great influence in the decision of civil as well as capital cases. In accordance with the prevailing tendency of the Talmud to find a basis in the Scriptures for every principle, the Rabbis attempted to derive the principle of presumption from a Biblical passage (Lev. xiv. 38) in regard to the plague of leprosy in houses. After the priest had examined the plague-sore and found it to be of a certain size, he locked the house for seven days, at the conclusion of which time another examination was to be made. "Is it not possible that while he was locking the door the plague-sore diminished in size? Since, however, Scripture takes no notice of this, it must be because it presumes that the plague remained in the state in which it was first found by the priest: Scripture teaches us here the principle of presumption" (Ḥul. 10b). Of course, the validity of this principle does not depend upon this particular passage, for, in fact, some of the amoraim are dissatisfied with this mode of derivation and claim that this case by no means proves the validity of the principle. According to these, the principle of ḥazaḳah is traditional, and was handed to Moses on Sinai (comp. Tosef., Ḥul. 10b; R. Samuel Edels *ad loc.*).

The various kinds of presumptions found scattered throughout the Talmud may be divided as follows: (1) presumptions of physical conditions ("ḥazaḳah di-gufa"); (2) presumptions arising from the fact of possession ("ḥazaḳah di-mamona"); (3) presumptions arising from the nature of man or from certain actions and circumstances ("ḥazaḳah mi-koaḥ sebara").

(1) All flesh is presumed to have been cut from a living animal ("eber min ha-ḥay") and hence to be forbidden food until it has been ascertained that the animal was ritually slaughtered; hence an examination of the organs to be severed at slaughtering is necessary. After it is slaughtered it is presumed to be kasher until it is demonstrated how it became forbidden; hence no examination of the animal is necessary, except of those organs (such as the lungs) which contract a disease most readily (R. Ḥuna in Ḥul. 9a, followed by all later authorities).

(2) In cases involving money the prevailing principle was אוקי ממונא בחזקת מריה ("leave the money in the possession of its master"). Hence the general principle in Jewish law, that the burden of proof is on the plaintiff (B. Ḳ. 35a; B. M. 100a; Ket. 20a; *et al.*). This principle has far-reaching results. It was followed not only where there was not suf-

ficient evidence to establish the truth (B. Ḳ. 46a), but also where there was contradictory evidence (Ket. 20a). If after a case has been decided in accordance with a presumption the plaintiff violently takes the object of contention from the defendant so that the presumption shall favor him, it is doubtful whether the former presumption becomes thus annihilated; and the later authorities differ as to which presumption to follow in such a case (Tosef., *ib. s.v.* ואוקי; comp. B. M. 6b; ShaK in "Teḳafo Kohen").

Kinds of Presumption.

(3) Many of the presumptions established by the Talmud are based on an analysis of the human mind, and find their chief support in the nature of man (Ket. 75b). It was presumed that no woman would have the audacity to declare in her husband's presence that she was divorced from him, if she were not (Ket. 22b; Ned. 91a). No man was presumed to have paid his debt before it was due (B. B. 5a). No one would be so shameless as to deny a debt in the presence of his creditor (B. M. 3a; B. Ḳ. 107a; *et al.*). The agent was presumed to fulfil his commission ('Er. 31a). The master was presumed to have paid the day-laborer at the end of his day's work (B. M. 112b). No man was presumed to permit himself to be robbed without a struggle (Yoma 85a; Sanh. 72a). It was presumed that the scholar would not issue any deed unless it had been correctly executed (Pes. 9a). A house was presumed to have been examined for leaven on the fourteenth of Nisan, and one hiring a house on that day need not examine it again (Pes. 4a). A presumption was often established through the repetition of an incident a number of times. The most notable instance of this kind is that of the GORING OX, which was regarded as a vicious animal ("mu'ad") after it had committed the offense three times (B. Ḳ. 23b). It was not permitted to marry a woman who had been twice divorced on account of barrenness, for she was presumed to be a barren woman (Yeb. 64a), nor a woman whose two husbands died a natural death, for she was presumed to be a murderous ("ḳaṭlanit") woman (Niddah 64a). Parents, two of whose children died at circumcision, need not circumcise their other children, for the presumption was established that their children could not stand the pain of circumcision ('Er. 97a). R. Simeon ben Gamaliel is of the opinion that a presumption may be established only after an incident has occurred three times (Yeb. 64b; comp. *ib.* 65a, Tosef., *s.v.* "We-Shor" and "Niset"; Asheri, vi. 14, where it is argued that Rabbi's ruling, as is shown by his decision in the case of the goring ox, does not differ from that of R. Simeon ben Gamaliel in so far as monetary cases are concerned).

No definite rule was laid down by the Rabbis for guidance in cases where presumptions collide, that is, where each party has some presumption in his favor. In such cases it is for the court to decide which of the two is the more important. A bought an object from B, but had not paid the money; A desired to return the object to B on the ground that he had found a defect in it which, he claimed, was in it before it was delivered to him. A had the presumption of possession (of the money), B the presumption that the defect was created while the object was in the possession of him on whose premises it was found: the decision was in favor of B (Ket. 76a; Maimonides, "Yad," Mekirah, xx. 14; Ḥoshen Mishpaṭ, 124; comp. B. B. 92a). In all such cases the court had to decide as to which of the presumptions was stronger, and render its decision accordingly.

The influence of presumptions in Jewish law extended even to capital cases, and punishment was frequently inflicted on that basis. Man and wife and children living together and treating one another as such are legally considered as one family, and illicit relationships between them would be punished with death on the strength of the presumption, even though the kinship could not be proved by legal evidence (Ḳid. 80a). In regard to the presumption that a man would not offer a false argument when, if he were willing to lie, he could produce a better one, see JUS GAZAKA; MIGGO.

E. C. J. H. G.

HAZAR-ENAN: Place on the boundary of Palestine, apparently to the northeast, between Zephron and Shepham, not far from the district of Hamath, in Damascene Syria (Num. xxxiv. 9, 10; Ezek. xlvii. 17, xlviii. 1 [R. V. "Hazar-enon"]).

E. G. H. B. P.

HAZAR-SHUAL: Town in the south of Judah (Josh. xv. 28; Neh. xi. 27), between Beth-palet and Beer-sheba, afterward included in the territory of Simeon (Josh. xix. 3; I Chron. iv. 28), where it is mentioned between Moladah and Bilhah. After the Captivity Hazar-shual was repeopled (Neh. xi. 27).

E. G. H. B. P.

HAZAR-SUSAH: City in the extreme south of Judah, allotted to Simeon (Josh. xix. 5). In the parallel passage I Chron. iv. 31, the reading is "Hazarsusim," where the Greek translators have 'Ημισυσεωσιμ, which would presuppose the Hebrew reading "Ḥaẓisusim." In Joshua it is mentioned between Beth-marcaboth and Beth-lebaoth; in Chronicles between Beth-marcaboth and Beth-birei. Whether read "Hazar-susah" (village of the horse) or "Hazar-susim" (village of horses), its connection with Beth-marcaboth ("house of chariots") suggests that it was a station used for military purposes (comp. I Kings x. 28, 29).

E. G. H. B. P.

HAZARMAVETH: Third son of Joktan, of the family of Shem (Gen. x. 26; I Chron. i. 20). The name is preserved in the modern Hadramaut, a province of southern Arabia. Strabo (xvi. 42) mentions the *Χατραμωτῖται*, one of the four chief tribes of southern Arabia, known for their traffic in frankincense.

E. G. H. B. P.

HAZAZON-TAMAR: Dwelling-place of the Amorites when the four kings made their invasion and fought with the five kings (Gen. xiv. 7 [A. V. "Hazezon-tamar"]). In II Chron. xx. 2 it is identified with En-gedi, where the Ammonites, Moabites, and others met before going out to battle against Jehoshaphat.

E. G. H. B. P.

HA-ẒEBI (הצבי): Hebrew weekly, published at Jerusalem, beginning in 1876, by Eliezer Benjudah. At the end of 1899 he began to publish a supplement, also in Hebrew, dealing with agriculture, under the title "Ha-'Iḳḳar." The supplement, however, was discontinued after a few months. Suspended by official order toward the end of 1900, "Ha-Ẓebi" resumed publication with the title "Hashḳafah" (השקפה), but under the control of Ḥemdah, the wife of Eliezer Benjudah.

G. M. Fr.

HA-ẒEFIRAH (הצפירה; in modern Hebrew, "The Morning"): Hebrew newspaper; founded by Ḥayyim Selig Slonimski at Warsaw Jan. 25, 1862. In 1863 it was suspended on account of the Polish troubles. Slonimski revived it in 1874, the first two volumes appearing at Berlin, the third and subsequent volumes at Warsaw. Down to March 23, 1886, it was issued as a weekly; on April 23, 1886, Slonimski, with Sokolow as coeditor, began a daily edition. In addition to general news, "Ha-Ẓefirah" formerly contained many scientific articles on physics, astronomy, chemistry, etc., written principally by Slonimski and Solomon Jacob Abramowitsch. Among its contributors were Kalman Schulmann and other well-known Hebrew litterateurs. With the beginning of the daily edition it was devoted exclusively to general political and specifically Jewish news.

Bibliography: *Entziklopedicheski Slovar*, s.v. *Slonimski*.

G. M. Sel.

HAZEROTH (חצרות): A station of the Israelites in the desert (Num. xi. 35, xii. 16, xxxiii. 17; Deut. i. 1). It was at Hazeroth that Miriam, having slandered her brother Moses, was stricken with leprosy (Num. xii. 1-11). The geographical position of Hazeroth is indicated in Deut. i. 1—in the Arabah opposite the Red Sea. It is identified with the modern 'Ain al-Khaḍra, on the route from Mt. Sinai to 'Aḳaba.

Bibliography: Robinson, *Researches*, i. 223.

E. G. H. M. Sel.

HAZKARAT NESHAMOT: Memorial service, held, according to the German ritual, after the readings of the Law and the Prophets in the morning service on the eighth day of Pesaḥ, the second of Pentecost, the eighth of Sukkot (Shemini 'Aẓeret), and the Day of Atonement. In memory of a father the following is recited:

> "May God remember the soul of my respected father, ——, son of ——, who has gone to his eternal home; on whose behalf I vow as alms ——: may his soul be bound up in the bundle of life [see I Sam. xxv. 29] with the souls of Abraham, Isaac, and Jacob, Sarah, Rebekah, Rachel, and Leah, and all other righteous men and women that are in the Garden of Eden, and let us say, Amen."

The same prayer is recited in memory of a mother, with a change in gender; he whose father and mother are dead says both prayers. There is another formula for grandparents and for other kindred, and a special prayer for such as have died as martyrs for the faith. In some synagogues this prayer is followed by the reading of a list of those in memory of whom money has been given for charity; for them another form of prayer is used. In many places a similar prayer is recited on ordinary Sabbaths, after the readings from the Law and the Prophets, its opening words being: "El male raḥamim" (God, full of mercy). The service closes with the following memorial prayer for the souls of the martyrs:

> "Father of Mercy, who dwelleth on high! May He in His abundant mercy turn to the saintly, the upright, the perfect, to those holy communities that gave up their lives for the glory of His name. They were lovely and pleasant in their lives, and in death they were not parted; they were swifter than eagles, they were stronger than lions [II Sam. i. 23], to do the will of their Master, the wish of their Rock. May our God remember them for good with the other just ones of the world, and avenge before our eyes the spilled blood of His servants [Ps. lxxix. 3], as it is written in the law of Moses, the man of God . . . [Deut. xxxii. 43]. By the hands of Thy servants the Prophets it is written . . . [Joel iv. 21 (iii. 21)]. And in Thy holy writings it is written . . . [Ps. lxxix. 10]; and it is also said . . . [Ps. ix. 13, cx. 6-7]."

In western Germany this "in memoriam" is read only on the Sabbath before Pentecost and on that before the Ninth of Ab; where the Polish minhag is used it is read on all Sabbaths that do not fall on days of rejoicing; and it is omitted when the new moon, other than that of Iyyar or Siwan, is announced. The custom of remembering the souls of the departed is traced to Pesiḳta xx., where mention is made of salvation of souls through charity and prayer. The Maḥzor Vitry (dated 1208) says that in its time "alms for the dead are set aside" only on the Day of Atonement, showing that the memorial service on the three festivals came into use somewhat later. In the Sephardic ritual the origin of the particular service for certain days in the year is unknown; but the "Hashkabah" (laying to rest) is, on ordinary Sabbaths and on festivals, or even on Mondays and Thursdays, recited in the synagogue, either after the Scroll has been returned to the Ark or, at the request of a son of the departed who has been called to the desk, immediately after he has read his part of the lesson. The prayer reads as follows, subject to modifications in the case of women or children:

> "A good name is more fragrant than rich perfume; and the day of death better than the day of one's birth. The sum of the matter, after all hath been heard, is, To fear God, and keep His commandments, for this is the whole of man. Let the pious be joyful in glory; let them sing aloud upon their couches.
>
> "May the repose which is prepared in the celestial abode, under the wings of the Divine Presence in the high place of the holy and pure—that shine and are resplendent as the bright light of the firmament—with a renewal of strength, a forgiveness of trespasses, a removal of transgressions, an approach of salvation, compassion and favor from Him that sitteth enthroned on high, and also a goodly portion in the life to come, be the lot, dwelling, and the resting-place of the soul of our deceased brother, . . . (whom may God grant peace in paradise), who departed from this world according to the will of God, the Lord of heaven and earth. May the supreme King of kings, through His infinite mercy, have mercy, pity, and compassion on him. May the supreme King of kings, through His infinite mercy, hide him under the shadow of His wings, and under the protection of His tent, to behold the beauty of the Lord, and to wait in His temple; may He raise him at the end of days, and cause him to drink of the stream of His delights. May He cause his soul to be bound up in the bond of life and his rest to be glorious. May the Lord be his inheritance, and grant him peace; and may his repose be in peace; as it is written, 'He shall come in peace; they shall rest in their beds; every one walking in his uprightness.' May he, and all His people of Israel, who slumber in the dust, be included in mercy and forgiveness. May this be His will! and let us say, Amen." (Gaster, "The Book of Prayer," pp. 200-201, London, 1901.)

For a deceased scholar the following verses are prefixed: Job xxviii. 12; Ps. xxv. 12, xxxi. 20, xxxvi. 8-9. The rimed part is a poetic paraphrase and enlargement of the "El Male Raḥamim" of the German ritual.

Primarily, the "Hashkabah" is recited at the grave as a part of the burial service; when it is used at the synagogue a vow of alms, somewhat like that in the German ritual, is sometimes added. The making of vows of alms or of gifts for the repose of souls is unknown to the Talmud and to Maimonides. Shulḥan 'Aruk, Oraḥ Ḥayyim (621, 6), written in Palestine, but by Joseph Caro, a Spaniard, born after Spain had been a Christian country for centuries, teaches that on the Day of Atonement it is "customary to make vows for the dead"; and with the Sephardim such vows, coupled with "A name is better," etc., are commonly made on that day.

In many Sephardic synagogues a "Hashkabah" for a long list of deceased members is read on Kol Nidre night; in others, vows for the dead are made in the daytime, between musaf and minḥah. For the Hazkarot Meshumot in Reform congregations, see Memorial Service.

ḤAZḲUNI, ABRAHAM BEN HEZEKIAH: Galician Talmudist and cabalist; born at Cracow in 1627; died at Tripoli, Syria. He was a disciple of Yom-Ṭob Lipman Heller, and the author of the following works: "Zot Ḥuḳḳat ha-Torah," an abridgment of Isaac Luria's "Sefer ha-Kawwanot," Venice, 1659; "Shete Yadot," sermons arranged in the order of the sections of the Pentateuch, published by the son of the author, Amsterdam, 1726; a commentary on the Zohar divided into two volumes, "Yad Ramah" and "Yad Adonai," still extant in manuscript (Neubauer, "Cat. Bodl. Hebr. MSS." Nos. 1729b, 1853); "Zera' Abraham," in two volumes, the first containing sermons, the second novellæ on Beẓah and Mo'ed Ḳaṭan, quoted in the first-named work; "Yodea' Binah," cited by the son of the author in his preface to the "Shete Yadot."

ḤAZḲUNI, HEZEKIAH. See Hezekiah ben Manoah.

HAZOR: 1. Fortified city between Ramah and Kadesh, on the high ground overlooking Lake Merom. It was the seat of Jabin, a powerful Canaanitish king, as appears from the summons sent by him to all the kings round about to assist him against Israel. But Joshua defeated the allied forces, and burned the city, which was "the head of all those kingdoms," to the ground (Josh. xi. 1–5, 10–13). Hazor must have been rebuilt, for in the time of Deborah and Barak there was another King Jabin reigning there (Judges iv. 2), to whom Israel was temporarily made subject in punishment for its sins. After this Hazor was again in Israel's possession, and belonged to the tribe of Naphtali (Josh. xix. 36). In the later history of Israel, Hazor is mentioned again when its inhabitants were carried off to Assyria by Tiglath-pileser (II Kings xv. 29).

2. Village in the extreme south of Judah, named between Kedesh and Ithnan (Josh. xv. 23, where the Vatican manuscript of the Septuagint reads "Hazor" and "Ithnan" as one word, 'Ασοριωναὶν, whereas the Alexandrian manuscript omits "Ithnan").

3. One of the southern towns of Judah, near Kerioth (Josh. xv. 25 [R. V. "Hazor-hadattah"]).

4. Place inhabited by the Benjamites after their return from captivity, situated between Ananiah and Ramah (Neh. xi. 33).

5. Place in the vicinity of Kedar, with which it was devastated by Nebuchadnezzar (Jer. xlix. 28–33). The mention of the "kingdoms of Hazor" leaves room for the supposition that "Hazor" may have been the name of a district in Arabia.

ḤAẒOT. See Midnight.

ḤAZZAN (Hebrew, חזן; Aramaic, חזנא): Communal official. The word is probably borrowed from the Assyrian "ḥazanu," "ḥazannu" (overseer, director; see Delitzsch, "Assyrisches Handwörterbuch," p. 272a; connected with the Hebrew חזון, meaning "vision"). "Ḥazanuti" (plural of "ḥazanu") in the El-Amarna tablets designates the governors who were stationed by Egypt in the subjugated cities of Palestine (Winckler and Zimmern, "Die Keilinschriften und das Alte Testament," pp. 194, 196, 198).

In the Talmud the term "ḥazzan" is used to denote the "overseer": (1) of a city; "ḥazzane demata," according to B. M. 93b (see Rashi *ad loc.*; Ket. 8b; 'Ar. 6b); (2) of a court of justice; at his order the sessions opened (Yer. Ber. iv. 7d); he also executed judgment on the condemned (Mak. iii. 12; comp. Yer. Sanh. v. 23a); (3) of the Temple; he had charge of the Temple utensils (comp. Arabic "khazin" = "treasure-keeper") and aided the priests in disrobing (Tamid v. 3; Yoma vii. 1); (4) of the synagogue ("ḥazzan bet ha-keneset"; see Soṭah vii. 7, 8; Suk. iv. 4); he brought out the rolls of the Torah, opened them at the appointed readings for the week, and put them away again (Soṭah vii. 7–8; Yer. Soṭah vii. 21d; Yer. Meg. iv. 15b, 75b); with trumpet-blasts he announced the beginnings of Sabbaths and holy days from the roof of the synagogue (Tosef., Suk. iv.); he attended to the lamps of the synagogue (Yer. Ma'as. Sh. 56a); he accompanied the pilgrims that brought the firstlings to the sanctuary of Jerusalem (Tosef., Bik. ii. 101). His place was in the middle of the synagogue, on the wooden "bimah" (Yer. Suk. v. 55b), and, according to Tosef., Meg. iii., beginning (see Mordecai *ad loc.*), he might, at the desire of the congregation, read aloud from the Torah, his ordinary duties then devolving temporarily upon another. It seems also to have been the duty of the "overseer" of the synagogue to teach the children to read (Shab. i. 3, according to Maimonides, Bertinoro, and Tosafot Yom-Ṭob on the passage), or to assist the schoolmaster in teaching the children in the synagogue.

A passage in the Jerusalem Talmud (Ber. ix. 12d, beginning), which Kohut considers to have been interpolated after Midr. Teh. to Ps. xix., seems to indicate that the ḥazzan also led the prayers in the synagogue. Especially in smaller congregations, and even in early Talmudic times, the duties of preacher, judge, schoolmaster, and ḥazzan were discharged by one person, as the famous story about Levi bar Sisi shows (Yer. Yeb. 13a; Gen. R. lxxxi.).

In the geonic period, at any rate, the duties of reading from the Torah ("ḳore") and of reciting the prayers ("Sheliaḥ ẓibbur") were included, as a rule, among the functions of the ḥazzan (see Pirḳe R. El. xii., xvi.; Masseket Soferim x. 7; xi. 3, 5).

In the Geonic Period.

The blowing of the shofar was also one of his duties, as may be seen from a responsum of Solomon ben Adret (No. 300). He acted sometimes as secretary to the congregation. He was assisted, especially on festival days, by a chorus ("meshorerim," singers; Immanuel, "Meḥabberot," xv. 131). This institution was afterward developed in Poland and Germany, where a singer stood on each side of the precentor and accompanied him, sometimes in high, sometimes in low, tones, at intervals singing independently.

Growing Importance of the Office.

The office of ḥazzan increased in importance with the centuries. As public worship was developed in the geonic period, and as the knowledge of the Hebrew language declined, singing gradually superseded the didactic and hortatory element in the worship in the synagogue. The piyyuṭim (very often composed by the ḥazzanim themselves) were intermingled with the prayers, and tended still further to make the ḥazzan indispensable. It is true that in the ninth century ḥazzanim skilled in piyyuṭim were rejected (see Zunz, "Ritus," p. 7), but the repulse was only temporary; in time the piyyuṭim attained, both over the ritual and over the congregation, an almost limitless influence, before which even Saadia was compelled to give way (*ib.* p. 8).

Qualifications.

Even in the oldest times the chief qualifications demanded of the ḥazzan, in addition to knowledge of Biblical and liturgical literature, were a pleasant voice and an artistic delivery; for the sake of these, many faults were willingly overlooked (see Zunz, "S. P." pp. 15, 144 *et seq.*, and the Cremona edition of the Zohar, section Wayeḥi, p. 249). He was required to possess a pleasing appearance, to be married, and to wear a flowing beard. Sometimes, according to Isaac of Vienna (13th cent.), a young ḥazzan having only a slight growth of beard was tolerated (see Ṭur Oraḥ Ḥayyim, 53; "Bet Yosef," *ad loc.*; "Shibbale ha-Leḳeṭ," ed. Buber, § 10). Maimonides decided that the ḥazzan who recited the prayers on an ordinary Sabbath and on week-days need not possess an appearance pleasing to everybody; he might even have a reputation not wholly spotless, provided he was living at the time of his appointment a life morally free from reproach. Even baptized Jews who had sincerely returned to Judaism might, according to him, be admissible as reciters of prayers (see Lampronti, "Paḥad Yiẓḥaḳ," x. 219b; Solomon ha-Kohen [MaHaRSHaK], Responsa, ii., §§ 127, 157; Elijah Mizraḥi, Responsa, i., 6). The same privilege was accorded Maranos whose return to Judaism was complete and sincere (Abraham di Boton, "Leḥem Rab," § 3).

But all these moderations of the rule disappeared on fast-days or high feast-days ("yamim nora'im"); then an especially worthy ḥazzan was demanded, one whose life was absolutely irreproachable, who was generally popular, and who was endowed with an expressive delivery. Even a person who had once appealed to a non-Jewish, instead of to a Jewish, court in a disputed question could not act as ḥazzan on those days, unless he had previously done penance (Shulḥan 'Aruk, Oraḥ Ḥayyim, 581).

Conditions of Election.

Even as late as the fourteenth century persons from the three Palestinian cities Haifa, Beth-shean, and Tabun (Neubauer, "G. T." pp. 175, 195, 197) were wholly ineligible for the office (Nissim ben Reuben's commentary on Alfasi's "Halakot"; Meg. iv.). Since the ḥazzan was the representative of the congregation ("sheliaḥ ẓibbur") in prayer, it was felt to be very necessary that a perfect inner harmony should exist between him and the congregation, and consequently a unanimous vote for his election was insisted upon in many places. If but one person in the community refused to vote for a candidate, and was able to give a reasonable explanation therefor, the latter was not appointed (MaHaRIL, Responsa, No. 60; Meïr of Padua, Responsa, No. 64; Agur, No. 96). In the Rhine district this rule was adhered to with especial strictness in the earlier part of the Middle Ages ("Or Zarua'," i. 41; comp. Gross in "Monatsschrift," xx. 262). In the seventeenth century, however, Abraham Abele ben Ḥayyim ha-Levi expressed himself against this custom in his commentary, "Magen Abraham," on Oraḥ Ḥayyim: he asserted that the ḥazzan no longer represented the congregation in prayer, as in former times; that he was no longer the only one who knew how to say the prayers, since every one in the congregation now prayed for himself; and that a unanimous vote in his favor had therefore become superfluous.

Naturally, the removal of the ḥazzan from office, as well as his appointment, indeed, depended in most cases upon the will of those who paid the highest taxes in the community. This fact seems to have become legally recognized in the sixteenth century (Levi ben Ḥabib, Responsa, No. 179). A blameless ḥazzan was not to be removed simply because another had a more pleasing voice; a second ḥazzan, however, might be appointed. An old ḥazzan who had lost his voice could be removed from office, and some arrangement be made with him in regard to his maintenance. The community could also discharge a ḥazzan who, out of consideration for his sons that had been converted to Christianity, omitted the execratory formula "Wela-Malshinim," etc., in the Eighteen Benedictions (*ib.* No. 15).

Rules for a Ḥazzan.

In the sixteenth century Moses Minz, at the desire of the community of Bamberg, drew up rules of conduct for a ḥazzan (Responsa, No. 81). These show the accepted opinion as to the ideal ḥazzan. He should be blameless in character, humble, a general favorite, and married, or at least should have reached the age of puberty; he should possess an agreeable voice, be able to read easily and understand all the books of the Holy Scriptures, be the first to enter, and the last to leave, the house of God, and should strive to attain the highest degree of devotion in his prayers; he should dress neatly, and wear a long upper garment and "knee breeches"; he should not look about him nor move his hands restlessly, but should keep them folded under his mantle; in praying aloud he should articulate each word separately as if he were counting money, and his delivery should be quiet, distinct, and in accordance with the sense, and his accentuation should follow strictly the rules of grammar. Outside God's house he should avoid sowing any seeds of anger or hatred against himself, by keeping aloof from communal disputes (see Güdemann, "Gesch." iii. 95 *et seq.*).

As early as the time of Hai Gaon the ḥazzan was paid according to his ability in reciting "Yoẓerot," "Ḳerobot," etc. (comp. Zunz, "Ritus," p. 8); and he was also exempt from communal taxes (Isaac ben Sheshet, Responsa, Nos. 176, 177). During the eleventh century there arose some opposition to the payment of the ḥazzan, but the opposition was without result (Judah the Pious, in "Or Zarua'," i., No. 113). In Germany the ḥazzan was entitled "precentor" in public documents (Gengler, "Deutsche Stadtrechtsalterthümer," p. 104); in lands where any of the Romance languages were spoken he was called "cantor"

Complaints Against Ḥazzanim.

In the early Middle Ages the office of ḥazzan seems to have been held in high esteem, for scholars like R. Eliezer ben Meshullam and R. Meïr acted as the leaders in prayer. As late as the end of the fourteenth century Jacob Möln ha-Levi (Maharil), at the express desire of the congregation, read the prayer on special festivals, such as New-Year, the Day of Atonement, the eve of the 9th of Ab, Hosha'na Rabbah, and Shemini 'Aẓeret (the "Ṭal"-prayer; Maharil, "Minhagim," pp. 43b, 49a, 61a). In Spain, however, even at the beginning of the fourteenth century, Jews of the better families seem no longer to have adopted this calling, and the position of the ḥazzan in Spain was a source of surprise and grief to the German Asher ben Jehiel (see Lampronti, "Paḥad Yiẓḥaḳ," *l.c.*). As a matter of fact, no other communal official of the Middle Ages occasioned so much and so frequent complaint as the ḥazzan. As early as the ninth century complaint was made that the ḥazzanim changed the text of the regular prayers (Zunz, "S. P." p. 114). In connection with the piyyuṭim, the ḥazzanim introduced foreign melodies taken from non-Jewish sources.

Against these abuses Alfasi (Responsa, No. 281), the "Book of the Pious" (ed. Basel, Nos. 238, 768), Maimonides ("Moreh," i. 59), Asher ben Jehiel ("Besamim Rosh," iv 22), and others protested in vain. The earlier Jewish melodies, not having been written down, were changed by the ḥazzanim, consciously or unconsciously, in accordance with their individual tastes, which were often very poor. Their vanity also led them to unsuitably prolong single notes and to insert interludes of song ("Magen Abraham," on Oraḥ Ḥayyim, 281) Thereby the prayers were greatly lengthened, concerning which the Midrash Ḳohelet complains in the words of Eccl. vii. 5: "It is better to hear the rebuke of the wise than for a man to hear the song of fools." All complaints on this score, however, were of no avail (see "Bet Yosef" on Oraḥ Ḥayyim, 53; Moses Minz, Responsa, No. 87; Judah b. Moses Selichover, "Shire Yehudah"; Isaiah Horwitz, "Shene Luḥot ha-Berit," section "Tefillah"; Solomon Lipschütz, "Te'udat Shelomoh," No. 21). The morality of the ḥazzanim was not always the highest, and they were continually censured for vanity. According to Asher ben Jehiel (*ib.*), they sang only what was most likely to win applause (so also Solomon Ephraim Luntschütz, "'Ammude Shesh," i., quoted in Güdemann, "Quellenschriften zur Gesch. des Unterrichts und der Erziehung bei den Deutschen Juden," p. 85).

Their Vanity.

It is stated that the ḥazzanim, in the midst of a prayer, frequently brought the tallit, which covered the head, down upon the shoulder, in order to create an opportunity to observe what impression their singing had made (Lewysohn, "Meḳore Minhagim," p. 12, Berlin, 1846). Their immoderate raising of the voice, their incorrect pronunciation of Hebrew, and the drawling of their singing were constantly subjects of complaint. Their method of singing has justly been called "a pilpul set to music," and was current in Poland, Germany, and Austria from the seventeenth century onward (Löw, "Lebensalter," p. 314). The ḥazzanim themselves, in the same period, called their solos, which they prolonged at will, "sebarot" (hypotheses), an expression borrowed from the Talmudists (*ib.*). The prolongation of the service naturally caused general weariness, and hence there resulted a great deal of disorder. Abraham ben Shabbethai Horowitz, in his ethical will "Yesh Noḥalin," p. 16b, even recommends the study of the Ṭurim or of the Mishnah at those places in the service where the ḥazzan is accustomed to prolong his singing. The unworthy deportment of the choir, their talking and quarreling with the ḥazzan during service, also occasioned complaint (see Jew. Encyc. iv. 41). The "Reshit Bikkurim" (17th cent.) enumerates a long list of offenses of the ḥazzanim, among which is mentioned their habit of putting the hand on the chin or throat in singing, evidently to facilitate trilling or the producing of high notes (see Güdemann, *l.c.* p. 301). The existence of these conditions is also shown in the guide for ḥazzanim written by the ḥazzan Solomon Lipschütz ("Te'udat Shelomoh," Offenbach, 1718). These faults did not exist to the same extent in Sephardic congregations, where the absence of piyyuṭim from the regular service gave less opportunity for individual singing, and where well-ordered congregational chanting was developed.

A. M. Sc.

With the abridgment and modernization of the old ritual the music of the synagogue was also put upon a modern basis; the ancient chants and melodies were written down in modern notation, and

In Modern Times.

harmonized; the ḥazzan gave way to the cantor, and the "meshorerim" were supplanted by a male, or mixed, choir. While there is no doubt of the common origin of the traditional chants, the manner of singing both them and the so-called traditional melodies differs materially among the Sephardim and Ashkenazim. Therefore it may be said that there are two schools of cantors—the Sephardic and the Ashkenazic. The latter may again be divided into the German and the Polish, differing somewhat from each other in the manner of singing the chant, the latter being chiefly characterized by a greater embellishment of the melodies, while the former adheres to a plainer style.

Sulzer and His Influence.

The first to harmonize some of the Jewish melodies, it is said, was Meïr Cohen, early in the nineteenth century. A more ambitious effort was made by Israel Lévy of Paris (1788–1832). His compositions became, and still are, very popular in France, and were published by the Jewish Consistory of Paris (1862). The father of the modern cantorate, however, was Solomon Sulzer (b. at Hohenems, Austria, March 30, 1804), chief cantor of Vienna from 1825 to 1890, and universally recognized as the regenerator of the music of the synagogue. His "Shir Zion" became the model adopted by subsequent cantors and composers of synagogal music. Next came S. Naumbourg, cantor in Paris ("Zemirot Yisrael," in 1847), and H. Weintraub of Königsberg ("Shire Bet Adonai," 1860). Louis Lewandowski, royal musical director of Berlin, and Adolf Grünzweig, musical director in Arad, Hungary, have also done much for the development of the modern cantorate, the former by the publication of his "Ḳol Rinnah u-Tefillah" (1850) and "Todah we-Zimrah" (1854), and the latter by his "Zemirot shel Shabbat" (1863). Moritz Deutsch of Breslau (b. 1818, at Nikolsburg, Austria) published "Vorbeterschule" (1882), "Breslauer Synagogengesänge" (1884), "Deutsche Choräle" (1886), "Nachtrag zu den Breslauer Synagogengesängen" (1888), and "Synagogen-Praeludien" (1889). These men, together with Abraham Baer of Gothenburg, Sweden, author of "Ba'al Tefillah, oder der Praktische Vorbeter" (1870), were the pioneers in the field of modern synagogue music.

Among those that followed the above-mentioned were many who printed collections of their own, or of others', renderings. A partial list may serve to recall the chief cantors of the nineteenth century, the titles of their chief works, where these have been published, being given:

Max Löwenstamm, Munich ("Zemirot le-El Ḥai," posthumous, 1884); I. L. Weiss, Warsaw (1825–89; "Musikalische Synagogenbibliothek," 1888); H. Berggrün, Hanover (1838–90); Solomon Popper, Frankfort-on-the-Main (1838–89); Leon Kartchmaroff, Nagy-Kanizsa; I. Lachman, Hürben, Bavaria; Moritz Friedmann, Budapest; Eduard Birnbaum, Königsberg: J. Hyman, Amsterdam ("Shire Todah le-El"); Julius Mombach, 1813–1880 ("Zemirot Yisrael," London, 1881); Marcus Hast, London ("Seder ha-'Abodah," 1879); A. B. Birnbaum ("Hallel we-Zimrah"); M. Rosenhaupt, Nuremberg ("Shire Ohel Ya'aḳob," 1887): Emanuel Kirschner, Munich ("Tehillot le-El Ḥai," 1890); Samuel Welsch, New York (in collaboration with others, "Zimrat Yah," 1879); Moritz Goldstein, Cincinnati, Ohio (in collaboration with others, "Zimrat Yah," 1879; "Kol Zimrah"); Alois Kaiser, Baltimore, Md. (in collaboration with others, "Zimrat Yah," 1879–86; "Shire Ḥinnuk," 1870; "Union Hymnal," 1897; "Principal Melodies of the Synagogue," 1893); William Löwenberg, Philadelphia, Pa. (collaborated in "Union Hymnal," 1897).

The majority of these writers were themselves practical ḥazzanim, and the music published by them was in most instances that employed by them in divine service.

J. A. Kai.

ḤAZZAN, HAZAN: An Oriental rabbinical family, probably of Spanish origin, members of which are found in Spain, and in Smyrna, Alexandria, and other cities of the East; their pedigree, however, can not be traced further back than the eighteenth century. The name is undoubtedly derived from the office of ḥazzan, which one of the ancestors of the family held.

Aaron de Joseph Hazan: Brother of Elijah Bekor Hazan; born at Smyrna 1848. In 1871 he founded the Judæo-Spanish periodical "La Esperanza," subsequently called "La Buena Esperanza"; he also wrote two novels from Jewish life: "Rahel en el Convento" and "El Muchacho Abandonado." Aaron Hazan celebrated the twenty-fifth anniversary of his paper by issuing an "edition especial" (Smyrna, 1896), containing a history of the congregation of Smyrna during the quarter-century. In 1890 he was decorated with the Order of the Nishan-i-Medjidie.

Abraham Ḥazzan of Gerona (called **Gerondi**)**:** Writer of devotional hymns; flourished about the middle of the thirteenth century. His piyyuṭim are found in the Sephardic, the Italian, the Algerian, and even the Karaitic rituals. Best known is his Aḥot Ḳeṭannah, a hymn for New-Year, which has been included in the devotional "Liḳḳuṭe Ẓebi" and translated into German.

Bibliography: Zunz, *Literaturgesch.* p. 410; Plessner, *Apokryphen*, i. 146; Landshuth, *'Ammude ha-'Abodah*, i. 11 *et seq.*

David ben Ḥayyim ben Joseph Ḥazzan: Lived in Jerusalem about the middle of the eighteenth century. He wrote: "Ḥozeh Dawid," a commentary on the Psalms (Amsterdam, 1724); "Ḳohelet ben Dawid," on Ecclesiastes, with "Dawid ba-Meẓudah," on Abot (Salonica, 1748); and "Aggan ha-Sahar," on Proverbs (*ib.* 1749).

Bibliography: Hazan, *Zikron Yerushalayim*, Leghorn, 1874; Steinschneider, *Cat. Bodl.* col. 858.

David Ḥayyim Samuel Ḥazzan: Flourished in Palestine toward the end of the eighteenth century. He wrote: "Miktam le-Dawid," responsa and novellæ on Maimonides (Leghorn, 1792); and "Ḳodshe Dawid," annotations to the laws on holy days in the Shulḥan 'Aruk (*ib.* 1792). The latter was intended as the first part of a larger work to be entitled "Ḥasde Dawid," which, however, was not published.

Bibliography: Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 77.

Elijah Bekor Hazan: Chief rabbi of Alexandria (1903); born at Smyrna in 1840. He went to Jerusalem with his grandfather, Ḥayyim David Hazan, in 1855. He was successively clerk of the Jerusalem congregation (1866) and member of the rabbinical college (1868). In 1871 he was appointed solicitor of alms for Palestine: in 1874 he was elected rabbi of Tripoli, whence he was called to Alexandria in 1888. In 1903 he presided over the Orthodox rabbinical convention at Cracow. Elijah Hazan is a representative of strict Orthodoxy. He has published: "Ṭob Leb," homilies printed together with his grandfather's "Yiṭab Leb" (Smyrna, 1868); notes to his grandfather's "Yishre Leb" (*ib.* 1870); "Ḳontres Yismaḥ Mosheh," a decision on the will of the famous philanthropist Ḳa'id Nissim Shamama (Leghorn, 1874; Italian transl., 1877); "Zikron Yerushalayim" (*ib.* 1874); "Ta'alumot Leb," responsa (1st part, *ib.* 1877; 2d part, *ib.* 1893; 3d part, Alexandria, 1902); "Neweh Shalom," on the religious customs of Alexandria (*ib.* 1894). "Zikron Yerushalayim" is an apology for Judaism in the form of a dialogue between a Palestinian rabbi and the members of the family of a pious Mæcenas in Tunis. The author defends the strictest Orthodoxy, insists on the sacredness of the second holy days, and denies the truth of the Copernican system; in an appendix he gives valuable notes on the Ḥazzan family. Many of his works are still in manuscript.

Elijah Raḥamim Hazan: Son of Joseph ben Ḥayyim Hazan; rabbinical scholar of the nineteenth century. He wrote "Oraḥ Mishpaṭ," notes on Ḥoshen Mishpaṭ (Salonica, 1858). Some of his responsa are found in the collection of his father; others, a volume of homilies, and novellæ to Hai Gaon's "Miḳḳaḥ u-Mimkar" are in manuscript.

BIBLIOGRAPHY: Elijah Hazan, *Zikron Yerushalayim*, p. 131, Leghorn, 1874.

Ḥayyim David Hazan: Son of Joseph ben Ḥayyim Hazan; born at Smyrna Oct. 9, 1790; died at Jerusalem Jan. 17, 1869. He was one of the leading Talmudists of his age. In 1840 he was appointed chief rabbi of Smyrna; in 1855 he went to Jerusalem, where he was made ḥakam bashi in 1861. In allusion to his initials, ח״ד, he was called חד בדורו ("without equal in his generation"). He wrote: "Torat ha-Zebaḥ," on the laws of ritual slaughter (Salonica, 1852; reprinted, Jerusalem, 1883); "Nedib Leb," responsa (1st part, Salonica, 1862; 2d part, Jerusalem, 1866); "Yiṭab Leb," sermons (Smyrna, 1868); "Yishre Leb," halakic discussions, with additions by his grandson, Elijah Bekor Hazan (*ib.* 1870).

BIBLIOGRAPHY: Luncz, *Jerusalem*, iv. 213.

Israel Moses Hazan: Son of Eliezer Hazan; born in Smyrna 1808; died at Beirut Oct., 1862. He was taken by his father to Jerusalem (1811), where he was educated under his grandfather, Joseph ben Ḥayyim Hazan. In 1840 he became a member of a rabbinical college; in 1848 he was appointed "meshullaḥ" (messenger). While at Rome he was elected chief rabbi. In 1852 he resigned this office for the rabbinate of Corfu, and in 1857 he was called to the rabbinate of Alexandria. In 1862 he went to Jaffa; but, being in ill health, he removed to Beirut, where he died. He was buried in Sidon. In Rome and in Corfu he was held in high esteem, and the poet Ludwig August Frankl, who saw him in Corfu (1856), speaks in glowing terms of his venerable personality. While a champion of Orthodoxy, he possessed sufficient independence of mind to protest against the superstitious practises customary among the Jews of Rome, who insisted on washing corpses with warm water, and who would not allow a clock in the yard of the synagogue. He wrote a letter condemning the reforms advocated in the Brunswick rabbinical conference (published in the collection "Ḳin'at Ẓiyyon," Amsterdam, 1846). He published: "Naḥalah le-Yisrael," a collection of decisions in an inheritance case (Vienna, 1851; Alexandria, 1862); "Ḳontres Ḳedushat Yom-Ṭob Sheni," an argument in favor of retaining the second holy days (*ib.* 1855); "Dibre Shalom we-Emet," a reply (in the form of an address to the Israelites of Great Britain by a Levite) to a Reform pamphlet (Hebrew and English, London, 1856); "She'erit ha-Naḥalah," a discourse in dialogue on religious questions, with a revised edition of his "Naḥalah le-Yisrael" (Alexandria, 1862); "Iyye ha-Yam," responsa of the Geonim, with his notes (Leghorn, 1864); "Kerak shel Romi," responsa (*ib.* 1876). Other responsa, with homilies and an apology for the Cabala, remain in manuscript.

BIBLIOGRAPHY: Solomon Hazan, *Ha-Ma'alot li-Shelomoh*, p. 114; Elijah Hazan, *Zikron Yerushalayim*, p. 131, Leghorn, 1874; Berliner, *Gesch. der Juden in Rom*, pp. 152, 208, Frankfort-on-the-Main, 1893.

Joseph ben Elijah Ḥazzan: Rabbi in Smyrna and Jerusalem in the seventeenth century; died at Jerusalem. He wrote "'En Yosef," homilies on Genesis and Exodus (Smyrna, 1675), and "'En Yehosef," novellæ on Baba Meẓi'a, edited by his son Caleb (Smyrna, 1730).

BIBLIOGRAPHY: Azulai, *Shem ha-Gedolim*, i. 78, ii. 104.

Joseph ben Ḥayyim Hazzan: Chief rabbi of Jerusalem; born at Smyrna 1741; died at Jerusalem Nov. 11, 1819. At first rabbi in his native city, he went to Palestine in 1811, settling at Hebron, where he became rabbi. In 1813 he was elected chief rabbi of Jerusalem, which position he held until his death. He wrote: "Ḥiḳre Leb," responsa (vol. i., Salonica, 1787; vol. ii., Leghorn, 1794; vols. iii.–viii., Salonica, 1806–53); "Ma'arke Leb," homilies (*ib.* 1821–22); "Ḥiḳre Leb," Talmudic novellæ, edited by his great-grandson, Elijah (Jerusalem, 1880). His four sons, Elijah Raḥamim, Eliezer, Isaac, and Ḥayyim David, were all rabbinical scholars; one of his daughters became the mother of Ḥayyim Palaggi, chief rabbi of Smyrna.

BIBLIOGRAPHY: Solomon Hazan, *Ha-Ma'alot li-Shelomoh*, p. 43; Elijah Hazan, *Zikron Yerushalayim*, p. 131, Leghorn, 1874; *La Buena Esperanza*, Smyrna, 1896; Franco, *Essai sur l'Histoire des Israélites de l'Empire Ottoman*, etc., p. 127.

Moses ben Abraham Ḥazzan (also known as **Memunneh Ephorus**): Greek synagogal poet of the fifteenth century. He is identical with Moses ha-Memunneh ben Abraham. Thirty-one poems are attributed to him, in which most of the strophes and stanzas begin, and often end, with the same word. Thus the piyyuṭ חיים מול אל ישראל begins and ends with the word חיים, and in the piyyuṭ לבי אעורר להגות, which has been translated into German by Zunz, the ten strophes begin and end with לבי.

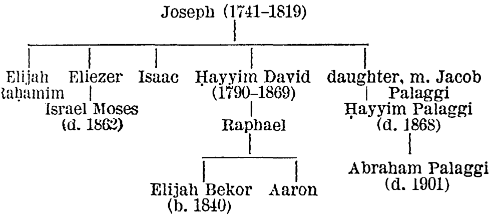
BIBLIOGRAPHY: Zunz, *S. P.* pp. 325, 328 *et seq.*; idem, *Literaturgesch.* pp. 374 *et seq.*; Landshuth, *'Ammude ha-'Abodah*, pp. 203 *et seq.*, 206; Dukes, *Moses b. Ezra*, p. 108; *idem*, in *Orient, Lit.* v. 776 *et seq.*, x. 618.

Solomon Hazan: Bibliographer; born in Algeria at the end of the eighteenth century; died 1852 on board a vessel bound for Malta. As a boy he accompanied his father to Damascus, and subsequently settled in Cairo, where he conducted a Talmudic school. In 1832 he was elected chief rabbi of Alexandria. Three of his works, edited by Faraj Ḥayyim Mizraḥi, were printed after his death by his son David; namely, "Ha-Ma'alot li-Shelomoh," "Baruk Mimeshaḥ," and "Ben Shelomoh," Alexandria, 1889–90. The most important of these, "Ha-Ma'alot li-Shelomoh," is a bibliographical work divided into two parts, the first containing a title bibliography, the second a list of authors. It is a continuation of Azulai's "Shem ha-Gedolim," and includes the Sephardic writers who were contemporary with Azulai (omitted by the latter), as well as those living half a century after him. A biographical appendix to the work deals with the chief rabbis of Alexandria.

Bibliography: Solomon Hazan, *Ha-Ma'alot li-Shelomoh.*

Solomon ben Abraham Ḥazzan: Member of the rabbinical college at Salonica (1533). He emigrated later to Safed, where Jacob Berab commissioned him to take the rabbinical diploma to Levi ibn Ḥabib (Conforte, "Ḳore ha-Dorot," p. 35a; Solomon Hazan, "Ha-Ma'alot li-Shelomoh," p. 92).

Pedigree of the Hazan Family.



M. K.—M. Fr.—D.

ḤAZZAN, ABRAHAM BEN JUDAH:

Cantor at Kremenetz, Volhynia, in the sixteenth century. In 1595, after recovering from a terrible malady which ended in a trance, he applied himself to utilizing certain material for a haggadic commentary upon the Prophets and the Hagiographa, with a Judæo-German translation of difficult passages. This material had been accumulated by him from his various teachers, and from his reading of Rashi, Redag, Ralbag, Abraham ibn Ezra, and the Midrashim; in his expositions he did not depart much from the Biblical text. He ceased his work, however, when he heard of the publication at Cracow in 1593 of N. Hirsch Altschuler's "Ayyalah Sheluḥah"; but he found that, although its purpose was the same, the plan of this work was quite different from his own, and, encouraged by Rabbi Samson of Kremenetz, he finished his book in the spring of 1597. Not wishing to compete with the above-named work, he did not publish his compilation, which was entitled "Ḥibbure Leḳeṭ" (A Miscellaneous Collection), and which was printed, after his death, at Lublin by Zebi b. Kalonymus Jafe in 1611–12. The Oppenheim Library ("Cat. Bodl." col. 696) possesses one copy; the British Museum possesses two copies, one complete, the other incomplete (Zedner); and Chwolson has one in his library. Ḥazzan is not to be confounded, as he has been by Wolf, with Abraham ben Judah of Krotoschin, author of "'En Mishpaṭ."

G. D. G.

ḤAZZAN, ELEAZAR HA-:

Precentor; lived in Speyer toward the end of the eleventh century. He was the teacher of Samuel the Pious, and perhaps identical with Eleazar, son of Meshullam the Great. The latter supplied many notes to the commentator on Chronicles who wrote at Narbonne about 1130–40. He was also the teacher of Shemariah ben Mordecai of Speyer.

Bibliography: Zunz, *Z. G.* p. 72; *Monatsschrift*, xii. 165.

ḤAZZANUT

(lit. "that appertaining to a ḥazzan"): Originally, as in the Siddur of Saadia Gaon, the term was applied to the piyyuṭim which it was the function of the official then called "ḥazzan" to recite. But as the duties of this official spread to the intonation of the whole of the service, the term came to be applied to the traditional form of melodious intonation. Beautiful singing, with its influence on the emotions, dates from the later Talmudical period (Ta'an. 16a).

The term "ḥazzanut" is used also to denote the collective traditional intonations as chanted in any particular service. This ḥazzanut is not composed of fixed melodies in the modern sense, but is essentially a species of cantillation. It is not, like the cantillation of the Scriptures, designated by any system of accents, but consists of a free vocal development, on traditional lines, of certain themes specifically associated with the individual occasion. But it diverges from the ḥazzanut of any other sacred occasion much as do the respective parallel interpretations of the accents exhibited under Cantillation. The divergence, that is to say, lies not so much in style or in treatment, in outline or in detail, as in tonality.

While the main features of synagogue melody remain fairly constant, the detail depends upon the capacity of the particular officiant, the extent to which he is en rapport with the congregation, the strain on his voice due to the acoustics of the building, the duration of the devotions, and other variable conditions. But in all cases it may be said that the ḥazzanut consists of an unaccompanied vocal fantasia upon the traditional prayer-motive, beneath which a sense of devotion and reverence will usually be apparent. The working out of the melody-type of the service is necessarily to a considerable extent left to the impulse of the moment, but depends much upon the structure and, above all, the significance of the sentences intoned. This method is explained in the general article Music, Synagogal.

mute. It is an important element in Hebrew grammar, serving as an article, as a demonstrative pronoun, as a particle of interrogation, and as the characteristic letter of the verbal forms "hif'il," "hof'al," and (in part) "hitpa'el." As a numeral it has the value of 5. The Tetragrammaton is sometimes represented by ה, as being the second letter of יהוה.

T. I. Br.

HEAD, COVERING OF. See Bareheadedness.

HEAD-DRESS: Covering or ornament for the head. Very little information is obtainable as to the adornment and covering for the head in use among the Israelites of antiquity. The Old Testament sources contain scarcely anything on this subject; neither do the monuments furnish any material. The Israelites on Sennacherib's marble relief appear with no head-dress, and although the ambassadors of Jehu on the Shalmaneser stele have a head-covering, their costume seems to be Assyrian rather than Israelitish. Only one passage of the older literature is of any significance: I Kings xx. 31 mentions "ḥabalim" together with "saḳ," both of which are placed around the head. This calls to mind pictures of Syrians on Egyptian monuments, represented wearing a cord around their long, flowing hair, a custom still followed in Arabia. Evidently the costume of the poorest classes is represented; but as it gave absolutely no protection against the heat of the sun to which a worker in the fields is so often exposed, there is little probability that it remained unchanged very long, although it may have been the most ancient fashion.

The Israelites most probably had a head-dress similar to that worn by the Bedouins. This consists of a keffieh folded into a triangle, and placed on the head with the middle ends hanging over the neck to protect it, while the other two are knotted together under the chin. A thick woolen cord ("'aḳal") holds the cloth firmly on the head. In later times the Israelites, both men and women, adopted a turbanlike head-dress more like that of the fellahs of to-day. The latter wear a little cap ("ṭaḳiyah"), usually made of cotton cloth folded doubly or triply, which is supposed to shield the other parts of the head-covering from perspiration. With boys this often forms the only head-covering. Under this cap are placed one, often two, felt caps ("lubbadah"), and the national head-dress of the Turks, the red tarboosh. Around this, finally, is wound either an unbleached cotton cloth with red stripes and fringe, a gaily flowered "mandil," a red- and yellow-striped keffieh, a black cashmere scarf, a piece of white muslin, or a colored cloth. Such a covering not only keeps off the scorching rays of the sun, but it also furnishes a convenient pillow on occasion, and is not seldom used by the fellahs for preserving important documents.

That the head-dress of the Israelites must have been of this kind is shown by the noun "ẓanif" and by the verb "ḥabash" (to wind; comp. Ezek. xvi. 10; Ex. xxix. 9; Jonah ii. 6 [A.V. 5]). "Ẓanaf" means "to roll like a ball" (Isa. xxii. 18). As to the form of such turbans nothing is known; perhaps they varied according to the different classes of society, as was customary with the Assyrians and Babylonians, whose fashions may have influenced the costume of the Israelites. How the high priest's miter ("miẓnefet"; Ex. xxviii. 37, xxix. 6) differed from the ẓanif is not clear; perhaps it was pointed like the head-covering worn by Assyrian kings: the turban ("migba'ah") of an ordinary priest probably had a conical form. Nothing is known concerning the "'aṭarah" (II Sam. xii. 30; Ezek. xvi. 12) or the "keter" (Esth. i. 11, ii. 17, vi. 8; comp. De Lagarde, "Gesammelte Abhandlungen," pp. 207, 213-215; *idem*, "Armenische Studien," pp. 67, 2003).

The bridegroom was distinguished by his head-dress ("pe'er"; Isa. lxi. 3; Ezek. xxiv. 17, 23), which was, perhaps, of cloth wound round the head and worn over the ẓanif (comp. Ex. xxxix. 28). Veils were used only by the women, and even by them only on certain occasions, the strict separation of

JEWISH HEAD-DRESS AT VARIOUS PERIODS.

1, 2. England (13th cent.). 3-5. Germany (13th cent.). 6-8. France (13th cent.). 9. Rhine Provinces (13th cent.). 10. Constance (1417). 11. Holland (15th cent.). 12. Italy (15th cent.). 13, 14. Germany (15th cent.). 15-17. Rhine Provinces (15th cent.). 18, 19. Worms (16th cent.). 20. Germany (16th cent.). 21. Worms: "Judenbischof" (17th cent.). 22. Swabia (17th cent.). 23. Frankfort-on-the-Main (1630). 24, 25. Poland (1765). 26, 27. Warsaw (1825). 28. Cracow (17th to 18th cent.). 29. Podolia (1750). 30. Tunis (1800). 31. Morocco (1800). 32. Moravia (1800). 33. Russia (modern). 34. Caucasus (modern). 35. Russia: Karaite (modern). 36, 37. Tunis (modern). 38. Russia: "Yarmulka" (modern). 39. England: rabbinical (modern).

men and women, customary in Mohammedan countries, being foreign to Jewish antiquity. The bride was veiled when she was led to the bridegroom (Gen. xxiv. 65; comp. xxix. 22 *et seq.*). In later times, however, veils and gauzy garments found their way into the wardrobes of Jewish women (comp. Isa. iii. 16 *et seq.*). That the Israelitish men sometimes wore a veil, as do men among the Arabs occasionally, can not be proved by Ex. xxxiv. 33 *et seq.* See Veil.

E. G. H. W. N.

HEALTH LAWS: The preservation of physical well-being is looked upon in Judaism as a religious command. "And live through them, but not die through them" (Yoma 85b, based on Lev. xviii. 5), was the principle applied to all the laws of the Bible, from which the Rabbis deduced that in case of danger to life all laws except those against idolatry, adultery, and murder might be violated (Pes. 25a; Maimonides, "Yad," Yesode ha-Torah, v. 7). The neglect of one's health was regarded as a sin: and the Nazarite who vowed to abstain from wine was considered a sinner, as well as he who fasted or underwent other penance without reason (Ned. 10a; Ta'an. 11b; see Abstinence; Asceticism). Purity, which is the aim of most of the Biblical sanitary laws, was to be not only physical, but also moral and religious.

There was not a distinct department of public health in the government of the ancient Jews. The charge of infectious diseases, such as leprosy, and of epidemics of all kinds, was delegated to the priests, who acted as the physicians (see Leprosy). The Talmud mentions the office of a physician in the Temple, whose duty it was to look after the health of the priests (Sheḳ. v. 12). In later times every town counted among its permanent officials a physician who supervised the circumcision of children and looked after the communal well-being. A scholar was forbidden to live in a city where there was no physician (Sanh. 17b; "Yad," De'ot, iv. 23).

The Rabbis have various laws regulating diet. They enjoin also divers precautions, many of which go to improve the physical well-being of the community. Special emphasis was laid upon early breakfasts, so that R. Akiba included this advice in his last will to his children (Pes. 112a; B. M. 107b). No one should force himself to eat; he should wait until he is really hungry (Ber. 62b), not hurry his meal (*ib.* 54a), and not talk while eating (Ta'an. 5b). The Rabbis even prescribed the kind of food men should eat, and that from which they should abstain; wheat bread, fat meat, and old wine being recommended as the most wholesome (Pes. 42a). Salt and hot soup are pronounced to be essentials of a meal (Ber. 44a). "After all solid food eat salt, and after all beverages drink water," is the advice of the Rabbis (*ib.* 40a).

Removal of Nuisance.

For domestic sanitation the commandments given in the Bible direct the covering of the blood of a fowl or of a wild beast with dust (Lev. xvii. 13), and the covering of excreta with earth and the appointing of a special place outside of the camp for depositing the excreta (Deut. xxiii. 12–15). The Rabbis forbid the erection of tanneries or the establishment of cemeteries within fifty cubits of the city limits. To deposit carcasses within that distance was also forbidden. Tanneries even beyond that limit could be built only to the east of the town, so that the west wind might dispel the bad odors arising therefrom. The thrashing-floor must also be removed fifty cubits from the city, on account of the chaff and the dust coming from it (B. B. 24b, 25a; "Yad," Shekenim, x. 2, 3; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 155, 22–23). It was suggested by some scholars (following Ḳimḥi) that perpetual fires were kept up in the valley of Hinnom, outside of the gates of Jerusalem, for the purpose of consuming the refuse of the city, thus disposing of all the offal, in order to preserve the health of the city.

In order to prevent the spread of leprosy, a complete system of quarantine laws was developed in the Levitical code (see Leprosy).

The numerous laws of purity scattered throughout the Bible, especially in Leviticus and Numbers, were probably not intended primarily as health laws. The Rabbis built up a complete system with regard to things clean and unclean upon these laws, which occupy a whole section of the Mishnah (Ṭohorot; see Purity). All these laws may be conveniently divided into two classes: (1) those which govern cases of impurity created in the body of a person, as leprosy, unclean flux of man or of woman, menstruation, etc.; and (2) those which govern cases of impurity caused by contact with unclean objects, as contact with a dead body or with a person of the former class. By the careful isolation of such persons and objects and by the complete system of baths and ablutions provided by the Law for their cleansing, the chances of the propagation of infectious diseases were much diminished.

Importance of Health Laws.

The Rabbis regarded the laws of health as of greater importance than those which were of a mere ritualistic character. "You have to be more careful in cases where danger is involved than in those which involve a mere matter of ritual" (Ḥul. 10a). On account of "sakkanah" (danger) it was forbidden to eat the meat of an animal that had eaten poison, or to eat meat and fish together, or to drink water left uncovered overnight (see Dietary Laws). It was considered dangerous to drink water at the beginning of the seasons ("teḳufah"). In many places it was customary to place a piece of iron on all articles of food at that period. This was supposed to remove the danger (Shulḥan 'Aruk, Yoreh De'ah, 116, 5, Isserles' gloss: ShaK and ṬaZ, *ad loc.*). In time of plague the Rabbis recommended staying at home and avoiding the society of men (B. Ḳ. 60b). Perspiration was considered especially dangerous (סם המות); and it was therefore forbidden to touch, during meals, any part of the body which is usually covered, or to hold bread under the arm, where the perspiration is usually profuse. Coins should not be placed in the mouth, as there is the apprehension that they have been touched by persons suffering from contagious diseases. Articles of food should not be placed under a bed, because something impure might fall on them (Yer. Ter. viii. 3; "Yad," Roẓeaḥ, xii. 4, 5; Shulḥan 'Aruk, Yoreh De'ah, 116, 4, 8). It was also forbidden to eat from unclean vessels or from vessels that had been used for unseemly purposes, or to eat with dirty hands. These and many other laws are derived by the Rabbis from the expression, "And ye shall not make your souls abominable" (Lev. xx. 25; comp. Mak. 16b; Shab. 82a; "Yad," De'ot, iv. 2; Shulḥan 'Aruk, Oraḥ Ḥayyim, 116, 3, 9, 11, 17).

The washing of the hands and of the face in the morning and, according to some, in the evening also, and the washing of the hands after relieving nature, were considered important by the Rabbis, so that a special blessing was pronounced after each ablution (Shulḥan 'Aruk, Oraḥ Ḥayyim, 116, 4, 6, 7). The rules concerning the washing of the hands before meals occupy a considerable portion of the ceremonial law (*ib.* 158–165), and minute regulations were prescribed as to the manner of pouring the water, the size of the vessel employed, and the kind of water to be used. The custom of washing the hands during and after meals, although mentioned by the Rabbis, was not universally followed (Ḥul. 105a *et al.*; "Yad," Berakot, vi.; Shulḥan 'Aruk, Oraḥ Ḥayyim, 158–165). The system of baths and ablutions, which forms a large portion of the Jewish laws of cleanliness, and which is still observed to a large extent by pious Jews, has had a marked influence on the physical health of the Jews, so that in epidemics they have frequently been immune (see Ablution; Baths).

Provisions were also made by later rabbis with regard to sleeping. They warned against eating heavy meals immediately before going to bed, and approved of lying first on the left and then on the right side, this being considered good for digestion ("Yad," De'ot, iv. 5; Ḳiẓẓur Shulḥan 'Aruk, 7, and especially 32; Ḥayye Adam, 35, 5).

Maimonides lays down certain regulations by which a man should be guided at sexual intercourse in order to preserve his physical well-being; and he promises him who will comply with these precepts that he will always be well, will never need to consult a physician, and will live to a good old age ("Yad," *l.c.* 19, 20; Shulḥan 'Aruk, Oraḥ Ḥayyim, 240, 14, 15).

There are some laws whose purpose it is to prevent any cause of injury to others as well as to oneself (see Damage). One who builds a new house must erect a battlement ("ma'aḳeh") around the roof, so that no person shall fall from it (Deut. xxii. 8). The battlement must be at least ten "ṭefaḥim" (fist-breadths) in height, and must be well constructed, so that one may lean upon it without apprehension (see House). To guard against injury one must not leave a well or a pit on one's premises uncovered, nor must one keep a vicious dog or a broken ladder (B. Ḳ. 15a). It is forbidden to walk alone at night; to stand under a wall that is likely to fall; to walk upon a poorly constructed bridge; to enter a ruin; or to drink in the dark from a well, lest some poisonous animal lurk in the water. He who defies the Law, saying, "It is no one's affair if I wish to expose myself to danger," is punishable with stripes; for life is considered as belonging to God and not to man ("Yad," Roẓeaḥ, xi.; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 427, 9, 10; comp. "Be'er ha-Golah" *ad loc.*; Shulḥan 'Aruk, Yoreh De'ah, 116, 5, Isserles' gloss; see Medical Jurisprudence).

HEARSAY EVIDENCE. See Evidence.

HEART (Hebr. "leb," or "lebab").—**Biblical Data:** The seat of the emotional and intellectual life. "Keep thy heart with all diligence; for out of it are the issues of life" (Prov. iv. 23), refers to the moral and spiritual as well as the physical life. Animals have simply a sentient heart without personal consciousness or reason. This is what is meant when it is said that a beast's heart was given to Nebuchadnezzar (Dan. iv. 13 [A. V. 16]). Delitzsch ("System der Biblischen Psychologie," p. 252) calls attention to the fact that the Arabic Ḥamasa (p. 513) says explicitly that the brute is without heart ("bi-ghair lubb").

The three special functions, knowing, feeling, and willing, ascribed by modern psychologists to the mind, were attributed to the heart by the Biblical writers (comp. Assyrian "libbu" = "heart," in Delitzsch, "Assyrisches Handwörterb." p. 367). In the Book of Daniel intellectual functions are ascribed not to the head only (Dan. ii. 28; iv. 2, 7, 10 [A. V. 5, 10, 13]; vii. 1, 15), but also to the heart (*ib.* ii. 30).

Its Psychical Aspects.

The heart as the seat of thought is referred to in "maḥshebot libbo" (thoughts of his heart; Ps. xxxiii. 11) and in "morashe lebabi" (possessions or thoughts of my heart; Job xvii. 11). So "amar beleb" (Obad. i. 3), "amar el leb" (Gen. viii. 21), "dibber 'im leb" (Eccl. i. 16) (= "to speak to the heart" or "to oneself"), mean "to think." The heart knows and perceives (Deut. xxix. 3 [A. V. 4]); it remembers and forgets (I Sam. xxi. 13 [A. V. 12]; Deut. iv. 9). "A dead man out of heart" (A. V. "mind"; Ps. xxxi. 13 [A. V. 12]) means a dead man forgotten. The man of understanding is called "ish [plur. "anshe"] lebab" = "the man of heart" (Job xxxiv. 10, 34), and the man without understanding "ḥasar leb" (Prov. x. 13) or "en leb" (Jer. v. 21), "the man void of heart" or "without heart."

That the heart is the seat of emotion is the generally accepted opinion of all investigators into the psychology of the Bible, though Carl Grüneisen ("Der Ahnenkultus und die Urreligion Israels," p. 39) denies it. All modes of feeling, from the lowest physical forms, as hunger and thirst, to the highest spiritual forms, as reverence and remorse, are attributed by the Hebrews to the heart (comp. Gen. xviii. 5; Judges xix. 5; Ps. cii. 5 [A.V. 4]); so joy and gladness, sorrow and grief, fear and reverence (Zeph. iii. 14; Isa. lxvi. 14; Ps. xiii. 3 [A. V. 2]; Deut. xx. 3, 7, 8; Jer. xxxii. 40). Still the term "nefesh" (soul) is more frequently used with reference to the appetites.

The heart is also the seat of volition. It is self-directing and self-determining. All conscious re-

Is the Seat of Volition.

solves emanate from that source (comp. "mela'o libbo" [Esth. vii. 5]; "nadab libbo oto" [Ex. xxxv. 29]; "nesa'o libbo" [Ex. xxxv. 21]; and "natan libbo" [Eccl. i. 13]). When the words "heart" and "soul" are used in connection with each other (Deut. vi. 5), they are not used merely as synonymous terms in order to add force to the expression, for the phrase "with all your heart" denotes the love of conscious resolve, in which the whole being consents, and which must at once become a natural inclination (see Cremer, "Biblico-Theological Lexicon," *s.v.* *καρδία*, transl. by William Urwick, p. 347).

It is in the heart that the heart becomes conscious of itself and of its own operations. It recognizes its own suffering. It is the seat of self-consciousness: "the heart knoweth its [A.V. "his"] own bitterness" (Prov. xiv. 10). As the whole physical and psychical life is centralized in the heart, so the whole moral life springs from and issues out of it. This is clear from such expressions as "shalem" and "tam" (perfect), "ṭahor" (pure), "ṭob" (good), and "yashar" (upright), used in connection with the heart. The Biblical writers speak of the false heart, the stubborn and obstreperous heart, and the heart distant from God (Ps. ci. 4; Jer. v. 23; Isa. xxix. 13). The hypocrite is the man with a double or divided heart: where one would say "two-faced," the Psalmist says "two-hearted" ("beleb waleb"; Ps. xii. 3 [A.V. 2]). Lazarus ("The Ethics of Judaism," Engl. transl., ii. 60, note) observes that "the Talmudic 'libbo' rarely reaches the inclusive meaning of the Hebrew 'leb,' which comprises the whole psychic phenomena. As a rule, the Talmudic expression approaches the modern 'heart,' primarily indicating inner conviction as contrasted with external deed" (see Sanh. 106b; Ber. 20a, Munich MS.). There is an interesting discussion between Rabbi Eliezer and Rabbi Joshua as to whether the heart or the head should be regarded as the seat of wisdom (Yalḳ., Prov. 929).

Maimonides, in discussing the term "leb," says that it is a word used homonymously, primarily signifying the organ of life and then coming to mean "center," "thought," "resolution," "will," "intellect" ("Moreh Nebukim," i. 39). See PSYCHOLOGY OF THE BIBLE.

"Leb" is used figuratively for the center or innermost part of objects other than the human body, in expressions such as "the heart of the sea" (Ex. xv. 8; Jonah ii. 3); "the heart of heaven" (Deut. iv. 11; A.V. "midst"); "the heart [A.V. "midst"] of an oak-tree" (II Sam. xviii. 14). In this use "heart" has gone over into the English language as a Hebraism when mention is made of the "heart" or "core" (Latin "cor") of a subject or object, meaning its central or innermost part, its central idea or essence. "She'er" (flesh) and "leb" (heart) are used conjointly to designate the whole inner and outer life of man (Ps. lxxiii. 26).

K. T. S.

——**In Apocryphal and Rabbinical Literature:** Καρδία in the Apocrypha, and לבב, לבא, לב in rabbinical literature, have the various meanings of the Biblical term לב = "heart."

1. As the Seat of the Physical Organism: Compare Tobit vi. 4-7, and the numerous references in Talmud and Midrash, especially the treatise Ḥullin, which treats largely of the traditional manner of slaughtering animals for ordinary use.

2. As the Seat of All Morality and of All Moral and Spiritual Functions: The heart being the center of personal life, and in fact of man's collective energies, as well as the laboratory for the appropriation and assimilation of every influence, the moral and religious conditions of man wholly depend upon it. For example, in II Esdras (ix. 31) occurs, "I sow my law in you [in your hearts] and it shall bring fruit in you, and ye shall be honored in it forever." II Macc. ii. 3 reads: "And with other such speeches exhorted he them, that the law should not depart from their hearts." "Yes, therefore, Thou hast given us a heart that we may fear You and call upon Your name" (Baruch iii. 7; comp. Tobit i. 12). That God "requires the service of the heart" is a favorite saying of the Rabbis.

As in the Bible (Gen. vi. 5, viii. 21), the seat of good and evil impulses alike is neither the body nor the soul, but rather the heart (not, of course, the physical organ, but the willing and thinking self); thus the Rabbis frequently use "yeẓer" to interpret the Biblical term לב. "Esau speaks in his heart" is rendered in Gen. R. lxvii., "The wicked are in the power of their heart, but the righteous have their heart in their power." In Num. R. xvi. it is said, in reference to the report of the spies, "The heart and the eyes are the cause of their sin." "The evil desire is living in the heart" (Ber. 61a). The heart is the organ of conscience. Thus the Septuagint translates Ecclus. (Sirach) xlii. 18, "The heart He searcheth," with *συνείδησις* = "conscience" (comp. Wisdom xvii. 11).

The heart is also the seat of feeling, of courage, of hatred, of pride, and of deceit. "As the heart is first to feel sorrow, so it is also first to feel joy" (Ex. R. xix.; comp. Prov. xiv. 10). "Set thy heart aright, and constantly endure" (Ecclus. [Sirach] ii. 2). "Do not approach righteousness with a divided heart" (Enoch xci. 4). "My son, love your brethren, and do not turn from them with a proud heart" (Tobit iv. 13). "With his lips the enemy talketh sweetly, but in his heart he planneth to throw thee into a pit" (Ecclus. [Sirach] xii. 16).

There is a famous reference in "Cuzari," ii. 36 *et seq.*, to the effect that Israel occupies the position among the nations which the heart occupies among the organs of the human body. For the heart is most exposed to the ills of the flesh, and most sensitive to all changes of temperament, hatred and love, fear and vengeance, etc.

3. As the Seat of the Intellect and the Will: "Do not follow thy desires to walk in the ways of thy heart" (Ecclus. [Sirach] v. 2; comp. *ib.* iii. 24, 25; Baruch ii. 30, 31). In Eccl. R. i. 1 the Biblical passage I Kings iii. 5 *et seq.* is referred to, where Solomon, in answer to YHWH's request that he shall ask for something, asks for an understanding (hearing) heart. The Midrash renders "an understanding heart" by "wisdom"; and there it is said that God gives Solomon "wisdom and understanding." "The heart of the ancients was as large as the gate of Ulam, the heart of the later ones as the gate of Hekal; and ours is like the eye of a needle" ('Er. 53a). This refers not to the actual size of the physical heart, but to difference in mental attainments.

HEATHEN. See GENTILE.

HEATHENISM. See PAGANISM.

HEAVE-OFFERING: Present made to the Tabernacle or Temple for the use of the priests. תרומה (from רום, "to lift," that is, to set apart for a special purpose from a larger quantity, either voluntarily or under compulsion) originally connoted any tax paid or gift made to a superior officer. This meaning is still apparent in the phrase איש תרומות (Prov. xxxiv. 4); but as the taxes levied and the contributions expected in Israel were mostly for the maintenance of the Temple and the priesthood, the word acquired technically the meaning of an obligatory or voluntary contribution for the uses of the sanctuary or of the sacred persons therewith connected. The transition from the general to the specific sense is noticeable in the use of the term in Ezek. xlv. 13 (comp. xx. 40, xlviii. 12; Mal. iii. 8). Where voluntary contributions are intended, the English versions prefer the rendering "offering," "oblation," or "tribute." Of such "offerings" made by the people those of precious metals and of material for the Tabernacle (Ex. xxv. 2-3; xxxv. 5; xxxvi. 3, 6) are mentioned. The gifts of the Persian court carried by Ezra to Jerusalem are also designated by "[heave-] offering" (Ezra viii. 25), as are the fine bullocks and other sacrificial animals given for special occasions by the king and the princes (II Chron. xxx. 24, xxxv. 7-9). Even that part of the "devoted" prey taken from the Midianites which was distributed among the priests and Levites is called a "[heave-] offering" (Num. xxxi.).

Various Classes.

The following comprise the prescribed heave-offerings: (1) The tribute of half a shekel (Ex. xxx. 13, xxxviii. 26). This was levied from all male Israelites that were of age (comp. Matt. xvii. 24). Neh. x. 32-33 fixes the amount at one-third of a shekel. This discrepancy has given rise to the theory that Ex. xxx. 13 is a later addition to P (see Schürer, "Gesch." ii. 258, Leipsic, 1898). (2) ḤALLAH (see Num. xv. 19-21; Neh. x. 38). (3) "Ḥallot," the cakes prepared for the sacrifice of peace-offerings. Of these one shall be a "heave-offering," and shall belong to the priest that sprinkles the blood of the peace-offerings (Lev. vii. 14). A similar share of the cakes and the wafers forming part of the Nazarite's offering appertained to the priest (Num. vi. 19, 20). (4) The heave-offering of the tithe ("terumat ha-ma'aser"): the tithe of their tithe which the Levites surrendered to the priests (Num. xviii. 26). There is no mention of this in Deuteronomy. The critical school accounts for this silence by the fact that in Deuteronomy priests and Levites are not distinguished. (5) The heave-offering for the priests ("terumat ha-kohanim"): taxes paid to the priests from the yield of the fields, olive-groves, and vineyards (Neh. xiii. 5; Num. xviii. 11-13; Deut. xviii. 4 [from wool also]).

Tithe and heave-offering are occasionally mentioned together (II Chron. xxxi. 10-14; Neh. x. 39; Mal. iii. 5). In such cases that portion of the agricultural produce reserved for the priest is so designated, and this was permitted to be eaten only by priests in a state of Levitical purity, or by members of their family (see Lev. xxii. 12; Maimonides, "Yad," Terumot, vii.).

Rabbinic Distinctions.

The Mishnah (Seder Berakot) includes a tract entitled "Terumot," dealing with the laws regulating the heave-offerings. On the same subject there are the corresponding Tosefta and the Gemara of the Jerusalem Talmud. According to these, only the proprietor was empowered to "set apart" the "terumah." This excluded minors, deaf-mutes, those not in full possession of their mental faculties, and non-Jews, the last-named even if deputed to act for the proprietor (i. 1). Olives could not be "set apart" for oil, nor grapes for wine. The "corners of the field" ("pe'ah"), that which had been "forgotten" ("shikḥah"), and the "gleanings" ("leḳeṭ"), as well as that which had no owner ("hefḳer"), were exempt (i. 5). The same exemption applied to the first tithe ("ma'aser rishon"), from which the heave-offering had already been "lifted" (therefore not "terumah gedolah"; see below), and to the second tithe, the holy part that had been redeemed ("heḳdesh she-nifdah"). Nor was it lawful to substitute "free" for "bound" fruit (*i.e.*, fruit subject to the tithe); nor "fixed" for "movable" produce; nor new for old or old for new; nor fruits grown in Palestine for those grown outside (i. 5). Regulations are given to prevent the act of setting apart by persons not conducting themselves decently, or by persons in improper condition (i. 6).

The heave-offering must not be counted by measure, nor by weight, nor by number, but must be set apart by estimate from a given quantity. The different kinds of cereals and fruit must be kept distinct; one can not serve in lieu of another (ii. 4). In places where a priest resided the heave-offering was to be taken from the best; where no priest was at hand, such produce as would not perish was assigned (ii. 4). Whole small onions should be taken, and not the halves of big onions (ii. 5). "Kil'ayim" (incompatible kinds of plants) could not be substituted, even where one was better than the other. Where the mixing of plants was not to be apprehended the better could be used for the worse, but never the reverse (ii. 6). Mistakes of assignment (for instance, wine for vinegar) were to be rectified (iii. 1). The proportion fixed is, for a generous man ("a man with a good eye"), $\frac{1}{40}$ ($\frac{1}{30}$ according to Bet Shammai); for a fair man, $\frac{1}{50}$; for a stingy man, $\frac{1}{60}$. Whoever, without right, inadvertently partook of the terumah was required to pay the full value and one-fifth more (vi. 1-3). Intentional violation was one of the great crimes (Ker. i. 1).

The "terumah gedolah" (the great heave-offering; see "Yad," Terumah, iii. 1), by which name the taxes based on Deut. xviii. 15 *et seq.* are known (Ḥul. 137a), had precedence of any other tax, the "bikkurim" (First-Fruits) alone excepted (iii. 6). For the terumah not only were the seven "minim" (plants of Palestine) chosen, but also onions, cucumbers, melons (ii. 5, iii. 1), "tiltan" (תלתן, *Trigonella Fœnum-græcum*, fenugreek [curly plant]; x. 5), and various other vegetables. Extensive rules are given which specify the conditions under which cereals and plants that had been set apart retain or lose their sacred character, including cases of possible admixture with non-sanctified fruit. These rules also indicate the disposition to be made of terumah so profaned.

E. G. H.

HEAVEN (Hebr. "shamayim" [the heavens], from "shama" [the high place]): Chiefly, the upper part of the universe in contradistinction to the earth (Gen. i. 1); the region in which sun, moon, and stars are placed (Gen. i. 17). It is stretched out as a curtain (Isa. xl. 22), and is founded upon the mountains as on pillars sunk into the waters of the earth (II Sam. xxii. 8; Prov. viii. 27–29). It is the dwelling-place of God, from which He looks down upon all the inhabitants of the earth (Ps. xi. 4; xxxiii. 13, 14), though the heavens and heaven's heaven do not contain Him (Isa. lxvi. 1; I Kings viii. 27). It is the dwelling-place also of the angels (Gen. xxi. 17, xxii. 11, xxviii. 12). From heaven comes the rain, the hail, and the lightning (Gen. viii. 2, xix. 24; Ex. ix. 23; Deut. xi. 11; Job xxxviii. 37). Yhwh, the God of Israel, is eminently the God of heaven (Gen. xxiv. 3); the "possessor of heaven and earth"—of the world above and the world below (Gen. xiv. 19); "Lord of [the] hosts [of heaven]" (I Kings xviii. 15; Isa. xxvi. 21; comp. Gen. ii. 1, and elsewhere). Toward heaven as the seat of God the hands are stretched forth in prayer (I Kings viii. 22, 30 *et seq.*; II Chron. xxx. 27; comp. Ex. ix. 29, 33), because there the prayer is heard. Hence the expression "prayed before the God of heaven" (Neh. i. 4 *et seq.*, ii. 4). During the Persian rule, and possibly under Persian influence, the name "God of heaven" becomes quite frequent (Ezra i. 2, vi. 9, vii. 21; Neh. ii. 20; Dan. ii. 19, 37; iv. 34 ["the Lord of heaven," Hebr.]; Tobit x. 11, and elsewhere).

The conception of a plurality of heavens was evidently familiar to the ancient Hebrews (see Deut. x. 14; I Kings xviii. 15; Ps. cxlviii. 4; comp. Ḥag. 12a); while rabbinical and Apocryphal literature speaks of seven or of ten heavens (see Jew. Encyc. i. 591, *s.v.* Angelology; Kautzsch, "Die Apokryphen und Pseudepigraphen des Alten Testaments," ii. 121; Charles, "Book of the Secrets of Enoch," 1896, pp. xxx. *et seq.*). In the third of the seven, or the seventh of the ten, heavens paradise was placed, and within it the treasures of life and of righteousness for the soul (Ḥag. 12b–13a; Slavonic Enoch, viii. 1; II Cor. xii. 2 *et seq.*; Matt. vii. 19–20; Ex. R. xxxi. 4).

Inasmuch as "heaven" stands for the seat of God, whither prayer is directed, and where the destinies of men are decided, it came to be used as an equivalent for "God" (comp. "Maḳom" = "the Place," or "Marom" = "the Height," as equivalent to "God"; see Dan. iv. 23; Book of Jubilees, xxvi. 18; the rabbinical "min ha-shamayim" = "from heaven it is decreed," 'Ab. Zarah 18a; Ḥul. 7b; Gen. R. lxxix. 6; "bi-yede shamayim" = "by the hands of heaven," Ber. 33b; and "ha-shamayim beni le-benak" = "destiny stands between me and thee," Ned. xi. 12; I Macc. iii. 18 *et seq.*; iv. 10, 24, 40; xii. 15; II Macc. iii. 15, ix. 20; III Macc. vi. 17, 33; Assumptio Mosis, iii. 8; Matt. xxi. 25). In rabbinical terminology, especially, "shamayim," without the article, became the regular expression for the name of God, which was, from motives of reverence, avoided as far as possible; hence the words "mora" or "yir'at shamayim" = "fear of heaven" (Abot i. 3; Ber. 6b); "shem shamayim" = "the name of heaven" (Abot i. 12, ii. 2, iv. 11, and elsewhere); and "malkut shamayim" = "kingdom of heaven." This last expression is used in the sense of "sovereignty of God," as in the phrase "meḳabbel 'ol malkut shamayim" = "to accept the yoke of God's kingdom"—that is, by a solemn profession to acknowledge Israel's God as the only King and Ruler (Ber. ii. 1). With reference to the Messianic age, it applies to the time when God will be the sole King on earth, in opposition to the kings of worldly powers (Pesiḳ. 51a; Cant. R. ii. 12); whence Matthew's "kingdom of heaven" (Matt. iii. 2, and elsewhere), where the other gospels have "kingdom of God."

K.

HEBER (חבר): **1.** Grandson of Asher and founder of the family of the Heberites (Gen. xlvi. 17; Num. xxvi. 45). **2.** Heber the Kenite, husband of Jael (Judges iv. 11–17, v. 24). At the time of the war between Barak and Jabin, King of Hazor, Heber the Kenite separated himself from his family and pitched his tent in the plain of Zaanaim ([A.V. "Zaanannim"] *ib.* iv. 11). He was at peace with both contending parties (*ib.* 17).

ḤEBRA (more correctly **Ḥabura**) **ḲADDISHA:** Name for a charitable society which cares for the sick, especially for the dying, and buries the dead. The name "ḥebra ḳaddisha" (holy society) seems to have been used originally for congregations and religious societies generally. The old prayer for the welfare of the congregation ("Yeḳum Purḳan"), which is still recited in Ashkenazic synagogues on Sabbath morning, includes the prayer for teachers and masters forming "holy associations," *i.e.*, academies ("ḥaburata ḳaddishata"), both in Palestine and in Babylonia. This prayer, the date of which is uncertain, must have been written in Babylonia before the eleventh century. In Lemberg about 1700 there was a Holy Society of Morning Watchers, men who attended vigils every day (Buber, "Anshe Shem," p. 217, Cracow, 1895). In Moisling, near Lübeck, about the same time, there was a Ḥebra Ḳaddisha Talmud Torah, whose object was the study of religious literature (Carlebach, “Gesch. der Juden in Lübeck,” p. 29, Lübeck, n.d.). In Remagen there is a society for the promotion of manual labor among the Jewish youth, founded in 1837, and called “Chebroh Kadischoh” (“Allg. Zeit. des Jud.” 1903, No. 42). Zalman Fischhof, in his “Zemirot Yisrael,” Frankfort-on-the-Main, 1711, calls Judah he-Ḥasid the “leader of the entire ḥebra ḳaddisha” (S. T. Rabbinowitz, in “Keneset Yisrael,” i. 77).

Historical Development.

Since ancient times the burial of the dead has been regarded by the Jews as a religious duty of the highest importance (see Burial). That organized societies on the lines of the modern ḥebra ḳaddisha existed in remote times would appear to be indicated in the following Talmudic passage. Rab Hamnuna arrived at a certain place and heard that some one had died. Observing that the people of the city continued to follow their occupations, notwithstanding the fact that the duty of burying the dead took precedence of everything else, he threatened them with excommunication; but when they explained that there were burial societies in the city, he said that under such conditions work is permitted (M. Ḳ. 27b). Similarly, the Jerusalem Talmud declares that when the body is handed over to the carriers of the dead the relatives may break their fast, which begins at the moment of the death (Yer. Ber. iii. 1). On the basis of this decision the codes since Naḥmanides (13th cent.) have formulated the law that in places where officials are charged with the burying of the dead the relatives have done their duty as soon as the body has been delivered to the officials (Naḥmanides, “Torat ha-Adam, Ṭur Yoreh De'ah,” 341, 343, 383; comp. Shulḥan 'Aruk, Yoreh De'ah, *ad loc.*).

Oldest Mention.

Another Talmudic passage (Shab. 106a) says that if a member of a society (“ḥaburah”) dies, all the members of that society shall mourn. It is doubtful, however, whether these societies were organized for the special purpose of taking care of the dead. The context, and the absence of all laws regulating such societies, tend to lead to the supposition that these ḥaburot were fraternities dating from the time of the Essenes (Philo, ed. Mangey, ii. 632; Schürer, “Gesch.” 3d ed., ii. 563; see Ḥaber). The oldest mention of societies for burying the dead is found in a responsum (No. 75) of Nissim ben Reuben of Barcelona (14th cent.), who discusses a case in which legacies were left to various charitable societies, among them the “ḳabbarim” (grave-diggers). An often-quoted tradition attributes to Löw ben Bezaleel, chief rabbi of Prague (d. 1609), the organization (1593) of the first ḥebra ḳaddisha (Lieben, “Gal 'Ed,” p. 4, Prague, 1856; “Il Vessillo Israelitico,” 1894, p. 395; “Allg. Zeit. des Jud.” 1865, p. 102). A. Kohn, in Wertheimer's “Jahrbuch,” i. 28, Vienna, 1854, says that Eliezer Ashkenazi founded the ḥebra at Prague in 1562; and G. Wolf thinks that the expulsion of the Jews from Prague in 1561, at which time the sick were allowed to remain, led to the organization of a society for the care of the infirm (“Allg. Zeit. des Jud.” 1888, p. 237).

At all events, historical reports of the existence of these societies date back to the beginning of the seventeenth century. Even the books of prayers to be recited at the bedside of the dying seem to prove the existence of these societies. The earliest of these books is the “Ma'abar Yabboḳ” of Aaron Berechiah of Modena (Venice, 1626). On the blank pages of a copy of Leon Modena's “Ẓori la-Nefesh u-Marpe la-'Eẓem” (*ib.* 1619), Steinschneider found the roster of the members of such a society, giving their turns for duty, and beginning with 1646 (“Hebr. Bibl.” xvii. 126). Jospe Hahn of Frankfort-on-the-Main, in his “Yosif Omeẓ” (§ 870), reports that his congregation had a society for the care of the sick (“gomel ḥesed”) as early as the seventeenth century (Horovitz, “Frankfurter Rabbinen,” ii. 12). The ḥebra ḳaddisha of Hildesheim was founded in 1668 (“Allg. Zeit. des Jud.” Sept. 15, 1893); that of Breslau dated its oldest constitution from 1726; that of Vienna, from 1764; that of Copenhagen, from 1767. The “Book of the Society of Mercy” (“Ḥebrat Raḥamim”) of the congregation of Mantua, dated 1579 (Almanzi MSS., Cat. p. 13), may be something similar.

Organization.

The membership of the ḥebra was limited to males over the age of thirteen (see Bar Miẓwah), but children might be admitted as contributing members. It was, in fact, customary for wealthier members of the community to enroll their children in the ḥebra at the time of birth. Women formed their own societies to attend the dying and wash the dead; these were usually called “Nashim Ẓadḳaniyyot” (pious women). The members of the ḥebra and their families enjoyed certain benefits after death; they were buried in that part of the cemetery reserved for privileged people, and their funeral expenses were lower. The officers of the ḥebra were elected annually, generally during the week of the Feast of Sukkot; but the president, chosen from the trustees, was changed every month. In some cities, as Breslau and Düsseldorf, there was a board of eighteen (that number being chosen because it is the numerical value of חי = “living”), who were always ready to attend the bedside of a dying member and remain with him to the last; to recite with him the confession of sins, if he were conscious; to pray during his agony; and finally to recite the Shema' at the moment of death. When breathing had ceased for a certain time, they laid the body on the bare floor, arranged for the burial, and then washed the body, during which ceremony they recited Biblical passages. Among the Sephardim this is done by a similar society called the “Lavadores” (“Jew. Chron.” Dec. 28, 1900; Jan. 23, 1903). The various functions connected with washing the body and attiring it in shrouds were distributed according to the age and the standing of the members; thus, the president of the society had the privilege of putting the linen cap on the head of the corpse. Every year the society observed a fast-day, on which, after the morning service, the members visited the cemetery, where the rabbi preached a sermon on charity; in the evening they held a banquet (“ḥebrah se'uddah”) Various days are chosen for this reunion, although the 7th of Adar, the traditional date of Moses' death, seems to be the most popular date. Presburg observes this fast-day on the 22d of the ‘Omer days (17th of Iyyar); Prague, on the eve of the new moon of Shebaṭ; Kiev, on the 15th of Kislew. The members of the ḥebra had certain privileges at the synagogue: they distributed the honors on Hosha‘na Rabbah, and on the eve of Simḥat Torah the president was escorted to the synagogue under a canopy by torch-bearers (Mapu, "Ha-‘Ayiṭ Ẓabua‘," iii. 54). Not infrequently friction occurred between the ḥebra and the congregation; this has been especially the case in modern times, when the congregations have been inclined to Liberalism, and the ḥebra has been the center of Orthodoxy. On one occasion in Fürth the civil authorities were compelled to interfere ("Allg. Zeit. des Jud." 1841, pp. 337 *et seq.*). In the congregations of to-day, however, especially in large cities, the voluntary performance of the duties to the dead is no longer common, and the functions of the ḥebra have become attached to certain of the communal offices or are performed by paid workers. See WATCHER.

ḤEBRAH SE‘UDAH. See ḤEBRA ḲADDISHA.

HEBRAISTS, CHRISTIAN: The work of Christian scholars in the field of Hebrew literature demands special treatment, not only as part of the history of Jewish literature itself, but also as an indication of the relation which existed between Jews and Christians at various epochs. The neglect by Christians of this study has given rise to many of the false ideas in regard to the Jews and their history which have been current down to the present day. The early fathers of the Christian Church recognized the necessity of understanding the ideas of the mother Synagogue, and got their knowledge of Hebrew traditions (*i.e.*, the Haggadah) from their Jewish teachers. This is seen especially in the exegesis of Justin Martyr, Aphraates, Ephraem Syrus, and Origen. Jerome's teachers are even mentioned by name—*e.g.*, Bar Ḥanina (Hananiah). This knowledge, however, gradually grew less and less as the separation between Church and Synagogue became wider.

What was known of Jewish literature came to the scholastics entirely through translations, as can be seen in the works of Albertus Magnus. That The Venerable Bede (673-735) knew anything of Hebrew may be doubted, despite the testimony of Hody in his "De Bibliorum Textibus" (1705). The same may be said of Alcuin (b. 735); but the "Magister Andreas, natione Anglus" mentioned by Roger Bacon, and identified by S. R. Hirsch with an Augustinian monk who lived about 1150, must at least have been able to read the Bible in the Hebrew original. Bacon himself (b. *c.* 1210) was "a tolerable Hebrew scholar." It was not, however, until the end of the fifteenth century that the Renaissance and the Reformation, while awakening a new interest in the classics, brought about a return to the original text of Scripture and an attempt to understand the later literature of the Jews. Hieronymus Buclidius, the friend of Erasmus, gave more than 20,000 francs to establish a Hebrew chair at Louvain; Francis called to the chair of Hebrew at the University of Paris Elijah Levita, the friend of Cardinal Ægidius of Viterbo. Cardinal Grimani and other dignitaries, both of the state and of the Church, studied Hebrew and the Cabala with Jewish teachers; even the warrior Guido Rangoni attempted the Hebrew language with the aid of Jacob Mantino (1526).

In the Renaissance.

Pico de la Mirandola (d. 1494) was the first to collect Hebrew manuscripts, and Reuchlin was the first to write a modern grammar of the Hebrew language. But interest still centered wholly around the Bible and the expository literature immediately connected therewith. During the whole of the sixteenth century it was Hebrew grammar and Jewish exegesis that claimed attention. Christian scholars were not ashamed to sit at the feet of Jewish teachers. Sebastian Münster (d. 1552) was known as a grammarian; Pellicanus (d. 1556) and Pagninus (d. 1541), as lexicographers; Bomberg (d. 1549), as a printer of Hebrew books. Arius Montanus (d. 1598) edited the Masorah and the "Travels of Benjamin of Tudela." Widmanstadt (1523), living in a colony of Spanish Jewish refugees in Naples, studied Hebrew with David ibn Yaḥya and Baruch of Benevento, and collected the Hebrew manuscripts which formed the basis of the Hebrew division of the Royal Library at Munich. Vatablé (d. 1547) made use of Rashi's commentary. Conrad Gesner (d. 1565) was the first Christian to compile a catalogue of Hebrew books; Christmann (d. 1613) busied himself with the Jewish calendar, and Drusius (d. 1616) with the ethical writings of the Jews.

Seventeenth Century.

Johannes Buxtorf (d. 1629) marks a turning-point in the study of Jewish literature by Christians. He not only studied the Targum and the Talmud, but endeavored to understand Jewish history, and he was the first real bibliographer. Even women showed an interest in the subject—Anna Maria Schurman, the "star of the century," in Holland; Dorothea Moore in England; Queen Christina of Sweden (d. 1689); Maria Dorothea, consort of the Duke of Saxe-Weimar; Elizabeth, daughter of Frederick of the Palatinate; Maria Eleanora, wife of Charles Ludwig of the Palatinate; Antonia, daughter of Duke Eberhard of Württemberg. Through the influence of Buxtorf a serious attempt was made to understand the post-Biblical literature, and many of the most important works were translated into Latin. In this connection the following names may be mentioned: Coccejus (d. 1667); L'Empereur (d. 1648); Lightfoot (d. 1675); Leusden (d. 1699); and especially Surenhuis (1698), who gave a complete translation of the Mishnah; Jewish theology was studied by Carpzov (d. 1699), Wagenseil (1705; whose letters show the care he took

30

to gather information from both Jews and Jewesses), and Rittangel (1641); antiquities, by Bochart (d. 1667), Hottinger (d. 1667), Hyde (d. 1700), Trigland (d. 1705), Breithaupt (1707), and Schudt (d. 1722). It was a time in which the Christian theologian studied Hebrew and rabbinics before taking up his specific theological study. Hackspan (d. 1659) wrote upon the value to the theologian of studying the works of the Rabbis. Their writings on the Bible were read by Schickard (1635), Hody (d. 1706), and Richard Simon (d. 1712), while catalogues of Hebrew collections were published by Plantavitius (d. 1651), Le Long (d. 1721), and Montfaucon (d. 1741). Hottinger gave this literature a place in his "Bibliotheca Orientalis"; Otho (1672) wrote a biographical lexicon of the Mishnah teachers; and Bartolocci's "Bibliotheca Rabbinica" (1675) was a worthy continuation of these bibliographical labors.

The first half of the eighteenth century contains the names of three important scholars. Basnage (d. 1725), though he knew no Hebrew, may be mentioned here for the reason that his "L'Histoire de la Religion des Juifs" was the first attempt at a complete presentation of this history. The "Entdecktes Judenthum" of Eisenmenger (d. 1704) exhibits a mass of Jewish learning; but its anti-Jewish tendency largely vitiated the service it might have rendered.

Eighteenth Century.

Far ahead of these two stands Johann Christian Wolf (d. 1739), who, with the help of the Oppenheimer library, was able to produce his "Bibliotheca Hebræa," which laid the foundation for all later works in Hebrew bibliography. In addition to these, Bodenschatz (d. 1797) deserves mention. He, though not a scholarly Hebraist, gave an unbiased and accurate account of Jewish ceremonials. By the side of these stand Bashuysen (d. 1750), the translator and printer of Hebrew books; Reland (d. 1718), the first to use Talmudic material for the study of the geography of Palestine; the bibliographers Unger (d. 1719) and Gagnier (d. 1720), who gave Wolf his information regarding the manuscripts in the Bodleian; J. H. Michaelis (d. 1738) and Mai (d. 1732), who compiled a catalogue of the Uffenbach library; Baratier (d. 1740), the youthful prodigy, who wrote on Benjamin of Tudela; Mill (d. 1756), who treated rabbinical exegesis; and Wähner (1762), who described Hebrew antiquities. Ugolini (1744) is said to have been a converted Jew, and therefore finds no place here. Especial mention should be made of Ezra Stiles, the learned president of Yale College (1778), certainly the most learned Christian student of post-Biblical Jewish literature that America has produced.

Early Nineteenth Century.

Toward the end of the eighteenth century such friends of Hebrew literature became ever rarer. The rise of Biblical criticism and of the study of other Semitic languages engaged the whole interest of Semitic scholars. Even Rabe, the translator of the Mishnah into German (d. 1798), Semmler, Michaelis, Tychsen (d. 1815), and Sylvestre de Sacy (d. 1838) can hardly be mentioned by the side of the humanists of previous centuries. Interest in the text of the Bible caused some work to be done in the collecting of Hebrew manuscripts, especially by Kennicott in England (1776–80) and De Rossi in Italy (1784–88). The last-named made a most valuable collection of Hebrew manuscripts; and by his side may be mentioned Pasinus in Turin (d. 1749), Biscioni in Florence (d. 1752), Assemani in Rome (d. 1756), and Ury in Oxford (d. 1787).

At the Universities.

The downward trend continued in the first half of the nineteenth century; Jewish literature became less and less a subject of investigation by Christians; and when it was studied it was generally for the purpose of forging weapons against the people whose literature it was. This is seen in such works as A. T. Hartmann's "Thesaurus Linguæ Hebr. e Mischna Augendi" (1825), in Winer's "Biblisches Realwörterbuch," and even in the works of Hitzig and Ewald. There was no understanding even of the period of Jewish history during which Christianity arose and developed; and David Strauss's complaint in regard to this was only too well founded. During the second half of the nineteenth century, however, the idea gained currency that there was something to be learned by going back to the sources of this history; but only a very few of the universities made a place for this study in their curricula. At the beginning of the eighteenth century David Rudolph of Liegnitz included "Rabbinisch und Chaldäisch" among the Oriental languages which he taught at Heidelberg; but he had few imitators; and in the nineteenth century, apart from a few stray courses, such as Kautzsch's on Redak at Tübingen, Lagarde's on Al-Ḥarizi at Göttingen, and Strack's on the Mishnah at Berlin, the whole of rabbinic literature was ignored by European universities. Honorable exceptions in this respect were furnished in the universities of Oxford (where A. Cowley is sublibrarian of the Bodleian Library) and Cambridge (which has produced such scholars as W. H. Lowe, Matthews, and C. Taylor) in England, and in Columbia University, the University of California, the University of Chicago, Harvard University, and Johns Hopkins University, in America. The Jews have been allowed to work out by themselves the new Jewish science ("Jüdische Wissenschaft"), little attention being paid to that work by others.

In more recent times a few Christian scholars have given Jewish literature their attention. Abbé Pietro Perreau has done good service by his many articles on the literature of the Jews in the Middle Ages and by the assistance he has given to scholars from the Hebrew manuscripts at Parma; Martin Hartmann has translated and commentated the "Meteḳ Sefatayim" of Immanuel Frances (Berlin, 1894); Thomas Robinson has collected some good material in his "The Evangelists and the Mishna" (1859). August Wünsche, in his "Erläuterung der Evangelien aus Midrasch und Talmud" (1878), enlarged the scope of the inquiry begun by Lightfoot; and his translations from the Midrash opened up the stores of ancient Jewish exegesis. Weber's "System der Altsynagogalen Palestinischen Theologie" (1880) was, with all its failings, an honest attempt to understand the theology of the Synagogue, and it has been worthily followed by Bousset in his "Religion des Judenthums im Neutestamentlichen Zeitalter" (1903). Dom Pedro, King of Brazil, should also be mentioned for his publication of Provençal Jewish poetry.

Present Day.

The Institutum Judaicum in Leipsic, founded by Franz Delitzsch, and a similar society bearing the same name in Berlin and founded by Hermann Strack, have attempted, by their various publications, to diffuse in the Christian world a knowledge of Jewish writings. Gustav Dalman has shown by his philological works on Talmudic grammar and lexicography that he is at home in the rabbinic writings. Hermann Strack in Berlin demands special mention not only for his publications dealing with the literature of the Mishnah and the Talmud, but also on account of the fearless manner in which he has combated anti-Semitic prejudice, drawing his material directly from the original sources. Carl Siegfried, in his yearly reports in the "Theologischer Jahresbericht," for many years called attention to publications on Jewish subjects, and the mention of such works in the "Orientalische Bibliographie" has served to bring them more closely to the attention of Christian scholars. The roll of Christian Hebraists in England includes the names of J. W. Etheridge, the author of a popular "Introduction to [post-Biblical] Hebrew Literature" (1856); Thomas Chenery, translator of "Legends from the Midrash" (1877), and editor of Al-Ḥarizi's translation of Ḥariri; and W. H. Lowe, who edited the Palestinian recension of the Mishnah.

In spite, however, of these facts and of the warning given by Lagarde ("Symmicta," ii. 147; "Mittheilungen," ii. 165), that in order to understand the Bible text itself a deep study of the Halakah is necessary, Christian writers on the life of Jesus continue their disregard of the primary sources. This may be seen in Hausrath's "Neutestamentliche Zeitgeschichte" ("Kaufmann Gedenkbuch," p. 659), and even in Schürer ("Gesch."), who, though making a great advance upon previous efforts, still relies upon second-hand sources for many of the pictures that he draws (see Abrahams in "J. Q. R." xi. 628). Adolph Harnack, who, in his "Dogmengeschichte" (3d ed.), endeavors to do some justice to the rabbis of old, falls, in his "Wesen des Christenthums" (1900), into many old errors through his ignorance of the Jewish literature of the period of which he treats, at the same time disregarding entirely the literature and history of the Jews during the last eighteen hundred years (Felix Perles, "Was Lehrt Uns Harnack?" Frankfort-on-the-Main, 1902).

The following list of Christian Hebraists has been compiled upon the basis of Steinschneider's article mentioned in the bibliography below. Christian students of the Bible have not been included, as they may be found in other articles·

Aarhus, Peter Sim. (c. 1711; Hafen ?).
Abicht, Jo. Ge. (d. 1740; Wittenberg).
Adam, Eston (Benedictine; d. 1397; Hereford).
Adler, Jac. Ge Chr. (d. 1805; Copenhagen).
Ægidius de Viterbo (1471-1532; Italy).
Alfonso de Leon Zamora (16th cent.).
Allixius, Petrus (17th cent.; Alençon).
Alting, Jacob (17th cent.; Gröningen).
Anchersen, Matth. (d. 1741; Jutland).
Anslus, Gerebrard (17th cent.).
Arias Montanus (Benedictine; d. 1598; Seville).
Armengaud (?), Blasius (d. 1314; Montpellier).
Arnd, Joshua (*c.* 1626; Güstrow).
Arnoldus, Michael (*c.* 1680; Holland).
Asp, Matth. (1696-1763; Upsala).
Assemani, Simon (d. 1821; Padua).
Aubry, Esaias (*c.* 1730; Berlin ?).
Bacon, Roger (1214-94; Oxford).
Baldi, Bernardino (1553-1617; Urbino).
Baratier, Jo. Phil. (1721-40; Schwabach).
Barozzi, Franc. (d. 1587; Italy).
Bartolocci, Jul. (1613-87; Rome).
Bashuysen, Henr. Jac. van (1679-1750; Hanau).
Baynus, Rudolphus (*c.* 1554; Paris).
Beckmann, Jo. Christ. (*c.* 1677; Frankfort-on-the-Oder).
Becks, Matth. Frid. (1649-1701; Augsburg).
Bedwell, William (1561-1632; London).
Beelen, Joh. Theodor (*c.* 1841; Amsterdam).
Beke, Matth. (*c.* 1708; Amsterdam).
Bellermann, Jo. Joachim (1754-1842; Erfurt).
Bengel (?), Eric (*c.* 1692; Sweden).
Bernard, Edward (1638-96; Oxford).
Bircherode, Jan. (1623-86; Copenhagen).
Biscioni, Anton. Maria (1674-1756; Florence).
Bleibtreu, Phil. Jo. (*c.* 1699; Frankfort-on-the-Main).
Bodecker, Stephan (Bishop; *c.* 1438; Brandenburg).
Bohlius, Sam. (1611-89; Rostock).
Borel, Adam. Jun. (1603-67; Zealand).
Böschenstein (?), Jo. (b. 1472; Austria).
Bourdelot (*c.* 1619; Paris).
Breithaupt, Joh. Fred. (1639-1713; Gotha).
Brighenti, Gio. Ant. (d. 1702; Verona).
Broughton, Hugh (1549-1612; Tottenham).
Buddaeus, Jo. Fr. (1667-1729; Halle ?).
Burgonovo, Archangelus (Minorite; 16th cent.; Pozzo).
Buxtorf, Johannes I. (1564-1629; Basel).
Buxtorf, Johannes II. (1599-1664; Basel).
Buxtorf, Johannes Jakob (1645-1705; Basel).
Buxtorf, Johannes Jakob (1663-1732; Basel).
Cademannus, Jos. Rud. (d. 1720; Pegau).
Campen, Joh. van (1490-1538; Freiburg-im-Breisgau).
Caninius, Angelus (1521-57; Paris).
Cappellan, Claud. (d. 1667; Paris).
Carpzov, Johann (Benedictine; 1639-99; Leipsic).
Cartwright, Christ. (1602-58; York).
Castell, Edmund (1606-85; Higham).
Castro, Joh. Rodriguez de (1739-96; Madrid).
Cellarius (?), Jo. (*c.* 1518).
Chenery, Thomas (1826-84; London).
Chevalier, Ant. Rud. (1507-72; Germany).
Chiarini, Luigi (Abbé; 1789-1832; Warsaw).
Christmann, Jac. (1554-1613; Heidelberg).
Chytraeus, D. (*c.* 1551).
Ciselius, Phil. (*c.* 1696; Franeker).
Clanner (J. G.?) (*c.* 1726 ?).
Clark, Sam. (*c.* 1657; Oxford).
Clavering, Rob (Bishop; 1671-1747; Peterborough).
Clodius, Jo. Chr. (d. 1633; Leipsic).
Cluverus, Jo. (17th cent.).
Cnollen, Adam Andreas (1674-1714; Fürth).
Cnollen, Jos. Nicol. (brother of preceding).
Coccejus (Koch), Jo. (1603-69; Leyden).
Coddaeus, Giul. (1575-1630; Leyden).
Collin, C. E. (*c.* 1705; Giessen).
Collins, G. (*c.* 1890; Oxford).
Costus, Petrus (*c.* 1554).
Cotta, Jo. Fr. (1701-79; Tübingen).
Cramer, Jo. Jac. (1673-1702; Zurich).
Cramer, Jo. Rud. (1678-1731; Zurich).
Crenius, Thom. (1648-1728; Leyden).
Crocius, Lud. Mich. (*c.* 1673).
Croius (?), Jo. (18th cent.: Oxford).
Dachs, Fried. Bernh. (*c.* 1726; Utrecht).
Dalmaki, Laurentius (*c.* 1643; Hungary).
Danz, Jo. Andr. (1654-1728; Jena).
Dassovius, Theod. (d. 1721; Wittenberg; Kiel).
Disma, P. (*c.* 1757; Italy).
Dithmar, Just. Christ. (*c.* 1706; Holland ?).
Donatus, Franc. (d. 1635; Rome).
Dove, John (*c.* 1746; London).
Drusius (Driesch), Jo. I. (1550-1616; Leyden).
Drusius, Jo. II. (son of preceding: 1588-1609; Chichester).
Ebertus, Jac. (1549-1614; Frankfort-on-the-Oder).
Ebertus, Theod. (d. 1630; Frankfort-on-the-Oder).
Eggers, Jo. (*c.* 1719; Basel; Leyden).

Einem, Jo. Justus von (*c.* 1738; Germany).
Eisenmenger, Joh. And. (1654–1704; Heidelberg).
Empereur, Constantin l' (1570–1648; Leyden).
Etheridge, J. W. (*c.* 1856; Penzance).
Fabricius, Ern. Christ. (*c.* 1792).
Fabricius, Fred. (1642–1703; Wittenberg).
Fagius (Buchlin), Paulus (1504–49; Cambridge).
Faust, Jo. Friedr. (*c.* 1706; Germany).
Ferrand, Lud. (*c.* 1640–1700; Paris).
Figueiro, Petrusa (*c.* 1615).
Fourmont, Etienne, the elder (1683–1745; Paris).
Franciscus, Maria (Capuchin).
Franck, Sebastian (*c.* 1537; Ulm).
Frey, Jo. Ludw. (1682–1759; Basel).
Frommann, Erh. Andr. (1722–74; Klosterbergen).
Fronmüller, Conrad (*c.* 1679; Altdorf?).
Fuller, Nicol. (1557–1626; Salisbury).
Gaffarellus, Jac. (1601–81).
Gagnier, Jos. (1670–1740; Oxford).
Galatinus, Petrus (*c.* 1518).
Galle, Joh. (*c.* 1711; Upsala).
Gaudia, Barthol. Valverdio (Spain).
Gaulmyn, Gilb. (d. 1667; France).
Gejerus, Martin (1614–80; Freiberg).
Genebrard, Gilb. (1537–97; Samur).
Gentius, Geo. (1618–87; Freiberg).
Georgios, Chrysococca (1340–56? Greece).
Germberg, Herm. (1604).
Giggeius, Ant. (d. 1632; Milan).
Gill, John (1697–1771; London).
Graser, Conrad (d. 1613; Germany).
Groddeck, Gabr. (1672–1709; Danzig).
Guidacerius (Guidacier), Agathius (*c.* 1540).
Guisius, Gul. (1653–90; Oxford).
Hackspan, Theodor (1607–59; Altdorf).
Haller, Albert (1708–77; Bern).
Hanel, Melchior (*c.* 1661; Prague).
Hannecken, Meno (1595–1677; Marburg).
Hardt, Anton Jul. van der (1707–85; Helmstädt).
Hardt, Herm. van der (1660–1746; Helmstädt).
Hartmann, Ant. Theodor (1774–1838; Rostock).
Hartmann, Jo. Phil. (*c.* 1708).
Hartmann, Martin (1851; living; Berlin).
Havemann, Chris. (17th cent.).
Hebenstreit, Johann Chr. (1686–1756; Leipsic).
Helenius, Engelbart (*c.* 1727; Sweden).
Helwig, Christopher (1581–1617; Giessen).
Hepburn, Jo. Bonaventura (1573–1621; Scotland).
Hilpert, Jo. (*c.* 1651).
Hinckelmann, Alr. (1652–95; Hamburg).
Hirt, Jo. Frid. (1719–84; Wittenberg).
Hochsteter, Andreas Adam (1668–1717; Tübingen).
Holten, Albert (*c.* 1675; Tübingen).
Hommel, Car. Ferd. (1722–81; Leipsic).
Honorius (Monk; 1452).
Hottinger, Jo. Henr. I. (1620–67; Heidelberg).
Hottinger, Jo. Henr. II. (*c.* 1704).
Houting, Henr. (*c.* 1695).
Hufnagel, G. F. (*c.* 1795).
Huldrich, Jo. Jac. (1683–1731).
Hulsius, Ant. (d. 1685; Holland).
Husen, Franc. (*c.* 1676).
Hyde, Thomas (1631–1703; Oxford).
Ikenius, Conrad (1689–1753; Bremen).
Imbonatus, Car. Jos. (d. 1696; Rome).
Jacobs, Henry (1608–52; Oxford).
Janvier, Renatus Ambros. (1613–82; Paris).
Johannes Lucæ (1406; Italy).
Justinianus, Augustin (1470–1531; "Episcopus Nebiensis").
Keller, Gottl. Wilh. (17th cent.: Jena [?]).
Kircher, Athanasius (Jesuit; 1602–80; Rome).
Knorr, Christian, Baron de Rosenroth (1636–89; Sulzbach).
Kocher, Herrm. Fried. (*c.* 1783; Jena).
König, Friedrich Eduard (1846; Reichenbach).
König, Sam. (1670–1750; Bern).
Köppen, Nic. (*c.* 1709; Greifswald).
Kosegarten, J. G. L. (1792–1860; Greifswald).
Krafft, Karl (*c.* 1839; Ansbach).
Kraut, Paul (*c.* 1703; Lund).
Kyber, David (16th cent.; Strasburg?).
Lagarde, Paul de (1827–91; Göttingen).
Lakemacher, Joh. Gothofr. (1695–1736; Helmstädt).
Lange, Jo. Joachim (1670–1744; Halle).
Lange, W. (*c.* 1710).
Langens, Henr. (*c.* 1720; Holland).
Lederlin, Jo. Henr. (1672–1737; Strasburg).
Lehmann, Ge. Heinrich (1619–99; Leipsic).
Leib, Chilian (Prior; 1471–1548; Rebdorf).
Le Long, Jac. (1665–1721; Paris).
Lenz, Jo. Leonh. (*c.* 1700; Germany).
Lepusculus, Sebastian (*c.* 1546; Germany).
Leusden, Joh. (1624–99; Utrecht).
Leydecker, Melchior (1642–1722; Utrecht).
Lightfoot, John (1602–75; Ely).
Lipomanni, Marco (*c.* 1440; Venice).
Loscan, Joh. Frid. (*c.* 1710; Germany).
Losius, Jo. Justus (*c.* 1706; Germany).
Lowe, W. H. (Cambridge).
Ludwig, Christ. L. (b. 1663, Landshut; d. 1732).
Lund, Dan. (b. 1666, Fogdoë; d. 1746, Strengnäs).
McCaul, Alexander (b. 1799, Dublin; d. 1863, London).
Mai, Joh. Hen. (1688–1732; Giessen).
Malamina, Cæsar (*c.* 1774; Florence).
Manfred (?), King (d. 1266; Germany).
Mannetti, Giannozzo (b. 1396, Florence; d. 1459, Naples).
Margoliouth, D. S. (living; Oxford).
Margoliouth, G. (living; London).
Margoliouth, Moses (b. 1820, Suwalki; d. 1881, London).
Marini, Marco (b. 1541, Brescia; d. 1594, Brescia).
Matthias Aquarius (*c.* 1581).
Matthias, Elias (Germany).
Meelführer, Rud. Martin (b. 1670, Ansbach; d. 1729).
Mercer, Jo. (d. 1570; Uzès).
Meyer, Jo. (*c.* 1693; Holland).
Michaelis, Jo. Henr. (b. 1717, Halle; d. 1791, Göttingen).
Midhorp, Joh. (*c.* 1562).
Mieg, Jo. Frid. (b. 1700, Marburg; d. 1788, Heidelberg).
Mill, David (b. 1692, Konigsberg; d. 1756, Utrecht).
Molitor, Christoph. (*c.* 1659; Altdorf).
Montfauçon, Bern (b. 1655, Soulange; d. 1741, Paris).
Moré, Eugène (*c.* 1837; France).
More, Henry (b. 1614, Grantham; d. 1687, Cambridge).
Morin, Etienne (b. 1625, Caen; d. 1700, Amsterdam).
Morin, Jean (b. 1591, Blois; d. 1659, Paris).
Muhl, Henr. (b. 1666, Bremen; d. *c.* 1730, Kiel).
Muhl, Jos. (Holstein).
Muis, Simon de (b. 1587, Orleans; d. 1644, Paris).
Münster, Sebastian (Minorite; b. 1489, Ingelheim; d. 1552, Basel).
Murner, Thomas (Minorite; b. 1475; d. 1537?).
Myerlin, David Fr. (d. 1778; Frankfort-on-the-Main).
Nagel, Jo. Andr. Mich. (1740–1788; Altdorf).
Neale, Thomas (*c.* 1557; England).
Nicholas de Lyra (d. 1340; Paris).
Nigri (Schwartz), Peter (*c.* 1475; Cadana?).
Nork, Fr. (1803–50; Germany [actually Fr. Korn]).
Norrelius, Andr. (*c.* 1720; Upsala).
Novenianus, Phil. (?) (*c.* 1520; Hasfurtensis?).
Odhelius, Laur. (d. 1691; Upsala).
Opfergeld, Friedrich (1668–1746; Breslau).
Opitius, Paul Friedr. (1684–1745; Kiel).
Osterbröck, Aaggaens.
Otho, Jo. Henr. (d. 1719; Lausanne).
Ouserl, Phil. (*c.* 1714; Frankfort-on-the Main).
Owmann, Mart. Jac. (*c.* 1705; Germany).
Pagninus, Xanthus (b. 1470, Lucca; d. 1536, Lyons).
Palmroot, Jo. (*c.* 1696; Upsala).
Pasinus, Jos. (b. 1687, Padua; d. 1770, Turin).
Pastritius, Jo.
Pedro, Dom (Emperor of Brazil; 1825–91).
Pellican, Conrad (1478–1556; Zurich).
Peringer, Gustav (b. 1657; Upsala; Stockholm).
Peritz, Ismar J. (living; Syracuse, U. S. A.).
Perreau, Pietro (Abbé: living, Parma).
Pertsch, W. H. F. (*c.* 1720; Jena).
Peter of St. Omer (1296; Paris).
Petit, Pietro Giov. de (d. 1740; Rome).
Petrus de Alexandrica (Augustinian: 1342).
Petrus Montagnana (?) (1478; Italy).
Pfeiffer, Aug. (b. 1640, Lauenburg; d. 1698, Leipsic).
Pico de la Mirandola (d. 1494; Italy).
Picques, L. (*c.* 1670; Paris).
Pistorius, Jo. Nidanus (b. 1544, Nidda; d. 1607, Freiburg-im-Breisgau).
Plantavitius, Jo. (Bishop; 1625–48; Lodève).
Plato of Tivoli (1116; Barcelona).
Pontacus, Arnold (Bishop; d. 1605; Bazas).
Postel, Gul. (b. 1505, Delorie; d. 1581, Paris).
Prache, Hilarie (b. 1614, Teutschel; d. 1679, London).
Prideaux, Humphrey (Dean; b. 1648, Padstow; d. 1724, Norwich).

Quinquaboreus (Cinqarbre), Johannes (d. 1587; Paris).
Rabe, Joh. Jac. (1710-98; Onolzbach).

Raymund de Peñaforte (Dominican; 1175-1275; Barcelona).
Reinneccius, Chr. (b. 1668, Grossmühlingen; d. 1752, Weiscufels).
Reiske, Joh. Jacob (b. 1716, Zoerlug; d. 1774, Leipsic).
Reland, Adrian (b. 1676, Ryp; d. 1718, Utrecht).
Rendtorf, Jo. (Hamburg).
Reuchlin, Jo. (b. 1455, Pforzheim; d. 1522, Stuttgart).
Rezzonius, Franc. (b. 1731, Como; d. 1780).
Rhenferdius, Jac. (b. 1654, Mühlheim; d. 1712, Franeker).
Ritmeier, Chr. Henr. (*c.* 1697).
Rivinius, Tileman Andreas (b. 1601, Halle; d. 1656, Leipsic).
Robustellus, Jo. (1655; Rome).
Rönnow, Magn. (d. 1690).
Rossi, Giov. Bern. de (1742-1831; Parma).
Sacy, Isaac Silvestre de (1758-1838; Paris).
Salchli (?), Jo. Jac. (b. 1694, Eggwil; d. 1774, Bern).
Sartorius, Jo. (b. 1656, Eperies; d. 1729, Danzig).
Saubert, Jo. (1638-88; Helmstädt).
Scheidt, Balth. (1614-70; Strasburg).
Scherping, Jacob (*c.* 1737; Stockholm).
Scherzer, Jo. Adam (b. 1628, Eger; d. 1683, Leipsic).
Schickard, Wilh. (b. 1592, Heerenberg; d. 1635, Tübingen).
Schindler, Valentin (d. 1604; Wittenberg; Helmstädt).
Schmidt, Sebastian (*c.* 1656; Strasburg).
Schnelle, Sebald (1621-51; Nuremberg).
Schoettgen, Jo. Christ. (1687-1751).
Scholl, J. C. F. (Tübingen).
Schotanus, Christ. (b. 1603, Scheng; d. 1671, Franeker).
Schramm, Jonas Conr. (*c.* 1700; Helmstädt).
Schreckenfuchs, Erasmus Oswald (1511-75; Tübingen).
Schroeder, Jo. Joachim (1680-1756; Marburg).
Schulten, Albert (1686-1750; Holland).
Schulten, Car. (*c.* 1725; Lund).
Schulten, Heinrich Albert (1749-93; Holland).
Schulten, Jo. Jac. (1716-78; Holland).
Schwenter, Daniel (1585-1636; Nuremberg).
Scotus, Jo. Duns (d. 1308).
Sebastianus, Aug. Nouzanus (*c.* 1532; Marburg).
Seidel, Casp. (*c.* 1638; Hamburg).
Seiferheld, J. L. (18th cent.).
Seyfried, Christ. (*c.* 1664).
Seyfried, Henr. (*c.* 1663; Altdorf).
Sgambatus, Scipio (*c.* 1703; Italy).
Sheringham, Rob. (b. 1602, Gnestwick; d. 1678, Cambridge).
Siegfried, Carl (b. 1830, Magdeburg; d. Jena).
Smith, Thomas (b. 1638, London; d. 1710).
Sommer, Gottfr. Chris. (*c.* 1734; Gotha).
Sonneschmid, Jo. Just. (*c.* 1719; Jena?).
Spalding, G. L. (b. 1762, Barth; d. 1811, Friedrichsfelde).
Sprecher, Jo. Died. (*c.* 1703; Helmstädt).
Springer, Daniel (1656-1708; Breslau).
Staemmen, Christoph. van (*c.* 1661; Preza-Holsatus?).
Starke, Heinrich Benedict (b. 1672, Engelen; d. 1717, Leipsic).
Steinmetz, Joh. Andr. (b. 1689, Gr. Knicymtzd; d. 1762).
Strack, Herrmann L. (living; Berlin).
Stridzberg, Nic. H. (*c.* 1731; Lund).
Struvius, Jo. Jul. (*c.* 1697; Germany).
Surenhuys, Gul. (d. 1729; Amsterdam).
Svetonio, Agost. (Italy).
Taylor, C. (living; Cambridge).
Taylor, Franc. (d. 1660; Cambridge).
Terentius, Jo. (b. 1580, Constance; d. 1630, China).
Theobald (?) (Subprior; 14th cent.; Paris).
Trigland, Jac. (d. 1705; Leyden).
Tychsen, Olaf Ger. (1734-1815; Rostock).
Ulmann, Jo. (*c.* 1663; Strasburg).
Urbanus, Rhegius Henricus (*c.* 1535; Germany).
Ury, Jo. (d. 1796; Oxford).
Uythage, Cn. Corn. (*c.* 1680; Leyden).
Valverdius, Barthol. (Spain).
Varen, Aug. (d. 1684; Rostock).
Vatablé, Fr. (d. 1547; Paris).
Vehe, Matth. (d. 1539; Halle).
Vinding, Jo. Paul (*c.* 1633; Holland?).
Voorst, Dick Cornelis van (b. 1751, Delft; d. 1833, Amsterdam).
Voss, Dionysius (b. 1612, Dordrecht; d. 1633, Amsterdam).
Voysin (Vicinus), Jos. de (*c.* 1635; Paris).
Wagenseil, Jo. Christoph. (1635-1703; Altendorf).
Wakefleld, Rob. (d. 1537; Oxford).
Wallin, Georg (*c.* 1722; Holm).
Walter, Jo. (*c.* 1710).
Walther, Christ. (*c.* 1705; Königsberg).
Warner, Levin (d. 1663; Holland).
Weiganmeier, Georg (1555-99; Tübingen).
Wessel, Joh. (b. 1419, Groningen; d. 1489).
Widmanstadt, Jo. Albrecht (b. 1500; d. 1559, Wellingen).
Wilkins, David (b. 1685; d. 1748, Hadleigh).
Winckler, Jo. Fried. (b. 1679, Wertheim; d. 1738, Germany).
Winer, Jo. Ge. Bened. (1789-1858; Leipsic).
Witter, Henr. Bernh. (*c.* 1703; Germany).
Woeldicke, Marcus (1699-1750; Copenhagen).
Wolf (?), Georg (*c.* 1557; Grimma).
Wolf, Jo. Christoph. (1688-1739; Hamburg).
Wolf, Jo. W. (d. 1571; Gera).
Wolph (?), Jo. Hac. (Zurich).
Wotton, William (1666-1720; London).
Wülfer, Jo. (1651-1724; Nuremberg).
Wünsche, August (living; Dresden).
Zanolini, Antonio (*c.* 1747; Padua).
Zeller, Andr. Christoph. (*c.* 1711; Maulbronn).
Zeltner, Ge. Gust. (1672-1738; Altdorf).

FEMALE CHRISTIAN HEBRAISTS.

Alberta Katherina (17th cent.; Bohemia).
Amoena Amalia (wife of Duke Louis; d. 1625, Anhalt).
Anna Sophia, Abbess (*c.* 1658; Quedlinburg).

G.

HEBREW (Hebr. "'Ibri"; Aramaic, "'Ibrai," whence the Greek Ἑβραῖος: Latin, "Hebræus"; Norman, "Hebreu"; Eng. "Hebrew").

The Name and Its Use: The expression "Hebrews" is used as a name for Israelites in contrast with Egyptians, or by Egyptians for Israelites, in both the early narratives of the Pentateuch (J and E), but only in the story of Joseph and in that of Moses (Gen. xxxix.-xliii.; Ex. iii.-x.). It is also used in contrast with "Philistines," or by Philistines in speaking of Israelites, in I Samuel, both in the story of Saul and in that of Samuel (Smith, in "International Commentary," *s.v.* "Saul" and "Samuel"). It is further used once in the early legislative document commonly known as "The Book of the Covenant," to differentiate a Hebrew slave from one of any other nationality (Ex. xxi. 2). In Deut. xv. 12, based upon the preceding, it is used both in the masculine and in the feminine. This latter passage is twice quoted by Jeremiah (xxxiv. 9, 14). In Gen. xiv. 13 occurs the expression "Abram the Hebrew," rendered in the Greek περάτης = περαίτης ("Abram, the man of the region beyond"). It is difficult to determine whether the use of the term "Hebrew" here is due to the contrast of Abram, as typifying a nation, with the foreigners about him, with whom the chapter deals, or whether it is in this case a usage which may be compared with that of the preposition "'eber" in the Book of Nehemiah, where the author, writing from the standpoint of the Far East, and following Babylonian and Persian usage, designates Palestine as "the province beyond" the Euphrates.

The Term Used by Foreigners.

It would appear from the passages cited that the Israelites were known to other peoples by the name "Hebrews," and that in the earlier period of their history this name was used by them in contrasting themselves with other nations. This was not their customary or preferred designation of themselves. In the period of prophetic activity preceding the Exile, and in the prophetic, legal, and poetical literatures of the exilic and post-exilic periods, the word does not appear, with the doubtful exception of the passage in Gen. xiv. In the Greek period the ancient use was revived; and Jonah speaks to foreigners of himself as a Hebrew (i. 9). Similarly, in Judith and II Maccabees the word "Hebrew" is used where foreigners are addressed or where foreigners speak of Israelites.

In the prologue to Ecclesiasticus the word is used to designate the Hebrew language in contrast with the Greek. There is a similar use in the New Testament (John v. 2; xix. 13, 17; xx. 16; Acts xxi. 40, xxii. 2, xxvi. 14; Rev. ix. 11, xvi. 16) and in Josephus ("Ant." ii. 1, § 1; iii. 10, § 6); but here it may mean either the old Hebrew or the later Aramaic idiom of Palestine. The word is also used at this period to designate those who conformed to the ancient practises in contrast with the Hellenists, who observed Greek customs (Acts vi. 1; II Cor. xi. 22; Phil. iii. 5).

Derivation and Meaning: "'Ibri" is a gentilic noun, formed by adding the suffix "i" to the word "'eber." The latter is a common preposition in Hebrew, meaning "beyond" or "across." Other derivatives from the same root mean "ford," "pass," and the like. This preposition, alone or in combination with other prepositions, is used to designate the region across or beyond the sea or a river, but especially the region beyond the Jordan—commonly eastward of the Jordan, from the standpoint of a writer in Palestine proper; less often westward of the Jordan, from the standpoint of the trans-Jordanic territory. Frequently, also, it designates the region beyond the Euphrates—commonly eastward, spoken from the standpoint of Palestine, but also westward, from the standpoint of Babylon and Persia.

The word appears, further, as a proper name—that of an ancestor of the Hebrews (see EBER)—in the early Judean document (J), in the later Priestly Code (P), and in the Chronicles. Once the name "Eber" is used as a collective noun, to designate a people or country, in connection with Asshur (Num. xxiv. 24). An early Israelite tradition (Josh. xxiv. 2) interpreted the word "Hebrew" as meaning the people whose ancestors had dwelt in the land beyond the River Euphrates (A. V. "on the other side of the flood").

Similar to this use of "'eber ha-nahar" for "the region beyond the river," is the Assyrian "'ebir nari" and the Minæan "'ibr-naharan." The former of these designates roughly the later Persian province 'Abar-Nahra, the country between the Euphrates and Gaza. What region is designated by the latter is not clear. This interpretation lies also behind the treatment of the eponymous Eber in the Priestly Code (Gen. xi.), and was adopted by later Jewish tradition (Gen. R., and Rashi, *ad loc.*).

Views of Late Writers.

Some late writers interpret the word as meaning "the people from beyond Jordan" (so Wellhausen and Stade). If this latter view be correct, the name "Hebrew" may be supposed to have been originally a general term (comp. Gen. x. 21, 24, where Shem is called the "father of all the children of Eber," and Eber is the father of Peleg and Joktan) to designate the peoples beyond the Jordan. In that case the Habiri or 'Abiri of the El-Amarna tablets, who were overrunning Judea and threatening Jerusalem about 1400 B.C., may have been "Hebrews" (comp. Jastrow in "Jour. Bib. Lit." xi. 218, xii. 61), and the term may designate in general the trans-Jordanic populations (the Ammonites, Moabites, Edomites, etc.); among these at a later date were included the Israelites, who finally became the Hebrews par excellence. Other views propounded in recent times are those of Hommel, that the term designated the land west of the Euphrates, between Borsippa and Ur ("Ancient Hebrew Tradition," Appendix), and of Steiner (in Schenkel's "Bibel-Lexikon"), that "'eber" means, as in Arabic, "a river-bank," and that the Hebrews were the "dwellers in a land of rivers." [None of these views is satisfactory.—T.]

E. G. H. J. P. P.

HEBREW, THE: Jewish weekly; established in San Francisco, Cal., in 1863, by Philo Jacoby, a son of Isaac Jacoby, rabbi of Lauenburg, Pomerania. It is still published by its founder, and is the oldest Jewish paper on the Pacific coast. Rabbis Henry and Bettelheim, and Ernest Jacoby of Chicago, a brother of the founder, have been among its editors. The tendency of the paper in religious matters is conservative.

G. S.

HEBREW EDUCATION SOCIETY OF PHILADELPHIA: Organized July 16, 1848, largely through the efforts of Isaac Leeser: one of the oldest societies of its kind in the United States.

The charter granted by the Pennsylvania legislature April 7, 1849, authorized the establishment of schools for general education, combined with instruction in the Hebrew language and literature; the charter also authorized the establishment of a "superior seminary of learning," with power to grant the usual degrees given by other colleges. A supplementary act, passed May 13, 1866, allowed the admission of its pupils to the Boys' and Girls' High School, Philadelphia. The first school of the society was opened on the upper floors of the Phœnix Hose House on Zane (now Filbert) street. The first session was held on Monday, April 7, 1851.

Early in 1854 the society received a legacy of $20,000 from the estate of Judah Touro; in May following, the purchase of a church building on Seventh street, between Wood and Callowhill streets, was authorized; the school removed into this building in October of the same year. In January, 1889, this building was sold, and the school, now known as Hebrew School No. 1, removed to Keystone Hall, 1204 Germantown avenue. Maimonides College was opened Oct. 28, 1867, and remained in existence until December, 1873. Hebrew School No. 2 was opened March 3, 1878, in the synagogue building of the Holland Schule, Fifth and Catherine streets; it subsequently removed to Wheatley Hall, then to 322 Bainbridge street, and finally to the society's building, Touro Hall, at the southwest corner of Tenth and Carpenter streets.

Hebrew School No. 3 was opened October, 1879, at Marshall street and Girard avenue, and in December following Hebrew School No. 4 was opened at 624 Wayne (now William) street, in the district of Richmond. Hebrew School No. 3 removed to the corner of Fourth and Poplar streets, thence to Seventh street, and in October, 1881, was merged with Hebrew School No. 1 in its new building at 317 North Seventh street, Hebrew School No. 4 becoming known as No. 3.

In 1883, houses on Lark (now Weikel) street were purchased, and school No. 3 removed thither from 624 Wayne street. For some time trade-schools were in operation there, but they have been discontinued.

The principal work of the society is now centered in Touro Hall, where a night-school is kept open the entire year. There are now classes in English, typewriting and stenography, men's and women's garment-cutting, millinery, dressmaking, and cigar-making, a free synagogue for the most sacred holy days, free baths, a reading-room, and a circulating library. The Hebrew Sunday-School Society, the Baron de Hirsch Committee, and the B'nai B'rith Manual Training-School have the free use of the Hebrew Education Society's buildings for their meetings and classes. The permanent fund of the society amounts to $35,000. The annual expense is about $9,500.

HEBREW LANGUAGE: The designation "Hebrew language" for the language in which are written the Old Testament (with the exception of Ezra iv. 8–vi. 18; Dan. ii. 4 [after the fourth word]–vii. 38; Jer. x. 11; and a proper name in Gen. xxxi. 47), part of the Apocryphal and pseudepigraphic writings, and the greatest part of later Jewish literature, is first found in Hellenistic literature (Prologue to Ecclesiasticus [Sirach]; Josephus, "Ant." i. 1, § 2; Rev. ix. 11). The same designation is frequently used by Hellenistic authors to denote the Aramaic language spoken at a later time by the "Hebrews," as the Jews were called by non-Jewish writers. In Hebrew literature the term is first met in the Mishnah (Yad. v. 4; Giṭ. ix. 8); Biblical writers use the expression "the language of Canaan" (Isa. xix. 18) or "the Jews' language" (II Kings xviii. 26, 28; comp. Isa. xxxvi. 11, 13; Neh. xiii. 24; comp. also the modern use of "Yiddish"). More frequently, however, the language is called in later Jewish literature "the Holy Tongue," to distinguish it from the Aramaic vernacular or other "profane languages" spoken in later times by the Jews (Targ. Yer. to Gen. xxxi. 11; Soṭah vii. 11). This designation seems to be an abbreviation of "lishan bet ḳudsha" = "the language of the sanctuary" (Targ. pseudo-Jonathan to Gen. xxxi. 47). The Assyrians called Hebrew "the language of the west country" (comp. Hastings, "Dict. Bible," iii. 25).

Name.

The Hebrew language might be appropriately called the Israelitish dialect of Canaanitish, a branch of the Semitic Languages spoken in Palestine and in the Phenician colonies. Almost identical with it is Moabitish, as seen in the stele of Mesha (see Moabite Stone). Closely akin to it was Phenician, and in all probability also the languages of Ammon, Edom, and Philistia. The language used in the Zenjirli inscriptions approaches Hebrew closely.

Relationship and Characteristics.

Phonetically Hebrew occupies a middle place between Arabic, on the one hand, and Aramaic, on the other. Of the original Semitic consonants some appear to have been wholly or partly lost; at least the distinction between certain related but different sounds is not indicated in writing. Thus there is only one character in Hebrew (ח) for the Arabic "ḥa" and "kha," only one (ע) for the Arabic "'ain" and "ghain" (though from transcriptions of proper names in the Septuagint it seems that, like Arabic, it once had the two ע sounds), only one (צ) for the Arabic "ṣad" and "ḍad," and only one (ט) for the Arabic "ṭa" and "ẓa." Like Aramaic, Hebrew has a double pronunciation of the letters ב'ג'ד'כ'פ'ת—explosive and spirant. Like Arabic, it has a double sound of ר (comp. Merx, "Zeitschrift für Assyriologie," xiv. 308). From the פ at the end of the alphabet in certain alphabetic compositions in the Old Testament some assume the existence of the emphatic "p" known in Syriac and Ethiopic. Initial radical ו, as in Aramaic, has largely passed into י. Although

Hebrew has lost some of the original vowels still retained in classical Arabic, that loss has not assumed such proportions as in the case of Aramaic. This is due chiefly to the retention in Hebrew of the pretonic "a" vowel (see Shewa). Of case-endings, entirely lost in Aramaic, Hebrew has preserved some remnants, although these have become meaningless.

The passive verb-forms, produced by internal vowel-change, only remnants of which are preserved in the oldest Aramaic, are still full of life in Hebrew. An exception to this is found only in the passive of the first conjugation, which has been largely replaced by a reflexive form. Similarly, in the case of the formation of a jussive mode, Hebrew holds an intermediate position between Aramaic and Arabic. Hebrew has in common with Arabic a prefixal definite article and an inseparable interrogative particle.

Hebrew Syntax and Vocabulary.

Syntactically, Biblical Hebrew remained in a very primitive stage, lacking long and artificially constructed periods. The sentences are short and are connected with one another by the conjunction "and," which particle has various logical meanings. This frequent use of "and" has, however, also developed in Hebrew some very fine and expressive forms of construction, which, though occurring here and there also in cognate dialects, have found their highest development in Hebrew. One of these is the peculiar consecutive use of "and" to connect a series of clauses with an initial clause, which latter defines them temporally. On the whole, the particles in Biblical Hebrew are little developed and frequently ambiguous. In later Hebrew this fault has to a large extent been remedied. As in all Semitic languages, the concrete meanings of the word-stems are more or less apparent and present in the consciousness of the speaker or writer in all the derived word-forms. Hebrew, moreover, admits of almost no compounds, except in proper names. There is a great lack of adjectives and adverbs, especially of the latter; and the so-called tenses are rather modalities of action. All these facts make Hebrew, indeed, a vehicle for narration of great vividness, expressiveness, and beauty, and cause it as a language of poetry, especially of religious poetry, to stand unsurpassed. On the other hand, it is, at least in its Biblical form, ill adapted for the expression of abstract ideas and involved philosophical thought—a deficiency but partially overcome by medieval writers by the invention of abstract terms and adjectival and adverbial forms.

Origin.

In the Middle Ages it was a prevailing opinion that Hebrew was the primitive speech of mankind. This view was based on "etymologies and other data in the early chapters of Genesis [comp. Berliner, "Beiträge zur Hebräischen Grammatik," p. 9; König, "Hebräisch und Semitisch," pp. 113 *et seq.*], which, however, were as plausibly turned by Syriac writers in favor of their own tongue" ("Encyc. Bibl." ii. 1987; comp. Audo, "Syriac Dict." Preface). A similar opinion was expressed by Rab (Sanh. 38b). Medieval Jewish scholars considered Arabic and Aramaic, the only cognate languages known to them, as corruptions of Hebrew. In more recent times, however, two opposing theories have been held. One, whose chief exponent is S. D. Luzzatto, is that Hebrew is derived from Aramaic; the other, whose chief exponent is Olshausen, is that it is derived from Arabic. D. S. Margoliouth ("Lines of Defense of Biblical Tradition," and "Language of the Old Testament," in Hastings, "Dict. Bible," iii. 25 *et seq.*) claims that Hebrew is nothing but a vulgar dialect of Arabic. Not only, however, can the question concerning the relative age of a language whose origin lies in prehistoric times not be answered positively, but the necessity of the question itself is problematical: cognate languages may be parallel developments of one mother tongue instead of being derived from one another. All that can be said is, that by the testimony of the El-Amarna tablets (15th cent. B.C.), which contain Canaanitish or Hebrew glosses, and by the evidence of Egyptian, which contains Canaanitish loan-words borrowed some centuries before those tablets were written, Canaanitish or Hebrew was spoken in Palestine as early as the beginning of the second millennium B.C.

Language of the Patriarchs.

The other question, however, whether the Israelites brought their language with them from their original home or adopted it after the conquest of Palestine, as the Philistines seem to have done, is quite pertinent. From the facts that Abraham was connected with Haran, that Jacob is called an Aramean (Deut. xxvi. 5), and that the language is designated as Canaanitish and, as mentioned above, was spoken in Palestine centuries before the Exodus, one might assume, as some scholars have done, that the Israelites' language in patriarchal times was Aramaic. Hommel ("The Ancient Hebrew Tradition") maintains that Aramaic is a later development; that in patriarchal times Aramaic was but an Arabic dialect; and that originally the Israelites spoke Arabic. From the fact, however, that the Phenicians claimed to have come from the border of the Persian Gulf, where Abraham also is said to have had his home, and from the fact that Assyro-Babylonian is in both phonetics and vocabulary closely connected with Canaanitish, the probability of the Israelites having brought their language along with them is not to be denied.

Since Israel was a conglomeration of tribes, one expects to find their language showing dialectic differences. Such differences are distinctly mentioned in the case of the Ephraimites (Judges xii. 6), who could not pronounce ש. In some books expressions occur which show perhaps local coloring, on the basis of which some distinguish a Judaic and an Ephraitic dialect; others, an Ephraitic, a Judaic, and a Simeonic dialect. But there is no certainty that such expressions are not rather characteristics of the individual authors. Differences that may have existed in the pronunciation of the various localities were obliterated by a later leveling vocalization. That such obliteration has taken place in some cases is apparent from the differences in the vocalization of proper names existing between the Masoretic text and the Septuagint.

The literature of Hebrew covers a period of about

3,000 years, from the earliest documents of the Bible down to modern times. In so long a period the language has naturally undergone many changes. One may reckon broadly two phases of linguistic development: (1) the creative period, during the life of the language as the people's speech, and (2) the reproductive period, during its life in literary monuments only.

Biblical Hebrew.

The creative period of Hebrew may be divided into three phases: pre-exilic, post-exilic, and Mishnaic (the justification for including the last-named phase in this period is given below). The limited literature preserved in the Bible and the nature of most of its books, which are the products of schools rather than of individuals, as well as the uncertainty as to the time and place of their composition, make the historical tracing of the development of Biblical Hebrew a hazardous undertaking. In a general way it may be said that the language underwent little change during the first commonwealth; but with the growth of the arts and the development of professions and trade, new expressions had probably to be coined and foreign words borrowed. Accordingly loan-words from Assyrian and Egyptian, from the languages of India and Persia, and perhaps from Greek are successively found. Whether such borrowing was done directly or through the mediation of Phenician can not be ascertained positively. Direct borrowing need be assumed only in the case of Aramaic loan-words. The Arameans were the immediate neighbors of northern Israel from the very beginning. The foreign settlers who were domiciled in Israel after the downfall of the kingdom of the Ten Tribes probably also spoke Aramaic.

The correctness of the view that Aramaic was the international language of anterior Asia as early as the eighth century B.C. is not certain (comp. A. Ehrlich's commentary to II Kings xviii. 26), but there is no doubt that this was the fact after the Babylonian exile. Gradually Aramaic gained predominance in the Persian empire, displacing local forms of speech, and Hebrew, like other languages, had to succumb to its influence and ceased to be spoken. As was to be expected from such close relationship between the two languages, one borrowed from the other during the entire period that Hebrew and later Aramaic were together alive in Palestine. Even the oldest Biblical writings, as the Book of Judges, the Elohistic document, and Isaiah, show Aramaisms (שאר, טען, חדה, חנה, etc.). It is interesting in this connection to notice that the oldest Canaanitish inscription known, the patera of Ba'al Lebanon, contains also an Aramaic loan-word (ראשת).

By the post-exilic writers pre-exilic literature seems to have been recognized as already classic. Their language differs from that of the preceding period in three respects: (1) there is conscious imitation of earlier works (as in Daniel, the late Psalms, Ecclesiasticus [Sirach]); (2) the borrowings from Aramaic increase in volume and Persian words come in (some of the Aramaisms are not taken over bodily, but are translated into Hebrew, *e.g.*, כל עמת in Ecclesiastes); (3) the popular language gains entrance into literature and thus leads Biblical or literary Hebrew into Mishnaic or popular speech.

Mishnaic Hebrew.

As mentioned above, beginning with exilic times Aramaic influence began to be felt in Palestine. Nehemiah complains that the children from mixed marriages are unable to speak Hebrew (Neh. xiii. 24). For some centuries the two languages were spoken side by side, somewhat like Low and High German in certain states of Germany to-day. But as time went on the circle of the Hebrew-speaking population narrowed down, in spite of that language having sole control of the school, the synagogue, and the literature, until Hebrew became exclusively the language of literature and prayer. In the house of the patriarch Judah I. the maid servant still spoke Hebrew (Meg. 18a). The literary monuments of this last phase of living Hebrew have been preserved in tannaitic literature, the chief work of which is the Mishnah.

The "language of the Mishnah" ("Perek Ḳinyan Torah"), or "the language of the sages" ('Ab. Zarah 58b; Ḥul. 137b; Ḳid. 2b), as the language of tannaitic literature is called in later generations, is not an artificial product of the schools, but is the living language of the last centuries of Jewish independence. This has been convincingly shown by S. D. Luzzatto (in "Orient, Lit." 1846, col. 829; 1847, cols. 1 *et seq.*). Mishnaic Hebrew differs from Biblical in the following particulars: in admitting a greater contingent of Aramaic loan-words; in borrowing to a considerable extent (about 300 vocables) from Greek and Latin; in the greater Aramaization of its syntax; in the larger substitution of the reflexive verb-forms for the internal passives; in the loss of the feminine plural forms of the imperfect; in the use of the plural ending "-in" for "-im" and of the plural suffix "-n" for "-m"; in the more definitely temporal use of the tenses; in the wider use of the participle; in the introduction of periphrastic verb-forms; in the substitution of the relative particle for the construct state; in the more definite use of prepositions and conjunctions, and in the augmentation of their number; and frequently in a different use of the gender of nouns. Words are frequently used in their pausal forms outside of pause; Biblical words are used in other than Biblical senses, and new forms are built from Biblical stems. The laws of word-formation are, however, the same as in Biblical Hebrew. A conscious imitation of Biblical language is noticeable in the liturgy only. In the rest of tannaitic literature such imitation is expressly avoided (comp. Ḥul. 137b).

Neo-Hebrew.

The term "New Hebrew" or "Neo-Hebraic," by which post-Biblical Hebrew is usually designated, should properly be used only for the language of the reproductive period, beginning with amoraic literature (early in the third century of the common era) and continuing until the present. This period is of no interest to the student of Hebrew philology, but is of great importance for the study of Hebrew literature. New Hebrew presents a variety of styles differing not only according to periods, but also, and perhaps even in a greater degree, according to the subjects treated. In the treatment of this form of the language, periods and departments of literature must naturally cross one another. In the first place, prose must be separated from poetry. As regards linguistic peculiarities the prose literature may be divided into six groups; the poetical, into five.

Original work in midrashic literature is not the rule: the greatest part of it is compilation from older works. Probably most of these works were originally written in Aramaic and translated by the compiler into Hebrew. This is especially the case in the later Midrashim, while in the earlier compilations considerable Aramaic material has been preserved. The language differs little from that of the haggadic portion of tannaitic literature, and in some cases it has preserved linguistic material from tannaitic times which is not found in any extant tannaitic literature. Words which belong neither to Aramaic, Persian, Greek, nor Latin, although not found in Mishnaic Hebrew, are certainly tannaitic. Here belong also the halakic code (Yad ha-Ḥazaḳah) of Maimonides, the language of which is based on the language of the Mishnah, and the later codes imitating that of Maimonides.

The writers on Talmudic subjects, especially the commentators of the Talmud and the Poseḳim or legal authorities, who adopted Mishnaic Hebrew and avoided Biblical language, imitated to a great extent the Babylonian Talmud, interspersing their Hebrew not infrequently with Aramaic. The necessary lack of esthetic qualities in such a mixture is not very noticeable to one familiar from his youth with the Talmud. But the application of this style of writing to other than Talmudical subjects among medieval German Jews, loaded as it was with tasteless plays upon words and tessellated with Biblical phrases wrongly used, presents an unesthetic result difficult to understand and not very pleasing to a modern reader.

The language used chiefly by writers on philological and Biblical subjects shows in its earliest forms the influence of the Bible and of the payyeṭanim (comp., *e.g.*, Ben Asher, Saadia, "Yosippon," and the Ahimaaz Chronicle). But the payyeṭanic influence soon disappears and leaves a midrashic Hebrew somewhat influenced by the Bible and by philosophic Hebrew. The use of Aramaic elements is very rare.

Philosophic and Rhetorical Hebrew.

The preceding phases contributed little to the increase of the vocabulary. On syntax they had no influence whatsoever. This can not be said of the philosophic phase, which differs so much from the preceding that a new name was applied to it by medieval writers. It has been called "the language of the translators," or "the language of astronomy" ("leshon tekunah"). This phase is a product of the translation of Arabic works on philosophy and science. The insufficiency of the old language for the treatment of scientific subjects was supplied by the creation of new word-forms, especially of abstract terms and adjectives, by giving new meanings to old words, and by borrowing from the Arabic. The new extensions of meanings were modeled on the cognate Arabic; and, the translations being slavishly literal, the Hebrew received the imprint of Arabic syntax. In many cases a familiarity with Arabic is necessary to understand this kind of writing. This style was successfully imitated by philosophical and scientific writers who wrote originally in Hebrew.

Closely akin to this form of language is that which appears in the writings of the Karaites, except that Karaitic literature uses some payyeṭanic word-forms —a legacy of geonic times—and a number of terms peculiar to itself.

The Samaritans also attempted to write Hebrew; but, with one notable exception (comp. the Samaritan Chronicle, published in "R. E. J." xliv. 188 *et seq.*), their Hebrew is only an object of curiosity.

In the last quarter of the eighteenth century a reaction set in against the corrupt style of the German rabbis (see above). The writers of those days desired to influence the people in the direction of estheticism. They therefore introduced a style chiefly based on the Bible, the "rhetorical" style ("meliẓah"), as it is called. This style occurs indeed even earlier, but in very rare cases (comp., *e.g.*, Archevolti, Oliveyra). Since the vocabulary of the Bible, taken in its proper sense, is entirely insufficient to express modern ideas, resort was had to periphrases, whose terms, taken from the Bible, frequently meant something quite different in their original context. As a consequence the style became stilted and bombastic, incapable of giving an exact expression to ideas and things, and forcing the writer to be unnatural and to limit himself to jejune subjects. This style dominated Hebrew literature for three generations.

The necessities of Jewish life in Russia and the rise of national consciousness throughout European Jewry required a better-adapted vehicle of expression than was offered by the rhetorical style; and this demand was supplied by the creation of modern Hebrew. This style combines philological with philosophic Hebrew, eliminating from the latter its Arabic syntax. It has created a number of new terms to express modern ideas and things, drawing upon all phases of Hebrew, and, through the Hebrew writers in Palestine, upon Arabic. Scientific terms for which it has no equivalent it adopts from the modern languages. The periodic structure of the sentence is successfully cultivated.

Poetry.

Later Hebrew poetry may be divided into (1) payyeṭanic or liturgical, frequently having rime but no meter, and (2) metrical, first introduced by Dunash b. Labraṭ. The language of the payyeṭanim may again be subdivided into an earlier and a later period. The earlier period (*c.* 800–1100) presents a language based on the whole on the Bible, but enriched with a multitude of new forms. The number of new noun-formations in the piyyuṭ amount to more than forty. New verbs are formed from nouns and particles: new verb-forms are used for or alongside of older ones; defective stems are treated as biconsonantal, or more correctly as middle-waw stems; the inseparable prepositions are used with the finite verb: new plural forms are used where the older language has only the singular, or the singular is used where the older language has only the plural; masculine nouns are abstracted from older feminine forms, and new feminine forms are built from older masculine forms. Some nouns have double plural endings; the masculine ending is sometimes used where the older language has the feminine, and vice versa.

The later piyyuṭ literature, especially the penitential hymns, abandons a number of payyeṭanic word-forms and uses more Talmudic expressions.

The language used in metrical poetry presents, broadly speaking, three styles: the Spanish, the German, and the Russian. The language of the Spanish school follows the philosophic style and, though chiefly based on the Bible, contains a number of Arabisms in the significations of words, in phraseology and, more rarely, in syntactical constructions. The German style imitates chiefly the rhetorical style, is smoother in construction and purer in diction, but nerveless. The Russian or modern style strives after realism; it can not, therefore, limit itself to Biblical phrases, but uses the resources of all periods, even the latest coining of words.

Revival of Hebrew as a Spoken Language.

The national and realistic tendencies of the present generation have inspired many writers to try to enlarge the vocabulary of the language by the coinage of new terms and to revive Hebrew as a spoken language. Throughout Europe circles were formed that had as their object the cultivation of Hebrew conversation. It was in the nature of conditions that in Europe such efforts could meet with no signal success. It was otherwise in Palestine. There the resurrection of Hebrew as the tongue of the home and of the school has been realized to a considerable degree. See Dictionaries; Grammar, Hebrew; Literature, Hebrew; Poetry, Didactic; Pronunciation of Hebrew; Semitic Languages; Vocalization.

HEBREW LITERATURE. See Literature, Hebrew.

HEBREW NATIONAL, THE. See Periodicals.

HEBREW OBSERVER, THE (הצופה): Periodical; published in London by Abraham Benisch. The first and only number appeared Jan. 7, 1853.

G. A. M. F.

HEBREW REVIEW, THE: Literary magazine; published at Cincinnati, Ohio, during the years 1881 and 1882 (2 vols.) by the Rabbinical Literary Association of America. The president of the association, Dr. Max Lilienthal, and after his decease the vice-president, Dr. K. Kohler, edited the magazine.

G. A. M. F.

HEBREW REVIEW AND MAGAZINE OF RABBINICAL LITERATURE, THE (גלעד): Journal; published in London by Morris Jacob Raphall from Oct. 3, 1834, to and including Sept., 1835 (2 vols.). The object of the magazine was to foster the study of rabbinical literature.

G. A. M. F.

HEBREW SABBATH-SCHOOL UNION OF AMERICA: Organized at Cincinnati, Ohio, July, 1886, "to provide a uniform system for all Hebrew Sabbath-schools in the United States by promulgating a uniform course of instruction and by training competent teachers." It was the first attempt to secure united effort in the cause of Jewish religious education in the United States. The union has paid special attention to publishing text-books for religious schools; among its publications may be mentioned: "School Edition of the Book of Proverbs," by Adolph and Isaac S. Moses; "The Ethics of the Hebrew Scriptures," by the same authors; "Selections from the Psalms," by M. Mielziner; "How to Organize a Sabbath-School," by Henry Berkowitz; "Guide for Jewish Sabbath-School Teachers," containing papers on instruction in Biblical history by K. Kohler, in post-Biblical history by B. Felsenthal, on religio-moral instruction by David Philipson, and on the teaching of Biblical history in primary classes by Edward N. Calisch. The union has introduced the leaflet system, and has published three series of leaflets on Biblical history, and one series on religious themes, such as "The Love of God," "Our Love for God," "Love and Respect for Parents," "Truth-Speaking," etc. These leaflets are used in over one hundred schools throughout the country. The union has also published a curriculum for Jewish Sabbath-schools (see "Report for 1898," p. 8). Ninety schools are included in the union. It receives a subsidy from the Union of American Hebrew Congregations, and meets in biennial session at the same time as that organization. Its presidents have been M. Loth, S. M.

Winkler, M. Mielziner, and the present (1903) incumbent, David Philipson. The headquarters of the union are in Cincinnati.

A. D. P.

HEBREW STANDARD, THE: Weekly; founded in New York city by J. P. Solomon on Sept. 23, 1881. Solomon has been its sole editor and proprietor. The paper is strongly conservative and of Orthodox tendencies, and has always taken a definite political standpoint, that of the Democratic party. "The Hebrew Standard" was the first attempt at the issue of a cheap, popular Jewish newspaper in the English language.

G. A. M. F.

HEBREW UNION COLLEGE: A rabbinical college founded by Dr. Isaac M. Wise at Cincinnati, Ohio, in 1875. In 1854 Dr. Wise had made an attempt to establish a similar institution under the name of the "Zion College Association." Failing, and being convinced that such a college could be established only through a union of congregations, he agitated for the formation of such a union. In 1872 Henry Adler of Lawrenceburg, Ind., offered $10,000 toward the establishment of a rabbinical college. Thereupon delegates from thirty-four congregations convened at Cincinnati and organized the Union of the American Hebrew Congregations, with the objects of establishing a Hebrew theological institution for the education of rabbis for the Jewish pulpit in America and of promoting Jewish learning. In 1874 the council of this union met at Cleveland, Ohio, and adopted laws to govern the proposed institute, then named "The Hebrew Union College," which was placed under the authority of a board of governors consisting originally of twelve, and later on of twenty-four, members appointed by the council.

Foundation.

Organization.

The college was opened in October, 1875, with one preparatory class. As this class advanced, others were added, until the preparatory department was completed with four classes in 1879. In September of that year the collegiate or rabbinical department was opened with one class, consisting of the graduates from the preparatory department. As this class advanced, each year another was added, until in 1883 the collegiate department also was complete with four classes; in July of that year the first four rabbis were graduated and publicly ordained. In 1896 a Semitic department was added for the benefit of those who, without intending to enter the rabbinate, desired to pursue Semitic studies. To this department, and also to the preparatory department, female and non-Jewish students are admitted.

Dr. Wise was the first president, and retained the office until his death (March 26, 1900), when the senior member of the faculty, Dr. Moses Mielziner, was appointed president. The faculty comprises six professors and several instructors. By its charter the college is authorized to confer academic degrees. Graduates from the preparatory department receive the degree of bachelor of Hebrew letters. The collegiate course of studies leads to the rabbinical diploma, or, in case the student does not intend to accept a rabbinate, to the degree of bachelor of divinity. The postgraduate course leads to the degree of doctor of divinity. The latter degree is also conferred on theological authors in recognition of special merit.

During the first years of its existence the college held its daily sessions in two of the Cincinnati synagogues; but in 1881 a building on West Sixth street was purchased.

Library.

When the college was established its library consisted of a very limited number of Hebrew books. Through donations and purchases it has grown to about 20,000 volumes and pamphlets. Rev. Dr. Samuel Adler of New York bequeathed to the college his very valuable theological library and the sum of $1,000, the yearly interest of which is expended in its enlargement. Another collection of valuable books was presented to the college by the trustees of Temple Emanu-El, New York. During the twenty-seven years of its existence the college has graduated about one hundred rabbis.

Bibliography: *Proceedings of the Union of American Hebrew Congregations*, i.-iv.

A. M. M.

Dr. Mielziner (the author of this article) died Feb. 18, 1903, and the duties of president were temporarily assumed by Prof. G. Deutsch. On Feb. 26, 1903, Dr. K. Kohler was elected president.

The faculty of Hebrew Union College as at present constituted (1903) includes:

Dr. K. Kohler (president)—theology, Hellenistic literature, history of liturgy, and beginnings of Judaism; Dr. David Philipson—homiletics; Dr. Louis Grossmann—ethics and pedagogics; Dr. G. Deutsch—history and Jewish literature; S. Mannheimer, B.A.—translation of Bible commentators, Hebrew, and Mishnah Abot; Ephraim Feldman, B.D.—history of philosophy and introduction to the Talmud; Dr. Henry Malter—Arabic grammar, Judæo-Arabic philosophy, and Jewish code; Caspar Levias, M.A.—Bible exegesis, Midrash, Hebrew, and Aramaic; Dr. Moses Buttenwieser—Bible exegesis; Dr. Leon Magnes (librarian)—translation of Bible and prayer-book, Biblical history and geography.

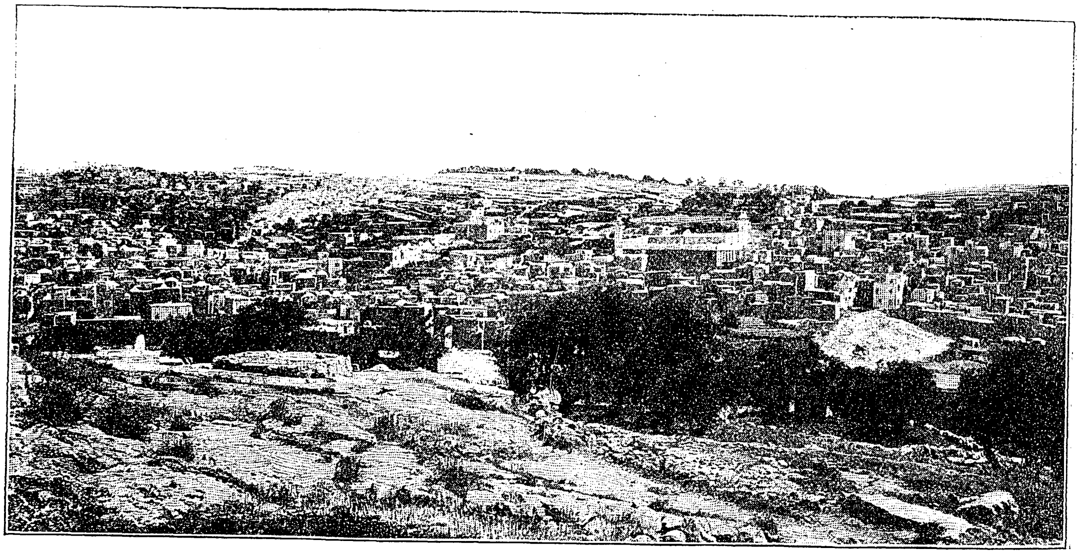
HEBREWS, EPISTLE TO. See New Testament.

HEBRON (חברון): **1.** A city of Asher, properly "Ebron"; called also Abdon.

2. Town in Palestine, about 17 miles southwest of Jerusalem; it has a population of 14,000, including 1,100 Jews—690 Sephardim and 410 Ashkenazim. In 1890 there was a Jewish population of 1,490, but it has been diminishing. Most of the Jews still live in a ghetto surrounded by walls, and known in Spanish as "El Cortijo" (the court). It consists of a maze of narrow and dark passages, into which the doorways open at distances of not more than three feet. In ancient times Hebron was known as "Kirjath-arba," after its reputed founder, Arba, father of the Anakim (Josh. xiv. 15, xxi. 11). But according to modern exegetes the name is equivalent to the "city of the four." The patriarch Abraham resided at Hebron (Gen. xiii. 18, xiv. 13, xviii. 1, xxiii. 2), and purchased a cave known as the "Double Cave," where Sarah was buried. Abraham, Isaac, Jacob, and Leah were afterward buried there (see Burial; Caves in Palestine; Machpelah). Jacob went from Hebron to Egypt (Gen. xxxvii. 14, xlvi. 1); the spies visited the city (Num. xiii. 22). In the time of Joshua, Hoham, King of Hebron, was captured there and put to death by the Israelites. Hebron and its territory were at first given to Caleb (Josh. xiv. 6 *et seq.*, xv. 13; Judges i. 20), and then to the Levites of the family of Kohath; it ultimately became one of the six cities of refuge (Josh. xx. 7). David lived there until the conquest of Jerusalem, and was there anointed as king (II Sam. ii. 1, 11; iii. 2 *et seq.*; v. 1 *et seq.*). Absalom's revolt began there (II Sam. xv. 9 *et seq.*); Rehoboam fortified the city (II Chron. xi. 10).



General View of Hebron.
(From a photograph by the American Colony, Jerusalem.)

Hebron was one of the towns which possessed a Jewish community after the return from Babylon (Neh. xi. 25), but the Idumeans appear to have afterward acquired it, since they were expelled by Judas Maccabeus (I Macc. v. 65). Occupied by the Romans, it was taken by Simon, son of Gioras, one of the leaders of the insurrection; but the Roman general Cerealis retook it by storm, killed the garrison, and burned the city (Munk, "La Palestine," p. 57). Jews did not inhabit Hebron after the destruction of the Temple, nor under the Romans, Byzantines, Arabs, or Crusaders. Benjamin of Tudela found only a single Jew (1171) at St. Abraham, as Hebron was called by the Crusaders. He asserts, however, that the Church of St. Abraham had been a synagogue under the Turkish rule. Forty years later R. Samuel bar Shimshon, who explored Palestine in 1209, makes no mention of Jews in Hebron.

The Modern Community.

Local tradition attributes the foundation of the modern community to Malkiel Ashkenazi (1450?), in whose honor a service is held every year on the anniversary of his death (Azulai, "Shem ha-Gedolim," p. 88). Fifty years afterward, however, it was difficult to form a "minyan" (quorum). The following were chief rabbis of Hebron: Israel Ẓebi (1701–31); Abraham Castel (1757); Aaron Alfandari (1772); Mordecai Ruvio (*c.* 1785); David Melamed (*c.* 1789); Eliakim (end of 18th cent.); Ḥayyim ha-Levi Polacco (*c.* 1840); Hai Cohen (1847–52); Moses Pereira (1852–64); Elia Sliman Mani (1864–78); Raḥamim Joseph Franco (1878–1901); Hezekiah Medini (former chief rabbi of Karasu-Bazar in the Crimea; known as the "Ḥakam Bashi Wakili"; acting chief rabbi since 1901).

Hebron possesses four synagogues within the ghetto and four batte ha-midrash without. The oldest synagogue, that of Abraham Abinu, is supposed to date back three centuries. It was restored in 1738 and enlarged in 1864. The others are Keneset Eliyyah Mani (like the former, Sephardic), and two Ashkenazic. There are three yeshibot, the oldest having been founded by Israel Ẓebi (d. 1731); the second was formed by the union of four older yeshibot. It possesses the library of Vivas, a native of Leghorn, and is very rich in Spanish works. Hebron possesses four Talmud Torahs for Sephardim and one for Ashkenazim. There are three mutual-aid societies and a free dispensary. The Sephardic community is administered by the chief rabbi and a council of seven members; the Ashkenazic by the chief rabbi and a council of three. Most of the Jews are supported by the "ḥalukkah," but there are a few carpenters and shoemakers. Among the antiquities are the Double Cave, revered by the Mohammedans; the ruins of Abraham's house; the tombs of Gad, Nathan the prophet, Abner (David's commander-in-chief), and others. The modern name of the town is

Al-Khalil (lit. "the friend" [*i.e.*, of God], a name by which Abraham was known; comp. Isa. xli. 8).

Numerous rabbinical authors have lived at Hebron, including Elijah de Vidas (1525), author of "Reshit Ḥokmah"; Solomon Edni (1622), author of "Meleket Shelomoh"; Moses ha-Levi (1668), author of "Yede Mosheh"; Israel Ẓebi (1731), author of "Urim Gedolim"; Abraham Conque (1740), author of "Abaḳ Derakim"; Ḥayyim Abraham Israel Ẓebi (1776), author of "Be'er Mayim Ḥayyim"; Aaron Alfandari (1772), author of "Yad Aharon" and "Merkebet ha-Mishneh"; Mordecai Ruvio (1785), author of "Shemen ha-Mor"; Judah Divan (1792), author of "Zibḥe Shelamim"; Elijah Sliman Mani (d. 1878), author of "Kisse Eliyahu"; Raḥamim Joseph Franco (d. 1901), author of "Sha'are Raḥamim"; Hezekiah Medini, author of "Sedeh Ḥemed."

Entrance to the Mosque at Hebron, Containing the Traditional Cave of Machpelah.

D. M. Fr.

3. Third son of Kohath, son of Levi and founder of the Levitic family, the Hebronites (Ex. vi. 18; Num. iii. 19, 27; xxvi. 58). The Hebronites are often mentioned in the enumerations of the Levites, under the name either of "Ha-Ḥebroni" (Num. iii. 27, xxvi. 58; I Chron. xxvi. 23, 30, 31) or of "Bene-Ḥebron" (I Chron. xv. 9, xxiii. 19). In the time of David the chief of the Hebronites was called Jeriah (I Chron. xxiii. 19, and elsewhere). In the fortieth year of David's reign the Hebronites were settled at Jazer in Gilead, of whom 2,700 mighty men were appointed by the king superintendents over the two and one-half tribes, and 1,700, under Hashabiah, held similar positions on the west of the Jordan (*ib.* xxvi. 30, 31).

4. One of the tribe of Judah, a descendant of Caleb (*ib.* ii. 42, 43).

HECHIM. See Höchheimer.

HECHINGEN. See Hohenzollern.

HECHT: Family, resident at Boston, Mass.

Jacob H. Hecht: Born at Heinstadt, Germany, March 15, 1834; died Feb. 24, 1903. He went to America in 1848; resided in California from 1859 to 1869, when he removed to Boston, Mass. He married Lina Frank (Jan. 23, 1867). From the beginning of his residence in Boston he took an active interest in the affairs of the community. He was for over fifteen years president of the United Hebrew Benevolent Association and was one of its charter members; he was the first president of the Federation of Jewish Charities; treasurer of the Hebrew Industrial School, founded by his wife; and the first president of the Elysium Club. He was appointed trustee of the state hospital by the late Governor Ames, and was successively reappointed by Governors Russell, Wolcott, and Crane. He was the first chairman of the Boston branch of the Baron de Hirsch Society for the Amelioration of the Condition of Russian Refugees.

Lewis Hecht: Born at Heinstadt, Germany, June 27, 1827. He went to America in April, 1848, stayed for a short time in Baltimore, Md., went to San Francisco, Cal., in June, 1853, and to Boston in 1862. He was for many years a director of the United Hebrew Benevolent Association and of the Leopold Morse Home, a member of the advisory board of the City Institutions, and a director of the New York and New England Railroad Company.

Lina Frank Hecht: Wife of Jacob H. Hecht; born in Baltimore, Md., 1848. In 1889 Mrs. Hecht founded in Boston the Hebrew Industrial School, the purpose of which was to Americanize and educate immigrant Jews. Her husband acted as its treasurer, and made liberal provision in his will for its maintenance. Mrs. Hecht was an active member and officer of the Women's Educational and Industrial Union. She is a director of the Leopold Morse Home, and for many years was president of the Hebrew Women's Sewing Society. She is a member and officer of the Jewish Publication Society of America, the Civil Service Reform Association, the Jewish Chautauqua, the National Council of Jewish Women, the board of trustees of the Federation of Jewish Charities, the board of trustees of the Associated Charities, and is a trustee of the Bath Department of the City of Boston.

Louis Hecht: Brother of Jacob H. Hecht; born in Heinstadt, Germany, Oct. 5, 1840. He went to America in 1848, lived in Baltimore for nine years, and then removed to San Francisco, Cal. He engaged in business there with his brothers, Col. Marcus H. Hecht, Isaac Hecht, Jacob H. Hecht, and Abraham E. Hecht. In 1872 he removed to Boston, Mass., and in the following year married Rosa, a sister of Lina Frank Hecht. Louis Hecht has been for many years the president of the Elysium Club; he was the first president of the Leopold Morse Home, and is a director of the Federation of Jewish Charities.

A. G. Mo.

HECHT, EMANUEL: German educationist; born 1821 in Nordheim, Bavaria; died Feb. 25, 1862, in Hoppstädten, Birkenfeld-Oldenburg. On graduating in 1842 from the Royal Training College for Teachers at Würzburg, Hecht was appointed by the district government of Lower Franconia special instructor of candidates for admission to his alma mater, a position which he soon relinquished in order to devote himself to his life-work of teaching Jewish youth. During three years' service in a small community in Lower Franconia he published numerous essays in Jewish periodicals, a Biblical history for Jewish elementary schools, and a Hebrew primer. On the invitation of David Einhorn he went in 1845 to Hoppstädten as teacher in the Jewish communal school. In conjunction with E. Goldmann, Einhorn's successor in the office of provincial rabbi, Hecht secured in 1856, after a campaign of vigorous agitation, full recognition by the state of the Jewish communal schools in Birkenfeld on equal terms with the Protestant and Catholic schools, and of Jewish communal teachers on the same footing as their Christian colleagues. In 1858 he was elected member of the "Provincialrath" (diet) of the principality.

In 1859 Hecht was charged with having reviled the state religion in his "Unterscheidungslehre Zwischen Juden- und Christenthum," but on trial before the provincial court was completely exonerated. As coeditor with A. Treu of Münster, he published in 1858 a religious journal entitled "Der Israelitische Haus- und Schulfreund," which was discontinued after its first year. Hecht's literary labors earned for him the honorary degree of Ph.D. from the University of Bonn.

Among the historical and pedagogical studies published by Hecht are a monograph on the Jews of Treves (Trier), and a pamphlet entitled "Der Vorsängerdienst der Israeliten nach Seiner Gesetzlichen Entwickelung." He is best known as a writer of devotional works and of text-books on religion. His writings include: "Biblische Gesch." Fulda, 1842 (American ed. revised by Samuel Adler and translated into English by M. Mayer, New York, 1859); "Israel's Gesch. von der Zeit des Bibelabschlusses bis zur Gegenwart," Leipsic, 1855 (the 3d ed., *ib.* 1877, is such in name only, being virtually a new work by M. Kayserling; Eng. transl. of 1st ed. by Max Lilienthal, Cincinnati, 1857); "Handbüchlein für Leseschüler des Hebräischen," Fulda, 1842; "Versuch das Hebräische Durch Deutsche Wörter zu Erlernen," Kreuznach, 1858; "Die Hebräische Vorschule," *ib.* 1859; "Kleine Hebräische Grammatik," *ib.* 1859; "Das Judenthum: ein Religionsbuch für Höhere Schulen," *ib.* 1860; "Liederbuch für Israelitische Schulen," *ib.* 1860; "Der Uebersetzungslehrer," *ib.* 1859; "Der Pentateuch Grammatisch Zergliedert," Brunswick, 1858; "Geschäftsaufsätze für Schulen," *ib.*; "Häster's Lesebücher für die Israelitischen Schulen Bearbeitet," Essen, 1855; "Unterscheidungslehre Zwischen Juden- und Christenthum," Hoppstädten, 1859; "Sefer Chajim, mit Uebersetzung und Neuen Gebeten," Brilon; "Kelch des Heils: Gebetbuch für Frauen und Jungfrauen," *ib.*; "Der Trostbecher," Berlin, 1861; "Der Pentateuch in Lehrreichen und Erbaulichen Betrachtungen, Erzählungen und Gedichten," Berlin, 1862; "Die Heilsquelle: Vollständiges Hebräisches Gebetbuch mit Deutscher Uebersetzung Nebst einem Anhange mit Deutschen Gebeten," Brilon, 1860; "Ueber Sabbath und Feiertagsschulen und deren Einrichtung," Fulda, 1842.

HECKSCHER, FERDINAND: German actor; born at Berlin 1806; died at Sondershausen Feb. 28, 1891. Heckscher, who had a fine bass voice, began his theatrical career as a singer, but, finding his opportunities in this field too limited, he abandoned music entirely (1833) and devoted his energies to the drama.

He studied under Benelli and at the private theater Urania, Berlin, and made his début at the Königstädtische Theater in that city in 1825. From 1826 to 1830 he was at Sondershausen; from 1830 to 1832 at Bremen; 1832–34 at Königsberg; 1834–41 at the Hoftheater, Dresden, where he played in company with Emil Devrient, Carl Weymar, and F. W. Porth; from 1841 to 1845 at Breslau; and until 1846 as director of the theater at Sondershausen. He retired shortly after. He appeared as a star at the Hoftheater, Berlin, and in Cassel, Coburg, Brunswick, Lübeck, Königsberg, and Danzig.

Heckscher's principal rôles were *Ingomar*, *Stephan Foster*, *Wetter von Strahl*, *Wallenstein*, *Otto III.*, *Don Ramiro*, *Fiesco*, and *Molière* in Gutzkow's "Das Urbild des Tartuffes."

HECKSCHER, SAMUEL BEN MEÏR: German scholar; lived at Altona in the seventeenth and eighteenth centuries; author of a work entitled "Ḳinah 'al Serefah," in Hebrew and German, on the great fire which raged at Altona in 1711 (see Steinschneider, "Cat. Bodl." col. 2426; Benjacob, "Oẓar ha-Sefarim," p. 528).

G. M. Sel.

ḤEDER (lit. "chamber," "room"): Colloquial name for a Jewish old-fashioned elementary school. The Talmudical expression "tinnoḳot shel bet rabban" (children, or, rather, babies, of the teacher's house; school-children) may indicate that the custom of giving instruction in the home of the teacher dates back to the early centuries of the common era. The ḥeder of Germany early in the last century, as described by Jost, differs little from the Russian and Polish ḥeder, except that boys and girls were seated together. There is little doubt that during the past centuries the ḥeder underwent but slight modification, and that its first radical modifications came when it began to give way to schools arranged more in accordance with the modern spirit.

A Typical Ḥeder.

The typical ḥeder was held in the room, seldom large, in which the "rebbe" (corrupt form of "rabbi") and his family lived, and where he or other members of his household, often the "rebbitzin" (rabbi's wife), carried on other businesses or occupations to supplement the small income obtained from teaching. The hours of study were very long, sometimes beginning early in the morning and lasting, in the winter, to nine or ten at night. The youngest children were taken to and from the ḥeder by the "belfer" ("behelfer," or "assistant"), who usually maltreated them and ate part of the food which they took with them to school. In the ḥeder the children were divided into "kitot," or classes, and while the rebbe was teaching one class, a second class, at the same long table, was repeating ("ḥazern," from "ḥazor" = "to repeat") a different lesson; and as all pupils were required to read as loud as possible, yelling at the top of the voice being preferable, the clamor of the ḥeder could be heard far away, while the din inside was such that one person could hardly hear what the other was saying.

The atmosphere of the ḥeder was unhealthful, as nobody cared for ventilation or for comfort; the time allowed for play was very brief; and vacations were given only in the months of Nisan and Tishri, the principal festival months. Various punishments were meted out to disobedient or inattentive children, and chastisement often meant cruel flogging; it is no wonder, therefore, that the ḥeder was to a very large extent a cause of physical deterioration, and that many remember with horror the school-days spent there. J. L. Gordon's semihumorous description of his teacher Reb Todros, and of the armory of instruments of torture with which he enforced discipline and attention ("Collected Works," i. 112-113, Odessa, 1889), may be somewhat exaggerated, but in all essentials is, to a very large extent, true.

Modern Improvements.

This system of education was but slightly modified in the smaller cities of Russia by the advent of the Haskalah, or progressive movement; in the larger cities the change for the better became more marked in the present generation. While it is still true that the "melammed," as the teacher is called by everybody except his pupils, is usually an incompetent and often an ignorant man who has failed in every other occupation, there were always true rabbinical scholars in the profession, and many of the "maskilim," who were acquainted with modern ideas, attempted to introduce more recent methods when fate placed them in the ranks of the "melammedim."

At the present time, and especially in the larger cities, the ḥeder has risen from its former low state. The "ḥeder metuḳḳan" (improved ḥeder) is a new institution that has appeared during the last few years, in which new methods of instruction have been introduced with varying success. Much is expected, but little has hitherto been accomplished, by the method known as "'ibrit be-'ibrit" (Hebrew in Hebrew), the translating of the Hebrew words of the Pentateuch or the Hebrew text-book by other Hebrew words, and not in Yiddish, as formerly. All improved methods of Jewish education naturally imply shorter hours and the inclusion of secular subjects, and consequently the new ḥadarim can not impart as much Hebrew and rabbinical information as was possible under the old régime, when the pupil was confined for about ten years from twelve to fourteen hours daily in the old-style ḥeder.

The ḥeder which appeared in the United States with the advent of the Russian Jews is but a faint reflection of the original institution. The hours of study are short, the boys are not submissive, and the rebbe, who is in most cases unable to speak English, is more often a martyr than a tyrant.

In the United States.

Some of the ḥadarim in New York are held in spacious rooms that are used for no other purpose, are furnished with the conveniences usual in modern schools, and are administered by learned and intelligent teachers. The proportion of ḥadarim held in small synagogues is much larger in New York than in Russia, because they are not in the way of the "baḥurim," or adults, who in Russia study at the synagogue or bet ha-midrash throughout the day.

There is a considerable ḥeder, or, rather, anti-ḥeder, literature of the time when haskalah was propagated more zealously than now. Some excellent parodies, like Reuben Zimlin's "Haggadah le-Melammedim" (Odessa, 1885), portray the faults and the troubles of the melammedim, and give an idea of the low esteem in which they were held. The ḥeder as distinguished from both the Talmud Torah, or large communal school, and the yeshibah, or Talmudic school for the older boys, has been the subject of much adverse legislation in Russia, and is still nominally under the ban of that government.

H. R. P. Wi.

HEDYOṬ (='Ιδιώτης): Term used in Mishnah, Talmud, and Midrash to designate a private person, a commoner, not belonging to the class of kings, priests, officers, etc. (*e.g.*, Sanh. 90a, "three kings and four hedyoṭot"); also an ignorant man; one of low character; an uncultured, ill-mannered individual ("ha-hedyoṭ ḳofeẓ be-rosh"). "The lowest man rushes ahead" and gives his opinion first in the presence of prominent men (Meg. 12b). "Hedyoṭ" is used as opposed to "sons of kings" (Num. R. viii. 4); of man as opposed to God (*ib.*; Ḳid. 28b); of a common priest as distinguished from a high priest (Yeb. 59a); of a Samaritan as opposed to an Israelite (Sanh. 21b); of an untrained as opposed to a skilled worker (M. Ḳ. 10a); "leshon hedyoṭ" (vulgar or popular parlance) is spoken of in contradistinction to the language of the learned (B. M. 104a); "meshal hedyoṭ" (a proverb or popular saying) occurs frequently in the Midrash; "shiṭre hedyoṭ" (private writings, letters, or documents) are opposed to Biblical books (Shab. 116b); "parah hedyoṭit" means a cow of common stock, not trained for plowing (Ruth R. i. 19).

ḤEFEẒ. See Gentili.

ḤEFEẒ B. YAẒLIAḤ (also called **ḤEFEẒ ALLUF**): Halakist; lived toward the end of the tenth century. Rapoport assumes him to have been a Palestinian, but it is more probable that he lived in Kairwan. He was the author of a work, now lost, in which, as its name "Sefer ha-Miẓwot" indicates, the 613 commandments were enumerated (see COMMANDMENTS, THE 613). Unlike his predecessors in this field, Ḥefeẓ, besides an enumeration of the laws, gave, in brief, reasons for their existence. He was thus, perhaps, the first in the field of the "Ṭa'ame ha-Miẓwot," which afterward had so many exponents. Moreover, the "Sefer ha-Miẓwot" contained not only the Biblical ordinances, but also their Talmudic-rabbinical amplifications and interpretations. Ḥefeẓ gave what may be described as a brief summary of Biblical, Talmudic, and geonic literature, including also formulas for prayer. The book was highly esteemed by the Spanish and German-French authorities, and the decisions of its author, who was referred to as "Gaon," "Resh Kallah," and "Alluf," had such authority that even Maimonides acknowledged himself under obligation to him (comp. his responsum in "Pe'er ha-Dor," No. 140). Ḥefeẓ was a grammarian and a philosopher as well as a halakist, and, what is very remarkable, he managed to express his philological and philosophical opinions even in his "Sefer ha-Miẓwot." Jonah ibn Janaḥ, Judah ibn Balaam, Solomon Parḥon, and Tanḥum Yerushalmi quote grammatical as well as lexicographical remarks from Ḥefeẓ's "Sefer ha-Miẓwot." To judge from these quotations, Ḥefeẓ not only explained the Biblical verses of a legislative nature which he had quoted in his enumeration of the 613 laws, but also at times referred to passages from Scriptural books other than those of the Pentateuch; even post-Biblical literature was drawn upon for the interpretation of Biblical passages.

Ḥefeẓ was a philosopher of authority, as a quotation from his work in Judah b. Barzillai's commentary to the "Sefer Yeẓirah" indicates (pp. 55-56). As Kaufmann has already noted, Baḥya ben Joseph ibn Paḳuda's proof of the existence of God from the combination of the four elements, notwithstanding their opposing natures ("Ḥobot ha-Lebabot," i. 6), is derived from the "Sefer ha-Miẓwot" of Ḥefeẓ. Baḥya's teaching concerning the unity of God and the anthropomorphism of the Scriptures may probably also be traced back to Ḥefeẓ, whose work is quoted by Baḥya in the introduction to his book (comp. Kaufmann in Judah b. Barzillai's Commentary, p. 335). The tosafists, like the other German-French authors, quote legal decisions from the works of Ḥefeẓ, while assuming the author of them to have been R. Hananeel. It has been clearly demonstrated, however, that not Hananeel, but Ḥefeẓ, was the author of the work. The misunderstanding arose through a false interpretation of the abbreviation ס'ח (= ס'חפץ) as ס' חננאל. Whether the "book Ḥefeẓ" is any other than the "Sefer ha-Miẓwot" is still in doubt; it is possible that the "book Ḥefeẓ" may mean the "book by Ḥefeẓ," and therefore the "Sefer ha-Miẓwot." If both refer to the same book, the "Sefer ha-Miẓwot" must have been a voluminous codex, as the quotations from the "book Ḥefeẓ" cover all departments of Jewish law—ritual law, civil law, etc. On the other hand, Rapoport's claim, which makes Ḥefeẓ the author also of the "Miḳẓo'ot" (see HANANEEL B. ḤUSHIEL), has been proved to be without foundation. Nor was Ḥefeẓ the author of the "We-Hizhir."

S. S. L. G.

HEFḲER: Ownerless property, rendered so either by the formal renunciation of the owner, or by an act of the court (Giṭ. 36b), or by the death of a proselyte who has left no Jewish heirs (B. B. 149a; Maimonides, "Yad," Zekiyyah, i. 6). Property found in seas, rivers, or deserts is also supposed to be ownerless, and comes under the category of hefḳer (Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 273, 12, 274, Isserles' gloss; comp. B. Ḳ. 81a, the ten institutions established by Joshua; see TAḲḲANAH). In all these cases property of this kind is acquired by the first who cares to take possession of it. The renunciation of ownership in property, whether movable or immovable, in order to be valid must be made in the presence of three men (Ned. 45a). The formula of such a renunciation is very simple: "This my property shall be hefḳer." If no one takes possession of the property during the first three days, the previous owner may retract his original statement, but not after that, although he can always acquire possession of it in the same manner as any one else (Ned. 44a; comp. R. Nissim *ad loc.*; "Yad," Nedarim, ii. 17; Ḥoshen Mishpaṭ, 273, 9). The renunciation is valid only when made in general terms, not when it is declared hefḳer only to a certain class and not to another class, as when one declares it hefḳer for the poor and not for the rich (Peah vi. 1; Yer. Peah vi. 1; B. M. 30b; comp. "Noda' Biyehuda," series ii., to Yoreh De'ah, 154). As to whether property is legally hefḳer if one or two individuals have been specifically excepted by the owner, compare "Naḥalat Ẓebi" to Ḥoshen Mishpaṭ, 20, 1.

With a few exceptions, the manner of acquiring is the same in case of hefḳer as in other cases (see ALIENATION AND ACQUISITION). While usufructuary possession for a period of time is sufficient to establish a claim to real estate when the claim is that it was sold or given away (see ḤAZAḲAH), such possession is not sufficient in the case of hefḳer, where possession must consist of actual acquisition of the object (B. B. 54a). Painting one portion of a wall in a house, or plowing a field with the intention of taking possession of it, is sufficient ("Yad," Nedarim, ii.; Ḥoshen Mishpaṭ, 275). All the poor-laws that pertain to land are disregarded in the case of hefḳer property. If, however, the previous owner takes possession of it again, he is obliged to observe all those laws, except that of separating the tithes ("ma'aser": Ned. 44a; "Yad," Mattenot 'Aniyim, v. 24). One who has acquired possession of an ownerless ox need not make restitution for the injuries the ox had committed before he acquired it (B. Ḳ. 13b; Ḥoshen Mishpaṭ, 406, 2, 3). See INHERITANCE; POOR LAWS; PROSELYTES.

S. S. J. H. G.

HEGEL, GEORG WILHELM FRIEDRICH: German philosopher; born at Stuttgart 1770; died at Berlin 1831. After studying at the

University of Tübingen he became tutor at Bern and Frankfort-on-the-Main, and lecturer (1801) and professor (1805) of philosophy at Jena. In 1808 he became director of a gymnasium at Nuremberg; in 1816, professor at Heidelberg; and in 1818, professor at Berlin.

Hegel may be said to have been the founder of a school of thought dominant in Germany until the rise of modern natural sciences in the beginning of the later half of the nineteenth century; even now, though discredited in the land of his birth, it is to a certain extent represented by prominent thinkers in England and America. His system has been described as "logical idealism." According to him, all that is actual or real is the manifestation of spirit or mind; metaphysics is coincident with logic, which develops the creative self-movement of spirit as a dialectic and necessary process. God is this self-unfolding spirit, and in the course of the self-realizing, free process of unfolding, creation leaps into being. The world is a development of the principles that form the content of the divine mind.

His Philosophy of History.

The influence of Hegel's system was especially potent in giving the first impulse toward the elaboration of a philosophy of history. From his point of view history is a dialectic process, through which the divine (the absolute mind), in ever fuller measure, is revealed and realized. This absolute is the unlimited and as such, in the fate of the various nations which represent successive limited and finite objectifyings of certain particular phases of the dialectic movement, exercises His highest right, and thus operates in history as the Supreme Judge. This interpretation of history has since become fundamental in the theology of some of the leaders of the Jewish Reform movement. It has been made the basis for assigning to Israel a peculiar task, a mission. Furthermore, it has helped to enlarge and modify the concept of revelation. Applying these principles to Jewish history, the Jewish Hegelians (Samuel Hirsch especially) have discovered in that history also the principle of development, a succession of fuller growths, of more complete realizations in form and apprehension of the particular spirit or idea represented by Israel in the economy of progressive humanity.

His Philosophy of Religion.

Hegel was also the first seriously to develop a philosophy of religion. In his lectures on this subject he treats first of the concept of religion, then of the positive religion, and finally of the absolute religion. Religion is defined as "thinking the Absolute," or "thinking consciousness of God"; but this thinking is distinct from philosophy in so far as it is not in the form of pure thought, but in that of feeling and imaginative representation ("Vorstellung"). The Godhead reveals Himself only to the thinking mind, therefore only to and through man. Religion, in the main, is knowledge of God, and of the relation of man to God. Therefore, as rooted in imaginative representation, not in pure idea, religion operates with symbols, which are mere forms of empirical existence, but not the speculative truth is the essential, and is expressed in the absolute religion. Through the "cultus" (worship) the Godhead enters the innermost parts ("das Innere") of His worshipers and becomes real in their self-consciousness. Religion thus is "the knowledge of the divine spirit [in Himself] through the medium of the finite mind." This distinction between symbol and content, as well as the conception of religion as the free apprehension, in an ever fuller degree, of the divine through the finite (human) mind, was utilized by Samuel Hirsch in his rejection of the view that Judaism is Law, and that the ceremonies, regarded by him as mere symbols, are divinely commanded, unchangeable institutions. The idea (or "Lehre") is the essential. This idea realizes itself, imperfectly at first, in symbol, but with its fuller unfolding the symbols become inadequate to convey the knowledge of God. It was in this way that Hegel's philosophy of religion became of importance for modern Jewish thought.

Hegel's View of Judaism.

Hegel himself, when treating of positive or definite ("bestimmte") religion, dealt with Judaism as only one of the temporary phases through which the knowledge of God passed in the course of its evolution into the absolute religion—Christianity. He divides "bestimmte Religion" into (*a*) natural religions and (*b*) the religion of "spiritual ["geistigen"] individuality." In the first group are included, besides the lowest, called by him the "immediate" religions, or "religions of magic," the Oriental religions—the Chinese "religion of measure"; the Brahman "religion of fantasy"; the Buddhistic "religion of inwardness" ("Insichsein"). Midway between this group and the second he places Zoroastrianism, which he denominates the "religion of good," or "of light," and the Syrian religion, designated as the "religion of pain." In the second group he enumerates the "religion of sublimity" (Judaism), the "religion of beauty" (the Greek), and the "religion of utility" ("Zweckmässigkeit"), or "of intellect" (the Roman).

In thus characterizing Judaism, Hegel practically restates, in the difficult, almost unintelligible, technical phraseology of his own system, the opinion common to all Christian theologians since Paul. The unity (of God) as apprehended by Judaism is altogether transcendental. God is indeed known as "Non-World," "Non-Nature"; but He is merely cognized as the "Master," the "Lawgiver." Israel is the particular people of this particular God. Israel is under the Law; yea, Israel is forever indissolubly bound up with a particular land (Palestine).

His Influence on Jewish Thinkers.

The influence of Hegel is discernible in the writings of Samson Raphael Hirsch, who turned Hegel's system to good account in defense of Orthodoxy. Samuel Hirsch, on the other hand, was induced to write his "Religionsphilosophie der Juden" by the desire to show that his master Hegel had misunderstood Judaism. He showed that the central thought in Hegel's system, that man is God's image and that through him the divine is realized on earth, is fundamental also to Judaism. The universal implications of the God-consciousness, vindicated by Hegel for Christianity alone, were certainly before that Jewish, in the dialectic process through which the God-consciousness finally rose to the climactic harmonizing of Nature and God (the transcendental and the natural) in the "absolute religion" (Christianity). The Jewish God-idea is not barrenly transcendental. The antithesis between God and non-God is overcome in the concept of Man (not merely one God-Man) as combining the divine and the natural (see God).

The theory of Hegel that Judaism is Law, that its motive is fear, that the holiness and wisdom of God as cognized by it are attributes merely of the sublime, unapproachable Sovereign, and as such are beyond the reach of man, as well as the other view that Judaism is definitively Palestinian, is contrary to the facts of Jewish history. Even the Bible shows that religion as reflected by it had progressed beyond this stage. The Hegelian method of regarding man and mind as under the law of growth, and God, not as a fact, but as a force, prepared the way for modern theories of evolution and the science of comparative religion.

E. G. H.

HEGESIPPUS: 1. One of the earliest writers of the Christian Church; lived at Rome, whither he had gone about 150 from Palestine or Syria, by way of Corinth; died about 189. According to Eusebius, he was by birth a Jew; and though this is only an induction on the part of Eusebius, it may be accepted as true. He wrote, in five books, a work entitled Ὑπομνήματα Πέντε, or Πέντε Συγγράμματα, a historical apology for Christianity, in which he attempts to prove the truth and continuity of Christian doctrine in the apostolic churches and also the succession of bishops. It was indirectly aimed against Gnosticism and heresies in general. Of Jewish heretical sects he mentions seven (Eusebius, "Hist. Eccl." iv. § 21): Essenes, Galileans, Hemerobaptists, Masbotheans, Samaritans, Sadducees, and Pharisees. He cites the apocryphal gospels of the Hebrews and of the Syrians, Jewish traditions, and Judæo-Christian literary productions. He is thus an important authority for Jewish heresies and for the earliest history of the Christian Church. Only fragments of the Ὑπομνήματα have been preserved—in the "Historia Ecclesiastica" of Eusebius and (one extract) in Photius, "Bibliotheca," p. 232.

Bibliography: Hilgenfeld, in *Zeitschrift für Wissenschaftliche Theologie*, 1878, p. 304; idem, *Ketzergesch.* pp. 30, 84; Harnack, *Gesch. der Altchristlichen Litteratur*, i. 483; idem, *Chronologie der Altchristlichen Litteratur*, i. 180 *et seq.*; Holtzmann, *Lehrbuch der Neutestamentlichen Theologie*, p. 104; the literature cited by Weizsäcker, in Herzog-Hauck, *Real-Encyc.* vii. 531.

2. Presumed name of the author of a free Latin translation, in five books, of the "Wars of the Jews" of Josephus; lived in the second half of the fourth century. The name is merely a corruption of "Josephus"; it occurs as "Josephus" as early as the fifth century, in Eucherius, and as late as the tenth, in Widerkind of Saxony. In the latter part of the Ambrosian manuscript (8th or 9th cent.) the heading "Josippi Liber Primus" has been changed by a later hand to "Egesippi." A Bern manuscript of the ninth century has "Hegesippus"; while a Vatican manuscript of the ninth and tenth centuries has "Ambrosius" as the author, though without any foundation. The text of Josephus is treated very freely in Hegesippus—mostly in a shortened form. It was first printed at Paris, 1510, and has been often reprinted. It was used by the author of the Hebrew "Yosippon." See Josephus, Flavius.

Bibliography: Schürer, *Gesch.* i. 73 (and the authorities there cited), 124; Rapoport, in the introduction to Stern's ed. of Parḥon's '*Aruk*, p. x., Posen, 1844; Zunz, *G. V.* p. 159.

G.

HE-ḤALUẒ (lit. "the armed," or "the vanguard"): Hebrew magazine or year-book which appeared irregularly between 1852 and 1889. Its German title, "Wissenschaftliche Abhandlungen über Jüdische Geschichte, Literatur, und Alterthumskunde," indicates the nature of its contents. It was edited and published by Joshua Heschel Schorr as the realization of a plan mapped out by his friend and teacher Isaac Erter, who had died one year before the first volume appeared. Geiger, A. Krochmal, J. S. Reggio, M. Dubs, and M. Steinschneider were among the contributors to the earlier volumes, the major portion of which, however, was written by the editor. The articles in the later volumes were written by Schorr exclusively. The dates and places of publication are as follows: vols. i.-iii. Lemberg, 1852-56; iv.-vi. Breslau, 1859-61; vii.-viii. Frankfort-on-the-Main, 1865-69; ix.-xi. Prague, 1873-80; xii.-xiii. Vienna, 1887-89.

"He-Ḥaluẓ" was the most radical of Hebrew periodical publications, and Schorr's bold attacks on the great rabbinical authorities, and even on the Talmud, aroused intense opposition. Entire works, like A. M. Harmolin's "Ha-Ḥoleẓ" (Lemberg, 1861) and Meïr Kohn Bistritz's "Bi'ur Ṭiṭ ha-Yawen" (German title, "O. H. Schorr's Talmudische Exegesen," Presburg, 1888), were written to disprove its statements, and few men were subjected to so much vindictive criticism and gross personal abuse as its editor, who was equally unsparing in his counterattacks. Many of his extreme views on Talmudical subjects were, however, rejected even by radical critics (see Geiger, "Jüd. Zeit." iv. 67-80).

J. P. Wi.

HEIDELBERG: University town in the grand duchy of Baden, Germany; it has a population of 40,240, including 882 Jews. The community there dates from the middle of the thirteenth century, as is shown by historical references to the presence of Jews in the neighborhood of Heidelberg during the reign of Ludwig II. (1253-94). In 1300 the protected Jew Anselm lived in the town itself; in 1321 there were several others there; and in 1349 Jews were among those who suffered during the Black Death. However, it is probable that but few were martyred, for the elector Rupert I. made Heidelberg at that time a place of refuge for Jews fleeing from Worms, Speyer, and other places. From the middle of the fourteenth century onward Jews were regularly received in Heidelberg under comparatively favorable conditions. The "Hochmeister" (rabbi) Lebelang was granted protection, and permission to open at Heidelberg or in some other place in the Palatinate a school whose pupils were also assured of protection. The cemetery was enlarged in 1369. In 1381 Heidelberg became the seat of the federated neighboring communities. The elector Rupert II. expelled all Jews in 1390, and gave their cemetery, synagogue, houses, and manuscripts to the university, although on becoming king he permitted Jews to stay in other cities of his domains.

Jews are not mentioned again at Heidelberg until the middle of the seventeenth century, when five members of the famous Oppenheimer family were living there. At that time Heidelberg seems to have been the seat of the electoral dayyan Isaac Margolis. During the French invasions of 1689 and 1693 the Jews of Heidelberg and the refugees from Mannheim staying with them suffered greatly. In 1704 thirteen Jewish families were living at Heidelberg, including the first district rabbi, Hirsch Fränkel, who was succeeded by David Ullmann (d. 1762). In 1763 the elector invested Hirsch Moses Mergentheim with the office of chief rabbi of the Palatinate. Olympia Fulvia Morata, born at Ferrara of Jewish parents, was offered the chair of Greek at the university in 1554, but was prevented from accepting by ill health. Baruch Spinoza was called to a chair of philosophy in 1693, but declined. Among the teachers of Hebrew at the university were the baptized Jews Paulus Staffelstein (called May 18, 1551) and Emanuel Tremellius (called July 8, 1561), and also Johann Reuchlin, Sebastian Münster, Simon Grynæus. The University of Heidelberg was perhaps the first in Germany to admit Jews as privatdocenten, among these being H. B. Oppenheim (1842; political economy) and Alexander Friedländer (1843; law), grandson of Rabbi Joseph Friedländer. The first Jewish regular professor in Heidelberg was the Orientalist Gustav Weil, appointed 1861. At present (1903) the university includes among its professors Georg Jellinek (international law).

Heidelberg became part of the grand duchy of Baden in 1803; by the edict of 1808 the Jews were granted full civic liberty. Heidelberg belongs, under the "grossherzoglicher Oberrath" of the Israelites of Baden, to a synagogal district that includes the communities of Baierthal, Gross-Sachsen, Heidelberg, Hemsbach, Hockenheim, Ketsch, Leutershausen, Lützelsachsen, Meckesheim, Nussloch, Rohrbach, Reilingen, Sandhausen, Schwetzingen, Walldorf, Weinheim, and Wiesloch.

The synagogal districts of Ladenburg and Sinsheim with their communities are also under the jurisdiction of the district rabbi of Heidelberg. H. Pinkus is now rabbi (1903), his two immediate predecessors having been Hillel Sondheimer and Solomon Fürst. There are many societies and foundations in the community, including a B'nai B'rith Friedrichsloge.

HEIDENHEIM, PHILIP: German rabbi and teacher; born at Bleicherode June 14, 1814. In 1834 he was called as teacher to Sondershausen, where he worked under I. Wolffson, whom he succeeded in 1837 as principal and preacher. In 1840 he was appointed teacher at the "Realschule," where he taught (1840-86) mathematics, geography, German, Latin, and history.

In 1845, having received his rabbinical diploma from Rabbi Löb Blaschke in Schönlanke and from Rabbis J. J. Oettinger and Michael Sachs in Berlin, he was appointed "Landesrabbiner" of the principality of Schwarzburg-Sondershausen; and shortly afterward the few scattered Jewish communities in the principality of Schwarzburg-Rudolstadt were added to his jurisdiction.

In 1848 he attended the conference of German teachers held in Eisenach, and was elected one of its officers. It was due to his initiative that in the first section of the constitution, which originally read, "The foundation of all education is Christian," the word "Christian" was changed to "moral and religious" ("sittlich-religiös"). Four hundred members voted in favor of the amendment, proposed by Heidenheim; and this so embittered a missionary who was present that he exclaimed: "We have sold Christ to the Jews." The liberal tendency of the time appears also from the fact that this gathering took place on Rosh ha-Shanah (New-Year's Day), and that the Jewish community granted to its rabbi leave of absence for the occasion. At Passover, 1902, Heidenheim celebrated the sixty-fifth anniversary of his inaugural sermon.

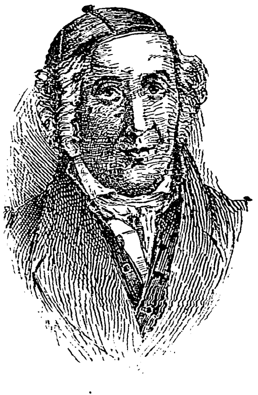
S. D.

HEIDENHEIM, WOLF (BENJAMIN) BEN SAMSON: German exegete and grammarian; born at Heidenheim in 1757; died at Rödelheim Feb. 23, 1832. At an early age Heidenheim was sent to Fürth, where he studied Talmud under Joseph Steinhardt, author of "Zikron Yosef," and, from 1777, under Hirsch Janow. Besides Talmudic literature, Heidenheim devoted himself to the study of Hebrew grammar, and particularly of the Masorah. In 1782 he left Fürth, probably on account of Janow's opposition to Mendelssohn's translation of the Pentateuch, of which Heidenheim was an admirer. He went to Frankfort-on-the-Main, where he made the acquaintance of the most prominent scholars, among them Wolf Breidenbach and Solomon Dubno. There began his literary activity, which lasted fifty years. Heidenheim, encouraged by Dubno, conceived the idea of issuing a revised edition of the Pentateuch, with a commentary of his own. The first work edited by him was Ibn Ezra's "Moznayim," to which he added a critical commentary (Offenbach, 1791). Seven years later Heidenheim began his critical edition of the Pentateuch, which he entitled



Wolf Heidenheim.

His Pentateuch.

"Sefer Torat Elohim." It contained the Targum, the commentaries of Rashi and Rashbam, the "Minḥat Shay" of Solomon Norzi (commentary), his own glosses and Masoretic references, and his supercommentary on Rashi entitled "Habanat ha-Miḳra." He based his commentary chiefly on the accents, adding numerous grammatical notes. But the undertaking, on the business side, was too difficult for him alone, and he was compelled to stop at Gen. xliii. 16.

His Maḥzor.

He next entered into partnership with Baruch Baschwitz, an energetic business man; through the assistance of Breidenbach they obtained from the Count of Solms-Rödelheim, under favorable conditions, a license to establish a printing-press at Rödelheim, whither they removed in 1799. Heidenheim immediately began an edition of the Maḥzor, with a Hebrew commentary by himself and a German translation by himself and Breidenbach (1800). In order to give a correct text, Heidenheim had secured the most ancient manuscripts, among them being one of 1258, as well as the earliest Italian and German editions. At the end of the Maḥzor to Shemini 'Aẓeret there is printed Heidenheim's "Ha-Piyyuṭim weha-Payeṭanim," an essay on the liturgists.

His Tefillah.

In 1806, Baschwitz having withdrawn, Heidenheim became sole proprietor. In that year he published his "Mebo ha-Lashon," a treatise on Hebrew grammar, and in 1808 his "Mishpeṭe ha-Ṭe'amim," a treatise on the accents according to the ancient grammarians. Ten years later Heidenheim recommenced his edition of the Pentateuch, but with a larger scope. It was published in four separate editions in 1818–21; one edition, entitled "Me'or 'Enayim," contains the text, the commentary "'En ha-Ḳore," and the author's treatise ("'En ha-Sofer") on the square characters; another edition, entitled "Moda' la-Binah," contains the text, the commentary of Rashi, and the author's supercommentary; the third edition, entitled "Tiḳḳun Sofer," is an unvocalized text for scribes; the fourth contains the text, with a German translation, and a commentary entitled "Minḥah Ḥadashah." Heidenheim also published: the Pesaḥ Haggadah (German transl.; 1822); the Pirḳe Abot (German transl.; 1823); "Siddur Safah Berurah," the daily prayers with a German translation (1823); "Ma'aseh Ta'tu'im," a polemic against the cabalist Nathan Adler (anonymous, but ascribed to Heidenheim); "Seder Tish'ah be-Ab" (German transl., with notes; 1826); Seliḥot (German transl., with a Hebrew commentary; 1834). He also added valuable notes to various works which issued from his press, among them being the "Mebo ha-Mishnah" of Maimonides, and Solomon Papenheim's "Yeri'ot Shelomoh." He left more than a dozen unpublished works, mostly on Hebrew grammar.

S. M. Sel.

HEIDINGSFELD: Bavarian city, on the Main, near Würzburg. It has a population of 4,154, including 100 Jews (1903). That it contained one of the oldest Jewish settlements may be seen from the "Martyrologium" of Nuremberg (ed. Salfeld, p. 233), which mentions a woman by the name of Zira among the victims of the Franconian persecution of 1298. In 1398 King Wenceslaus expressly released the city from the obligation of paying Jewish debts. In 1423 it was stated in the privileges granted the city by King Sigismund that no one should be permitted to receive a Jew or cause him to settle there except by royal command; but in 1431 the city obtained from the king the privilege of admitting Jews with the rights enjoyed by their coreligionists in other free cities.

King Sigismund sold the city to the Von Gutenstein family, from which it passed to Bishop Lorenz of Würzburg, who bought it in 1498 for the bishopric. Because of a charter which the seven Jewish families living there had obtained from their former lord, they were allowed by the bishop to remain for a yearly payment of 120 florins. In the course of the next centuries the Jewish community in Heidingsfeld increased considerably, and as a result the little town became a trading center.

In the fifteenth century Heidingsfeld supported a rabbinate; and in the eighteenth century it became the seat of a chief rabbinate which included all the district communities of Würzburg. On May 23, 1727, the election of Jacob Löw as district rabbi was confirmed by the bishop, and on Aug. 10, 1742, that of Löw Baruch Cohn. From 1798 Abraham Bing occupied the position. The office was discontinued when all corporations were dissolved by the Bavarian edict of 1813 (see Bavaria). The court agent Seligmann should also be mentioned, who, by a patent dated 1726, was exempted, with all his people, from taxes when traveling on the business of the bishopric. Heidingsfeld passed into the possession of the Bavarian crown along with the bishopric of Würzburg. The Jews living there gradually deserted their narrow ghetto; many of them, especially after freedom of residence was proclaimed, settled in the neighboring Würzburg. The community still possesses a parochial school.

HEIFER, RED. See Red Heifer.

HEILBRON, DAVID: Dutch physician; born at The Hague July 4, 1762; died at Amsterdam 1847. He was educated at the University of Leyden, graduating (M.D.) in 1784. From 1785 to 1800 he practised in his native city. In the latter year he removed to Amsterdam, where for many years he belonged to the board of health, and where he practised for the remainder of his life.

Heilbron is the author of: "Verhandeling over het Bezigen van Purgeermiddelen in de Borstziekten," 1790; "Verhandeling over de Oorzaken van het Beslag op de Tong," 1795, German transl. 1795; "Verhandeling over de Ziekteteekenen uit de

Oogen in Heete Ziekten," 1798; "Verhandeling over de Teekens of Verschijnselen der Oogen in Sleependc Ziekten," 1801; "Verhandeling over de Middelen Tegen de Besmetting van de Ware Veepest," 1824.

Bibliography: Hirsch, *Biog. Lex.* Vienna, 1884.

S. F. T. H.

HEILBRONN: Town of Württemberg in the district of the Neckar. There was an important community there in 1298, when Rindfleisch and his hordes slew nearly 200 Jews (Oct. 19). Among the victims were one rabbi and one punctator ("naḳdan"). At the beginning of the fourteenth century the Jews of Heilbronn paid taxes amounting to 666⅔ florins (about $1,500). In 1316 they were turned over to the city by Ludwig the Bavarian for a period of six years, after the debts due them had been canceled, in recognition of the city's loyalty. By an agreement of July 8, 1322, between the city and Duke Frederick of Austria the citizens were released from liability for everything that they had taken from the Jews. In 1349 the latter were attacked in their street on the Hasenmarkt, their goods were plundered and burned, and their synagogue was set on fire; but in 1357 the community had built another. They suffered severely under the arbitrary decrees of King Wenceslaus; during the war between the Suabian towns; under the shameful policy, as regards the Jews, of kings Rupert and Sigismund; and during a war that had broken out on their account between the city and Heinrich Mosbach of Ems. At the end of the fifteenth century they were ordered to leave the city despite the repeated intercessions of Emperor Frederick III. The few Jews who still remained were expelled by the city council in 1523 and 1529, and down to the middle of the seventeenth century the municipal authorities refused to allow Jews to enter the town. In 1645 a few were admitted under special restrictions; in 1667 a very severe decree was issued regarding Jewish business men visiting the city. In the following century there were no Jews at Heilbronn, and not until the law of April 25, 1828, had raised the status of the Jews of Württemberg were they readmitted. On May 5, 1831, a Jew was made a citizen; in 1861 there were twenty-one Jewish families, who dedicated a synagogue on Nov. 21 of that year.

The scholars of Heilbronn during the Middle Ages included R. Johanan, son of R. Eliakim; the punctator Abraham, and the teacher Isaac, all of whom were murdered in 1298; the Talmudist Salomon Spira flourished there in the second half of the fifteenth century. In 1903 there were 920 Jews in a population of 37,889. They have a fine synagogue in the Moorish style, various philanthropic institutions, a society for the study of Jewish history and literature, and a B'nai B'rith lodge. Since 1864 Heilbronn has replaced Lehrensteinsfeld as the seat of the district rabbinate, which now includes the communities of Affaltrach-Eschenau, Bonfeld, Kochendorf, Neckarsulm, Lehrensteinsfeld, Weinsberg, Massenbach with Hausen, Oedheim, Oehringen, Sontheim, Horkheim, and Thalheim. Its present rabbi is L. Kahn (1903), his predecessors having been Moses Engelbert (1864–91) and Berthold Eisenstein (1891–92).

D. S. Sa.

HEILBRONN (HEILPRIN), ABRAHAM BEN MOSES ASHKENAZI: Chief rabbi of Lemberg; born in 1578; died Jan. 2, 1649. His father was related to R. Solomon Edels. Abraham Heilbronn wrote: "Birkat Abraham," a homily which he delivered on the day of his "bar miẓwah" (Prague); "Ahabat Ẓiyyon," a commentary on the Pentateuch and the five Megillot (Lublin, 1639). In the preface to the latter work he asserts that he also wrote a commentary on the Prophets and the Hagiographa, and he refers to a work of his entitled "Sha'are Ẓiyyon."

G. M. Sel.

HEILBRONN, JACOB BEN ELHANAN: German rabbi and mathematician; flourished in the sixteenth and seventeenth centuries. After occupying various rabbinates he settled at Padua. He wrote: "Seder Meliḥah," a treatise in Judæo-German on the law of salting meat, at the end of which there is an elegy on the death of Abigdor Zuidal (Venice, 1602?); "Naḥalat Ya'aḳob," a collection of responsa, which contains, besides his own responsa, some contributed by others (Padua, 1622); "Shoshannat Ya'aḳob," multiplication tables, with arithmetical puzzles for exercise and primary instruction (a supplement to his edition of the "Orḥot Ḥayyim" of R. Eleazar ha-Gadol; Venice, 1623); an Italian translation of Benjamin Aaron Solnik's "Miẓwot Nashim," on women's three obligations (Padua, 1625). Fürst ("Bibl. Jud." i. 371) doubts whether the Italian translation was made by Heilbronn or whether the latter was the author and Solnik the translator. The Italians spell his name "Alpron" (Mortara, "Indice").

Bibliography: Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 173; Steinschneider, *Cat. Bodl.* col. 1214; idem, *Jewish Literature*, p. 261.

D. M. Sel.

HEILBRONN, JOSEPH BEN ELHANAN: German Hebrew scholar; lived at Posen in the sixteenth century. Nepi-Ghirondi's "Toledot Gedole Yisrael" (p. 203) mentions a Joseph Heilbronn who died at Padua in 1622, but who can not be identified with Joseph ben Elhanan. Heilbronn wrote: "Em ha-Yeled," an elementary Hebrew grammar for the use of children, with conjugation tables and explanations in German (Prague, 1597); "Me'irat 'Enayim," the 613 commandments arranged according to Maimonides (Prague, n.d.); "Ḳol ha-Ḳore," a short Hebrew grammar for use in schools (Cracow, n.d.).

Bibliography: Steinschneider, *Cat. Bodl.* col. 1472.

K. M. Sel.

HEILBUT, ABRAHAM BEN JUDAH: German Talmudist; lived at Altona in the middle of the eighteenth century. In July, 1751, he wrote there "Binah Rabbah," a commentary to the Midrash Rabbah and on the Midrashim to Psalms, Proverbs, and Samuel. Chief attention is given to words not found in the "'Aruk." The work is still unpublished. He was also the author of "'Aruk Ḳaṭon," a vocabulary of the Talmud (also unpublished); and of "Kaf Naḥat," a commentary on Pirḳe Abot (Altona, 1779).

Bibliography: Neubauer, *Cat. Bodl. Hebr. MSS.* No. 148; Benjacob, *Oẓar ha-Sefarim*, p. 246, No. 281.
K. M. Sel.

HEILBUTH, FERDINAND: French painter; born at Hamburg in 1826; died Nov. 19, 1889, at Paris, where he had been naturalized ten years previously. His work is characterized by lively coloring and accentuation of expression. He exhibited at the annual salons from 1853 onward. Of his works may be cited: "Une Réception chez Rubens"; "Luca Signorelli"; "Le Fils du Titien et Béatrice Donato"; "La Tasse à Ferrare"; "Le Mont de Piété" (now in the Luxembourg); "Au Bord de la Tamise"; "Beau Temps"; "Rêverie"; "Epreuve de Musique de Palestrina"; "L'Autodafé"; "Aux Bords de la Seine." Heilbuth excelled as a portrait-painter. He was made chevalier of the Legion of Honor in 1861; officer in 1881.

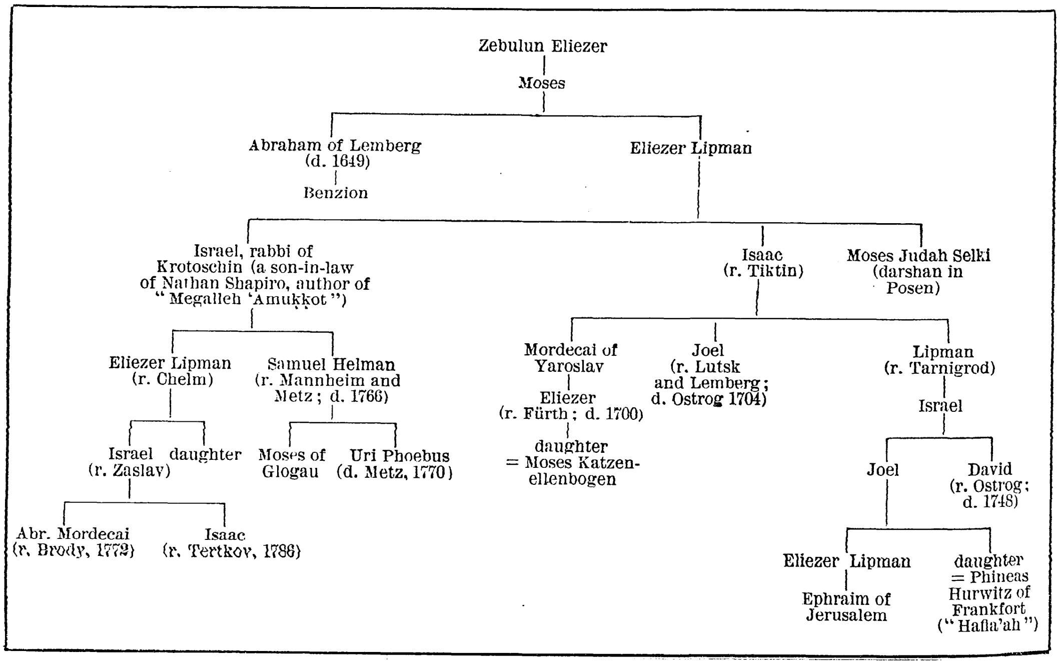
S. V. E.

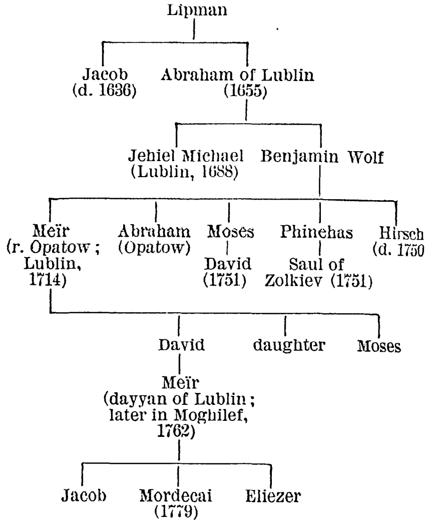
HEILPRIN: Besides the numerous Heilbrons, Heilbronners, Heilpruns, and Heilbruns who are known to have lived between the middle of the sixteenth century and the present time, there are four distinct branches of the Heilprin family. The progenitor of the oldest of these was Zebulun Eliezer, whose son Moses of Brest-Litovsk was brother-in-law of Samuel Edels (d. 1632). Moses was the author of "Zikron Mosheh" (Lublin, 1611). The following tree includes his known descendants, omitting the females in most instances (the abbreviation "r." signifies "rabbi"):



Zebulun Eliezer
Moses
Abraham of Lemberg (d. 1649)
Benzion
Eliezer Lipman
Israel, rabbi of Krotoschin (a son-in-law of Nathan Shapiro, author of "Megalleh 'Amuḳḳot")
Isaac (r. Tiktin)
Moses Judah Selki (darshan in Posen)
Eliezer Lipman (r. Chelm)
Samuel Helman (r. Mannheim and Metz; d. 1766)
Israel (r. Zaslav)
daughter
Moses of Glogau
Uri Phoebus (d. Metz, 1770)
Abr. Mordecai (r. Brody, 1772)
Isaac (r. Tertkov, 1786)
Mordecai of Yaroslav
Eliezer (r. Fürth; d. 1700)
daughter = Moses Katzenellenbogen
Joel (r. Lutsk and Lemberg; d. Ostrog 1704)
Lipman (r. Tarnigrod)
Israel
Joel
David (r. Ostrog; d. 1748)
Eliezer Lipman
Ephraim of Jerusalem
daughter = Phineas Hurwitz of Frankfort ("Hafla'ah")

Genealogical Tree of the Oldest Branch of the Heilprin Family.

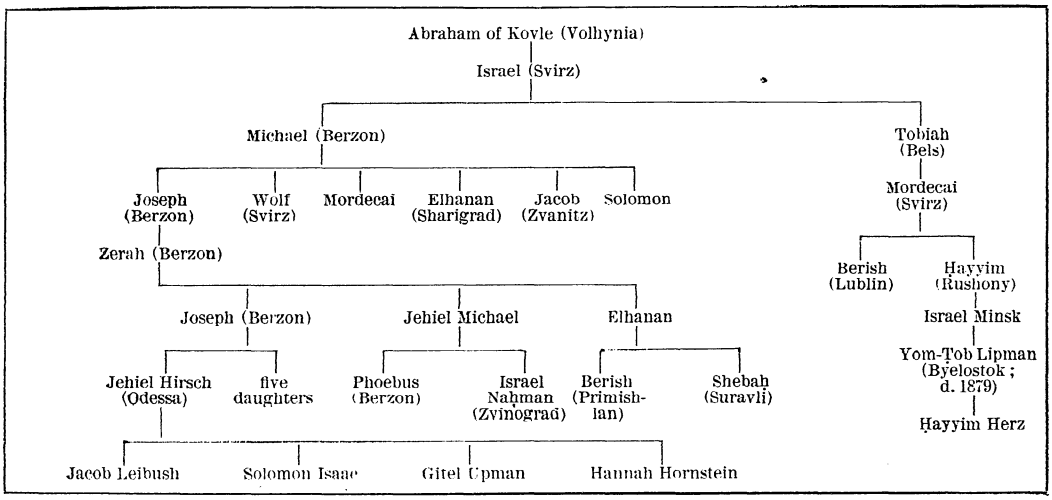
The genealogy of another branch, which includes several rabbis and prominent leaders of communities and of the Four Lands, is as follows:



Lipman
Jacob (d. 1636)
Abraham of Lublin (1655)
Jehiel Michael (Lublin, 1688)
Benjamin Wolf
Meïr (r. Opatow; Lublin, 1714)
Abraham (Opatow)
Moses
David (1751)
Phinehas
Saul of Zolkiev (1751)
Hirsch (d. 1750)
David
daughter
Moses
Meïr (dayyan of Lublin; later in Moghilef, 1762)
Jacob
Mordecai (1779)
Eliezer

The genealogy of a third branch is that made by Belinson of the family of **Jehiel Hirsch Heilprin**, who went from Brody in 1821 to Odessa, where he was dayyan until 1835; he then succeeded Reuben Hardenstein in the rabbinate of Odessa, which Heilprin held until his death, Jan. 13, 1877 ("Allg. Zeit. des Jud." 1877, p. 126, where the name is erroneously given as "Michael Hirsch"). The places following the names in the family tree on the opposite page denote in most instances the rabbinates.

The fourth branch is that of Jehiel b. Solomon b. Jekuthiel of Minsk, author of "Seder ha-Dorot," whose son Moses succeeded him in the rabbinate, and whose grandson, Löb b. Isaac, published his work. He was probably connected with the third branch of the Heilprin family. A large number of the Heilprins now living in Russia claim descent from him. Phinehas Mendel, father of Michael Heilprin, was also probably descended from one of the several prominent Heilprins who lived in his native city, Lublin. Among other Heilprins are: **Abraham b. Moses Heilprin** (see Heilbronn); **Baruch b. Ẓebi Heilprin,** author of "Miẓwot ha-Shem," on the 613 commandments (Lemberg, 1792); **Gedaliah Heilprin** of Minsk, author of "Ḳohelet ben Shelomoh" (Wilna, 1879); **Joel b. Isaac Heilprin (Ba'al Shem I.)** of Ostrog, Volhynia (1648-49); **Joel b. Uri Heilprin (Ba'al Shem II.)** of Zamoscz, flourished 1720; **Joseph b. Elhanan Heilprin** (see Heilbronn); **Naḥman Heilprin,** assistant rabbi ("rosh bet din") in Brest-Litovsk, 1774; **Saul** and **Isaac,** sons of **Samuel Heilprin,** and joint authors of "Hora'at Sha'ah" (Berlin, 1765), solutions of the difficulties left unsolved in the "ḥiddushim" of R. Samuel Edels.



Abraham of Kovle (Volhynia)
Israel (Svirz)
Michael (Berzon)
Tobiah (Bels)
Joseph (Berzon)
Wolf (Svirz)
Mordecai
Elhanan (Sharigrad)
Jacob (Zvanitz)
Solomon
Mordecai (Svirz)
Zerah (Berzon)
Berish (Lublin)
Ḥayyim (Rushony)
Joseph (Berzon)
Jehiel Michael
Elhanan
Israel Minsk
Yom-Ṭob Lipman (Byelostok; d. 1879)
Jehiel Hirsch (Odessa)
five daughters
Phoebus (Berzon)
Israel Naḥman (Zvinograd)
Berish (Primishlan)
Shebah (Suravli)
Ḥayyim Herz
Jacob Leibush
Solomon Isaac
Gitel Upman
Hannah Hornstein

Genealogical Tree of the Later Branch of the Heilprin Family.

Heilprins are to be found in almost all Ashkenazic communities, but they are not necessarily of the same family, since most of the family names borne by the Jews of Austria, Germany, and Russia were assumed indiscriminately by order of their respective governments toward the end of the eighteenth century or at the beginning of the nineteenth.

J. P. Wi.

HEILPRIN, ABRAHAM BEN MOSES. See Heilbronn, Abraham ben Moses Ashkenazi.

HEILPRIN, ANGELO: American naturalist, geologist, and traveler; son of Michael Heilprin; born March 31, 1853, at Sátoralja-Ujhely, Hungary. He was taken by his father to the United States in 1856. Some years later he returned to Europe, where he was educated. From 1876 to 1878 he continued his studies at the Royal School of Mines, London; at the Imperial Geological Institution of Vienna, and at Florence and Geneva, subsequently returning to the United States. He was professor of invertebrate paleontology and of geology at the Academy of Natural Sciences, Philadelphia (1880-1900); curator in charge of the museum of that institution (1883-1892); professor of geology at the Wagner Free Institute of Science in Philadelphia (1885-90); and has been president of the Geographical Society of Philadelphia for seven years. Heilprin has also demonstrated his ability as an artist, and in 1880 exhibited "Autumn's First Whisper" at the Pennsylvania Academy of Fine Arts, and "Forest Exiles" at the Boston Museum of Fine Arts in 1883.

In 1886 Heilprin went to Florida for the purpose of investigating the geological structure of the peninsula; in 1888, to Bermuda for a similar purpose. Two years later he set out on a scientific expedition to Mexico, and in pursuit of his investigations he ascended Iztaccihuatl, Orizaba, and Popocatepetl, and ascertained their altitudes by barometric measurements. While on this journey he explored the central plateau, and on his return contributed valuable additions to the geological knowledge of that region. In 1892 Heilprin led the Peary Relief Expedition to Greenland. After the eruption of Mount Pelée, by which the city of Saint-Pierre, Martinique, was entirely destroyed (May 8, 1902), Heilprin visited the island, and climbed to the crater of Mount Pelée while the volcano was in action; he revisited it in 1903.

The following are his chief publications: "Contributions to the Tertiary Geology and Palæontology of the United States" (1884); "Town Geology, the Lesson of the Philadelphia Rocks" (1885); "The Geographical and Geological Distribution of Animals" (1887); "The Geological Evidences of Evolution" (1888); "The Bermuda Islands" (1889); "Principles of Geology" (1890); "The Arctic Problem and Narrative of the Peary Relief Expedition" (1893); "The Earth and Its Story" (1896); "Alaska and the Klondike" (1899); "Mount Pelée and the Tragedy of Martinique" (1903).

A. F. H. V.

HEILPRIN, ELIEZER B. MORDECAI: Polish rabbi; born probably in Yaroslav, Galicia, in 1648; died at Fürth in 1700. He was rabbi successively in Gross Meseritz, Moravia; Tomaszow, Russian Poland; and Fürth, Bavaria. Heilprin was the author of "Siaḥ ha-Se'uddah," festive discourses delivered on the occasion of finishing the study of several tractates of the Talmud. This work and some of his responsa and novellæ are still extant in manuscript (Neubauer, "Cat. Bodl. Hebr. MSS." Nos. 469, 470).

K. P. Wi.

HEILPRIN, JEHIEL BEN SOLOMON: Lithuanian rabbi, cabalist, and chronicler; born about 1660; died at Minsk about 1746. He was a descendant of Solomon Luria, and traced his genealogy back through Rashi to the tanna Johanan ha-Sandlar. He was rabbi of Glusk, government of Minsk, till 1711, when he was called to the rabbinate of Minsk, where he officiated also as head of the yeshibah till his death. Heilprin was one of the most eminent Talmudists of his time. He was opposed to casuistry, and on this account succeeded in grouping around him a great number of liberal-minded pupils. For a long time he had to sustain a hard struggle with Aryeh Löb b. Asher, who, while still a young man, had founded a yeshibah at Minsk, which at first was very flourishing. Aryeh Löb attacked Heilprin's method of teaching; and the antagonism between them spread to their pupils. Later, Aryeh Löb, being obliged to assist his father in the district rabbinate, neglected his yeshibah, which was ultimately closed, and Heilprin was no longer molested.

Heilprin devoted a part of his time to the study of Cabala, on which subject he wrote a work. He was opposed to giving approbations to new books, deviating, as he himself says, only twice from his general principle in this regard. The two works so favored were the "'Ir Ḥomah" of Abraham Judah Elijah and the "Magen ha-Elef" of Aryeh Löb of Plotzk.

Heilprin is especially known through his "Seder ha-Dorot." This work consists of three independent volumes or parts. The first of these, entitled "Yemot 'Olam," is a history from the Creation down to his own time. The author always endeavors to give, by means of calculation, the dates of Biblical personages. He bases his work on the "Yuḥasin" of Abraham Zacuto, on the "Shalshelet ha-Ḳabbalah" of Gedaliah ibn Yaḥya, and on the "Ẓemaḥ Dawid" of David Gans. It seems that this first part was written when the author was still young; for the last event which he registered was one occurring in 1697. The second part, "Seder ha-Tanna'im weha-Amora'im," contains lists of the Tannaim and Amoraim in alphabetical order with their dates. Part III. is a kind of catalogue containing first the names of all the authors, then those of their works, both arranged in alphabetical order. Heilprin based this part on the "Sifte Yeshenim" of Shabbethai Bass, but added a great number of other titles. He states in the preface the many advantages of a knowledge of the chronological order of the Talmudists, which indeed in certain cases is absolutely necessary. The whole work is followed by notes on the Talmud, also arranged in alphabetical order. It was published for the first time by Heilprin's grandson, Judah Löb Heilprin, at Carlsruhe in 1769. There exist several other editions, the latest being the revised one of Naphtali Maskileison, Warsaw, 1882.

Of Heilprin's numerous other works, mentioned in the "Seder ha-Dorot," the only one which has been published is "'Erke ha-Kinnuyim," a dictionary of synonyms and homonyms occurring in the Bible, Talmud, and other works, chiefly cabalistic (Dyhernfurth, 1806).

BIBLIOGRAPHY: De Rossi, *Dizionario*, i. 166; Naphtali Maskileison in the preface to his edition of the *Seder ha-Dorot*, as above; Benzion Eisenstadt, *Rabbane Minsk*, pp. 14-16, Wilna, 1898.

S. M. Sel.

HEILPRIN, JOEL BEN ISAAC: Polish Ḥasidic rabbi; lived at Ostrog in the middle of the seventeenth century. He was known as "Ba'al Shem I.," and, owing to his Talmudic and cabalistic learning, enjoyed a great reputation among his contemporaries, who called him "a man of God." In the cabalistic "Toledot Adam" (Zolkiev, 1720) it is recorded that in 1648 he miraculously saved some Jews who, pursued by enemies, had taken refuge in a ship. Some of his writings were printed in the cabalistic "Mif'alot Elohim" (Zolkiev, 1724). See Ba'al Shem.

BIBLIOGRAPHY: Fuenn, *Keneset Yisrael*, pp. 432-433.

D. S. Man.

HEILPRIN, JOEL BEN URI (also known as **Ba'al Shem II.**): Galician thaumaturge; lived at Satanow in the first half of the eighteenth century. Possessed of a fair knowledge of medicine and physics, he pretended to effect cures and perform miracles by means of the Cabala and the Holy Name. In 1720 he published anonymously a work entitled "Toledot Adam," describing various remedies attributed to prominent cabalists. The preface of the work constitutes a continuous panegyric of Heilprin and his miracles. Heilprin had many pupils, who, on the death of their master, formed a band of charlatans who shamelessly exploited the credulity of their contemporaries.

J. I. Br.

HEILPRIN, LOUIS: American encyclopedist; son of Michael Heilprin; born in Miskolcz, Hungary, July 2, 1851. He emigrated with his parents to the United States in 1856, and was educated privately. He contributed articles to the second edition of the "American Cyclopædia," of which his father was one of the associate editors. He is the author of the "Historical Reference Book" (New York, 1884; 6th ed., *ib.* 1899), a standard book of reference. He became editorially connected with the "New International Encyclopedia" in 1902, and is at present associated with his brother, Angelo Heilprin, in the preparation of a new edition of "Lippincott's Gazetteer of the World."

Michael Heilprin.

Association with Kossuth.

HEILPRIN, MICHAEL: Polish-American scholar, author, and philanthropist; born in Piotrkow, Russian Poland, Feb. 23, 1823; died in Summit, N. J., May 10, 1888. He was the son of Phinehas Mendel Heilprin, and was brought up in an atmosphere of enlightened Orthodoxy which was not antagonistic to the acquisition of secular learning. His father was his only teacher, and his good memory, combined with a great capacity for work, helped him to lay the foundation of his encyclopedic knowledge. Heilprin married early, and in 1843 emigrated to Hungary. He established himself as bookseller in the town of Miskolcz. He thoroughly mastered the Hungarian language; and his articles and poems in the cause of liberty attracted attention during the stormy days of 1848 and 1849. He became acquainted with Kossuth and other leaders, and, when the short-lived independent government was established, became secretary of the literary bureau which was attached to the Ministry of the Interior, presided over by his friend Szemere. After the collapse of the Revolution he went to Cracow and remained for some time with his father's friend, Isaac Mieses, with whose nephew, the philosopher Fabius Mieses, he formed a friendship which lasted throughout his life.

From Cracow Heilprin went to France, where he remained less than a year, and where he suffered from a malady of the eyes which for a long time incapacitated him for work. At the close of 1850 he returned to Hungary and settled as a teacher in Sátoralja-Ujhely. He then devoted his leisure to the study of the English language and English literature, and in 1856 went to England with the intention of settling there; but, following the advice of Kossuth, whom he met in that country, he proceeded to the United States.

Work in America.

Heilprin settled in Philadelphia, where for two years he taught in the schools of the Hebrew Education Society. In the exciting times preceding the Civil war he "saw but one struggle here and in Hungary," his sympathies being actively enlisted in the anti-slavery cause. In 1858 he was introduced to Ripley and Dana, the editors of "Appleton's New American Cyclopædia," and they were so impressed with the extent and accuracy of his knowledge that he was forthwith engaged by them to read and verify the geographical, historical, and biographical articles which were to appear in that publication. He also contributed a mass of valuable articles to the "Cyclopædia," among them "Hebrews," "Hungary," and "Poland." In 1858 he took up his residence in Brooklyn, where he became intimate with several members of the Kossuth family. In 1863 he removed to Washington, where he remained for two years, again engaging in book-selling. He also founded there a periodical called "The Balance," which existed for a short time. In 1865 he returned to New York, and at once began to contribute book reviews and articles on European politics to the newly established "Nation," on which he remained a constant collaborator until his death. From 1871 to 1876 he was engaged as associate editor on the second edition of the "American Cyclopædia."

When the persecution of the Jews in Russia in 1881 sent a flood of refugees to America, Heilprin threw himself heart and soul into the work of relief. He took an intense interest in the colonization plans of the earlier arrivals, and soon became absorbed in the work of the Emigrant Aid Society. His self-sacrificing activity, described by him in a letter to Fabius Mieses in 1887 as "a laborious striving which almost amounts to martyrdom," ended only with his life.

Most of Heilprin's literary work was anonymous; and his wide knowledge of history and geography, as well as his remarkable linguistic attainments (of which his extraordinary knowledge of Hebrew was but a part), and the consummate ability with which he treated political and even strategic questions in his articles, were therefore known only to those who were personally acquainted with him. The only work which bears his name is "The Historical Poetry of the Ancient Hebrews" (2 vols., New York, 1879–1880), in which he fully accepts the theories of modern Bible critics. A collection of "Bibelkritische Notizen," "printed as manuscript," with a preface by Rabbi B. Szold (Baltimore, 1893), contains comparisons of various passages of the Bible.

HEILPRIN, PHINEHAS MENDEL: Polish Hebraist; born in Lublin Nov., 1801; died in Washington, D. C., Jan. 30, 1863. Trained in the study of the Talmud and its commentaries, his critical mind was attracted by the writings of Maimonides. After mastering the Arabic and the Greek philosophy of the Hebrew sages, he became a diligent student of modern German philosophy. He married early, and established himself as a cloth-manufacturer and wool-merchant in Piotrkow. He removed in 1842 to northern Hungary, but left that country after the failure of the Revolution of 1848, in which his eldest son, Michael, took part. He went to the United States in 1859, finally making Washington his home.

Heilprin was a fine example of the old-style scholarly merchant. He was the lifelong friend of Isaac Mieses, who resided in Piotrkow in his younger days; and he often visited S. L. Rapoport and other Jewish scholars. Jost knew and honored him "als ein Mann von tüchtiger Gesinnung" ("Orient, Lit." 1845, No. 1). His chief work, which, like almost all his writings, is directed against the Judæo-German reformers, is "Teshubot be-Anshe Awen" (Frankfort-on-the-Main, 1845); it is a sane and broad argument against the position of the reformers, especially on the questions of marriage and divorce, and although the author is very personal in his attacks, especially on Holdheim, the work is probably the fairest of that nature written in Hebrew.

This work called forth a protest ("Toḳef ha-Talmud," Ofen, 1848) from an ultra-Orthodox rabbi of Hungary, Isaac Ẓebi Margareten. In the preface he declares that Heilprin, whose work is "well thought of in this vicinity," admitted too much, and weakened the case of the conservatives by his suggested emendations of the text of the Talmud. Phinehas Mendel is not known to have replied. His other works are: "Eben Boḥan," on Maimonides; "Bi'ur Millot ha-Higgayon," on logic; "Sekel Ṭob" (Frankfort-on-the-Main, 1846), a criticism on Geiger's edition of the "Ḳobeẓ Wikkuḥim"; "Derek Yesharah," on the proper treatment of the Talmudical text by critics ("Bikkurim," i. 96-103, Vienna, 1864), which is supposed to be the introduction to a large work against irresponsible critics. In "Orient, Lit." 1845, No. 1, an article written by him precedes Jost's review of his "Teshubot be-Anshe Awen."

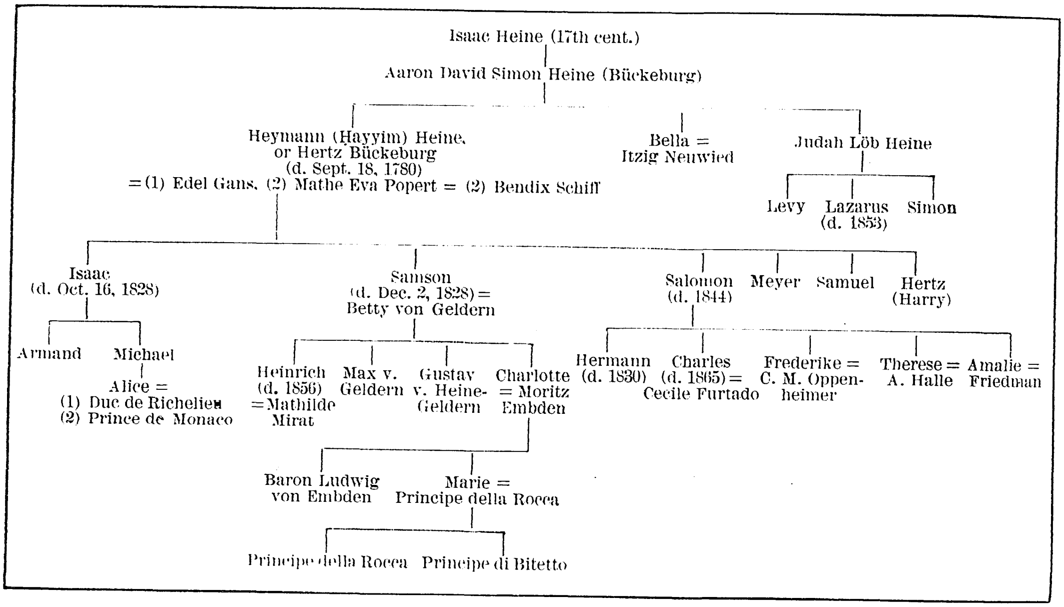
HEIM, MICHAEL: Austrian jurist; born Aug. 18, 1852, at Jakosič, Slavonia. He studied law at the University of Vienna (1871-75), and became royal assistant attorney ("Staatsanwaltsubstitut") at the court of Essegg (1883-90) and district judge at Brod-on-the-Saave (1890-98). In 1898 he was appointed attorney-general, a rare distinction for a Jew in Austria. On Aug. 24, 1903, he was appointed first president of the royal tribunal of Mitrovicz.

S. H. E. K.

HEINE: The family made illustrious by the poet can be traced back on the father's side to one Isaac Heine (Hehne), who lived at Bückeburg in the electorate of Hanover, and visited the Leipsic fair in 1697. The following sketch pedigree gives his chief descendants:



Isaac Heine (17th cent.)
Aaron David Simon Heine (Bückeburg)
Heymann (Ḥayyim) Heine, or Hertz Bückeburg (d. Sept. 18, 1780) =(1) Edel Gans, (2) Mathe Eva Popert = (2) Bendix Schiff
Bella = Itzig Neuwied
Judah Löb Heine
Levy
Lazarus (d. 1853)
Simon
Isaac (d. Oct. 16, 1828)
Samson (d. Dec. 2, 1828) = Betty von Geldern
Salomon (d. 1844)
Meyer
Samuel
Hertz (Harry)
Armand
Michael
Alice = (1) Duc de Richelieu (2) Prince de Monaco
Heinrich (d. 1856) =Mathilde Mirat
Max v. Geldern
Gustav v. Heine-Geldern
Charlotte = Moritz Embden
Hermann (d. 1830)
Charles (d. 1865) = Cecile Furtado
Frederike = C. M. Oppenheimer
Therese = A. Halle
Amalie = Friedman
Baron Ludwig von Embden
Marie = Principe della Rocca
Principe della Rocca
Principe di Bitetto

Genealogical Tree of the Heine Family.

HEINE, EPHRAIM VEITEL. See Ephraim, Veitel-Heine.

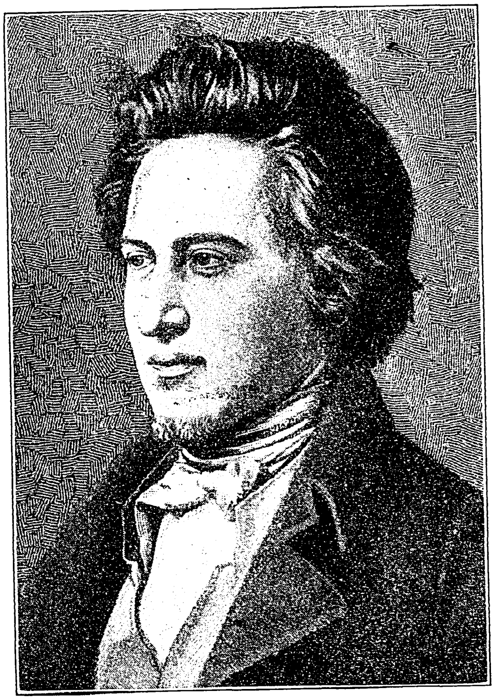
HEINE, GUSTAV, FREIHERR VON GELDERN: Austrian publicist; born June 18, 1812, at Düsseldorf; died Nov. 15, 1886, at Vienna: brother of Heinrich Heine. On completing his preliminary education at Hamburg he studied at the universities of Halle and Göttingen. He first engaged in agriculture, then in business, and then entered the Austrian army, rising to the rank of first lieutenant. In 1847 he founded in Vienna "Das Fremdenblatt," a periodical that became the official organ of the Austrian Foreign Office. In 1867 the Order of the Iron Crown of the third class was conferred upon Heine; and soon afterward he was knighted. In 1870 he was elevated to the rank of "Freiherr," with the cognomen "Geldern," his mother's family name.

One of his sons, **Maximilian Heine,** writes under the name of "Heldern," and is the author of the libretto to the operetta "Mirolan."

Bibliography: *Fremdenblatt*, Nov. 16, 1886; Embden, *Heinrich Heine's Familienleben*, p. 65, Hamburg, 1892; Eisenberg, *Das Geistige Wien*, p. 197.

S. B. Te.

HEINE, HEINRICH (after baptism, **Christian Johann Heinrich Heine**; among his family, **Harry**): German lyric poet and essayist; born at Düsseldorf Dec. 13, 1797; died in Paris Feb. 17, 1856; son of Samson Heine and Betty von Geldern. Though named after his father's brother Hertz, he was chiefly influenced in his early days by his mother and her uncle, Simon von Geldern, a curious mixture of traveler, "schnorrer," and adventurer. His father left his education to his mother, Betty von Geldern, who, touched by the new ideas of the French Revolution, and something of a freethinker, had him educated in a desultory manner by equally freethinking Jesuits and French refugees. There is little evidence that he had any specifically Jewish education, though he records in his "Memoirs" that he learned to conjugate the Hebrew verb "paḳad." As he also refers to the root "ḳaṭal," it is probable that he had to relearn Hebrew later from Gesenius. The time of his youth was the most favorable the German Jews had seen, owing to the influence of Napoleon, and Heine was always conscious of, and grateful for, the Jewish emancipation due to him.



Heinrich Heine.

Early Influences.

At the age of seventeen, in 1815, he was sent to Frankfort to try his fortune in a banker's office, where for the first time he became aware of the restrictions by which Jews were oppressed in the German cities. At first he could not bear it, and went back to Düsseldorf; the next year he went to Hamburg to enter the office of his uncle, Solomon Heine, who was becoming one of the chief merchants of that city. The office-work proving distasteful to him, he ventured to set up in business for himself in 1818, but failed. Meanwhile the most important influence upon his life came through his frustrated love for his cousin Amalie, which brought out some of the tenderest, and, when he was thwarted, some of the most cynical, strains of his muse. When Solomon Heine found that his daughter was likely to be entangled with her cousin, who had shown no capacity for business, a rigid embargo was put upon any intercourse between Heine and the young girl, who shortly afterward, in 1821, married J. Friedländer of Absinthhein. Perhaps as a kind of compensation, his uncle sent Heine in 1819 to study law at Bonn and afterward at Göttingen, whence he was rusticated; going next to Berlin, he came under the influence of the Hegelians. Here his first volume of poems appeared, and here for the first time he came in contact with real Jewish influences. He became a member of the circle around Rahel, and in the household of Veit became acquainted with Moser, Gans, Dr. Rosenheim, Daniel Lessmann, and Joseph Lehmann. He also visited the Mendelssohns, and at Chamisso's house became acquainted with Hitzig (Embden, "Family Life," pp. 44-47, New York, 1892). He came in touch with Zunz and his followers, and by them was drawn into the circle which was attempting to create Jewish science by the Verein für Cultur und Wissenschaft des Judenthums. When the "Zeitschrift" appeared, Heine complained of its German ("Briefe," ed. Karpeles, p. 117).

The chief influence, however, was exercised by Moses Moser, whom Heine somewhere calls a supplement to "Nathan the Wise." They, with Ludwig Marcus and Emanuel Wolf, were inspired by the idea of uniting modern culture and ancient Judaism, and Heine joined eagerly in their enthusiastic hopes, which were, however, destined soon to be frustrated. In the reaction many of the members of the Verein submitted to baptism, which at that time was the only key to an official career in Prussia. The effect on Heine was rather to divert his attention from Jewish matters to German literature, and from 1822 to 1827 he produced a series of poems and sketches of travel which practically placed him at the head of German literature, culminating as they did in the "Buch der Lieder," one of the most exquisite volumes of lyric verse produced by a German poet. Much, however, that he wrote was offensive to the bourgeois and the bureaucracy of Prussia, but the coarseness of the suggestions was often redeemed by the piquant style in which they were put forth, and his light shafts of satire managed to pierce the most pachydermatous of mortals. His wit was essentially Jewish, and was clearly derived from the Berlin circles in which he had recently moved. It was while under their influence that he attempted his sole effort at a romance in his "Rabbi von Bacharach," a historical romance of the Middle Ages dealing with the persecution of the Jews by the Crusaders; it was unfortunately left unfinished.

His Conversion.

Meanwhile the question of a livelihood had forced him to take up the problem of his continued formal connection with the Jewish community. The example of Eduard Gans had shown him the hopelessness of expecting an academic career for a professing Jew. Defiantly yet reluctantly he determined on nominally changing his faith, and was received into the Protestant Church (June 28, 1825) as a preliminary to his LL.D. at Göttingen and to his career at the Prussian bar. He himself did not attempt to disguise the motives which led to this renunciation He declared that he was "merely baptized, not converted." In writing to Moser he said:

> "From my way of thinking you can well imagine that baptism is an indifferent affair. I do not regard it as important even symbolically, and I shall devote myself all the more to the emancipation of the unhappy members of our race. Still I hold it as a disgrace and a stain upon my honor that in order to obtain an office in Prussia—in beloved Prussia—I should allow myself to be baptized."

Heine took a morbid pleasure in going to the temple at Hamburg to listen to Dr. Salomon preaching against baptized Jews. He was soon to learn that his sacrifice—if it was a sacrifice—was of little avail.

> "I am hated alike by Jew and Christian," he wrote, Jan. 9, 1826; "I regret very deeply that I had myself baptized. I do not see that I have been the better for it since. On the contrary, I have known nothing but misfortunes and mischances."

Almost immediately after his baptism he published his "Buch Le Grand" (1827), which was so revolutionary in tone and apologetic toward Napoleon, then in the depth of disrepute, that he considered it wise to await publication in England. The climate and the Philistinism of the England of those days were both repulsive to him, and he soon returned to Hamburg to produce his masterpiece, "Buch der Lieder." Despairing of any government employ from Prussian officials, he went to Munich, but found all attempts vain after the antinomian display he had made in the "Buch Le Grand." He accordingly went to Italy, and further irritated public opinion by the loose descriptions of his Italian adventures in his "Bäder von Lucca." After his father's death he produced the third volume of his "Reisebilder," the circulation of which was at once prohibited by the Prussian government, which showed clearly by this means its determination not to give him an official career. The French Revolution of 1830 found him, therefore, prepared to abandon his native land, and in May, 1831, he took up his permanent abode in Paris, where at that time his Jewish birth was rather an advantage than otherwise.

Mediator Between France and Germany.

The next eighteen years of his life were devoted in the main to a series of propagandist efforts which were Jewish in method if not in aim. Heine constantly strove to act the same part of mediator between French and German culture as the Spanish Jews had acted between the Christians and Moors of Spain. In particular he collaborated with Ludwig Börne, though not in direct association with him, in the attempt to create an intellectual party in Germany which would apply to German institutions and conceptions the freedom and force of French revolutionary ideas. By this means the two helped to create the party of "Young Germany" in literature and politics. At the same time he attempted to render the profundities of German thought accessible to the French public, and thus prepare the way for a closer sympathy between the minds of the two nations. During all this time he wrote little, if anything, dealing with Jewish subjects. His associates in Paris were by no means so exclusively Jewish as in Berlin and Hamburg: He was admitted to intimacy with Balzac, George Sand, Alfred de Musset, Alexandre Dumas, and, in fact, with all that was brilliant in French literature and art. Yet many of his most intimate friends were of the Jewish circle. Alexandre Weill, David d'Angers, A. Mels, A. Karpeles, the Oppenheims, the Friedlands, and to some extent the Paris Rothschilds, came into more or less intimate relations with him while he was able to go out into society.

Both Heine and Börne were particularly suited for the function they performed in transporting French ideas—or, rather, practical suggestions for carrying them out—to Germany, so rich in its own ideas, but hitherto with so little capacity for putting them into practise. As Jews, both were able to view the movements with a certain dispassionate detachment, and could disentangle the permanent from the transitory element in current events. Heine, however, was no revolutionist in act. He trusted to the influence of ideas rather than to any direct intermeddling in political affairs. This caused disagreement between himself and Börne, who attacked him virulently. Heine preserved silence during Börne's life, but after his death wrote an analysis of Börne's weaknesses. The exploit did Heine no credit, and brought upon him a duel with one Strauss, an admirer of Börne. Fears for the result of a duel led Heine to legitimate his relations to Mathilde Mirat (1841).

Heine supported himself partly by his literary efforts, partly by a pension from the French government, and to some extent by an allowance from his uncle Solomon Heine, which was continued after some bickerings by his cousin Charles, after Solomon's death, with a promise that the allowance should be continued to Madame Heine after the poet's death.

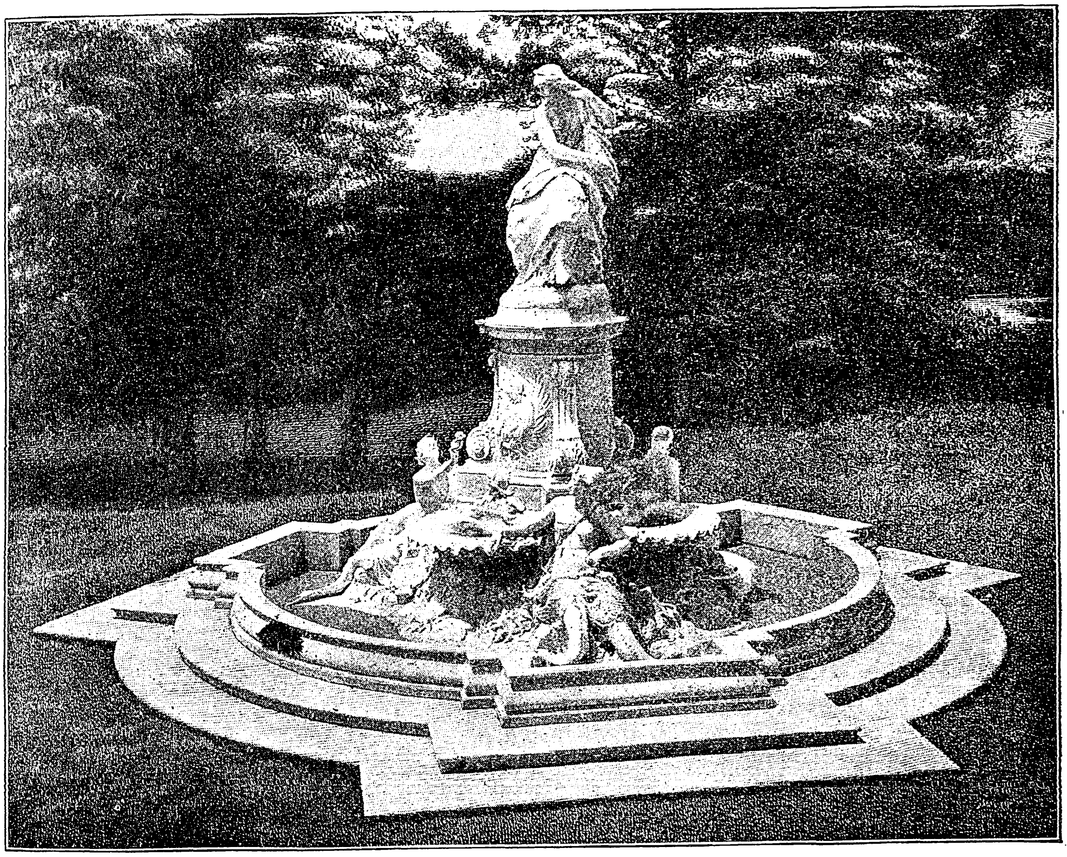
His "Mattress Grave."

About 1847 Heine was seized by the illness that ultimately brought him to a comparatively early grave. Whatever its nature, whether softening of the spinal cord, muscular atrophy, or locomotor ataxia, there can be little doubt that his irregular life had led to his neuropathic condition. After May, 1848, he never rose from his bed for over eight years, during which time, bravely bearing the most excruciating pain, he showed a heroic patience which redeemed in large measure the want of taste and dignity shown in his early attitude. His thoughts frequently turned back to the creed of his youth, and he often gave pathetic recognition of his appreciation of the finer sides of Judaism and of the Jewish people. In his "Romanzero" he gave what is still, perhaps, the most striking picture of Judah ha-Levi, derived doubtless from Michael Sachs's "Religiöse Poesie." The more irreverent "Disputation" showed that he was just as irreverent in dealing with sacred Jewish subjects as his enemies accused him of being toward Christianity. In his "Prinzessin Sabbath" he enshrined for all time the sublimer sides of Jewish home-worship.

It was while on his "mattress grave" that Heine gave utterance to his most penetrating comments on matters Jewish:

On Bible and Jews.

"The Jews may console themselves for having lost Jerusalem, and the Temple, and the Ark of the Covenant, and the golden vessels, and the precious things of Solomon. Such a loss is merely insignificant in comparison with the Bible, the imperishable treasure which they have rescued. If I do not err, it was Mahomet who named the Jews 'the People of the Book,' a name which has remained theirs to the present day on the earth, and which is deeply characteristic. A book is their very fatherland, their treasure, their governor, their bliss, and their bane. They live within the peaceful boundaries of this book. Here they exercise their inalienable rights. Here they can neither be driven along nor despised. Here are they strong and worthy of admiration. Absorbed in the city of this book, they observed little of the changes which went on about them in the real world: nations arose and perished; states bloomed and disappeared; revolutions stormed forth out of the soil; but they lay bowed down over their book and observed nothing of the wild tumult of the times which passed over their heads."



HEINE MEMORIAL, NEW YORK.
(From a photograph.)

After a brilliant reference to Moses as a remarkable artist, since he created that masterwork "Israel," he continues:

"As it was with the artificer, so was it with his handiwork, the Jews. I have never spoken of them with sufficient reverence, and that, of a truth, on account of my Hellenic temperament, which was opposed to Jewish asceticism. My preference for Hellas has since then decreased. I see now that the Greeks were merely handsome striplings. The Jews, however, have always been men, strenuous and full of power, not only at that time, but even at the present day, in spite of eighteen hundred years of persecution and misery. I have since then learned to value them better, and, if every kind of pride of birth were not a foolish contradiction in a champion of revolution and democratic principles, the writer of these pages might be proud that his ancestors belonged to the noble House of Israel, that he is a descendant of those martyrs who have given to the world one God and a moral law, and have fought and suffered in all the battle-fields of thought."

That contrast between the Hellenic and the Hebraic influences in civilization was a favorite one with Heine, and led him on one occasion to refuse to consider Christians as essentially different from Jews, the slight difference between them being distinguished by calling Christians "Nazarenes."

"Hellene" and "Hebrew."

"I say 'Nazarene,' in order to avoid the use of either 'Jewish' or 'Christian,' expressions which are for me synonymous, for I use them to characterize only a nature, not a religious belief. 'Jewish' and 'Christian' are with me entirely synonymous terms, as contrasted with the word 'Hellenic,' with which word I signify no definite people, but a certain direction of spirit and manner and intuition, the result of birth as well as education. In this relation I may say all men are either Hebrews with tendencies to asceticism and to excessive spiritualization and with a hatred of the plastic, or Hellenes, with cheerful views of life, with a pride in self-development and a love of reality."

This conception was later on taken up by Matthew Arnold, and formed the basis of his theory of culture as stated in his "Culture and Anarchy." It is probably at the root of Heine's argument for Jewish emancipation, which is mainly based, as will be discerned, on the claims of Jews to represent the religious or Hebraic principle in civilization.

On Jewish Emancipation.

"This emancipation will be granted, sooner or later, out of love of justice, out of prudence, out of necessity. Antipathy to the Jews has no longer a religious ground with the upper classes, and it is transformed more into social spite against the overpowering might of capital, against the exploitation of the poor by the rich. Hatred of the Jews has, indeed, another name with the people. As for the government, it has at last arrived at the intelligent view that the state is an organic body which can not attain perfect health so long as one of its limbs, were it only the little toe, is in inflammation. . . . Jewish disabilities are just corns on the feet of the German state. And did governments but consider how horribly the spinal column of all religions, the idea of deism itself, is threatened by the new doctrines—for the feud between science and faith will be no longer a tame skirmish, but soon a wild battle to the death—did governments consider this hidden necessity, they would be grateful that there are yet Jews in the world, that the 'Swiss Guard of Deism,' as the poet has called them, yet stands on its legs, that there exists still a 'people of God.' Instead of endeavoring to make them abjure their faith by legislative penalties, they would rather endeavor to keep them therein by offering them rewards; they would build up their synagogues at the cost of the state on condition only that they make use of them, that the people outside may know there is yet some faith in the world. Abstain from spreading baptism among the Jews: that is merely water, and dries up rapidly. Rather encourage circumcision—that is, faith by incision in the flesh: in the spirit such incisions are no longer possible. Hasten on, hurry on, the emancipation, that it come not too late, and while Jews are yet to be found in the world who prefer the faith of their fathers to the welfare of their children."

Heine's high opinion of the ethical value of Jewish history during the last two thousand years is expressed in the following passages:

"The Jews were the only individuals who preserved their spiritual freedom in the Christianization of Europe."

"Jewish history is beautiful, but the later Jews injure the old, whom one would set far above the Greeks and Romans. I think if there were no more Jews, and it were known that a single example of this race existed anywhere, people would travel a hundred leagues to see him and to shake hands; and now people turn out of our way!"

"The story of the later Jews is tragic: yet, if one wrote a tragedy on the subject, one would be laughed at—which is the most tragic reflection of all."

"The Jews have had highly civilized hearts in an unbroken tradition for two thousand years. I believe they acquire the culture of Europe so quickly because they have nothing to learn in the matter of feeling, and read only to gain knowledge."

It was during his latter days that he gave utterance to that most profound of judgments on the Jewish character:

"Jews, when they are good, are better, and, when they are bad, are worse, than Gentiles";

and the bitterest of all sayings about Judaism:

"Judaism is not a religion; it is a misfortune."

In his last will he declared his belief in an Only God whose mercy he supplicates for his immortal soul.

In considering Heine in his relations to Judaism, to which aspect of his career the present sketch has been confined, it must be recognized that his earlier training and environment did not tend to encourage him to devote his great powers to the service of his race and religion. Except for the few years at Berlin, he does not appear to have come under any specifically Jewish influence of a spiritual kind; yet the Berlin influence was deep enough to stamp his work with a Jewish note throughout his life. His wit and his pathos were essentially Jewish. His mental position as a Jew gave him that detachment from the larger currents of the time which enabled him to discern their course more clearly and impartially. His work as a journalist, while largely influenced by French examples, was in a measure epoch-making in German-speaking countries, and he was followed by numbers of clever Jewish newspaper writers, who gave a tone to the feuilleton of central Europe which it retains at the present day. In almost all aspects of his prose work he was Jewish to the core; only in his verse was the individual note predominant.

Heine's Jewish birth has not been without influence on his reputation even after death. For a long time historians of German literature refused to admit his significance, owing in a large measure to Chauvinistic and religious prejudices. When an attempt was made in 1897 to erect a memorial to the poet in Düsseldorf, his native place, permission was refused by the government on the ground of Heine's anti-German utterances. The memorial that had been made for the purpose was accordingly offered to the municipality of New York, which has placed it on Mott avenue and 161st street. It is commonly known as the Heine or Lorelei Fountain.

S. J.

HEINE, MAXIMILIAN: German physician; youngest brother of Heinrich Heine; born at Düsseldorf (1805 according to Embden; Strodtmann gives 1807); died at Berlin Nov. 6, 1879. He was educated at the gymnasia of Düsseldorf and Lüneburg and at the universities of Berlin and Munich, graduating (M.D.) in 1829. In that year he joined the Russian army as surgeon; he took part in General Diebitsch's march over the Balkans in 1830, and in the suppression of the Polish uprising in 1832. Returning to Russia, he settled in St. Petersburg and was appointed surgeon to the military school. Upon his resignation from the army he received the title of "councilor of state."

With Thielmann and Knebel, Heine founded the "Medizinische Zeitung Russland's," a journal which appeared from 1844 to 1859, and which he edited. He is the author of: "Medico-Topographische Skizze von St. Petersburg," St. Petersburg, 1844; "Beiträge zur Gesch. der Orientalischen Pest," *ib.* 1846 (containing a description of the pest at Odessa); "Fragmente zur Gesch. der Medizin in Russia," *ib.* 1848; "Reisebriefe eines Arztes," *ib.* 1853. Heine also wrote works of a more distinctively literary character, among them being: "Skizze von Gretsch"; "Die Wunder des Ladoga Sees"; "Bilder aus der Türkei"; "Briefe von St. Petersburg"; "Gedichte."

These essays excited only a passing interest, and little more can be said for his eagerly expected but sadly disappointing "Erinnerungen an Heinrich Heine und Seine Familie," Berlin, 1868.

S. F. T. H.

HEINE, SOLOMON: German merchant and philanthropist; born in Hanover 1767; died in Hamburg Dec. 26, 1844. Going to Hamburg when he was sixteen and practically penniless, by 1797 he had become one of the chief members of the banking firm of Heckscher & Co., with which he continued until 1819, when he established an independent business which grew to be one of the most important banking firms in Europe. He extended his operations far and wide, especially devoting himself to dealing in foreign loans and stocks. Having his capital in so many different undertakings, he was not embarrassed by the crisis of 1825, nor even by the great fire at Hamburg in 1842, when he checked a panic by offering a million thalers on the loan market. Toward the loan for rebuilding the city, which amounted to 32,000,000 thalers, he contributed no less than 8,000,000; while he donated the insurance paid on his own mansion, which had been burnt down, to the fund raised to repair the damage caused by the fire. He was a munificent contributor toward all Hamburg charities, and built a Jewish hospital still known by his name. He was an enthusiastic supporter of the movement for the emancipation of the Jews, and left directions that any Jewish institution to which his heirs might contribute should be thrown open to all persons, without distinction of creed, when the Jews of Hamburg should be emancipated.

He assisted his nephew, the poet, with a subvention of 6,000 francs per annum during his life in Paris, and left him a legacy of 16,000 francs, though Solomon is reported to have died worth 30,000,000 francs. His son Charles increased this fortune and left no less than 65,000,000 francs.

HEINEFETTER, KLARA (Madame Stöckl): German singer; born at Mayence Feb. 17, 1816; died at Vienna Feb. 24, 1857. In 1829 she accompanied her eldest sister, Sabine, to Paris, where the latter sang at the Italian opera with Sontag and Malibran. Malibran made a deep impression on Klara, who decided to devote her life to art. She remained another year at Paris with her sister, and as the latter, on the invitation (Nov., 1831) of Duport, director of the Vienna Imperial Opera, went to the Austrian capital, Klara followed and obtained an engagement at the same theater. Her début as *Agathe* in Weber's "Freischütz" was so successful that she secured an engagement for three years.

In 1836 she accepted the invitation of the director of the Royal Opera at Berlin, Count Spontini, to star. Spontini made every effort to keep her in Berlin, but she decided to sign a contract with the director of the Court Theater, Mannheim, to appear in that city. Thence she went to Budapest, where she married (June 27, 1837) the well-known actor, Franz Stöckl of the Vienna Imperial Opera, at which theater, a short time afterward, she resumed her former position, singing in the operas of Gluck, Weber, Spontini, and Mozart. She starred in Budapest, Prague, Hamburg, and Hanover. Her *Valentine* in "Les Huguenots" provoked an indescribable enthusiasm, and the Queen of Hanover, who attended the play, sent the singer a valuable bracelet as a souvenir. In 1840 (June 19) she sang for the first time in London, as *Jessonda*, at St. James Theater, under the direction of Schumann, and her success was so great that she immediately obtained an engagement for the following year. In 1841 she sang at Drury Lane Theater for sixty-three evenings. In Oct., 1843, Mme. Stöckl visited her sister at Vienna; and then the Imperial Opera succeeded in concluding an engagement with her for three and a half years. During this time she made short starring tours to Budapest, Gratz, and Munich. Her greatest success was as *Lucrezia* in "Lucrezia Borgia," then (Nov. 24, 1843) given for the first time in the German language. Donizetti, who was at the time on a visit to Vienna, was so impressed with Mme. Stöckl's performance that he decided to give his opera "Dom Sébastien," on which he was at work, to the Vienna Opera, on condition that Mme. Stöckl should sing the part of *Zayda*. The opera was produced Feb. 6, 1845, under the personal direction of Donizetti; and this was the climax of the singer's career. Like her sister Sabine, Mme. Stöckl died insane.

Her other sisters, **Kathinka** (born 1820; died Dec. 20, 1858), **Fatima, Eva,** and **Nanette,** were also singers of no little importance. Kathinka made her début in 1840 at Paris; went in 1842 to Brussels; returned in 1850 to Paris; starred at Hamburg, Berlin, Vienna, and Budapest; and finally settled at Freiburg-im-Breisgau.

S.

HEINEFETTER, SABINE: German soprano opera-singer; born Aug. 19, 1809, at Mayence; died insane Feb. 18, 1872, at Illenau, Baden. Beginning life as a strolling harpist, she was noticed by a Frankfort musician, who instructed her in music. She afterward (1825) studied under Spohr at Cassel, and under Tadolini in Paris. In 1829 she sang at the Paris Italian opera with Sontag and Malibran, and in 1835 accepted an engagement at the Dresden court theater. Her success in Berlin, Vienna, Milan, and other cities was remarkable, her chief rôles being *Romeo*, *Anna Bolena*, *Norma*, and *Rosine*. In 1844 she appeared for the last time at Frankfort. In 1853 she married a French merchant, Marquet, in Marseilles.

S.

HEINEMANN, HEINRICH: German actor; born at Bischofsburg, East Prussia, Sept. 15, 1842. After graduating from the Friedrich-Wilhelm gymnasium, Berlin, he went on the stage, making his début in Breslau in 1864. After a short stay at Flensburg he acted in Königsberg (1865-67), Würzburg (1867–69), Breslau (1869–71), Vienna (1872–74), and Breslau (1874–78). Since 1878 he has been engaged at the Court Theater at Brunswick.

Heinemann plays principally serious and comic character rôles, *e.g.*, *Malvolio*, *Zettel*, *Vansen*, *Thimoteus Bloom*, *Bolzau*, *Der Geizige*, and *Der Eingebildete Kranke*. He has also been very successful as a playwright, more than thirty plays having been written by him. Among these are: "Der Schriftstellertag"; "Herr und Frau Doktor"; "Auf Glatter Bahn"; "Die Zeisige"; "Das Tägliche Brot"; "Die Letzte Lüge"; and "Echo."

Bibliography: Eisenberg, *Biog. Lex.*

S. F. T. H.

HEINEMANN, JEREMIAH: German author; born at Sandersleben July 20, 1778; died in Berlin Oct. 16, 1855; son of Rabbi Joachim Heinemann. In 1808 he was appointed secular member of the consistory of Westphalia. On the dissolution of that body he acted in Berlin as inspector of a teachers' seminary, which had but a short existence, afterward he became the principal of a school, and finally devoted himself entirely to literary work.

From 1817 he published "Jedidja," a "religious, moral, and pedagogical periodical," of which eight volumes were issued (Berlin and Leipsic) up to 1831, and which subsequently appeared as "Neue Folge" (Berlin, 1833), and still later under the title "Allgemeines Archiv des Judenthums: Zeitschrift für Religion, Kultus, Geschichte, und Literatur" (Berlin, 1842–43).

Of Heinemann's works the following may be mentioned: "Katechismus der Jüdischen Religion," Rödelheim, 1812; "Grundlehren der Religion der Israeliten," Berlin, 1818; "Leitfaden zum Unterrichte in der Religion der Israeliten," *ib.* 1819; "Almanach für die Israelitische Jugend," *ib.* 1818–20; "Taschenbücher zur Belehrung der Jugend," *ib.* 1818–20. Heinemann developed, besides, great activity as translator of the liturgy and of some parts of the Bible. Thus he prepared a new edition of the Pentateuch, with Moses Mendelssohn's translation and a brief commentary of his own, "Bi'ur la-Talmid" (*ib.* 1831–33); "Der Prophet Jesaia," a German translation of Isaiah, with a commentary (*ib.* 1842); a new edition of the festival prayers, with a German translation by Moses Pappenheimer and others (Leipsic, 1840–41); and compiled a prayer-book for the use of women in the synagogue (*ib.* 1838), to which he added a "Hebräisch-Deutsches Kursorisches und Alphabetisches Wörterbuch" (1839–40).

Not without value is his "Sammlungen der die Religiöse und Bürgerliche Verfassung der Juden in den Preussischen Staaten Betreffenden Gesetze, Verordnungen, Gutachten, Berichte und Erkenntnisse" (Berlin, 1821–28; Glogau, 1831; Berlin, 1835).

His brother, **Moses Heinemann,** published a translation of Kohelet, with a grammatico-exegetical commentary (Berlin, 1831), and compiled, under the title "Die Betende Jüdin," a collection of prayers for women (*ib.* 1839).

HEIR. See Inheritance.

HEITLER, MORITZ: Austrian physician; born at Korompa, Hungary, March 21, 1847. He was educated at the gymnasia at Hódmezö-Vásárhely and Szegedin, and at the University of Vienna (M.D. 1871). From 1871 to 1876 he was assistant physician at the Allgemeine Krankenhaus at Vienna; he became privat-docent at Vienna University in 1876, and professor in 1898.

Heitler wrote the following articles: "Histologische Studien über Genuine Croupöse Pneumonie," in "Medizinische Jahrbücher," 1874; "Ueber Relative Schliessungsunfähigkeit der Herzklappen" (1880), "Ueber Akute Herzerweiterung" (1882), "Ueber Primäre Interstitielle Pneumonie" (1884), and "Zur Klinik des Icterus Catarrhalis" (1887), in "Wiener Medizinische Wochenschrift"; "Ueber die Thermischen und Mechanischen Einflüsse auf den Tonus des Herzmuskels," in "Centralblatt für die Gesammte Therapie," 1894; "Arhythmie Durch Reizung des Pericardiums," in "Wiener Klinische Wochenschrift," 1898; "Ueber Reflectorische Pulserregung," in "Centralblatt für Innere Medicin," 1901; etc. He also wrote "Ovid's Verbannung," Vienna, 1898.

HEKAL. See Ark of the Law; Temple.

HEKAL HA-'IBRIYYAH. See Periodicals.

HEKALOT RABBATI; HEKALOT ZUṬARTI: Two mystic writings attributed to Ishmael ben Elisha; indiscriminately referred to by the various names of "Sefer Hekalot," "Pirḳe Hekalot," "Pirḳe Rabbi Yishmael," "Pirḳe Merkabah," "Ma'aseh Merkabah," "Hilkot Merkabah." They are also quoted as the "Book of Enoch," and contain material found in that old apocryphon. They are based upon the remnants of the apocalyptic books of the mystic Essenes (see Apocalyptic Literature; Eschatology; Essenes) found in Mishnah (Ḥag. ii. 1) and Talmud. They originated, according to Hai Gaon ("Teshubot," No. 1), among the mystics of the geonic period known as the "Yorede Merkabah" (riders in the heavenly chariot), who, by asceticism and prayer, entered a state of ecstasy in which the heavens opened before them and disclosed their mysteries. These mysteries, and the means by which the "Merkabah-ride" can be achieved, are described in the "Hekalot Rabbati," of which thirty fragments have survived. It is not clear as yet what distinguishes the "Hekalot Zuṭarti" from the "Hekalot Rabbati," as the former is known only through quotations by Hai Gaon and others.

The "Hekalot Rabbati" begins with praises of those found worthy to see the "Chariot-Throne" (צפית המרכבה). Nothing that happens or that is about to happen in the world is concealed from them. As the goldsmith distinguishes between precious and base metals, so can the Merkabah-riders distinguish between the pious and the wicked. Any wrong done them is severely punished. They are so exalted that they may not stand up before any save a king, a high priest, or the Sanhedrin. This is followed by a description of the Chariot-Throne and the terrors which the sight of it inspires, so that even the myriads of angels, who have it before their

Contents of "Hekalot."

eyes continually, are sometimes seized with an ecstatic trembling. Next comes a chapter on the martyrs during the persecutions of the Roman emperor Lupinus (Hadrian?), among whom were the Merkabah-riders Akiba, Neḥunya ben ha-Ḳanah, and Ishmael ben Elisha, the supposititious author of the work. This is followed by an enumeration of the angels, and of the formulas by which they can be invoked. A description of the seven heavenly halls ("hekalot") follows. Each hall is guarded by eight angels, whose names the author derives from activities associated with the name of God; for instance, Maṭaḳel ("Gracious God"), Baradel ("Hail God"). The door of the seventh hall is guarded by terrible warriors with drawn swords, whose eyes send forth stars of fire, and from whose mouths issues burning coal; there are also guards who ride on terrible horses, horses of blood and of hail, which consume rivers of fire.

The seeker of the mysterious Chariot-Throne gains these halls by formulas which have the virtue of compelling the angels to grant him admission. Meṭaṭron serves him as guide. To undertake the perilous Merkabah-ride one must possess all religious knowledge, observe all the commandments and precepts, and fast frequently. To enter the state of ecstasy in which the Merkabah-ride is taken, one must remain motionless, with the head between the knees, absorbed in contemplation, and murmuring prayers and hymns. The last chapters contain hymns of praise (each closing with the refrain "Thrice Holy!"); a conversation between God, Israel, and the angels about the mysteries, initiation into which confers instant wisdom; and an explanation of the mysteries of certain prayers and charms.

Influence.

The "Hekalot Rabbati," like the Shi'ur Ḳomah, the Book of Enoch, and other mystic writings of the geonic period, with which it is closely connected, contributed very little to the speculative system of the Cabala. It exercised, however, a great influence on the development of liturgical poetry, the Ḳedushah hymns being modeled upon the views found in this work. Eleazar Ḳalir is believed to have used it in the composition of the "Yoẓarot" for "Shabbat Sheḳalim." The "Hekalot Rabbati" was published, with additions by Joseph Gikatilla, under the title "Pirḳe Hekalot" (Venice, 1601; reprinted at Cracow, 1648, in the collection "Arze Lebanon"). It was republished, without Gikatilla's additions, by Jellinek ("B. H." ii. 41 *et seq.*, iii. 91 *et seq.*), and by Wertheimer in a separate edition, with some variations.

HELA. See Ela.

HELAM (חילם, חלאם): A place east of the Jordan where the Syrians under Hadarezer were defeated by David (II Sam. x. 16, 17). The Vulgate, following Aquila, and in consideration of the different spellings of the name in the two verses, renders חילם "their army." Helam may be identified with the Alamatha of Ptolemy, on the west of the Euphrates and near Nicephorium.

E. G. H. M. Sel.

ḤELBO: Amora who flourished about the end of the third century, and who is frequently mentioned in both Talmuds. It seems that Ḥelbo was at first in Babylon, where he studied under Huna, the head of the Academy of Sura, and that, like the other Babylonian amoraim, he was called "Rab" (Ned. 40a). Later he settled in Palestine, where he was ordained rabbi. He is mentioned as having spoken in the names of Abdima of Ḥaifa (Yer. Ber. iv. 4) and of Ḥama b. 'Uḳba (Yer. Meg. ii. 3). In Palestine he consulted on halakic matters R. Isaac Nappaḥa (Giṭ. 60a) and R. Samuel b. Naḥmani (B. B. 123a). Ḥelbo handed down a large number of haggadic sayings of Samuel b. Naḥmani. Ḥelbo is mentioned in the Talmud as a teacher of ethics, his sayings being delivered in the name of Huna. Among them may be quoted: "He who goes out of the synagogue must not take long steps"; "One should pay great attention to the Minḥah prayer"; "He who enjoys the banquet of a bridegroom without gladdening the latter commits a five-fold sin" (Ber. 6b); "He who sees a torn scroll of the Pentateuch must rend his garment in two places" (M. Ḳ. 26a). Ḥelbo also said, in the name of 'Ula, that he who sees the ruined cities of Judah must recite Isaiah lxiv. 9-10. In Gen. R. xliii., in the name of R. Eleazar, Ḥelbo is mentioned as a traditionist with R. Berechiah and R. Ammi. A Ḥelbo b. Ḥilfa b. Samḳaï is also mentioned (Gen. R. li.), who may be identical with the subject of this topic. Yer. Ber. vii. 1 contains a reference to a R. Ḥelbo b. Ḥanan.

HELD, ANNA: French comedienne; born Sept. 19, 1880, in Paris; educated at Fontainebleau. Her début was made in "Miss Helyett" at the Folies Manguy, Paris, Sept. 19, 1895. Since then she has appeared in many plays, her most successful parts having been *Mlle. Mars* in Jean Richepin's "Mam'-selle Napoleon," and *The Little Duchess* in the comedy of that name, with which she made a starring tour of the United States in 1903. In 1902 she married Florenz Ziegfeld, Jr., of Chicago, Ill.

BIBLIOGRAPHY: Private sources; in *Who's Who in America*, 1903, different dates for her birth and début are given.

A. A. P.

HELDAI (חלדי): **1.** Captain of the service of the Temple for the twelfth month in the time of David; a native of Netophah and a descendant of Othniel (I Chron. xxvii. 15). In the parallel list in I Chron. xi. 30 his name is given as "Heled." **2.** One of those who returned from captivity with Zerubbabel, and who, with others, gave Zechariah gold and silver for the making of crowns as memorials (Zech. vi. 10–14). In verse 14 the name is changed to "Helem"; the Peshiṭta gives "Holdai" and "Huldai."

E. G. H. M. SEL.

HELENA: Queen of Adiabene, wife of Monobaz I., and mother of Monobaz II.; died about 56 C.E. Her name and the fact that she was her husband's sister (Josephus, "Ant." xx. 2, § 1) show that she was of Greek origin. She became a convert to Judaism about the year 30. She was noted for her generosity; during a famine at Jerusalem she sent to Alexandria for corn and to Cyprus for dried figs for distribution among the sufferers from the famine (Josephus, *l.c.* § 5). In the Talmud, however (B. B. 11a), this is laid to the credit of Monobaz II.; and though Brüll ("Jahrb." i. 76) regards the reference to Monobaz as indicating the dynasty, still Rashi maintains the simpler explanation—that Monobaz himself is meant. The Talmud speaks also of important presents which the queen gave to the Temple at Jerusalem (Yoma 37a): "Helena had a golden candlestick [נברשת] made over the door of the Temple," to which statement is added (*ib.* 37b; Tosef. 82) that when the sun rose its rays were reflected from the candlestick and everybody knew that it was the time for reading the Shema'. She also made a golden plate on which was written the passage of the Pentateuch (Num. v. 19–22) which the high priest read when a wife suspected of infidelity was brought before him (Yoma *l.c.*). In Yer. Yoma iii. 8 the candlestick and the plate are confused. The strictness with which she observed the Jewish law is thus instanced in the Talmud: "Her son [Izates] having gone to war, Helena made a vow that if he should return safe, she would become a Nazarite for the space of seven years. She fulfilled her vow, and at the end of seven years went to Palestine. The Hillelites told her that she must observe her vow anew, and she therefore lived as a Nazarite for seven more years. At the end of the second seven years she became impure, and she had to repeat her Naziriteship, thus being a Nazarite for twenty-one years. R. Judah said she was a Nazarite for fourteen years only" (Nazir 19b). "R. Judah said: 'The booth [erected for the Feast of Tabernacles] of Queen Helena in Lydda was higher than twenty ells. The rabbis used to go in and out and make no remark about it'" (Suk. 2b).

When Helena died Monobaz II. caused her remains to be removed to Jerusalem, where they were buried in the pyramidal tomb which she had constructed during her lifetime, three stadia north of Jerusalem (comp. Eusebius, "Hist. Eccl." ii., ch. 12). The catacombs are now called the "Tombs of the Kings." A sarcophagus with the inscription צדה מלכתה, in Hebrew and Syriac, found some years ago, is supposed to be that of Helena ("C. I. S." ii. 156). See ADIABENE.

H. R. B. FR.

HELIODORUS: Treasurer or, according to II Macc. iii.7, R. V., chancellor of Seleucus IV., Philopator. At the instigation of Apollonius, Seleucus sent Heliodorus to Jerusalem to seize the treasure of the Temple. The high priest Onias resisted him, pleading that the money in the treasury was reserved for widows and orphans; but Heliodorus forced his way into the Temple. There he was stopped by the apparition of a horseman charging upon him, while two young men scourged him pitilessly. Heliodorus was carried out of the Temple insensible; and only by the offering of the high priest was he restored to consciousness. Heliodorus therefore left the treasure untouched, and returned to Seleucus with an account of his experience. Questioned by him as to whom he should next send to Jerusalem for the treasure, Heliodorus advised him to send his worst enemy, the enemy whose destruction he most desired (II Macc. iii. 7-iv. 1).

In IV Macc. iv. 1–15 substantially the same adventure is reported, with Apollonius in the place of Heliodorus. Appian ("De Rebus Syriacis," p. 45) states that in 175 B.C. Seleucus was murdered by Heliodorus, one of his courtiers (*τὶς τῶν περὶ τὴν ἀυλὴν*), who attempted to seize the Syrian crown. It can not be said with certainty that this was the same Heliodorus.

E. G. H. M. Sel.

HELIOPOLIS (ON): Egyptian city, whence came Poti-pherah, Joseph's father-in-law (Gen. xli. 45, 50; xlvi. 20). It is mentioned also in Ezek. xxx. 17, where the punctuation אָוֶן, Awen, is to be corrected to אוֹן, On. The versions render "Heliopolis" in all cases "Heliupolis." An addition in the Septuagint (Ex. i. 11) mentions Heliopolis among the cities built by the Israelites. The inscriptions, however, show that it was perhaps the most ancient of all Egyptian cities—certainly the most sacred about 3000 B.C. Its god, Atumu (Etôm), was then the most prominent of the many forms under which the sun-god appeared in Egypt (being identified especially with the setting sun), so that the city bore the name "house of the sun" (comp. the Greek "Heliopolis" and the equivalent Hebrew "Beth-shemesh"; Jer. xliii. 13 [doubted by Winckler, "Alttestamentliche Untersuchungen," p. 180, who considers "Beth" as an erroneous repetition of the final syllable of the word "maẓẓebot"]).

It is remarkable that sanctity is still attached to the sacred well and tree among the insignificant ruins near Maṭariyyah, a few miles north of Cairo, which are protected by Christianization of the old myths (whence the place had the earlier Arabic name "'Ain al-Shams" [fountain of the sun]). The temples, of which only one obelisk from the twelfth dynasty has been preserved, were famous for their size and beauty, as were the priesthood for their learning, for which they were praised by Herodotus. A trace of this respect may possibly be found in the Biblical mention of Joseph's Egyptian relatives. Politically, the city was never of importance, although it was the capital of the thirteenth nome of Lower Egypt. Its position near the caravan road from Syria seems to have given it great commercial importance; hence the numerous Jewish settlements in and around it, among which were Castra and Vicus Judæorum. It already had Canaanitish quarters about 1200 B.C. Therefore the Septuagint considered it as a Jewish place (see above); Juba, in Pliny, vi. 177, as Arabic. During the Roman period it diminished rapidly in population and importance; the Arabs found it deserted.

The hieroglyphic form is "'-n-w"; the Biblical pronunciation is attested also by the Assyrian "Unu" (Delitzsch, "Wo Lag das Paradies?" p. 318, where the identity is, however, disputed; comp. also "C. I. S." 102a, 2, for mention in a Phenician inscription).

J. W. M. M.

HELKATH HAZZURIM (חלקת הצרים): Name of the place where the combat between Joab's and Abner's men took place, in which all on both sides were slain (II Sam. ii. 16). It appears from the passage that the name means "the field of the sword-edges." The Septuagint translates "the field of those who lay in wait," reading הצדים, a form accepted by several of the modern critics. Thenius reads הצָרים ("the field of the adversaries").

HELKIAS. See Ananias, Son of Onias IV.

HELL. See Gehenna.

HELLENISM (from *ἑλληνίζειν*, "to speak Greek," or "to make Greek"): Word used to express the assimilation, especially by the Jews, of Greek speech, manners, and culture, from the fourth century B.C. through the first centuries of the common era. Post-exilic Judaism was largely recruited from those returned exiles who regarded it as their chief task to preserve their religion uncontaminated, a task that required the strict separation of the congregation both from all foreign peoples (Ezra x. 11; Neh. ix. 2) and from the Jewish inhabitants of Palestine who did not strictly observe the Law (Ezra vi. 22; Neh. x. 29). This separation was especially difficult to maintain when the victorious campaign of Alexander the Great had linked the East to the West. The victory was not simply a political one. Its spiritual influence was much greater. The Greek language became a common language for nearer Asia, and with the language went Greek culture, Greek art, and Greek thought. The influence thus exerted did not entirely drive out the local languages or the local civilization. The Hellenic spirit was itself profoundly modified by contact with the Orient; and out of the mingling of the two there arose a pseudo-Greek culture which was often different in spirit from the true culture of Hellas.

Except in Egypt, Hellenic influence was nowhere stronger than on the eastern shore of the Mediterranean. Greek cities arose there in continuation, or in place, of the older Semitic foundations, and gradually changed the aspect of the country. Such cities were Raphia, Gaza, Ascalon, Azotus, Jabneh, Jaffa, Cæsarea, Dor, and Ptolemais. It was especially in eastern Palestine that Hellenism took a firm hold, and the cities of the Decapolis (which seems also to have included Damascus) were the centers of Greek influence. This influence extended in later times over the whole of the district east of the Jordan and of the Sea of Gennesaret, especially in

Range of Hellenic Influence.

Trachonitis, Batanæa, and Auranitis. The cities in western Palestine were not excepted. Samaria and Panias were at an early time settled by Macedonian colonists. The names of places were Hellenized: "Rabbath-Ammon" to "Philadelphia"; "Ar-moab" to "Ariopolis"; "Akko" to "Ptolemais." The same occurred with personal names: "Ḥoni" became "Menelaus"; "Joshua" became "Jason" or "Jesus." The Hellenic influence pervaded everything, and even in the very strongholds of Judaism it modified the organization of the state, the laws, and public affairs, art, science, and industry, affecting even the ordinary things of life and the common associations of the people.

A glance at the classes of Greek words which found their way into the Hebrew and the Jewish-Aramaic of the period, as compiled by I. Löw (in S. Krauss, "Lehnwörter," pp. 623 *et seq.*), shows this with great clearness. The Hellenists were not confined to the aristocratic class, but were found in all strata of Jewish society (Wellhausen, "I. J. G." p. 194), though the aristocrats naturally profited more from the good-will of Hellenistic rulers than did other classes. The Jews thus became sharers in a world-culture if not in a world-empire. It was a denationalizing influence from the strictly Jewish point of view; this was the principal reason for the dislike which many Jewish teachers felt for things Hellenic. In addition to this, Hellenism in its Eastern dress was not always the Hellenism of Greece proper. It was in some respects a bastard culture. It led its new votaries to the highest flights of philosophy; but through the allegorical explanations which, coming from Stoicism, were applied to the Bible, especially in Alexandria, a real danger menaced the development of Jewish life and thought, the danger of Antinomianism (see Jew. Encyc. i. 630). By the introduction of Grecian art a door was opened to debauchery and riotous living; and though Judaism was hardly menaced by the introduction of direct idolatry, the connection of this culture with sublimated Greek polytheism became a real danger to the Jewish religion. This well-grounded fear inspired the rise of the Hasidæans and explains the change of sentiment on the part of the Rabbis toward the use of the Greek language (see Greek Language and the Jews). For this reason the Hellenists are called *υἱοὶ παράνομοι* ("wicked men"; I Macc. i. 11), or *ἄνδρες ἄνομοι καὶ ἀσεβεῖς* ("wicked and ungodly men"; *ib.* vii. 5). By some they are supposed to be referred to in Ps. i. ("sinners," "scoffers") and cxix. ("men of pride"); in Dan. xii. 10 ("the wicked"; comp. xi. 14, 32).

How early traces of Hellenism are to be found in Jewish literature can not be ascertained. It has been supposed by some that such traces are to be seen in Prov. viii., where Wisdom is described as the artist or master workman who, fashioned by God before the world, was ever by Him in His creative work (Montefiore, "Hibbert Lectures," 1892, p. 380); by others, that some of the universalist passages in Isaiah were inspired in this period; and the Book of Ecclesiastes has been suspected of containing Stoic and Epicurean doctrines, and even references to the teachings of Heraclitus. But these theories are open to much doubt; the influence of Greek philosophy and thought came in later. It is seen in some of the Apocrypha and in the writings of the Hellenistic Jews in Egypt (Cheyne, "Origin and Religious Contents of the Psalter," pp. 423 *et seq.*). The Greek words in Daniel prove nothing, as that book is generally conceded to be of Maccabean origin.

Reaction Against Hellenic Influence.

The work commenced by Alexander the Great was furthered by the first Ptolemies and Seleucids, who treated their Jewish subjects with much benevolence, though even at this time the high priest Onias III. fought bravely against the introduction of Hellenism. But the high-priestly family was divided owing to the intrigues of the Tobiads, especially of Joseph; and the high priests, instead of defending their patrimony, degraded it. Of such a kind were Menelaus and Jason, the latter of whom is said to have sent contributions to Hercules' games at Tyre, and to have built an arena in Jerusalem, which the priests were wont to frequent in place of the Temple (II Macc. iv. 13, 19). The introduction of the Greek games was peculiarly offensive to the religious party, not only because of the levity connected therewith, but also because Jewish participants were under the necessity of concealing the signs of their origin. This Hellenization might have gone much further had not Antiochus Epiphanes attempted to substitute pagan worship for Jewish. By so doing he brought on the Maccabean revolt, which bade fair to sweep the new influence off the field. It had, however, entered too deeply into the flesh to be entirely eradicated, though the newly aroused spirit proved an efficient control. There were still high priests who headed the Hellenist party. Such a one was Alcimus, who went to Jerusalem with Bacchides, at the head of the Syrian army sent by King Demetrius. Greek legends on Jewish coins became the rule after the days of Herod; specimens exist which date back even to the time of Alexandra Salome. The Hasmoneans Aristobulus and John Hyrcanus leaned also to the Hellenists. But it was especially with the advent of the Idumean Herod and his dynasty that Hellenism once more threatened to overwhelm Jewish culture. Herod's theater, his amphitheater, his hippodrome, and his palace, though such buildings existed also in Jericho, Tiberias, and Tarichæa, were thoroughly Greek buildings in the very midst of Jerusalem; his Temple also showed this influence in its architecture. The inscription forbidding strangers to advance beyond a certain point in the Temple was in Greek; and was probably made necessary by the presence of numerous Jews from Greek-speaking countries at the time of the festivals (comp. the "murmuring of the Grecians against the Hebrews," Acts vi. 1). The coffers in the Temple which contained the shekel contributions were marked with Greek letters (Sheḳ. iii. 2). It is therefore no wonder that there were synagogues of the Libertines, Cyrenians, Alexandrians, Cilicians, and Asiatics in the Holy City itself (Acts vi. 9).

It was, however, in Alexandria that Jewish Hellenism reached its greatest development. Here, freed from the national bonds which held it firmly to tradition in Palestine, Hellenistic Judaism became more Hellenistic than Jewish (see Alexandria).

At Alexandria.

It is not true to say with Güdemann ("Monatsschrift," xlvii. 248) that Hellenism had no appreciable influence upon the development of Judaism; its influence was appreciable for many centuries; but it was driven out of the Jewish camp by the national sentiment aroused in the Maccabean and Bar Kokba revolts, and in forming the bridge between Judaism and Christianity it lost whatever permanent influence it might have possessed. Since that time, even in Egypt, the classical home of Hellenism, rabbinical Jewish communities have flourished that have borne no perceptible trace of the movement which made Alexandria great.

The Hellenistic Jewish literature is the best evidence of the influence exercised by Greek thought upon the "people of the book." The first urgent need of the Hellenistic Jews in Alexandria was a Greek translation of the Hebrew Bible. The strange legends which are connected with the origin of this translation, and which go back to the Letter of Aristeas, are discussed under Aristeas and Bible; it is sufficient to say that the whole translation was probably completed by the middle of the second century B.C. It was highly esteemed by the Hellenistic Jews; Philo ("De Vita Moysis," ii., § 67) calls the translators not merely *ἑρμηνεῖς*, but *ἱεροφάνται καὶ προφῆται*, who partook of the spirit of Moses. Even the prejudiced Palestinian teachers accepted it and praised the beauty of the Greek language (Soṭah vii. 3; Meg. i. 9). They permitted girls to study it, and declared it to be the only language into which the Torah might be translated (Yer. i. 1). The Jews called themselves Palestinians in religion, but Hellenes in language (Philo, "De Congressu Quærendæ Erud." § 8), and the terms *ἡμεῖς* ("we") and *Ἑβραῖοι* ("the Hebrews") were contrasted (*idem*, "De Confusione Linguarum," § 26). The real Hellenes, however, could not understand the Greek of this Bible, for it was intermixed with many Hebrew expressions, and entirely new meanings were at times given to Greek phrases. On the other hand, Judaism could not appreciate for any length of time the treasure it had acquired in the Greek Bible, and the preservation of the Septuagint is due to the Christian Church, which was first founded among Greek-speaking peoples. The mother church did not altogether give up the Greek translation of the Bible; it merely attempted to prevent the Christians from forging a weapon from it. After the second century it sought to replace the Septuagint with more correct translations. Aquila, a Jewish proselyte, endeavored to put an end to all quarrels with the Christians by slavishly following the original Hebrew in his new translation; Theodotion, following the Septuagint, sought to revise it by means of a thorough collation with the original. As it became evident that the controversy could not be ended in this way, the Jews ceased to dispute with the Christians concerning the true religion, and forbade the study of Greek. They declared that the day on which the Bible had been translated into Greek was as fateful as that on which the golden calf had been worshiped (Soferim i.); that at the time when this translation was made darkness had come upon Egypt for three days (Ta'an. 50b); and they appointed the 8th of Ṭebet as a fast-day in atonement for that offense. Not only was the study of the Greek Bible forbidden, but also the study of the Greek language and literature in general. After the war with Titus no Jew was allowed to permit his son to learn Greek (Soṭah ix. 14); the Palestinian teachers unhesitatingly sacrificed general culture in order to save their religion.

Greek Versions of the Bible.

Hellenistic literature, however, was for the time being too great an intellectual factor to be entirely set aside in the Diaspora. No strong line of demarcation was drawn between the sacred books originally written in Hebrew and those written in Greek; because the former also were available only in Greek translations. Greek versions of various sacred books were accepted, such as the Greek Book of Ezra; as were also the Greek additions to Ezra and to the books of Esther and Daniel, the Prayer of Manasses, the pseudepigraphic Book of Baruch, and the Epistle of Jeremiah.

The Jews outside of Palestine were so different from the peoples among whom they lived that they were bound to attract attention. The Jewish customs were strange to outsiders, and their religious observances provoked the derision of the Greeks, who gave expression to their views in satiric allusions to Jewish history, or even in malicious fabrications. It was especially in Egypt that the Jews found many enemies in Greek-writing literati. Foremost among these was the Egyptian priest Manetho, at the time of Ptolemy II., Philadelphus (285–247 B.C.), who wrote a history of Egypt in Greek in which he repeats the fables current concerning the Jews. Josephus ("Contra Ap." ii., §§ 14, 36) and Eusebius ("Hist. Eccl." ix. 19) mention as an opponent of the Jews a certain Apollonius Molo. Fragments from the work of a certain Lysimachus dealing with the Exodus are mentioned by Josephus (*ib.* i., §§ 34–35), likewise a fragment by Cheremon (*ib.* i., §§ 32–33), an Egyptian priest as well as a Stoic philosopher, who also dealt, in his "Egyptian History," with the same subject. The most interesting, many-sided, and untrustworthy of all the opponents of the Jews in Alexandria was Apion, whose attacks were repelled by Josephus in the tract cited above.

Hellenistic Jewish Historians.

There were many Hellenistic Jews who went beyond the confines of their own literature and imitated the works of Greek writers in the domain of history and poetry. The most important historical productions of this kind are the fragments of Jewish and Samaritan historical works preserved by Alexander Polyhistor and by the Church Fathers Clement of Alexandria and Eusebius (see especially Freudenthal, "Hellenistische Studien," Nos. i., ii., Breslau, 1875). These histories were intended not only for Jews, but also for educated pagans who knew Greek. Following the example of Alexandrian chronologists, Demetrius, a Jew living in Egypt under Ptolemy II., wrote a work on the Jewish kings (*Περὶ τῶν ἐν τῇ Ἰουδαία Βασιλέων*. Clemens Alexandrinus, i. 21, 141). Although the fragments of this history that have been preserved deal chiefly with Jacob, Moses, etc., and contain no allusions to the Jewish kings, there are no grounds for doubting the correctness of the title. Demetrius cared less for facts than for the chronology of the several events which he treated, even as regards the life of Jacob. (For an excellent restoration of this text see Freudenthal, *l.c.* pp. 219–223, comp. pp. 35–82; Schürer, "Gesch." pp. 349–351; Hilgenfeld, in "Zeit. für Wissenschaftliche Theologie," 1897, xviii. 475.) The Judean Eupolemus is more concerned with narrating events in his book "On the Kings in Judea," fragments from which, intermingled with work by another hand, have also been preserved by Alexander Polyhistor. Though Eupolemus bases his narrative on the Biblical accounts, he draws upon other traditions, and also upon his imagination. The Egyptian Jew ARTAPANUS adopts the method of fabricating history that was popular at Alexandria. He transforms "Moses" into "Musæus," teacher of Orpheus, conqueror of the Ethiopians, and inventor of the hieroglyphics, of philosophy, and of many other things. All that is great and splendid in Egypt is ascribed to Moses, who appears as the greatest benefactor of that country. By this means the author sought to counteract the enmity which the Egyptians and the Greeks in Egypt showed toward the Hebrews; for this reason Moses is described as having founded the Egyptian religion, introduced circumcision among the Egyptians, divided the country into nomes, etc.

Historians.

The work "On the Jews," attributed to Aristeas, also aims to glorify Judaism in the eyes of the pagans; the story of Job is here told with many elaborations (*e.g.*, Job was formerly called "Jobab"; Gen. xxxvi. 33). This interpretation may be explained as due to the similarity in Greek between the two names. Fragments from two Samaritan historians have likewise been preserved by the Hellenists. Josephus ("Ant." i. 15) refers to a Samaritan (quoted also by Eusebius, "Præparatio Evangelica," ix. 20) who, under the name *Κλεόδημος ὁ προφήτης ὁ καὶ Μάλχος*, tells the story of three sons of Abraham and Keturah who joined Hercules in a campaign against Libya. Passages from another anonymous Samaritan chronicle were combined by Alexander Polyhistor with extracts from the work of Eupolemus, mentioned above. Freudenthal (*l.c.* pp. 82–103, 207 *et seq.*, 223–225), by separating these passages, which are preserved in Eusebius (*l.c.* ix. 17–18), has brought order out of confusion. Jason of Cyrene (the author of II Maccabees), the author of III Maccabees, and Philo of Alexandria must be included among the Hellenistic writers who treated of later Jewish history.

Jason of Cyrene, who, according to Niese, lived in the second century B.C., wrote a work in five books, from which the author of II Maccabees (taking his own statement in ii. 23–28) made extracts amounting in quantity to about one-fifth of the original. The historical portion proper of II Maccabees (ii. 19–xv. 39) narrates the history of the Jews from the end of Seleucus IV., Philopator's reign (175 B.C.) down to the victory of Judas Maccabeus over Nicanor (March, 160 B.C.); it covers, therefore, about the same period as I Maccabees, and the question of its trustworthiness has been sharply debated. Despite its rhetorical character, portions of it may still be used as authentic historical sources. It must have been written before 70 C.E. (though Niese's date, 125–124 B.C., seems quite improbable), since it presupposes that, at the time of its composition, the Temple was still standing. The rhetorical style of the Greek in which it is written precludes the probability of its being a translation from some other language. The two letters from Palestinian Jews which, inviting the Greeks to the celebration of Ḥanukkah, serve as an introduction to the book (i. 1–10a, i. 10b–ii. 18), have no connection otherwise with its contents, and were apparently added later (comp. Abrahams in "J. Q. R." xiii. 508 *et seq.*).

III Maccabees, a history merely in form, is a fictitious story. It recounts an alleged attempt of Ptolemy IV., Philopator to enter the Temple, and narrates that on being unsuccessful, he ordered a persecution of the Jews of Alexandria, although they were in no way responsible for the miscarriage of his plans. The persecution, however, came to naught, as two angels benumbed the power of the king and his army, while the latter was trodden under foot by its own elephants. The king thereupon relented in regard to the Jews, and permitted them to kill their faithless compatriots who had made it appear that his failure to enter the Temple at Jerusalem was chargeable to the Jews of Alexandria.

The philosopher Philo also belongs in a certain sense to the Hellenistic historians. He undertook the task of showing how God had constituted the world materially and spiritually through the Creation and the Law ("De Opificio Mundi"; comp. "De Abrahamo," i.; "De Præmiis et Pœnis," i.; "De Vita Moysis," ii., § 8), and through the history of the Patriarchs. He describes in five books, two of which, "In Flaccum" and "De Legatione," have been preserved, the persecution of the Jews under Caligula. By way of introduction he also treats of the persecutions by Sejanus in the reign of Tiberius.

Thallus wrote a chronicle of the world from the Creation down to about the time of Tiberius. He may be identical with the Samaritan Thallus mentioned by Josephus ("Ant." xviii. 6, § 4). Josephus, the foremost Jewish historian, must also be named here. His *Ἰουδαϊκὴ Ἀρχαιολογία* is a narrative of Jewish history from its beginning down to his own time. His object in writing this work in Greek was to win the respect of the educated Romans for the conquered Jewish people. His other large work, "De Bello Judaico," is an inflated and not always sincere account of his own experiences (see JOSEPHUS, FLAVIUS). His contemporary Justus of Tiberias dealt with the same subjects, but less successfully, and his works have therefore not been preserved.

In the field of poetry only the epic and the drama were cultivated, traces of which, but no fully developed products, are found in ancient Hebrew literature. The poem of a certain Philo, on Jerusalem (*Περὶ τὰ Ἱεροσόλυμα*), must be classed as an epic; but only three fragments of it (given by Eusebius, "Præparatio Evangelica," ix. 20, 24, 37) have been

Poetry.

preserved. These treat of Abraham, Joseph, and the fountains and conduits of Jerusalem, in hexameters that betray the author's complete ignorance of the laws of scansion. This Philo is probably identical with the φίλων ὁ Πρεσβύτερος mentioned by Josephus ("Contra Ap." i., § 23). Josephus takes him to be a pagan, but a pagan could hardly have written such slipshod hexameters. (On Philo's poem see Franz Delitzsch, "Gesch. der Jüd. Poesie," 1836, pp. 24, 209.) A similar poem on Shechem, by the Samaritan Theodotus, of which a long fragment has been preserved by Eusebius (*l.c.* ix. 22), recounts the history of the city according to the Bible, with various amplifications from other traditions and from Greek mythology.

There was also a dramatist named Ezekielus among the Hellenists, mentioned by Clement of Alexandria ("Stromata," i. 23, 155) and Eusebius (*l.c.* ix. 29, § 14). Under the title 'Εξαγωγή, extracts from a single work of his, dealing with the Exodus, have been preserved by the Church Fathers mentioned above. His power of imagination was very poor; and he appears to have depended chiefly upon the Bible for his material. The verse-form, however, is fairly good.

The Sibyllines.

Considering the chasm between the Jews and the pagans, it is remarkable with what zeal and cleverness the Hellenistic Jews sought under pagan masks to make propaganda for Judaism. They wrote works in the name of pagan authorities, and these stole their way into the circle of pagan readers. As forgeries of this kind were common in the Hellenistic period, no blame attached to any famous man for having committed them, and the Jews could not be expected to be superior to their time. The Sibylline Books are distinguished from all other works of this kind by their loftiness of purpose. It was their avowed object to reform paganism, while other contemporaneous works were merely intended to glorify the Jewish name; the former endeavored to act as Jewish missionaries, while the latter sought merely to make an impression. Collections of the Sibylline Oracles were kept in different places; they were an easy medium for religious propaganda, and Hellenistic Judaism, subsequently also Christianity, made clever use of them. The ancient Sibyl was made to address the pagans in Greek hexameters, threatening dire punishment for pagan idolatry and pagan vices, and promising forgiveness for repentance and conversion. The collection of the Sibyllines was made from the most diverse sources.

The earliest sentences, aside from a few pagan oracles, are chiefly Jewish in form, while most of the later ones are of Christian origin. The greater part of the fifth book of the Sibylline Oracles is probably of Jewish origin, with Christian interpolations that can not be in all cases distinguished. The dates which are assigned to some of the oracles vary between the first century C.E. and the time of Hadrian. It is difficult to distinguish the Jewish passages in books i.-ii., xi.-xiv. The Church Fathers quote an apocalyptic work belonging in this category, which they ascribe to the Median Hystaspes. Jewish and Christian apologists often quote verses by Greek poets that are marked by a pure religious insight. While some of these lines are genuine, and are merely cleverly interpreted, others are unmistakable forgeries. Most of them occur in the writings of Clement of Alexandria and in the pseudo-Justinian work "De Monarchia." Both authors drew from the same source, the work of Hecatæus on Abraham, as Böckh has shown. Schürer places these forgeries as early as the third century B.C. ("Gesch." i. 453-461).

Hecatæus of Abdera and Aristeas.

A work, "On the Jews," or "On Abraham," under the name of "Hecatæus of Abdera," is quoted by Aristeas, Josephus, Clement of Alexandria, and Origen. The book from which they quoted may have contained genuine extracts from this Hecatæus, traces of whose work are found in Diodorus Siculus. It appears from the extant fragments of the spurious work that the life of Abraham served as the point of departure for a glorifying description of Judaism. To this class also belongs the Letter of Aristeas to Philocrates on the Greek translation of the Jewish law. The letter probably originated about 200 B.C. (Schürer, "Gesch." i. pp. 466-473). It is difficult to form any opinions on the Ποίημα Νουθετικόν, assigned to the ancient gnomic poet Phokylides of Miletus (6th cent. B.C.). It includes, in 230 hexameters, maxims of various kinds, which, as far as their contents are concerned, closely follow the Old Testament, especially the Pentateuch; it contains even many verbal reminiscences of the Biblical commandments. Bernays assumed that the author was a Jew, but Harnack believes that he was a Christian. In general, the poem lacks both Jewish and Christian characteristics. If its author was a Jew he nevertheless avoided everything that might offend a pagan reader. It should be assigned rather to the first century C.E. (published with notes by Bergk, "Poetæ Lyrici Græci," 3d ed., iii. 450-475). A collection of maxims, ascribed to a certain "wise Menander," was published by Land (1862), from a Syriac manuscript in the British Museum; this must be classed with the Jewish Wisdom literature. Smaller, and probably of Jewish origin, are the so-called "Heraclitic Letters" (ed. Bernays, 1869), and a "Diogenes Letter" (in Bernays, "Lucian und die Kyniker," 1879, pp. 96-98; Schürer, *l.c.* pp. 478-483). On a freedman, Cæcilius of Calacte, probably of Jewish origin, who lived as rhetor in Rome, see Jew. Encyc. iii. 482.

Greek Philosophy in Jewish Garb.

Greek ethics cast in the mold of the Jewish Wisdom literature is presented in the Wisdom of Solomon. Solomon appears as the speaker, addressing a hortatory discourse to his royal colleagues who rule over the heathen peoples. He shows them the folly of impiety, and especially of idolatry, and exhorts them to follow true wisdom and to serve God. Although the author may have addressed himself principally to Jewish readers, yet the descriptions of the dangers of impiety and the folly of idolatry presuppose also a pagan audience, or one that included at least Jews who had adopted pagan practises. In his conception of Wisdom he follows Prov. viii. and ix. and

Ecclus. (Sirach) xxiv.; but Wisdom becomes in his hands an independent being, existing apart from the Deity, and, in a way, acting as the mediator between the divine activity and the world. The terms in which he describes this mediation show the influence of Greek philosophy, especially of Stoicism, recalling the doctrine of divine reason immanent in the world. The book follows the Platonic psychology, according to which the soul has an independent existence, living only for a time in the earthly house of the body, that crumbles again into dust. The author was probably an Alexandrian Hellenist who took up the thought that was subsequently further developed by Philo (see WISDOM, BOOK OF).

Although the author of the Wisdom of Solomon touches upon Greek philosophy, he yet remains within the limits of the Palestinian Wisdom literature.

Aristobulus.

But Aristobulus was a full-fledged Alexandrian, thoroughly acquainted with Greek philosophy and accepting it. He was a contemporary of Ptolemy VI., Philometor, living about 170–150 B.C. He wrote a voluminous work on the Mosaic laws, which was not a commentary but a free paraphrase of the text of the Pentateuch, together with a philosophic explanation of its laws. He directly addresses Ptolemy Philometor and an exclusively pagan audience. He undertakes to show that the Peripatetic philosophy was influenced by the Pentateuch and the Hebrew Prophets (Clement of Alexandria, "Stromata," v. 14, 97); he essays to prove that all the Greek philosophers and many Greek poets, as well as Aristotle, borrowed from the Pentateuch, and that the entire Greek culture is derived from the Old Testament. He especially endeavors to remove from the Old Testament conception of God the reproach of anthropomorphism by explaining the anthropomorphic allusions as symbols for spiritual relations. There is no reason for doubting the genuineness of this work of Aristobulus, as both older and more recent authorities have done, since it belongs both in thought and in expression to Hellenistic literature. The interspersed Greek verse, which is obviously spurious, but which Aristobulus certainly regarded as genuine, was inserted in agreement with a practise general in Hellenistic literature, so that its presence is no argument against the genuineness of the work (see JEW. ENCYC. ii. 97).

The Fourth Book of Maccabees.

The so-called Fourth Book of Maccabees contains a philosophical discourse which, on account of its edifying character, may also be called a sermon, although it was probably not delivered in a synagogue, its theme being a philosophical proposition. It derives its name from the fact that it refers to the execution of a mother and her seven sons, as related in II Macc. vii., and endeavors to prove by the principles of argumentation followed by Greek rhetoricians that pious reason is able to conquer all emotions. In his religious convictions the author is entirely a Jew. Although he uses the Greek terminology in unfolding his doctrine of God, his views are wholly Biblical.

The Church Fathers ascribe this work to Josephus, but the statement can not be accepted, as that author in his "Antiquities" does not draw upon II Maccabees as does the work in question. The book is assigned to the first century C.E. (J. Freudenthal, "Ueber die Flavius Josephus Beigelegte Schrift über die Herrschaft der Vernunft," Breslau, 1869).

C. S.—G.

HELLER, ISIDOR: Austrian author; born May 5, 1816, at Jung-Bunzlau, Bohemia; died at Arco, Tyrol, Dec. 19, 1879. He was studying to become a rabbi when (1837) his unsteady disposition drove him to France to join the French foreign legion. After many adventures he returned home, and received, on account of a novel in the magazine "Libussa," a call to Budapest to edit the magazine "Der Ungar." He, however, resigned this position in 1847, and joined the editorial staff of Gustav Kühnes' "Europa" at Leipsic.

Returning to Budapest in 1848, Heller became the editor of the "Morgenröthe," in which he especially opposed Kossuth's party in Hungarian politics, for which reason he was obliged to leave Hungary. He then went to Berlin, but was forced to leave the city in 1852 on account of his "Sendschreiben eines Oesterreichers an die Deutsche Nation," and he became private secretary to the Austrian minister, Baron Bruck, whom he accompanied to Constantinople.

Heller returned to Vienna in 1855, and in 1859 established the "Fortschritt." He was also one of the founders of the "Neues Fremdenblatt" (1864). Illness prevented further activity, and he lived the rest of his life in seclusion. Heller's works, at one time widely read, include: "Gänge Durch Prag"; "Das Judenbegräbniss"; "Der Zeitgeist" (Budapest, 1847); "Die Reaction" (Berlin, 1852); "Oesterreichs Lage und Hilfsmittel" (Leipsic, 1852); and "Memoiren des Baron Bruck" (Vienna, 1877).

S. L. V.

HELLER, JEHIEL B. AARON: Russian rabbi; born in Koidanov, government of Minsk, 1814; died at Plungian, government of Kovno, Nov. 14, 1861. He was a descendant of Rabbi Yom-Ṭob Lipmann Heller. Jehiel was successively rabbi at Glusk (1836–43), Volkovisk (1843–54), Suwalki, and Plungian (till his death). He was a noted preacher, and delivered sermons in pure German on various notable occasions.

He wrote the following works: "Shene Peraḳim leha-Rambam," or "Kebod Melek," on patriotism (this book was translated into German and published for the government by Dr. Leon Mandelstamm), St. Petersburg, 1852; "'Ammude Or," responsa on the four parts of the Shulḥan 'Aruk, Königsberg, 1856; "Ḳinah le-Dawid," a funeral sermon on Rabbi David Lurie (Bichover), published as an appendix to the latter's "Ḳadmut Sefer ha-Zohar," *ib.* 1856; "Or la-Yesharim," commentary on the Haggadah of Passover, *ib.* 1857; "'Oṭeh Or," commentary on the Song of Solomon, Memel, 1861.

HELLER, JOSHUA BEN AARON: Russian rabbi and preacher; born 1814; died at Telshi, government of Kovno, June 2, 1880. After having been for several years preacher in Grodno, Heller was appointed chief rabbi of Polangen, Courland, and afterward chief rabbi of Telshi. Heller was the author of several works, of which the following have been published: "Dibre Yehoshua'," a homiletical and philosophical work in three parts (Wilna, 1856); "Ḥosen Yehoshua'," a guide to the removal of the causes which hinder the study of the Law (*ib.* 1862); "Toledot Yehoshua'," a commentary on Pirḳe Abot (*ib.* 1866); and "Ma'oz ha-Dat," an essay intended to prove that the oral law is true and necessary (*ib.* 1873). Heller also contributed to the Hebrew periodical "Ha-Lebanon."

H. R. M. Sel.

HELLER, MENAHEM. See Heller, Ẓebi Hirsch.

HELLER, SELIGMANN: Austrian poet and journalist; born at Raudnitz, Bohemia, July 8, 1831; died in Vienna Jan. 8, 1890. After completing his course at the University of Vienna, where he studied philology and law, he engaged in business with his father. In 1866 he became teacher of German at a commercial school at Prague, and was at the same time member of the editorial staff of "Bohemia." He taught also at the Talmud Torah at Prague. In 1873 he went to Vienna, where he became dramatic critic for the "Deutsche Zeitung," and, subsequently, teacher of the history of literature at the Handelsakademie.

Heller published "Ahasverus," an epic poem on the Wandering Jew, Leipsic, 1866 (2d ed., *ib.* 1868): "Die Letzten Hasmonäer," Prague, 1865; and "Gedichte," Vienna, 1872.

After Heller's death his translations of medieval Hebrew poems were edited by his friend D. Kaufmann and published under the title "Die Echten Hebräischen Melodien," Treves, 1892 (2d ed., Breslau, 1903).

Bibliography: *Meyers Konversations-Lexikon*; D. Kaufmann, *Die Echten Hebräischen Melodien*, Introduction, Treves, 1892.

S. F. T. H.

HELLER, STEPHEN: Hungarian pianist and composer; born at Budapest May 15, 1815; died in Paris Jan. 14, 1888. He was originally destined for the law, but soon decided to devote his life to music.

At the age of nine he had already been sufficiently advanced to play with his teacher, F. Brauer, at the theater in Budapest, the concerto by Dussek for two pianos. Shortly afterward he went to Vienna to study with Charles Czerny, and later with Anton Halm. In 1827 he gave concerts in Vienna, and from 1829 to 1832 made a concert tour with his father through Hungary, Poland, and Germany.

After passing the winter of 1830 at Hamburg, he returned to Budapest by way of Cassel, Frankfort, Nuremberg, and Augsburg. In the last-mentioned city he was taken ill, and was soon afterward adopted by a wealthy patron of music. In 1838 Heller went to Paris, where he entered that brilliant musical circle of which Liszt, Chopin, and Berlioz were conspicuous members. Here Heller eventually achieved high distinction both as a concert performer and as a teacher. In 1849, and again in 1862, he visited London, on the latter occasion playing with Hallé at the Crystal Palace (May 3) Mozart's E-flat concerto for two pianos. With these brief interruptions the last twenty-five years of his life were spent at Paris.

Heller's numerous compositions, solely for pianoforte, are celebrated for their originality, grace, and elegance. As regards a specific knowledge of the instrument, Heller was considered superior even to Mendelssohn; and his poetry of sentiment, pure and rich melody, and fertility of rhythmical invention place him among the very first composers of his genre.

Heller wrote in all about 150 opus numbers, of which the following are the most popular: "Traumbilder," op. 79; "Promenades d'un Solitaire," op. 78, 80, 89; "Nuits Blanches" (or "Blumen-, Frucht-, und Dornenstücke"), op. 82; "Dans les Bois," op. 13, 86, 86, 128; "Eglogues," op. 92; 3 "Bergeries," op. 106; "Voyage Autour de Ma Chambre," op. 140; "Tablettes d'un Solitaire," op. 153; "Herbstblätter," op. 109; "Balletstücke," op. 111; 3 "Ballades," op. 115; 3 "Préludes," op. 117; "Tarantelles," op. 53, 61, 85, 137, etc.; "Etudes," op. 16, 45, 46, 47, 90, 125; besides sonatas, mazurkas, scherzi, caprices, nocturnes, songs without words, and variations.

S. J. So.

HELLER, YOM-ṬOB LIPMANN BEN NATHAN BEN MOSES LEVI: Rabbi and liturgical poet; born at Wallerstein, Bavaria, 1579; died at Cracow Sept. 7, 1654. Erroneously the editor of the "Megillat Ebah" concludes from his epitaph that Heller died April 23; Hock ("Gal 'Ed," p. 65) gives Aug. 2 as the date, while David Gans ("Ẓemaḥ Dawid," p. 59) places his death in 1649. Heller was brought up by his grandfather, Moses Heller, chief rabbi of the German communities. He was sent to Friedburg, where he studied under Jacob Günzburg. Thence he was invited to Prague by a rich merchant, Aaron Ashkenazi, who later became his father-in-law. There he studied under Judah Löw b. Bezaleel, head of the yeshibah of Prague. According to Azulai ("Shem ha-Gedolim," i. 74), Heller's second master was Solomon Ephraim Lenczyza, chief rabbi of Prague. At Prague Heller perfected his rabbinical studies; and in 1597, when scarcely eighteen years old, he was appointed dayyan in that city.

In Oct., 1624, Heller was called to the rabbinate of Nikolsburg, Moravia, and in March, 1625, became rabbi of Vienna. There he reorganized the community and drew up its constitution. According to Hock (*l.c.*), it was Heller who obtained for the Jews the privilege of having Leopoldstadt as their special quarter.

In 1627 Heller was called to the chief rabbinate of Prague. On account of the Thirty Years' war the government imposed heavy taxes on the Jewish communities of Bohemia, including that of Prague,

As Chief Rabbi of Prague.

In Prison.

which had to pay a yearly tax of 40,000 thalers. As Heller was the chief rabbi he was compelled, against his will, to preside over the commission which had the task of apportioning that sum among the members of his communities. Although he acted with the greatest conscientiousness, some complained of unfair allotment. They accused Heller and the elders of the commission before the civil authorities of having spared the rich and laid the burden of the tax on the poorer people. Emperor Ferdinand II. addressed a severe censure to Heller, warning him not to repeat such proceedings. Heller's enemies, not satisfied, accused him before the emperor of having written against Christianity. The emperor commanded the governor of Prague to send Heller in chains to Vienna, but the supplications of the leading Jews of Prague combined with the esteem which the Christian officials had for Heller spared him that indignity. The Jews pledged themselves that he would present himself before his judges even if allowed to go alone. Heller accordingly set out for Vienna on Tuesday, Tammuz 5, 5389 (June 25, 1629), and arrived there on the following Sunday. On Tammuz 17, the Jewish fast-day, he was imprisoned together with common criminals. The Jews of Vienna, however, obtained his transfer to another prison.

A clerical commission was appointed to inquire into Heller's guilt. It met on July 15, and among other questions Heller was asked how he dared to eulogize the Talmud after it had been burned by papal order. Heller justified himself very adroitly; but the verdict was that Heller properly deserved death. The emperor, however, commuted the punishment to a fine of 12,000 thalers, to be paid immediately, the incriminated writings to be destroyed. The fine was far beyond Heller's means; but the order was explicit that in default of payment Heller was to be stripped and flogged in the public squares of Vienna and Prague. The Jews again interfered in his behalf, and the fine was reduced to 10,000 florins, to be paid in instalments. By the help of generous Jews, Heller was enabled to pay the first instalment of 2,000 florins. Finally, after a confinement of forty days, he was liberated (Aug. 14), but deprived of his office and left without means. His enemies, in addition, obtained an imperial decision to the effect that Heller might not officiate as rabbi in any town of the Austrian empire. He returned to Prague Sept. 26, and was confined to his bed for three months. His friends in the meantime secured a partial withdrawal of the decision regarding the rabbinate.

Helped by friends, Heller was able to wait for better times and to pay the remaining instalments of his fine. In 1632 he was called to the rabbinate of Nemirow, government of Podolsk, Russia, and three years later he became rabbi of Vladimir, Volhynia. He attended the fairs of Yaroslav and Kremenetz, where the Council of the Four Lands met, and obtained the renewal of the synodal decrees against simony in the rabbinate. But he thereby made for himself many enemies, who calumniated him before the governor of Volhynia. The latter directed Heller to quit the town, but the more influential Jews of Warsaw succeeded in having the order withdrawn.

Rabbi at Cracow.

In the autumn of 1643 Heller received an invitation to the rabbinate of Cracow, which he gladly accepted. Joshua Heschel, the author of "Maginne Shelomoh," was head of the yeshibah there. Four years later Heschel died, and Heller succeeded him in the direction of the yeshibah. At Cracow Heller relaxed the Jewish marriage laws, because, owing to the persecutions which the Jews had suffered at the hands of the Cossacks, many women did not know whether their husbands were still alive or not. He established the 5th of Tammuz, the day on which his troubles began, as a perpetual fast-day in his family, and the 1st of Adar as a day of mirth to commemorate his nomination to the rabbinate of Cracow.

Heller was twice married and had four sons and five daughters. The sons, whom he mentions in his works, were: Moses of Prague, Samuel of Nemirow, Abraham (b. 1615) of Lublin, and Löb of Brest-Litovsk. Moses Zacuto wrote an elegy on Heller's death (Venice, 1654).

His Knowledge and Works.

Heller was a recognized authority in matters of ritual. He explained the Talmud without recourse to casuistry. Although he appreciated the Zohar and other cabalistic works, he never deviated from plain interpretation as regards the Halakah. He was also versed in the secular sciences. His commentary on the Mishnah shows that he was a good mathematician; and his notes on the "Gib'at ha-Moreh" of Joseph b. Isaac ha-Levi prove that he occupied himself with philosophy. His judgment was impartial; he praised the "Me'or 'Enayim" of Azariah dei Rossi in spite of the anathema that his master, Löw b. Bezaleel, whom he held in great esteem, had launched against the book and its author. He was also a good linguist and a Hebrew stylist; his authority as such was recognized by Samuel Archevolti, who sent Heller his "'Arugat ha-Bosem" for examination ("Tos. Yom-Ṭob," on Tamid, end of ch. vii.).

Heller was a prolific writer, as can be seen from the following list of his works, some of which are still unpublished:

Ẓurat ha-Bayit, on the temple of Ezekiel, written when Heller was very young. Prague, 1602.

Commentary on the "Beḥinat 'Olam" of Jedaiah Bedersi. Prague, 1598.

Ṭub Ṭa'am, a cabalistic supercommentary, following the "Pardes Rimmonim" of Moses Cordovero, on Baḥya's commentary to the Pentateuch.

Tosefot Yom-Ṭob, notes and glosses to the six orders of the Mishnah; first published with the text, Prague, 1614–17; then revised by the author, Cracow, 1643.

Notes on the "Gib'at ha-Moreh" of Joseph b. Isaac ha-Levi. Prague, 1612.

Ma'adanne Melek and Leḥem Ḥamudot, a double commentary on Asheri's "Piskḳe Halakot" to Berakot, and on "Halakot Ḳeṭannot" to Ḥullin, Bekorot, and Niddah. Prague, 1628.

Pilpela Ḥarifta, the fourth part of the preceding commentary, on the order Neziḳin. Prague, 1619.

Judæo-German translation of Asheri's ethical work, "Orḥot Ḥayyim." Prague, 1626.

Malbushe Yom-Ṭob, critical notes on Mordecai Jaffe's "Lebush" to the Oraḥ Ḥayyim.

Sermon delivered by Heller at Vienna on the disappearance of the cholera. Prague, 1626.

Supercommentary on Ibn Ezra's commentary to the Pentateuch (Neubauer, "Cat. Bodl. Hebr. MSS." No. 235).

Leḳeṭ Shoshannim, a grammatical treatise on Archevolti's "'Arugat ha-Bosem" (Neubauer, *l.c.* No. 2271, 4).

Notes on the Eben ha-'Ezer of both Jacob b. Asher and Joseph Caro (printed with the "Ḥiddushe ha-Rashba" on Ketubot).

Derush Ḥiddush ha-Lebanah, an astronomical treatise on the increase and decrease of the moon. Wilna, 1866.

Darke Hora'ah, a guide to decisions in ritual laws when the authorities disagree.

Torat ha-Asham, on the "Torat Ḥaṭṭat" of Moses Isserles (3 vols.; Neubauer, *l.c.* Nos. 772–773).

She'elot u-Teshubot, some of which were printed in the responsa collection "Ẓemaḥ Ẓedeḳ," others in "Geonim Batra'e," but most of them unpublished.

Seder Shemot Giṭṭin (Neubauer, *l.c.* No. 808, 1).

Megillat Ebah, autobiography, published by Moses Körner, with a German translation by Miro. Breslau, 1836.

Parashat ha-Ḥodesh, on Maimonides' "Yad," Ḳiddush ha-Ḥodesh (Neubauer, *l.c.* No. 631, 1).

Berit Melaḥ, treatise in Judæo-German on the law of salting meat. Amsterdam, 1718.

Heller also wrote two seliḥot to be recited on the 14th of Ḥeshwan in commemoration of the sufferings at Prague in 1618–20. In 1650 he wrote three other seliḥot, in which he describes the massacres of the Jews under Chmielnicki in 1648. These seliḥot are recited on the 20th of Siwan. He was also the author of the "Mi she-Berak," recited every Saturday.

G. M. SEL.

HELLER, ẒEBI HIRSCH (also called **Herschele Ḥarif**): Hungarian rabbi; died at Alt-Ofen Oct. 28, 1834. Heller was rabbi at Bonyhád. In 1834 he was called to Alt-Ofen as successor to Moses Münz, but had hardly begun his ministry when he died. Ẓebi Hirsch Chajes, rabbi of Zolkiev; S. J. Rapoport, chief rabbi of Prague; and Moses Taubers, rabbi of Sniatyn, were his pupils. He was the author of "Ḥiddushe Ṭib Giṭṭin," novellæ, published with the responsa of his son, Menahem Heller (Zolkiev, 1844; 2d ed., Przemysl, 1876); and "Tappuḥe Zahab" (Ungvár, 1865). There is also a responsum by him in Joshua Orenstein's "Yam ha-Talmud."

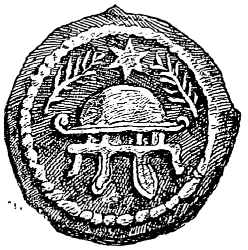
S. L. V.

HELMET (כובע or קובע): In olden times the helmet seems to have been worn only by kings, military officers, and other important officials. At least, it is mentioned only of Goliath and Saul that they had brazen helmets (I Sam. xvii. 5, 38). Not until later did a helmet form part of the complete armor of an ordinary soldier. Chronicles relates that Uzziah equipped the whole Jewish army with helmets and armor (II Chron. xxvi. 14). The authenticity of this account may be uncertain, but it tends to show that the wearing of a helmet was a general custom at that time. In Jer. xlvi. 4, also, the helmet is reckoned a necessary part of the armor. It must not be supposed, however, that these helmets were of brass; they were leather caps. The head-coverings of the Syrian and Hittite warriors were of this kind, as they are pictured on the Egyptian monuments (see illustrations in W. Max Müller's "Asien und Europa," pp. 302–384). These were round, flat caps, fitting the head closely, with a projection at the back to protect the neck. The Egyptian soldiers wore similar caps, only theirs were broader at the back and covered the ears also. In Egypt, too, metal helmets were rare; they were more common among the Assyrians. Helmets were usually hemispherical. The round cap, fitting tightly to the head, is still worn in the East, but not frequently. The hemispherical helmet, if made of leather, usually had metal rings, or else two metal bands on the outside, to give it firmness. As a rule side-pieces protected the ears. The shape of the metal helmets was the same. Both leather and metal helmets were ornamented with bands and flaps of the most varied form.



Coin of Herod the Great, Showing Helmet with Cheek-Pieces.
(After Madden.)

HELPFUL THOUGHTS. See PERIODICALS.

HELTAY, FRANZ: Hungarian deputy; born in Szentes March 15, 1861; studied law and political economy in Budapest. After having become a member of the editorial staff of the "Nemzet" and "Ellenör," he edited (1887–88) the "Nemzet Gazdasági Szémle" (Review of Political Economy). Since 1887 he has also edited the "Vasuti és Közlekedési Közlöny" (Railway News), the official organ of the Hungarian Ministry of Commerce.

Heltay is a member of the committee of statistics and of the tariff commission at the Ministry of Commerce, and vice-president of the Journalists' Pension Fund. His principal work is "Az Ipartörvény Revíziója" (Revision of the Trade Laws), Budapest, 1883.

In 1896 Heltay was elected to the Hungarian Reichstag from Oklánd.

BIBLIOGRAPHY: *Pallas Lex.*

S. L. V.

HEMAN (הימן): **1.** Son of Joel and grandson of the prophet Samuel; surnamed "the Singer"; a Kohathite (I Chron. vi. 19). He was one of the three chief Levites appointed by David to superintend the musical service in the Temple (*ib.* vi. 18–30, xv. 17, xxv. 1). He had fourteen sons, all of whom assisted in the choir under their father, and each of whom was the head of one of the twenty-four courses of the Levites established by David (*ib.* xxv. 4–31). Heman was also called "the king's seer in the matters of God" (*ib.* xxv. 5), the same term being applied to Asaph (II Chron. xxix. 30) and to Jeduthun (*ib.* xxxv. 15). **2.** Son of Mahol; one of the men renowned for wisdom (I Kings v. 11 [A.V. iv. 31]). In I Chron. ii. 6 this Heman is mentioned as the son of Zerah, son of Judah. As to the Heman to whom the Eighty-eighth Psalm is ascribed, it is difficult to determine whether he is to be identified with No. 1 or with No. 2 of this article. The fact that other psalms are ascribed to Asaph and Jeduthun, Heman's two companions, might indicate identification with Heman the Singer. The first part of the title, "A Psalm for the sons of Korah," would confirm this supposition. But he is called there "Heman the Ezrahite," and the following psalm is superscribed "Ethan the Ezrahite"; so that it seems that these two were the sons of Zerah ("Ezrahite" = "Zarhite"), renowned for their wisdom. In this case the title of Ps. lxxxviii. would be composed of two contradictory parts.

E. G. H. M. Sel.

HEMDAN (חמדן): The eldest son of Dishon the Horite (Gen. xxxvi. 26). In the parallel list in I Chron. i. 41 this name is changed to "Hamran" (חמרן).

E. G. H. M. Sel.

HÉMENT, FÉLIX: French educator; born at Avignon Jan. 22, 1827; died at Nanterre (Seine) Oct. 5, 1891. Hément was a schoolmaster all his life, rising to the position of primary inspector of the department of the Seine, and retiring in 1886 with the title Honorary Inspector-General of Public Instruction. During the war of 1870 Hément was entrusted with special work relating to the defense of the fort of Vanves. He afterward gave innumerable lectures throughout France for the purpose of aiding the advancement of popular instruction. Those which he delivered in the department of Aisne in 1883 brought about a conflict with Mgr. Thibaudier, then Bishop of Soissons, which caused some stir at the time.

Hément's works cover a wide sphere of learning. The following deserve special mention:

Menus Propos sur les Sciences, 1866. La Force et la Matière, 1867.
L'Homme Primitif, 1868. De la Force Vitale, 1870.
Famille, Propriété, Patrie, 1872. Premières Notions d'Histoire Naturelle, 1874.
Simples Discours sur la Terre et sur l'Homme, 1875 (crowned by the French Academy). De l'Instinct et de l'Intelligence, 1880.
L'Origine des Etres Vivants, 1882. Les Infiniment Petits, 1885.
Les Etoiles Filantes et les Bolides, 1888. La Science Anecdotique, 1889. Entretiens sur la Liberté de la Conscience, 1890.

Hément was decorated with the Legion of Honor.

S. V. E.

HEMERDINGER, MICHEL: French jurist; born at Colmar, Alsace, May 1. 1809; died in Paris June 22, 1880. After taking the degree of bachelor of letters at Strasburg (1829), he entered the rabbinical school at Metz. In 1830 he went to Paris to study law, and was admitted to the bar in 1833. In 1838 he was employed at the assizes and the court martial. In 1838-40 he was secretary of the Society of Attorneys, among the members of which were Grévy, Arago, Barbier, and Leblond; in 1845 he became a member of the Central Jewish Consistory; in 1848, acting prosecutor of the republic; in April-June of the same year he was special government commissioner for Alsace, adjusting differences among the Jews; and from 1870 to 1879 he was a justice of the peace in Paris. S.

HEMEROBAPTISTS (טובלי שחרית; lit. "morning bathers"): Division of Essenes who bathed every morning before the hour of prayer in order to pronounce the name of God with a clean body (Tosef., Yad., end; the correct version being given by R. Simson of Sens: "The morning bathers said to the Pharisees: 'We charge you with doing wrong in pronouncing the Name in the morning without having taken the ritual bath'; whereupon the Pharisees said: 'We charge you with wrong-doing in pronouncing the Name with a body impure within'"). In the time of Joshua b. Levi (3d cent.) a remnant still existed, but had no clear reason for their practise (Ber. 22a). The Clementina speak of John the Baptist as a Hemerobaptist, and the disciples of John are accordingly called "Hemerobaptists" ("Homilies," ii. 23; comp. "Recognitions," i. 54); similarly, Banus, the teacher of Josephus ("Vita," § 2), was a Hemerobaptist. Hegesippus (see Eusebius, "Hist. Eccl." iv. 22) mentions the Hemerobaptists as one of the seven Jewish sects or divisions opposed to the Christians. Justin ("Dial. cum Tryph." § 80) calls them simply "Baptists."

According to the Christian editor of the "Didascalia" ("Apostolic Constitutions," vi. 6), the Hemerobaptists "do not eat until they have bathed, and do not make any use of their beds and tables and dishes until they have cleansed them." This obviously rests upon a misunderstanding of their true character. Epiphanius ("Panarion," i., heresy xvii.) goes still further, and says that the Hemerobaptists deny future salvation to him who does not undergo baptism daily.

K.

HEN: There is no mention of the hen in the Old Testament, though "barburim abusim" (I Kings v. 3) is taken in B. M. 86b for "fattened hens." Many of the Talmudic references to the hen ("tarnegolet"; "gabrit"; "pahya") are quoted under Cock in Jew. Encyc. iv. 138 *et seq.* The Talmud mentions that the hen perches for sleep on elevated places (Shab. 35b). As such places are often over chimneys, the lower eyelid of the hen overlaps the upper one in sleeping, in order to protect its eyes against the smoke (*ib.* 77b). The egg of the hen takes ten days to mature (Ber. 8a). A cock and a hen, on account of the fecundity of the latter, were carried before the bridal couple on the wedding-day (Giṭ. 57a). The skins of grapes on account of their fattening properties were a favorite food for hens (B. M. 86b). The employment of hens in thrashing is mentioned in B. M. 91b.

HEN. See Gracian.

HENA: Rabshakeh's enumeration of the monarchies reduced by the King of Assyria terminates with the words "Hena' we-'Iwwah" (II Kings xix. 13; Isa. xxxvii. 13). These two words are supposed by several critics to be the names of two cities, and according to Büsching ("Erdbeschreibung," xi. 263, 757) it is the city now called "'Anah" by the Arabs, and situated on the Euphrates. F. Hommel, however, takes these two words for names of constellations ("Expository Times," April, 1898). The Jewish commentators, as well as the Targum, consider them as two verbs.

E. G. H. M. Sel.

HENDLÉ, ERNEST: French statesman; born at Paris Feb. 15, 1844; died Feb. 7, 1900. Hendlé was educated for the bar and had a brilliant career as attorney at the Court of Appeal. His success attracted the attention of Jules Favre, who appointed him his secretary. When Favre became minister for foreign affairs (1870), Hendlé remained with him, and accompanied him to Ferrières during the memorable negotiations with Bismarck. The Government of National Defense sent Hendlé to administer provisionally the department of the Nord. On March 20, 1871, Hendlé became governor ("préfet") of the Creuse, and the following year obtained a similar post in the department of Loir-et-Cher. Hendlé resigned when the Reactionaries came into power, but in 1876 he became prefect of the Yonne. Later he was governor of the department of Saône-et-Loire and dealt in a masterly way with the strikes at Monceau-les-Mines. He was transferred to Rouen in 1876, and remained there until his death. Hendlé was made commander of the Legion of Honor in July, 1886. He was a son-in-law of Albert Cohn.

HENGSTENBERG, ERNST WILHELM: German Bible exegete; born Oct. 20, 1802, at Fröndenberg, Westphalia; died at Berlin May 28, 1869; studied theology and Oriental languages at the University of Bonn.

He was the author of: "Christologie des Alten Testaments," Berlin, 1829-35 (2d ed., 1854-58; English translation by Keith, 1835-39); "Beiträge zur Einleitung ins Alte Testament," *ib.* 1831-39 (English translation, Edinburgh, 1847-48); "Die Bücher Mosis und Egypten," *ib.* 1841; commentaries on the Psalms (1847), Canticles (1853), and Ecclesiastes (1859). In the last-named he gives up the theory of the Solomonic authorship of Ḳohelet, as he already had done in the article "Ecclesiastes" in Kitto's "Cyclopedia of Biblical Literature" (1845). These three commentaries have been translated into English. In 1867-68 appeared his commentary on Ezekiel. He wrote also a special work on the relations of the Jews to the Christian Church, "Die Juden und die Christliche Kirche," Berlin, 1857. After his death were published "Geschichte des Reiches Gottes Unter dem Alten Bunde" (2 vols., 1869-71; also translated into English), and a commentary on Job (1870-75).

In all his works Hengstenberg was a firm advocate of the traditional Christian views of the Old Testament and protested strenuously against the higher criticism of his day.

HENIKSTEIN, ALFRED, FREIHERR VON: Austrian general; born Aug. 11, 1810, at Ober-Döbling; died Jan. 29, 1882, in Vienna. He was the son of the banker Joseph von Henikstein. After being baptized he joined (1828) a regiment of engineers, becoming major in 1848. The following year he became colonel; and in 1854 was appointed major-general. He fought in the Austro-Italian war of 1859, won the rank of "Feldmarschallieutenant," and was created baron. In 1863 he was placed in command of the fifth army-corps in Verona, and in the following year was appointed chief of the general staff. In the Austro-Prussian war he was Benedek's chief of staff. After the defeat of the Austrian arms and the costly blunders made by commanding officers, the public demanded an investigation, and Benedek and Henikstein were suspended and ordered to appear before a court martial. After some time the court was dismissed without having given judgment. Leaving the army, Henikstein passed the rest of his life in retirement in Vienna.

HENLE, ELISE: German novelist and dramatist; born in Munich 1830; died at Frankfort-on-the-Main Aug. 18, 1892; she was a niece of the poetess Henriette Ottenheimer. After her marriage to the manufacturer Leopold Levi of Esslingen, her house became the rendezvous of a distinguished society circle. She was of a deeply religious nature, with a keen sense of humor. Her first literary productions, such as the narrative "Die Wacht am Rhein" and the novel "Das Zweite Jägerbataillon," appeared anonymously in several periodicals. She entered the dramatic field successfully with the political comedy "Der Zweite September," which was soon followed by the drama "Percy" (a free adaptation of Galen) and the text of the opera "Murillo." Her comedies, "Durch die Intendanz" and "Die Wiener in Stuttgart," met with marked success in several German theaters.

HENLE, FRIEDRICH GUSTAV JACOB: German anatomist; born at Fürth, Bavaria, July 19, 1809; died at Göttingen May 13, 1885. He received his education at his native town, where he and his parents were baptized. In 1827 he went to the University of Bonn to pursue the study of medicine. Here he joined the Burschenschaft, and took part in its political activities. For this he was suspended from the university and was transferred to the Berlin "Hausvogtei," a place of detention, to which, at that time, many students were sent. Upon being

Genealogical Tree of the Hendricks Family.

pardoned he went to Heidelberg, where he became a disciple of Tiedemann, graduating in 1832 as M.D.

After spending two years in Paris, where he took a postgraduate course, he returned to Germany and became assistant to Johannes Müller at the anatomical institute of Berlin University. In 1837 Henle was admitted to the medical faculty as privat-docent through the influence of Alexander von Humboldt. Three years later he was called to the university at Zurich as professor of anatomy and physiology, and in 1844 to Heidelberg as associate professor of anatomy, succeeding Tiedemann as professor in 1849. In 1852 he was called to Göttingen, at the university of which city he held the position of professor of anatomy until his death.

Henle's writings have become standard works; and his discoveries are important. Special mention may be made of his discoveries concerning: the cylindrical epithelium in the intestinal tract; the cuticular root-sheath of the hair; the microscopical structure of the cornea; the endothelium of the blood-vessels; the structure of the hepatic cells; and the loops of Henle in the kidneys.

From 1838 to 1842 Henle wrote reports on anatomy and pathology for Müller's "Archiv für Anatomie und Physiologie"; from 1844 to 1848 he contributed to Canstatt's "Jahresberichte über die Fortschritte der Gesammten Medizin in Allen Ländern," essays on general anatomy; and from 1849 to 1855 on both special and general anatomy.

In 1844 he founded, in conjunction with Pfeuffer, the "Zeitschrift für Rationelle Medizin," which appeared until 1869.

Of Henle's more important works may be mentioned: "Ueber Schleim- und Eiterbildung," Brunswick, 1838; "Vergleichende Anatomische Beschreibung des Kehlkopfes," Leipsic, 1839; "Pathologische Untersuchungen," *ib.* 1840; "Handbuch der Allgemeinen Anatomie," *ib.* 1841; "Handbuch der Rationellen Pathologie," Brunswick, 1846–52; "Handbuch der Systematischen Anatomie des Menschen," *ib.* 1855–76, 2d ed. 1876–79 (his principal work); "Anatomischer Handatlas zum Gebrauch im Seziersaal," *ib.* 1874–77; "Anthropologische Vorträge," *ib.* 1876–1880; "Grundriss zur Anatomie des Menschen," 1880, 3d ed. 1888; "Das Wachstum des Menschlichen Nagels und des Pferdehufs," Göttingen, 1884.

HENLE, SIGMUND VON: Bavarian deputy; born June 30, 1821; died at Munich Oct. 9, 1901. He was a descendant of Löb Berlin, the district rabbi of Bamberg in 1789–94. Highly esteemed by King Ludwig II., he was entrusted with many law cases of the royal house; he was also an intimate friend of Duke Maximilian. From 1873 to 1881 he sat in the Bavarian Diet as representative of the city of Munich, and was a member of the most important committees, as those on law and finance. To the end of his life he was a faithful supporter of liberalism, and successfully opposed all attempts to curtail the rights of his coreligionists. Shortly after his sixtieth year his sight became seriously affected, and he was compelled to resign his professional and political work. On this occasion the Order of Merit of the Bavarian Crown, which ennobles the bearer, was conferred upon him; a few years later he was created privy councilor. As a member of the boards of trustees of the Riesser-Stiftung and of several Jewish societies, he was interested even in advanced age in the intellectual and material welfare of his coreligionists.

HENOCH, EDUARD HEINRICH: German physician; born at Berlin June 16, 1820. After taking the degree of M. D. there (1843), he began to practise as a specialist in diseases of children. Until 1850 he was assistant at the children's dispensary of the university. In that year he became privat-docent; in 1858, assistant professor. In 1872 Henoch became director of the hospital and dispensary of the department of pediatrics at the Charité. In 1893 he resigned that position, received the title of "Medicinalrath," and lived in retirement at Meran until 1898, when he removed to Dresden. Among his works may be mentioned: "Klinik der Unterleibskrankheiten," 3 vols., Berlin, 1852–58, 3d ed. 1863; "Beiträge zur Kinderheilkunde," two parts, *ib.* 1861–68; "Vorlesungen über Kinderkrankheiten," *ib.* 1881, 10th ed. 1899.

Henoch translated from the English of Budd "Die Krankheiten der Leber," Berlin, 1846, and edited Canstatt's "Handbuch der Medizinischen Klinik," Erlangen, 1854–56, and West's "Pathologie und Therapie der Kinderkrankheiten," 4th ed., Berlin, 1865.

HENRIQUES: This American family, connected with that of the same name in Amsterdam and London, traces its pedigree back to Jacob Henriques, who settled in the island of Jamaica in the early part of the eighteenth century. See subjoined pedigree on page 348.

HENRIQUES, AMOS: English physician; born in Jamaica 1812; died June 5, 1880. He went to England in 1830 to study medicine, entered St. Thomas' Hospital, and in due course obtained his diploma as surgeon. In 1833 he went to France and graduated in medicine at the University of Paris. At this time he took part in some of the émeutes against King Louis Philippe. In 1834 Henriques went to Italy, and obtained also there degrees in medicine. He began practise in Athens, and shortly afterward went to Constantinople. Here he obtained government employment and received a commission to organize a medical staff for the Turkish army.

The defeat of the Turks at the battle of Nezid in 1839 put an end to Henriques' career in Turkey. He was taken prisoner, but, escaping from his captors, became a wanderer without any means of support.

GENEALOGICAL TREE OF THE HENRIQUES FAMILY.

He made his way to Egypt, where he formed the acquaintance of Marquis Litta, with whom he traveled as medical attendant through northern Europe. In 1840 he returned to England, but soon afterward emigrated to Jamaica, and practised there successfully for seven years. He then returned to England and engaged in general practise in London, obtaining also there considerable success.

Henriques published a few medical essays which attracted some notice. During the outbreak of cholera in 1849 he issued several pamphlets on the nature of that disease. He also replied to Sir John Forbes's work "Nature and Art in the Cure of Disease" attempting to refute the doctrine that nature is more important than science in the treatment of disease.

Henriques was decorated with the Turkish Order of the Medjidie of the second class, and with the Order of King Charles III. of Spain.

HENRIQUES, DAVID QUIXANO: Anglo-Jewish reformer; born May 13, 1804; died in London March 6, 1870; son of Abraham Q. Henriques. He was a director of the City Bank and the Bank of Australasia. In early life an active worker of the Portuguese synagogue, and one of its managers, he afterward was one of the foremost workers in the foundation of the West London Synagogue, in the councils of which congregation he held a high position. He was treasurer of the West London Synagogue from 1847 to 1862.

J. G. L.

HENRIQUES, JACOB QUIXANO: West-Indian merchant; born at Spanish Town, Jamaica, 1811; died in London Oct. 17, 1898. A son of Abraham Q. Henriques, he was early associated in business with his brother David, in the firm of Henriques Brothers, West-Indian merchants. In Jamaica he was the founder of a Jewish school for boys and girls. Going to London soon after 1840, he took an active part in the formation of the West London Synagogue. He soon resided permanently in London, and became warden of the synagogue in 1856 and again from 1861 to 1864. In 1882 he was elected chairman of the council, and manifested great interest in the provision of religious education for the youth of the congregation. He was a liberal subscriber to Jewish charities.

In 1864 he dissolved partnership with the firm and retired from business in favor of his son. Henriques was for some time a director of the Colonial Bank, and was subsequently chairman of the London Chartered Bank of Australia.

J. G. L.

HENRIQUES, ROBERT MARTIN: Danish musician, composer, and author; born in Copenhagen Dec. 14, 1858. He received instruction in violoncello from Bendix and Neruda, and in 1877 went to Dresden to study under Grützmacher and Kretschmer. He has appeared at concerts in Berlin, Leipsic, Hanover, Dresden, and Paris. Henriques has written for violoncello, piano, and orchestra, among his compositions being "Romance og Capricietto," "Märchen," and "Olaf Tryggvason." The last-named, an overture, has been played in Copenhagen, Stockholm, and Berlin. He has written various songs, including "Melodier i Moll" and "I Ny og Næ," and (with Oscar Madsen) several novels of local color, among which may be mentioned "Ved Höjen Mast" (1892), "Tjenestefolk," and "Studentens Glade Liv" (1893). Henriques is musical critic for "Dannebrog" and "Vort Land" of Copenhagen.

HENRIQUEZ (ENRIQUEZ), ISABELLA: Spanish poetess; lived at Madrid; died after 1680. She distinguished herself in the different academies at Madrid. Isaac (Fernando) Cardoso dedicated to her his work, "Del Color Verde," on the color green, which is the symbol of hope (Madrid, 1634). She openly embraced Judaism, and settled at Amsterdam. It is reported that she distributed amulets alleged to protect against physical harm. D. L. de Barrios quotes a "decima" from her manuscript "Obras Poeticas."

G. M. K.

HENRY II. or **HENRY DE TRASTAMARA:** King of Castile; born at Seville in 1333; died in 1379; illegitimate brother of Pedro I. He was as hostile to the Jews as Pedro had been friendly. His long-cherished hatred of his brother burst forth when a Jew named Jacob, an intimate of the king, praised the latter excessively to Henry. In his fury he stabbed the Jew with a dagger. Pedro would have revenged himself on Henry forthwith, but his courtiers restrained him by force. Henry saved himself by a hasty flight. This was the immediate cause of the civil war which brought untold suffering upon the Jews of the country. A few years afterward Henry beheaded his brother near Montiel (March 14, 1369), and then ascended the throne of Castile. In order to appease his ally, Bertrand du Guesclin (Beltran Claquin) and his wild, rapacious troops, he imposed a war contribution of twenty thousand gold doubloons on the already heavily oppressed community of Toledo, and issued an order to take all the Jews and Jewesses of Toledo as prisoners, to put them on the rack, to give them neither food nor drink, and in case they still refused to raise this enormous sum, to sell their property, both movable and immovable, at auction. In spite of this action he was compelled, owing to his financial straits, to have recourse to Jewish financiers. He made Don Joseph Pichon his chief tax-collector ("contador major"), and appointed several Jews farmers of the taxes. When complaints were made to him on the subject, he answered that he would willingly lease the taxes to Christians at a cheaper rate, but that none would take them.

The demands of the Cortes in Toro (1369) and in Burgos (1374 and 1377) against the Jews harmonized perfectly with Henry's inclinations. He ordered the Jews to wear the humiliating badge, and forbade them to use Christian names. He further ordered that for short loans Christian debtors should repay only two-thirds of the principal. Shortly before his death Henry declared that Jews should no longer be permitted to hold public office.

G. M. K.

HENRY, EMMA: English poetess; born Sept. 17, 1788; died Dec. 30, 1870; daughter of the Rev. Solomon Lyon, professor of Hebrew at Cambridge, and wife of Abraham Henry. She enjoyed in early life the advantages of a broad education and the society of cultured university men; and when her father's eyesight failed, she devoted her abilities to the support of the family. Mrs. Henry enjoyed the distinction of being the first English Jewess to engage in authorship. In 1812 she published a volume of verse which met with some success; and she continued to produce occasional poems which were often recited at public celebrations.

She was the mother of Michael Henry.

HENRY, HENRY A.: Anglo-American rabbi and Hebraist; born in London 1800; died at San Francisco, Cal., Sept. 4, 1879. He was educated at the Jews' Free School, London, of which he was afterward principal until 1842. In this capacity he was the acknowledged bulwark of the London Jewry, especially in resisting the endeavors of the Society for the Conversion of the Jews. He was one of the founders of the Jews' Hospital and Orphan Asylum. In 1836 Henry compiled a volume of the daily prayers according to the German and Polish rites, and in 1840 published a "Biblical Class Book for Jewish Youth" and a "Synopsis of Jewish History." While principal of the Free School, he officiated frequently in London synagogues, and in 1844 became rabbi to the St. Alban's Congregation, where he remained until 1849. Here he made pulpit addresses in English a regular practise—a novel feature in those days.

In 1849 he embarked for America under engagement to the congregation at Louisville, Ky. He was, however, unavoidably delayed at Cincinnati, and accepted a position tendered to him there at the B'nai Jeshurun Synagogue. In 1851 Henry proceeded to Syracuse, N. Y., where he served three years as rabbi. From Syracuse he removed to New York city, where he resided till 1857. While in New York he served the Henry Street congregation and superintended its religious school. He officiated later in the Clinton Street Synagogue. After some time he established a boarding-school for Jewish youth, which he maintained until his departure for California. He arrived there in 1857 and accepted the call of the Congregation Shearith Israel in San Francisco, which he served as rabbi till 1871. During his residence in California he for some time edited "The Pacific Messenger."

Henry's library was presented after his death to the Hebrew Union College, Cincinnati, Ohio.

HENRY, MICHAEL: English journalist and mechanician; born at Kennington, London, Feb. 19, 1830; died in London June 15, 1875. He was educated at the City of London School; in 1844 he went to Paris as clerk in a counting-house, and later entered the office of the "Mechanics' Magazine." In 1857 he established a business as patent agent, which he carried on until his death. At the same time he assisted Dr. Benisch on the "Jewish Chronicle," and, upon the retirement of the latter in 1868, became its editor.

In 1847 he founded the General Benevolent Association, of which he was the honorary secretary. He was a member of the Jews' College Council and of the Board of Deputies, and sat on the committees of other educational charities. He devoted himself chiefly to the Stepney Jewish Schools, of which he was honorary secretary and personal supervisor.

Henry wrote a pamphlet on "Patent Law," which was highly commended by a committee of the House of Commons. A number of his essays were collected and published under the title "Life Thoughts," 1875.

HENSCHEL, AUGUST WILHELM EDUARD THEODOR: German physician and botanist; born in Breslau Dec. 20, 1790; died there July 24, 1856; educated at the medical and surgical college at Breslau, the Ober-Collegium, Berlin, and the universities of Heidelberg and Breslau (M.D. 1813). He practised medicine in Breslau from 1813 to 1816, and in the latter year was appointed privat-docent in pathology at the university of that city.

In 1820 Henschel embraced Christianity, and soon after published his first important work, "Von der Sexualität der Pflanzen," which attracted considerable attention in the world of science. He was appointed assistant professor at his alma mater in 1821, and in 1832 professor of anatomy, physiology, and pathology.

Henschel is best known through his researches into the history of medicine, the results of which he published in the medical periodical "Janus, Zeitschrift für Gesch. und Litteratur der Medicin," Breslau, 1846-49. Of his other works may be mentioned: "Vertheidigung der Entzündlichen Natur des Croups" (in Horn's "Archiv für Med. Erfahrung," 1812); "Commentatio de Aristotele Botanico et Philosopho," Breslau, 1824; "Ueber Einige Schwierigkeiten in der Pathologie der Hundswuth," Breslau, 1829; "Zur Gesch. der Medicin in Schlesien," *ib.* 1837; "Das Medicinische Doctorat, Seine Nothwendigkeit und Seine Reform," *ib.* 1848.

HENSCHEL, ELIAS H.: German physician; born at Breslau April 4, 1755; died in 1839; father of A. W. HENSCHEL. He commenced life as an errand-boy, and for some time was valet to a physician. He did not, however, miss any opportunity of acquiring knowledge, in which he was encouraged and materially aided by a professor of anatomy named Morgenbesser, who also induced several of his coreligionists to take a substantial interest in him. Henschel was enabled to commence the study of anatomy at the age of twenty-five. In 1785 he entered the University of Halle (M.D. 1787). Henschel devoted himself especially to obstetrics, and was appointed public accoucheur at Breslau. He was one of the first to treat the thigh tumor of lying-in women as a special malady, and was instrumental in introducing vaccination in Silesia. Notwithstanding his numerous duties and extensive practise, Henschel spent a great deal of his time in the hospital for the Jewish poor, acted as an accoucheur in many benevolent institutions, and, in the troublous times of 1813, added to his other activities the care of a lazaretto at Neustadt containing 228 beds. He also rendered useful services during a cholera epidemic; and about this time he published his "Guter Rath bei Annährung der Cholera" (Breslau, 1831). He also wrote "Ueber die Gewöhnlichsten Krankheiten der Schwangern" (*ib.* 1797) and "Ein Beitrag zur Heilung der Kopfgeschwulst der Neugeborenen Kinder" (1828).

HENSCHEL, GEORG (ISIDOR): German composer and barytone singer; born Feb. 18, 1850, at Breslau, where he studied with Wandelt and Schäffer. He made his first appearance as a pianist at twelve years of age. At the Leipsic Conservatorium (1867-70) he was a pupil of Wenzel and Moscheles (pianoforte), Götze (singing), and Richter (theory and composition). Subsequently he studied in Berlin under Schulze (singing) and Kiel (composition). After making several concert tours through Europe, in 1877 he went to England, where he lived for three years. In 1881 Henschel became conductor of the Boston Symphony Orchestra, at Boston, Mass., and he retained the position till 1884. In 1885 he settled permanently in London, where in the following year he founded the London Symphony Concerts. From 1886 to 1888 he was professor of singing at the Royal College of Music, London.

Of Henschel's compositions the more important are: "Stabat Mater," oratorio, first performed at the Birmingham Musical Festival of 1894; the One Hundred and Thirtieth Psalm, for chorus, soli, and orchestra; a canon-suite for string orchestra; "Zigeuner Serenade," for orchestra; "Friedrich der Schöne," opera; "A Sea Change, or Love's Castaway," comic operetta (libretto by W. D. Howells); "Nubia," grand opera, first performed at Dresden in 1899.

On the death of his wife (née Lilian Bailey) Henschel retired from the concert platform, and has since lived on his estate at Aviemore in the Scottish Highlands, occasionally conducting his own works or lecturing on Johannes Brahms. A requiem composed by Henschel in memory of his wife was first performed in Boston, Mass., Dec. 2, 1902, and has since been given in Holland, Germany, etc.

HEP! HEP! A cry stated to have been used by the Crusaders during their attacks upon the Jews. It appears, however, to have been first used during the so-called "Hep! Hep!" riots of 1819 at Frankfort-on-the-Main and along the Rhine (see Grätz, "Gesch." xi. 357); *e.g.*, on Aug. 2, 1819, by anti-Semitic students at Würzburg as a term of reproach to Professor Brendel of that university, who had written in favor of the Jews. The students themselves claimed that the word was derived from "Hierosolyma est perdita"; others claim that it is a contraction for "Hebräer," while a further attempt has been made to derive it from "Hab! Hab!" The brothers Grimm, in their dictionary, trace it from a call to animals in the Franconian district, especially to the goat, and suggest that it was applied to Jews because of their beards. Their earliest quotation is from W. Hauff (1802–27). A person named Brouse is stated to have been condemned to three months' imprisonment for having used the expression against a Jew and his wife ("Arch. Isr." 1848, p. 47). During the anti-Semitic movement in Germany a pamphlet appeared in favor of the Jews with the title "Hepp! Hepp! Süsssaure Stöckerei in 1 Vorschrei und 7 Gejohlen" (Jacobs, "The Jewish Question," No. 25). The expression has since become a synonym for an outbreak against the Jews, and is thus used by George Eliot in her essay "The Modern Hep! Hep! Hep!" in "Impressions of Theophrastus Such." It is stated that on some occasions in 1819 the Jews replied to the cry of "Hep! Hep!" with the similarly sounding one of "Jep! Jep!" meaning "Jesus est perditus" ("Notes and Queries," 4th series, iii. 580).

J.

HEPHER: **1.** A son of Gilead (Num. xxvi. 32, xxvii. 1; Josh. xvii. 2–3). The clan was known as the Hepherites (Num. xxvi. 32). **2.** One of David's captains (I Chron. xi. 36). **3.** Member of the tribe of Judah (I Chron. iv. 6). **4.** Royal city of the Canaanites, the site of which is unknown (Josh. xii. 17; comp. I Kings iv. 10).

E. G. H. M. Sc.

HEPHZI-BAH (חפצי־בה, "my delight in her"): **1.** Name to be borne by the restored Jerusalem (Isa. lxii. 4), in token that God will not abandon it. **2.** Name of the queen of King Hezekiah and mother of Manasseh (II Kings xxi. 1).

E. G. H. M. Sel.

HEPNER, ADOLF: German-American journalist; born at Schmiegel, Posen, Nov. 24, 1846; educated at the gymnasium at Lissa, the rabbinical seminary at Breslau, and the universities of Breslau and Berlin.

He became a socialist in 1868, and two years later was associated with Liebknecht and Bebel in editing a socialistic paper at Leipsic. Soon afterward he was accused with them of high treason, but was acquitted in 1872. Being expelled from Leipsic in the following year, he removed to Breslau, and became a publisher, but failed in business.

In 1882 Hepner emigrated to the United States, and in 1886 settled in St. Louis, Mo., where he is now (1903) living. Up to 1897 he edited the daily labor paper "St. Louis Tageblatt," and since that year he has been the editor of the "Westliche Post."

Besides many essays for the papers of his political party, Hepner has written "Good Night, Schatz," a one-act play (1894).

HERCZEGHY, MORIZ: Hungarian physician and author; born in Budapest Aug. 19, 1815; died in Vienna Dec. 23, 1884. He studied medicine in Budapest and Vienna, and afterward took part in the Revolution of 1848 in the latter city. He went from Vienna to Paris, and thence in 1860 to Italy, where he became chief physician in Garibaldi's army. He returned to Hungary in 1865, but left again in 1868 for Constantinople, where for eight years he acted as chief military physician. Being severely wounded during the Russo-Turkish war, he had to give up his practise, and then traveled in Europe and in the East.

The more important of Herczeghy's literary works deal with political topics, and include: "Weder Deutsch noch Russisch, Sondern Oesterreichisch," Vienna, 1849; "Das Bombardement des Fürsten Windischgrätz zu Prag," *ib.* 1849; "Mein Tagebuch 1848–50," *ib.* 1850; "Mémoires sur Mon Séjour à Paris," Milan, 1853. He wrote also treatises on cretinism (1864) and on epidemics (1874).

Herczeghy's chief work, however, was a sociological study on the woman question, published in French (Paris, 1864) and in Hungarian (Budapest, 1883).

HERCZEL, MANÓ DE SZENTPÉTERI: Hungarian physician; born in Szegedin July 1, 1861; studied successively in his native city, in Ujvidék, in Budapest, in Vienna, in Strasburg, and in Paris. After having taken his degree of M.D. (1884), he practised for two years in Nothnagel's clinic in Vienna, and was thereafter for five years assistant to Czerny at Heidelberg, where in 1889 he became privat-docent in surgery. In 1892 he was appointed chief of the Szt. István Hospital in Budapest. His specialty is the treatment of diseases of the kidneys.

Herczel is the author of the following works: "Ueber die Wirkung des Anilin, Acetanilin und Kampheranilin," Vienna, 1887; "Ueber Operative Behandlung der Nierensteine," Vienna, 1887; "Ueber die Operative Fixation der Wanderniere," Vienna, 1892; "Ueber Grosse Defecte der Blasen-Scheidewand," Vienna, 1894.

In 1902 Herczel was elevated by Emperor Francis Joseph I. to the Hungarian nobility, and he assumed the name of "Szentpéteri."

S. L. V.

HERDER, JOHANN GOTTFRIED VON: German Protestant theologian, poet, and writer; born at Mohrungen, East Prussia, Aug. 25, 1744; died at Weimar Dec. 21, 1803. He studied theology, philosophy, and the humanities at the University of Königsberg, where he acquired a vast knowledge of German and foreign literature. In 1764–69 he was teacher and preacher at Riga; in 1771–76, court preacher and member of the consistory of Bückeburg; from 1776 until his death, court preacher and member, later president, of the consistory of Weimar. His works on Hebrew Biblical literature exercised great influence. His "Die Aelteste Urkunde des Menschengeschlechts" (Riga, 1774–76) develops the idea that the oldest Biblical poems—the history of Creation, of the Flood, and of Moses—are to be considered Oriental national songs. The usual interpretation of the Mosaic history of Creation as a divine revelation appears to Herder not only indefensible, but pernicious, since it fills the mind with false ideas and leads to persecution of the physical scientist.

In 1778 he wrote "Lieder der Liebe," in which he divested the Canticles of all mystical and allegorical accretions. In these deeply felt love-songs he recognized the natural expressions of Jewish sentiment. After having, in his letters on theology, extended this view to the whole Bible, he published (Dessau, 1782–83) his famous "Vom Geiste der Ebräischen Poesie." In a letter to Hamann he wrote that "since his childhood he had nourished it in his breast." He says that Hebrew poetry is the world's oldest, simplest, and most soulful poetry, full of the inner feeling of nature and of the poetic consciousness of God. He translated many of the Hebrew poems.

According to Grätz ("Gesch." xi. 249), Herder, although filled with admiration for Jewish antiquity and for the Hebrew people of the Biblical age, and foretelling a time when Christian and Jew would work together for the development and refinement of civilization, felt a dislike for the Jews which manifested itself in his earlier relations with Moses Mendelssohn. Not until after Lessing's death did he become more friendly toward Mendelssohn.

D. S. Man.

HEREDIA, PAULUS (PABLO) DE: Spanish anti-Jewish writer; born about 1405 in Aragon; died at an advanced age after 1486. Baptized late in life, he attacked Judaism, though he had at one time defended it and his former coreligionists. In order to assail the Talmud and its commentators, which he had studied in his youth, he wrote a mystical work, "Iggeret ha-Sodot," which he ascribed to the Mishnaic teacher Neḥunya ben ha-Ḳana and his alleged son Ha-Ḳana, asserting that he had found it and translated it into Latin. In his ignorance, Paulus de Heredia put into the mouth of Neḥunya passages from the work of Judah ha-Nasi, who lived much later, and in the work "Galie Razaya" made him answer eight questions, addressed to him by his imperial friend Antoninus, in an entirely Christian sense. He admits the chief mysteries of Christianity, *e.g.*, the doctrine of the Trinity. Neḥunya, who is made to say, "Ego ex iis unus sum qui crediderunt in eum et baptisatus fui et ambulo in viis rectis," finally exhorts his son to recognize Jesus as the Messiah.

Heredia's works "De Mysteriis Fidei" and "Corona Regia," on the immaculate conception (the latter dedicated to Pope Innocent VIII.), were also intended to convert the Jews. The latter, however, whom he assailed in the work "Ensis Pauli" with all the fire of a fanatical neophyte, vouchsafed no reply to his gross attacks on their faith. Paulus de Heredia was alleged to have collaborated on the Complutensian polyglot, issued under the auspices of Cardinal Ximenez.

HEREFORD: County town of Herefordshire, England, situated on the River Wye, of some commercial importance in early times. When Richard I. returned from captivity, ten Jews of Hereford contributed £15 11s. 11d. to a "donum" made by the Jews of England at Northampton (1194). They were under the jurisdiction of the sheriff, notwithstanding the Bishop of Hereford claimed the right to judge them (Tovey, "Anglia Judaica," pp. 78–79). In 1275 the "archa" was removed from Worcester to Hereford, where it remained till the Expulsion. From some of the bonds still extant the Jews of Hereford appear to have adopted the corn trade when refused permission by the "statute of Judaism" in 1275 to take usury, but this may have been merely an evasion of the statute. Twenty-four of the burghers of Hereford were appointed in 1282 as special guardians of the peace in favor of the Jews (Cal. Patent Rolls, 1282–92, p. 15).

Four years later one of the important Jews of Hereford invited some of his Christian friends to the wedding of his daughter. This attracted the notice of Bishop Swinfeld, who refused permission, and threatened excommunication to any of his flock who attended the wedding ("Household Expenses of Bishop Swinfeld," Camden Society, pp. cix.–cxi., 127). When the Jews were expelled in 1290 the king seized the debts due to the forty Jews of Hereford, composing about twenty families. The chief person seems to have been Isaac of Worcester, who had apparently moved there in 1275; he, with four of his sons and two of his daughters, was engaged in money-lending. The largest individual lender, however, appears to have been Aaron, son of Elias le Blund. Abraham "the Chaplain" is mentioned, with two Evesques. Thirteen houses and the synagogue also fell into the hands of the king, with rentals amounting to 55s. 6d. Since that time there has been no congregation at Hereford.

ḤEREM. See Excommunication.

HERES: 1. City in Egypt, mentioned in Isa. xix. 18: "In that day there shall be five cities in the land of Egypt that speak the language of Canaan, and swear to the Lord of hosts; one shall be called 'Ir ha-Heres" (A. V. "the city of destruction"; R. V. margin, "Heres"). The Masoretic text, Aquila, Theodotion, and Peshiṭta read עיר ההרס "City of Destruction." Symmachus, the Vulgate, Men. 110a, Saadia, and some Hebrew manuscripts read עיר החרס ("City of the Sun"). The Septuagint has *πολις ἀσεδέκ* ("City of Righteousness"). There are many differences of opinion regarding the proper reading of this name. It is, however, probable that "Ḥeres" is the correct reading, and that Heliopolis, in Egypt, is referred to by Isaiah. The alteration of "'Ir ha-Ḥeres" (City of the Sun) into "'Ir ha-Heres" (City of Destruction) was influenced by a later antagonism toward the Onias temple. On the other hand, the alteration of "Ḥeres" into "Ẓedeḳ" ([City of] Righteousness) was a result of the desire for a distinct prediction regarding that temple. For other opinions see Hastings, "Dict. Bible"; Geiger, "Urschrift," p. 79.

2. Mountain (הר חרס) mentioned in Judges i. 35, in connection with Aijalon and Shaalbim, as one of the mountains from which the Danites were unable to expel the Amorites. It has been conjectured, and with probability, that, since "ḥeres" is synonymous with "shemesh," "Heres" here may mean "Bethshemesh" (I Kings iv. 9; II Chron. xxviii. 18) or "Ir-shemesh" (Josh. xix. 41), between Judah and Dan.

3. Hill ("the ascent of Ḥeres"; Judges viii. 13, R. V.) by which Gideon returned from the battle with Zebah and Zalmunna. Its location is uncertain, and the text is variously transmitted.

E. G. H. M. Sc.

HERESY AND HERETICS: The Greek term *αἵρεσις* originally denoted "division," "sect," "religious" or "philosophical party," and is applied by Josephus ("B. J." ii. 8, § 1, and elsewhere) to the three Jewish sects—Sadducees, Pharisees, and Essenes (comp. Acts v. 17, xxvi. 5, and, with reference to the Christian sect, the *αἵρεσις* of the Nazarenes, xxiv. 5, 14; xxviii. 22). In the sense of a schism to be deprecated the word occurs in I Cor. xi. 19, Gal. v. 20, and particularly in II Peter ii. 1; hence *αἱρετικὸς* ("heretic") in the sense of "factious" (Titus ii. 10). The specific rabbinical term for heresies, or religious divisions due to an unlawful spirit, is "minim" (lit. "kinds [of belief]"; the singular "min," for "heretic" or "Gnostic," is coined idiomatically, like "goy" and "'am ha-areẓ"; see Gnosticism). The law "Ye shall not cut yourselves" (לא תתגדדו) is interpreted by the Rabbis: "Ye shall not form divisions [לא תעשו אגודות אגודות], but shall form one bond" (after Amos ix. 6 [A. V. "troop"]; Sifre, Deut. 96; comp. Jew. Encyc. iv. 592, *s.v.* Didascalia, Book VI.).

Besides the term "min" for "heretic," the Talmud uses the words "ḥiẓonim" (outsiders), "apiḳoros," and "kofer ba-Torah" (R. H. 17a), or "kofer ba-'iḳḳar" (he who denies the fundamentals of faith; Pes. xxiv. 168b); also "poresh mi-darke ẓibbur" (he who deviates from the customs of the community; Tosef., Sanh. xiii. 5; R. H. 17a). Of all these it is said that they are consigned to Gehinnom for all eternity (Tosef., Sanh. *l.c.*; comp. *ib.* xii. 9, apparently belonging to xiii. 5: "He who casts off the yoke [of the Law], and he who severs the Abrahamic covenant; he who interprets the Torah against the halakic tradition, and he who pronounces in full the Ineffable Name—all these have no share in the world to come").

The Mishnah (Sanh. x. 1) says the following have no share in the world to come: "He who denies that the Torah is divinely revealed [lit. "comes from Heaven"], and the apiḳoros." R. Akiba says, "also he who reads heretical books" ("sefarim ḥiẓonim"). This is explained in the Talmud (Sanh. 100b) to mean "sifre Ẓeduḳim" (Sadducean writings); but this is an alteration by the censor of "sifre ha-Minim" (books of the Gnostics or Heretics). The Biblical version, "That ye seek not after your own heart" (Num. xv. 39), is explained (Sifre, Num. 115; Ber. 12b) as "Ye shall not turn to heretic views ["minut"] which lead your heart away from God" (see Maimonides, "Yad," 'Akkum, ii. 3).

In summarizing the Talmudic statements concerning heretics in Sanh. 90-103, Maimonides ("Yad," Teshubah, iii. 6-8) says:

> "The following have no share in the world to come, but are cut off, and perish, and receive their punishment for all time for their great sin: the minim, the apiḳoresim, they that deny the belief in the Torah, they that deny the belief in resurrection of the dead and in the coming of the Redeemer, the apostates, they that lead many to sin, they that turn away from the ways of the [Jewish] community. Five are called 'minim': (1) he who says there is no God and the world has no leader; (2) he who says the world has more than one leader; (3) he who ascribes to the Lord of the Universe a body and a figure; (4) he who says that God was not alone and Creator of all things at the world's beginning; (5) he who worships some star or constellation as an intermediating power between himself and the Lord of the World.
>
> "The following three classes are called 'apiḳoresim': (1) he who says there was no prophecy nor was there any wisdom that came from God and which was attained by the heart of man; (2) he who denies the prophetic power of Moses our master; (3) he who says that God has no knowledge concerning the doings of men.
>
> "The following three are called 'koferim ba-Torah': (1) he who says the Torah is not from God: he is a kofer even if he says a single verse or letter thereof was said by Moses of his own accord; (2) he who denies the traditional interpretation of the Torah and opposes those authorities who declare it to be tradition, as did Zadok and Boethus; and (3) he who says, as do the Nazarenes and the Mohammedans, that the Lord has given a new dispensation instead of the old, and that he has abolished the Law, though it was originally divine."

It is noteworthy, however, that Abraham ben David, in his critical notes, objects to Maimonides characterizing as heretics all those who attribute corporeality to God; and he insinuates that the cabalists are not heretics. In the same sense all Biblical critics who, like Ibn Ezra in his notes on Deut. i. 2, doubt or deny the Mosaic origin of every portion of the Pentateuch, would protest against the Maimonidean (or Talmudic; see Sanh. 99a) conception of heresy. See Apiḳoros; Articles of Faith; Judaism; Gnosticism. K.

——**On Legal Status:** The status of heretics in Jewish law is not clearly defined. While there are certain regulations scattered throughout the Talmud concerning the minim, the nearest approach to the English term "heretic," these are mostly of a haggadic nature, the codes taking little cognizance of them. The governing bodies of the Synagogue frequently exercised, from motives of self-defense, their power of excommunication against heretics. The heretic was excluded from a portion in the world to come (Maimonides, "Yad," Teshubah, iii. 6-14); he was consigned to Gehenna, to eternal punishment (R. H. 17a; comp. Ex. R. xix. 5; see Apiḳoros, and compare D. Hoffmann, "Der Schulchan Aruch und die Rabbinen über das Verhältnis der Juden zu Andersgläubigen," 2d ed., Berlin, 1894); but the Jewish courts of justice never attended to cases of heresy; they were left to the judgment of the community.

There are, however, in the rabbinic codes, laws and regulations concerning the relation of the Jew to the heretic. The sentiment against the heretic was much stronger than that against the pagan.

While the pagan brought his offerings to the Temple in Jerusalem and the priests accepted them, the sacrifices of the heretic were not accepted (Ḥul. 13b, *et al.*). The relatives of the heretic did not observe the laws of mourning after his death, but donned festive garments, and ate and drank and rejoiced (Sem. ii. 10; "Yad," Ebel, i. 5, 6; Yoreh De'ah, 345, 5). Scrolls of the Law, tefillin, and mezuzot written by a heretic were burned (Giṭ. 45b; Shulḥan 'Aruk, Oraḥ Ḥayyim, 39, 1; Yoreh De'ah, 281, 1); and an animal slaughtered by a heretic was forbidden food (Ḥul. 13a; Yoreh De'ah, 2, 5). Books written by heretics did not render the hands impure ("Yad," She'ar Abot ha-Ṭum'ot, ix. 10; comp. Yad. iv. 6; see PURITY); they might not be saved from fire on the Sabbath (Shab. 116a; Oraḥ Ḥayyim, 334, 21). A heretic's testimony was not admitted in evidence in Jewish courts (Ḥoshen Mishpaṭ, 34, 22; see "Be'er ha-Golah" *ad loc.*); and if an Israelite found an object belonging to a heretic, he was forbidden to return it to him (Ḥoshen Mishpaṭ 266, 2).

Classes of Heretics.

The "mumar le-hak'is" (one who transgresses the Law, not for personal advantage, but out of defiance and spite) was placed by some of the Rabbis in the same category as the minim ('Ab. Zarah 26a; Hor. 11a). Even if he habitually transgressed one law only (for example, if he defiantly violated one of the dietary laws), he was not allowed to perform any religious function (Yoreh De'ah, 2, 5; SHaK and "Pitḥe Teshubah," *ad loc.*), nor could he testify in a Jewish court (Sanh. 27a; "Yad," 'Edut, x. 3; Ḥoshen Mishpaṭ, 34, 2). One who violated the Sabbath publicly or worshiped idols could not participate in the "'erub ḥaẓerot" ('Er. 69a; "Yad," 'Erubin, ii. 16; Oraḥ Ḥayyim, 385, 3; see 'ERUB), nor could he write a bill of divorce (Shulḥan 'Aruk, Eben ha-'Ezer, 123, 2). One who would not permit himself to be circumcised could not perform the ceremony on another (Yoreh De'ah, 264, 1, Isserles' gloss). While the court could not compel the mumar to divorce his wife, even though she demanded it, it compelled him to support her and her children and to pay her an allowance until he agreed to a divorce (Eben ha-'Ezer, 154, 1, and "Pitḥe Teshubah," *ad loc.*). At his death those who are present need not tear their garments (Yoreh De'ah, 340, 5, and "Pitḥe Teshubah," *ad loc.*). The mumar who repented and desired readmittance into the community was obliged to take a ritual bath, the same as the proselyte (Yoreh De'ah, 268, 12, Isserles' gloss, and "Pitḥe Teshubah," *ad loc.*; comp. "Sefer Ḥasidim," ed. Wistinetzki, §§ 200-209). If he claimed to be a good Jew, although he was alleged to have worshiped idols in another town, he was believed when no benefit could have accrued to him from such a course (Yoreh De'ah, 119, 11, and "Pitḥe Teshubah," *ad loc.*). See APOSTASY; ATHEISM; GNOSTICISM.

HERITAGE. See INHERITANCE.

HERMANMIESTETZ: City in Bohemia. Jews were living there as early as 1509, engaged in commerce and money-lending; but the Jewish community proper dates from 1591. The Jews were confined to a ghetto under the protectorate of the overlords of the city. One of these, Count Johann Wenceslaus Spork, built a synagogue in 1760, which was modernized in 1870. The Jewish parochial school was transformed into a German public school. Since 1891 Hermanmiestetz has been the seat of a district rabbi, the dependent communities being Chrudim, Roubowitz, and Drevikau. The following have officiated as rabbis in Hermanmiestetz: Bunem (d. 1734); Selig-Landsteiner (d. 1743); Ḥayyim Traub (d. 1790); Elias Treitel (d. 1823); Samuel Brod (d. 1850); Moses Bloch, till 1855 (since 1877 professor at the rabbinical seminary at Budapest); Benjamin Feilbogen, till 1863; S. Rosenberg, 1864-68; Dr. Nehemias Kronberg, the present incumbent, called in 1891. Judah Löb Borges (d. 1872), a member of the community distinguished for his Talmudic and literary attainments, officiated temporarily whenever there was a vacancy in the rabbinate.

The community supports a burial society, a society for nursing the sick, a Talmud Torah, and a women's society. The cemetery must have existed as early as the sixteenth century; for it is recorded in a document that in 1667 a field was bought from a citizen for the purpose of enlarging the burial-ground. In 1903 the Jews of Hermanmiestetz numbered 300, those of the whole district aggregating 1,100.

D. N. K.

HERMANN, LUDIMAR: German physiologist; born in Berlin Oct. 21, 1838; M.D. Berlin, 1859. He engaged in practise in his native city, and in 1865 became privat-docent at its university. In 1868 he was appointed professor of physiology at Zurich, and in 1884 he accepted a similar chair at the University of Königsberg. His chief works include: "Lehrbuch der Physiologie," 12th ed., Berlin, 1900; "Handbuch der Physiologie" (together with other physiologists), 6 vols., Leipsic, 1879-81; "Leitfaden für das Physiologische Praktikum," *ib.* 1898; "Lehrbuch der Experimentellen Toxikologie;" Berlin, 1894; "Physiologische Jahresberichte," beginning with 1873. His essays, most of which have appeared in Pflüger's "Archiv für die Gesch. der Physiologie" and in Poggendorff's "Annalen für Physik," cover nearly the whole field of physiology and part of that of physics. Most of them deal with muscular and nervous physiology, the organs of sense, and the nature of phonetics.

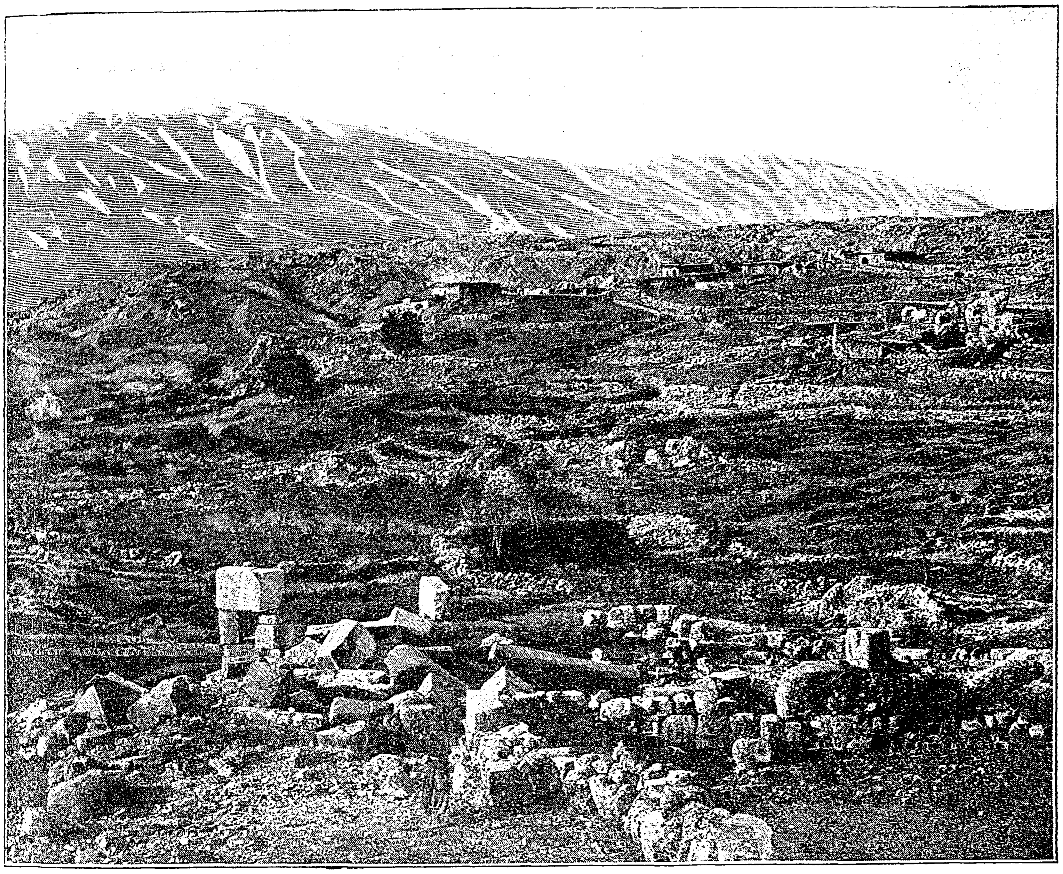
HERMENEUTICS. See BIBLE EXEGESIS; METHODOLOGY; TALMUD.

HERMES, BOOKS OF: Hermes (the Greek Mercury), in popular belief the leader of souls to Hades, was in later times identified in Egypt with the local god Thot, who was also the messenger of the gods and the heavenly scribe and inventor of writing. Forty-two sacred books, containing all the wisdom and secret lore of the Egyptians, were ascribed to Hermes-Thot (see Plutarch, "De Iside et Osiri," Parthey's ed., 1850, lxi. 154, 255, notes; Clement of Alexandria, "Stromata," vi. 4). Necromancers and Gnostics also ascribed their magic and mystic lore to Hermes (Dieterich, "Abraxas," 1891, pp. 63-70, 165). The names of Moses, Thoth, and

Hermes served as pseudonyms for many a writer of magic books or hymns. As many as 2,000, and even 36,525, books on mystic lore were said to have been written by Hermes (Iamblichus, "De Mysteriis," viii. 1). Lactantius ("Institutiones Divinæ," iv. 6, vii. 18) quotes the Λόγος Τέλειος, a dialogue of Hermes with Æsculapius, along with the Sibylline and the Hystaspes oracles, as containing Messianic prophecies; which goes to show that the Books of Hermes were used like the Jewish pseudepigrapha in religious arguments.

What share the Jews had in the composition of the Books of Hermes has not yet been fully ascertained; certain it is that Christians composed some of the later ones. It was these Books of Hermes (ספרי הרמים, corrupted into ספרי המירם) that were always on the lips of Elisha ben Abuyah or fell from his lap (Ḥag. 16b), and that were declared not to possess the character of holy writings which make the hands that touch them unclean (Yad. iv. 6; Yer. Sanh. x. 28a [a passage corrupted by negligent copyists; see Joël, "Blicke in die Religionsgesch." 1888, i. 70–75]; Ḥul. 60b, uncensored ed.; Midr. Teh. and Yalḳ., Ps. i.). Geonic tradition was still aware of the fact that the "Sifre Homerus," as it spelled the words, were heretical books (see Hai Gaon to Yad. *l.c.*; R. Hananeel to Ḥul. *l.c.*; the 'Aruk, *s.v.* מירום), and this alone explains why they were contrasted by the Sadducees (Yad. *l.c.*) with the sacred Scriptures.



MOUNT HERMON.
(From a photograph by Bonfils.)

Various other suggestions have been made as to the meaning of these words. They are interpreted as "Books of Homer" (הומירום) by Mussafia in his notes to the 'Aruk, by Derenbourg in his "Palestine" (p. 133), and by Krauss in his "Lehnwörter" (ii. 230); as "Pleasure Books" (? "Himeros") by Cassel in his edition of "Me'or 'Enayim" (p. 84); as "Chronicles" (Βίβλια Ἡμηρήσια), "Daily Books," or "Journals," in "Monatsschrift" (1870, p. 138). But these are certainly not of such a character as to come into discussion as "sifre minim," or heretic writings. According to Jewish writers there existed under the name "Hermes" a number of works in Arabic literature also (see Steinschneider, "Hebr. Bibl." 1861, p. 675; 1862, p. 91; *idem.* "Hebr. Uebers." 1893, p. 514).

Wörterb.*; Jastrow, *Dict.* s.v. המירום: Krauss, *Lehnwörter*, ii. 230; Schürer, *Gesch.* 3d ed., iii. 482; Friedmann, *Ha-Goren*, iii. 33; Zöckler, *Apokryphische Bücher des Alten Testaments*, 1891, pp. 485 *et seq.*

K.

HERMON (חרמון): Mountain on the northeastern border of Palestine; the culminating point of the Anti-Lebanon range, at the springs of the Jordan and adjoining the plateau of Bashan (Deut. iii. 8; Josh. xi. 17, xii. 1; I Chron. v. 23). The name is translated by some "prominent peak," by others "sacred mountain" (see Gesenius, "Th."), both being suitably applied to it. The Sidonians called it "Sirion" (שריון), and the Amorites "Shenir" (שניר: Deut. iii. 9; both appellations signify "breastplate"), evidently on account of its rounded top, which, covered with snow, gleamed and shone in the sunlight. It is also called "Sion" (שיאון: Deut. iv. 48), probably on account of its height. But it appears from Cant. iv. 8 and I Chron. v. 23 that Shenir was the name of a part of Mount Hermon, probably of one of its three peaks, which are collectively called "Hermonim" (= "the Hermons": Ps. xlii. 7, Hebr.). The name "Sanir" occurs in a cuneiform inscription (see Halévy in "R. E. J." xx. 206). Because of its snow-covered top Hermon is called "Ṭur Talga" in the Targumim and "Har ha-Sheleg" (snow-mountain) in Sifre (ed. Friedmann, p. 47b).

"Mount Hermon" (הר חרמון) occurs in Deut. iii. 8; Josh. xi. 17; xii. 1, 5; xiii. 5, 11; I Chron. v. 23; "Hermon" alone in Josh. xi. 3; Ps. lxxxix. 12, cxxxiii. 3; Cant. iv. 8. Hermon was before the invasion held by the Hivites (Josh. xi. 3); it was the northern landmark of the Israelites: "from the river of Arnon unto mount Hermon" (Deut. iii. 8 *et al.*). When the half-tribe of Manasseh conquered their allotted territory, they are said to have "increased . . . unto mount Hermon" (I Chron. v. 23). In one passage (Ps. lxxxix. 12) Hermon seems to be used as a synonym for "north," just as the sea (ים) is used as a synonym for "west." The name "Baal-hermon" (Judges iii. 3) would indicate that it was at one time the seat of a shrine. It was a religious center in the Roman period also, and was surrounded by small temples, built on the slopes. A temple on the summit is referred to by Eusebius and Jerome ("Onomastica Sacra," *s.v.* "Æermon"). In Enoch (vi. 6) the summit of Hermon is mentioned as the place where the wicked angels alighted in the days of Jared, and its name is explained as referring to the oath which they had sworn upon it. Hermon was famous for its dews (Ps. cxxxiii. 3), which have been celebrated by modern travelers also (Tristram, "Land of Israel," 2d ed., p. 608), and the part called "Shenir" was abundant in cypresses (Ezek. xxvii. 5). Hermon is now called "Jabal al-Shaikh" (the mountain of the chief), so called as the residence of the religious sheik of the Druzes.

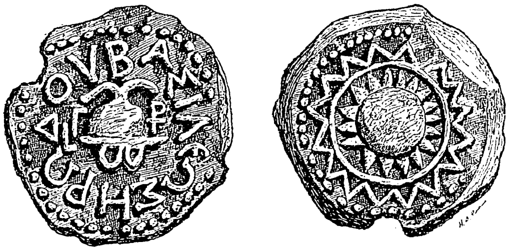
E. G. H. M. SEL.

HEROD I. (surnamed **the Great**): King of Judea 40–4 B.C.; founder of the Herodian dynasty; born about 73 B.C.; son of Antipater, and, consequently, of Idumean origin. It is said that when he was a boy of twelve an Essene named Menahem predicted that he would reign over Judea. Indeed, nature had endowed him with the qualities of ascendency. He was of commanding presence; he excelled in physical exercises; he was a skilful diplomatist; and, above all, he was prepared to commitany crime in order to gratify his unbounded ambition.

His First Exploit.

At the age of twenty-five (the age fifteen given by Josephus is generally believed to be erroneous) Herod was appointed prefect of Galilee by his father, who was procurator of Judea. By his first act Herod showed that he intended to please the Romans at any cost. Contrary to the Jewish law, which granted to the vilest criminal the right of trial by the Sanhedrin, to which tribunal alone belonged the authority to pass sentence of death, Herod executed a band of fanatics who had attacked heathen towns and robbed caravans. This assumption of power, for which he was highly lauded by the Romans, infuriated the leaders of the national party, who perceived Herod's ultimate aims. Bringing pressure to bear upon the weak Hyrcanus II., they obtained permission to arraign the prefect before the Sanhedrin. Instead of presenting himself before that august body clad in black, as was the usual custom, Herod appeared arrayed in purple and attended by a strong guard, capable of meeting any emergency. He did not condescend to offer the slightest defense of his conduct, but tendered a letter of Sextus Cæsar, governor of Syria, in which Hyrcanus was threatened with dire consequences should Herod not be cleared of the charges preferred against him. Overawed, the judges did not dare to utter a word in his condemnation till the president of the tribunal, Shemaiah, rose to rebuke their pusillanimity and warned his colleagues that some day they would pay dearly for their weakness. At this turn of affairs Hyrcanus adjourned the session until the following day, and recommended the culprit to leave Jerusalem secretly during the night. Herod then took refuge with Sextus Cæsar, who appointed him prefect of Cœle-Syria. Herod collected an army and advanced on Jerusalem with the purpose of chastising the Sanhedrin; but he was dissuaded from his intended vengeance by his father and his brother Phasael.



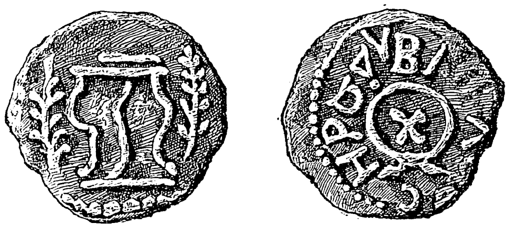
COPPER COIN OF HEROD THE GREAT.

Obverse: ΒΑΣΙΛΕΩΣ ΗΡΩΔΟΥ round a helmet. In field to left LΓ (year 3–38 or 35 B.C.); in field to right a monogram.
Reverse: Macedonian shield, with disk surrounded by rays.

(After Madden, "History of Jewish Coinage.")

The disturbance throughout the Roman empire caused by the murder of Julius Cæsar (44 B.C.) did not impede Herod's advancement, who knew how to turn every circumstance to his advantage. The protégé of Sextus Cæsar became, at the assassination of the latter, the friend of the Roman governor of Syria, Cassius, whose favor he won by promptly levying the hundred talents which Galilee was required to contribute to the war-tax of seven hundred talents imposed upon Judea. He was confirmed in his position of prefect of Cœle-Syria, and even received from Cassius a promise that he would be acknowledged King of Syria when the war against the triumvirs should be ended. Meanwhile his father was poisoned (43 B.C.) by the hireling of one Malich, who aspired to an influential position in Judea. Herod hastened to take the place of his father, but did not neglect to avenge his death. Malich was enticed to Tyre and there slain by hired assassins, with the connivance of Cassius. However, after the departure of the latter, Judea was in a state of revolt. Antigonus, the younger son of Aristobulus II., made an attempt, with the assistance of Ptolemy, the son of Mennæus of Chalcis, to secure the sovereignty of Palestine. Herod succeeded in quelling the revolt and in defeating Antigonus. On his return to Jerusalem he was greeted as a triumphant general by Hyrcanus, who, seeing in him the deliverer of the country, gave him in marriage to his beautiful granddaughter, Mariamne, daughter of Alexander and Alexandra.

Betrothed to Mariamne.



Copper Coin of Herod the Great.

Obverse: a tripod with tray; on either side a palm-branch.
Reverse: BA[CI]AEΩC (indistinct) round a wreath, within which is an X.

(After Madden, "History of Jewish Coinage.")

The battle of Philippi (42 B.C.) put an end to the rule of the murderers of Julius Cæsar. The national party in Jerusalem now hoped to see the downfall of Herod and of his brother Phasael, who had been overzealous in support of the opponents of the victorious triumvirate. Some Jewish nobles met the victor, Antony, at Bithynia and complained of the maladministration of Judea. But Herod succeeded by bribes and flatteries in winning the favor of Antony, who remembered that while he (Antony) was fighting under Gabinius in the East, Antipater had rendered him many services. The charges against Herod were several times renewed, but they were of no avail. Hyrcanus himself pleaded the cause of the Idumean brothers, and they were appointed by Antony governors of Judea with the title "tetrarch."

The year 40 was the turning-point in Herod's life. With the help of the Parthians, who in that year overran Syria, Antigonus was proclaimed King of Palestine. Phasael was taken in an ambuscade and forced to commit suicide, Herod escaping a similar fate by flight. After passing through great hardships and greater dangers, he succeeded in reaching the fortress of Masada, where he left his family in the care of his brother Joseph. After having unsuccessfully attempted to obtain help from the Nabatæans of Petra, Herod went to Alexandria. There Cleopatra offered him a generalship in her army; but he declined it, and, braving all dangers, went to Rome. The triumvir Octavianus was won over as Antony had been, and, both pleading Herod's cause before the Senate, that assembly invested him with the ardently desired kingship. At the conclusion of the session Herod, walking between Antony and Octavianus and preceded by the consuls, went to the Capitol to return thanks to the gods.

Elected King by the Roman Senate.

The new king disembarked at Acre, and was soon at the head of a small army. The Roman generals Ventidius and Silo received the order to assist him in the conquest of Judea, which naturally was not willing to acknowledge his sovereignty; but they had been bribed by Antigonus, and their support was ineffectual. It was only in the spring of the year 37 that Herod, assisted by a large Roman force under the command of Caius Sosius, laid siege to Jerusalem. While the works were in course of construction, he went to Samaria to celebrate his marriage with the Hasmonean princess Mariamne, to whom he had been engaged for five years, after repudiating his first wife, Doris, the mother of Antipater.

After a siege of several months Jerusalem fell (probably in July) into the hands of the Romans. For several days the troops, unrestrained, indulged in murdering and pillaging, and Herod, to stop these horrors, had to pay out of his private fortune large sums to the legionaries. Antigonus was carried away captive by Sosius to Antioch, where by Antony's orders, instigated by Herod, he was executed.

Enmity of Alexandra.

Herod inaugurated his reign with acts of vengeance and cruelty. Forty-five of the most wealthy and most prominent of Antigonus' partizans were executed, and their estates confiscated in order to fill the empty treasury. Herod's agents showed themselves so greedy as to shake the dead bodies in order that any gold hidden in their shrouds might be disclosed. All the members of the Sanhedrin, with the exception of Pollio (Abṭalion) and Shemaiah, were slain. Of the members of the Hasmonean family with whom Herod had to contend, his bitterest enemy was his mother-in-law, Alexandra. As the aged Hyrcanus, who had now returned from his Parthian exile, could not reenter the high-priesthood, owing to the physical mutilation which had been inflicted upon him by Antigonus, Herod chose as high priest an utterly unknown and insignificant Babylonian Jew of the sacerdotal family, named Hananeel. This selection offended Alexandra, who considered that her young son Aristobulus, brother of Mariamne, was entitled to this office. She complained to Cleopatra; and Herod, fearing that the latter might exert her influence upon Antony, deposed Hananeel and gave the office to Aristobulus, his brother-in-law, who was then sixteen years old (35 B.C.). When the young high priest appeared before the public at the Feast of Tabernacles, arrayed in the gorgeous robes of his office, great enthusiasm prevailed, and a demonstration was made in his favor. Herod, who saw in him a possible rival, took umbrage, and determined to get rid of him. At the close of the feast he went with the priest to Jericho, where Alexandra had invited them to an entertainment. After the meal, while Aristobulus was refreshing himself with others in the bath, he was pushed under water, as if in sport, by some of the bathers who had been bribed by Herod, and held down until he was drowned. Herod feigned the most profound grief; but no one was deceived by his tears, and least of all Alexandra. She again invoked the help of Cleopatra, and Herod was summoned to Laodicea (34 B.C.) to justify himself before Antony. He did not, however, go empty-handed, and as a result was dismissed with honors.

Execution of His Uncle Joseph.

With this event began the first act of the drama of which Herod's own household became later the theater. Before leaving Jerusalem Herod had committed Mariamne to the care of his uncle and brother-in-law Joseph, directing him to slay her in case he (Herod) should not return. On arriving at Judea, Herod's sister Salome, who wished to get rid of her husband, Joseph, and at the same time to revenge herself on the haughty princess, who taunted her with her low birth, charged them with adultery. At first Herod gave no heed to the calumny; but when he learned that Mariamne knew of the secret command he had given to Joseph, he concluded therefrom that Salome's charges were well founded, and caused Joseph to be executed, without affording him an opportunity of being heard. In the same year Herod had the mortification of being obliged to receive at Jerusalem his enemy Cleopatra, who came to inspect the Palestinian coast and the most precious of Herod's domains, the district of Jericho, which had been given to her by Antony.

Execution of Hyrcanus.

During the civil war between Antony and Octavianus (32 B.C.), Herod, who would have helped his protector Antony, was by a happy chance sent by Cleopatra to combat the Nabatæan king Malich. At first Herod's army suffered a crushing defeat, but in the end he was victorious. On returning home Herod learned of the defeat of his protector Antony. The question now was how the new master of Rome would treat the friend of his defeated enemy. Herod promptly decided upon his course of action, and resolved to go and meet Octavianus. He contrived, however, to have the aged Hyrcanus removed, the only one who might prove a dangerous rival, as being nearer to the throne than himself. Upon the pretended charge of having conspired against Herod with the Arabian king, Hyrcanus was executed.

In the spring of the year 30 B.C. Herod met Octavianus at Rhodes. With considerable adroitness he pointed out the great friendship that had existed between himself and Antony and the benefits the latter had derived from it. This friendship he was now ready to give to Octavianus, to whom he would be equally true. Octavianus believed Herod, and confirmed him in all his titles. Herod succeeded so well in gaining Cæsar's favor that in the following year Octavianus gave him back Jericho and the other cities that Antony had taken from his domains, adding to them the towns of Gadara, Hippos, Samaria, Gaza, Anthedon, Joppa, and Strato's Tower.

Execution of Mariamne.

While his political affairs were thus prospering, his household became the scene of a tragedy of which Mariamne was the heroine. Before he had gone to Rhodes Herod had given the order to a certain Sohemus to slay Mariamne should he not return. Mariamne came to know this, and gave to Herod on his return proofs of her aversion. The charge of unlawful intercourse was repeated by Salome; and Herod saw again in the betrayal of his secret order a proof of guilt. Sohemus was immediately executed; Mariamne, after a judicial investigation by a sort of privy council, was condemned and executed (29 B.C.).

After the execution Herod, tortured with remorse, plunged into wild excesses to distract his thoughts. While he was hunting in Samaria he fell ill. A rumor of his death got abroad at Jerusalem. Alexandra then began to scheme so that in the event of Herod's death she might secure the throne. She tried to gain over the commanders of the two fortresses in Jerusalem; this was reported to Herod, and he caused her to be executed (28 B.C.). Herod's recovery was the signal for fresh crimes and bloodshed. The members of a family called "the sons of Baba" had signalized themselves under Antigonus by their zeal for the Hasmonean prince. In the moment of danger they were saved by Costobarus, who, after the execution of Joseph, had married Salome, the sister of Herod. Salome, having by this time become tired of her husband, betrayed all his secrets to Herod, who immediately put to death Costobarus and the sons of Baba (25 B.C.).

Builds Sebaste and Cæsarea.

The throne was now firmly established. Of all the members of the Hasmonean family who could give him umbrage there remained only the daughter of Antigonus. Herod then entered upon the prosperous period of his reign. Splendid public works were commenced and new cities were built. Thus Herod rebuilt the city of Samaria, to which he gave the name of "Sebaste," in honor of the Roman emperor. The small town on the seacoast called the Tower of Strato was transformed into a magnificent city with an artificial harbor, on a scale of the utmost grandeur, and named "Cæsarea." Temples in honor of Augustus were multiplied in all directions. To celebrate the quinquennial games which had been instituted in almost all of the Roman provinces, likewise in honor of Augustus, Herod erected in Jerusalem a theater, an amphitheater, and a hippodrome. Citadels and cities rose in honor of the different members of Herod's family: Antipatris, in honor of his father; Cypros, commemorating his mother; Phasaelis, as a memorial to his brother; and the two strongholds named Herodium in honor of himself. Military colonies were planted at Gaba in Galilee, and at Heshbon; and the fortresses Alexandrium, Hyrcania, Machærus, and Masada were rendered impregnable.

Restoration of the Temple.

Of all Herod's building operations, however, the most magnificent was the restoration of the Temple at Jerusalem. This work, begun in the eighteenth year of Herod's reign, was completed in its essential parts in eight years. Its beauty was proverbial. "He who has not seen Herod's building has never seen anything beautiful," was a common proverb of the day (comp. Suk. 51b; B. B. 4a; see Temple).

Moreover, Herod did not content himself with erecting architectural monuments in his own country only; Ashkelon, Acre, Tyre, Sidon, Byblus, Berytus, Tripoli, Damascus, Antioch, Rhodes, Chios, Nicopolis, Athens, and Sparta also received proofs of his generosity in many a monumental structure. He defrayed, too, the cost of the erection at Rhodes of a temple devoted to the Pythian Apollo, and gave a fund for prizes and sacrifices at the Olympian games.

Opposition of the Pious.

All the worldly pomp and splendor which made Herod popular among the pagans, however, rendered him abhorrent to the Jews, who could not forgive him for insulting their religious feelings by forcing upon them heathen games and combats with wild animals. The annexation to Judea of the districts of Trachonitis, Batanea, Auranitis, Zenodorus, Ulatha, and Panias, which Herod through his adulations had obtained from Augustus, could not atone for his crimes. In the eyes of the pious Jew Herod's government was not better than that of Antiochus Epiphanes. Like him, but by other means, Herod endeavored to Hellenize Judea. But the approbation of the pagan world was dearer to him than the religious feelings of the Jews. The most important functions of the state were entrusted to Greeks. Nicolas of Damascus and his brother Ptolemy were Herod's counselors; another Ptolemy was at the head of the finances. It is not surprising, therefore, that from time to time there were conspiracies against Herod's life. These conspiracies were quelled with the utmost cruelty. The fortresses, especially Hyrcania, were crowded with prisoners, who after a short detention were put to death. At the slightest sign of uprising the soldiers, all mercenaries—Thracians, Germans, and Galatians—struck right and left. Only once during his long reign did Herod give evidence of interest in his Jewish subjects. This was during the years of the famine, 24-23 B.C. He deprived himself of his silver plate and bought from Egypt great quantities of corn, which he divided gratuitously among the inhabitants.

Intrigues Against His Sons.

The last years of Herod's reign were, like the first, full of horrors. The actors in the tragedy which had ended in the execution of Mariamne resumed their work of slander on the return of her two sons, Alexander and Aristobulus, from Rome (17 B.C.), where they had been educated. Endowed with the physical beauty of their mother, which was enhanced by the polished manners they had acquired in Roman society, Alexander and Aristobulus were very much liked by the inhabitants of Jerusalem, who still remembered their mother and her ancestors, the legitimate sovereigns of the country. This popularity, which possibly rendered them a little vain and imprudent, was a thorn in the side of Herod's sister Salome, who was full of gloomy hatred against the Hasmonean race. In concert with her brother Pheroras, tetrarch of Peræa, she plotted the ruin of the two brothers, although one of them, Aristobulus, had become her son-in-law by marrying her daughter Berenice. Herod was incessantly warned of the danger threatening him from them. It was said that they openly avowed their intention of avenging their mother's death. To wound their pride and to show them that there was another possible heir to the throne, Herod gave a high post at court to Antipater, who with his mother, Doris, Herod's first wife, had been kept in seclusion. This act was a most unfortunate one, as Antipater from this time endeavored by every means to get rid of his stepbrothers in order to remove every barrier between himself and the throne. The breach between the father and his sons Alexander and Aristobulus widened to such an extent that Herod took them to Aquilea and accused them before Augustus. The latter effected a reconciliation; but it was not of long duration.

As soon as Herod and his sons returned home, Antipater, supported by Salome and Pheroras, resumed his machinations. Letters were forged, and avowals of guilt extorted from tortured slaves. A new reconciliation was effected by Alexander's father-in-law, Archelaus, King of Cappadocia; but, like the first, it did not endure. By the instrumentality of a Lacedæmonian named Eurycles, at that time resident at the court, Antipater brought a fresh accusation against the two brothers; and having obtained the consent of Augustus to impeach them, Herod traduced them at a mock trial held at Berytus, where they were condemned without having been granted a hearing. Soon afterward they were strangled at Sebaste by Herod's directions (6 B.C.).

Antipater's villainies did not remain long unpunished. The investigation which had been made into the sudden death of Pheroras revealed all the plots hatched by Antipater to rid himself of his father. The guilty son, who, being at that time at Rome, anticipated no trouble, was induced under false pretenses to come home, and on his arrival was brought to trial before Varus, the governor of Syria. As his guilt was manifest, Herod had him put in chains and reported the matter to Augustus, asking his permission to carry out the sentence of death. Meanwhile Herod was attacked by an incurable disease. Instead of becoming gentler and more merciful, the thought of death only led him to greater cruelty. For an attempt to tear down the Roman eagle from the Temple gate, made, on the rumor of his death, by some young men led by two teachers of the Law, Judah ben Sarifai and Mattathias ben Margalot, forty-two persons, including the teachers, were burned alive. During his sickness Herod meditated only upon ways and means by which he might make the Jews mourn the day of his death. When he had returned from the baths of Callirrhoe to Jericho, he is said to have given orders that upon his death the most distinguished of the nation, whom he had caused to be shut up in the arena of that place,

Execution of Antipater.

should be slain, so that there might be a great lamentation on his passing away. In his delirium he tried to kill himself, and the palace resounded with lamentations. Antipater, whose prison was near, on hearing these cries, concluded Herod was dead and endeavored to bribe his jailer to set him free; but the latter reported it to Herod, who at once gave orders for Antipater's execution. On hearing this, Augustus said: "It were better to be such a man's swine than his son" (see, however, JEW. ENCYC. i. 640, *s.v.* ANTIPATER).

Five days after the execution of Antipater Herod died at Jericho, leaving his throne to his son Archelaus. The corpse was transported with great pomp from Jericho to Herodium, where the burial took place. The day of his death was marked in the Jewish calendar as a festival.

Herod had in succession ten wives: (1) Doris, mother of Antipater; (2) Mariamne, mother of Aristobulus and Alexander as well as of two daughters; (3, 4) two of his own nieces, whose names are not mentioned, and by whom he had no children; (5) a second Mariamne, daughter of Simon Bœthus (whom Herod appointed high priest), and mother of Herod Philip; (6) a Samaritan named Malthace, mother of Archelaus, Herod Antipas, and a daughter named Olympias; (7) Cleopatra of Jerusalem, mother of a son named Herod and of Philip, tetrarch of Iturea; (8) Pallas, mother of Phasael; (9) Phædra, mother of Roxana; and (10) Elpis, mother of Salome.

The connection of Herod with the alleged massacre of the Innocents as related in the New Testament is now generally admitted by independent Christian thinkers to be legendary.

J. I. BR.

HEROD II.: King of Chalcis; son of Aristobulus and Berenice; grandson of Herod I. and the first Mariamne; brother of Agrippa I. and Herodias; died 48-49 C.E. He first married Mariamne, granddaughter of Herod I. From this union came Aristobulus, who married Salome, the daughter of Herodias, and the widow of the tetrarch Herod Philip. After the death of his first wife Herod II. married Berenice, daughter of his brother Agrippa I., by whom he had two sons, Berenicianus and Hyrcanus. At the request of Agrippa I. the emperor Claudius granted Herod (41 C.E.) the kingdom of Chalcis. Three years later, at the death of Agrippa, Herod was appointed governor of the Temple, with the right of nominating the high priest. During the four years in which he exercised this right he appointed two high priests—Joseph, the son of Carnus, and Ananias, the son of Nebedeus.

HERODIAN DYNASTY, PEDIGREE OF: On page 361 is a genealogical tree of the family of Herod, which succeeded the Hasmoneans. The family was of Idumean origin, its most distinguished representative being Herod the Great. Antipater and his direct descendants are numbered consecutively, the numbers being placed before the names, whereas references are made to such numbers in parentheses when the names recur in marriages. Frequent names, like Herod, Cypros, or Mariamne, are distinguished by Roman numerals. Herod the Great's wives are distinguished by letters in parentheses. Names of women are in italics.

HERODIANS: Priestly party under the reign of King Herod and his successors; called by the Rabbis "Boethusians," as adherents of the family of Boethus, whose daughter Mariamne was one of the wives of King Herod, and whose sons were successively made high priests by him. They followed the Sadducees in their opposition to the Pharisees, and were therefore often identified with the former (see Grätz, "Gesch." 4th ed., iii. 2, 693; BOETHUSIANS). According to the Gospels, their plot against the life of Jesus was supported by the Pharisees (Mark iii. 6, xii. 13; Matt. xii. 16); wherefore Jesus warned his disciples, saying "Beware of the leaven of the Pharisees and of the leaven of Herod" (Mark viii. 15; Matt. xvi. 6 has "Pharisees" and "Sadducees"). "Leaven" is explained in Matt. xvi. 12 to mean "teaching," that is, "bad teaching" (comp. "se'or sheba-'isah" = "the leaven in the dough," corresponding to the "yezer ha-ra'"; Ber. 17a). This shows that the Herodians represented a religious party. In Luke xii. 1 the Herodians have been omitted altogether, and the Pharisees alone are represented as the enemies of Jesus; and in Luke xx. 19 the scribes and chief priests are mentioned in place of the Pharisees and the Herodians (see also Mark xii. 13; Matt. xxii. 15-16).

7. Pheroras (d. 5 B.C.)
8. *Salome* (I) (d. 10 B.C.) = a. Joseph (3); b. Costobar, the priest, executed 20 B.C.—26. *Berenice* (I) = Aristobulus (13); c. Alexas
F. T. H.

PEDIGREE OF THE HERODIAN DYNASTY.

Herodias' uncle and brother-in-law, Herod Antipas, fell in love with her and proposed marriage, to which she readily assented. He then divorced his first wife, the daughter of Aretas VI., King of Arabia, and, contrary to Jewish law, married Herodias. This union brought misfortune to Antipas. It first involved him in a war with Aretas, who wished to avenge his abandoned daughter; then Herodias, who had married Antipas from motives of ambition, urged him to appeal to Caligula for the royal title, an appeal which brought about his downfall. Herodias, however, showed great fortitude in adversity; she preferred going with Antipas into exile at Lugdunum to remaining with her brother, Agrippa I., and sharing the advantages of his elevation, as proposed by Caligula.

The Gospels attribute to Herodias the execution of John the Baptist, whom she hated for having denounced her unlawful marriage. While celebrating Antipas' birthday, Salome, the daughter of Herodias, so delighted the tetrarch by her dancing that he promised her to fulfil any wish she might express. At the instigation of her mother she demanded that the head of John should be brought to her in a charger (Matt. xiv. 3 *et seq.*; Mark vi. 17 *et seq.*). This, however, is not corroborated by Josephus, who assigns political reasons for the execution of John.

J. I. Br.

HERODIUM: Fortified city three leagues south of Jerusalem; founded by Herod I. It was built on a rocky and rugged hill. Its citadel contained royal apartments of great strength and splendor, and served as a sarcophagus for Herod. In the times of the Romans Herodium was the chief town of a toparchy; it was one of the last strongholds taken by the army of Vespasian. Herodium is identical with the modern Jabal al-Furaidis, known as the "Frank Mountain," on the top of which the remains of the citadel are still to be seen. It is probable that in Biblical times the site of Herodium was called "Beth-haccerem," as the description of that place given by Jeremiah (vi. 1) coincides with the so-called "Frank Mountain."

Herod founded another fortress to which he gave the same name—Herodium; it was situated in the mountainous region extending toward Arabia.

J. I. Br.

HERON (אנפה): Enumerated among the unclean birds (Lev. xi. 19 [R. V. margin, "ibis"]; Deut. xiv. 18; comp. Targ. איבו, where the context points to some bird of the *Ardeidæ* family). There are at least seven species of heron common in Palestine, especially in the marshy regions; and the addition of "after its kind" ("leminehu") in the passages mentioned above would imply that various species were included under "anafah."

In the Talmud the heron is characterized, in allusion to the etymology of its name ("anaf"), as a cruel and irascible bird, and is contrasted with the pious stork (Ḥul. 63a; comp. Rashi to Lev. xi. 19).

E. G. H. I. M. C.

HERRERA, ALONZO DE (known also as **Abraham Cohen de Herrera**): Cabalist; born in Spain; died in Amsterdam, Holland, 1631. According to D. L. de Barrios, Herrera was descended from the famous Spanish commander, Fernandez Gonzalo de Cordova ("the Great Captain"). He represented the Sultan of Morocco at Cadiz, and fell into the hands of the English at the capture of that city. Upon his liberation he removed to Amsterdam, where he openly confessed Judaism and adopted the name "Abraham." Herrera was initiated into the mysteries of the Cabala by Israel Sarug, to whom he refers in his writings as his teacher and master. Herrera was fully as conversant with such writers on mystic lore as Moses Cordovero, Moses ibn Gabbai, Judah Ḥayyaṭ, and Ḥayyim Vital, as with Plato and his more recent followers, of whom Herrera gives Marsilio Ficino the preference.

Herrera substituted the principles of the Lurianic school for the true principles of the Cabala, which he greatly distorted by admixture of ideas from the Neoplatonic school. On account of the didactic method pursued in his essentially Neoplatonic essays, he has served the modern historians of philosophy as a guide in their treatment of the Cabala.

His works (written in Spanish, but never published), "Puerta del Cielo" and "Casa de Dios," were, in accordance with his will, translated into Hebrew (Amsterdam, 1665) by Ḥakam Isaac da Fonseca Aboab, and in 1677 were partly translated into Latin by Baron von Rosenroth in his "Kabbala Denudata," vol. i., pts. 3 and 4; vol. ii., pt. 3.

Bibliography: A. Franck, *Die Kabbala*, p. 7 (translated from the French by A. Jellinek); Grätz, *Gesch. der Juden*, ix. 516, x. 125; Kayserling, *Biblioteca Española-Portugueza-Judaica*, p. 52.

HERRMANN, LEO: French painter; born in Paris July 12, 1853. He was a student at the Ecole des Beaux-Arts at Paris, and exhibited his first picture, "A Bout d'Argument," in the Paris Salon of 1875. It was followed in 1876 by "La Bonne Histoire." Since then he has been a constant exhibitor in the Salon. Among his paintings may be mentioned: "Le Scandale du Jour" (1877); "Au Rendez-Vous" (1887); "Le Goûter" (1889); "Au Cabaret" (1896).

Bibliography: Curinier, *Dict. Nat.* iii. 322.

S. F. T. H.

HERSCHEL, SIR WILLIAM: English astronomer; born at Hanover Nov. 15, 1738; died at Slough, near Windsor, England, Aug. 22, 1822. His Jewish descent is acknowledged by his biographer, Holden, and it is also indicated by the fact that his grandfather was named Abraham, his father Isaac, and his eldest brother Jacob. His mother, Anna Ilse Moritzen, does not, however, appear to have been of the Jewish race. He was brought up by his father as a musician, and in that capacity went to England in 1755, in the band of the Hanoverian Guards, and for a considerable time earned his living as a teacher of music, obtaining a position as organist at Bath in 1760. Meanwhile, however, he was devoting all his spare time to the study of astronomy and the making of telescopes. By the aid of one of his larger instruments he discovered the planet Uranus, March 18, 1781, and at once obtained a permanent position in the world of science, being appointed astronomer to the king. He was made an honorary member of most of the scientific societies of Europe.

Founder of Sidereal Science.

Herschel's researches mark an epoch in modern astronomy. He was practically the founder of sidereal science, and made a complete review of the northern heavens three times, fixing the positions of 2,500 nebulæ, of which 203 had hitherto been unknown. He was also the first to conjecture the existence of binary stars, of which he identified and described no less than 209. He determined the elements of Saturn more fully than had previously been done, and above all he was the first to throw light upon the constitution of the Milky Way and its relation to the universe in general. His views on the position of the solar system in relation to the Milky Way still form the central factor in the modern theory as to the constitution of the universe. He is also known as the discoverer of the infra-red solar rays.

In his review of the heavens he was assisted by his sister, **Caroline Lucretia,** born at Hanover March 16, 1750; died there Jan. 9, 1848. She read to him, took notes, and at times even fed him while his hands were engaged with telescopic work. She herself was no insignificant observer; she discovered no less than eight comets, and in 1828 received the Astronomical Society's medal for a catalogue of nebulæ. Sir William's son, **Sir John William Herschel,** though of considerable scientific importance, was too far removed from Jewish influence for notice here.

J.

HERSCHELL, LORD FARRER: Lord Chancellor of England; born 1837; died March 1, 1899. His father was the Rev. Ridley H. Herschell. He was educated at University College, London, and at the University of Bonn, and took his degree at London University in 1857. In 1860 he was called to the bar, and in 1872 became a Q.C. and a bencher of Lincoln's Inn. Shortly afterward he was made recorder of Carlisle, and held that office for seven years. In 1874 he was elected member of Parliament for the city of Durham, which constituency he continued to represent until 1885. In 1880 he became solicitor-general in Mr. Gladstone's ministry and was knighted. In 1886 he was made a baron and became lord chancellor. Lord Herschell was elected president of the royal commission appointed to inquire into the workings of the Metropolitan Board of Works, was president of the Imperial Institute, was a strong churchman, and a churchwarden at St. Peter's, Eaton square. He possessed remarkable intellectual gifts, not a slight portion of which he inherited; and his speeches were characterized by a combination of acuteness, lucidity, and great argumentative power.

He died suddenly at Washington, in the United States, while on a commission to settle the Alaska boundary and other questions pending between the United States and England.

Bibliography: *Jew. Chron.* March 3, 1899; *The Times* and other London newspapers of this date.

J. G. L.

HERSCHELL, RIDLEY HAIM: Missionary to the Jews; born at Strzelno, Prussian Poland, April 7, 1807; died at Brighton, England, April 14, 1864. The son of Jewish parents, he was educated at Berlin University (1822), and was baptized in England by the Bishop of London in 1830. He became a missionary among the Jews, and was in charge of schools and missionary work at Leigh, Essex, and Brampton, Suffolk, from 1835 to 1838. In the last-named year he opened an unsectarian chapel in London, and in 1846 removed to Trinity Chapel, Edgeware road. He was a founder of the British Society for Propagating the Gospel Among the Jews and of the Evangelical Alliance (1845).

Herschell was the author of: "A Brief Sketch of the State and Expectations of the Jews," 1834; "Plain Reasons Why I, a Jew, Have Become a Catholic and Not a Roman Catholic," 1842; and "A Visit to My Fatherland: Notes of a Journey to Syria and Palestine, 1844."

He also edited "The Voice of Israel," a conversionist journal (vols. i., ii., 1845–47), and produced other works.

Bibliography: Boase, *Modern English Biography*, 1892; J. Dunlop, *Memories of Gospel Triumphs Among the Jews*, 1894.

J. G. L.

HERSCHELL, SOLOMON: Chief rabbi of the Ashkenazim in England; born in London 1762, during the rabbinate of his father, R. Hirsch Levin; died there Oct. 31, 1842. His family could boast a long genealogy of learned men, including R. Meïr of Padua. When he was only two years old Herschell was taken from England by his father, who left the English rabbinate in 1764 to fill a similar office in Halberstadt. He was educated in Germany and Poland, Jewish theology and mathematics being his favorite studies. He married at the age of seventeen, and was first called to the ministry at Prenzlau, Prussia. For nine years he ministered there, when, at the age of forty, his reputation and the circumstance of his being a native of London procured for him the office of chief rabbi of the Great Synagogue (1802). Gradually his jurisdiction extended over all the Ashkenazim in England. The period of his administration was marked by the uniting of the scattered elements of English Jewry, and by the growing prominence of the Ashkenazic congregation in London and the removal of the barriers that divided it from the Sephardim. His rabbinate was notable also for the many important institutions which sprang into existence, and which included the Neveh Ẓedeḳ, the Jews' Free School, and several other institutions.

Though representing the spirit of a bygone age, he was tolerant and just in disposition. When, however, the Reform movement came to a head in 1841, toward the close of his rabbinate, the secessionists found in him an uncompromising opponent;

and the drastic measures he adopted in treating with them were one of the chief causes of the schism.

The excellent library which he had collected passed at his death into the possession of the London bet ha-midrash.

J. G. L.

HERTZ, HENRIK: Danish poet; born Aug. 25, 1798, at Copenhagen; died there Feb. 25, 1870. He studied law at the University of Copenhagen, but, soon renouncing it, he devoted himself to literature. In 1832 he embraced Christianity. His first literary production was a comedy, "Herr Burchard og Hans Familie" (1822), which was followed two years later by another comedy, "Flyttedagen," in which he treated of the social life of Copenhagen. His views on the great importance in poetry of form as compared with material are laid down in his "Gjengangerbreve eller Poetiske Epistler fra Paradis" (1830), written in the style of Baggesen.

Hertz wrote the vaudevilles: "Arvingerne," "Debatten i Politivennen," "De Fattiges Dyrehave," etc.; as well as the following comedies taken from life: "Amors Genistreger" (1830); "Den Eneste Fejl"; "Emma" (1832); "Sparekassen" (1836; in German, Leipsic, 1879); "Besöget i Kjöbenhavn." His dramas are: "Ninon de l'Enclos" (German transl. by Thaulow, Leipsic, 1852, and by Laeisz, Hamburg, 1890), "Tonietta," "De Deporterede," "Den Yngste." His lyrical drama, "Kong Renés Datter," is one of his best-known works. It was not only played in almost all the theaters of Denmark, but has also been translated ten different times into German (transl. by Leo, 14th ed., Leipsic, 1884). Special mention should also be given Hertz's "Svend Dyrings Hus" (German transl. by Leo, Leipsic, 1848; Eng. transl. by Sir Theodore Martin). Besides his lyrical poems, "Digte fra Forskellige Perioder," 4 vols., 1851–62, Hertz published some novels and two contemporary sketches, "Stemninger og Tilstande," 1839, and "Johannes Johnsen," 1858. His dramatic works ("Dramatiske Værker") were published in eighteen volumes, 1854–73.

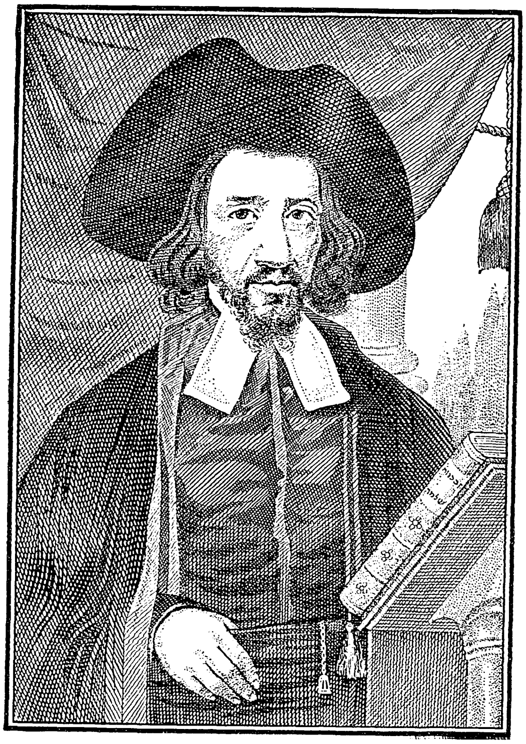
S.



Chief Rabbi Solomon Herschell.

HERTZ, JOSEPH HERMAN: American rabbi; born at Rebrin, Zemplén Comitat, Hungary, Sept. 25, 1872; educated at the College of the City of New York, at Columbia University (Ph.D.), and at the Jewish Theological Seminary, New York. On June 15, 1894, he became rabbi of the Congregation Adath Jeshurun at Syracuse, N. Y., a position which he retained until Aug. 11, 1898, when he became rabbi of the Witwatersrand Old Hebrew Congregation at Johannesburg, South Africa. Hertz was one of those appointed to speak at the Uitlander meeting for the removal of religious disabilities, in Johannesburg July 26, 1899. During the progress of the South-African war Hertz was expelled from the Transvaal by the Boer government for protesting against Jewish disabilities. He returned after the British occupation and resumed his labors.

Hertz is the author of the following works: "The Ethical System of James Martineau," New York, 1894; "Bachya, the Jewish Thomas à Kempis," in the Sixth Biennial Report of the Jewish Theological Seminary Association, New York, 1898; "The Jew as a Patriot: a Plea for the Removal of the Civil Disabilities of the Jews in the Transvaal," Johannesburg, 1898; and several sermons.

Bibliography: *Jewish Year Book*, 1902-03.

J. V. E.

HERTZBERG, JOSEPH: Russian author; born in Moghilef, on the Dniester, at the beginning of the nineteenth century; died there 1870. He received a sound education, and mastered the German, French, and English, besides the Russian, languages. He contributed largely to Hebrew periodicals, and he translated into Hebrew the following works: Mendelssohn's "Morgenstunden," under the title "Mo'ade Shaḥar" (Leipsic, 1845); St. Pierre's "L'Harmonie de la Nature," under the title "Sullam ha-Ṭeba'" (Wilna, 1850); Kant's "Kritik der Reinen Vernunft"; Munk's "Palestine"; and some volumes of Grätz's "Gesch. der Juden." The last three translations, and a volume of poems entitled "Alummat Yosef," he left in manuscript.

Bibliography: Fuenn, *Keneset Yisrael*, p. 465.

H. R. V. R.

HERTZKA, THEODOR: Austrian economist and journalist; born July 13, 1845, at Budapest. He studied at the universities of Vienna and Budapest, and in 1872 became a member of the editorial staff of the "Neue Freie Presse" of Vienna. In 1879 he founded the "Wiener Allgemeine Zeitung," which he edited until 1886. Hertzka has been called the "Austrian Bellamy," because in his "Freiland, ein Soziales Zukunftsbild" (3d ed., Leipsic, 1890), he followed in the steps of the author of "Looking Backward." Other works by Hertzka are: "Die Mängel des Oesterreichischen Aktiengesetzentwurfs," Vienna, 1875; "Das Wesen des Geldes," Leipsic, 1887 (in which he recommended the introduction of the gold standard in Austria); "Die Gesetze der Handelspolitik," *ib.* 1880; "Das Personenporto: Ein Vorschlag zur Durchführung eines Billigen Einheitstarifs im Personenverkehr der Eisenbahnen," Vienna, 1885; "Die Gesetze der Sozialen Entwickelung," Leipsic, 1886; and "Wechselkurs und Agio," Vienna, 1894.

HERTZVELD, ESTELLA DOROTHEA SALOMEA: Dutch poetess; born at The Hague July 14, 1837; died at Arnhem Nov. 4, 1881; granddaughter of Chief Rabbi H. J. Hertzveld of Zwolle. The Dutch poet Wilhuys had great influence on her poetical education, and through him her first important poem, "Elias in de Woestijn," appeared in the "Israëlietische Jaarboekje" of 1852.

Estella Hertzveld, who was sincerely religious, chose the subjects of her poems mainly from the Bible; and there appeared successively in the "Israëlietische Jaarboekje" "Tocht der Israëlieten Door de Roode Zee," "De Opneming van Elias," and "Pauls Dood."

To the list of her best productions belong "God Redt" (1856), which she wrote for the benefit of the victims of a flood; and "Januari, 1861," both of which appeared in the "Tot Nut en Oefening." Her poems "Poëzij" and "Het Triomflied der Beschaving" have been printed as specimens in J. P. de Keyser's "History of Dutch Literature in the 19th Cent." Among other poems from her pen the following may be mentioned: "Na den Storm" and "Roem," 1859; "Het Gebed," "Abram," and "Bergen en Valleien," 1860; "Maria Theresia," 1861; "De Priesterzegen" and "Lied der Negerin, Een Dag Voor de Vrijheid," 1863; "De Menschenhater," 1864; and "Maximiliaan van Oostenrijk," 1868. She also wrote prayers and songs for the consecration of a new synagogue and a new schoolhouse.

In anticipation of approaching death she arranged a collection of her poems, which was dedicated to her children and published at The Hague in Oct., 1881. She died a few weeks later.

Her younger sister, **Maria Hertzveld,** was more inclined toward narrative poetry. She translated into Dutch Charlotte Montefiore's "The Diamond Isle," and wrote some independent stories.

HERTZVELD, HARTOG: Dutch rabbi; born at Glockau Nov. 19, 1781; died at Zwolle Jan. 30, 1864. He was the son of the rabbi of Königsberg, and went as a young man to Amsterdam, where he was educated by Rabbi Löwenstamm, whose daughter he married in 1797. Hertzveld was appointed rabbi of Nijkerk, whence he was called in 1808 to Zwolle. He was the first Jew who preached in the Dutch language.

Hertzveld intended to organize the Jewish congregations of Holland and to reform the service in the synagogue. For this purpose he invited his colleagues to a synod; but they suspected him of Reform ideas similar to those which flourished in Germany, and declined the invitation. To defend himself against many attacks from the opposing rabbis he wrote, March 17, 1842, a pastoral message.

Hertzveld was decorated by King William II. with the Netherlands Lion, being the first Dutch rabbi upon whom this honor was conferred.

S. E. SL.

HERXHEIMER, SALOMON: German rabbi; born Feb. 6, 1801, at Dotzheim, near Wiesbaden; died Dec. 25, 1884, at Berenberg. At the age of thirteen he began his theological studies at Mayence, in the yeshibah of Rabbi Herz Scheyer, applying himself assiduously at the same time to secular studies under Michael Creizenach. Four years later he left Mayence to accept a position as private tutor at Herborn, Nassau, where he remained until 1824. In that year he entered the University of Marburg, where he studied pedagogy, history, and Oriental languages.

After three years at Marburg, he went to Göttingen; after passing (1827) the necessary examination, he was appointed religious instructor at Eschwege, and became district rabbi Nov. 6, 1830. While at Eschwege he wrote "Yesode ha-Torah," which reached its twenty-ninth edition in 1883.

While untiring in his efforts for the moral elevation of the young, Herxheimer's chief aim was the development of agricultural pursuits among his coreligionists. He also devoted much time and effort to the amelioration of the condition of Palestinian and Turkish Jews. In addition to the "Yesode ha-Torah" he wrote: "Der Pentateuch im Hebräischen Texte mit Worttreuer Uebersetzung und mit Fortlaufender Erklärung," 1841; "Die Propheten und Hagiographen im Text mit Uebersetzung und Fortlaufendem Commentar," 1841–48 (see JEW. ENCYC. iii. 193, *s.v.* BIBLE TRANSLATIONS); "Israelitische Glauben- und Pflichten-Lehre," 1836.

S. M. GAR.

HERZ, CORNELIUS: French electrician; born in Besançon 1848; died in Bournemouth, England, July 6, 1898. Herz's parents were Germans who had emigrated to France. He went through the Besançon schools, studied medicine in Germany, and settled in Paris, where he had a severe struggle with poverty. He served through the Franco-Prussian war of 1870–71 in the army of the Loire, becoming adjutant, and at the close of the war was made foreign member of the Legion of Honor. He then went to the United States, where he became a naturalized citizen, obtained a medical diploma, married Miss Sarony of Boston, and established an electrical business in San Francisco. In 1877 he returned to Paris, and started an electric-light business, founded the Electric-Force Transmission Company under the Marcel Despretz patents, endeavored to secure control of the telephone company, and formed (in 1879) the Paris Electric-Light Company. He now rose rapidly, and in 1880 was made a grand officer of the Legion of Honor. He was implicated in the Panama Canal scandal as the chief intermediary between the Panama Canal Company and the bribed deputies, and claimed to have in his possession all the documents and correspondence relating to that imbroglio. Tracked by detectives, he fled to Italy, thence to Germany, and finally found refuge in England. The French courts condemned him to five years' imprisonment, and his name was expunged from the roll of the Legion of Honor. The French government applied persistently but unsuccessfully for his extradition. In 1897 he offered to make a full disclosure to the Panama Inquiry Committee, but when the committee was about to start for Bournemouth he withdrew his promise.

S. N. D.

HERZ, ELISE, VON LÄMEL: Austrian philanthropist; born at Prague Dec. 20, 1788; died at Vienna July 25, 1868. Her home in Prague was an intellectual center. On the death of her husband in 1850 she went to Vienna, where she became an honorary member of the Jewish community. She founded the Children's Asylum at Jerusalem, commissioning Ludwig August FRANKL with its organization. This asylum is intended chiefly for Jewish children, but a limited number of Christian and Mohammedan children are also received. See JERUSALEM.

S. B. TE.

HERZ, HENRI: Austrian pianist; born at Vienna Jan. 6, 1806; died at Paris Jan. 5, 1888. He commenced his studies at Coblenz under the guidance of his father, and later studied there with Hünten. In 1816 he entered the Conservatoire at Paris, where, after a course of several years with Reicha, Pradher, and Dourlen, he was graduated, receiving the first prize for pianoforte-playing. The concerts given by Moscheles at Paris in 1820 exercised great influence upon Herz's style, which now became most brilliant.

In 1831 Herz accompanied the violinist Lafont to Germany, and in 1838–39 they made another tour, through Holland and France, but this was suddenly terminated by the tragic death of Lafont, who was thrown out of his carriage and instantly killed.

In 1838 Herz gave a series of concerts in England, Ireland, and Scotland, playing twelve times in Dublin alone. Four years later he was appointed professor of piano at the Conservatoire at Paris, and soon was held in high repute as a teacher. Being unsuccessful in a business venture which he had undertaken at this time, Herz in 1845 made a concert tour through the United States, Mexico, the West Indies, Peru, and Chile, returning to Paris in 1851. It was during this journey that, at the request of General Herrera, President of Mexico, he composed the hymn which has since remained the national anthem of that country.

Upon his return to France Herz established a piano manufactory, his instruments receiving the first prize at the Paris Exposition of 1855. He resigned his position at the Conservatoire in 1874.

Although immensely popular thirty or forty years ago, very few of the compositions of Herz (comprising in all about 200 pieces) are played to-day. They include pianoforte concertos, nocturnes, dances, marches, and fantasies. His "Air Tyrolien Varié" (1818) and "Methode Complète de Piano" deserve special mention. His experiences in America were published in a series of letters to the "Moniteur Universel," and were published in book form under the title "Mes Voyages en Amérique," Paris, 1866.

S. J. SO.

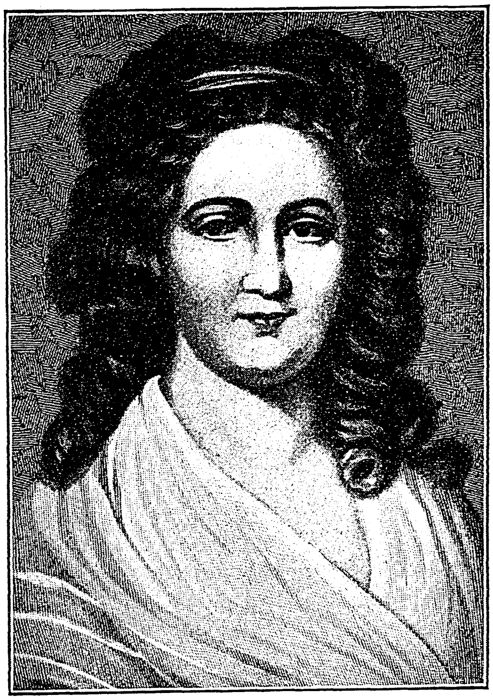
HERZ, HENRIETTE: German leader of society; born in Berlin Sept. 5, 1764; died there Oct. 22, 1847. From her father, De Lemos, a physician, descended from a Portuguese Jewish family of Hamburg, she inherited intellectual ability; from her mother, energy and philanthropic spirit; and from both, extraordinary beauty. Her queenlike bearing, her finely cut and delicately colored Spanish type of face, continued, even after she had passed middle life, to arouse admiration. But the homage paid her from childhood up left traces in her character; she was vain and domineering.

Henriette's education was conducted at home, in part by her father, to whom she was fervently attached. Her linguistic attainments were remarkable. She knew French, English, Spanish, Italian, and Greek, enough Hebrew to read the Bible and its commentaries, and some Portuguese, Danish, and Latin. In old age she attempted Turkish, and under Bopp obtained a slight knowledge of Sanskrit. Besides, she was interested in the sciences; and her literary judgment was deferred to by authors of repute.

This almost scholarly equipment was acquired chiefly after marriage, through her husband (much older than herself), the physician Hofrat Markus HERZ, whom she married at fifteen (Dec. 1, 1779). Henriette's beauty, wit, goodness of heart, and social graces made his house the resort of the most distinguished men and women in Berlin. Among her friends and acquaintances were Jean Paul Richter, Schiller, Mirabeau, Rückert, Niebuhr, Johannes von Müller, the sculptor Schadow, Solomon Maimon, Gentz, Fanny von Arnstein, Madame de Genlis, and Princess Luise von Radziwill. Her idol Goethe, to whose cult her salon was devoted, she met once, in Dresden (1810). Her intimates were her pupil in Hebrew, Alexander von Humboldt, who corresponded with her in the Jewish cursive script; Friedrich von Schlegel, whose marriage to Dorothea Mendelssohn-Veit became possible through her intermediacy; and especially Schleiermacher, her daily visitor during his first sojourn in Berlin. Schleiermacher addressed her familiarly with "thou" and as

"Jette," and read Shakespeare, "Wilhelm Meister," and the Greek poets with her. She in turn taught Schleiermacher Italian, and stimulated him to undertake independent literary work.

The intimacy of Henriette with Schleiermacher was town talk: it even furnished a subject to the caricaturists. Yet it was a purely Platonic friendship. However much Henriette may have subscribed to the prevalent theories, her own conduct, regulated by sound sense and a rigid conception of duty, was above reproach. Her relation to Börne is an instance in point. The youth of seventeen came to live with the Herzs in 1802, and fell desperately in love with his hostess. Tactfully she diverted his passion into quieter channels, and later she became his friendly adviser.



Henriette Herz.

Her husband trusted Henriette implicitly, and in turn inspired her, if not with passionate love, at least with devoted respect. She mourned him sincerely on his death in 1803. Left in straitened circumstances, she had to resort to teaching to support her blind mother, a sister, and herself. Though material cares had a depressing effect upon her humor, she rejected, out of deference to her mother, enticing offers of marriage and of positions, because they involved acceptance of Christianity. A few weeks after her mother's death she yielded to Schleiermacher's importunities, and was baptized (June, 1817). In her old age, at the request of Alexander von Humboldt, Frederick William IV. of Prussia granted her a pension on the ground of her public activities, especially her unremitting efforts to relieve distress during the Napoleonic wars.

Except a short period in Prenzlau, Hofrätin Herz's life was spent in Berlin. Occasionally she took short journeys to the Harz Mountains, to Rügen, and to Dresden. In the galleries of Dresden she discovered that she was more sensible to the beauties of art than to those of nature. Her longest journey was to Rome in 1819, with the family of Wilhelm von Humboldt.

In the way of literary productions, Henriette Herz left little. She published, in 1799 and 1800, two works of travel translated from the English with the help of Schleiermacher. Later she wrote two novels, which, like her extensive correspondence, she destroyed before her death. Her reminiscences ("Erinnerungen an Schleiermacher") were not, strictly speaking, her work; they were told by her, but recorded by others.

Deutsche Biographie*, vol. xii.; Julius Fürst, *Henriette Herz, Ihr Leben und Ihre Erinnerungen*, 1850, 1858; *Aus Schleiermacher's Leben in Briefen*, 2d ed., 1860; *Briefe des Jungen Börne an Henriette Herz*, 1861; Kayserling, *Die Jüdischen Frauen*, 1879, pp. 198-208; Nahida Remy, *Das Jüdische Weib*, n.d., pp. 231-234.

S. H. S.

HERZ, JACOB: German physician; born at Bayreuth Feb. 2, 1816; died at Erlangen Sept. 27, 1871; educated at the gymnasium of Bayreuth and the University of Erlangen (M.D. 1839). Establishing himself as physician in Erlangen, he became in 1841 assistant at the surgical clinic of the university. Notwithstanding the fact that he was unable to become a privat-docent in the university on account of his faith, he delivered free lectures there. In 1847 he was appointed prosector. The following year he spent in Vienna, taking a post-graduate course. Under a liberal government in 1862 he became privat-docent with the title of professor, and in 1863 assistant professor. During the Austro-Prussian war (1866) he was very active as surgeon, and in the same year he received the freedom of the city of Erlangen for his services. In 1869 he was elected professor. During the Franco-Prussian war (1870-71) he again acted as surgeon.

Herz was very successful both as teacher and as practising physician.

Among his works may be mentioned: "De Enchondromate," Erlangen, 1843, a résumé of his operations on clubfeet; "Versuch mit Schwefeläther," in the Augsburg "Allgemeine Zeitung," 1847, Supplement, No. 37; "Anatomische Beobachtungen und Physiologische Versuche an den Leichen von Zwei Hingerichteten" (together with Gerlach and Dittrich), in "Prager Vierteljahresschrift," xxxi. 65 *et seq.*

The city of Erlangen erected a monument to him in 1875.

HERZ, JACQUES-SIMON: Pianist; born at Frankfort-on-the-Main Dec. 31, 1794; died at Nice Jan. 27, 1880. He went to Paris when a child, and in 1807 was admitted to the Conservatoire, where he studied piano under Pradher. Herz became a distinguished pianist, and inaugurated a series of very successful concerts. For some years he played and taught in England. Returning to Paris in 1857, he was appointed assistant professor of piano at the

Conservatoire, where his brother, Henri Herz, was professor. Among Herz's compositions may be mentioned his two violin sonatas, a horn sonata, and a waltz.

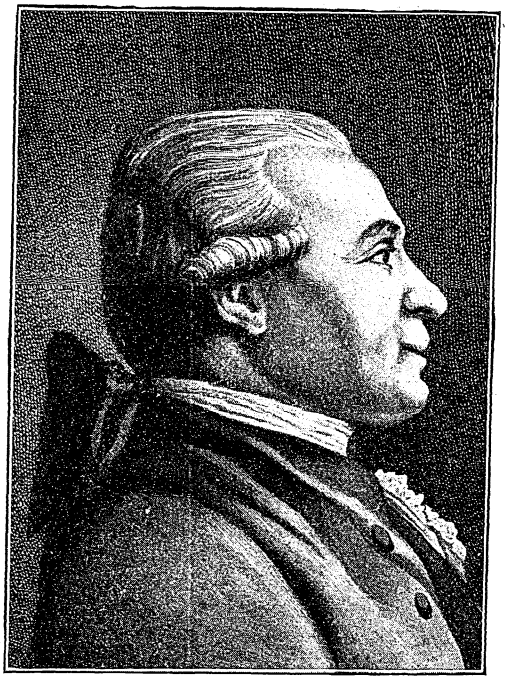
s. V. E.

HERZ, MARKUS: German physician and lecturer on philosophy; born June 17, 1747, at Berlin; died there Jan. 19, 1803. The son of very poor parents, he was destined for a mercantile career, and in 1762 went to Königsberg, East Prussia. He soon gave up his position as clerk and attended the university, becoming a pupil of Kant, but was obliged to discontinue his studies for want of means. He thereupon became secretary to the wealthy Russian Ephraim, traveling with him through the Baltic Provinces. In 1770 he returned to Germany and studied medicine in Halle, where he became an M.D. in 1774, in which year he established himself in Berlin, being appointed physician at the Jewish hospital. In 1777 he commenced to deliver public lectures on medicine and philosophy, which were well attended by the students and the principal personages of the Prussian capital. At some of them even members of the royal family were present.



Markus Herz.

Herz married in 1779 Henriette de Lemos (see Henriette Herz); and their house was for a long time the rendezvous of Berlin's political, artistic, and literary celebrities. In 1782 he became ill through overstudy, and had to give up his lectures till 1785, when a sojourn in Pyrmont restored his health. In 1791 he received the title of professor of philosophy at the academy and that of "Hofrath," but lectured only a few years, giving most of his time to his medical practise. Herz was a friend and pupil of Moses Mendelssohn, and was also well acquainted with Lessing.

Herz was the author of: "Betrachtungen aus der Spekulativen Weltweisheit," Königsberg, 1771; "Freimüthige Kaffeegespräche Zweier Jüdischer Zuschauerinnen über den Juden Pinkus," Berlin, 1772, a satirical essay; "Versuch über die Ursachen der Verschiedenheit des Geschmacks," Mitau, 1776; "Briefe an Aerzte," Berlin, 1777-84; "Grundriss der Medizinischen Wissenschaften," *ib.* 1782; "Versuch über den Schwindel," *ib.* 1786, 2d ed. 1791, an important study; "Grundlage zu den Vorlesungen über die Experimental-Physik," *ib.* 1787; "Ein Sendschreiben an die Redaktion der Meassefim über das zu Frühe Beerdigen der Todten bei den Juden," *ib.* 1789.

Compulsory vaccination was strongly condemned by Herz, and in 1801 he wrote an open letter on the subject to Dr. Dohmeyer, under the heading "Ueber die Brutalimpfung."

HERZ-MEDELSHEIM. See Cerfbeer, Herz, of Medelsheim.

HERZBERG-FRÄNKEL, LEO: Austrian writer; born at Brody, Galicia, Sept. 19, 1827. At the age of seventeen he went for a year to Bessarabia, and on his return published "Bilder aus Russland und Bessarabien," and made contributions to Wertheimer's "Jahrbuch für Israeliten." After the Vienna revolution in 1848 Herzberg-Fränkel went to the Austrian capital and was employed on Saphir's "Humorist," and then on the "Oesterreichischer Lloyd"; later he became one of the editors of the "Reichszeitung." In 1856 Herzberg-Fränkel was appointed chief clerk of the Chamber of Commerce and Industry at Brody. For forty years he continued to occupy this post; was then pensioned, and now lives in summer at Teplitz, Bohemia, and in winter at Meran, southern Tyrol, occupying his leisure with literary work. In recognition of his long services as member of the city council, inspector of schools, and president of the musical society, he received from the Emperor of Austria the gold medal of merit, and a special medal of honor for his faithful work in the Chamber of Commerce.

Herzberg-Fränkel's chief publications are: "Die Einsiedlerin auf Louisiana"; "Polnische Juden," 1866 (2d ed., 1877; 3d ed., 1888), which was translated into French, Polish, Russian, and Hebrew; "Geheime Wege," Prague; and "Die Juden in Galizien," 1897, an ethnographical contribution to the "Oesterreich-Ungarn in Wort und Bild," a collective work published under the auspices of the imperial prince Rudolf.

s. S. Man.

HERZBERG-FRÄNKEL, SIGMUND: Austrian historian; born at Brody, Galicia, March 7, 1857; son of Leo Herzberg-Fränkel. He studied law at the University of Vienna (from 1874), and, later, history at Leipsic, Berlin, and Vienna (Ph.D

1880). He continued his studies as a member of the Institut für Oesterreichische Geschichtsforschung. In 1887 he became privat-docent in medieval history at the University of Vienna; in 1893 he was appointed assistant professor, in 1895 professor, of general history at the University of Czernowitz. His works include: "Die Aeltesten Land- und Gottesfrieden in Deutschland" (1883); "Gesch. der Deutschen Reichskanzlei, 1246–1313" (1885); "Das Aelteste Verbrüderungsbuch von St. Peter in Salzburg"; "Kaiserurkunden in Abbildungen" (No. viii. of Sybel-Sickel's "Kaiserurkunden," 1887); "Die Nekrologischen Quellen der Dioecese Salzburg"; "Bestechung und Pfründenjagd am Deutschen Königshofe" (1895); "Die Brüderschafts- und Wappenbücher von St. Christoph am Arlberg" (1900). He also edited "Monumenta Germaniæ Necrologica ii." and "Johannis Wyclif de Simonia" (with Dziewicki, 1898). S.

HERZENSTEIN, GRIGORI MARKOVICH: Russian physician; born in St. Petersburg 1851; died there 1899. He graduated from the St. Petersburg Medico-Surgical Academy in 1874 and from 1887 was an adjunct professor there of medical geography and statistics. His main and most important work is his thesis for the doctorate, "Sifilis v Rossii," St. Petersburg, 1885. Among his other numerous works are: "Sanitarnye Poryadki Vostochnoi Voiny," in "Vrach," 1881; "Fizicheskiya Kachestva Russkikh Novobrantzev," in "Trudy Voennosanitarnavo Obshchestva," iii.; "Ocherki Sanitarnavo Sostoyaniya Yevreistva," sketches on the sanitary conditions of the Jews, in "Voskhod," 1884.

Herzenstein was a collaborator on the "Medical Encyclopedia" of Eilenburg and Afanasyev, editing the department of medical geography and statistics.

Bibliography: *Entziklopedicheski Slovar*, vol. viii., St. Petersburg, 1893.

H. R. M. R.

HERZENSTEIN, SOLOMON MARKOVICH: Russian zoologist; born 1854; died 1894; graduated in natural sciences and mathematics from the St. Petersburg University; appointed in 1880 custodian of the zoological museum of the Imperial Academy of Science. He was commissioned in 1880, 1884, and 1887 to proceed to the Murman coast of the Kola peninsula to study the mollusks and fishes there; and his "Materialy k Faunye Murmanskavo Berega i Byelavo Morya," published in the "Trudy" of the St. Petersburg Obshchestvo Yestestvoispitatelei, 1885, has become a standard work. Together with N. L. Varpakhovski, he wrote "Zamyetki po Ikhtologii Basseina Ryeki Amura," *ib.* 1887, and "Nauchnye Rezultaty Puteshestvi Przevalskavo," *ib.* 1888–91; "Ryby," St. Petersburg, 1888–91; "Ichthyologische Bemerkungen," in "Bulletin de l'Académie des Sciences de St. Petersburg," xiii., book 1, 2, 1890–92.

Bibliography: *Entziklopedicheski Slovar*, vol. viii., St. Petersburg, 1893.

H. R. M. R.

HERZFELD, ADOLF: German actor; born April 9, 1800, at Hamburg; died at Vienna March 24, 1874; son of Jacob Herzfeld. He made his début in Hamburg in 1821, where he played until 1829, when he was engaged for the Burgtheater, Vienna. There he stayed for forty years, retiring in 1869.

Herzfeld acted principally in dramas and comedies, his rôles being those of the bon-vivant and the man of the world.

Bibliography: Eisenberg, *Biog. Lex.*

S. F. T. H.

HERZFELD, ALBRECHT: Austrian actor; born June 7, 1840, at Vienna; son of Adolf Herzfeld. He received his education at the gymnasium of his native town, and entered a wholesale business house there as an apprentice. But, like his father, he soon forsook mercantile life and became an actor, appearing for the first time at Linz in 1857.

After taking part in the Austro-Italian war (1859) as a volunteer, he filled theatrical engagements at Brünn (1861–64); Leipsic (till 1870); the Hoftheater, Mannheim (till 1877); the Stadttheater, Leipsic (1877); the Stadttheater, Vienna (1878); and the Hoftheater, Stuttgart (1879). In 1889 he left the stage, and after a short stay in Vienna settled in the mountains of Carinthia; but removed in 1900 to Ratisbon, where he has since lived, devoting most of his time to writing for the stage.

His son, **Leo Herzfeld** (born 1872), also an actor, is engaged at the Stadttheater of Hermannstadt, Transylvania.

Bibliography: Eisenberg, *Biog. Lex.*

S. F. T. H.

HERZFELD, JACOB: German actor and theatrical manager; born at Dessau Jan. 3, 1769; died at Hamburg Oct. 24, 1826. After studying medicine at Leipsic University he became an actor, making his début in Vienna. In 1791 he was engaged at the Hamburg theater under Schröder, whose assistant manager he became in 1798. In 1812 he was appointed manager of the Stadttheater, and retained the position till his death.

Although a well-known actor, Herzfeld's reputation rests on his managerial successes. An interesting reference to his correspondence with Goethe is found in H. Uhde's work, "Das Stadttheater in Hamburg, 1827–77." Herzfeld also corresponded with Schiller.

Herzfeld was married (1796) to the actress **Karoline Amalie Stegmann** (born at Königsberg 1766; died at Hamburg Sept. 20, 1812).

Bibliography: Eisenberg, *Biog. Lex.*

S. A. Ph.

HERZFELD, JACOB: German chemist; born at Mülheim, near Cologne, June 17, 1859; educated at the gymnasium and technical high school of Charlottenburg, and the University of Berlin (Ph.D. 1886). In 1885 he became director of the dyeing department of the royal weaving and dyeing school at Mülheim, of which he became chief in 1892. The following year he entered the publishing-house known as "Fischer's Technologischer Verlag," Berlin, and founded the "Electrochemische Zeitung." In 1895 he removed to Cologne in connection with a firm of chemical manufacturers of which he had become a member. Since 1900 he has lived in Fürth, Bavaria, occupied in scientific research.

Herzfeld is an authority on weaving, dyeing, and printing, and has written several books on this subject. Among these may be mentioned: "Mikroskopische Untersuchung der Textilstoffe," Berlin, 1885; "Bleichmittel, Beizen und Farbstoffe," Berlin, 1889, 2d ed. 1900; "Bleicherei der Garne und Gewebe," Berlin, 1891, 2d ed. 1903; "Praktisches Handbuch des Zeugdrucks" (with Dr. Lauber), Leipsic, 1892; "Praxis der Färberei," Berlin, 1893; "Die Dampfwäscherei," *ib.* 1894; "Moderne Baumwollstückbleicherei," Frankfort-on-the-Main, 1895; "Technische Prüfung der Garne u. Gewebe," Vienna, 1896 (English transl., London, 1900); "Chemie der Seltenen Erden," Berlin, 1900 (English transl., London, 1902).

S. F. T. H.

HERZFELD, LEVI: German rabbi and historian; born Dec. 27, 1810, at Ellrich; died at Brunswick March 11, 1884. Having chosen the rabbinical career, he studied under Chief Rabbi Abraham Bing at Würzburg, and under District Rabbi Egers at Brunswick. In 1833 he went to the University of Berlin, at the same time completing his Talmudic studies with Rabbis Oettinger and Rosenstein, and with Leopold Zunz. Herzfeld took his degree (Ph.D.) in 1836, and shortly after was called by Egers, who had become blind, as his assistant at Brunswick. In 1842 he succeeded his master as "Landesrabbiner," retaining that office until his death. In 1879 the Duke of Brunswick conferred upon him the title of professor.

Levi Herzfeld.

Herzfeld displayed great activity, both as rabbi and as writer. His historical works embody the results of painstaking research and show the analytical power of the author; they are therefore indispensable to the student of Jewish history and Jewish religion. With Ludwig Philippson he convoked the first rabbinical convention at Brunswick, where, as well as in the subsequent conventions at Frankfort and Breslau, he advocated a moderate Reform, remaining himself a strict observer of the traditions.

Herzfeld's writings include: "Kohelet, Uebersetzt und Erläutert," Brunswick, 1838; "Das Deutsche in der Liturgie der Braunschweiger Synagoge," 1844; "Vorschläge zu einer Reform der Jüdischen Ehegesetze," *ib.* 1846; "Geschichte des Volkes Jisrael von der Zerstörung des Ersten Tempels bis zur Einsetzung des Makkabäers Schimon zum Hohenpriester und Fürsten," 3 vols., *ib.* 1847 (Nordhausen, 1855–57; abridged edition, 1870); a volume of sermons, 1858 (2d ed. Leipsic, 1863); "Minḥat Zikkaron," a primer for Jewish schools, 1861 (2d ed. 1866); "Metrologische Voruntersuchungen zu einer Geschichte des Ibräischen, Respektive Altjüdischen Handels," *ib.* 1863–65; "Zwei Vorträge über die Kunstleistungen der Alten Juden," *ib.* 1864; "Handelsgesch. der Juden des Alterthums," Brunswick, 1879; "Einblicke in das Sprachliche der Semitischen Urzeit, Betreffend die Entstehungsweise der Meisten Hebräischen Wortstämme," Hanover, 1883.

S. G. R.

HERZL, SIEGMUND: Austrian merchant and novelist; born at Vienna May 26, 1830; died there Feb. 9, 1889. He wrote: "Liederbuch eines Dorfpoeten," 1853; "Lieder eines Gefangenen," 1874; "Prager Elegien," 1880. He translated Petöfi's poems. Herzl retired from business in 1885.

BIBLIOGRAPHY: Eisenberg, *Das Geistige Wien*, i. 207.

S. F. T. H.

HERZL, THEODOR: Leader of political Zionism; born in Budapest May 2, 1860. Herzl settled in Vienna in his boyhood, and was educated there for the law, taking the required Austrian legal degrees; but he devoted himself almost exclusively to journalism and literature. His early work was in no way related to Jewish life. He acted as correspondent of the "Neue Freie Presse" in Paris, occasionally making special trips to London and Constantinople. His work was of the feuilleton order, descriptive rather than political. Later he became literary editor of the "Neue Freie Presse" (which post he still holds). Herzl at the same time became a writer for the Viennese stage, furnishing comedies and dramas.

Theodor Herzl.

Becomes Leader of the Zionists.

From April, 1896, when the English translation of his "Judenstaat" appeared, his career and reputation changed. Herzl has not confessed to what particular incident the publication of his "Jewish State" (see ZIONISM) in the winter of 1895 was due. He was in Paris at the time, and was no doubt moved by the Dreyfus affair. His forerunners in the field of Zionism date through the nineteenth century, but of this perhaps he was least aware. Herzl followed his pen-effort by serious work. He was in Constantinople in April, 1896, and on his return was hailed at Sofia, Bulgaria, by a Jewish deputation. He went to London, where the Maccabeans received him coldly. Five days later he was given the mandate of leadership from the Zionists of the East End of London, and within six months this mandate was approved throughout Zionist Jewry. His life now became one unceasing round of effort. His supporters, at first but a small group, literally worked night and day. Jewish life had been heretofore contemplative and conducted by routine. Herzl inspired his friends with the idea that men whose aim is to reestablish a nation must throw aside all conventionalities and work at all hours and at any task.

In 1897, at considerable personal expense, he founded "Die Welt" of Vienna. Then he planned the first Zionist Congress (see Basel Congress). He was elected president, and held as by a magnet the delegates through all the meetings. He has been reelected unanimously at every congress. In 1898 he began a series of diplomatic interviews. He was received by the German emperor on several occasions. At the head of a deputation, he was again granted an audience by the emperor in Jerusalem. He attended The Hague Peace Conference, and was received by many of the attending statesmen. In May, 1901, he was for the first time openly received by the Sultan of Turkey, and has since been called several times to Yildiz Kiosk on the business of the Zionist movement. He has won the personal esteem of the kaiser and the sultan, and has been repeatedly decorated by the latter.

In 1902-03 Herzl was invited to give evidence before the British Royal Commission on Alien Immigration. As a consequence he came into close touch with members of the British government, particularly with Joseph Chamberlain, then secretary of state for the colonies, through whom he negotiated with the Egyptian government for a charter for the settlement of the Jews in Al 'Arish, in the Sinaitic peninsula, adjoining southern Palestine. On the failure of that scheme, which took him to Cairo, he received, through L. J. Greenberg, an offer (Aug., 1903) on the part of the British government to facilitate a large Jewish settlement, with autonomous government and under British suzerainty, in British East Africa. At the same time, the Zionist movement being threatened by the Russian government, he visited St. Petersburg and was received by De Witte, then finance minister, and Von Plehve, minister of the interior, the latter of whom placed on record the attitude of his government toward the Zionist movement. On that occasion Herzl submitted proposals for the amelioration of the Jewish position in Russia. He published the Russian statement, and brought the British offer before the sixth Zionist Congress (Aug., 1903), carrying the majority with him on the question of investigating this offer.

In the Zionist movement he is officially chairman of the "Grosses Actions-Comité," and of the Vienna executive committee; member of the Council of Administration, and signatory to the deed of trust of the Jewish Colonial Trust. Theodor Herzl holds his position of leadership not only because of the idea he represents, which has always moved the inner consciousness of the Jewish people, but also owing to his personal qualities.

His "Judenstaat" and "Altneuland."

His "Judenstaat," admirable for its central thought, the unity of the Jewish people, is vague and weak in its want of historic grasp. When that element had been supplied, Herzl found himself combated by a large Jewish element, whom he depicted in his play "Das Neue Ghetto." Whereas his first brochure and his first congress address lacked all religious thought, and his famous remark that the return to Zion would be preceded by a return to Judaism seemed at the moment due rather to a sudden inspiration than to deep thought, subsequent events have proved that it was a true prophecy. His latest literary work, "Altneuland," is devoted to Zionism. The author occupied the leisure of three years in writing what he believed might be accomplished by 1923. It is less a novel, though the form is that of romance, than a serious forecasting of what can be done when one generation shall have passed. The key-notes of the story are the love for Zion, the insistence upon the fact that the changes in life suggested are not utopian, but are to be brought about simply by grouping all the best efforts and ideals of every race and nation; and each such effort is quoted and referred to in such a manner as to show that "Old-Newland," though blossoming through the skill of the Jew, will in reality be the product of the benevolent efforts of all the members of the human family.

HERZOG, JAKOB: Austrian writer; born at Misslitz, Moravia, June 17, 1842. He was educated at Brünn, Vienna, and Graz. When only seventeen years of age he wrote for Kuranda's "Ostdeutsche Post." For nearly two years he was secretary of the Jewish community of Vienna. Since 1870 he has edited the Vienna "Montags-Revue," founded by him in conjunction with Michael Klapp.

Herzog is the author of the following plays: "Fischer von Helgoland," produced at the German theater in Prague, 1888; "Die Rose," at the Burgtheater, Vienna, 1891, and at Prague, Hamburg, Olmütz, etc.; "Kaufmann aus Tyrol," 1893, at Salzburg, 1894; "Prinz von Asturien," 1893, at Prague and Hamburg.

HESHBON (חשבון): Town originally belonging to Moab; mentioned in Num. xxi. 25 *et seq.*; Deut. i. 4, iii. 6, iv. 26, xxix. 7; Josh. ix. 10; xii. 2 *et seq.*; xiii. 10, 21; Isa. xv. 4; xvi. 8, 9; Jer. xlviii. 2; Cant. vii. 5 (A. V. 4); Judith v. 15; by Josephus ("Ant." xii. 4, § 11; xiii. 15, § 4; xv. 8, § 5; "B. J." ii. 18, § 1; iii. 3, § 3), and in the "Onomastica Sacra" (117, 29 *et seq.*, 253, 24 *et seq.*). Heshbon, at one time the chief city of Sihon, king of the Amorites, was, when captured by the Israelites, assigned to the tribe of Reuben (Num. xxxii. 3, 37; Josh. xiii. 10, 17, 21). However, the hold of the Israelites upon the territory of Moab was very insecure. It became a Jewish possession in the time of Alexander Jannæus (Josephus, "Ant." xiii. 15, § 4). Jerome mentions Heshbon, under the name "Esbus," as "a notable city of Arabia in the mountains in front of Jericho, twenty Roman miles from the Jordan." Heshbon is mentioned also in the Talmud (Yer. Shebu. vi. 1; see Neubauer, "G. T." pp. 11, 21). At the modern Ḥaṣban, in the Wadi Ḥaṣban, are found remains of a castle, temple, and large reservoir; to the last Cant. vii. 5 (A. V. 4) compares the eyes of the bride of Solomon.

ḤESHWAN (MARḤESHWAN): The eighth month in the Hebrew calendar. The name is not found in the Bible, since it was introduced after the

Babylonian exile, as were the Hebrew names of the other months now in use. "Ḥeshwan" is an arbitrary shortening of "Marḥeshwan," which is the Assyrian "Araḥsamnu" (eighth month; see Delitzsch, "Assyrisches Handwörterb."). The name is found in the Targumim (Jastrow, "Dict.") and in Josephus ("Ant." i. 3, § 3). According to R. Eliezer (R. H.), the 17th of Ḥeshwan was the beginning of the Flood, but according to R. Joshua it began in Iyyar. Ḥeshwan contains sometimes 29, sometimes 30, days. The Biblical name for the eighth month is BUL.

HESPED. See FUNERAL ORATION.

HESS, ERNST FRIEDRICH: German convert to Christianity and anti-Jewish writer; lived in the sixteenth century. He was the author of "Neue Judengeissel, eine Polemische Schrift Gegen Juden und Judenthum" (Fritzlar, 1589; Paderborn, 1600 and 1606; Ratisbon, 1601; Erfurt, 1605; with notes, Frankfort-on-the-Main and Leipsic, 1703; Hamburg, n.d.). The book is cited in Latin writings under the title "Flagellum Judæorum." Hess was the first to spread the slander that the Jews soil the meat which they sell to Christians.

HESS, ISAAC: Advocate of Jewish emancipation in Württemberg; born in Lauchheim, near Ellwangen, in 1789; died Oct. 6, 1866. Destined for the rabbinate, he was sent to the Talmudic school at Fürth, in which he remained four years. With the aim of elevating the Jewish school system, at the time in a very unsatisfactory condition, he brought a memorial before the young king William of Württemberg (1817), urging the establishment of a central bureau for Jewish education. The king named a commission to deliberate on Jewish religious affairs. In 1821 Hess addressed a new memorial to the assembly, which did not fail to accomplish its object.

In 1823 Hess moved to Ellwangen, where no Jew had previously resided. The inhabitants of the town resented his presence, and the interference of the governor, Mohl, was necessary to protect him from violence. The Ellwangen Jewish orphan asylum, the Wilhelmspflege, founded in 1831, was projected by him.

HESS, MENDEL: German rabbi; born at Lengsfeld, Saxe-Weimar, March 17, 1807; died at Eisenach Sept. 21, 1871. He was one of the first Jewish theologians to combine a university education with Talmudical training. From 1828 until his death he was chief rabbi of the grand duchy of Weimar, residing first at Lengsfeld and later at Eisenach. Although the measure had aroused great dissatisfaction among the Jews, he strictly enforced the decree of the government (June 20, 1823) ordaining that Jewish services should be conducted exclusively in the German language and that the reading in Hebrew of sections of the Bible should be followed by their translation into the vernacular.

The position of rabbi as government official became very unpleasant, as he was required to inform against those who failed to attend the services, a requirement which even the progressive Jews, who approved of the ordinance, condemned. Intermarriages between Jews and Christians being allowed in the grand duchy, Hess officially consecrated such nuptials, notwithstanding the proviso that the offspring should be brought up in the Christian faith. In the consecration of Jewish marriages he likewise ignored time-honored traditional rabbinical regulations, and it is said that in his disregard of Jewish sentiment he went so far as to attend a theater on the eve of the Day of Atonement ("Allg. Zeit. des Jud." 1845, p. 62).

Hess was a member of the three rabbinical conferences which (1844–46) convened at Brunswick, Frankfort-on-the-Main, and Breslau, and as such was an advocate of uncompromising radicalism. After 1848 he felt the illiberality of enforced reforms, and petitioned the government to repeal the law which made attendance at the Reform services compulsory ("Allg. Zeit. des Jud." 1853, p. 474).

He edited "Der Israelit des Neunzehnten Jahrhunderts" from 1839 to 1847, and, with Holdheim as coeditor, in 1847 and 1848. Hess also published two collections of sermons and addresses (Eisenach, 1839, 1843).

HESS, MICHAEL: German educator and author; born in Stadt-Lengsfeld, Weimar, April 9, 1782; died at Frankfort-on-the-Main Feb. 26, 1860; brother of Mendel Hess. His father, Rabbi Isaac Hess Kugelmann, destined him for a rabbinical career. After having studied at the yeshibah in Fürth, he went in 1804 to Frankfort-on-the-Main, where he was chosen as teacher for the young baron James von Rothschild. In Oct., 1806, he was elected principal of the Philanthropin, a newly established Jewish school at Frankfort, in which position he remained for forty-nine years. Hess also preached occasionally in the "Andachtssaal" connected with the school. He championed the rights of his coreligionists, and believed in the radical reform of Judaism.

Hess was the author of a number of pamphlets, as: "Ueber den Unterricht in der Religion und Moral" (1821); "Ueber die Wichtigkeit der Sittlichen Erziehung im Frühesten Alter" (1834); "Ueber Anwendung des Ehrtriebs in der Erziehung" (1839); "Ueber Mangelhaftigkeit der Sittlichen Erziehung" (1840); "Hindernisse der Sittlichen Bildung" (1846); "Ueber die Wirkung der Gewohnheit auf Sittliche Bildung" (1852). He also wrote: "Freimüthige Prüfung der Schrift des Herrn Prof. Rühs über die Ansprüche der Juden auf das Deutsche Bürgerrecht" (1816); "Vorläufige Bemerkungen zu der von Paulus Erschienenen Schrift: Die Jüdische Nationalabsonderung . . . mit einer Epistel der Hebräer an Dr. Paulus" (1831).

HESS, MOSES (MORITZ): Jewish socialist and nationalist; born at Bonn June 21, 1812; died in Paris April 6, 1875; buried in the Jewish cemetery at Cologne. His grandfather, who had come from Poland, instructed him in Bible and Talmud, but on the whole he was a self-taught man, having never attended any institution of learning, nor received a thorough technical or professional education of any kind. However, he began his literary activity at an early age, and became editor of the "Neue Rheinische Zeitung." Originally a National-Liberal, he became a Democrat, and later a Social-Democrat, joining Marx and Engels. Together with Karl Grün he exerted about the middle of the last century an important anarchistic influence in Germany by developing and disseminating Proudhon's theories, both with his pen and from the platform. Though he had already turned his back upon Judaism, the Damascus affair reawakened his interest in Jewish matters, and he conceived the idea of the indestructibility of Jewish nationality. He intended to give form to this idea in a "cry of anguish"; but, as he himself says, the stronger feelings aroused by the sufferings of the European proletariat threw his racial patriotism into the background. However, he found little sympathy among his fellow socialists. Shortly after the February Revolution of 1848 he went to France, and soon afterward retired from politics to devote himself exclusively to natural science. The neo-Hegelian Arnold Ruge called him ironically the "communist Rabbi Moses." Berthold Auerbach and Gabriel Riesser, on whose departure from Frankfort he wrote a graceful poem (Brüll, "Monatsblätter," xii. 272), were among his friends.

As early as the sixties of the last century, David Gordon (editor of "Ha-Maggid") at Lyck, Hirsch Kalischer at Thorn, and Elijah Guttmacher advocated the colonization of Palestine, and interested Moses Hess and the historian Grätz in the idea of Jewish nationalism.

"Rom und Jerusalem."

Hess's first work was his "Heilige Geschichte der Menschheit von einem Jünger Spinoza's" (1836). Shortly before his death, which came upon him in the full maturity of his powers, he published a philosophic work, in three volumes, entitled "Die Dynamische Stofflehre." His chief work, however, is "Rom und Jerusalem, die Letzte Nationalitätsfrage" (Leipsic, 1862), in the form of twelve letters addressed to a lady pondering, in her grief at the loss of a relative, over the problem of resurrection. Part of this work has been translated into Hebrew by S. I. Hurwitz in "Ha-Maggid," xxxii., Nos. 26, 27, 32, 35, 36; xxxiii., Nos. 8, 9, 11, 13. A second edition was issued by Bodenheimer (Leipsic, 1899), with a preface; in 1899 this preface reappeared in "Die Welt," iii., No. 43, p. 13.
